**Present Land Use/Zoning/General Plan Designation:**

Various

**Project Description:** *(please use a separate page if necessary)*

The NRMP is intended to provide relevant and defensible information to the Parkway Manager for making informed decisions for managing, maintaining, and enhancing Parkway resources. In general, the NRMP shall provide a clear understanding of existing Parkway resources, the effects of disturbances such as flood, fire, invasive species and human impacts, as well as opportunities for protections and enhancements. It should advise resource management for promoting healthy ecosystems and resource protections, while balancing concurrent Parkway goals of flood control, recreational opportunities and public safety.  
 The purpose of the NRMP is to establish resource management guidelines to minimize the impact of human uses on the Parkway and on the environment. The NRMP includes goals and objectives designed to maintain natural communities located within the Parkway and identifies potential management actions to accomplish each goal and objective.  
 The NRMP includes 12 area plan maps that identify potential resource management actions and management categories in each of the respective areas.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
