COMMUNITY DEVELOPMENT DEPARTMENT

Planning Division

Courthouse - 255 N. Forbes Street

Lakeport, California 95453

Telephone 707/263-2221 FAX 707/263-2225

Dated: **January 28, 2021**

# CALIFORNIA ENVIRONMENTAL QUALITY ACT ENVIRONMENTAL CHECKLIST FORM INITIAL STUDY IS 19-39

1. **Project Title:** Badlands LLC / Damien Ramirez
2. **Permit Number:** Major Use Permit, UP 19-31  
Initial Study, IS 19-39
3. **Lead Agency Name and Address:** County of Lake  
Community Development Department  
Courthouse – 255 North Forbes Street  
Lakeport CA 95453
4. **Contact Person:** Eric Porter, Associate Planner (707) 263-2221
5. **Project Location(s):** 21518 Bartlett Springs Road, Lucerne  
APN: 016-032-01
6. **Project Sponsor's Name/Address:** Badlands LLC / Damien Ramirez  
6028 Sundale Court  
El Dorado Hills, CA 95762
7. **General Plan Designation:** Rural Lands
8. **Zoning:** "RL-WW"; Rural Lands - Waterway
9. **Supervisor District:** District Three (3)
10. **Flood Zone:** None
11. **Slope:** Steep; mostly greater than 30%
12. **Fire Hazard Severity Zone:** SRA – High Fire Risk
13. **Earthquake Fault Zone:** None
14. **Dam Failure Inundation Area:** Not located within Dam Failure Inundation Area
15. **Parcel Sizes:** ±333 acres
16. **Description of Project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation. Attach additional sheets if necessary).**

**(12) A-Type 3: "medium outdoor" licenses:** Outdoor cultivation for adult-use cannabis without the use of light deprivation and/or artificial lighting in the canopy area at any point in time from 10,001 square feet to one acre, inclusive, of total canopy size on one premises. Total proposed cultivation area is 522,720 sq. ft.

**(1) A-Type 13 Self Distribution license.**

The following structures are currently found on and near the proposed cultivation site: a small cabin; a shed for chemical storage; portable toilet; hoop houses from a prior cultivation approval, water tanks and irrigation systems; and access roads. Each cultivation compound may be outfitted with portable toilets; and small sheds for chemical storage.

**Construction**

*According to the applicant, the following is in regards to the site preparation and construction:*

- Ground disturbance and structure construction activities will take place over a 1 month period.
- Materials and equipment will only be staged on previously disturbed areas (the site had been previously used for crop production). No areas will be disturbed for the purpose of staging materials or equipment.
- Construction will occur Monday through Friday from the hours of 8:00 AM to 6:00 PM
- Water from the existing onsite well will be used to mitigate the generation of dust during construction.
- All construction activities, including engine warm-up, will be limited to Monday through Friday, between the hours of 7:00 AM to 7:00 PM.

All equipment will be maintained and operated to minimize spillage or leakage of hazardous materials. All equipment will be refueled in locations more than 100 feet from surface water bodies. Servicing of equipment will occur on an impermeable surface. In an event of a spill or leak, the contaminated soil will be stored, transported, and disposed of consistent with applicable local, state, and federal regulations.

**Post - Construction**

- Between 4 and 8 employees per day would occupy the site
- Trips per day estimated at 8 to 16 Average Daily Trips (ADT)
- No greenhouses are proposed
- Chemicals, fuel and fertilizer to be stored in an on-site shed
- On-grid power is proposed
- Cabin on site to house property caretaker.
- Site is on well and septic system
- Vegetative waste to be chipped and spread on site

