Background Info: Edwards Air Force Base is an Air Force Command Test Center. The primary function of Edwards is to test new and existing aircraft and integrate them into the present Air Force inventory. The land area occupied by the base is 470 square miles. Within this land area there are 3 separate Air Force Bases, complete with runways and infrastructure; the NASA Dryden Flight Test and Space Shuttle Recovery facilities; the 50+ square mile Phillips Laboratory rocket test facility; the Precision Impact Range Area; and the Rogers and Rosamond Dry Lake Beds. In the past, the base was the home of the U.S. Army Helicopter Flight Test Center and the NASA Jet Propulsion Laboratory. During World War II, the base trained P-38 fighter pilots and B-24 bomber crews. After World War II, the base became a flight test center. The 469 discovered contaminated sites are divided into 10 Operable Units (OU): OU-1, Main Base Flightline; OU-2, South Base; OU-3, Basewide Water Wells; OU-4, Phillips Laboratory; OU-5, NASA/Jet Propulsion Laboratory; OU-6, NASA/Dryden; OU-7, Basewide Miscellaneous; OU-8, NW Main Base Flightline; OU-9, Phillips Laboratory (East); and OU-10, North Base. There is an extensive Archival Research Program underway to locate information leading to the identification of potential past chemical weapon activity on the base (40 + or - sites suspected). There is also an Underground Storage Tank removal program (700 USTs removed). In the summer of 1989, EPA listed Edwards on the National Priority List. A Federal Facility Agreement (FFA) between Edwards, EPA, RWQCB, and DTSC was negotiated and became effective in October 1990.

Environmental Interest/Information System:

TSCA SUBMITTER
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

History: Utility District; and 4) use of site by Kern County for Mojave Administrative Center, respectively. On 6 November 1972, County deeded site to Mojave Airport District or East Kern Airport District. This land was officially accepted by the Mojave Airport District on 8 November 1972. The Mojave Airport facility has continued to improve & expand runways & taxiways. Offices/hangars built by private investors are leased to the airport district, which sublets them to tenants. Prior to 1983, former military airfields had been converted into an active civilian flight test center that now supports business, military, civil, and homebuilt aircraft development testing. By 8 August 1943, the MCAS at Mojave was formally commissioned. During the use of the site by the Marine Corps, runways were widened and extended, and numerous buildings and facilities were constructed. In December 1945 and 15 January 1946, the Aviation Women's Reserve Squadron One and Guard Detachment were decommissioned, and a Naval Air Station was established on 1 February 1946. Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 06/05/2017. The EPA ID number CAL000176369 is inactive. Do not have any more hazardous waste hauled off until this number is reactivated. An application to renew the EPA ID number is attached with this inspection report. Please complete the application and send it to the Department of Toxic Substances Control (DTSC) as indicated on page 4 of the application immediately. DTSC typically reactivates the numbers within 2-3 weeks. If you do not hear anything from them within 3 weeks, please contact me and I can verify if it has been reactivated in their online database. Environmental Interest/Information System:

STATE MASTER
 ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
