# 1 Implementation Actions

## 1.1 Purpose

This document contains the implementation actions developed to carry out the goals and policies of Port Hueneme’s 2045 General Plan. This stand-alone document was developed concurrently with the 2045 General Plan but is not part of the General Plan. Since it is maintained outside of the Plan, the City has flexibility to prioritize and amend strategies as needed. The implementation actions document is a working tool that serves to prioritize activities the City should initiate or maintain to ensure the vision of the General Plan is achieved.

The implementation actions will be referenced by Port Hueneme City staff on an ongoing basis, and both reviewed and updated regularly. The General Plan implementation actions can be consulted in conjunction with the City Council's annual priority-setting efforts, including the Capital Improvements Program, objectives, and budget. Actions can be added, removed, adjusted, or re-prioritized as appropriate over the life of the General Plan.

As strategies are implemented, they will be removed from this document. As priorities change, the actions and strategies will be updated. As the City works toward achieving the vision of the 2045 General Plan, new strategies may be added to continue to guide Port Hueneme into the future.

## Using the Implementation Actions

This document is a working checklist of action items and next steps for City staff and local decision makers to ensure that the General Plan’s vision for the Port Hueneme community is realized. The implementation strategy for each Element of the General Plan consists of an action item, its relationship to corresponding General Plan policies, identification of responsible departments, and the time frame for completion. The following is a guide for understanding the implementation strategy tables:

- Action – Provides the task to implement a policy or set of policies
- Relevant Policies – Lists specific policies associated with the implementation action in the General Plan
- Responsible Parties – Acknowledges the appropriate City department, commission, or council to implement the strategy
- Priority Level – Indicates the relative levels of importance to implement the strategy
- Timeframe – Provides a target for completion, identifying ongoing, near-term (1-4 years), mid-term (5-10 years), and long-term (10+ years) horizon

## Relationship Among Goals, Policies, and Implementation Actions

The following outlines the relationship among goals, policies, and implementation actions in Port Hueneme’s 2045 General Plan. Guided by the City’s vision for Port Hueneme, each Element of the General Plan contains goals, related policies, and implementation actions that help achieve the associated goal.

### *Goals*

Goals are statements of the desired future conditions regarding a particular topic in the community, toward which effort and use of resources are or will be directed.

### *Policies*

Policies are statements that guide decision- making and specify an intended level of commitment on a subject.

### *Implementation Actions*

Implementation actions are presented as a checklist of strategies for City staff and local decision makers to carry out the goals and policies of the General Plan.

## 1.2 Land Use

**Table 1 Land Use Implementation Actions**

Action ID #	Implementation Action	Relevant Policies	Responsible Department	Priority Level	Timeframe
LU 1	Amend the Zoning Ordinance to reflect the General Plan land use map, create standards addressing appropriate development standards, including for a downtown, and procedures for processing developments.	LU 1-1, LU 1-2, LU 1-9, LU 1-13, LU 2-1, LU 3-1, LU 3-3, LU 3-4, LU 6-1, LU 6-3	Community Development	High	Near-term
