

ATTACHMENT TO SUMMARY FORM FOR REGIONAL SAN BIOGENERATION FACILITY PROJECT

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources

- ▲ Effects on special-status species, including Swainson's hawk, white-tailed kite, cooper's hawk, burrowing owl and other raptors, tricolored blackbird, sandhill crane, and other special-status birds. Mitigation Measures 3.4-1: Avoid Disturbance to Swainson's Hawk and Other Raptor Nests, 3.4-2: Avoid Disturbance of Burrowing Owl Nests, and 3.4-3: Avoid Disturbance to Tricolored Blackbird, or Other Special-Status Birds.

Cultural Resources

- ▲ Inadvertent discovery of archaeological resources. Mitigation Measure 3.5-1: Unanticipated Discoveries of Archaeological Resources.

Geology and Soils

- ▲ Inadvertent discovery of paleontological resources. Mitigation Measure 3.7-1: Conduct Paleontological Worker Awareness Training Prior to Ground-Disturbing Activities.

Hazards and Hazardous Resources

- ▲ Hazards related to reasonably foreseeable upset and/or accident conditions. Mitigation Measure 3.9-1: Discovery of Unknown Contaminated Soils During Construction.
- ▲ Interfere with an adopted emergency response plan. Mitigation Measure 3.9-2: Traffic Management Plan.

Transportation

- ▲ Result in inadequate emergency access. Mitigation Measure 3.9-2: Traffic Management Plan.

Tribal Cultural Resources

- ▲ Inadvertent discovery of Tribal Cultural Resources. Mitigation Measures 3.18-1: Develop and implement a Worker Environmental Awareness Program, and 3.18-2: Unanticipated Discoveries of Potential Tribal Cultural Resources.

Wildfire

- ▲ Impair an adopted emergency response plan. Mitigation Measure 3.9-2: Traffic Management Plan.
