Sacramento, CA 95814

The following information was omitted from the FEIR upload. The County of Humboldt, Planning and Building Department is requesting the following attachment, along with this letter, be uploaded as Errata to the Nordic Aquafarms California, LLC Land-based Aquaculture Project FEIR, SCH#2021040532. Please see omitted information listed below:

- Comment 677-5 of the FEIR was not responded to. The comment is an opinion and is located on page 2-573. The response to comment 677-5 is included in the attachment.
- Response to comment 702-1 (first of the 700 series) was tagged as "702-1" and should be corrected to "701-1". This is located on page 2-650.
- Table 4.1, on page 4-1, does not have item "4.4.3" in the table, though 4.3.3 is a subsection on page 4-10.
- Master Response 1 indicated that shoulder widths across the Samoa Bridge are approximately six to eight feet. After coordination with Caltrans Transportation Planning, it has been identified that shoulder widths along the Samoa Bridge structures is approximately four to five feet wide, with six to eight feet shoulder widths between bridges. Additionally, Caltrans has not designated the Samoa Bridges on SR 255 a Class II bike lane, so the six-foot shoulder standard does not apply. Bicycles and pedestrians are permitted to use SR 255 between US 101 and New Navy Base Road as a shared facility rather than as a designated bike lane.
- Table 1-2 on page 1-11 of the DIER has mislabeled entries. Corrections include changing "CR-1" to "CR-a", and "CR-1" having the word "historical" stricken.
- Table 1-2 on page 1-16 of the DEIR has mislabeled entries. Corrections include changing "HAZ-3" to "HAZ-7".
- Text was omitted in Mitigation Measure HWQ-3 on page 3.9-22 of the DEIR. Inclusion of "release of debris or contaminated material", and ", in containers, or on impermeable material. Debris will be stored" have been added.

Thank you,

Cade McNamara