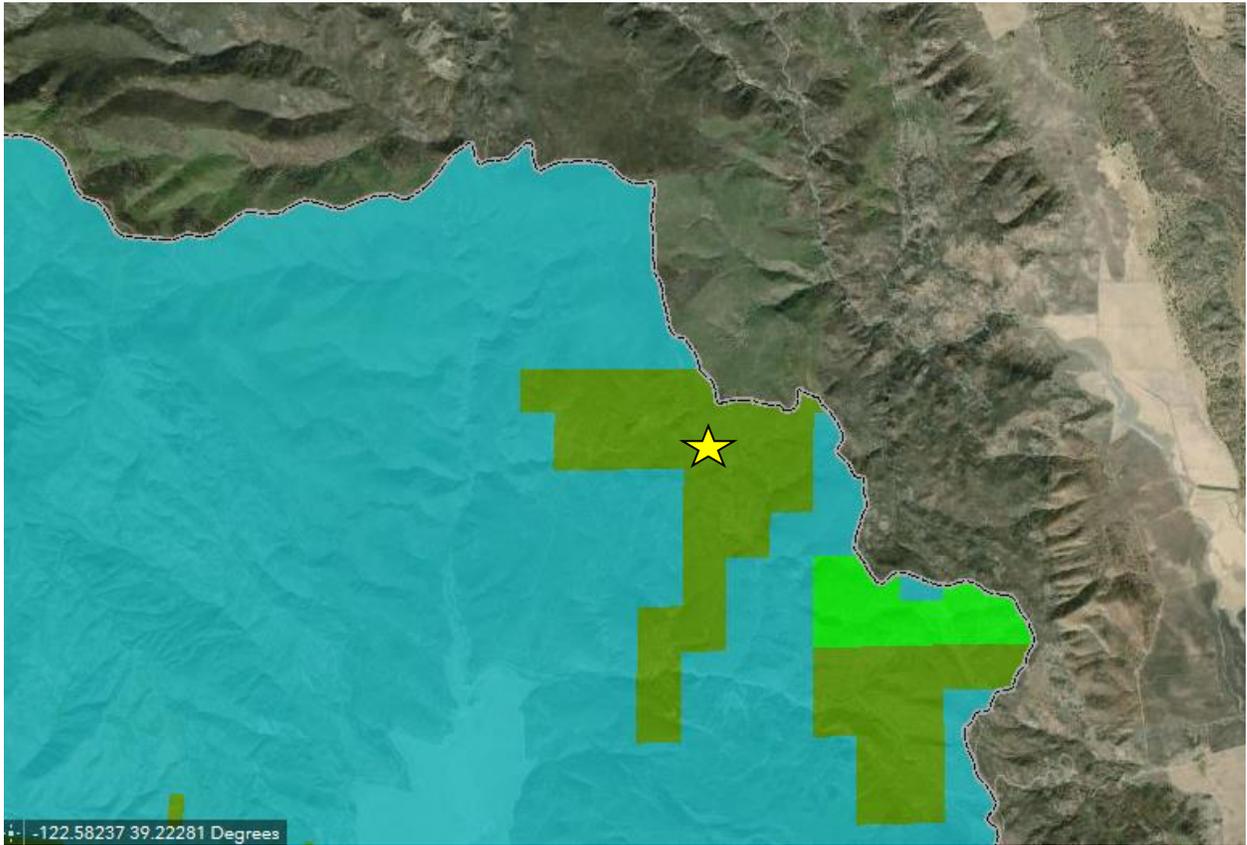

**17. Surrounding Land Uses and Setting: Briefly describe the project's surroundings:**

North: Rural Lands, Colusa County; large, vacant lots

South: Rural Lands, Open Space (BLM Land)

East: Rural Lands, Open Space, Colusa County; large, vacant lots

West: Open Space; vacant land

**Zoning of Site and Surrounding Properties**

**Photo of Site**

**Other public agencies whose approval may be required (e.g., Permits, financing approval, or participation agreement.)**

- Lake County Community Development Department
- Lake County Department of Environmental Health
- Lake County Air Quality Management District
- Lake County Department of Public Works
- Lake County Agricultural Commissioner
- Lake County Sheriff Department
- South Lake County Fire Protection District (CalFire)

Northshore Fire District  
 Central Valley Water Resource Control  
 California Department of Forestry & Fire Protection (CalFire)  
 California Department of Food and Agriculture (CalCannabis)  
 California Department of Pesticides Regulations  
 California Department of Public Health  
 California Department of Consumers Affairs

- 18. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?** Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission’s Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3 (c) contains provisions specific to confidentiality.

All 11 Tribes located in Lake County were notified of this proposal on March 2, 2020 . No tribal comments were received as the result of the AB 52 notice that was sent out to the tribes.

**19. Attachments:**

- Property Management Plan
- Site Plans
- Supplemental Materials

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

*The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a “Potentially Significant Impact” as indicated by the checklist on the following pages.*

- |   |   |   |
|---|---|---|
| <input type="checkbox"/> <u>Aesthetics</u>                      | <input type="checkbox"/> <u>Greenhouse Gas Emissions</u>          | <input type="checkbox"/> <u>Population / Housing</u>                          |
| <input type="checkbox"/> <u>Agriculture &amp; Forestry</u>      | <input type="checkbox"/> <u>Hazards &amp; Hazardous Materials</u> | <input type="checkbox"/> <u>Public Services</u>                               |
| <input checked="" type="checkbox"/> <u>Air Quality</u>          | <input type="checkbox"/> <u>Hydrology / Water Quality</u>         | <input type="checkbox"/> <u>Recreation</u>                                    |
| <input checked="" type="checkbox"/> <u>Biological Resources</u> | <input type="checkbox"/> <u>Land Use / Planning</u>               | <input type="checkbox"/> <u>Transportation</u>                                |
| <input checked="" type="checkbox"/> <u>Cultural Resources</u>   | <input type="checkbox"/> <u>Mineral Resources</u>                 | <input type="checkbox"/> <u>Tribal Cultural Resources</u>                     |

**DETERMINATION: (To be completed by the lead Agency)**

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Initial Study Prepared By:  
Eric Porter, Associate Planner

Community Development Department

#### **SECTION 1 - EVALUATION OF ENVIRONMENTAL IMPACTS:**

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, and then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and

briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).

- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) the significance criteria or threshold, if any, used to evaluate each question; and
  - b) the mitigation measure identified, if any, to reduce the impact to less than significance

**KEY: 1 = Potentially Significant Impact**  
**2 = Less Than Significant with Mitigation Incorporation**  
**3 = Less Than Significant Impact**  
**4 = No Impact**

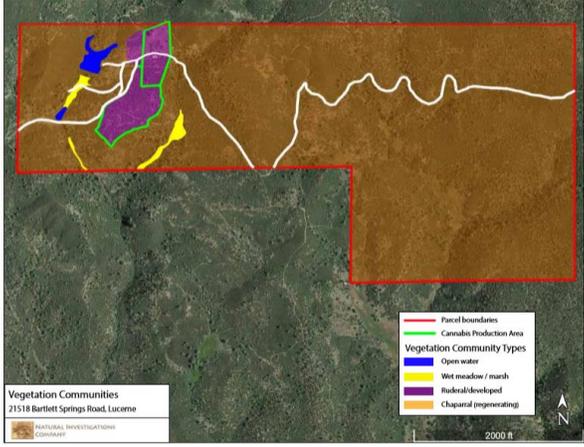

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>I. AESTHETICS</b> <i>Would the project:</i>						
a) Have a substantial adverse effect on a scenic vista?			X		The site is adjacent to Bartlett Springs Road, an unpaved dirt road at this location. The property is 333 combined acres in size, and the cultivation areas are not visible from the road due to the terrain.  The positioning of the cultivation sites will not cause adverse visual impacts to a scenic vista.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 6, 9
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			X		There are no scenic resources on the site, such as trees, rock outcroppings or historic buildings.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 6, 9

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
c) Substantially degrade the existing visual character or quality of public views the site and its surroundings? If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X		The cultivation sites are situated in a manner that makes it difficult or impossible to be seen from Bartlett Springs Road.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 6, 9
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X		The project has very little potential to have substantial light or glare impacts on persons enjoying a day or nighttime view in this area. Any security lighting contemplated would have to be downcast and shielded; this is a standard condition of approval for all cannabis cultivation licenses issued by the County.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 5, 6, 9
<b>II. AGRICULTURE AND FORESTRY RESOURCES</b> <i>In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board.</i> <i>Would the project:</i>						
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?			X		The soil on the site is mapped as 'other soil' (low quality). The County had issued 'early activation' for an outdoor cultivation use on the applicant's site in 2020. The County regards commercial cannabis cultivation to be a crop, and as such this proposed project would not convert farmland that is high quality farmland to a non-agricultural use.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 5, 7, 8, 11, 13
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?			X		The project site does not contain a Williamson Act contract. As proposed, the project will not impact agricultural uses or Williamson Act contracts given that there are no obvious productive agricultural properties in the immediate vicinity.  <b>Less than Significant Impact</b>	1, 2, 3, 4, 5, 7, 8, 11, 13
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X	The proposed project will not conflict with existing zoning and/or cause the rezoning of forest land as defined by Public Resource Code section 4526, or of timberland as defined by Government Code section 51104(g).  <b>No Impact</b>	1, 2, 3, 4, 5, 7, 8, 11, 13
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X	Please see response to Section II (c). The project would not result in the loss or conversion of forest land to a non-forest use.  <b>No Impact</b>	1, 2, 3, 4, 5, 7, 8, 11, 13

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X	As proposed, this project would not induce changes to existing farmland that would result in its conversion to non-agricultural use.  <b>No Impact</b>	1, 2, 3, 4, 5, 7, 8, 11, 13
<b>III. AIR QUALITY</b> <i>Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.</i> <i>Would the project:</i>						
a) Conflict with or obstruct implementation of the applicable air quality plan?		X			<p>The project has potential to result in air quality impacts by generating fugitive dust emissions through ground-disturbing activities, uncovered soil or compost piles, and vehicle or truck trips on unpaved roads. Fugitive dust will be controlled by wetting soils with a mobile water tank and hose, or by delaying ground disturbing activities until site conditions are not windy, and by eliminating soil stockpiles. Construction of the site will be minimal; some hoopouses already exist but require ministerial building permits. Some minor site improvements will be necessary, however the amount of earth that needs to be moved is not significant enough to trigger a grading permit. The staging area for any construction equipment will take place on the portion of the site to be used for employee parking; this area is already disturbed and will not further be degraded by this portion of the site being used as a staging area.</p> <p>Smoke from the burning of brush removed during grading can have a substantial effect on air quality. Lake County Air Quality Management District (LCAQMD) recommends that removed vegetation be chipped and spread for ground cover and erosion control as an alternative to vegetation burning.</p> <p>The applicant plans on using fabric pots rather than in-ground planting to enable the applicant to provide higher quality soil. This will also result in less dust-related particulates. There is no mapped serpentine soil on the site, although some serpentine soil exists in the vicinity.</p> <p><b>Less Than Significant with Mitigation Measures added.</b></p> <p><b>Mitigation measures:</b></p> <p><b><u>AQ-1:</u></b> Prior to obtaining the necessary permits and/or approvals for any phase, applicant shall contact the Lake County Air Quality Management District and obtain an Authority to Construct (A/C) Permit for all diesel powered equipment and/or other equipment with potential for air emissions.</p> <p><b><u>AQ-2:</u></b> All mobile diesel equipment used must be in compliance with State registration requirements. Portable and stationary diesel powered equipment must meet the requirements of the State Air Toxic Control Measures for CI engines.</p> <p><b><u>AQ-3:</u></b> The applicant shall maintain records of all hazardous or toxic materials used, including a Material Safety Data Sheet (MSDS) for all volatile organic compounds utilized, including cleaning materials. Said information shall be made available upon request and/or the ability to provide the Lake County Air Quality Management District such information in order to</p>	1, 3, 4, 5, 10, 21, 24, 31, 36

