

## CALIFORNIA ENVIRONMENTAL QUALITY ACT NOTICE OF EXEMPTION

To: Office of Planning and Research-State Clearinghouse P.O. Box 3044, 1400 Tenth Street, Room 212 Sacramento, CA 95812-3044	From: Department of Toxic Substances Control P.O. Box 806 Sacramento, CA 95812-0806
--	---

**Project Title:** Variance TWW-2021-DF-00115 to Allow the Disposal of Treated Wood Waste under Alternate Procedures by Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site

**Project Location:** 56533 Hwy 58 West, McKittrick, CA 93251

**County:** Kern County

**Project Applicant:** Fred E. Paap, District Manager, Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site

**Approval Action Under Consideration by DTSC:** Variance

**Statutory/Regulatory Authority:** California Health and Safety Code, Section 25143; CCR Title 22, Section 66260.210

**Project Description:** The Department of Toxic Substances Control (DTSC) has issued a variance to Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site (CAD980636831) to receive and dispose of treated wood waste from generators, transporters, and/or handler facilities. Operations related to treated wood waste will be consistent with previous treated wood waste activities conducted by the applicant. The variance allows treated wood waste to be managed under procedures different from, but equally protective to human health and the environment to, the provisions of California Health and Safety Code (HSC) Articles 6, 6.5 and 9 of Chapter 6.5 and California Code of Regulations (CCR), Title 22, Division 4.5, Chapters 12, 13, 14, 15, 16, 18, and/or 20. Under the terms and conditions of Variance TWW-2021-DF-00115, Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site will ensure the treated wood waste will be appropriately managed.

**Background:** Treated wood waste is a fully regulated California-only hazardous waste because it exhibits the hazardous waste characteristic of toxicity. From 2007 to December 31, 2020, treated wood waste was managed under alternative management standards, established in 22 CCR 67386. The legislation that authorized the alternative management standards for treated wood waste expired on December 31, 2020. Without the issuance of the variance, Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site would be required to seek a permit as a hazardous waste disposal facility.

Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site is a Class II landfill disposal facility that previously conducted treated wood waste management activities under the now expired alternative management standards established at 22 CCR 67386.

**Project Activities:** Under the variance, the Facility will accept treated wood waste from generators, and authorized handlers and/or transporters for disposal, however it will be managed as a California hazardous waste, under authority of HSC 25200 et seq. Operations generally include unloading and disposal of treated wood waste within McKittrick Waste Landfill Modules D, E, F and G which has a Landfill Modules D, E, F and G are designed with a double composite liner system consisting of a 60-ml thick double-sided textured HDPE and a geosynthetic clay liner. The double composite liner system provides superior performance and environmental protection as compared to the prescriptive single composite liner system. These landfill modules are designed with a leachate collection and recovery system.. Acceptance and disposal of TWW will be consistent with hazardous waste management and disposal standards specified in the variance. The variance will expire on September 12, 2021 with possibility of extension for an additional six months.

**Name of Public Agency Approving Project:** Department of Toxic Substances Control

**Name of Person or Agency Carrying Out Project:** Liquid Waste Management, Inc. dba McKittrick Waste Treatment Site

**Exempt Status:** Existing Facilities [CCR Title 14, Sec. 15301]

**Reasons Why Project is Exempt:** All analysis conducted included the potential extension of the variance for an additional six months. DTSC has determined none of the exceptions to the categorical exemptions apply to this project, as described in Public Resources Code Section 21084(c), (d), and (e), and 14 CCR Section 15300.2. Operations under the variance will be substantially the same as those as previously conducted under the alternative management standards established at 22 CCR 67386. This variance is consistent with a former use.

The administrative record for this project is available to the public by appointment at the following location:
