PROJECT DESCRIPTION: The proposed project consists of five existing sump stations within the City of Sacramento: Sump 089, Sump 151, Sump 155, Sump 058, and Sump 102. The sump stations direct treated stormwater through underground piping to stormwater outfalls along waterways within the City. Each of the sump stations are owned, operated, and maintained by the City of Sacramento Department of Utilities. As mandated by the Sacramento Area Flood Control Agency (SAFCA) and the U.S. Army Corps of Engineers (USACE), sump station outfalls that penetrate and cross major levees within the City of Sacramento are inspected on a five-year cycle. The proposed project entails the complete replacement of the pump discharge pipe for three drainage sump station facilities (Sump 089, Sump 151, and Sump 155) and installation of stairs on the waterside slope for two additional drainage sump station facilities (Sump 058 and Sump 102). The proposed improvements would not alter the overall capacity of the sump station facilities relative to existing conditions. None of the sump stations are located on sites that occur on lists enumerated under Section 65962.5 of the Government Code.
