

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Peters Canyon Bikeway Extension Project

Lead Agency: County of Orange

Contact Name: May Duong

Email: May.Duong@ocpw.ocgov.com

Phone Number: (714) 667-9693

Project Location: Cities of Tustin and Orange, Orange County, CA

City

County

Project Description (Proposed actions, location, and/or consequences).

The Project would construct a new shared-use Class I path along the west side of Jamboree Road and buffered (striped) Class II lane along Pioneer Road and would extend the Peters Canyon Bikeway Trail to the existing bikeway at the intersections of Jamboree Road with Canyon View Avenue and Pioneer Road with Pioneer Way in the cities of Orange and Tustin. The Project would also include intersection improvements (reconstruction of existing curb ramp and inclusion of way finding signage) at Jamboree Road and Pioneer Road to connect the proposed Class II buffered bike lanes to the existing trails on the south, and to the proposed Class I shared-use path to the existing Class I path on the north, along the west side of Jamboree Road. In addition, the Project would also include sidewalk improvements, the relocation of utilities, construction of a retaining wall, signage and striping improvements, and landscaping improvements. The Proposed Project closes a critical gap in the County's existing bikeway network, which will enhance bicyclists' safety and comfort.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Proposed Project does not have any significant or potential significant effects. The Project would not impact any biological resources with incorporation of Mitigation Measures MM-BIO-1 through MM-BIO-5. No historic or cultural resources that may contribute to California's history were observed at the Project Site. Mitigation Measures MM-CUL-1 through MM-CUL-5 would reduce impacts to less than significant in the event that a cultural or historical resource was found. Given the Project area's potential to contain paleontological resources and location to previously identified paleontological resources, grading activities have the potential to encounter paleontological resources. Therefore, the Project would be required to implement Mitigation Measures MM-PAL-1 through MM-PAL-4, which would reduce potential impacts to unique paleontological resources or unique geological features to less than significant, should they be encountered during Project implementation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.

None
