Project Title: Irvine Invasive Pest Mitigation And Fuels Reductions Project

Project Applicant: Orange County Fire Authority

Project Location - Specific:

The Project site is approximately 1,361 acres located around Turtle Ridge and Shady Canyon, as well as along the foothills of the Santa Ana Mountains. See Figure 1.

Project Location - City: Irvine Project Location - County: Orange

Description of Nature, Purpose and Beneficiaries of Project:

Orange County Fire Authority, under the CAL FIRE Fire Prevention Grant Program (Grant Number: 5GG17194), proposes to treat trees with pesticides to reduce the presence of invasive Gold Spotted Oak Borer (GSOB) and Invasive Shot Hole Borer (ISHB) within Orange County, CA. The Proposed Project is located in south-central Orange County (OC or County), within the limits of the City of Irvine (City).

Trees are an important component of natural ecosystems in California and treatment of infested trees would eliminate pests and slow the spread rate, enhancing the survival rate of existing tree populations. A decrease in tree mortality would ultimately reduce the wildfire risks to habitable structures by reducing potential fuel within parks and adjacent to roads, homes, and HOAs.
