Project Description

The California Department of Transportation (Caltrans) issued a Director's Order to replace a failed fuel tank at the Echo Summit Maintenance Facility in El Dorado County on Route 50 near postmile (PM) 66.7. An inspection of the tank found 30 inches of product in the interstitial "secondary containment" area which indicates the primary tank itself has been compromised. With the loss of the primary tank, the tank is acting as a single walled tank which is a violation of Federal and State codes. This project is needed to prevent or mitigate the loss or impairment of life, health, property, and essential public services. The scope of work is as follows: removal and disposal of the failed diesel tank, installation of a new 500-gallon tank per National Fire Protection Association (NFPA) standards, and incidental work. Work occurred within Caltrans right-of-way. No disposal that required a borrow site. No consultation or coordination required. No permits required.
