Project Title

13435 166th Street
Project Location - Specific

Cerritos
Project Location – City

Los Angeles
Project Location – County

The District proposes to install solar energy arrays on two elevated carport-like structures (Structures A and B) at Carmenita Middle School. Structures A and B would be located at the eastern portion of the school site between the playfields and asphalt area. Structures would be a minimum of 10-foot high and consist of metal columns and beams supporting array panels. Structures A and B would each consist of 252 photo-voltaic (PV) modules tilted at a 7-degree angle, totaling 504 PV modules. The solar system would have the direct current (DC) system size of 211.68 kilowatts (kW). Approximately 501 feet of conduit would be installed by directional boring from the solar arrays to two point of interconnections/electrical equipment boxes to the west as shown in Figure 2. The project would also provide underground conduit for installation of car chargers in the future. However, Installation of car chargers require additional funding and would not be installed at this time. The District and general community will benefit from a reduction in energy consumption and reduced energy costs.
