

## Attachment for the Summary Form for Electric Document Submittal

SCH #: 2021020393

Project Title: Burbank Housing Element Update and Associated General Plan Updates

Lead Agency: City of Burbank

Contact Name: Shipra Rajesh

Email: [srajesh@burbankca.gov](mailto:srajesh@burbankca.gov)

Phone Number: 818-238-5250

Project Location: City of Burbank, Los Angeles County

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect. (*Continued from main form*)

- Noise: Significant Project impacts identified for noise associated with construction. MMs require noise reduction devices for construction equipment, project-specific Construction Noise Studies, and other noise reduction requirements for construction activities. With MMs, these Project impacts would be reduced to a less than significant level.
- Transportation: Significant Project impacts identified for transportation and VMT (vehicle miles traveled). Potential MMs to reduce the average total VMT per service population and average VMT per employee are generally project specific MMs. MMs include providing opportunities for alternate forms of transportation, such as bicycle parking, parking cash-out programs, ride-sharing programs, transit passes, improving pedestrian or bicycle networks, improving/increasing transit accessibility, and traffic calming features. With MMs, these Project impacts would still be significant and unavoidable.
- Utilities: Significant Project impacts identified for wastewater. MM requires an analysis to identify sewer service constraints, nexus fee study, and potential sewer infrastructure upgrades. With MM, impacts associated with wastewater conveyance would be less than significant; however, impacts associated with wastewater treatment capacity would be significant and unavoidable.
