

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Winters High School Soil Removal Project Initial Study/Mitigated Negative Declaration

Lead Agency: Winters Joint Unified School District

Contact Name: Ms. Diana Jimenez, Superintendent

Email: djimenez@wintersjUSD.org

Phone Number: 530/795-6100

Project Location: City of Winters

*City*

Yolo

*County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project site is the Winters High School campus located at 101 Grant Avenue, Winters, CA. The project evaluated in the Initial Study/Mitigated Negative Declaration (IS/MND) is the Removal Action Work Plan (RAW) for contaminated soil removal, prepared by Padre Associates, Inc., on behalf of the District, for the Winters High School Modernization Project. The selected response action for identified chemicals of concern (COCs) (dieldrin and lead) in soil is the excavation and off-site disposal of impacted soil. Padre Associates, Inc. calculates that approximately 190 cubic yards (cy) of soil would require excavation and off-site disposal. The generation of dust during the soil removal operations would be minimized as necessary with the use of water as a dust suppressant. Site cleanup and haul-away would be completed in 3 weeks.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed soil removal could affect unrecorded historic period archaeological deposits. Recommended mitigation addressed archaeologist monitoring activities and actions to take should an archaeological deposit be encountered. Mitigation measures also addressed actions to take should an archaeological deposit be encountered when a monitor is not on the site. These included recordation, data recovery and analysis, public outreach, and reporting.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No specific areas of controversy have been identified.

Provide a list of the responsible or trustee agencies for the project.

The California Department of Toxic Substances Control (DTSC) is a responsible agency and would approve the Removal Action Work Plan (RAW) for contaminated soil removal.