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
					<p>complete an updated Air Toxic emission Inventory.</p> <p><b>AQ-4:</b> The applicant control dust during site preparation by watering down any disturbed areas on each day of construction.</p> <p><b>AQ-5:</b> All vegetation during site development shall be chipped and spread for ground cover and/or erosion control. The burning of vegetation, construction debris, including waste material is prohibited.</p> <p><b>AQ-6:</b> The applicant shall have the primary access and parking areas surfaced with chip seal, asphalt or an equivalent all weather surfacing to reduce fugitive dust generation. The use of white rock as a road base or surface material for travel routes and/or parking areas is prohibited.</p> <p><b>AQ-7:</b> All areas subject infrequent use of driveways, over flow parking, etc., shall be surfaced with gravel. Applicant shall regularly use and/or maintain graveled area to reduce fugitive dust generations.</p>	
b) Violate any air quality standard or result in a cumulatively considerable net increase in an existing or projected air quality violation?			X		<p>The County of Lake is in attainment of state and federal ambient air quality standards. Burning cannabis waste is prohibited within the commercial cannabis ordinance for Lake County, and use of generators is only allowed during a power outage. On-site construction is likely to occur over a relatively short period of time (estimated between 1 and 2 months), and minimal construction would be required. It is unlikely that this use would generate enough particulates during and after construction to violate any air quality standards.</p> <p><b>Less than Significant Impact</b></p>	1, 3, 4, 5, 10, 21, 24, 31, 36
c) Expose sensitive receptors to substantial pollutant concentrations?			X		<p>The nearest residence (sensitive receptor) appears to be located more than 1000 feet from the nearest cultivation site according to Google Earth map measurement. Lake County Zoning Ordinance, Article 27(at) requires a minimum separation of 200 feet from the nearest off site residence. Also, this general area is characterized by federally owned BLM land as well as privately owned Rural Lands zoned properties that are very sparsely populated.</p> <p><b>Less than Significant Impact</b></p>	1, 3, 4, 5, 10, 21, 24, 31, 36
d) Result in substantial emissions (such as odors or dust) adversely affecting a substantial number of people?		X			<p>The cultivation area on the site was previously disturbed by the Mendo Complex fire. Minimal site disturbance is needed to implement the project as proposed. The applicant will be required to submit an Odor Control Plan as a condition of approval, and will need to mitigate the outdoor cultivation areas through the use of active odor-masking means such as fragrant plants around the perimeter of the outdoor growing area, or passive means such as distance from nearby sensitive receptors, as will likely be the case with this proposal.</p> <p><b>Implementation of mitigation measures AQ-1 through AQ-7 will reduce impacts to less than significant.</b></p>	1, 2, 3, 4, 5, 10, 21, 24, 31, 36

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>IV. BIOLOGICAL RESOURCES</b> <i>Would the project:</i>						
<p>a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?</p>		X			<p>The applicant provided a Biological Site Assessment prepared by Natural Investigations, and dated September 4, 2019. The Assessment stated that the site was badly burned during the 2018 Mendo Complex fire. The study also concluded that there were no threatened or endangered species of flora and fauna that were observed in or near the cultivation areas, but were observed outside the new 8 acre cultivation area. There are no mapped sensitive species in the CNDDDB data base for Lake County.</p> <p>There were certain mitigation measures recommended in the Biological Study; those recommendations are mitigation measures listed below.</p> <p><b>Mitigation measures:</b></p> <p><b>BIO-1: If construction activities would occur during the nesting season (usually March to September), a preconstruction survey for the presence of special-status bird species or any nesting bird species shall be conducted by a qualified biologist within 500 feet of proposed construction areas. If active nests are identified in these areas, CDFW and/or USFWS shall be consulted to develop measures to avoid “take” of active nests prior to the initiation of any construction activities. Avoidance measures may include establishment of a buffer zone using construction fencing or the postponement of vegetation removal until after the nesting season, or until after a qualified biologist has determined the young have fledged and are independent of the nest site. With the implementation of this mitigation measure, adverse impacts upon special-status bird species and nesting birds would be reduced to a less-than significant level.</b></p> <p><b>BIO-2: Wetland habitat may contain special-status plant or animals species. A pre-construction survey for special-status species shall be performed by a qualified biologist to ensure that special-status species are not present. If any listed species or special-status species are detected, construction shall be delayed, and the appropriate wildlife agency (CDFW and/or USFWS) shall be consulted and project impacts and mitigation reassessed.</b></p> <p><b>BIO-3: Wetland habitat within a watercourse is protected under Fish and Game Code Section 1600; a Streambed Alteration Agreement shall be needed before this habitat is disturbed. Issuance of this Agreement requires implementation of avoidance and minimization measures and compensation for habitat loss.</b></p> <p><b>Less than Significant Impact with mitigation measures BIO-1 through BIO-3 added.</b></p>	<p>1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34</p>

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		X			<p>The site contains several mapped riparian habitats that are potentially sensitive natural communities identified on local or state plans or mapping programs available to Lake County. The foothill yellow legged frog was observed in three locations on site, and the Cleveland milk vetch was observed near the eastern property line. All observed sites were well beyond the cannabis sites.</p>  <p>Mitigation measure BIO-3 is intended to bring potential impacts to riparian areas to 'less than significant' levels.</p> <p><b>Less than Significant Impact</b></p>	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 29, 30, 31, 32, 33, 34
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			X		<p>Please see response to IV a and b. The County's CNDDDB GIS layer shows several wetlands and potential riparian areas near the cultivation site. There were no sensitive riparian species observed, however mitigation measure BIO-3 will minimize potential loss related to riparian habitat to 'less than significant levels'. Also, there are no state or federally protected wetlands on the property.</p> <p><b>Less than Significant Impact</b></p>	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			X		<p>The Biological Study submitted stated that there were no observed native resident or migratory fish or wildlife species within the new 8 acre study area.</p> <p><b>Less than Significant Impact</b></p>	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			X		<p>This project does not conflict with any local policies or ordinances protecting biological resources. The trees on site were significantly burned during the Mendo Complex fire. The burned trees will need to be cut down and removed.</p> <p><b>Less than Significant Impact</b></p>	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X	<p>No special conservation plans have been adopted for this site and no impacts are anticipated.</p> <p><b>No Impact</b></p>	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>V. CULTURAL RESOURCES</b> <i>Would the project:</i>						
a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?		X			A Cultural Resources Evaluation was conducted for the subject parcel involved with this proposal by Wolf Creek Archaeology dated September 10, 2018.  Given the relatively large scope of the project, the following mitigation measures are required:  <b>Mitigation measures:</b>  <b><u>CUL-1:</u> Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vicinity of the find(s), the culturally affiliated Tribe shall be notified, and a qualified archaeologist retained to evaluate the find(s) and recommend mitigation procedures, if necessary, subject to the approval of the Community Development Director. Should any human remains be encountered, they shall be treated in accordance with Public Resources Code Section 5097.98 and Health and Safety Code 7050.5.</b>  <b><u>CUL-2:</u> All employees shall be trained in recognizing potentially significant artifacts that may be discovered during ground disturbance. If any artifacts or remains are found, the culturally affiliated Tribe shall immediately be notified; a licensed archaeologist shall be notified, and the Lake County Community Development Director shall be notified of such finds.</b>  <b>Less than Significant Impact with mitigation measures added.</b>	1, 3, 4, 5, 11, 14, 15
b) Cause a substantial adverse change in the significance of an archeological resource pursuant to §15064.5?			X		Please see response to Section V(a). The applicant is proposing minimal site disturbance.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 11, 14, 15
c) Disturb any human remains, including those interred outside of formal cemeteries?		X			Please see response to Section V(a). Less than significant with mitigation measures CUL-1 and CUL-2 added.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 11, 14, 15
<b>VI. ENERGY</b> <i>Would the project:</i>						
a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?			X		The applicant states that she will use an on-grid power system as the primary energy source. The outdoor cultivation areas will have minimal need for power. The likely power sources include the security system, the well pump, and any outdoor security lighting that might be needed.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 11, 14, 15
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X		There are no mandatory energy reductions for cultivation activities within Article 27 of the Lake County Zoning Ordinance unless the applicant proposes 'indoor cultivation' (not proposed with this application).  <b>Less than Significant Impact.</b>	1, 3, 4, 5, 11, 14, 15

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>VII. GEOLOGY AND SOILS</b> <i>Would the project:</i>						
<p>a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:</p> <p>i) Rupture of a known earthquake fault, as delineated on the most recent Alquist- Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.</p> <p>ii) Strong seismic ground shaking?</p> <p>iii) Seismic-related ground failure, including liquefaction?</p> <p>iv) Landslides?</p>			X		<p><u>Earthquake Faults</u> There are no mapped earthquake faults on or adjacent to the subject site.</p> <p><u>Seismic Ground Shaking and Seismic-Related Ground Failure, including liquefaction.</u> The mapping of the site's soil indicates that the soil is stable and not prone to liquefaction.</p> <p><u>Landslides</u> According to the Landslide Hazard Identification Map prepared by the California Department of Conservation, Division of Mines and Geology, the area is considered generally stable.</p> <p><b>Less Than Significant Impact</b></p>	1, 3, 4, 5, 6, 7, 10, 17, 18, 19, 21, 24, 25
b) Result in substantial soil erosion or the loss of topsoil?			X		<p>Minimal grading and/or earth movement will result with this project. The applicant will need to import soil for the pots, however this will not have any effect on the potential for erosion or the loss of topsoil.</p> <p><b>Less than Significant Impact</b></p>	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on-site or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X		<p>The shrink-swell potential for the Type 143 project soil type is low to moderate. The applicant will use existing cultivation areas and above-ground pots. The soil on the site is mapped as 'stable' on the County GIS data base. Additionally, minimal construction will occur for the proposed infrastructure.</p> <p><b>Less Than Significant Impact</b></p>	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?			X		<p>The shrink-swell potential for the Type 143 project soil type is low to moderate. The applicant will use existing cultivation areas and above-ground pots. The soil on the site is mapped as 'stable' on the County GIS data base. Additionally, minimal construction will occur for the proposed infrastructure.</p> <p><b>Less Than Significant Impact</b></p>	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water?				X	<p>The project site will be served through an existing on-site septic system. The +333 acre site is large enough to support the existing in-ground septic system.</p> <p><b>No Impact</b></p>	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 29, 30

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				X	There will be minimal ground disturbances occurring with this project to prepare the site for the complete cultivation area, which indicated that there are no unique paleontological or geologic features on the site.  <b>No Impact</b>	1, 3, 4, 5, 11, 14, 15
<b>VIII. GREENHOUSE GAS EMISSIONS</b> <i>Would the project:</i>						
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X		In general, greenhouse gas emissions come from construction activities (vehicles) and from post-construction activities (vehicles primarily). Construction activities on this site will be minimal. Burning plant material is prohibited in Lake County, and projected trips generated will be between 2 and 8 per day during and after construction. An average single family dwelling generates 9.55 average daily trips according to the International Transportation of Engineer's manual; this cultivation proposal will have similar daily trips to a typical single family dwelling both during and after construction takes place.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 21, 24, 29, 30, 31, 32, 34, 36
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X		This project will not conflict with any adopted plans or policies for the reduction of greenhouse gas emissions.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 21, 24, 29, 30, 31, 32, 34, 36
<b>IX. HAZARDS AND HAZARDOUS MATERIALS</b> <i>Would the project:</i>						
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X		This proposal will use organic pest control and fertilizers. This will significantly limit potential environmental hazards that would otherwise result. Cannabis waste is required to be chipped and spread on site; burning cannabis waste is prohibited in Lake County. All pesticides and fertilizers are required to be stored in a locked and secure shed as are being proposed by the applicant. The site is not located within a flood zone.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 10, 13, 17, 21, 24, 25, 29, 30, 31, 32, 33, 34, 36
b) Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X		The pesticides and fertilizers proposed are mostly organic, and will be stored in a secure building. The site preparation will require some light construction equipment; all equipment staging shall occur on previously disturbed areas on the site.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 10, 13, 17, 20, 21, 24, 25, 29, 30, 31, 32, 33, 34, 36
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				X	The proposed project is not located within one-quarter mile of an existing or proposed school.  <b>No Impact</b>	1, 3, 4, 5, 10, 13, 17, 21, 24, 25, 29, 30, 31, 32, 33, 34, 36
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X	The project site is not listed as a site containing hazardous materials in the databases maintained by the Environmental Protection Agency (EPA).  <b>No Impact</b>	1, 3, 4, 5, 10, 13, 17, 21, 24, 25, 29, 30, 31, 32, 33, 34, 36

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?				X	The project is not located within two (2) miles of an airport and/or within an Airport Land Use Plan.  <b>No Impact</b>	1, 3, 4, 5, 20, 22
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X		The project would not impair or interfere with an adopted emergency response or evacuation plan.  <b>Less Than Significant Impact</b>	1, 3, 4, 5, 20, 22, 35, 37
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?			X		The site is mapped as being a fire risk and burned during the 2018 Mendo Complex fire, however the project will not further heighten fire risks on the site, and will actually provide an 8 acre fire break where the cultivation activity will occur. The applicant will adhere to all Federal, State and local fire requirements/regulations for setbacks and defensible space; these setbacks are applied at the time of building permit review.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 20, 35, 37
<b>X. HYDROLOGY AND WATER QUALITY</b> <i>Would the project:</i>						
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?			X		The project parcel is current served by an existing onsite well and septic system for the cabin. The applicant has provided engineered Drainage and Erosion Control plans, and shall adhere to all Federal, State and Local regulations regarding wastewater treatment and water usage requirements.  <b>Less Than Significant Impact</b>	1, 3, 4, 5, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X		The applicant has provided a Water Availability Analysis that shows a rapid recovery rate for the on-site well. The project would not alter a stream or river, nor would it substantially increase the amount of runoff that would result in flooding. There are no above-ground water sources near the cultivation area.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:  i) Result in substantial erosion or siltation on- or off-site; ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; iii) Create or contribute to			X		The applicant has stated that the total cultivation area is about 8 acres in size. The outdoor cultivation area will remain permeable. The total non-permeable surface area will be minimal.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; iv) Impede or redirect flood flows?						
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?			X		The project site is not located in a flood plain, tsunami or seiche zone.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X		The proposed use will not conflict with or obstruct the implementation of water quality control plan or ground water management plan as all hazardous materials including pesticides and fertilizers will be stored in a locked / secured shed, and will meet all Federal, State and Local agency requirements for hazardous material storage and handling.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 10, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
<b>XI. LAND USE AND PLANNING</b> <i>Would the project:</i>						
a) Physically divide an established community?				X	The proposed project site would not physically divide an established community.  <b>No Impact</b>	1, 3, 4, 5, 6, 35
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			X		This project is consistent with the Lake County General Plan, the Upper Lake - Nice Area Plan and the Lake County Zoning Ordinance.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 20, 21, 22, 27, 28
<b>XII. MINERAL RESOURCES</b> <i>Would the project:</i>						
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X	The Aggregate Resource Management Plan (ARMP) does not identify this project as having an important source of aggregate.  <b>No Impact</b>	1, 3, 4, 5, 26
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?				X	The County of Lake's General Plan, the Upper Lake – Nice Area Plan nor the Lake County Aggregate Resource Management Plan designates the project site as being a locally important mineral resource recovery site.  <b>No Impact</b>	1, 3, 4, 5, 26
<b>XIII. NOISE</b> <i>Would the project result in:</i>						
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local			X		Noise related to cannabis cultivation typically occurs either during construction, or as the result of machinery related to post construction equipment such as well pumps or emergency backup generators during power outages.	1, 3, 4, 5, 13

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
general plan or noise ordinance, or applicable standards of other agencies?					<p>This project will have some minimal site preparation (hours of construction are limited through standard conditions of approval). There may be a need for an emergency backup generator, however generator usage would be limited to power outages.</p> <p>The site is entirely surrounded by BLM land. There are no neighbors within five miles of the subject site, so the likelihood of noise-related impacts to neighbors is extremely low.</p> <p><b>Less than Significant Impact</b></p>	
b) Generation of excessive groundborne vibration or groundborne noise levels?			X		<p>The project is not expected to create unusual groundborne vibration due to construction or to post-construction facility operation. The low level truck traffic during construction and for deliveries would create a minimal amount of groundborne vibration.</p> <p><b>Less Than Significant Impact</b></p>	1, 3, 4, 5, 13
<b>XIV. POPULATION AND HOUSING</b> <i>Would the project:</i>						
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				X	<p>The project will not induce population growth.</p> <p><b>No Impact</b></p>	1, 3, 4, 5
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X	<p>No housing will be displaced as a result of the project.</p> <p><b>No Impact</b></p>	1, 3, 4, 5
<b>XV. PUBLIC SERVICES</b> <i>Would the project:</i>						
<p>a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:</p> <ul style="list-style-type: none"> <li>- Fire Protection?</li> <li>- Police Protection?</li> <li>- Schools?</li> <li>- Parks?</li> <li>- Other Public Facilities?</li> </ul>				X	<p>The project does not propose housing or other uses that would necessitate the need for new or altered government facilities. There will not be a need to increase fire or police protection, schools, parks or other public facilities as a result of the project's implementation.</p> <p><b>No Impact</b></p>	1, 3, 4, 5, 13, 17, 20, 21, 22, 23, 24, 27, 28, 29, 30, 31, 32, 33, 34, 36, 37

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>XVI. RECREATION</b> <i>Would the project:</i>						
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X	The project will not have any impacts on existing parks or other recreational facilities.  <b>No Impact</b>	1, 3, 4, 5
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X	This project will not necessitate the construction or expansion of any recreational facilities.  <b>No Impact</b>	1, 3, 4, 5
<b>XVII. TRANSPORTATION</b> <i>Would the project:</i>						
a) Conflict with a plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle lanes and pedestrian paths?			X		The proposed project site is accessed from Bartlett Springs Road, an unpaved County road. A minimal increase in traffic is anticipated due to construction, maintenance and weekly and/or monthly incoming and outgoing deliveries through the use of van-type delivery vehicles. Daily employee trips are anticipated to be between 2 and 8 average daily trips. There are no known capacity issues with Bartlett Springs Road in this location.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 9, 20, 22, 27, 28, 35
b) For a land use project, would the project conflict with or be inconsistent with CEQA guidelines section 15064.3, subdivision (b)(1)?			X		CEQA chapter 15064.3, subdivision (b)(1) requires analysis for thresholds of significance for a land use project. Projects in Lake County that produce more than 50 average daily trips (ADT) are looked at more carefully than smaller land use projects such as this one, and projects that generate 200 or more ADT require a traffic impact study..  <b>Less than Significant Impact</b>	1, 3, 4, 5, 9, 20, 22, 27, 28, 35
c) For a transportation project, would the project conflict with or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(2)?				X	The project will not conflict with or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(2).  <b>No Impact</b>	1, 3, 4, 5, 9, 20, 22, 27, 28, 35
d) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X		No changes to Bartlett Springs Road are proposed. The applicant will improve the interior driveway with gravel leading to the cultivation site.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 9, 20, 22, 27, 28, 35
e) Result in inadequate emergency access?				X	As proposed, this project will not adversely impact existing emergency access.  <b>No Impact</b>	1, 3, 4, 5, 9, 20, 22, 27, 28, 35

