

Project Title: Ventura-Santa Barbara Counties Intertie Project

Project Location: The project site is located in the unincorporated southwestern portion of Ventura County and the unincorporated southeastern portion of Santa Barbara County and is approximately 0.3 mile east of the city of Carpinteria. The western terminus of the pipeline is located at 6858 Casitas Pass Road, adjacent to Assessor's Parcel Numbers APNs 001-101-047 and 001-200-006 in Santa Barbara County. The proposed pipeline alignment abuts and at points traverses Santa Barbara APNs 001-101-046, 001-200-009, 001-101-048, 001-101-040, 001-200-029, 001-101-041, 001-101-030, 001-101-049, 001-440-003, 001-440-005, 001-440-006, 001-440-002, and 001-440-001; and Ventura County APNs 008-016-046, 008-016-047, 008-021-001, 008-021-002, 008-016-041, 008-016-037, 008-016-048, 008-016-035, and 008-016-036. The Booster Pump Station A site options are located on APNs 008-016-046, 008-016-041, and 008-016-048. Booster Pump Station B alternative site options are located approximately two miles east, near 6214 Casitas Pass Road (APNs 008-018-064, 008-018-066, 008-018-056, and 008-018-017). Proposed infrastructure improvement areas are located near Lake Casitas (APNs 008-019-036, 008-019-016, 008-019-037, and 060-022-001).

Brief Project Description:

The Ventura-Santa Barbara Counties Intertie Project (proposed project) involves the construction and operation of potable water infrastructure to connect the Casitas Municipal Water District (CMWD) and Carpinteria Valley Water District (CVWD) water transmission systems. The proposed project includes between approximately 7,600 to 8,160 linear feet (LF; 1.4 to 1.5 miles) of 16-inch-diameter potable water pipeline, two booster pump stations, and improvements to infrastructure at existing CMWD facilities. The pipeline would traverse the boundary between Ventura and Santa Barbara counties and act as a two-way intertie to allow the transfer of water between CMWD and CVWD, as necessary. The project site traverses State Routes 192 and 150, both of which are under the jurisdiction of the California Department of Transportation.

Based on a review of the State Water Resources Control Board GeoTracker database and California Department of Toxic Substances Control EnviroStor database, it was determined the pipeline alignment options, booster pump station location sites, and infrastructure improvement areas are not included on existing lists of hazardous materials sites compiled pursuant to Government Code Section 65962.5.
