### **Zero Waste Management Plan**

This project will comply with the City's zero waste requirements and goals of 90 percent diversion by 2035 through the following guidelines:

- I. This project will have gravity trash chutes for both waste and recycling.
- II. Compost will be collected in 23G Slim Jim containers placed in each trash chute vestibule.
- III. Signage will be placed in each trash chute vestibule so residents are informed on what can be diverted from the waste stream.
- IV. The current project design provides easy access to all three streams to facilitate diversion.
- V. Building management will meet with the city's designated recycling coordinator to take further steps towards 90 percent diversion.

<b>Year</b>	<b>Pounds per Person</b>	<b>Diversion (%)</b>
2023	5.0	70%
2026	4.0	75%
2029	3.5	80%
2032	2.0	85%
2035	0.5	90%

ATM will work closely with the owner, architect and other stakeholders to design the optimal trash system for the development.
