## **TABLE OF APPENDICES**

---

APPENDIX I: ILLUSTRATIONS

APPENDIX II: PHOTOS

APPENDIX III: RADIUS MAP REPORT

APPENDIX IV: SUPPORTING DOCUMENTATION

## EXECUTIVE SUMMARY

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for 600 Foothill Venture, LP (Client) for a commercial property located at 600 West Foothill Boulevard, in Los Angeles County, and the City of La Cañada Flintridge, California, Assessor's Parcel Number (APN): 5814-028-009. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

## SITE DESCRIPTION

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 600 and 610 West Foothill Boulevard, La Cañada Flintridge, California. The subject property is located on the southwest corner of Foothill Boulevard and Woodleigh Lane, in the City of La Cañada Flintridge. The subject property is approximately 1.28 acres in size and is developed with two one-story commercial structures, which are approximately 37,182 square feet in total size. The eastern building is occupied by First Church of Christ, Scientist (600 West Foothill Boulevard) and the western building is occupied by Christian Science Reading Room (610 West Foothill Boulevard). The remaining portions of the property consist of an asphalt paved parking area on southern portion, concrete and stone paved walkways along the northern portion, and landscaping. The surrounding area is used for commercial and residential purposes. Groundwater is estimated to be approximately 45 to 50 feet below ground surface in the area of the site and is assumed to flow towards the east.

- No significant hazardous material storage or recognized environmental conditions were observed at the site. Those interviewed, as persons familiar with the site were not aware of any negative environmental conditions associated with the property.

## HISTORICAL LAND USE

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land since sometime prior to 1928 through at least 1938. In 1949, the subject property was developed one of the two existing commercial structures on the northeast portion of the site. In 1959, the second existing commercial structure was constructed on the northwest corner. The remaining portions of the subject property have been utilized for parking purposes. The subject property has solely been utilized for religious and education purposes since 1949 through the present. The configuration of the subject property has remained the same through the present.

- Based on our review of the historical data, no significant data gaps were encountered during our research.

## ENVIRONMENTAL DATA SEARCH

- The subject property is not listed on any of the regulatory databases researched.

- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.
- The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), Los Angeles County Fire Department Health and Hazardous Materials Division (LACFD HHMD), Los Angeles County Department of Public Works (LACDPW), and the Los Angeles County Sanitation District (LACSD) were contacted regarding permits, site investigation files, air emissions, hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, SCAQMD Facility Information Detail (FIND), and the LACFD HHMD Active Certified Unified Program Agency (CUPA) Program Records, Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for information pertaining to the subject property.
  - According to the responses to our requests from the SCAQMD, LACFD HHMD, LACDPW, and LACSD, there are no files for the subject property. Furthermore, the subject property was not listed on the GeoTracker, EnviroStor, FIND, or any of the LACFD HHMD online databases.
  - According to a response to our request from the LARWQCB, there are no files for 600 West Foothill Boulevard.
  - According to the HWTS online database, First Church of Christ Scientist at 600 Foothill Boulevard was issued the USEPA identification number CAC000564880 in February 1991. The hazardous waste manifest reviewed indicated that no reportable quantities of waste were generated by this business in 1994. The USEPA identification number was deactivated in October 2000. Based on the lack of hazardous waste generated, the operations conducted onsite are not expected to represent a significant environmental concern for the subject property.
  - At the time this report was issued, no response has been received from DTSC. Furthermore, the LARWQCB has not responded regarding 610 West Foothill Boulevard. Should relevant information be obtained from this agency subsequent to issuing this report, EFI Global will prepare and issue an addendum to the Client.
- The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property. No oil wells were identified within 500 feet of the subject property.
- The User did not provide EFI Global any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the User; however, based on our review of the DTSC EnviroStor Database, no environmental liens enforced by the DTSC were identified.

## ADDITIONAL ISSUES

- Based on the age of the onsite structures, there is a potential for asbestos-containing building materials at the subject property; however, no testing was completed as part of this report. Suspect asbestos-containing materials (ACMs) were observed in the form of plaster partitions, some drywall, carpeting, twelve-inch linoleum floor tiles, and plaster ceiling and associated mastics. All building materials appeared in good condition at the time of site reconnaissance. Individual suspect materials would need to be tested as part of an asbestos survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos.
- Based on the age of the onsite structures, there is a potential for lead-based paint at the site. All painted surfaces appeared in good condition at the time of site reconnaissance.
- The potential for radon at the subject property is considered to be low.
- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.
- The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

## CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 600 West Foothill Boulevard, La Cañada Flintridge, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

### RECOGNIZED ENVIRONMENTAL CONDITIONS (REC)

In our opinion, no RECs were identified during the course of this assessment.

### HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

### CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

### DE MINIMIS CONDITIONS

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

## **RECOMMENDATIONS**

Based on the foregoing, no additional investigation is recommended at this time.

## 1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 600 West Foothill Boulevard, in Los Angeles County, and the City of La Cañada Flintridge, California (Subject Property). This report has been prepared for the sole use of 600 Foothill Venture, LP (Client).

The research conducted for this study and the report prepared are in general conformance with the EPA "All Appropriate Inquiries" standard and the ASTM 1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections) on Comprehensive Environmental Response Compensation and Liability Act (CERCLA) liability." (ASTM, 2013) An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the User also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases" and must "comply with legal release reporting obligations." (ASTM, 2013) Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) *de minimis* conditions associated with the subject property.

- A **recognized environmental condition** is defined as "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." This definition does not include *de minimis* conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).
- A **historical recognized environmental condition** is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." (ASTM, 2013). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.
- A **controlled recognized environmental condition** is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or

equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)" (ASTM, 2013).

- A ***de minimis condition*** is defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions" (ASTM, 2013).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

## 1.1 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

## 1.2 Limitations and Exceptions

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-2013, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

## 1.3 Reliance

This report has been prepared for the sole use of 600 Foothill Venture, LP. The contents should not be relied upon by any other parties without the express written consent of 600 Foothill Venture, LP and EFI Global, Inc.

## 1.4 User Responsibilities

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the User conduct independent research and consider certain information before purchasing a property:

- Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).
- The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.
- If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

## 2.0 SITE DESCRIPTION

EFI Global, Inc. has performed a Phase I for a commercial property located at 600 West Foothill Boulevard, in Los Angeles County, and the City of La Cañada Flintridge, California. The subject property is located on the southwest corner of Foothill Boulevard and Woodleigh Lane, in the City of La Cañada Flintridge. The subject property is approximately 1.28 acres in size and is developed with two one-story commercial structures, which are approximately 37,182 square feet in total size. The eastern building is occupied by First Church of Christ, Scientist (600 West Foothill Boulevard) and the western building is occupied by Christian Science Reading Room (610 West Foothill Boulevard). The remaining portions of the property consist of an asphalt paved parking area on southern portion, concrete and stone paved walkways along the northern portion, and landscaping. The surrounding area is used for commercial and residential purposes.

Natural gas and electrical services are provided to the subject property by Southern California Gas Company and Southern California Edison, respectively. Potable water is provided by the Valley Water Company. Sewer services are provided by the Los Angeles County Sanitation District.

### 2.1 Current and Historical Addresses

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 600 and 610 West Foothill Boulevard, La Cañada Flintridge, California.

### 2.2 Legal Description

According to the Los Angeles County Assessor's Office, the subject property is located in the City of La Cañada Flintridge, and is described by the Assessor's Parcel Number: 5814-028-009.

### 2.3 Physical Setting

The elevation of the subject property is approximately 1,215 feet above sea level (United States Geological Survey Pasadena, California 7.5 minute topographic quadrangle). Based on our review of the GeoCheck Section of the Environmental Data Resources, Inc. (EDR) Radius report, the subject property is not situated within a 100-year Federal Environmental Management Agency (FEMA) Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at a leaking underground storage tank site (623 Foothill Boulevard) approximately 115 feet north of the subject property at approximately 45 to 50 feet below ground surface. However, perched and semi-perched aquifers may be present beneath the site. Based on regional groundwater data, regional groundwater flow direction is estimated to be towards the east; however, local groundwater flow direction may vary.

## 3.0 SITE RECONNAISSANCE/INTERVIEWS

### 3.1 Site Reconnaissance

On August 21, 2019, Ms. Susana Corletto of EFI Global, Inc. conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

| Yes | No | Observed Feature(s)  |
|-----|----|--|
| ✓   |    | Hazardous Substances and Petroleum Products Containers           |
|     | ✓  | Underground and/or Aboveground Storage Tanks                     |
| ✓   |    | Drains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems        |
|     | ✓  | Stained or Corroded Surfaces/Stained Soil or Stressed Vegetation |
|     | ✓  | Pits/Ponds/Lagoons/Wetlands                                      |
|     | ✓  | Electrical Equipment with the Potential to contain Fluids        |
| ✓   |    | Production or Monitoring Wells                                   |
|     | ✓  | Evidence of Solid Waste Disposal/Dumping/Fill Areas              |

#### 3.1.1 Exterior Observations

The exterior portions of the site consist property consist of an asphalt paved parking area on southern portion, concrete and stone paved walkways along the northern portion, and landscaping. The asphalt and concrete pavement appeared to be in good condition. Minor cracking, patching, and former boring locations were observed in the asphalt parking lot. According to Mr. Graham Bothwell, a member of the owning entity, the boring locations are associated with a geophysical survey completed approximately 2 to 3 years ago. A trash dumpster containing non-hazardous debris was also observed in the parking lot. Stormwater drains for drainage of the property were observed between the structures and in the low areas of the parking lot. Based on their use for stormwater runoff and lack of hazardous materials observed at the subject property exterior, these drains are not of a significant environmental concern for the subject property. No pole or pad-mounted transformers or polychlorinated biphenyl (PCB) containing equipment were observed on-site.

A groundwater monitoring well was observed within the sidewalk to the north of the west adjoining property. The monitoring well (MW-5) was installed to assess the extent of the release from the north adjacent Chevron-branded gasoline station. For further discussion, refer to Section 5.2.

No recognized environmental conditions were observed in the exterior portions of the subject property.

#### 3.1.2 Interior Observations

The subject property contains two one-story commercial structures. The eastern building is occupied by First Church of Christ, Scientist (600 West Foothill Boulevard) and the western building is occupied by Christian Science Reading Room (610 West Foothill Boulevard). The

structures are of wood frame construction, with concrete foundation, and pitched roofs with composite shingles. Building materials observed included wood and plaster partitions, some drywall, carpeting, twelve-inch linoleum floor tiles, and plaster ceiling.

The eastern structure is utilized for church services and primarily consisted of the auditorium meeting space with a few offices, restrooms, and a lobby observed on the north side and waiting rooms for service participants on the south side, behind the podium. A basement level room was observed at the southeast corner, which according to Mr. Bothwell, was utilized as a Sunday school at one time. The room was observed to be stripped of all improvements, with only wood framing and restrooms. A furnace room was also observed adjacent to the former Sunday school room. No staining or leaking was observed in the vicinity of the equipment. Limited quantities of paint containers (under 5-gallon capacity each) were observed in this room for maintenance. Based on the small quantity of materials, the observed paint is not a significant environmental concern for the subject property.

The western structure is utilized for Sunday school and as a reading room. This structure was divided into multiple rooms, with one large space observed centrally with cubicle spaces at the east perimeter. Two divided rooms were observed on the south along with restrooms. On the north side of the building was a reading room, a study room, and a retail sales area.

No significant hazardous material storage or recognized environmental conditions were observed in the interior portions of the subject property.

### 3.1.3 Reconnaissance Limitations

No significant limitations were encountered during our reconnaissance of the subject property.

## 3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

| Location | Address(es)                                      | Uses/Observations  |
|----------|--|--|
| North    | 607 Foothill Boulevard<br>623 Foothill Boulevard | United States Postal Service<br>Chevron gasoline station |
| South    | No address                                       | Parking lot for La Cañada Presbyterian Church            |
| East     | 550 Foothill Boulevard                           | Arco gasoline station                                    |
| West     | 626 Foothill Boulevard                           | La Cañada Presbyterian Church                            |

- The adjoining/immediately surrounding properties to the north and east were listed on the regulatory database report and are further discussed in Section 5.2 below.

## 3.3 Surrounding Area Observations

### **3.3.1 Surrounding Property Uses**

The surrounding area is mostly developed with commercial and residential structures. A Chevron-branded gasoline station was observed north of the subject property, across Foothill Boulevard and an Arco-branded gasoline station was observed to the east of the subject property, across Woodleigh Lane. For further discussion, refer to Section 5.2.

### **3.3.2 Surrounding Geography**

The surrounding area is mostly flat with a slight topographic slope to the south-southeast. The subject property is located approximately 3,800 feet northeast of the base of the San Rafael Hills. No lakes, ponds, rivers or streams were observed in the surrounding area.

## **3.4 Interviews**

### **3.4.1 Property Owner**

Mr. Graham Bothwell, a member of the owning entity, provided access and was interviewed during the course of the site reconnaissance conducted on August 21, 2019. Mr. Bothwell also completed the environmental questionnaire on August 20, 2019 and noted that a septic system was utilized onsite prior to 2001. In 2001, the septic tanks for each building were filled and covered and the buildings were connected to the city sewer system. Mr. Bothwell was unaware of any environmental conditions associated with the property. Based on the historic and current use of the subject property for religious and educational purposes, the former septic system is not expected to represent a significant environmental concern for the subject property.

### **3.4.2 Key Site Manager**

The owner of the property is the key site manager and was interviewed as the owner.

### **3.4.3 Property Occupants**

No occupants were available for interview during the completion of this report.

### **3.4.4 Past Owners, Operators and Occupants**

Past owners, operators and occupants were not able to be identified for an interview for this report.

### **3.4.5 Prospective Purchaser**

Mr. Garret Weyand, the Prospective Purchaser, completed a potential purchaser questionnaire for the purpose of this report, dated August 20, 2019. Mr. Weyand was unaware of any recognized environmental conditions such as underground storage tanks or any generated hazardous materials associated with the property.

### **3.4.6 Neighboring Property Owners/Tenants**

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

As the subject property is currently developed and utilized for religious and education purposes, no neighboring property owners/tenants were interviewed during this assessment.

### **3.5 User Provided Information**

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

#### **3.5.1 Lien Search**

The User is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

- The User did not provide EFI Global any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the User; however, based on our review of the DTSC EnviroStor Database, no environmental liens enforced by the DTSC were identified.

#### **3.5.2 Specialized Knowledge**

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

#### **3.5.3 Commonly Known or Reasonably Ascertainable Information**

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

- The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

#### **3.5.4 Property Valuation**

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- According to the User, the purchase price generally reflects the fair market value of the property.

### **3.5.5 Purpose of Performing Phase I ESA**

According to the User, the User is a prospective purchaser of the subject property and the Phase I is being performed to qualify for landowner liability protections under CERCLA as well as identify business risks related to the property associated with environmental conditions.

### **3.6 User Provided Documents**

No documents were provided to EFI Global, Inc. by the Report User.

