Present Land Use/Zoning/General Plan Designation:

Land Use: Industrial, Coastal Dependent. Zoning: Industrial: Coastal Dependent with Archaeological Resource Area Outside Shelter Cove overlay.

Project Description: *(please use a separate page if necessary)*

A Coastal Development Permit and Special Permit to authorize the redevelopment of the decommissioned Freshwater Tissue Samoa Pulp Mill facility in order to construct a land-based finfish recirculating aquaculture system (RAS) facility including a three to five-megawatt (3-5 MW) photovoltaic solar panel array covering approximately 690,000 square feet of the facility roofs. The Project will be conducted in two phases and is comprised of the following activities: demolition of existing pulp mill infrastructure; soil contamination remediation; ground densification; aquaculture facility construction; decommission of an existing leach field and connection to the Samoa wastewater treatment system for Phase 2. A total of five (5) buildings will be constructed with a combined footprint of 766,530 square feet. The height of the tallest proposed building is 60 feet. The project will include ancillary support features such as paved parking, fire access roads, security fencing, and stormwater management features. The applicant is proposing to raise Atlantic Salmon, subject to approval from the California Department of Fish and Wildlife. Existing onsite water service supplied by the Humboldt Bay Municipal Water District would be connected to the new buildings for potable use, fire sprinklers, and irrigation. Saltwater would be supplied by existing sea chest infrastructure operated by the Harbor District. Treated wastewater would be discharged utilizing the existing Redwood Marine Terminal II ocean outfall pipe. The Project Site is located on a former pulp mill site that remains an active Brownfield site (Regional Water Quality Control Board case no. 1NHU892), which includes Geotracker Field Points as shown in the EnviroStar and Geotracker online databases. The Project is located 1,000 feet east of the Samoa Solid Waste Disposal Site (SWDS). This project is located in the Samoa area, east of Vance Avenue, approximately 2,000 feet north from the intersection of Vance Avenue and Bay Street, on the property known as 364 Vance Avenue.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency please denote that with an "S".
