Present Land Use/Zoning/General Plan Designation:

multiple

Project Description: (please use a separate page if necessary)

The City is proposing to implement a new advance treated recycled water (ATRW) infrastructure system that would maximize recycled water production at the Hyperion Water Reclamation Plant (HWRP) and construct new treatment, conveyance, storage, and distribution infrastructure to augment local water supplies by up to approximately 217 million gallons per day, equivalent to a third of the city's water supply. The proposed Program would establish an integrated water resource strategy that provides a new local water supply source to sustain the long-term reliability and utility of local groundwater basins and decreases the Los Angeles region's dependence on imported water supplies. To do this, LADWP would increase recycled water treatment facilities, water conveyance pipelines, and groundwater recharge and extraction capacities within the Central, West Coast, and San Fernando Groundwater Basins.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