## 4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

### 4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from EDR for the years: 1928, 1938, 1948, 1952, 1954, 1964, 1977, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016. A summary of our observations is presented in the following table. Due to the quality of the 1948 photograph, the subject property could not be identified and therefore, this photograph is not described below.

| Year          | Subject Property                | Notable Adjoining Property Observations   | Notable Observations of the Surrounding Area   |
|---------------|---------------------------------|---|--|
| 1928 and 1938 | Appears to be undeveloped land. | North: Foothill Boulevard and undeveloped land beyond; Agricultural land and residential beyond by 1938<br>South: Undeveloped land<br>East: Woodleigh Lane and agricultural land beyond; Residential beyond by 1938<br>West: Undeveloped land | Appears to be mostly undeveloped/vacant and agricultural land with sparse residential development. |

| Year   | Subject Property   | Notable Adjoining Property Observations   | Notable Observations of the Surrounding Area                         |
|--|--|---|--|
| 1952 and 1954  | Appears to be developed with the one of the two existing commercial structures on the northeast corner and undeveloped/vacant land on the western and southern portions. | North: Foothill Boulevard and agricultural land and residential beyond<br>South: Agricultural land<br>East: Woodleigh Lane and residential beyond<br>West: Commercial | Appears to be mostly agricultural land, residential, and commercial. |
| 1964, 1977, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 | Appears to be developed with the two existing commercial structures on the northern portion and parking areas on all remaining portions.                                 | North: Foothill Boulevard and gasoline station and commercial beyond<br>South: Parking lot<br>East: Woodleigh Lane and gasoline station beyond<br>West: Commercial    | Appears to be residential and commercial.                            |

- Aerial photographs indicate the north and east adjacent properties were developed with gasoline stations since at least 1964 through 2016. For further discussion, refer to Section 5.2.

## 4.2 Building Department Records Review

The addresses identified as current and historical addresses for the subject property were researched at the City of La Cañada Flintridge Building and Safety Division. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes all building permits obtained and reviewed:

| 600 West Foothill Boulevard |                                   |  |
|-----------------------------|-----------------------------------|--|
| Date                        | Owner/Occupant                    | Purpose  |
| 04/21/1949                  | First Church of Christ, Scientist | New structure for use as a church  |
| 03/20/1959                  | Not indicated                     | Certificate of Occupancy for the First Church of Christ, Scientist and Sunday School and Reading Room property |
| 03/30/1959                  | First Church of Christ, Scientist | Addition of Sunday school and reading room to existing church auditorium                                       |

| 600 West Foothill Boulevard |                                   |  |
|-----------------------------|-----------------------------------|--|
| Date                        | Owner/Occupant                    | Purpose  |
| 04/08/1991                  | First Church of Christ            | Exterior masonry/cement paving; interior modifications of reading room/Sunday school |
| 09/30/1993                  | First Church of Christ, Scientist | Re-roof and remove existing tile roof and install class a composition shingle        |

- No building permits were identified for 610 West Foothill Boulevard.

### 4.3 City Directory Review

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

| 600 West Foothill Boulevard                        |                          |
|--|--------------------------|
| Date   | Listing                  |
| 1973, 1975, 1985, 1990, 1996, 1999, 2005, and 2010 | Christian Science Church |

| 610 West Foothill Boulevard |                                       |
|-----------------------------|---------------------------------------|
| Date                        | Listing                               |
| 1973, 1975, 1985, and 1990  | Christian Science Church Reading Room |

- City directories indicate that the north and east adjacent properties were developed with gasoline service stations since at least 1973 through 2010. For further discussion, refer to Section 5.2.

### 4.4 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities.

- Sanborn Map Coverage was not available for the subject property. The remaining Historical Land Use data in our opinion is sufficient to accurately ascertain the historical site use.

### 4.5 Historical Summary

### **4.5.1 Subject Property**

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land since sometime prior to 1928 through at least 1938. In 1949, the subject property was developed one of the two existing commercial structures on the northeast portion of the site. In 1959, the second existing commercial structure was constructed on the northwest corner. The remaining portions of the subject property have been utilized for parking purposes. The subject property has solely been utilized for religious and education purposes since 1949 through the present. The configuration of the subject property has remained the same through the present.

### **4.6 Historical Data Gaps**

Based on our review of the historical data, no significant data gaps were encountered during our research.

## 5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on August 16, 2019. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E2600-15), and assumed groundwater flow direction. As discussed in Section 2.3, groundwater is estimated to be approximately 45 to 50 feet below ground surface in the area of the site and is assumed to flow towards the east.

| DATABASE  | Search Distance (Miles) | Subject Site (Yes/No) | Adjacent Site (Yes/No) | Total Listings (#) |
|---|-------------------------|-----------------------|------------------------|--------------------|
| Federal National Priorities List (NPL)                    | 1.0                     | No                    | No                     | 0                  |
| Federal De-listed NPL                                     | 1.0                     | No                    | No                     | 0                  |
| Federal CERCLIS   | 0.5                     | No                    | No                     | 0                  |
| Federal CERCLIS NFRAP                                     | 0.5                     | No                    | No                     | 4                  |
| Federal RCRA CORRACTS                                     | 1.0                     | No                    | No                     | 0                  |

### 5.1 Subject Property

The subject property is not listed on any of the regulatory databases researched.

## 5.2 Adjoining and Immediately Surrounding Properties

### **La Canada Arco #1684/ Burkhalter's Arco Service/ Firstelement Fuel Inc./ Atlantic Richfield Station #1684/ BP West Coast Products LLC 01684/ Alberto Rodriguez (550 Foothill Boulevard)**

- The adjacent property located approximately 50 feet east of the subject property (hydrologically down-gradient) across Woodleigh Lane is listed on the Resource Conservation and Recovery Act - Non Generator / No Longer Regulated (RCRA NonGen / NLR), California Hazardous Materials Information Reporting System (CHMIRS), Hazardous Waste & Substance Site List (HIST CORTESE), Leaking Underground Storage Tank (LUST), California Environmental Reporting System (CERS), EDR Exclusive Historic Gas Stations (EDR Hist Auto), Active Underground Storage Tank Facilities (UST), Los Angeles County Industrial Waste and Underground Tank Sites (LA Co. HMS), CERS Hazardous Waste (CERS HAZ WASTE), Statewide Environmental Evaluation and Planning System Underground Storage Tank (SWEEPS UST), CERS Tanks, Hazardous Substance Storage Container Database (HIST UST), and Facility and Manifest Data (HAZNET) databases. According to the EDR Hist Auto listing and historical research, this property has been occupied by a gasoline service station since 1963 through the present. According to the RCRA NonGen/NLR listings, La Canada Arco and Firstelement Fuel Inc. registered as handlers and transporters of hazardous wastes in November 2005 and April 2015, respectively. No violations were identified. According to the CHMIRS listing, an unspecified incident occurred onsite on May 16, 1990. According to the HAZNET listing, this facility generated approximately 0.63 ton of aqueous solution with total organic residues less than 10 percent in 2002, 1.25 tons of tank bottom waste in 2003, 0.525 ton of aqueous solution with total organic residues less than 10 percent and 0.015 ton of other organic solids in 2004, 0.25 ton of aqueous solution with total organic residues less than 10 percent in 2005, 1.35 tons of aqueous solution with total organic residues less than 10 percent in 2007, 0.033 ton of other organic solids and 0.17 ton of aqueous solution with total organic residues less than 10 percent in 2008, and between 0.0042 to 0.273 ton of aqueous solution with total organic residues less than 10 percent per year from 2009 to 2012. Disposal methods include other recovery for reclamation for reuse, landfill, discharge to the sewer, transfer station, and a recycler. According to the UST listings, a 6,000-gallon gasoline UST and two 8,000-gallon gasoline USTs were installed onsite in 1962, a 10,000-gallon gasoline UST was installed onsite in 1978 and a 280-gallon waste oil UST was installed onsite at an unspecified date. Five other USTs were reported in August 1989, including three 12,000-gallon gasoline USTs, a 550-gallon waste oil UST, and an unspecified UST. Arco Products #01684 and La Canada Arco are currently regulated by the Los Angeles County Fire Department (LACFD) under facility identification (ID) numbers 1695 and FA0011375, respectively. According to the LA Co. HMS listing, Arco #01684 was issued the facility ID 001620-037121 and permit number 000337791. The facility and permit status are listed as closed. La Canada Arco was issued the facility ID 001620-056471 and permit number 000709000. The facility and permit statuses are listed as "permit." According to the CERS listings, Firstelement Fuel was categorized as a hazardous waste generator and a chemical storage facility. Compliance evaluation inspections were conducted onsite in June 2016 by the Los Angeles County Fire Department (LACFD). No violations were found. La Canada Arco was categorized as a hazardous waste generator, UST, and a chemical storage facility. Compliance evaluation inspections were conducted onsite from March 2014 through October 2018 by the LACFD and the Los Angeles County Department of Public Works (LACDPW). Several violations were issued during inspections for failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity, failure to complete and/or submit Hazardous Materials Business Plan, to have a UST Monitoring Plan, to implement or maintain a written agreement between the UST permit holder and operator, to comply with one or more of the following designated operator (DO) monthly inspection requirements, to keep water out of secondary containment of UST systems, to comply with one or more of the overfill prevention

equipment requirements, and other minor and/or administrative violations similar in nature. Most violations were reported as returned to compliance. In addition, Arco #1684 was categorized as leaking underground storage tank (LUST) cleanup site.

According to the LUST listings and information from the State Water Resources Control Board (SWRCB) GeoTracker online database, an unauthorized release of gasoline that impacted groundwater was discovered onsite in 1991. Four soil boring (B-1 through B-4) were drilled onsite to a maximum depth of 25 feet below ground surface (bgs) in July 1989. A maximum concentration of 85 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons as gasoline (TPHg) was identified in soil. Total recoverable petroleum hydrocarbons (TRPH) were not detected and benzene, toluene, ethylbenzene, and xylenes (BTEX) were not analyzed. In August 1989, four gasoline USTs (two 8,000-gallon, one 6,000-gallon, and one 10,000-gallon), one 550-gallon waste oil UST, and associated dispensers and product piping were removed from the east side of the property. Three 12,000-gallon gasoline USTs were subsequently installed on the northwest portion of the property, approximately 65 feet east of the subject property. Additional soil samples were collected 2 to 6 feet beneath the former gasoline USTs, beneath the former dispensers, and 1.5 feet beneath the former waste oil UST. The soil samples collected reported the maximum concentrations of TPHg at 6,290 mg/kg and benzene at 101 mg/kg at 4 feet bgs. Additional investigations completed in May 1992 revealed maximum concentrations of TPHg at 10 mg/kg (10 feet bgs) and benzene at 0.20 mg/kg (45 feet bgs) in soil. Two soil borings (VW-1 and VW-2) were converted as vapor wells. Between June 1993 and February 1994, three cone perimeter tests (CPT) borings and four groundwater monitoring wells (MW-1 through MW-4) were installed to a depth of 56 and 74 feet bgs, respectively. Quarterly groundwater monitoring and sampling commenced at the site in May 1994 and was completed in October 1996. The *Third Quarter 1996 Groundwater Monitoring and Sampling Report* dated August 1996 indicated a maximum gasoline range organics (GRO) concentration of 0.57 micrograms per liter ( $\mu\text{g/L}$ ) in MW-4, maximum benzene concentration of 25  $\mu\text{g/L}$  in MW-1, and a maximum methyl tert-butyl ether (MTBE) concentration of 120  $\mu\text{g/L}$  in MW-4. On December 19, 1996, the LARWQCB issued case closure and recommended no further action.

In 2001, SECOR collected 12 soil samples during an upgrade of the product and vapor return piping. The soil samples collected reported the maximum concentrations of GRO and MTBE as 1,100 mg/kg and 0.043 mg/kg, respectively. SECOR conducted a limited remedial excavation of approximately 264 tons of hydrocarbon-impacted soil at the eastern end of the southern dispenser island and re-initiated quarterly groundwater sampling and monitoring events. Between September 2003 and July 2004, five additional groundwater monitoring wells (MW-5 through MW-9) and one soil boring (SB-1) were installed onsite. In July 2005, two air sparge and soil vapor extraction wells (AS/SVE-1 and AS/SVE-2) were installed. In August 2005, an AS/SVE pilot test was conducted. An estimated radius of influence (ROI) for AS was calculated at 25 feet and 40 feet ROI for SVE. Between April and May 2007, one soil boring (SB-3), five nested AS/SVE wells (AS/SVE-3 through AS/SVE-7), and three AS wells (AS-8 through AS-10) were advanced. The soil samples collected reported the maximum concentrations of TPHg at 1,300 mg/kg (40 feet bgs), benzene at 0.089 mg/kg (40 feet bgs), MTBE at 0.28 mg/kg, and tert-butyl alcohol (TBA) at 12 mg/kg (35 feet bgs). The most recent groundwater monitoring event conducted in April 2013 reported the maximum TPHg, MTBE, TBA, and ethyl tert-butyl ether (ETBE) concentrations in groundwater were 26  $\mu\text{g/L}$ , 4.2  $\mu\text{g/L}$ , 18  $\mu\text{g/L}$ , and 9.9  $\mu\text{g/L}$ , respectively. BTEX, di-isopropyl ether (DIPE), ethanol, and tert-amyl methyl ether (TAME) were all reported as nondetect. It should be noted that groundwater beneath this site is reported as moving away (east) of the subject property. Furthermore, all contaminants of concerns (COC) were nondetect in the monitoring wells closest to the subject property (MW-3 and MW-8). Dissolved oxygen (DO) was detected at 0.92 and 0.91 at MW-3 and MW-8, respectively. Soil samples were analyzed for volatile organic compounds

(VOCs) and semi-VOCs in December 2006. Concentrations of VOCs and semi-VOCs detected did not exceed regulatory screening criteria for residential/industrial use. On November 4, 2013, the LARWQCB issued case closure due to the contamination source being removed, remedial activities completed, and ongoing use as an active fuel dispensing station. Based on the closure issued by the LARWQCB and nondetect concentrations of COC at the closest monitoring wells to the subject property, the former releases from the east adjacent Arco-branded gasoline station are not expected to represent a significant environmental concern.

**Chevron USA SS 096368/ La Canada Chevron/ Jensen Robert (623 Foothill Boulevard)** - The adjacent property located approximately 115 feet north of the subject property (hydrologically cross to upgradient -gradient) across Foothill Boulevard is listed on the UST, LUST, LA Co. HMS, CERS, CERS HAZ WASTE, CERS Tanks, EDR Hist Auto, "Cortese" Hazardous Waste and Substances Sites List (CORTESE), Resource Conservation and Recovery Act - Large Quantity Generator (RCRA-LQG), CHMIRS, Facility Index System/Facility Registry System (FINDS), Enforcement Compliance History Online (ECHO), and HIST CORTESE databases. According to the EDR Hist Auto listing and historical research, this property has been occupied by a gasoline service station since 1964 through the present. According to the RCRA-LQG listing, Chevron 96368 registered as a small quantity generator of hazardous waste in June 2002 and February 2006 and as a large quantity generator of hazardous waste in February 2006, February 2008, and March 2014. Hazardous wastes generated include aqueous solution with less than ten percent total organic residues, off-specification, aged, or surplus organics, other organic solids, ignitable waste, and benzene. No violations were found. According to the CHMIRS listing, on September 8, 2013, a customer who was fueling their vehicle drove off with the nozzle still in the vehicle which caused a discharge of 7-gallons of gasoline. The spill was contained and the LACFD assisted with clean-up onsite. On April 19, 2017, a customer overfilled their gas tank causing 1-gallon of gasoline to spill into a storm drain. The spill was recovered by the clean up contractor. According to the UST listings, a 1,000-gallon waste oil UST and three 10,000-gallon product USTs were installed onsite at an unspecified date. The LACFD is the permitting agency for active USTs onsite. According to the LA Co. HMS listing, La Canada Chevron was issued facility ID 010065-028100 and the facility status is open. According to the CERS listings, this facility is categorized as a hazardous waste generator, UST, and a chemical storage facility. Compliance evaluation inspections were conducted onsite since April 2014 through September 2018 by the LACFD and LACDPW. Violations were issued in 2015 and 2017 for failure to maintain an approved monitoring plan onsite, comply with any of the applicable requirements of the permit issued for the operation of the UST system, and submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations. All the violations are listed as returned to compliance and no violations were issued at the most recent inspection conduction onsite. Additionally, this facility was categorized as a LUST cleanup site.

According to the LUST listings and information from the SWRCB GeoTracker online database, an unauthorized release of gasoline that impacted soil was discovered in November 1991. The responsible party was determined to be Chevron USA, Inc. The case was issued closure by the LARWQCB on December 30, 1992. No further information regarding this release was provided. In May 1998, a 1,000-gallon waste oil UST was removed from the site. TRPH was detected in all soil samples collected from the excavation at concentrations up to 11,000 mg/kg (TP-1 at 2 feet bgs). Confirmation soil borings (CB-1 and CB-2) were installed in March 1999 and analyzed for TPHg, BTEX, and MTBE. A maximum of 5.33 mg/kg of MTBE was detected in soil. TPHg and BTEX were nondetect in all samples. In 2011, the LACDPW requested more information regarding the release case. In July 2011, Wayne Perry, Inc. (WPI) advanced six soil borings (B-1 to B-6) and WPI determined that petroleum hydrocarbon and fuel oxygenate-impacted soil was limited in extent and

magnitude and that groundwater appeared to be impacted by petroleum hydrocarbons, MTBE, and TBA. The case was then referred to the LARWQCB. In December 2014, AECOM drilled three soil borings onsite (MW-1 to MW-3) that were converted into groundwater monitoring wells which were screened between 40 and 60 feet bgs. TBA in soil was detected at a maximum concentration of 310 mg/kg in MW-2 at 50 feet bgs. In the groundwater samples collected, TPH-d was detected at a maximum of 47 µg/L in MW-3, MTBE was detected at a maximum of 4.1 µg/L in MW-2, and TBA was detected at concentrations of 1,300 µg/L and 320 µg/L in MW-2 and MW-3, respectively. In September 2017, AECOM installed two additional groundwater monitoring wells onsite (MW-4 and MW-5) to further evaluate the down-gradient extent of dissolved-phase TBA. Based on groundwater analytical results, TBA was delineated in the predominant down-gradient direction (southwest) by MW-4, which is located approximately 170 feet northwest of the subject property. During the most recent monitoring event, conducted on June 19, 2019, maximum concentrations of TPHg and fuel oxygenates concentrations were detected in the southern portion of the site adjacent to the UST complex and dispenser island. The closest monitoring well to the subject property is MW-5, which is located approximately 120 feet north of the subject property. 170 µg/L of TPHg and 7,000 µg/L of TBA were detected at MW-5 during the latest monitoring event. The maximum concentration of TBA detected in MW-5 exceeds to Notification Level (NL) of 12 µg/L. TPHd, BTEX, MTBE, 1,2-Dibromoethane (EDB), 1,2-Dichloroethane (EDC), DIPE, ETBE, TAME, ethanol, and naphthalene were nondetect at MW-5. The isoconcentration contour maps for TPHg and TBA do not depict impacts moving towards the subject property. On August 6, 2019, the LARWQCB approved Arcadis' request to install an additional offsite monitoring well to the east of the gasoline station to complete delineation of offsite groundwater impacts, particularly from TBA. Based on the relative distance across Foothill Boulevard (in excess of 100 feet), regulatory oversight provided by the LARWQCB, and lack of evidence suggesting that the subject property has been impacted by this release, the ongoing release case from the north adjacent Chevron-branded gasoline station is not expected to represent a significant environmental concern for the subject property.

No other adjoining/immediately surrounding properties (within 100-feet) were listed on any of the regulatory databases researched or the listings were not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, did not indicate a known chemical release, and did not indicate a property use where the use of hazardous chemicals would be expected.

### **5.3 Surrounding Area**

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

### **5.4 Orphan Sites**

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. No orphan sites were identified in the Radius Map Report prepared for this site.

## 6.0 AGENCY FILE REVIEWS

### 6.1 State Agencies

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits, air emissions, and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility Information Detail (FIND) online databases were reviewed for information pertaining to the subject property.

- According to the responses to our requests from the SCAQMD, there are no files for the subject property. Furthermore, the subject property was not listed on the GeoTracker, EnviroStor, or FIND online databases.
- According to a response to our request from the LARWQCB, there are no files for 600 West Foothill Boulevard.
- According to the HWTS online database, First Church of Christ Scientist at 600 Foothill Boulevard was issued the USEPA identification number CAC000564880 in February 1991. The hazardous waste manifest reviewed indicated that no reportable quantities of waste were generated by this business in 1994. The USEPA identification number was deactivated in October 2000. Based on the lack of hazardous waste generated, the operations conducted onsite are not expected to represent a significant environmental concern for the subject property.

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

### 6.2 City/County Agencies

The Los Angeles County Fire Department Health and Hazardous Materials Division (LACFD HHMD), Los Angeles County Department of Public Works (LACDPW), and Los Angeles County Sanitation District (LACSD) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. In addition, the LACFD HHMD Active Certified Unified Program Agency (CUPA) Program Records, Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for additional information pertaining to the subject property.

- According to responses to our requests from the LACFD HHMD, LACDPW, and LACSD, there are no files for the subject property. Furthermore, the subject property was not listed on any of the aforementioned online databases.

### **6.3 Agency File Review Limitations**

At the time this report was issued, no response has been received from DTSC. Furthermore, the LARWQCB has not responded regarding 610 West Foothill Boulevard. Should relevant information be obtained from this agency subsequent to issuing this report, EFI Global will prepare and issue an addendum to the Client.

## 7.0 NON-SCOPE ENVIRONMENTAL RISKS

ASTM Standard E1527-13 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

### 7.1 Asbestos Containing Building Materials

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACM) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACM can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on the age of the onsite structures, there is a potential for asbestos-containing building materials at the subject property; however, no testing was completed as part of this report. Suspect asbestos-containing materials (ACMs) were observed in the form of plaster partitions, some drywall, carpeting, twelve-inch linoleum floor tiles, and plaster ceiling and associated mastics. All building materials appeared in good condition at the time of site reconnaissance. Individual suspect materials would need to be tested as part of an asbestos survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos.

### 7.2 Lead-Based Paint

Although the use of lead-based paint in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain lead paint. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with lead-based paint that has begun peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching from lead based paint on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on the age of the onsite structures, there is a potential for lead-based paint at the site. All painted surfaces appeared in good condition at the time of site reconnaissance.

### 7.3 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

- Based on our research at the United States Environmental Protection Agency (USEPA), the average radon concentrations for Los Angeles County are between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L, below the 4.0 pCi/L action level set by the USEPA. Further, the California Geological Survey *Radon Potential Radon Zone Map for Southern California*, dated January 2005, shows no concentrations of radon in the vicinity of the subject property. Site specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

### 7.4 Wetlands

According to the Clean Water Act, a wetland is "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

- The U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

## 7.5 Mold

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI Global, Inc. observed a limited amount of interior areas of the subject buildings in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the subject property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the subject property. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the subject buildings are at levels acceptable by industry standards.

- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

## 7.6 Methane Gas

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

- The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

## 8.0 FINDINGS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for 600 Foothill Venture, LP (Client) for a commercial property located at 600 West Foothill Boulevard, in Los Angeles County, and the City of La Cañada Flintridge, California, Assessor's Parcel Number: 5814-028-009. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

### 8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 600 West Foothill Boulevard, La Cañada Flintridge, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

#### Recognized Environmental Condition (REC)

In our opinion, no RECs were identified during the course of this assessment.

#### Historical Recognized Environmental Condition (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

#### Controlled Recognized Environmental Condition (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

#### De Minimis Condition

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

### 8.2 RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

## 9.0 SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By:

Date: August 27, 2019

A handwritten signature in black ink, appearing to read "Susana Corletto".

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

600 W FOOTHILL BLVD  
LA CANADA FLINTRIDGE, CA 91011

#### COORDINATES

Latitude (North): 34.2001370 - 34° 12' 0.49"  
Longitude (West): 118.1919360 - 118° 11' 30.96"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 390180.7  
UTM Y (Meters): 3784794.2  
Elevation: 1216 ft. above sea level

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

### **State and tribal leaking storage tank lists**

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 12 LUST sites within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

**Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 12 DRYCLEANERS sites within approximately 0.25 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 7 HIST CORTESE sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Violation Notes: service technician or a licensed tank tester.  
Returned to compliance on 05/11/2017.  
Violation Division: Los Angeles County Department of Public Works  
Violation Program: UST  
Violation Source: CERS

Site ID: 128669  
Site Name: LA CANADA ARCO  
Violation Date: 10-11-2018  
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Site ID: 128669  
Site Name: LA CANADA ARCO  
Violation Date: 01-27-2017  
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637

Violation Description: Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.

Violation Notes: Returned to compliance on 05/11/2017.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Hazardous Waste Summary:

- . Waste code: 134
- . Waste name: Aqueous solution with <10% total organic residues
  
- . Waste code: 331
- . Waste name: Off-specification, aged, or surplus organics
  
- . Waste code: 352
- . Waste name: Other organic solids
  
- . Waste code: D001
- . Waste name: IGNITABLE WASTE
  
- . Waste code: D018
- . Waste name: BENZENE

Violation Status: No violations found

| Description:           | Per the caller a customer overfilled thier gas tank causing the spill. The spill entered a storm drain and was recovered by the clean up contractor<br>Not reported |

**FINDS:**

Registry ID: 110002887485

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

hazardous waste generated by the facility in accordance with HSC 25158 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California [Truncated]

Violation Date: 12-14-2017  
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 03/28/2018. OBSERVATION: The generator has not obtained an active EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. An application was provided at the time of inspection to submit for a new EPA ID # for the site. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an EPA ID number.

Violation Date: 06-27-2016  
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 05/09/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. A review of CERS revealed that the last HMBP submittal was on 9/19/14. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: TRADER JOE'S #42  
Address: 475 FOOTHILL BLVD  
City,State,Zip: LA CANADA FLINTRIDGE, CA 91011  
Site ID: 163127  
CERS ID: 10298536  
CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 163127  
Site Name: TRADER JOE'S #42  
Violation Date: 06-27-2016  
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2  
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.  
Violation Notes: Returned to compliance on 05/09/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. A review of CERS revealed that the last HMBP submittal was on 9/19/14. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).  
Violation Division: Los Angeles County Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

**FINDS:**

Registry ID: 110002745174

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110002762564

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

|-------------------|---|
| Description:      | This site consists of 150 acres in the San Gabriel Mountain foothills approximately 4 miles northwest of Pasadena. The property immediately west of the site is residential. NASA still has custody of the facility. CALTECH continues to operate the facility for research and testing under NASA. |
| History:          | The facility was built for the Army Air Corps between 1945 and 1958 as a research facility for rocketry and jet propulsion. In 1958, custody and jurisdiction over the laboratory was transferred.  |

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### **Local Lists of Landfill / Solid Waste Disposal Sites**

##### WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

|   |   |

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

|   |                         |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |

| PASADENA                           | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

|                |            |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status:        | Not found  |

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported  |                         |   |

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Mesozoic  
System: Cretaceous  
Series: Cretaceous granitic rocks  
Code: Kg (*decoded above as Era, System & Series*)

### **GEOLOGIC AGE IDENTIFICATION**

Category: Plutonic and Intrusive Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam  
 gravelly - sandy loam  
 silt loam  
 clay  
 fine sand  
 gravelly - sand  
 sand  
 fine sandy loam

Surficial Soil Types: sandy loam  
 gravelly - sandy loam  
 silt loam  
 clay  
 fine sand  
 gravelly - sand  
 sand  
 fine sandy loam

Shallow Soil Types: fine sandy loam  
 gravelly - loam  
 sandy clay  
 sandy clay loam  
 clay  
 silty clay  
 sand

Deeper Soil Types: gravelly - sandy loam  
 sandy loam  
 very gravelly - sandy loam  
 stratified  
 very fine sandy loam  
 weathered bedrock  
 sand  
 gravelly - fine sandy loam  
 silty clay loam  
 clay loam

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

| <u>DATABASE</u>  | <u>SEARCH DISTANCE (miles)</u> |

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

Certification # F0B6-4EA6-9518

PO # NA

Project 045.01384

## UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library,

LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property

were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

Library of Congress

University Publications of America

EDR Private Collection

The Sanborn Library LLC Since 1866™

## Limited Permission To Make Copies

EFI Global Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmitted and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

**Report Generation Date:** 08/15/2019

623 FOOTHILL BLVD, LA CANADA-FLINTRIDGE, CA 91011 -- **records found**

The Regional Board has determined that it has documents that are responsive to your request and disclosable

To ensure that the records you wish to examine are available in the Regional Board's File Review Room and that you have sufficient desk space to review them, [please call Ms. Cindy Flores at 213.576.6633 to request files and schedule an appointment](#). The File Review Room is found on the second floor of the Regional Board's Office, located at 320 West Fourth Street in Los Angeles, California.

You may make a copy of any document provided by utilizing one of the self-serve photocopying machines in the File Review Room. For your convenience, the Regional Board provides coin-operated copiers for public use. Copies can be made at a cost of \$0.15 per page. Please be advised, however, that the Regional Board

cannot make any change. Therefore, please bring plenty of coins and small bills if you intend on using the copy machines. Alternatively, you can bring a photocopying machine or arrange to have a bonded photocopying service come to the Regional Board and make the desired copies. In that the items being provided are official records, the Regional Board requests that appropriate care be taken when reviewing documents and making copies.

File code: UT

## INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to [PublicRecordsRequests@aqmd.gov](mailto:PublicRecordsRequests@aqmd.gov).
2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
3. A search for facility records can only be conducted by one or all of the following:
  - a) Facility Name, Address, or Identification Number
  - b) Facility Application Number, or Permit to Operate Number; or
  - c) Facility Notice of Violation/Notice to Comply Number.
4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at [www.aqmd.gov](http://www.aqmd.gov).

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is [PublicRecordsRequests@aqmd.gov](mailto:PublicRecordsRequests@aqmd.gov).

**INSTRUCTIONS FOR REQUESTING RECORDS**

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to [PublicRecordsRequests@aqmd.gov](mailto:PublicRecordsRequests@aqmd.gov).
2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
3. A search for facility records can only be conducted by one or all of the following:
  - a) Facility Name, Address, or Identification Number
  - b) Facility Application Number, or Permit to Operate Number; or
  - c) Facility Notice of Violation/Notice to Comply Number.
4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at [www.aqmd.gov](http://www.aqmd.gov).

RE: PRA of August 15, 2019, Reference # H013086-081519.

Dear Natalie EFI Penado,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 600 W FOOTHILL BLVD  
GLENDDORA CA 91741**

**The records can be downloaded here: [My Records Center](#).**

The following information (if any) is exempted from disclosure due to various State and Federal regulations, and therefore has been redacted:

- Hazardous Material Locations and Site Maps – CA Health & Safety Code (HSC) 25509(b)
- Trade Secret Information – HSC 25512(c) & (d)
- Pending Enforcement/Litigation Records – Government Code (GC) 6254(b), et al./Evidence Code 1040
- Personal Identifying Information (SSN/DL#)/Medical Records – GC 6254(c)

- Financial Records – GC 6254(n), et al.
- Complainant Identity GC 6254 (f)

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction [click here.](#)

If you have any questions regarding your request, please contact our office at 626-430-3260.

RE: PRA of August 16, 2019, Reference # H013122-081619.

Dear Natalie EFI Penado,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 610 W FOOTHILL BLVD  
GLENDDORA CA 91741**

**The search revealed that no records were found for the above noted address.**

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

You searched the following address:

[Street Number:](#) 610 [Street Name:](#) foothill

**Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.**

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

Survey Questionnaire – Please Return to Fax Number Below

**A. GENERAL**

1. Subject Property Address 600 Foothill Blvd, La Cañada Flintridge, CA
2. Name of business(es) occupying the subject property First Church of Christ, Scientist, La Cañada Flintridge
3. Person completing this questionnaire:
- |                                    |                      |
|------------------------------------|----------------------|
| <u>Graham Bothwell</u>             | <u>6216-222-7798</u> |
| Name                               | Telephone Number     |
| <u>Property Development Cmtee</u>  | <u>20 Aug 2019</u>   |
| Title                              | Date                 |
| <u>Member of the owning entity</u> | <u>32 years</u>      |
| Relationship to Property           | How Long?            |
4. If you are the person who has ordered this report, what is the purpose of this report?  
Purchase  Sale  Refinance

**B. PROPERTY DESCRIPTION**

1. Land
- A. What is the approximate square footage of the land? 55617
- B. Were there any buildings or other improvements on the property prior to the existing improvements?  
Yes  No  DK
- If yes, what were the buildings used for? Believed to be vacant land
- C. Is or has there been a well on the subject property? Yes  No  DK
- If yes, what type of well is it?:  Drinking Water,  Irrigation,  Monitoring,  Dry Well
- D. Is or has there been a septic system on the subject property? Yes  No  DK
- E. Has fill of unknown origin been imported onto the subject property?  
Yes  No  DK
2. Improvements (Buildings) - This includes all buildings

- A. What is the approximate square footage of the onsite structure? 10282
- B. What year was the onsite structure built? 1949 and 1958
- C. Is there a heating system at the site? Yes  No  DK   
 If yes, what is it fueled by?:  Natural Gas,  Fuel Oil,  Electricity,  Solar
- D. Is there a boiler at the site? Yes  No  DK   
 If yes, what is it fueled by?:  Natural Gas,  Fuel Oil,  Electricity,  Solar
- E. Do you have copies of the Subject Property's construction, site, and/or "as-built" drawings and building specifications? Yes  No  If so, please provide copies of same.

### C. STORAGE TANKS

1. Are there any registered or unregistered (active or inactive) Underground Storage Tanks ("UST") or Aboveground Storage Tanks ("AST") located on the premises? Yes  No  DK
2. Do you have any knowledge of USTs or ASTs that once existed on the Subject Property and whether such tanks were removed or abandoned? Yes  No  DK

### D. HAZARDOUS MATERIALS

1. Are any regulated hazardous materials, chemicals, or waste stored/used on-site? Yes  No  DK   
 If "yes" please provide a copy of the chemical inventory.
2. To the best of your knowledge, do any of the following operations take place on the Subject Property or have ever taken place on the Subject Property:
- |                               |   |                               |   |
|-------------------------------|---|-------------------------------|---|
| Dry Cleaning:                 | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Battery Storage/Sales:        | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Paint Storage/Sales:          | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Petroleum Storage/Sales:      | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Landfill/Dumping:             | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Junkyard:                     | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Photo or X-Ray Finishing:     | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Electric Equip Manufacturing: | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Solvent Storage or Sales:     | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Chemical Manufacture/Sales:   | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Automobile Storage or Repair: | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Agriculture:                  | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
| Metals Machining:             | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | Metals Heat Treating:         | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> |
- Any other commercial or industrial process which may have included the use of chemicals: Yes  No   
 If yes, Please specify: \_\_\_\_\_

**E. REGULATORY ACTION**

- 1. Has the subject property ever been subject to any environmental enforcement action by the local government, federal, or state entities? Yes  No  DK
- 2. Do you have any knowledge of pending or proposed environmental actions against the subject property or neighboring properties? Yes  No  DK
- 3. Have there been any formal or informal citizen or tenant complaints regarding environmental or health matters in connection with the Subject Property? Yes  No  DK
- 4. Are you aware of any releases of hazardous materials on the Subject Property? Yes  No  DK

**F. ADDITIONAL INFORMATION**

- 1. Do you have knowledge of any previous environmental reports conducted for the site such as Phase I ESA, Phase II ESA, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal, or other relevant material?  
  
Yes  No  If yes, please provide a copy.
- 2. Do you have a recent Title Report for the subject property?  
  
Yes  No  If yes, please provide a copy.
- 3. Can you provide the contact information of the former owner/occupant of the property? Yes  No   
If yes, please provide contact information below.

\_\_\_\_\_  
Name

\_\_\_\_\_  
Telephone Number

\_\_\_\_\_  
Business Name

\_\_\_\_\_  
Relationship to Property

**USER QUESTIONNAIRE**

As part of the All Appropriate Inquiry (AAI) standard for conducting Phase I Environmental Site Assessments set by the Environmental Protection Agency (EPA), the following questions are to be asked of the prospective purchaser.

Please return to fax number below or e-mail to your project manager. Please also provide a **Title Report, previous environmental reports including Phase I and Phase II, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal**, or other relevant material, as available.

**A. GENERAL**

- 1. Subject Property Address 600 Foothill Blvd Lalandia Flintridge, CA 91011
- 2. Person completing this questionnaire:  
Garret Weyand Name 626 278-2505 Telephone Number  
Buyer Relationship to Property \_\_\_\_\_ Date
- 3. What is your intended use of the property?  
 No Change  Residential Development  Commercial/Industrial Development
- 4. What is the purpose of ordering a Phase I ESA?  
 Purchase  Refinance  Other (please specify) \_\_\_\_\_

**B. AAI STANDARD QUESTIONS**

- 1. Are you aware of any environmental liens or activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have filed or recorded against the property under federal, tribal, state or local law? Yes  No  If Yes, Please Explain \_\_\_\_\_
- 2. Do you have any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property? Yes  No  If Yes, Please Explain \_\_\_\_\_
- 3. Are you aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property? Yes  No  If Yes, Please Explain \_\_\_\_\_
- 4. Is the purchase price of the property comparable to the fair market value of the property? Yes  No  N/A   
 If the purchase price is significantly lower than the fair market value, the user must identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products. N/A

## Susana Corletto | Project Manager

5261 West Imperial Highway, Los Angeles, CA, 90045

310-854-6300 ext. 236  
[susana.corletto@efiglobal.com](mailto:susana.corletto@efiglobal.com)

### Professional Summary:

Ms. Corletto has been working professionally in the environmental industry since March 2017 as an Assistant Manager overseeing the Exide Project. Her initial responsibilities with Exide involved doing quality assurance and quality control (QA/QC) of field data and laboratory results as well as report and figures preparation. Today, Ms. Corletto continues to oversee the Exide Project in addition to working as a Project Manager in the Phase I Environmental Site Assessment (ESA) department.

Ms. Corletto has managed to perform both roles successfully and has taken on more responsibilities with the Exide Project. She is currently coordinates with the Department of Toxic Substances Control (DTSC) for scheduling and new assignment purposes. She manages all aspects of project creation as well as team members in the office and in the field. Ms. Corletto also acts as a lab liaison and is in charge of providing the lab with soil samples and reviewing lab reports for any potential errors. She continues to prepare reports to be submitted to the DTSC.

Ms. Corletto began working with the Phase I ESA department in August 2017 as an Environmental Specialist. Her duties involved setting up projects for Project Managers, conducting file reviews and site inspections, and performing historical research and regulatory database reviews for multi-family residential and commercial sites. In October 2018, Ms. Corletto was promoted to the Project Manager position as her expertise in environmental issues have allowed her to assess more complex sites including various industrial sites, waste transfer facilities, former landfills, and active and former gasoline station facilities. Ms. Corletto has prepared over 120 Phase I ESAs to date.

### Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified, Safety Unlimited Inc, CA, #1709061209065

### Project Experience:

#### **EFI Global and Department of Toxic Substances Control (DTSC), Los Angeles, CA Soil Testing and Cleanup**

The California DTSC has initiated a large-scale clean-up effort to address the lead contamination caused by the Exide battery recycling facility in Vernon, California. The Exide plant is accused of releasing over seven million pounds of lead into the atmosphere over 30 years. EFI Global was contracted by the DTSC to sample soil and paint at residential properties for evidence of lead contamination. Since mid-2016, EFI Global has sampled over 2,660 properties in various neighborhoods surrounding the Exide plant. Ms. Corletto has been an Assistant Manager overseeing this project since March 2017 through the present. She currently oversees all office work for this project.

**Affordable Housing Projects, Throughout California**

Ms. Corletto conducted all research, investigation, interviews, agency communications, and final reports for dozens of affordable housing projects throughout California. Various government agencies including the Regional Water Quality Control Board (RWQCB) and DTSC were contacted regarding information pertaining to site history. Historical research including review of city directories and aerials photographs was conducted to identify any potential operations of concern at the sites.

**Gas Station Projects, Throughout California**

Ms. Corletto conducted all research, investigation, interviews, agency communications, and final reports for several former and existing gasoline service station properties throughout the state of California for lenders and private entities. Special challenges involved with specific projects included obtaining and reviewing tank fitness testing reports to comply with lender requirements and reviewing technical documents relating to prior underground storage tank removals, environmental sampling, remediation, and closure proceedings. The RWQCB, DTSC, and local certified unified program agencies (CUPA) were contacted for documentation pertaining to the gasoline station operations.

**Release Case (LUST/SLIC) Projects, Throughout California**

Ms. Corletto conducted all research, investigation, interviews, agency communications, and final reports for several properties with unauthorized releases throughout the state of California for lenders and private entities. Special challenges involved with these projects include determining the source and responsible party of the contamination. Sampling results need to be reviewed to determine whether contamination exists below an acceptable threshold limit. The RWQCB, DTSC, and local certified unified program agencies (CUPA) are contacted for monitoring and inspection reports, as well as copies of any former assessments conducted on the properties.

**Education:**

Bachelors of Science, Environmental Studies, University of California, Santa Barbara, Santa Barbara, CA 2016

## Christopher Rude | Senior Project Manager

5261 West Imperial Highway, Los Angeles, California

310-854-6300

[Christopher.rude@efiglobal.com](mailto:Christopher.rude@efiglobal.com)

### Professional Summary:

Mr. Christopher Rude is an Environmental Professional with approximately twenty-seven years of experience in hazardous materials, lab packing of hazardous wastes, Phase I Environmental Site Assessments, and Phase II Environmental Site Assessments throughout the country. Mr. Rude has worked directly with clients and regulatory agencies' to determine and assess environmental impacts, develop plans by which mitigate such conditions, and carry out the planned approach for closure. Mr. Rude's experience includes all aspects of environmental projects including Phase I Environmental Site Assessments, soil, soil vapor and groundwater sampling - Phase II Subsurface Site Assessments, site characterization, removal of Underground Storage Tanks (USTs) and multi-stage clarifiers, and remedial cleanups of properties impacted by arsenic, organochlorine pesticides, chlorinated solvents, and fuel hydrocarbons. Mr. Rude has successfully obtained closure for numerous Brownfield sites on behalf of clients from DTSC, Los Angeles Regional Water Quality Control Board, Los Angeles County, Los Angeles City, and Ventura County Environmental Health. Mr. Rude has conducted numerous soot sampling assessments for insurance companies associated with the wildfires in Southern California.

- Environmental Consulting
- Environmental Compliance
- Management of all stages of environmental projects including Phase I/II environmental site assessments

### Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified

OSHA 8-Hour Hazardous Waste Operations and Emergency Response Certified – Supervisor Refresher Training, CA, #150110572348

Asbestos Building Inspector (AHERA), California ABIR0607180007N15492

Asbestos Contractor/Supervisor (AHERA), California ASR0608180009N15494

Lead Sampling Technician (California Department of Public Health)

Environmental Professional, per the CFR Title 40, Chapter I, Subchapter J, Part 312, Subpart C, Section 312.21

### Project Experience:

Current responsibilities as Senior Project Manager include the preparation of Phase I and Phase II Environmental Site Assessments within Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Tulare, Kern, Fresno, and Kings Counties. Additional responsibilities include managing, mentoring and training Project Managers in all aspects of Phase I Environmental Site Assessments, marketing, and client relations, business development and project management.

#### **Sunflower Valley Farms LLC, Multiple Locations in Kings and Kerns Counties, CA**

##### **Phase I Environmental Site Assessment**

Senior Project Manager of a Phase I Environmental Site Assessment for a 12,685 acre ranch developed with agricultural land, 120 active or abandoned oil wells, active oil sumps, hazardous materials, pesticide storage areas, and aboveground storage tanks. Phase II recommendations were made for active oil wells and oil sumps.

**Primestor Development, Inc.****Phase I Environmental Site Assessment**

Served as the Senior Project Manager of a Phase I ESA and Asbestos/Lead Based Paint Survey of a 31-acre retail-commercial mall developed with twelve retail structures and medical clinic totaling approximately 383,000 square feet. The retail mall had undergone numerous subsurface assessments and remedial cleanup associated with a Leaking Underground Storage Tank (LUST) and Spills, Leaks, Investigations, and Cleanups (SLIC) cases associated with a former gasoline service station and former dry cleaning facilities. Case closure was issued by the overseeing regulatory agency for the LUST case. Review of available documentation indicated that the SLIC case was to be issued case closure for soil and groundwater.

**LS Realty Group, Los Angeles, CA****Phase I / II Environmental Site Assessment**

Served as the Senior Project Manager of a Phase I Environmental Site Assessment report which was completed concurrently with a Phase II Environmental Site Assessment. The site was assessed due to the former underground storage tanks and long-term auto repair use of the property by multiple tenants. Results of the soil and soil vapor sampling assessment indicated that the former/current uses did not represent an unacceptable risk to human health for commercial use.

Has performed and provided project management on numerous Phase II Subsurface Site Assessments on properties impacted by chlorinated solvents, fuel hydrocarbons, agricultural pesticides, and heavy metals. Assessment activities also included oversight of geophysical surveys, sampling of soil, soil vapor, and groundwater using Geoprobe, hollow stem augers, and/or dual percussion air rotary rigs. Assessments also included monitoring for vapor intrusion and fixed gases. Conducted and prepared quarterly groundwater monitoring reports.

**Professional Experience:**

EFI Global Inc., Los Angeles, CA, Senior Project Manager, 2012 - Present  
California Environmental, Agoura Hills, CA, Environmental Scientist, 1997 – 2012  
MSE Environmental, Camarillo, CA, Environmental Specialist, 1992 – 1996

**Specialized Education:**

Assessment of LNAPL Volume, Mobility, and Recoverability for Recovery Systems;  
Design and Risk-Based Corrective Action  
National Groundwater Association, Houston Texas – November 2007

Seminar on National Pollutant Discharge Elimination Systems (NPDES)  
Law Offices of Burke Williams & Sorensen LLP  
Riverside, California – 2004

**Education:**

Bachelors of Art, Environmental Studies and Planning, Sonoma State University,  
Rohnert Park, California, 1992
