Project Title: Variance TWW-2021-DF-00143 to Allow the Disposal of Treated Wood Waste under Alternate Procedures by County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division

Project Location: 14470 Calle Real, Santa Barbara, CA 93117

County: Santa Barbara

Project Applicant: Travis Spier, Operations Manager, County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division

Approval Action Under Consideration by DTSC: Variance

Statutory/Regulatory Authority: California Health and Safety Code, Section 25143; CCR Title 22, Section 66260.210

Project Description: The Department of Toxic Substances Control (DTSC) has issued a variance to County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division (CAH111000621) to receive and dispose of treated wood waste from generators, transporters, and/or handler facilities. Operations related to treated wood waste will be consistent with previous treated wood waste activities conducted by the applicant. The variance allows treated wood waste to be managed under procedures different from, but equally protective to human health and the environment to, the provisions of California Health and Safety Code (HSC) Articles 6, 6.5 and 9 of Chapter 6.5 and California Code of Regulations (CCR), Title 22, Division 4.5, Chapters 12, 13, 14, 15, 16, 18, and/or 20. Under the terms and conditions of Variance TWW-2021-DF-00143, County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division will ensure the treated wood waste will be appropriately managed.

Background: Treated wood waste is a fully regulated California-only hazardous waste because it exhibits the hazardous waste characteristic of toxicity. From 2007 to December 31, 2020, treated wood waste was managed under alternative management standards, established in 22 CCR 67386. The legislation that authorized the alternative management standards for treated wood waste expired on December 31, 2020. Without the issuance of the variance, County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division would be required to seek a permit as a hazardous waste disposal facility.

County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division operates the Sanitary Tajiguas Landfill, which is a fully permitted and operational Class III municipal solid waste disposal facility that receives daily deliveries of solid waste, green waste, (and with implementation of the ReSource Center) recyclables and organic waste. The applicant previously conducted treated wood waste management activities under the now expired alternative management standards established at 22 CCR 67386.

Project Activities: Under the variance, the Facility will accept treated wood waste from generators, and authorized handlers and/or transporters for disposal, however it will be managed as a California hazardous waste, under authority of HSC 25200 et seq. Operations generally include unloading and disposal of treated wood waste within Tajiguas Sanitary Landfill, Phase II and Phase III expansion areas. Phases II and III areas utilize a prescriptive groundwater protection system, comprised of the following elements: Subdrain, 2' low permeability or geosynthetic clay liner, 60-mil HDPE, leachate collection and recovery system, and 2' protective cover soil. Acceptance and disposal of TWW will be consistent with hazardous waste management and disposal standards specified in the variance. The variance will expire on September 8, 2021 with possibility of extension for an additional six months.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: County of Santa Barbara, Public Works, Resource Recovery & Waste Management Division

Exempt Status: Existing Facilities [CCR Title 14, Sec. 15301]

Reasons Why Project is Exempt: All analysis conducted included the potential extension of the variance for an additional six months. DTSC has determined none of the exceptions to the categorical exemptions apply to this project, as described in Public Resources Code Section 21084(c), (d), and (e), and 14 CCR Section 15300.2. Operations under the variance will be substantially the same as those as previously conducted under the alternative management standards established at 22 CCR 67386. This variance is consistent with a former use.

The administrative record for this project is available to the public by appointment at the following location:
