

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Geysers-Delta Pond Connection/Diffuser Improvements Project

Lead Agency: City of Santa Rosa, Transportation and Public Works Department

Contact Name: Andy Wilt

Email: AWilt@srcity.org Phone Number: (707) 543-3878

Project Location: City of Santa Rosa, Sonoma County

City

County

Project Description (Proposed actions, location, and/or consequences).

The City is proposing to conduct improvements to the Delta Pond connection during the dry season to meet the City's desired recycled water conveyance capacity of 50 million gallons per day. In addition, sediment that has built up over the permitted effluent diffuser will be removed by dredging sediment from and around the diffuser's nozzles. An existing gravel access road from Willowside Road would be improved as a part of the Proposed Project.

The project site encompasses approximately 25 acres of land and waterway, and consists of a generally flat surface comprised mainly of low-lying vegetation such as grasses, trees, and shrubbery, riparian corridor, and waterway. The project site is located in a rural area west of downtown Santa Rosa and is surrounded by agricultural fields and two waterways, Santa Rosa Creek and Laguna de Santa Rosa. California State Route 116 travels north to south approximately 1.4 miles west of the project site. The site is identified by Assessor's Parcel Numbers (APNs) 130-040-008, 130-210-028, 130-040-014.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The following environmental factors have been determined to have a potentially significant effect and have been reduced to a less-than-significant impact through mitigation measures (MM), as described below:

1. Air Quality: MM AQ-1 would reduce impacts from pollutants and fugitive dust from construction and dredging activities.
2. Biological Resources: MM BIO-1 through BIO-6 would reduce impacts to biological resources from construction and dredging activities.
3. Cultural Resources: MM CR-1 and CR-2 would reduce impacts to cultural resources from construction and dredging activities.
4. Hazards and Hazardous Materials: MM HAZ-1 through HAZ-3 would reduce impacts from hazards and hazardous materials from construction and dredging activities.
5. Hydrology/Water Quality: MM HYD-1 would reduce impacts from discharge of sediment and pollutants during construction and dredging by requiring a SWPPP.
6. Tribal Cultural Resources: MM TCR-1 would reduce impacts to tribal cultural resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

- U.S. Army Corps of Engineers
- Federal Emergency Management Agency
- U.S. Fish and Wildlife Service
- Sonoma County Clerk-Recorder