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>XVIII. TRIBAL CULTURAL RESOURCES</b> <i>Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:</i>						
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or		X			The site contains no identifiable relics, structures or other items that might otherwise make it a candidate for being listed on the California Register of Historic Places as defined in PRC section 5020.1(k).  In the event that cultural resources are found on the site during site disturbance, the applicant is required to notify the culturally related tribe and the Archaeologist according to mitigation measures CUL-1 and CUL-2, and training is required so that employees can know what might be a potentially significant artifact (CUL-2).  <b>Less Than Significant with mitigation measures added.</b>	1, 3, 4, 5, 11, 14, 15
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.		X			Lake County maintains a list of locally significant historic locations. This site is not on the locally significant list for historic places. No adverse tribal comments were received as the result of the AB 52 notice that was sent to all area tribes for this project.  <b>Less Than Significant with mitigation measures added.</b>	1, 3, 4, 5, 11, 14, 15
<b>XIX. UTILITIES AND SERVICE SYSTEMS</b> <i>Would the project:</i>						
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			X		The subject parcel is served by an existing well and septic system. The applicant shall adhere to all Federal, State and Local regulations regarding wastewater treatment and water usage requirements.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 29, 32, 33, 34, 37
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X		The site contains an on-site well that is a significant water producing well.  <b>Less Than Significant Impact</b>	1, 3, 4, 5, 29, 32, 33, 34, 36, 37
c) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			X		The site is served by an existing septic system with no known issues regarding adequacy.  <b>Less Than Significant Impact</b>	1, 3, 4, 5, 29, 32, 33, 34
d) Generate solid waste in excess of State or local standards or in excess of the capacity of local infrastructure?			X		The existing landfill has sufficient capacity to accommodate the project's solid waste disposal needs for the next 5 years according to Lars Ewing, Manager of Public Services in Lake County.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 28, 29, 32, 33, 34, 36

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
e) Negatively impact the provision of solid waste services or impair the attainment of solid waste reduction goals?			X		The applicant will chip and spread the cannabis waste on site, and the estimated total amount of solid waste from this project is about 800 pounds annually.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 29, 32, 33, 34, 36
f) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X		The County uses a standard condition of approval regarding compliance with all federal, state and local management for solid waste. The cultivator must chip and spread any vegetative waste on-site, and the estimated total amount of solid waste from this project is 800 pounds annually.  <b>Less than Significant Impact</b>	1, 3, 4, 5, 29, 32, 33, 34, 36

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
<b>XX. WILDFIRE</b> <i>If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:</i>						
a) Impair an adopted emergency response plan or emergency evacuation plan?			X		The mapped fire risk on the site is high (SRA) and was significantly burned during the 2018 Mendo Complex fire. Access to the site is taken from an unpaved County road, and a short private drive; neither of which meet 4290 and 4291 CalFire Standards. The 8 acre cultivation site proposed provides a significant fire break on the property if needed, and there are twelve 2,500 gallon water storage tanks on the site that can be used for fire suppression if needed.  <b>Less than Significant Impact</b>	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?			X		The site and surrounding lots are generally devoid of vegetation due to the 2018 Mendo Complex fire and prior site preparation. Approval of this project will not increase the fire risk in this area. This particular area has a history of wildfires, however the 8 acre cultivation site will help to act as a fire break, particularly given the lack of existing vegetation on this site.  <b>Less than Significant Impact</b>	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?			X		The site will need to have an improved gravel driveway added that is capable of supporting a 75,000 pound emergency vehicle. No other infrastructural improvements appear to be necessary for this project.  <b>Less than Significant Impact</b>	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?			X		The site is very steep in some locations, although the cultivation areas are generally flat. There is some chance of risks associated with post-fire slope runoff, instability and drainage changes based on the lack of site changes that would occur by this project.  <b>Less than Significant Impact</b>	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
<b>XXI. MANDATORY FINDINGS OF SIGNIFICANCE</b>						
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			X		The project proposes a cultivation of commercial cannabis in previously disturbed area. As proposed, this project is not anticipated to significantly impact habitat of fish and/or wildlife species or cultural resources with the incorporated mitigation measures described above.	All

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
b) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?		X			Potentially significant impacts have been identified related to Air Quality, Biological Resources, and Cultural / Tribal Resources. These impacts in combination with the impacts of other past, present and reasonably foreseeable future projects could cumulatively contribute to significant effects on the environment. Implementation of and compliance with mitigation measures identified in each section as project conditions of approval would avoid or reduce potential impacts to less than significant levels and would not result in cumulatively considerable environmental impacts.	All
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?		X			The proposed project has potential to result in adverse indirect or direct effects on human beings. In particular, to Air Quality, Biological Resources, and Cultural / Tribal Resources have the potential to impact human beings. Implementation of and compliance with mitigation measures identified in each section as conditions of approval would not result in substantial adverse indirect or direct effects on human beings and impacts would be considered less than significant.	All

\* Impact Categories defined by CEQA

**\*\*Source List**

1. Lake County General Plan
