Description of Nature, Purpose and Beneficiaries of Project: Phillips 66 Pipeline, LLC (Phillips 66) is proposing to conduct anomaly investigation and repairs at six dig locations (Digs) to address a total of nine anomalies along the existing Line 200 Mainline trunk pipeline in eastern Contra Costa County. The P66 Line 200 pipeline transports crude oil from Kern County to the Phillips 66 refinery in Rodeo, CA. This pipeline is regulated by the federal Department of Transportation (DOT), Resource and Special Programs Administration's Office of Pipeline Safety pursuant to 49 CFR, Part 195.452, which requires Phillips 66 to conduct regular inspections and maintenance on its pipeline. This Summer 2021 Project (Project) will allow Phillips 66 to conduct needed inspection and maintenance actions on Line 200 to maintain its structural integrity. The Digs will involve temporary impacts to relatively small work areas.

The Conservancy Board's decision to authorize the Executive Director to execute a Participating Special Entity Agreement with Phillips 66 Pipeline, LLC for this Project and to extend take coverage is a discretionary action.
