| Eval Notes: | Facility collects variety of metal, E- waste, CRTs, cans, computer boards, ballasts, plastic bottles, etc. Used hydraulic oil is typically the only waste generated at the facility. The last pick up of used oil was in 8/2015. Facility is scheduling for oil change for the baler for 2017. Facility sweeps and washes the yard on a semi-annual basis (except during the winter of 2016/2017 due to substantial rain fall). Facility's handling location is in Brisbane, thus, the movement of UW is considered internal transport. |

Environmental Interest/Information System
STATE MASTER

Registry ID: 110002756303

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
 . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D039
 . Waste name: TETRACHLOROETHYLENE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: Facility has questions about a \$1200-\$1500 bill. Jorge can't produce the invoice for the claim and also stated because he could not pay the bill, waste pick up company will not pick up used oil. The only bill I saw from 2015 was from Safety Kleen for about \$275 for waste solvent. San Mateo County invoice was around \$900. Joege's daughter is handling the billing. Based on what was presented to me, I don't see the \$1200 bill. Looked on internet and found Asbury as an alternative.

Completed Document Type: Monitoring Report
Completed Date: 01/23/2017
Comments: The March 2016 Quarterly Groundwater Monitoring Report describes the quarterly groundwater sampling that took place in March 2016. DTSC has reviewed and approves the report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/24/2017
Comments: The revised June 2016 quarterly monitoring report provides the results of groundwater monitoring in June 2016. It has addressed DTSC's previous comments.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/15/2017
Comments: The September 2016 groundwater monitoring report documents the quarterly groundwater monitoring results from September 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/15/2017
Comments: The January 2017 groundwater monitoring report documents the quarterly groundwater monitoring results from January 2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/05/2013
Comments: This letter transmits DTSC's oversight cost estimate for the Union Pacific Site Adjacent to 69 S Linden Avenue for the fiscal year starting July 1, 2013 and ending June 30, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/28/2017
Comments: The Annual Oversight Cost Estimate provides an estimate of DTSC oversight costs for the year beginning July 1, 2017 and ending June 30, 2018.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/30/2012
Comments: Oversight Cost Estimate included as an Exhibit in the VCA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/06/2014
Comments: The Site Investigation Report summarizes the 2013 field investigation and presents an updated conceptual site model. The Report recommends the collection of sub-slab soil vapor samples, additional groundwater samples, and monitoring wells MW-01 through MW-05 for four quarters. DTSC accepts the Report's recommendations, but has requested a groundwater monitoring plan to be submitted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/11/2013
Comments: Fieldwork took place 6/17/2013 to 7/11/2013

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 11/01/2012
Comments: Union Pacific submitted to DTSC all previous environmental reports associated with the Site. DTSC reviewed these reports, provided comments, and made recommendations for future site investigations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 10/17/2014
Comments: The Groundwater Monitoring Plan describes the data quality objectives, sampling procedures, analytical methods, and frequency of groundwater monitoring activities for the Site. The October 17, 2014 Addendum to the Groundwater Monitoring Plan adds that during the first monitoring event, groundwater will also be analyzed for CAM-17 metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 09/11/2014
Comments: The Revised Addendum to the Revised Final Sampling and Analysis Work Plan describes the proposed scope of work and procedures for conducting an additional investigation at the site. The investigation will include collecting groundwater samples and subsurface vapor samples.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 08/25/2016
Comments: In 2014 additional site investigation was performed in accordance with the Revised Addendum to the Revised Final Sampling and Analysis

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-31-2016
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 07/22/2016. Facility has marked on monitoring plan that the USTs are fiberglass primary and secondary when they are actually steel. Also ensure that you have noted the correct annular space sensor as well. Tanks are modern welding.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-25-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/30/2017. Facility has the following containers that needed to be labeled as Empty Daily : 1. Trough for the used oil 2. A round collection pan 3. A small rectangle container whose purpose is to collect drips from the used oil hose line. Also, the 55 gallon waste paper filter drum needs to have a hazardous waste label.

PENSKE TRUCK LEASING CO., LP (Continued)

S121788059

Violation Description: 1, Section(s) 265.173
Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/30/2017. The 3 containers referenced above can't be closed, label each container with "Empty Daily" signs.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-22-2018
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.

Violation Notes: Regular gasoline tank had water intrusion. High water warning was noted on the 11/17 DO report. The high water warning became constant starting 1/2018 and was noted on every DO report for 2018 (even on the 5/8/2018 DO report). Facility representative (Kirk Blanz) stated they stopped using the gasoline tank due to water in the tank. Kirk stated repairs have been completed. However, at time of 2018 UST inspection, such repair report was not available. Facility needs to summarize all actions taken to address the high-water issue in the regular gasoline tank within 10 days and if repair has been done, a report needs to be submitted within 30 days. It is unclear at this time whether a permit should have been obtained from San Mateo County Health Services due to lack of information at the time of inspection. Mr. Rick Roybal seemed to be the individual authorizing and signing for repair work order. Mr. Roybal is out of the office until 5/27/2018.

Eval Notes: Product pipings are flexible piping. There are 3 islands. The middle island houses both diesel dispenser and regular gasoline dispensers. The 2 islands north and south of the middle island only dispense diesel. A total of 3 dispensers for diesel and one dispenser for gasoline. Tanknology is also performing SB989 testing today. The sump for gasoline can t be tested as the boot is completely disintegrated. Facility is not certain who owns the USTs. Facility will find it out. Last UST submission was in 4/2017. Some information submitted was inaccurate. inspector will mark the changes and c

CERS HAZ WASTE:

Site ID: 56073
CERS ID: 10130341
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-25-2017
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1

Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.

Violation Notes: Returned to compliance on 08/30/2017. Please notify property owner in writing that facility is subject to HMBP reporting requirement. Property owner may request a copy of the HMBP.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-31-2016
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)

Violation Description: Failure to maintain on site an approved monitoring plan.

Violation Notes: Returned to compliance on 07/22/2016. Facility has marked on monitoring plan that the USTs are fiberglass primary and secondary when they are actually steel. Also ensure that you have noted the correct annular space sensor as well. Tanks are modern welding.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-25-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 08/30/2017. Facility has the following containers that needed to be labeled as Empty Daily : 1. Trough for the used oil 2. A round collection pan 3. A small rectangle container whose purpose is to collect drips from the used oil hose line. Also, the 55 gallon waste paper filter drum needs to have a hazardous waste label.

Violation Date: 05-22-2018
Citation: HSC 6.7 25295(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25295(a)(1)
Violation Description: Failure to notify and/or prepare a report to the UPA upon discovery of a reportable or failed to record unauthorized release.
Violation Notes: Facility failed to notify the County regarding the water intrusion situation for the regular gas tank. Facility needs to summarize the how and when the water intrusion was noted and what remediation has been taken to address the situation within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-25-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 08/30/2017. The 3 containers referenced above can't be closed, label each container with "Empty Daily" signs.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-22-2018
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: Regular gasoline tank had water intrusion. High water warning was noted on the 11/17 DO report. The high water warning became constant starting 1/2018 and was noted on every DO report for 2018 (even on the 5/8/2018 DO report). Facility representative (Kirk Blanz) stated they stopped using the gasoline tank due to water in the tank. Kirk stated repairs have been completed. However, at time of 2018 UST inspection, such repair report was not available. Facility needs to summarize all actions taken to address the high-water issue in the regular gasoline tank within 10 days and if repair has been done, a report needs to be submitted within 30 days. It is unclear at this time whether a permit should have been obtained from San Mateo County Health Services due to lack of information at the time of inspection. Mr. Rick Roybal seemed to be the individual authorizing and signing for repair work order. Mr. Roybal is out of the office until 5/27/2018.

Eval Notes: Product pipings are flexible piping. There are 3 islands. The middle island houses both diesel dispenser and regular gasoline dispensers. The 2 islands north and south of the middle island only dispense diesel. A total of 3 dispensers for diesel and one dispenser for gasoline. Tanknology is also performing SB989 testing today. The sump for gasoline can t be tested as the boot is completely disintegrated. Facility is not certain who owns the USTs. Facility will find it out. Last UST submission was in 4/2017. Some information submitted was inaccurate. inspector will mark the changes and c

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 08/30/2017. Facility has the following containers that needed to be labeled as Empty Daily : 1. Trough for the used oil 2. A round collection pan 3. A small rectangle container whose purpose is to collect drips from the used oil hose line. Also, the 55 gallon waste paper filter drum needs to have a hazardous waste label.

Violation Date: 05-22-2018
Citation: HSC 6.7 25295(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25295(a)(1)

Violation Description: Failure to notify and/or prepare a report to the UPA upon discovery of a reportable or failed to record unauthorized release.

Violation Notes: Facility failed to notify the County regarding the water intrusion situation for the regular gas tank. Facility needs to summarize the how and when the water intrusion was noted and what remediation has been taken to address the situation within 30 days.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-25-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/30/2017. The 3 containers referenced above can't be closed, label each container with "Empty Daily" signs.

5/8/2018 DO report). Facility representative (Kirk Blanz) stated they stopped using the gasoline tank due to water in the tank. Kirk stated repairs have been completed. However, at time of 2018 UST inspection, such repair report was not available. Facility needs to summarize all actions taken to address the high-water issue in the regular gasoline tank within 10 days and if repair has been done, a report needs to be submitted within 30 days. It is unclear at this time whether a permit should have been obtained from San Mateo County Health Services due to lack of information at the time of inspection. Mr. Rick Roybal seemed to be the individual authorizing and signing for repair work order. Mr. Roybal is out of the office until 5/27/2018.

Eval Notes: Product pipings are flexible piping. There are 3 islands. The middle island houses both diesel dispenser and regular gasoline dispensers. The 2 islands north and south of the middle island only dispense diesel. A total of 3 dispensers for diesel and one dispenser for gasoline. Tanknology is also performing SB989 testing today. The sump for gasoline can't be tested as the boot is completely disintegrated. Facility is not certain who owns the USTs. Facility will find it out. Last UST submission was in 4/2017. Some information submitted was inaccurate. inspector will mark the changes and c

Violation Date: 05-25-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/30/2017. Facility has the following containers that needed to be labeled as Empty Daily : 1. Trough for the used oil 2. A round collection pan 3. A small rectangle container whose purpose is to collect drips from the used oil hose line. Also, the 55 gallon waste paper filter drum needs to have a hazardous waste label.

above can't be closed, label each container with "Empty Daily" signs.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 56073
Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-22-2018
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: Regular gasoline tank had water intrusion. High water warning was noted on the 11/17 DO report. The high water warning became constant starting 1/2018 and was noted on every DO report for 2018 (even on the 5/8/2018 DO report). Facility representative (Kirk Blanz) stated they stopped using the gasoline tank due to water in the tank. Kirk stated repairs have been completed. However, at time of 2018 UST inspection, such repair report was not available. Facility needs to summarize all actions taken to address the high-water issue in the regular gasoline tank within 10 days and if repair has been done, a report needs to be submitted within 30 days. It is unclear at this time whether a permit should have been obtained from San Mateo County Health Services due to lack of information at the time of inspection. Mr. Rick Roybal seemed to be the individual authorizing and signing for repair work order. Mr. Roybal is out of the office until 5/27/2018.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/19/2017. Label the waste coolant and used oil tank with hazardous waste labels provided within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 369462
Site Name: BAY AREA TIRE SERVICES
Violation Date: 12-19-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/19/2017. There is a 15 gallon container designed to hold metal for recycling, however, since there is oil water in the container, rule for container holding waste applies. Either label the drum and close the drum or consolidate the content to the used oil tank. Facility poured the content into the used oil tank during inspection.

Environmental Interest/Information System
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 09-19-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/19/2016. Haz Waste label missing on one of the 55 gallon waste oil drums sitting on secondary containment. Haz Waste label is too faded to convey sufficient information outside the container that is holding two 55 gallon drums inside. Please complete facility information on the haz waste label for the waste coolant drum.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

Lead Agency: SAN MATEO COUNTY LOP
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608100461
Global Id: T0608100461
Latitude: 37.654066984691
Longitude: -122.410791814327
Status: Completed - Case Closed
Status Date: 05/21/2014
Case Worker: AJ
RB Case Number: 41-0485
Local Agency: SAN MATEO COUNTY LOP
File Location: Local Agency
Local Case Number: 550068
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Can be extracted from most recent report in Geotracker or at San Mateo County offices if submitted prior to 2005, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report.

south-southwest of the intersection of Sylvester Road and East Grand Avenue. The site consists of approximately 3 acres, divided into the Associated Road Parcel, the Alan Baker property, and 105 Associated Road. Development and known historical uses of the site are discussed below. The Associated Road parcel (approximately 1.02 acres) is currently vacant and undeveloped, and is generally unpaved (a small asphalt-paved area is located at the entrance located at the south). No street address is linked to the Parcel; street frontage consists of approximately 30 feet along Associated Road (from which the Parcel is accessed), west of the intersection with Sylvester Road. S&S Tours, a charter bus company, leased the Parcel from approximately 1997 through 201 for vehicle parking. A prior report and adjacent site personnel stated that the company also washed buses at the Parcel. Mr. Patel later leased the Parcel in approximately 2004-2005 to a private individual for equipment storage. The Parcel is currently used for the parking and storage of trailers, as well as warehouse transfer operations between neighboring sites (105 Associated Road and 160 Sylvester Road). The Alan Baker property consists of two land parcels at 160 and 180 Sylvester Road, respectively, both of which are developed with warehouse-type buildings. Both buildings are predominantly used for warehouse storage space, and include a small percentage (of the overall square footage) that is used as office space. 160 Sylvester Road (approximately 0.87 acres) is occupied by the Alan Baker Company, which operates a storage and distribution warehouse at the property. Based on Environ's observations and understanding from Alan Baker personnel, the warehouse appears to be primarily used by a neighboring business for the storage of dry goods (e.g. spices, dry food products). 180 Sylvester Road (approximately 0.36 acres) is occupied by Weapon-R Competition Products, an automotive aftermarket products retailer and manufacturer. The building at 105 Associated Road, approximately 29,900 square feet, was constructed in 1955. Between approximately 1956 and 1978, the building was occupied for relatively short periods by a variety of light industrial tenants, including the Morris Manufacturing Company (reportedly a store fixture manufacturing company, and also a subsidiary of Kidde fire safety products), a refrigeration company, an auto part assembly and a distribution company, and various sales operations. The current tenant, San Francisco Spice Company, initially occupied the western portion of the building for use as a food product manufacturing and distribution facility in 1977, and took over the entire building in 1989. The eastern portion of the building was occupied by an auto auction warehouse and a furniture assembly and upholstery facility for relatively short periods during the 1980s. Previous investigations at the site conducted by Environ included Phase I and Phase II environmental site assessments of the Associated Road Parcel and 105 Associated Road property completed in 2006 and several soil, groundwater, and/or soil gas investigations conducted in February 2006, October 2006, June 2007, and October 2009. The primary chemicals of concern at the site appear to be chlorinated volatile organic compounds, chiefly tetrachloroethene, trichloroethene, and their breakdown products cis-1,2-dichloroethene, trans-1,2-dichloroethene, and vinyl chloride in soil gas and/or groundwater. These chemicals were detected at concentrations that exceeded San Francisco Regional Water Quality Control Board's residential and/or commercial Environmental Screening Levels for vapor intrusion concerns for soil gas and/or groundwater. Isolated

detections of other chemicals in soil gas and/or groundwater beneath the site and vicinity include 1,1-dichloroethane, 1,1-dichloroethene, 1,1,1-trichloroethane, trichlorofluoromethane, 1,1,2-trichlorotrifluoroethane, benzene, toluene, xylenes, and chloroform. Sampling efforts to date have not identified a significant point source of VOCs in soil at the Associated Road Parcel. A soil gas and groundwater "hotspot" appeared to be located beneath the eastern side of the Parcel immediately adjacent to the Alan Baker property, where TCE and cis-1,2-dichloroethene were identified as the primary contaminants present at that location. Maximum concentrations of TCE in soil gas and groundwater and cis-1,2-DCE found in 2006 are above applicable RWQCB Environmental Screening Levels for soil gas and groundwater. PCE was detected at only two sampling locations in soil gas, but at concentrations below ESLs for soil gas under a commercial land use scenario. Previous sampling also identified a hotspot at the Alan Baker property, specifically with the findings of VOCs in soil gas, soil, and groundwater at the east side of the Site, in proximity to the former gasoline UST and the eastern yard area between the buildings at 160 and 180 Sylvester Road. Through 2007, the PCE detections beneath the Alan Baker property were the only detections of PCE found above laboratory reporting limits in soil and groundwater sampling at the Site and adjacent properties during the investigations conducted by Environ. Concentrations of PCE, TCE, and cis-1,2-DCE detected in groundwater samples collected at the Site in June 2007 (sample locations GP-32 and AB-14) were significantly lower (up to one order of magnitude) than the maximum concentrations found in groundwater during previous investigations in March and April 2006.

professional interpretations made in the referenced report. The site is located in a light industrial/commercial area of South San Francisco, California. Railroad lines are adjacent to the east. The site is a former Caltrans maintenance station, consisting of an unoccupied one story office and auto-service building. Historic facilities on the site consist of a building identified on Sanborn Fire Maps as Gas and Oils, an apparent former service station. Two underground storage tank (UST) systems have likely existed onsite, associated with the former Caltrans station (2,000 gallon capacity) and, presumably, the former service station (unknown capacity). The site was most recently leased to Bob Jrs Towing and used as a storage yard for impounded vehicles. The site is located on the low lying areas west of San Francisco Bay in San Mateo County. Site topography gently slopes east, towards San Francisco Bay. Site elevation is approximately 19 ft above mean sea level and the nearest surface water is San Francisco Bay, approximately 1,200 feet (ft) east-southeast of the site. In 2007, TEC Accutite completed a Phase I Environmental Site Assessment (ESA) at the subject site, including both the abandoned facility and airspace parcels, and recommended soil testing as part of a Phase II ESA. TEC Accutite advanced a total of 12 soil borings at the site in December 2007 and May 2008 and identified concentrations of petroleum hydrocarbons and metals above applicable San Francisco Bay Regional Water Quality Control Board (SF Bay RWQCB) Environmental Screening Levels (ESLs) (see Section 4.4.3 for a discussion of ESL selection). The City of South San Francisco intends to develop both the abandoned facility and airspace parcels as a new Caltrain station. Plans for this development have been prepared by HNTB, the primary contractor for station construction, which include the construction of a pedestrian underpass requiring rerouting of the major utility lines that run through the site. TEC Accutite conducted the current investigation in order to: Further investigate the lateral and horizontal distribution of petroleum hydrocarbons and metals in soil and groundwater on the abandoned facility parcel and immediately offsite; Determine whether environmental remediation would be appropriate and evaluate available remedial technologies to determine the best remedial action alternative; Develop a recommended course of action for site remediation. This report addresses the first of these three goals. An evaluation of appropriate remedial technologies and a remedial action plan will be finalized pending completion of negotiations between the City of South San Francisco and Caltrans.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Local Case Number: 550206
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: Refer to historical reports under LOP Case #550004 for work related to the waste oil release. In brief, waste oil UST was replaced by Unocal in 1987, sheen was noted on adjacent MW-2 during 1987, up to 3.28 feet of NAPL was noted in MW-2 during the early 1990s (some of which was likely poured into the well by station personnel), and ConocoPhillips removed the waste oil UST and performed some remedial excavation in 2000.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002775257

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Site Characterization Workplan
Completed Date: 06/19/2013
Comments: Document was not prepared by DTSC. Comment letter from the San Mateo County Groundwater Protection Program (GPP) requesting a revision of a previously submitted workplan. GPP requested using current screening levels, defining the vertical extent of groundwater contamination, and adding in details about vapor sampling procedures.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 11/06/2013
Comments: Document was not prepared with DTSC oversight. Document was not prepared by DTSC. Letter from San Mateo Groundwater Protection Program approving a Report and Workplan for the Morena trust site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/04/2014
Comments: Document was not prepared by DTSC. Letter from San Mateo County Groundwater Protection Program (GPP) approving a pilot test to use soil vapor extraction (SVE) as a remedy for tetrachloroethene (PCE) vapor. GPP stated that case closure will not be recommended following determination of a site-specific slab attenuation factor.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 06/18/2015
Comments: Document was not prepared by DTSC. Response from San Mateo County Groundwater Protection Program (GPP) indicating indoor air intrusion remains a concern and requesting an additional progress report to monitor rebound and indoor vapor results.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 02/25/2015
Comments: Document was not prepared by DTSC. Letter from San Mateo County Groundwater Protection Program (GPP) in response to the Sub-Slab Vapor Remediation Progress Report submitted December 22, 2014. GPP expressed concerns that soil and vapor impacts may still be present and contributing to subsurface vapor issues on site. GPP requested a workplan to investigate potential indoor air.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/30/2015
Comments: Letter was not prepared by DTSC. Letter from San Mateo County Groundwater Protection Program (GPP) noting that standard indoor air sampling protocols were not followed for the 11/16/2015 indoor air report and requesting a cool season sampling event.

Completed Document Type: Site Characterization Report
Completed Date: 05/25/2016
Comments: Document was not prepared with DTSC oversight. In response to a May 22, 2015 letter from San Mateo County Groundwater Protection Program (GPP), Trinity Source Group (Trinity) conducted a cool-weather assessment of indoor air. Sub-slab vapor probes were also sampled. Maximum reported concentrations were 2.1ug/m3 for tetrachloroethene (PCE) and 0.086 ug/m3 for trichloroethene (TCE) for the indoor air sampling. PCE was detected from in 14 of the 16 subslab probes samples from 48.8 to 25,600 ug.m3. TCE was detected in 8 of the 16 subslab probes at concentrations ranging from 94.0 to 1540ug/m3.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Alternate Address: 120 SOUTH LINDEN
Alternate City,St,Zip: S SAN FRANCISCO, CA 94080
Background Info: The Site is bounded to the north by Victory Avenue, to the south by Tanforan Avenue, to the east by railroad tracks, and to the west by South Maple Avenue. The site is comprised of a building and a warehouse, which is used for automotive storage. Areas around the buildings are paved or landscaped. The site is located in an industrial area and is adjacent to a tire company. Joseph W. Welch & Investors purchased the site in 1984. The site is now zoned for light industrial use. The property is currently occupied by a number of different tenants, including music studios, auto repair shops and restoration facilities. The Reichold Chemical site is a registered historical landmark by San Mateo County. From 1937 to 1984, Reichhold Chemicals Inc. owned and operated the site. Reichhold manufactured paint products using emulsion, phenol, alkyd, and urea resins.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2016
Citation: 23 CCR 16 2632, 2634, 2636, 2666 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632, 2634, 2636, 2666

Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.

Violation Notes: Returned to compliance on 02/19/2016. UDC sensors failed.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2015
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)

Violation Description: Failure to maintain on site an approved monitoring plan.

Violation Notes: Returned to compliance on 01/26/2015. The monitoring plan is incorrect. I am rejecting it in CERS. The annular sensor is a 303 not a 302.

Violation Description: 16, Section(s) 2712(b)
Failure to maintain monitoring and maintenance records and/or maintain records of appropriate follow-up actions.

Violation Notes: Returned to compliance on 01/19/2018. No record could be located as to how the 7/21/17 alarm L2 fill sump alarm was cleared and the cause of this alarm. There is no work order available to show that a technician came out to check the sump and clear the alarm. There was an SB 989 on this date and this may be cause of the alarm.

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 12-25-2014
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)

Violation Description: Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions

Violation Notes: Returned to compliance on 01/22/2015. Annular space alarms on Sept 14, 16 and 17th. No work order was associated with these alarms. All alarms must be responded to promptly. I instructed the facility operator Mr. Crowe to develop a protocol to address alarms.

Violation Date: 01-19-2018
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: MLLD failed to detect leak at calibrated 3.0 GPH. Technician is adjusting and will re-test. Technician has attempted to adjust the leak detector and it is still not detecting the leak. There is lots of corrosion in there as well. This will need to be replaced.

Violation Date: 01-22-2016
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 02/19/2016. Sensors for both dispensers failed and do not go into alarm or shut down the pump. These will need to be replaced and re-tested as well as update monitoring plans.

Site ID: 96696
CERS ID: 10066132
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2015
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of sensor to be located in the proper position/location.
Violation Notes: Returned to compliance on 02/02/2015. 208 sensor was at approx a 45 degree angle in the piping sump. 3 gallons of fuel was removed from the other side of the sump. The tech dipped the 208 in the fuel and it was enough to shut down the turbine.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-19-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: send training records within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2016
Citation: 23 CCR 16 2632, 2634, 2636, 2666 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632, 2634, 2636, 2666

Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.

Violation Notes: Returned to compliance on 02/19/2016. UDC sensors failed.
Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2015
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)

Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 01/26/2015. The monitoring plan is incorrect. I am rejecting it in CERS. The annular sensor is a 303 not a 302.

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-19-2018
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain monitoring and maintenance records and/or maintain records of appropriate follow-up actions.
Violation Notes: Returned to compliance on 01/19/2018. No record could be located as to how the 7/21/17 alarm L2 fill sump alarm was cleared and the cause of this alarm. There is no work order available to show that a technician came out to check the sump and clear the alarm. There was an SB 989 on this date and this may be cause of the alarm.

alarms must be responded to promptly. I instructed the facility operator Mr. Crowe to develop a protocol to address alarms.
San Mateo County Environmental Health

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-19-2018
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)

Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.

Violation Notes: MLLD failed to detect leak at calibrated 3.0 GPH. Technician is adjusting and will re-test. Technician has attempted to adjust the leak detector and it is still not detecting the leak. There is lots of corrosion in there as well. This will need to be replaced.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 96696
Site Name: AVIS RENT A CAR SYSTEM
Violation Date: 01-22-2016
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)

Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.

Violation Notes: Returned to compliance on 02/19/2016. Sensors for both dispensers failed and do not go into alarm or shut down the pump. These will need to be replaced and re-tested as well as update monitoring plans.

Case Worker: AJ
RB Case Number: Not reported
Local Agency: SAN MATEO COUNTY LOP
File Location: Local Agency
Local Case Number: 550197
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel
Site History: Extracted from AllWest's March 10, 2010 Revised Workplan Additional Site Characterization, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject property is developed with an approximate 125,607 square foot single-story commercial building occupied by a Lowes Home Improvement retail facility and an approximate 13,200 square foot single story retail building used for retail marine sales (West Maine). The property is located north of Grand Avenue, east of Highway 101 and west of the main tracks of the Southern Pacific Rail Road in a commercial and industrial district of the City of South San Francisco, California. Limited information regarding the history, age and use of the chemicals at the property is known. Sanborn maps, aerial photographs and other historical documents provide limited information regarding the location or existence of tanks or chemical use. A 1925 Sanborn map notes the location of four 10,000 gallon fuel oil storage tanks at the northern end of the foundry building. Initial investigators interpreted the drawings as representing four above ground tanks. However, based on recent work, two of the tanks originally interpreted as above ground tanks were actually underground storage tanks (Tank-1 and Tank-2). Various investigators have performed subsurface investigations and remedial work at the property since at least 1988. The work included historical research, soil and groundwater sampling, installation and sampling of groundwater monitoring wells and the removal of a 2,000-gallon gasoline underground storage tank (UST) in 1990 from the central portion of the property. Eleven groundwater monitoring wells were installed in 1990 and 1991, and groundwater monitoring was conducted until 1999. A Case Closure Memorandum for the UST was issued on March 8, 2001 by the SMCEH. The monitoring wells were abandoned in 2001. Past investigations were summarized in AllWest's Subsurface Investigation Report, dated March 22, 1991, the SMCEH Case Closure Memorandum, and the Consolidated Engineering Laboratories (CEL) report titled Limited Phase 2 Subsurface Environmental Site Assessment dated December 23, 2005. Two 10,000 gallon fuel oil USTs (Tank-1 and Tank-2) associated with the former foundry were discovered on May 3, 2007 in the northwest section of the property during removal of an inactive sewer line. A review of historical documentation indicates the two USTs discovered during grading activities are likely those depicted in a 1925 Sanborn map of the property. The two 10,000-gallon USTs were successfully excavated and removed from the property on May 18 and 21, 2007. Approximately 520 tons of soil was excavated and 15,000 gallons of petroleum product and water removed during the UST removals. Total petroleum hydrocarbons as gasoline (TPH-g), total petroleum hydrocarbons as diesel (TPH-d) and total petroleum hydrocarbons as motor oil (TPH-mo) were detected in confirmatory excavation soil samples at maximum concentrations of 570 milligrams per kilogram (mg/kg), 18,000 mg/kg and 15,000 mg/kg. These concentrations exceed Environmental Screening Levels (ESLs) established by the Regional Water Quality Control Board, San

Francisco Bay Region for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Approximately 30,000 tons of soil were excavated and removed from the subject site during mid-2007 from grading activities for construction of the Lowes building. Two additional USTs were discovered during trenching at the property. Tank-3 located in the north central portion of the property was a crushed tank approximately 3 feet by 6 feet and appeared to have been discarded. No fuel lines, backfill or other signs of use were found in the vicinity of the tank. The tank was clean. The tank was removed and properly disposed from this location on August 30, 2007. During excavation of foundation footings and removal of buried rail road ties in the northwest portion of the property, discolored soil with solvent and petroleum odors was encountered. This location is in the general area of the property where previous investigations have encountered soil with similar characteristics. On July 12, 13 and 16, 2007, AllWest performed a subsurface investigation consisting of the advancement of 35 Geoprobe borings along proposed sanitary and storm sewer line routes. The borings were advanced to maximum depths of approximately 3 to 8 feet bgs. Low concentrations of VOCs were detected in soil samples, including perchloroethene (PCE), naphthalene, acetone, toluene, methyl ethyl ketone (MEK), xylenes, and various benzene compounds at concentrations not exceeding RWQCB ESLs for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Concentrations of TPH-g, TPH-d and TPH-mo exceeding RWQCB ESLs were detected in soil samples from three borings; with low to nondetectable concentrations in the remaining borings. Concentrations of total chromium exceeding ESLs were detected in 46 of 50 samples analyzed; however hexavalent chromium was not detected in any samples analyzed. Concentrations of arsenic, cobalt and copper slightly exceeding ESLs were detected in some soil samples, but exceeded natural background levels in only two locations. Two grab groundwater samples were collected during the July 2007 subsurface investigation. TPH-d and TPH-mo were detected at one location in the southwest portion of the site at concentrations of 2,100 micrograms per liter ("g/L) and 2,700 "g/L, exceeding RWQCB ESLs for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Tank 4 was discovered during trenching for a new storm drain line on September 21, 2007. The tank was located on the eastern side of the West Marine Store. No surface features indicating the existence of a UST was noted prior to discovery. The tank was steel, approximately 4 feet in diameter and 12 feet long with an estimated capacity of 1,000 gallons. Given the location and condition of the tank, it was likely used for storage of heating oil or fuel oil. The tank was excavated and removed from the property on September 25, 2007. Approximately 80 tons of soil was excavated and 250 gallons of water and product were removed. Five soil samples and one groundwater sample were collected from the excavation. No petroleum hydrocarbon constituents or VOCs were detected at concentrations exceeding RWQCB ESLs in any confirmatory soil samples collected from the Tank 4 excavation. Low concentrations of TPH-g, TPH-d, TPH-mo, MEK, cis-1,2-dichloroethene (cis-1,2-DCE) and acetone were at detected in samples collected from the floor of the excavation at concentrations not exceeding ESLs. PCE was detected at low concentrations in a soil stockpile sample. TPH-g was not detected in the groundwater sample collected from the Tank 4 excavation. TPH-d and TPH-mo were detected in groundwater at concentrations of 380 micrograms per liter ("g/L) and 750 "g/L, both exceeding ESLs. Three

VOCs, vinyl chloride, cis-1,2-DCE and PCE, were also detected at concentrations of 240 "g/L, 490 "g/L and 13 "g/L, respectively; with only vinyl chloride exceeding ESLs. No other VOCs were detected.

Site History: Extracted from AllWest's March 10, 2010 Revised Workplan Additional Site Characterization, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject property is developed with an approximate 125,607 square foot single-story commercial building occupied by a Lowes Home Improvement retail facility and an approximate 13,200 square foot single story retail building used for retail marine sales (West Maine). The property is located north of Grand Avenue, east of Highway 101 and west of the main tracks of the Southern Pacific Rail Road in a commercial and industrial district of the City of South San Francisco, California. Limited information regarding the history, age and use of the chemicals at the property is known. Sanborn maps, aerial photographs and other historical documents provide limited information regarding the location or existence of tanks or chemical use. A 1925 Sanborn map notes the location of four 10,000 gallon fuel oil storage tanks at the northern end of the foundry building. Initial investigators interpreted the drawings as representing four above ground tanks. However, based on recent work, two of the tanks originally interpreted as above ground tanks were actually underground storage tanks (Tank-1 and Tank-2). Various investigators have performed subsurface investigations and remedial work at the property since at least 1988. The work included historical research, soil and groundwater sampling, installation and sampling of groundwater monitoring wells and the removal of a 2,000-gallon gasoline underground storage tank (UST) in 1990 from the central portion of the property. Eleven groundwater monitoring wells were installed in 1990 and 1991, and groundwater monitoring was conducted until 1999. A Case Closure Memorandum for the UST was issued on March 8, 2001 by the SMCEH. The monitoring wells were abandoned in 2001. Past investigations were summarized in AllWest's Subsurface Investigation Report, dated March 22, 1991, the SMCEH Case Closure Memorandum, and the Consolidated Engineering Laboratories (CEL) report titled Limited

Phase 2 Subsurface Environmental Site Assessment dated December 23, 2005. Two 10,000 gallon fuel oil USTs (Tank-1 and Tank-2) associated with the former foundry were discovered on May 3, 2007 in the northwest section of the property during removal of an inactive sewer line. A review of historical documentation indicates the two USTs discovered during grading activities are likely those depicted in a 1925 Sanborn map of the property. The two 10,000-gallon USTs were successfully excavated and removed from the property on May 18 and 21, 2007. Approximately 520 tons of soil was excavated and 15,000 gallons of petroleum product and water removed during the UST removals. Total petroleum hydrocarbons as gasoline (TPH-g), total petroleum hydrocarbons as diesel (TPH-d) and total petroleum hydrocarbons as motor oil (TPH-mo) were detected in confirmatory excavation soil samples at maximum concentrations of 570 milligrams per kilogram (mg/kg), 18,000 mg/kg and 15,000 mg/kg. These concentrations exceed Environmental Screening Levels (ESLs) established by the Regional Water Quality Control Board, San Francisco Bay Region for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Approximately 30,000 tons of soil were excavated and removed from the subject site during mid-2007 from grading activities for construction of the Lowes building. Two additional USTs were discovered during trenching at the property. Tank-3 located in the north central portion of the property was a crushed tank approximately 3 feet by 6 feet and appeared to have been discarded. No fuel lines, backfill or other signs of use were found in the vicinity of the tank. The tank was clean. The tank was removed and properly disposed from this location on August 30, 2007. During excavation of foundation footings and removal of buried rail road ties in the northwest portion of the property, discolored soil with solvent and petroleum odors was encountered. This location is in the general area of the property where previous investigations have encountered soil with similar characteristics. On July 12, 13 and 16, 2007, AllWest performed a subsurface investigation consisting of the advancement of 35 Geoprobe borings along proposed sanitary and storm sewer line routes. The borings were advanced to maximum depths of approximately 3 to 8 feet bgs. Low concentrations of VOCs were detected in soil samples, including perchloroethene (PCE), naphthalene, acetone, toluene, methyl ethyl ketone (MEK), xylenes, and various benzene compounds at concentrations not exceeding RWQCB ESLs for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Concentrations of TPH-g, TPH-d and TPH-mo exceeding RWQCB ESLs were detected in soil samples from three borings; with low to nondetectable concentrations in the remaining borings. Concentrations of total chromium exceeding ESLs were detected in 46 of 50 samples analyzed; however hexavalent chromium was not detected in any samples analyzed. Concentrations of arsenic, cobalt and copper slightly exceeding ESLs were detected in some soil samples, but exceeded natural background levels in only two locations. Two grab groundwater samples were collected during the July 2007 subsurface investigation. TPH-d and TPH-mo were detected at one location in the southwest portion of the site at concentrations of 2,100 micrograms per liter ("g/L) and 2,700 "g/L, exceeding RWQCB ESLs for Commercial/Industrial Land Use where groundwater is not a drinking water resource. Tank 4 was discovered during trenching for a new storm drain line on September 21, 2007. The tank was located on the eastern side of the West Marine Store. No surface features indicating the existence of a UST was noted prior to discovery. The

tank was steel, approximately 4 feet in diameter and 12 feet long with an estimated capacity of 1,000 gallons. Given the location and condition of the tank, it was likely used for storage of heating oil or fuel oil. The tank was excavated and removed from the property on September 25, 2007. Approximately 80 tons of soil was excavated and 250 gallons of water and product were removed. Five soil samples and one groundwater sample were collected from the excavation. No petroleum hydrocarbon constituents or VOCs were detected at concentrations exceeding RWQCB ESLs in any confirmatory soil samples collected from the Tank 4 excavation. Low concentrations of TPH-g, TPH-d, TPH-mo, MEK, cis-1,2-dichloroethene (cis-1,2-DCE) and acetone were at detected in samples collected from the floor of the excavation at concentrations not exceeding ESLs. PCE was detected at low concentrations in a soil stockpile sample. TPH-g was not detected in the groundwater sample collected from the Tank 4 excavation. TPH-d and TPH-mo were detected in groundwater at concentrations of 380 micrograms per liter ("g/L) and 750 "g/L, both exceeding ESLs. Three VOCs, vinyl chloride, cis-1,2-DCE and PCE, were also detected at concentrations of 240 "g/L, 490 "g/L and 13 "g/L, respectively; with only vinyl chloride exceeding ESLs. No other VOCs were detected.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type: Cleanup Program Site
Case Worker: AJ
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: Not reported
File Location: Not reported
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Lead
Site History: Extracted from Geomatrix's May 5, 2004 Confirmation Sampling Report, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. A more comprehensive description of the former site use is presented in the Phase I report, prepared by Geomatrix. In brief, the majority of the site was historically occupied by a construction equipment rental business since at least 1970. Additional site operations included a well drilling equipment distributor, a customs house, a Christmas tree supply warehouse, office space, a clothing wholesaler, and an electrical supply warehouse. The site was re-developed in 2002 by Britannia into the Sugen III facility, a commercial/industrial facility suitable for biotechnology operations. The facility grounds consist of multi-level structures and paved parking areas. The facility was not been occupied at the time this work was performed. Geomatrix conducted a Phase I and Phase II site assessment of environmental conditions at the site in October and November 1997 on behalf of Britannia. As part of Phase I activities, two underground storage tanks (USTs) and an oil/water separator (OWIS) were identified as environmental concerns at the site. A limited Phase I1 investigation was subsequently conducted in the area of the UST and OWIS. Phase I1 activities included advancing five direct push soil borings (B-1 through B-5; Figure 2) to a depth of 6 feet below ground surface (bgs). Soil and groundwater samples were collected and analyzed for petroleum constituents and volatile organic compounds. The results of the Phase I1 investigation identified petroleum constituents (e.g. benzene) in soil and groundwater in the investigation area, and, as such, Geomatrix recommended to Britannia that the USTs and OWIS be removed. In December 1998 and January 1999, Geomatrix observed the removal of the two USTs (one 1000-gallon diesel UST and one 500-gallon gasoline UST) and the OWIS. On behalf of Britannia, and under the supervision of San Mateo County Environmental Health Department representatives, a Geomatrix field geologist collected soil and water samples from the bottom (approximately 8 to 9 feet bgs) of the UST and OWIS excavations. A comparison of the concentration of petroleum hydrocarbons detected in soil samples collected as part of the Phase II and UST and OWIS removal activities to applicable Environmental Screening Criteria compiled by the San Francisco Bay Regional Water Quality Control Board (RWQCB, 2003) indicates that benzene in the

soil sample collected from B-1 (0.97 mg/kg) is slightly greater than the residential and commercial screening criteria of 0.18 mg/kg and 0.38 mg/kg, respectively. Concentrations of other petroleum constituents in soil samples are less than or slightly greater than applicable screening criteria. The concentration of benzene in the grab groundwater sample collected from B-1 (185 ug/l) is less than the screening criteria used to evaluate potential indoor air impacts from benzene in groundwater, this criterion ranges from 530pgtl (residential use) to 6.4 ug/l (commercial/industrial use). Considering the location of B-1 within the paved parking area outside the footprint of the existing building and the low likelihood that shallow groundwater beneath the site will be used as drinking water source; Geomatrix concluded that that concentrations of petroleum hydrocarbons at the site should not pose a significant risk to human health and the environment under the current site use as a commercial/industrial facility.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info: The Site is located in an industrial area. There is a one-story building and a warehouse on the Site, which is used for automotive storage. A portion of the Site is leased to a wood pallet company and another portion is used for storage of inactive AT&T vehicles. From 1935 to 2000, DuPont de Nemours (DuPont) owned the Site. DuPont manufactured automotive paints and varnishes until 1982, and warehoused and distributed their products until 1990. Deerfield Realty Corporation acquired the Site in September 2000 and plans to develop it as a Class A office park.

Status Date: 10/06/2011
Case Worker: AJ
RB Case Number: 41-0692
Local Agency: SAN MATEO COUNTY LOP
File Location: Not reported
Local Case Number: 550117
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Arsenic, Stoddard solvent / Mineral Sprits / Distillates
Site History: Extracted from URS documents San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced reports. The former DuPont plant in South San Francisco was an active paint manufacturing operation from 1934 through 1982. Peak production at the plant occurred in 1955, when employment reached 250 workers. In 1982, operations were reduced, and from 1982 until September 2000 the facility was used mainly for warehousing paints and quality control testing of bulk paints that were shipped to the NUMMI plant in Fremont, California. In 1985, DuPont sold one of its parcels (150 South Linden Avenue) to Bay Cities Building Materials. In September 2000, Intrinsic Ventures LLC of Menlo Park, California, purchased the remaining parcel (160 South Linden Avenue) from DuPont. The Site is currently being used for commercial occupancy. The Site is located on a bay plain about 1.5 miles west of San Francisco Bay. The Site is located at an elevation of about 20 feet above sea level and slopes gently northwestward. A map prepared by the U.S. Geological Survey shows that old marshlands, that have been covered with man-made fill, begin about 500 feet northeast of the site and extend to the edge of San Francisco Bay. On the U.S. Geological Survey map the Site is shown as being underlain by the Quaternary age Colma Formation, which is composed of sand, sandy clay, and silty sand. Toward San Francisco Bay, younger alluvium and bay mud overlie the Colma Formation. Depth

MAP FINDINGS

DUPONT (Continued)

1000925659

to groundwater at the Site during the latest monitoring event on June 14, 2007 ranged from 5.38 to 8.57 feet bgs. The average direction of groundwater flow for that date was to the northeast at an average gradient of 0.013 feet per foot. The entire area from the Site eastward to San Francisco Bay is developed as industrial and commercial properties. Industrial and commercial properties also extend north, west, and south from the Site. There are no residential properties in the vicinity of the Site. Several investigations have been conducted at the Site to characterize its soil, groundwater quality, and hydrogeologic conditions. In general, these investigations were designed to evaluate the extent of impacted soils and groundwater beneath the Site and to assess the hydrogeologic conditions. Groundwater monitoring is ongoing at the Site. DuPont Environmental Remediation Services (DERS) performed a limited Environmental Assessment of the Site in 1991. Eleven soil borings were advanced at locations selected after a review of historical site activities. Soil samples were collected from each boring. The soil analytical results from this investigation showed the presence of impacted soils in the area of the former tank farm. Soils were impacted with BTEX and other volatile organic compounds (VOCs), including acetone, 2-butanone, hexanone, methylene chloride, and di-n-butylphthalate. In October 1998, URS Greiner Woodward-Clyde performed a Phase II Environmental Site Assessment (ESA) at the Site. Eleven more soil borings were advanced at locations based on the results of the DERS investigation and a historical review of Site activities. Soil and groundwater samples were collected at each boring. In addition, shallow soil samples were collected at five other locations. Toluene, ethylbenzene, xylenes, TPH-gas, and total petroleum hydrocarbons as diesel (TPH-diesel) were detected in over half of the soil samples. Benzo(a)pyrene, di-n-butylphthalate, and naphthalene were detected in soil samples from the tank farm area. BTEX, acetone, 2-butanone, 1,2-dichloroethane, and several semi-volatile organic compounds (SVOCs) were detected in Site groundwater samples. Site Specific Target Levels (SSTLs) were prepared for several future use scenarios in response to a County request and submitted with the Phase II ESA Report. URS performed a remedial investigation at the Site in July 1999. Among other tasks, the remedial investigation included collection and analysis of groundwater samples from the former tank farm area. The remedial investigation results indicated a potential hydrocarbon plume (TPH-mineral spirits, toluene, ethylbenzene, and xylenes) in groundwater that extended from the former tank farm area to South Linden Avenue. DuPont conducted a soil removal action in May-July 2000 under the direction of the County. URS submitted a remedial action report on July 26, 2000 that detailed the source removal activities performed as part of this action. The excavations were backfilled with imported clean bank-run fill material. In August 2000, four monitoring wells were installed in accordance with the work plan. Three monitoring wells were installed along the centerline of the plume and are being sampled in accordance with the groundwater monitoring and reporting plan. The fourth well was installed at an upgradient location and serves as a background well. Five quarters of groundwater monitoring were performed from December 2000 through December 2001 to investigate plume stability at the Site. Because the sampling results indicated a stable plume, the County approved a change to semiannual monitoring beginning in June 2002. In December 2002, URS performed an off-site groundwater investigation to evaluate

possible off-site groundwater impacts of the former DuPont Automotive Products facility, in response to the San Mateo County Health Services Agency request for investigation. The investigation activities included sampling and analysis of shallow groundwater in two areas. The first area of investigation was along the border between the former DuPont Automotive Products facility and the adjacent Bay Cities Building Materials site. The second area of investigation occurred in the roadway on South Linden Avenue. Six soil borings were advanced and groundwater was collected from the temporary wells installed in the borings. Analytical results showed that the risk-based screening levels (RBSLs), based on exposure to vapor emissions from groundwater in indoor environment, were not exceeded at the sampled locations. Hence, it was concluded that the former DuPont Automotive Products facility was not causing human health concerns at the adjacent Bay Cities Building Materials site or in the roadway of South Linden Avenue. In a letter dated July 28, 2003, the County approved the elimination of groundwater analysis for TPH-gas, total petroleum hydrocarbons as mineral spirits (TPH-mineral spirits), and equipment blanks based on the submitted groundwater monitoring data. In 2003, the County notified DuPont by letter that the Site would need to be remediated to a residential standard unless a new, separate deed restriction was recorded for the Site. In a letter dated September 14, 2005, the County requested that DuPont compare historical Site soil and groundwater data with San Francisco Bay Region Water Quality Control Board Environmental Screening Levels (ESLs) for a hypothetical future residential land use of residential slab-on-grade construction. In response to the Countys request, DuPont submitted the Current Conditions Report on March 31, 2006. On June 8, 2006, the County requested that a Work Plan be submitted to establish cleanup goals and either propose additional Site characterization based on the residential land use criteria or evaluate several remedial alternatives. As a result of previous investigations and removal actions, concentrations and distributions of constituents of concern are well understood over much of the Site. However, as stated in DuPonts July 3, 2006, recommendations for further characterization in the Amendment to the Current Conditions Report, additional groundwater sampling was needed to address data gaps pertinent to an assumed future residential use with slab-on-grade construction. In a letter dated July 18, 2006, the County provided comments and requested that additional groundwater data be collected as part of the Work Plan to assess plume stability. On August 10, 2006, DuPont submitted the Site Characterization Work Plan for Potential Future Residential Use, which presented the proposed work scope to further characterize and evaluate on-site soil, groundwater and soil gas based on a future hypothetical residential land use scenario, assuming slab-on-grade construction. The Work Plan was prepared in response to the Countys letters of June 8 and July 18, 2006. The Work Plan also presented a proposed scope of work to further evaluate and characterize the stability of the groundwater plume, both on-site and off-site, in response to the Countys letter of July 18, 2006. In a letter dated September 6, 2006, the County indicated acceptance of the work plan with modifications including analysis for hexavalent chromium in soil, evaluation of soil ecotoxicity screening levels, unsuitability of Geoprobe™ methods for geotechnical sampling, and collecting samples from the adjacent downgradient property location. In a letter dated November 22, 2006, the County indicated that it had received verification of the commercial deed restriction cosigned by

DUPONT (Continued)

1000925659

San Mateo County, and that the deed restriction may decrease the scope of, but not necessarily eliminate, the Work Plan submitted on August 10, 2006. In a meeting with URS on December 5, 2006, the County agreed to a modification of the scope of work in the work plan to include only characterization of the on-site and off-site stability of the toluene plume in groundwater. The revised scope of work was summarized in a letter from URS to the County dated December 22, 2006. A subsurface investigation to characterize the groundwater toluene plume stability on-site and off-site was performed on January 31 and February 1 and 2, 2007. Fourteen grab groundwater samples were collected and analyzed for BTEX, acetone, 2-butanone (MEK), 4-methyl-2-pentanone (MIBK), 1,2-dichloroethane (DCA), and naphthalene. The data show that constituent levels exceeded RWQCB ESLs for groundwater as a potential drinking water resource at several sample locations on the Site and the adjacent property at 150 South Linden Avenue. None of the groundwater sample results exceed the Site-Specific Target Levels (SSTLs) developed for the Dupont facility or the RWQCB ESLs for indoor air impact in a commercial/industrial land use scenario with highly permeable soils. DuPont submitted the Site Groundwater Plume Stability Characterization Report on April 25, 2007, and concluded in the report that upgradient and crossgradient extents of the main contaminant plume in shallow groundwater had been substantially delineated. The report also concluded that the downgradient offsite extent of the main contaminant plume in shallow groundwater had not been fully delineated; however, the plume appeared to narrow substantially to the east beyond the west margin of South Linden Avenue. The June 14, 2007 groundwater monitoring results showed benzene, toluene, ethylbenzene, xylenes, acetone, 2-butanone (MEK) and 4-methyl-2-pentanone (MIBK) in monitoring well MW-1 at concentrations of 170 micrograms per liter ("g/L), 150,000 "g/L, 4,700 "g/L, 23,000 "g/L, 8,200 "g/L, 110 "g/L and 790 "g/L respectively (URS 2007b). Well MW-1 is the well closest to the former source area and is upgradient to the Central Concrete Supply Company (former Bay Cities Building Materials) site. In the July 1999 remedial investigation, two borings, A1 and A2, were advanced at the property boundary between the former DuPont site and the Bay Cities Building Materials site, and three borings, B1, B2, and B3, were advanced in South Linden Avenue roadway, adjacent to the two sites. In July 1999, BTEX was detected at both borings advanced at the property boundary, A1 and A2. Benzene was detected at concentrations of 100 "g/L at boring A1 and 200 "g/L at boring A2. Toluene was detected at concentrations of 45,000 "g/L at boring A1 and 110,000 "g/L at boring A2. Ethylbenzene was detected at concentrations of 3,000 "g/L at boring A1 and 3,500 "g/L at boring A2. Total xylenes were detected at concentrations of 13,000 "g/L at boring A1 and 16,000 "g/L at boring A2. TPH-gas was detected at concentrations of 130 mg/L at boring A1 and 190 mg/L at boring A2. TPH-diesel was found at concentrations of 4.2 mg/L at boring A1 and 3.9 mg/L at boring A2. In July 1999, BTEX was also present in all three borings advanced in the South Linden Avenue roadway, B1, B2, and B3. The concentrations ranged from 0.3 "g/L (data qualified with a J) to 50 "g/L for benzene, 180 "g/L to 12,000 "g/L for toluene, 8 "g/L to 390 "g/L for ethylbenzene, and 39 "g/L to 2,000 "g/L for total xylenes. TPH-gas was detected at concentrations ranging from 0.38 mg/L to 28 mg/L, and TPH-diesel was found at concentrations ranging from 0.67 mg/L to 1.5 mg/L. These results were obtained before the May-June 2000 soil

1000379055

Latitude: 37.640136894
Longitude: -122.412673591
Case Type: Cleanup Program Site
Case Worker: MZ
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: 41S0155
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Other Solvent or Non-Petroleum Hydrocarbon, Trichloroethylene (TCE)
Site History: The site is a vacant, 20-foot high warehouse building constructed in 1963. From 1963 to 1972, the warehouse was leased to a wood cabinet maker. In 1972, the site was leased to San Bruno Auto Center, a towing and auto repair facility, which installed and operated a 3,000-gallon underground fuel storage tank (UST) and equipment for its tow trucks. Since 1971 Phase II Corporation (Phase II), a printed circuit board manufacturer, leased the adjacent property and in 1983, leased the site itself. Phase II operated a plating and etching facility at the site. The operation used hazardous materials and generated hazardous waste during its operation, treating and discharging approximately 500,000 gallons/month of process water to the sewer. The site was abandoned in 1998 when the company went bankrupt. In 1998, the San Mateo County Health Services Agency notified the property owner that the facility must be decommissioned, decontaminated, and closed. The facility was closed until 1999 and the warehouse was leased to a garment cutting business, Juans Cutting Service, and then to an automobile towing company, Aces Towing. A TCE/DCE/VC/benzene plume extends offsite under adjacent buildings and under Montgomery Ave. Two on-site source areas associated with past operations: SW of the building and beneath the former storage area in front part of building. San Bruno does use some groundwater to supplement the water supplied via the Hetch Hetchy/SFPUC. This site is not impacting the groundwater used for drinking water, although the cleanup will require achieving drinking water standards.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Completed Site Screening. The site was a metal recycling facility for 60 years. DHS certified closure in 1986. During its sale, levels exceeding closure criteria were found (650-1020 ppm Lead). DHS allowed development of the site for industrial uses if site will be covered with one foot cap of fill material and if declaration of covenants, conditions and restrictions is recorded.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/01/1986
Comments: Certified site. In June of 1982, Tinmet submitted a closure plan to DHS. Closure was carried out from July 1982 through October 1985. Closure activities consisted of the removal of on-site commercial waste products, contaminated soils and sludges from various areas, shredder residue, two underground storage tanks, and liquid from the evaporation pond. The closure plan was overseen and approved by DHS. The primary chemicals of concern in soil, sludge, surface water, and groundwater were lead and zinc. Soils were removed to an average concentration of 500 ppm total lead. The SF Regional Water Quality Control Board oversaw surface and groundwater monitoring at the site during closure. In late 1985, soils containing elevated levels of lead were removed from an adjacent Southern Pacific (SP) Railroad right-of-way containing greater than 1,000 ppm of lead at the surface were excavated to a depth of six inches and disposed as hazardous waste. The excavated area, the trench, and a drainage ditch in the SP right-of-way were backfilled with clean imported soil. The objective of the soil remediation program on the SP right-of-way was to eliminate contact between surface water runoff from the site and soils containing elevated lead concentrations. However, concentrations of lead remained in areas of the right-of-way as high as 3,950 ppm. Following completion of remedial activities at the adjacent SP right-of-way, DHS certified closure of the site.

Alternate Address: 270 EAST GRAND AVENUE
Alternate City,St,Zip: S SAN FRANCISCO, CA 94080
Background Info: This approximately 20-acre Site is currently Britannia Point Grand, a commercial park occupied by a number of biotechnology companies. Office buildings, parking areas, and landscaping are the essential features of the Site. The Site is bounded to the north by East Grand Avenue, to the south by railroad tracks, to the east by Littlefield Avenue, and to the west by Harbor Way and the rest of Britannia Point Grand. The Site was formerly the location of a processing plant for the recovery of tin and steel from scrap tinplate. The plant had been in existence from 1922 until operations ceased in 1982. Operations at the Site prior to 1922 are unknown. The plant operated under a succession of owners, the last of which was Tinmet Corporation (Tinmet), which purchased the plant and its owner, MRI Corporation. During plant operations, a two-acre evaporation pond existed on-site for the collection of plant effluent. Large piles of scrap steel generated in the detinning process were also stored on-site. NC Land Associates purchased the Site in 1987. Britannia Point Grand purchased the Site from NC Land Associates in 1997 and redeveloped it to its current commercial use.

Comments Date: 06011986
Comments: Certified site. In June of 1982, Tinmet submitted a closure
Comments Date: 06011986
Comments: plan to DHS. Closure was carried out from July 1982 through
Comments Date: 06011986
Comments: October 1985. Closure activities consisted of the removal of
Comments Date: 06011986
Comments: on-site commercial waste products, contaminated soils and
Comments Date: 06011986
Comments: sludges from various areas, shredder residue, two underground
Comments Date: 06011986

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 03/10/2016
Comments: DTSC staff conducted a site visit on February 11, 2016. The area of the site where contaminated soil is contained and which is subject to the restrictions of the Land Use Covenant was inspected. The perimeter of the building, surrounding walkways and asphalt parking lot east of the 681 Gateway building appeared to be in very good condition, with no visible signs of cracking or deterioration. DTSC

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 02/06/2018
Comments: DTSC personnel performed an annual site inspection on January 12, 2018 to verify compliance with the restrictions and requirements of the Land Use Covenant. A commercial building, adjacent walkways, an asphalt parking lot, and landscaping are currently located in the cap area and were observed to be in good condition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 01/10/2007
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 11/01/1983
Comments: Certified Site. An unspecified amount of contaminated soil was removed. Although this site has been certified, the Department routinely monitors it and has classified it as a site in Operation and Maintenance (O&M). This certification was confirmed by a report prepared by the Auditor General. The Auditor General conducted an audit of the Department's records to confirm a list of sites where the Department was involved in the cleanup and the cleanup had been completed. This Auditor General list became the basis for our historical certification information. Many of the sites on this list were handled by our Surveillance and Enforcement Staff. Much of this work was in response to complaints from the public or reports from industry and the response action may have only addressed the immediate problem and not the entire facility. Our records do not indicate the actual date this site was certified. Our records show 11/1983. We have used the date 11/01/1983 because this gives us the earliest statute of limitations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 10/07/2010
Comments: The capped area is currently the location of a commercial building, and adjacent walkways and asphalt parking lot located in a business park. Upon inspection by DTSC staff, the perimeter of the building, surrounding walkways and asphalt parking lot appeared to be in very good condition, with no visible signs of cracking or deterioration.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 02/27/2012
Comments: DTSC staff performed a Five-Year Review, which included a site visit on February 6, 2015. Based on the Five-Year Review, DTSC concluded that the selected remedial action remains protective of human health and the environment. Contaminated soil remains under a cap, which is in good shape and prevents human exposure.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 03/10/2016
Comments: DTSC staff conducted a site visit on February 11, 2016. The area of the site where contaminated soil is contained and which is subject to the restrictions of the Land Use Covenant was inspected. The perimeter of the building, surrounding walkways and asphalt parking lot east of the 681 Gateway building appeared to be in very good condition, with no visible signs of cracking or deterioration. DTSC concluded that the selected site remedial action remains protective of human health and the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 11/01/1983
Comments: Certified Site. An unspecified amount of contaminated soil was removed. Although this site has been certified, the Department routinely monitors it and has classified it as a site in Operation and Maintenance (O&M). This certification was confirmed by a report prepared by the Auditor General. The Auditor General conducted an audit of the Department's records to confirm a list of sites where the Department was involved in the cleanup and the cleanup had been completed. This Auditor General list became the basis for our historical certification information. Many of the sites on this list were handled by our Surveillance and Enforcement Staff. Much of this work was in response to complaints from the public or reports from industry and the response action may have only addressed the immediate problem and not the entire facility. Our records do not indicate the actual date this site was certified. Our records show

Reponsible Party: COST RECOVERY/OPERATION AND MAINTENANCE SITE
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: Homart Development Co. owns the property and has paid for all cleanup costs to date.
 Site Description: The property is composed of a number of subareas where different activities took place. Contaminated areas include heavy metal contaminated soil and slag areas, oil shed areas, oil tanks, acid sewage basin, acid sewage pond, and various railroad carunloading areas. The site is approximately 1000 feet from the San Francisco Bay.
 Hazardous Waste Desc: Contaminants include polychlorinated biphenyls (PCBs), lead (Pb) and acidic ground water. Most of the PCB and oil-contaminated soil has been removed. Soil contaminated with lead still remains.
 Threat To Public Health & Env: The major pathways of exposure are through migration of the acidic ground water to the San Francisco Bay and direct contact with metal-contaminated soil during excavation for site development.
 Site Activity Status: During 1981 and 1982, Homart investigated and mitigated PCB contaminated areas onsite. In 1984, Homart isolated and treated lead contaminated soil on one parcel of the property.

Completed Date: 08/09/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/05/2007
Comments: Realized project costs have gone over the estimated project cost. A letter was prepared by DTSC to explain the cost overrun.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/09/2007
Comments: Fieldwork completed. Confirmation sampling indicates the bioremediation technique has successfully degraded the total DDT concentrations at the Site to levels below the Site specific cleanup goal. However, it was unable to completely degrade the dieldrin concentrations at the Site. The dieldrin site cleanup goal has been revised to a 95% UCL of 125 parts per billion from 30 ppb. The new cleanup represents a risk of 5×10^{-6} .

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 12/22/2005
Comments: Community Survey and Profile completed. The area is mostly residential housing. There is a significant population of both Hispanic and Asian residents in the surrounding area, however outreach information was not required to be translated into any languages.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 12/22/2005
Comments: Public Participation Unit approved Fact Sheet for public distribution

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 02/10/2006
Comments: The recommended and approved removal action is the use of a bio-remediation technology that with the application of select soil amendments and Factor enhances the natural bio-attenuation rate of the soil. Factor is a soil amendment that increases the naturally occurring microorganisms ability to degrade chlorinated carbon chain chemicals of concern, such as the pesticides detected at the Mantegani Property Site. After the Factor and other necessary soil amendments are applied the soil, approximately two months will be required to achieve the cleanup goals of DDT and dieldrin in the soil. Confirmation samples will be collected to ensure cleanup levels are met. No excavation is required and the soil microorganism population will return to normal levels with the depletion of the Factor and other soil amendments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

| | Data Release Frequency: No Update Planned |

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

UTM Y (Meters): 4166942.5
Elevation: 25 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5641126 SAN FRANCISCO SOUTH, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 06081C0043E | FEMA FIRM Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| SAN FRANCISCO SOUTH | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|----------|----------|--------------------|----------------|--------------|---|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 5 inches | | Not reported | Not reported | Max: 0.01 Min: 0 | Max: Min: |

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

WELL SEARCH DISTANCE INFORMATION

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Alta Commitment for title Insurance

First American

Commitment

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-922721-HOU1

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACTIONAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

COMMITMENT CONDITIONS

1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- (a) the Notice;
- (b) the Commitment to Issue Policy;
- (c) the Commitment Conditions;
- (d) Schedule A;
- (e) Schedule B, Part I—Requirements;
- (f) Schedule B, Part II—Exceptions; and
- (g) a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I—Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company’s only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company’s agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company’s agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

First American

Schedule BI & BII

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-922721-HOU1

Commitment No.: NCS-922721-HOU1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- B. Pay the agreed amount for the estate or interest to be insured.
- C. Pay the premiums, fees, and charges for the Policy to the Company.
- D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- E. Releases(s) or Reconveyance(s) of Item(s): None
- F. Other: None
- G. You must give us the following information:
 - a. Any off record leases, surveys, etc.
 - b. Statement(s) of Identity, all parties.
 - c. Other: None

The following additional requirements, as indicated by "X", must be met:

- H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

Schedule BI & BII (Cont.)

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-922721-HOU1

Commitment No.: NCS-922721-HOU1

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.
2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
7. General and special taxes and assessments for the fiscal year 2018-2019, a lien not yet due or payable.
8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

9. Any rights, interests, or easements in favor of the public, which exist or are claimed to exist over any portion of said land covered by water.
10. Rights of parties in possession.

The Following Matters Affect Parcel One:

11. Covenants, conditions, restrictions and easements in the document recorded April 08, 1927 as Instrument No. 82573-A in [Book 307, Page 1](#) of Official Records, but deleting any covenant, condition or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, handicap, familial status, national origin, sexual orientation, marital status, ancestry, source of income or disability, to the extent such covenants, conditions or restrictions violate Title 42, Section 3604(c), of the United States Codes. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

The interest of Spring Valley Water Company in said Restrictions has passed to the City and County of San Francisco by Deed recorded March 03, 1930 in [Book 491 of Official Records, Page 1](#).

12. An easement for constructing, operating and maintaining a sewerage systems and incidental purposes, recorded November 10, 1954 as Instrument No. 921-M in [Book 2685, Page 207](#) of Official Records.

In Favor of: City of South San Francisco, a municipal corporation
Affects: the Southeasterly 5 feet of said land

13. An easement for street purposes and incidental purposes, recorded November 28, 1962 as Instrument No. 37393-V in [Book 4341, Page 537](#) of Official Records.

In Favor of: City of South San Francisco, a municipal corporation
Affects: As described therein

14. An easement for public utilities and incidental purposes, recorded August 15, 1986 as Instrument No. [86097927](#) of Official Records.

In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: a 10' wide strip over the Northeasterly portion of said land

15. An easement for sanitary sewer and incidental purposes, recorded September 24, 1986 as Instrument No. [86117797](#) of Official Records.

In Favor of: City of South San Francisco, a municipal corporation of the State of California
Affects: the Southeasterly portion of said land

16. An easement for storm drain and incidental purposes, recorded September 24, 1986 as Instrument No. [86117798](#) of Official Records.

In Favor of: City of South San Francisco, a municipal corporation of the State of California
Affects: the Southerly portion of said land

17. The terms, provisions and easement(s) contained in the document entitled "Grant of Easement and Cost-Sharing Agreement" recorded February 26, 1987 as Instrument No. [87028139](#) of Official Records.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

18. An easement for storm drain and incidental purposes, recorded June 04, 1987 as Instrument No. [87085544](#) of Official Records.
In Favor of: City of South San Francisco, a municipal corporation
Affects: the Southeasterly portion of said land
19. The fact that the land lies within the boundaries of the South San Francisco Downtown/Central Redevelopment Project Area, as disclosed by the document recorded July 13, 1989 as Instrument No. [89091486](#) of Official Records.

The Following Matters Affect Parcel Two:

20. An easement for sewer and water mains and electric power and distribution lines and pipes and wires for use in connection therewith, and to construct, operate and maintain thereon a spur track off the existing drill track and incidental purposes, recorded January 28, 1949 as Instrument No. 73944-H in [Book 1618, Page 356](#) of Official Records.
In Favor of: Stewart-Warner Corporation, a corporation
Affects: As described therein
21. A lease dated November 29, 1950, executed by R. K. Jacobsen and V. G. Jacobsen, husband and wife as lessor and Bucyrus-Erie Company, a Delaware corporation as lessee, recorded September 28, 1951 in [Book 2135, Page 552](#) of Official Records.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

22. An easement for storm drains and incidental purposes, recorded September 24, 1986 as Instrument No. [86117795](#) of Official Records.
In Favor of: City of South San Francisco
Affects: 10 feet wide strip over portion of said parcel

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site. There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive. FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2017 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

**ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR CLIENT**

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

PART I

1. Property address and Assessor's Parcel Number (APN):
Previously Provided
2. Current property owner (name, address, voice/fax number):
Previously Provided
3. Date current property owner assumed title of property:
Unknown
4. Current property development/improvements:
Unknown
5. Past property use, development/improvements:
Unknown
6. Neighboring property uses:
Unknown

PART II

1. Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law? Yes No

2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes No

3. Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes No

4. If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*? Yes No

5. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? Yes No N/A

6. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,
 - (a) do you know of specific chemicals that are present or once were present at the *property*? Yes No
 - (b) do you know of spills or other chemical releases that have taken place at the *property*?
 - (c) do you know of any environmental cleanups that have taken place at the *property*?

7. Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*? Yes No

If a "Yes" response was provided to any of the above questions, please provide details below:

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

Name (Printed/Typed): Kristen Gates

Signature: 

Date: 10/1/2018

SPECIALIZATIONS

- Environmental Assessments and Remediation
- Environmental Restoration
- Water Quality Studies
- Water Wells/Hydrogeology

Since joining ENGEO in 1985, Shawn has been managing groundwater supply evaluations, hydrogeologic studies, chemical assessments, Phase I and II Site Assessment projects, UST site investigations, risk based corrective action (RBCA), VOC remediation, and agricultural impact evaluations. He serves as Principal-in-Charge or Project Manager for environmental and hazardous materials projects involving groundwater hydrology, contaminant fate and transport, and remediation. He is Principal-in-Charge of the environmental components of our on-call contracts with the City of Sacramento and the County of Sacramento.

Select Project Experience

14234 Saratoga Sunnyvale Road—Saratoga, CA

Project Geologist. Shawn performed Principal review of ENGEO's environmental documents. This 2.2-acre townhome site is planned for a new multi-family development comprising up to 20 units in 8 buildings. The site immediately borders Saratoga Creek and contains numerous mature trees, many of which are to be saved. Site challenges include shallow groundwater, creek bank stability, and the potential for liquefaction and lateral spreading.

Lenihan Dam Outlet Modification—Los Gatos, CA

Principal Geologist. Shawn provided technical advice, coordination, consultation, and review of ENGEO's documents to provide quality mitigation measures. The findings were presented to SCVWD and it was concluded that the stockpile was sufficient for transportation. This analysis led to significant project budget savings by avoiding removal and disposal at a solid waste disposal facility. The project consisted of a stockpile approximately 6,000 cubic yards that required profiling as requested by Santa Clara Valley Water District before use of as site backfill.

199 River Oaks Parkway—San Jose, CA

Principal in Charge. Shawn provided principal oversight, data analysis, and consultation regarding site characterization, risk evaluation, and demolition observation plans. The project consists of a proposed six-story podium structure with one level to be constructed below grade. The property is a former semiconductor facility that has received conditional closure from the Regional Water Quality Control Board and is approved for construction.

Riverside Avenue Property—Roseville, CA

Principal in Charge. Shawn provided principal oversight of a Phase II Environmental Site Assessments and site

characterization. The project site consists of an active auto sales and service facility. The historic use of the facility for industrial purposes resulted in soil and groundwater impacts beneath the site. The City of Roseville revised its plans for acquiring and redeveloping the site due to the identified soil and groundwater impacts.

1301 Standard Oil Ave—Pittsburg, CA

Principal in Charge. Shawn provided principal oversight of a Phase II Environmental Site Characterization. The property is an abandoned wastewater treatment plant with processing buildings, clarifier tanks, and sludge beds.

Pleasant Hill BART Station—Walnut Creek, CA

Principal in Charge. Shawn provided oversight, data analysis and consultation during the preparation of a Phase II Environmental Site Assessment. The property is an existing BART station that encompasses 20 acres, including the platform/station area, electrical facilities, a parking garage and additional paved parking areas.

County Crossings Property—Antioch, CA

Principal in Charge. Shawn provided environmental consultation and data review with regard to soil and groundwater contamination. Constituents of concern include petroleum hydrocarbons, nitrates and manganese. The approximately 264-acre site includes several former industrial facilities and petroleum pipelines. Soil and groundwater at the site has been impacted with petroleum hydrocarbons, nitrates and manganese. Planned uses include commercial, residential, retail, and a BART-oriented transit village. The center, which is currently in the entitlement phase, is estimated to break ground in 2011.

620 North Ninth Street—San Jose, CA

Principal in Charge. Shawn provided oversight of soil, groundwater and soil gas characterizations, risk evaluations and Remedial Action Plan preparation. Shawn also closely interacted with RWQCB staff to achieve approval for residential development. The property is a former fruit packing plant and food preparation facility. The proposed development consists of a single-family residential subdivision.

Westshore—Richmond, CA

Project Manager. Shawn conducted Phase I and II Site Assessments, risk evaluations and prepared a soil management plan. The property was a former automotive manufacturing plant proposed for a multi-unit condominium development, including a 6-story podium structure to include five residential floors with 269 units and one parking floor.

Mills Ranch—King City, CA

Principal in Charge. Shawn provided principal oversight of Phase I/II Environmental Site Assessments and risk evaluations. The approximate 80-acre property is used for agricultural cultivation and commercial uses. The proposed mixed-use development includes over 400 single-family residential lots.

Select Foods Site/Cross Creek—Hayward, CA

Principal in Charge. Shawn provided principal oversight, consultation, and data analysis. The property was a former processed food facility, a drum recycling business, battery manufacturing operation and a bus assembly plant. Following completion of soil remediation under RWQCB oversight, the property was developed into a single-family residential subdivision.

Arroyo Crossing—Livermore, CA

Principal in Charge. Shawn provided oversight, data analysis and regulatory consultation while ENGEO provided geotechnical and environmental engineering services for this 34-acre site. This former corporation yard and quarry site was developed into a single-family residential subdivision.

Renaissance Square—Concord, CA

Project Manager. Shawn provided consultation, data analysis, and field observation. This former automotive dealership was redeveloped as a five-story multi-family residential structure supported on slab-on-grade foundations, with two levels of below-grade parking. Petroleum hydrocarbon-impacted soil was encountered during excavation of the parking structure, which required characterization and remediation. Soil impacts were attributed to former sumps, USTs and hydraulic lifts.

Union Pacific Railroad Corridor—San Jose, CA

Project Manager. Shawn prepared a Phase I and II Environmental Site Assessment. Work included a site reconnaissance, historical records research and recovery of soil samples with laboratory analysis. Lead impacted soil was identified which required risk evaluation. This former 1800 lineal foot section of the former Union Pacific Railroad Corridor was proposed for mixed-use development.

Former SFPP Alignment—Concord, CA

Project Manager. Shawn prepared a Phase I and II Environmental Site Assessment. The site was a former ±6,500-foot corridor formerly occupied by the Southern Pacific Railroad. Kinder Morgan petroleum pipelines existed within an easement along the property. The southern portion of the site was crossed by East Bay Municipal Utilities District water distribution lines and a multi-lane highway overpass. The corridor was developed as a self-storage facility. Work included the recovery of soil and groundwater samples along the SP right of way.

Hercules Property—Hercules, CA

Project Manager. Shawn provided oversight of a Phase I Environmental Site Assessment, site asbestos survey, site characterization, and demolition observation/contaminant assessment. The project area consists of ±167 acres located near and along the southeastern shore of San Pablo Bay in Hercules. The property was once a portion of a 1300-acre manufacturing facility that was operated by DuPont from 1879 to 1913 and Hercules Incorporated from 1913 to 1979. The planned development includes single/multi-family residential development with some commercial components.

Highlands Ranch—Antioch, CA

Principal in Charge. Shawn provided oversight, data analysis, and collaboration with RWQCB personnel. The project site consists of a 140-acre portion of the former Chevron Los Medanos Tank Farm located in Pittsburg, California. The site was historically occupied by 24 crude oil tanks and four wax ponds. Remediation of the crude oil tank and wax pond locations was conducted according to a remedial action plan (RAP) and oversight was provided by the CRWQCB. Remediation was performed over a period of four months and consisted of excavating approximately 110,000 cubic yards of impacted soil and placing the material in windrows for ex-situ bioremediation.

1 Introduction

This report analyzes the potential off-site noise impacts associated with the proposed project at 124 Airport Boulevard and 100 Produce Avenue in South San Francisco. The project consists of the demolition of six existing commercial buildings and the development of a new 7-story residential building at 124 Airport Boulevard (“Building 1”) and a new 7-story residential building at 100 Produce Avenue (“Building 2”). Both buildings feature 5 levels of apartment units over 2 levels of parking with a total combined 480 new dwelling units.

2 Fundamental Concepts of Environmental Noise

Noise can be defined as unwanted sound. It is commonly measured with an instrument called a sound level meter. The sound level meter captures the sound with a microphone and converts it into a number called a sound level. Sound levels are expressed in units of decibels.

To correlate the microphone signal to a level that corresponds to the way humans perceive noise, the A-weighting filter is used. A-weighting de-emphasizes low-frequency and very high-frequency sound in a manner similar to human hearing. The use of A-weighting is required by most local General Plans as well as federal and state noise regulations (e.g. Caltrans, EPA, OSHA and HUD). The abbreviation dBA is sometimes used when the A-weighted sound level is reported.

Because of the time-varying nature of environmental sound, there are many descriptors that are used to quantify the sound level. Although one individual descriptor alone does not fully describe a particular noise environment, taken together, they can more accurately represent the noise environment. The maximum instantaneous noise level (L_{max}) is often used to identify the loudness of a single event such as a car pass-by or airplane flyover.

To express the average noise level the L_{eq} (equivalent noise level) is used. The L_{eq} can be measured over any length of time but is typically reported for periods of 15 minutes to 1 hour. The background noise level (or residual noise level) is the sound level during the quietest moments. It is usually generated by steady sources such as distant freeway traffic. It can be quantified with a descriptor called the L_{90} which is the sound level exceeded 90 percent of the time.

There are other statistical descriptors that are used, often times as part of a local noise ordinance. These descriptors are used since local ordinances will have limits based on the number of minutes per hour that an intrusive sound may exceed a specified limit. For example, if a specified noise level cannot be exceeded more than 30 minutes in an hour that is referred to as the L_{50} . The L_{50} is also referred to as the median noise level.

To quantify the noise level over a 24-hour period, the Day/Night Average Sound Level (DNL or L_{dn}) or Community Noise Equivalent Level (CNEL) is used. These descriptors are averages like the L_{eq} except they include a 10 dB penalty during nighttime hours (and a 5 dB penalty during evening hours in the CNEL) to account for peoples increased sensitivity during these hours. The CNEL and DNL are typically within one decibel of each other.

In environmental noise, a change in noise level of 3 dB is considered a just noticeable difference. A 5 dB change is clearly noticeable, but not dramatic. A 10 dB change is perceived as a halving or doubling in loudness.

Examples of common noise sources and their corresponding noise levels are provided in the following table.

| Sound Source | Sound Pressure Level (dBA) |
|--|----------------------------|
| Air raid siren at 50 ft (threshold of pain) ⁽¹⁾ | 120 |
| Maximum levels in audience at rock concerts ⁽¹⁾ | 110 |
| Train horn at 100 ft ⁽³⁾ | 103 |
| On platform by passing subway train ⁽¹⁾ | 100 |
| On sidewalk by passing heavy truck or bus ⁽¹⁾ | 90 |
| Commuter train traveling at 79 mph at 100 ft ⁽³⁾ | 88 |
| On sidewalk by passing automobiles ⁽¹⁾ | 70 |
| Typical gas and electric powered leaf blower at 50 ft ⁽²⁾ | 68 - 71 |
| Conversational speech ⁽⁴⁾ | 60 |
| Typical urban area background/busy office ⁽¹⁾ | 60 |
| Typical suburban area background ⁽¹⁾ | 50 |
| Quiet suburban area at night ⁽¹⁾ | 40 |
| Typical rural area at night ⁽¹⁾ | 30 |
| Isolated broadcast studio ⁽¹⁾ | 20 |

⁴Everest, Fredrick Alton, and Ken C. Pohlmann. *Master Handbook of Acoustics*, 5th Ed. McGraw-Hill, 2009.

Vibration is an oscillatory motion which can be described in terms of the displacement, velocity, or acceleration. Because the motion is oscillatory, there is no net movement. Displacement is the easiest descriptor to understand. For a vibrating floor, the displacement is simply the distance that a point on the floor moves away from its static position. The velocity represents the instantaneous speed of the floor movement.

The peak particle velocity (PPV) is the descriptor used in monitoring of construction vibration since it is related to the stresses that are experienced by buildings. The table below shows the guideline criteria for building damage by Caltrans. The criteria are in terms of the peak particle velocity (PPV) expressed in inches per second.

Guideline Vibration Damage Potential Threshold Criteria (Caltrans Table 19¹)

| Structure and Condition | Maximum PPV (in/sec) | |
|--|----------------------|--|
| | Transient Sources | Continuous/Frequent Intermittent Sources |
| Extremely fragile historic buildings, ruins, ancient monuments | 0.12 | 0.08 |
| Fragile buildings | 0.2 | 0.1 |
| Historic and some old buildings | 0.5 | 0.25 |
| Older residential structures | 0.5 | 0.3 |
| New residential structures | 1.0 | 0.5 |
| Modern industrial/commercial buildings | 2.0 | 0.5 |

Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include impact pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment.

¹ Caltrans, *Transportation and Construction Vibration Guidance Manual*, September 2013.

3 Regulatory Framework

3.1 City of South San Francisco General Plan

The Noise Element of the South San Francisco General Plan has guidelines for noise and land use compatibility. These guidelines are summarized in Table 9.2-1.

Table 9.2-1: Land Use Criteria for Noise-Impacted Areas

| Land Use | CNEL Range | General Land Use Criteria |
|-------------|--------------|--|
| Residential | Less than 65 | Satisfactory; no special insulation requirements |
| | 65 to 70 | Development requires analysis of noise reduction requirements and insulation as needed |
| | Over 70 | Development should not be undertaken |
| Commercial | Less than 70 | Satisfactory; no special insulation requirements |
| | 70 to 80 | Development requires analysis of noise reduction requirements and noise insulation as needed |
| | Over 80 | Airport-related development only; special noise insulation should be provided |
| Industrial | Less than 75 | Satisfactory; no special insulation requirements |
| | 75 to 85 | Development requires analysis of noise reduction requirements and noise insulation as needed |
| | Over 85 | Airport-related development only; special noise insulation should be provided |
| Open | Less than 75 | Satisfactory; no special insulation requirements |
| | Over 75 | Avoid uses involving concentrations of people or animals |

Source: City of South San Francisco General Plan Noise Element, SFO Airport Land Use Plan

3.2 City of South San Francisco Municipal Code

Chapter 8.32 of the City’s Noise Ordinance specifies maximum permissible sound levels to be generated by any property within the City. The maximum allowable level is determined by the land use category of the receiving property. These levels are summarized in Table 8.32.030. The levels shown in Table 8.32.030 are applicable for noises that occur up to 30 minutes per hour. Higher noise levels are allowed, but for shorter periods of time. Higher noise levels are also allowed if the ambient noise level is higher than the standards in Table 8.32.030.

Table 8.32.030: Noise Level Standards

| Land Use Category | Time Period | Noise Level (dB) |
|---|----------------|------------------|
| R-E, R-1 and R-2 zones or any single-family or duplex residential in a specific plan district | 10 p.m.—7 a.m. | 50 |
| | 7 a.m.—10 p.m. | 60 |
| R-3 and D-C zones or any multiple-family residential or mixed residential/commercial in any specific plan district | 10 p.m.—7 a.m. | 55 |
| | 7 a.m.—10 p.m. | 60 |
| C-1, P-C, Gateway and Oyster Point Marina specific plan districts or any commercial use in any specific plan district | 10 p.m.—7 a.m. | 60 |
| | 7 a.m.—10 p.m. | 65 |
| M-1, P-1 | Anytime | 70 |

Section 8.32.050 (d) identifies a special provision which allows construction activities with a City permit between the hours of 8 a.m. to 8 p.m. on weekdays, 9 a.m. to 8 p.m. on Saturdays and 10 a.m. to 6 p.m. on Sundays and holidays. Other hours may be authorized by obtaining a permit, provided the construction meets at least one of the following requirements:

1. No individual piece of equipment shall produce a noise level exceeding 90 dB at a distance of 25 feet. If the device is housed within a structure or trailer on the property, the measurement shall be made outside the structure at a distance as close to 25 feet from the equipment as possible.
2. The noise level at any point outside of the property plane² of the project shall not exceed 90 dB.

3.3 Airport Land Use Compatibility Plan

The 2012 Comprehensive Airport Land Use Compatibility Plan for the Environs of San Francisco International Airport has guidelines for noise and land use compatibility. These guidelines are summarized in Table IV-1.

| Table IV-1 Noise/Land Use Compatibility Criteria | | | | |
|--|---|----------|----------|----------------|
| LAND USE | COMMUNITY NOISE EQUIVALENT LEVEL (CNEL) | | | |
| | BELOW 65 dB | 65-70 dB | 70-75 dB | 75 dB AND OVER |
| Residential | | | | |
| Residential, single family detached | Y | C | N (a) | N |
| Residential, multi-family and single family attached | Y | C | N (a) | N |
| Transient lodgings | Y | C | C | N |
| Public/Institutional | | | | |
| Public and Private Schools | Y | C | N | N |
| Hospitals and nursing homes | Y | C | N | N |
| Places of public assembly, including places of worship | Y | C | N | N |
| Auditoriums, and concert halls | Y | C | C | N |
| Libraries | Y | C | C | N |
| Outdoor music shells, amphitheaters | Y | N | N | N |
| Recreational | | | | |
| Outdoor sports arenas and spectator sports | Y | Y | Y | N |
| Nature exhibits and zoos | Y | Y | N | N |
| Amusements, parks, resorts and camps | Y | Y | Y | N |
| Golf courses, riding stables, and water recreation | Y | Y | Y | Y |
| Commercial | | | | |
| Offices, business and professional, general retail | Y | Y | Y | Y |
| Wholesale; retail building materials, hardware, farm equipment | Y | Y | Y | Y |
| Industrial and Production | | | | |
| Manufacturing | Y | Y | Y | Y |
| Utilities | Y | Y | Y | Y |
| Agriculture and forestry | Y | Y (b) | Y (c) | Y (c) |
| Mining and fishing, resource production and extraction | Y | Y | Y | Y |

Notes:

CNEL = Community Noise Equivalent Level, in A-weighted decibels.

Y (Yes) = Land use and related structures compatible without restrictions.

C (conditionally compatible) = Land use and related structures are permitted, provided that sound insulation is provided to reduce interior noise levels from exterior sources to CNEL 45 dB or lower and that an avigation easement is granted to the City and County of San Francisco as operator of SFO. See Policy NP-3.

N (No) = Land use and related structures are not compatible.

(a) Use is conditionally compatible only on an existing lot of record zoned only for residential use as of the effective date of the ALLUCP. Use must be sound-insulated to achieve an indoor noise level of CNEL 45 dB or less from exterior sources. The property owners shall grant an avigation easement to the City and County of San Francisco prior to issuance of a building permit for the proposed building or structure. If the proposed development is not built, then, upon notice by the local permitting authority, SFO shall record a notice of termination of the avigation easement.

(b) Residential buildings must be sound-insulated to achieve an indoor noise level of CNEL 45 dB or less from exterior sources.

(c) Accessory dwelling units are not compatible.

² According to the City's Municipal Code Section 8.32.020, property plane means vertical plane including the property line which determines the property boundaries in space.

3.4 CEQA Guidelines

In accordance with Section XI of Appendix G of the *CEQA Guidelines*, a proposed project could have a significant environmental impact if it would result in:

- a. *Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.*
- b. *Generation of excessive groundborne vibration or groundborne noise levels.*
- c. *For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.*

4 Existing Noise Environment

The project site is located to the west of Airport Boulevard and Produce Avenue and is bounded to the west and south by Colma Creek. The Caltrain rail line is adjacent to the north side of the project near Building 1. The existing railroad tracks would be as close as 58 feet from the proposed Building 1. US-101 is located approximately 450 feet east of the project site.

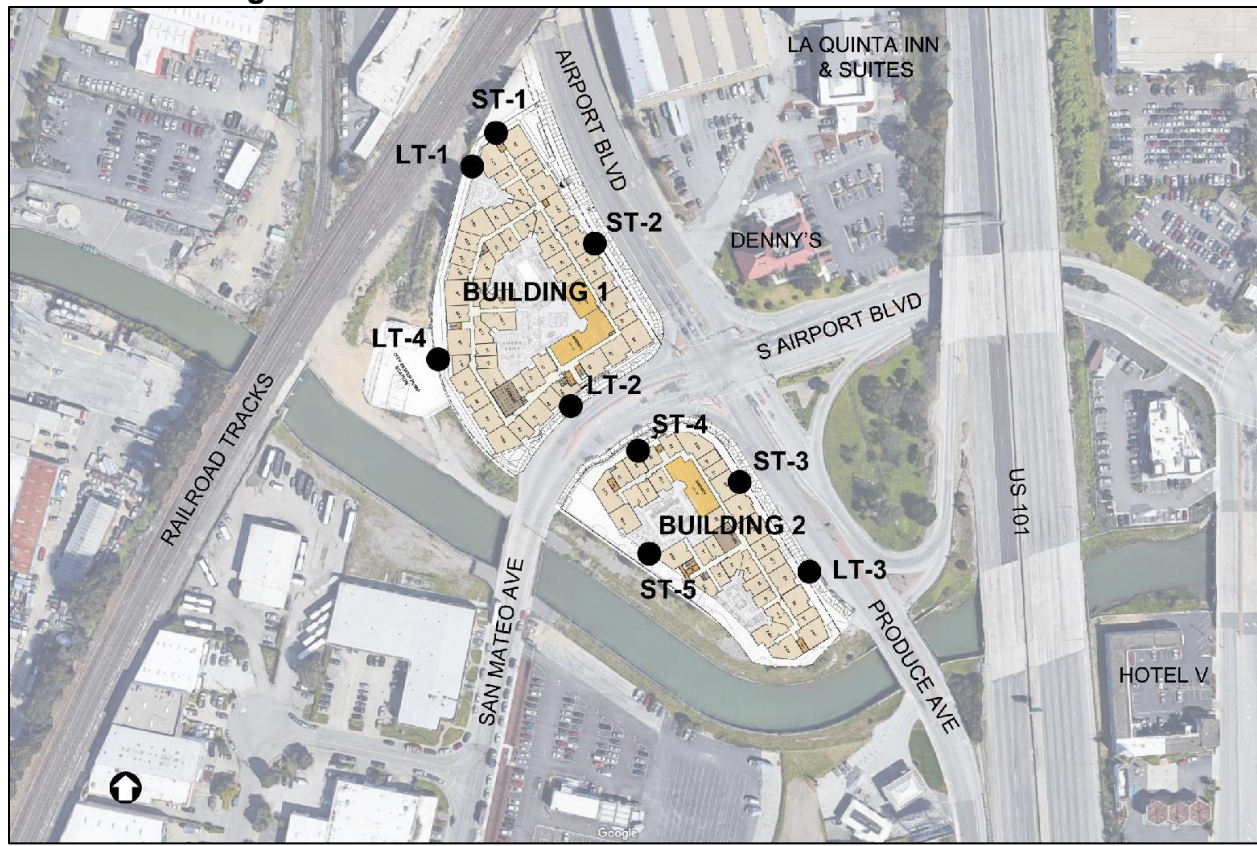

The major noise sources affecting the study area are railroad activities on the Caltrain rail line and vehicular traffic on US-101 and local roads. Other noise sources include aircraft and commercial/industrial activities.

The surrounding land uses are mostly limited to commercial and light industrial. Noise sensitive land uses are typically defined as residences, schools, place of worship, and hospitals. The nearest land uses are zoned "Business Commercial" and the nearest residential zones ("Downtown High-Density Residential Core") are located north of the railroad tracks, generally more than 500 feet from the project site. There are hotel buildings along the Airport Boulevard, Mitchell Avenue, and South Airport Boulevard located to the east of Airport Boulevard that are within 1,000 feet but generally more than 350 feet from the project site.

Noise measurements were conducted on June 9 -11, 2020 to quantify the existing noise environment. The measurements consisted of four on-site long-term, 48-hour, measurements (Location LT-1 to LT-4) and five short-term, 15-minute, measurements (Location ST-1 to ST-5). The noise measurement locations are shown in Figure 1.

Figure 1: Noise Measurement and Receiver Locations

Source: Map data © 2020 Google

The long-term measurement at Location LT-1 was made on a tree near the north edge of Building 1 site along the railroad tracks. The microphone was located approximately 12 feet above ground. At Location LT-1, noise from railroad operations generated maximum noise levels L_{max} of 76 to 95 dBA with a typical L_{max} of 86 to 88 dBA. The CNEL was 67 dBA, mostly due to noise from railroad operations.

The long-term measurement at Location LT-2 was made on a utility pole along San Mateo Avenue. The microphone was located approximately 12 feet above ground. At Location LT-2, traffic noise from San Mateo Avenue was the dominant noise source. The CNEL was 74 dBA.

The long-term measurement at Location LT-3 was made on a utility pole on the Building 2 site along Produce Avenue. The microphone was located approximately 12 feet above ground. At Location LT-3, traffic noise from Produce Avenue was the dominant noise source. The CNEL was 76 dBA.

The long-term measurement at Location LT-4 was made near the Building 1 west property line. This location is near the City sewer pump station just west of the site. The

microphone was located approximately 8 feet above ground. At Location LT-4, noise from railroad operations generated maximum instantaneous noise levels (L_{max}) typically ranging from 76 to 83 dBA. On June 10, 2020, noise from a train horn generated an L_{max} of 102 dBA. The CNEL was 65 dBA.

The five short-term noise measurements were made near the various proposed building setbacks, 5 feet above ground. At Location ST-1, noise from rail operations was the dominant noise source. At the other locations ST-2 to ST-5, the dominant noise source was roadway traffic.

The noise measurements were made with a Larson Davis Model 820 or 824 Sound Level Meter meeting Type 1 specifications (ANSI S1.4). Calibrations were checked with a Larson Davis Cal200 calibrator.

Coronavirus Pandemic

Based on our observations and experience with other projects, it appears that the coronavirus pandemic has affected traffic volumes on roadways in the Bay Area. To quantify any potential reduction in traffic volumes and noise levels due to the pandemic, we set up a long-term, noise monitor at the intersection of East Grand Avenue and the US-101 northbound off-ramp. The measurement lasted two days and was compared with the measured noise level in 2017 at the same location from a prior project. When comparing the 2020 and 2017 noise measurements, we are able to see that the current noise level (CNEL) is 1 dBA less than the 2017 CNEL. Based on this comparison, we are adding 1 dBA to the measured 2020 CNEL to represent the “existing” noise environment once traffic volumes return to normal.

The long-term noise measurement results are summarized in Table 1. Graphs showing the hourly noise levels at each monitoring location are shown in Figures 2 to 5.

Table 1: Long-term Noise Measurement Summary

| Location | CNEL, dBA | |
|----------|-----------|--|
| | Measured | Adjusted for Reduced Traffic due to Coronavirus Pandemic |
| LT-1 | 67 | 68 |
| LT-2 | 74 | 75 |
| LT-3 | 76 | 77 |
| LT-4 | 65 | 66 |

| ST-3 | Near setback of Building 2 from Produce Avenue | 2:09 PM – 2:25 PM | 71 | 70 | Traffic: 71 – 74 Med Trucks: 67, 73 – 77 Heavy Trucks: 72, 75, 77 Bus: 72 | 75 | 76 |
| ST-4 | Near setback of Building 2 from San Mateo Avenue | 2:34 PM – 2:49 PM | 69 | 66 | Traffic: 66 – 71 Med Trucks: 65 – 70, 77 Heavy Trucks: 66 – 75, 86 Jet: 73 | 72 | 73 |
| ST-5 | Southwest side of Building 2 near Colma Creek | 2:58 PM – 3:13 PM | 59 | 58 | Heavy Truck on San Mateo Avenue: 57, 65 Jet: 65 | 62 | 63 |

*CNEL calculated based on correlation between simultaneous long-term and short-term measurements.

** includes a 1 dBA factor to account for traffic volume reduction during coronavirus pandemic (see coronavirus section above).

Future Caltrain Operations

South San Francisco Caltrain Station Relocation

The project site is located approximately 0.5 miles from the current South San Francisco Caltrain station to the north. The South San Francisco Caltrain station is being relocated a few hundred feet south.

Caltrain Electrification

Caltrain is planning for the electrification of their rail line between San Francisco and San Jose. Although the trains will likely be quieter due to the electric propulsion, according to the Peninsula Corridor Electrification Project FEIR (Appendix C), the number of total daily trains will increase from 92 to 114 trains per day. This would include 23 additional trains during the daytime hours (7 AM to 10 PM) and one fewer train during the nighttime (10 PM to 7 AM). This change in number of trains corresponds to an increase in L_{dn} of less than 1 dBA.

5 Land Use Compatibility

Evaluation of land use compatibility for noise sources other than aircraft is not required in a CEQA study. However, based on the noise measurements, the project site is subjected to noise levels between CNEL of 63 to 76 dBA. The City of South San Francisco General Plan's land use noise criteria table (Table 9.2-1) shows that residential development exposed between CNEL 65 to 70 requires analysis of noise reduction requirements and residential development exposed to over CNEL 70 dBA should not be undertaken.

The City's General Plan Policy 9-I-6 requires new noise-sensitive development in areas subject to CNEL greater than 65 dBA to obtain the services of a professional acoustical engineer to provide a technical analysis and design of mitigation measures. The analysis should take into account noise from future traffic and future traffic rail operations including Caltrain electrification and the potential for High-Speed Rail.

6 CEQA Impact Assessment

6.1 Construction Noise (CEQA Checklist a)

6.1.1 Thresholds of Significance

The City’s Municipal Code promulgates criteria for construction noise based on hours of operation. Therefore, for the purposes of this assessment, construction noise is considered significant if it:

- Occurs outside the allowable hours of operation or exceeds the special provisions of Municipal Code Section 8.32.050 (individual equipment exceeds 90 dB at 25 feet and 90 dB at any point outside the property plane)
- Causes ambient noise levels to increase significantly at nearby noise sensitive receptors

6.1.2 Construction Noise Impact Assessment

Construction activities would last about 34 months and include the demolition of the existing buildings on the project site and the construction of the two new residential buildings. Table 3 shows the project’s construction phases with start and end dates, and the type of equipment used³.

Table 3: Construction Phases and Equipment

| Qty | Construction Phase and Equipment | Start Date | End Date | Hours/day | Total Work Days | Average Hours per day |
|-----------------------------|----------------------------------|-------------------|-------------------|-----------|-----------------|-----------------------|
| Demolition | | 11/12/2021 | 12/24/2021 | | 30 | |
| 2 | Concrete/Industrial Saws | | | 4 | 5 | 0.7 |

| Rollers | 62 | 62 |

Noise from construction activities may be noticeable at times at the nearby buildings. For example, the measured outdoor ambient L_{eq} along Airport Boulevard (Location ST-2) is 68 dBA while the calculated maximum noise levels from construction activities are generally about 10 dBA higher at the industrial building across Airport Boulevard when the equipment is near the project's east property line closest to the building.

The nearest hotels (Hotel V and La Quinta Inn & Suites) are approximately 380 feet from the project site boundary. Based on the distance between the hotel building and US-101, the exterior noise levels due to US-101 traffic is estimated to be greater than the measured noise levels (L_{eq} of 72 to 74 dBA during the day) at Location LT-3. Table 6 shows that the noise from project-related construction would generally be less than 66 dBA but occasionally up to 72 dBA outdoors. This is generally less than the noise levels generated by ambient noise sources (i.e. traffic) but may be noticeable at times.

Construction activities are allowed by the City's code during allowable construction hours provided that noise from individual equipment does not exceed 90 dBA at 25 feet and the noise at any point outside the property plane does not exceed 90 dBA. Table 4 shows that all the individual construction equipment would generate less than 90 dBA at a distance of 25 feet except for concrete saws.

Concrete/industrial saw is expected to be primarily used at distances of more than 50 feet from the property plane. The noise level from a concrete saw would not exceed the property plane noise limit of 90 dBA at a distance of 50 feet or more from the property plane. However, there may be times when these could be used close to the property line. The concrete saw would only be used for 5 days, four hours per day, during the demolition phase.

There is a potential that the concrete saw could exceed the noise ordinance limit when it is close to the property line. However, at the nearest hotels, construction noise would be less than the noise levels generated by intermittent ambient noise sources and is not expected to cause a significant increase in the ambient noise level. Additionally, most of the construction equipment are not expected to generate noise levels in excess of the noise ordinance limit.

This is a less than significant impact with Mitigation Measure NO-1 (“Construction Noise Minimization and Mitigation”).

Mitigation Measure NO-1: Construction Noise Minimization and Mitigation

In order to minimize the potential impact associated with construction, the following is recommended:

- All construction equipment shall be equipped with mufflers and sound control devices (e.g., intake silencers and noise shrouds) that are in good condition and appropriate for the equipment.
- Maintain all construction equipment to minimize noise emissions.
- Stationary equipment shall be located on the site to maintain the greatest possible distance to the existing office buildings, where feasible.
- Use temporary noise barriers around noisier equipment, where feasible, when the noise ordinance limits cannot be achieved.
- Unnecessary idling of internal combustion engines should be strictly prohibited.
- Provide advance notification to surrounding land uses disclosing the construction schedule, including the various types of activities that would be occurring throughout the duration of the construction period.
- The construction contractor shall provide the name and telephone number an on-site construction liaison. If construction noise is found to be intrusive to the community (complaints are received), the construction liaison shall investigate the source of the noise and require that reasonable measures be implemented to correct the problem.
- Schedule high noise-producing activities during times when they would be least likely to interfere with the noise sensitive activities of the neighboring land uses, when possible.

6.2 Construction Vibration (CEQA Checklist b)

6.2.1 Thresholds of Significance

Neither CEQA, City, nor the State specifies acceptable vibration levels from construction activities. For the purposes of this assessment, the guideline criteria for building damage recommended by Caltrans⁴ is used. The construction vibration damage criteria range from a Peak Particle Velocity (PPV) of 0.25 inches/sec for historic and some old buildings to 0.5 inches/sec for modern industrial/commercial buildings.

6.2.2 Construction Vibration Impact Assessment

The nearest neighboring building is a commercial building on South Linden Ave north of the Caltrain railroad tracks. At the closes point, the project site is approximately 108 feet from the commercial building. Table 7 shows the calculated construction vibration levels at the commercial building and the nearest industrial building. Other buildings are located across roadways or the Colma Creek at distances of more than 130 feet from the nearest project site boundary and would be exposed to less construction vibration levels.

Table 7: Calculated Vibration Levels from Construction

| Equipment | PPV (inches/sec) | |
|------------------|---|---|
| | Nearest commercial building north of railroad tracks (5 S Linden Ave) | Nearest industrial building east of Airport Blvd. (60 Airport Blvd) |
| | 108 feet from Equipment | 130 feet from Equipment |
| Vibratory Roller | 0.02 | 0.02 |
| Hoe Ram | 0.02 | 0.02 |
| Large Bulldozer | 0.01 | 0.01 |
| Caisson Drilling | 0.01 | 0.01 |
| Loaded Trucks | 0.01 | 0.01 |
| Jackhammer | 0.01 | 0.01 |
| Small Bulldozer | < 0.01 | < 0.01 |

Table 7 shows that construction vibration levels are expected to be less than the potential building damage thresholds of a PPV of 0.5 inches/sec for modern industrial/commercial buildings. Since vibration from construction would not exceed the threshold for potential building damage, this is considered less than significant.

⁴ Caltrans, *Transportation and Construction Vibration Guidance Manual*, September 2013.

6.3 Operational Noise (CEQA Checklist a)

6.3.1 Traffic Noise

6.3.1.1 Thresholds of Significance

Neither the CEQA checklist nor the City's General Plan specify a quantitative method for determining whether a project would cause a significant increase in noise. In general, an increase of 3 dBA is just noticeable, a change of 5 dBA is clearly noticeable and a change of 10 dBA is perceived as a doubling (or halving).

In October 2009, an EIR for the Gateway Business Park Master Plan promulgated impact thresholds based on these increases. Therefore, for the purposes of this impact assessment, the following increases in traffic noise, based on the Gateway Business Park Master Plan EIR are considered to be significant:

Project Impact:

- Increase of 5 dBA or greater if future noise level is within the normally acceptable range.
- Increase of 3 dBA or greater if future noise level is above the normally acceptable range.

Cumulative Impact:

In the future, traffic will typically increase due to a project and general growth that is not directly related to the project. For the purposes of this analysis, the project's contribution to future traffic noise is considered "cumulatively considerable" if the future increase in traffic noise due to the project is greater than 1 dBA as follows:

- Cumulative increase of 5 dBA or greater (future noise level is within the normally acceptable range) **AND** the project's contribution is greater than 1 dBA.
- Cumulative increase of 3 dBA or greater (future noise level is above the normally acceptable range) **AND** the project's contribution is greater than 1 dBA.

6.3.1.2 Traffic Noise Calculation Methodology

In order to calculate the increase in traffic noise due to the project, existing and future traffic noise levels were calculated using the Federal Highway Administration's Traffic Noise Model (TNM 2.5) with traffic volumes⁵ from Fehr & Peers. The TNM model takes into account the vehicle class, speed, road surface, and distance from roadway to receptor. The TNM model calculates an L_{eq} based on peak-hour traffic data at a distance of 50 feet from the roadway centerline. The CNEL at each of the modeling points was determined based on the difference between the peak-hour L_{eq} and CNEL measured at the long-term monitoring locations.

⁵ Fehr & Peers, *124 Airport / 100 Produce Administrative Draft Transportation Impact Analysis*, July 2020.

6.3.1.3 Project Generated Traffic Noise Impact

Tables 8, 9 and 10 show the existing and future traffic noise levels for the following development scenarios:

- Existing plus Project
- Existing plus Project with “Reconfiguration alternative 5”
- Existing plus Project with “Reconfiguration alternative 6”

Reconfiguration alternative 5 and alternative 6 are two conceptual design alternatives of the Produce Avenue/Utah Avenue interchange project which is not yet fully funded, nor has a design been selected yet.

Tables 8 to 10 show that the increase in traffic noise would be less than 3 dBA for all roadways in the study area under the existing plus project condition (with and without reconfiguration alternative 5 or 6).

For commercial and industrial uses, the increases in traffic noise levels due to the project are less than both the significant increase thresholds of 5 dBA if the future noise level is within the normally acceptable range and 3 dBA if the future noise level exceeds the normally acceptable range. Therefore, the increase in traffic noise due to the project is considered a less than significant impact.

Table 8: Increase in Traffic Noise Levels due to Project

| Roadway | CNEL at 50 feet, dBA | | |
|--------------------------------|----------------------|---------------------------|-------------------------|
| | Existing Volume | Existing + Project Volume | Increase due to Project |

| US-101 | | | |
| northbound on/off-ramp at Wondercolor Ln | 75.6 | 75.6 | < 0.1 |

6.3.1.4 Cumulative Traffic Noise Impact

In the future, traffic will increase due to general growth in the area that is not directly related to the project. Table 11 to 13 show the future traffic noise levels for the following scenarios evaluated in the traffic analysis:

- Cumulative plus Project
- Cumulative plus Project with “Reconfiguration alternative 5”
- Cumulative plus Project with “Reconfiguration alternative 6”

The future traffic volumes are for cumulative year 2040 scenario in the traffic study. Tables 11, 12 and 13 show that the increase in traffic noise from cumulative development would be less than 3 dBA for all roadways in the study area. Therefore, the project’s contribution to increases in cumulative traffic noise is less than significant.

Table 11: Cumulative Increase in Traffic Noise Levels due to Project

| Roadway | CNEL at 50 feet, dBA | | | | |
|--|----------------------|-------------------|-----------------------------|--|-------------------------------------|
| | Existing Volume | Cumulative Volume | Cumulative + Project Volume | Existing to Future with Project Increase in CNEL | Project Contribution to Future CNEL |

6.3.2 Mechanical Equipment (HVAC) (CEQA Checklist a)

6.3.2.1 Thresholds of Significance

Mechanical equipment noise that exceeds the limits set forth in Table 8.32.030 of the City's municipal code is considered a significant impact.

6.3.2.2 Mechanical Equipment Noise Impact Assessment

The proposed project buildings will have mechanical equipment generally associated with building ventilation. These will consist of rooftop air-conditioning units, and ventilation fans. There may also be other equipment such as emergency engine-generators. At the time of this report, the project buildings are proposed to have two kinds of heat pumps (Daikin and Goodman) on the roofs of Building 1 and Building 2 to serve the residential units. According to the applicant, 68% of the heat pumps will be Daikin and 32% will be Goodman⁷. Each of the buildings will include a dedicated outside air system (Samsung DOAS) for the corridors.

According to the City's municipal code, maximum permissible sound levels from the project are determined by the land use category of the receiving property. The permissible levels are in terms of L₅₀ and are shown in Municipal Code Table 8.32.030.

The City designates land to the east across Airport Boulevard and Produce Avenue as "freeway commercial" (FC) and land to the north of the project site and west of the project across Colma Creek as "mixed industrial" (MI). Therefore, the project must limit mechanical equipment noise such that noise does not exceed the noise level standards for receiving commercial and receiving industrial land uses. The standard noise level limits are an L₅₀ of 65 dBA during daytime (7 AM to 10 PM) and L₅₀ of 60 dBA at nighttime (10 PM to 7 AM) at the commercial land uses or an L₅₀ of 70 dBA at all times at the nearby industrial land uses. According to Municipal Code Section 8.32.030, if the measured ambient noise level for any area is higher than the standard noise level limits, then the standard noise level limits are adjusted upwards to the ambient noise level.

Based on calculations of mechanical noise utilizing the available equipment information, noise from the proposed heat pumps and dedicated outside air system on the project building rooftops would be an L₅₀ of 57 dBA or less at the property north of the railroad tracks, an L₅₀ of 59 dBA or less at the properties across Colma Creek, and an L₅₀ of 60 dBA or less at the properties across Airport Boulevard/Produce Avenue. Since mechanical equipment noise would be less than the standard noise ordinance limits, this is considered a less than significant impact. However, detailed analysis of noise from the project's final mechanical equipment system design should be conducted during the architectural design phase to confirm that the equipment will comply with the City's municipal code requirements.

⁷ Anderson, Zach, Hanover Company. "FW: 124 Airport Blvd – specs on outdoor mechanical equipment requested" Email to Nick Pappani, Raney Planning & Management, Inc. 30 July 2020.

6.4 Airport Noise (CEQA Checklist c)

6.4.1.1 *Thresholds of Significance*

A significant impact would occur if the project would expose people residing or working in the project area to excessive aircraft noise levels (aircraft CNEL of 65 dBA).

6.4.1.2 *Airport Noise Impact Assessment*

According to the 2012 Comprehensive Airport Land Use Compatibility Plan (ALUCP) for the Environs of San Francisco International Airport Exhibit IV-5, the project site is located outside the CNEL 65 dB aircraft noise contour and within "Airport Influence Area B". Per Policy IP-2, the project has real estate disclosure requirements regarding the potential for annoyances associated with proximity to airport operations (e.g. noise).

Per the ALUCP's Table IV-1, multi-family residential land uses are compatible with aircraft CNEL below 65 dBA, and may be permitted without any special requirements related to the attenuation of aircraft noise. Therefore, this is a less than significant impact.

1. Project Description

The transportation impact analysis (TIA) evaluates potential transportation impacts associated with the 124 Airport & 100 Produce development project ("Project"). The Project consists of two seven-story structures with approximately 480 apartment units on a 4.12 acres site in the City of South San Francisco. The Project is made up of two parcels. Parcel one, located at 124 Airport Boulevard, is approximately 2.56 acres. Parcel 2, located at 100 Produce Avenue, is approximately 1.56 acres. The City of South San Francisco General Plan currently designates both sites as Business Commercial.

The residential portion of 124 Airport Boulevard will include 294 apartment units and that of 100 Produce Avenue will include 186 apartment units. The Project includes 560 on-site parking spaces along with resident amenity space and bike parking. The FAR for building 1 is 2.81 and the FAR for building 2 is 2.92. The overall Project site is bound by Airport Boulevard/Produce Avenue to the east, Colma Creek to the south and west, and Caltrain railroad tracks to the north. Bicycle, pedestrian and motor vehicle site access is provided via the San Mateo Avenue and Produce Avenue frontages. The Project site is located approximately 0.5 miles from the current South San Francisco Caltrain station to the north and approximately one mile from the San Bruno BART station to the South. After the relocation of the South San Francisco Caltrain station is complete in Fall 2020, the Project site will be less than 0.5 miles from the station.

Currently, the Project site is located in the Business Commercial zoning district. In order to accommodate the proposed residential use, the Project site will need to be rezoned to be consistent with the proposed land use. The City's TDM ordinance does not currently apply to residential projects, and thus there is no required alternative mode share target specified. However, the Project has developed a Transportation Demand Management Plan (TDM Plan) in order to justify a parking supply that is lower than required by City code. The TDM Plan also serves to encourage non-auto trips and specifically seeks to reduce non-drive-alone vehicle trips.

- # Study Intersection

Figure 1-1
Project Location

2. Environmental Setting

This section describes the existing transportation and circulation setting in the vicinity of the Project site: the existing roadway network, transit network and service, pedestrian conditions, and bicycle conditions. A description of agencies with jurisdiction over transportation in South San Francisco and a summary of relevant plans and policies are provided in **Appendix B**.

2.1 Roadway Facilities

The Project is located near the intersection of San Mateo Avenue and Produce Avenue. Regional access to the site is provided via US-101 and Produce Avenue to the north, and US-101 and San Mateo Avenue to the south. Relevant roadway plans and policies (e.g. South San Francisco General Plan, South San Francisco Pedestrian Plan, South San Francisco Bicycle Plan) are discussed in **Appendix B**. **Figure 1-1** shows the Project location, study intersections, and the surrounding roadway system. Vehicular access to the Project site is provided via four, two-way driveways that intersect San Mateo Avenue, Airport Boulevard, and Produce Avenue. Study intersections are summarized in **Appendix C** and listed below:

1. Produce Avenue / San Mateo Avenue / Airport Boulevard
2. Airport Boulevard / Mitchell Avenue / Gateway Boulevard
3. US-101 Northbound Ramps / South Airport Boulevard / Wondercolor Lane

Key local roadways in the vicinity of the Project site are described below:

- *US-101* is an eight-lane freeway and principal north-south roadway connection between San Francisco, San Jose, and intermediate San Francisco Peninsula cities. In South San Francisco, US-101 is located approximately 500 feet east of the Project site and serves the Project area with three primary access points. Near the Project, US-101 carries about 220,000 vehicles per day and defines the East of 101 area's western edge and barrier to east-west bicycle and pedestrian connectivity. Access points include:
 - *South Airport Boulevard* – northbound on- and off-ramps are located at South Airport Boulevard/Wondercolor Lane. The South Airport Boulevard access point is to the south of the Project site.
 - *Produce Avenue/Airport Boulevard* – there are two southbound off-ramps near the Project site: one at Produce Avenue and another at Airport Boulevard and Miller Avenue. The off-ramp at Produce Ave is located to the south of the Project site and the off-ramp at Airport Boulevard and Miller Avenue is located to the north of the Project site.
- *Airport Boulevard* is a four- to six-lane north-south arterial running roughly parallel to US-101 in South San Francisco. Freeway ramps north of Grand Avenue provide alternate Project access from the north. Airport Boulevard also provides direct access to the Project site via one right-in/right-out only garage driveway located approximately 250 feet north of the intersection with San Mateo Avenue.

- *Produce Avenue* is a three-lane street providing access from the Project site to Southbound US 101. Produce Avenue also provides direct access to the Project site via one right-in/right-out only garage driveway located approximately 250 feet south of the intersection with San Mateo Avenue.
- *San Mateo Avenue* is a two-lane street connecting El Camino Real with Produce Avenue / Airport Boulevard, providing local access to the Project site. San Mateo Avenue also provides direct access to the Project site via two full access garage driveways located approximately 250 feet west of the intersection with Airport Boulevard/Produce Avenue.

2.2 Transit Facilities and Service

The Project site is served by regional rail and local bus transit services. The South San Francisco Caltrain station is currently located approximately 0.5 miles to the north of the Project site. By Fall 2020, Caltrain will relocate the station several hundred feet to the south with a direct pedestrian walkway connecting to Airport Boulevard, bringing it closer and more accessible to the Project site. The Caltrain Station is also served by local shuttles. SamTrans bus service runs along Airport Boulevard immediately adjacent to the Project site. The San Bruno BART station is located approximately one mile to the south of the Project site. Relevant transit plans and policies are discussed in **Appendix B**. The existing transit services are shown on **Figure 2-1** and described in detail below.

2.2.1 Regional Transit Service

The following transit services operate within South San Francisco and are accessible from the Project site with a bicycle or first- and last-mile shuttle connection provided by Commute.org:

Caltrain provides passenger rail service on the Peninsula between San Francisco and San Jose, and limited service trains to Morgan Hill and Gilroy during weekday commute periods. The South San Francisco Caltrain Station is currently located approximately 0.5 miles north of the Project at 590 Dubuque Avenue, on the east side of US-101, immediately north of East Grand Avenue. By the end of 2020, Caltrain plans to relocate the South San Francisco Caltrain Station several hundred feet to the south near the East Grand Avenue/Airport Boulevard intersection and provide more direct pedestrian access to the Project site via a portal with access at Grand Avenue and Airport Boulevard. After the relocation, the station will be approximately 0.4 miles north of the Project. The South San Francisco Caltrain Station serves local and limited trains, with 23 northbound and 23 southbound weekday trains. The South San Francisco Caltrain Station provides weekday service from 5:40 AM to 12:00 AM, with approximately 30-minute headways during peak times and 60-minute headways during off-peak times.

Bay Area Rapid Transit (BART) provides regional rail service between the East Bay, San Francisco, and San Mateo County, connecting between San Francisco International Airport and Millbrae Intermodal Station to the south, San Francisco to the north, and Oakland, Richmond, Pittsburgh/Bay Point, Dublin/Pleasanton and Fremont in the East Bay. The San Bruno Station is the closest station to the Project site, located about one mile to the south. BART trains operate on 15 minute headways during peak hours, and 20 minute headways during off-peak hours.

San Mateo County Transit District (SamTrans) provides bus service in San Mateo County. There are two bus stops adjacent to the Project site. One approximately 0.3 miles to the north near the intersection of Airport Boulevard and Baden Avenue and another approximately 0.3 miles to the southeast near the US101 NB Off-ramp at Wondercolor Lane. Both stops are served by Routes 292 and 397 (late night service only). Route 292 operates every 20 minutes on weekdays. Farther north, Routes 130 and 141 stop at the intersection of Miller Avenue/Linden Avenue. Route 130 operates every 15 minutes during weekdays, while Route 141 operates every 30 minutes.

2.2.2 Shuttle Service

Three *Peninsula Traffic Congestion Relief Alliance (Commute.org)* shuttles provide weekday service near the Project site. These shuttles (Oyster Point, Utah/Grand, and One Tower Place) offer commute period first/last mile connections between the Caltrain station and local employers in the East of 101 Area. Each shuttle operates at 30 to 40 minute headways during peak periods. After relocation of the South San Francisco Caltrain Station, shuttle connections will be provided on Poletti Way approximately 0.4 miles from the Project site.

The free South City Shuttle provides free local transit service in South San Francisco. The shuttle operates in a clockwise and counterclockwise loop every 40 minutes, with the nearest stops near the Miller Avenue/Linden Avenue intersection approximately 0.5 miles from the Project site.

2.3 Pedestrian Facilities

Pedestrian facilities include sidewalks, crosswalks, trails, and pedestrian signals. In the Project vicinity, continuous sidewalks exist along both sides of Airport Boulevard, South Airport Boulevard, and San Mateo Avenue. On Produce Avenue, continuous sidewalks exist only on the west side of the street.

At the intersection of Airport Boulevard and San Mateo Avenue, a signalized intersection immediately adjacent to the Project site, marked crosswalks and pedestrian signal heads are provided on all intersection legs. Sidewalks on South Airport Boulevard provide direct continuous pedestrian connectivity between the Project site and the nearest existing Commute.org shuttle stop. Sidewalks on Airport Boulevard provide continuous pedestrian connectivity between the Project site and the nearest SamTrans stop and the Caltrain Station. Future residents and visitors of the 124 Airport Boulevard site will have direct access to the Airport Boulevard sidewalks and only need to make one road crossing at the intersection of Airport Boulevard/Baden Avenue to access the future Caltrain pedestrian access point near Grand Avenue. In contrast, future residents and visitors of the 100 Produce Avenue site heading to Caltrain will have to make an additional crossing at the intersection of Airport Boulevard/San Mateo Avenue, including crossing two unsignalized high-speed slip right-turn lanes. The slip lanes at the northeast, northwest, and southwest corners of the intersection have wide vehicle turning radii, relatively high speeds, and yield control. All pedestrians coming from the Project site will have to travel through the Airport Boulevard railroad underpass tunnel to access the Caltrain station and downtown South San Francisco. The tunnel currently includes approximately six-foot wide sidewalks on both sides with limited pedestrian-scaled lighting. Relevant pedestrian plans and policies are discussed in **Appendix B**.

Figure 2-1
Existing Transit Service

2.4 Bicycle Facilities

Bicycle facilities consist of separated bikeways, bicycle lanes, routes, trails, and paths, as well as bike parking, bike lockers, and showers for cyclists. Caltrans recognizes four classifications of bicycle facilities:

- Class I – Shared-Use Pathway Provides a completely separated right-of-way for the exclusive use of cyclists and pedestrians with cross-flow minimized (e.g. off-street bicycle paths).
- Class II – Bicycle Lanes: Provides a striped lane for one-way travel on a street or highway. May include a “buffer” zone consisting of a striped portion of roadway between the bicycle lane and the nearest vehicle travel lane.
- Class III – Bicycle Route Provides for shared use with motor vehicle traffic; however, are often signed or include a striped bicycle lane.
- Class IV – Separated Bikeway: Provides a right-of-way designated exclusively for bicycle travel adjacent to a roadway and which are protected from vehicular traffic. Types of separation include, but are not limited to, grade separation, flexible posts, inflexible physical barriers, or on-street parking.

The area surrounding the Project site has a Class III bicycle network that provides first- and last-mile connectivity to the Caltrain Station to the north and residential uses to the west of Airport Boulevard. Current bicycle facilities in the Project vicinity, as designated by the South San Francisco Bicycle Master Plan (2011) and the draft Active South City Bicycle and Pedestrian Master Plan (ongoing), are shown in **Figure 2-2**, and discussed below.

- Airport Boulevard has proposed Class IV bicycle lanes between Miller Avenue and San Mateo Avenue; proposed bicycle lanes on Airport Boulevard will provide direct access to the Project site. Currently, Airport Boulevard is designated as a Class III bicycle route, providing shared use with motor vehicle traffic.
- San Mateo Avenue and South Airport Boulevard have proposed Class II bicycle lanes between Harbor Way and Tanforan Avenue; proposed bicycle lanes on San Mateo Avenue will provide direct access to the Project site.
- Gateway Boulevard has proposed Class II bicycle lanes between Oyster Point Boulevard and East Grand Avenue to connect to existing bicycle lanes on both roads; proposed bicycle lanes on Gateway Boulevard will provide direct access to the Project site. Currently, Class II bicycle lanes are provided on the segment between East Grand Avenue and South Airport Boulevard.
- The San Francisco Bay Trail (Bay Trail) is a Class I mixed-use trail along the Oyster Point shoreline and Point San Bruno, part of a planned 400 mile regional trail system encircling the San Francisco Bay shoreline. The nearest access point from the Project to the San Francisco Bay Trail is approximately one mile away, and is accessible via shared use bicycle routes.

Figure 2-2
Existing and Planned Bicycle Facilities

Bicyclists primarily access the Project site via San Mateo Avenue, Airport Boulevard, and South Airport Boulevard. Lack of continuous bicycle network and separation from higher speed vehicle traffic is a challenge to cycling in the area.

Additional relevant bicycle plans and policies are discussed in **Appendix B**.

2.5 Emergency Vehicle Access

Emergency vehicles typically use major streets through the study area when heading to and from an emergency and/or emergency facility. Arterial roadways allow emergency vehicles to travel at higher speeds and provide enough clearance space to permit other traffic to maneuver out of the path of the emergency vehicle and yield the right-of-way. The Project site is located approximately 0.6 miles west of South San Francisco Fire Station 62 which is located at 249 Harbor Way. Emergency vehicle access to the Project site is primarily from South Airport Boulevard and Mitchell Avenue. South Airport Boulevard has two travel lanes in each direction and Mitchell Avenue has one travel lane in each direction.

3. Transportation Analysis

This section includes analysis and findings of Project effects on transportation services and facilities, including motor vehicle travel and operations, transit service, pedestrian facilities and bicycle facilities. The amount and distance of motor vehicle travel was analyzed using vehicle miles traveled (VMT), while the motor vehicle operations analysis focused on weekday AM and PM peak hour queue conditions at freeway off-ramps. Other vehicle operations measures, such as level of service (LOS), are presented in **Appendix C** for informational purposes. Bicycle, pedestrian, and transit impacts were qualitatively assessed using transportation planning and engineering methods and practices.

3.1 Significance Criteria

The impacts of the Project related to transportation would be considered significant if any of the following Standards of Significance are exceeded, in accordance with Appendix G of the California Environmental Quality Act (CEQA) Guidelines:

- Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities;
- Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b) related to VMT;
- Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment); or
- Result in inadequate emergency access.

City of South San Francisco and City/County Association of Governments of San Mateo County (C/CAG) guidance was used to identify additional relevant thresholds of significance to determine whether implementation of the Project would result in significant environmental impacts and are described below.

The criteria of significance apply to all Project scenarios as measured against the corresponding No Project scenario.

3.1.1 Vehicle Miles Traveled (VMT)

On June 10th, 2020, the City of South San Francisco adopted the VMT thresholds of significance to guide in determining when a project will have a significant transportation impact in accordance with Senate Bill 743 (SB 743).

According to the VMT threshold guideline, projects located within 0.5 miles of a high-quality transit area are presumed to have a less than significant impact on VMT unless any of the following is true:

- Floor Area Ratio (FAR) < 0.75
- More parking than required by City code

- Inconsistent with the applicable Regional Transportation Plan / Sustainable Communities Strategy (RTP/SCS), as determined by the City
- Replacing affordable housing units with market-rate units

3.1.2 Freeway Ramp Queuing

While SB743 notes that “traffic congestion shall not be considered a significant impact on the environment” the freeway on- and off-ramp vehicle queuing criteria was retained to assess potential hazards from Project traffic exceeding ramp storage capacities. Traffic in queue represents congested, stop-and-go conditions, and should queues interfere with through, free-moving traffic streams on the freeway mainline, hazards could arise due to the differences in speed.

- A significant impact would occur if the Project causes vehicle queues approaching a given movement downstream of Caltrans freeway facilities to exceed existing storage space for that movement or would contribute to existing vehicle queues that exceed storage space for that movement, resulting in a hazardous condition.

3.1.3 Bicycle, Pedestrian, and Transit

- A significant impact would occur if Project traffic would produce a detrimental impact to existing bicycle or pedestrian facilities, or conflict with adopted plans and programs.
- A significant impact would occur if Project traffic would produce a detrimental impact to local transit or shuttle service or conflict with adopted plans and programs.

3.1.4 Hazards

- A significant impact would occur if the Project substantially increases hazards due to a geometric design feature.

3.1.5 Emergency Access

- A significant impact would occur if the project would result in inadequate emergency access.

3.2 Analysis Scenarios

The impacts of the Project to the surrounding transportation system were evaluated for the four scenarios listed below:

- Scenario 1: Existing conditions
- Scenario 2: Existing plus Project conditions (with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection)
- Scenario 3: Cumulative conditions (with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection)

- Scenario 4: Cumulative plus Project conditions (with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection)

A description of the methods used to estimate the amount of traffic and VMT generated by the Project is provided below. Project-specific impacts are described under Section 4. Intersection LOS analysis is provided for all scenarios for informational purposes only in **Appendix C**.

The proposed Produce Avenue/Utah Avenue interchange has the potential to alter vehicle trip patterns to/from the Project site as well as background vehicle trips. However, it is not yet fully funded, nor has a final design been selected yet. Cumulative intersection operations are provided both with and without interchange improvements. Any discussion and analysis of the interchange improvement project is provided for comparative and informational purposes only. The two Produce Avenue/Utah Avenue interchange project alternatives discussed are shown on **Figure 3-1**.

3.2.1 Existing Conditions

Existing conditions represent the baseline condition upon which project impacts are measured. The baseline condition represents conditions in 2019.

3.2.2 Existing Plus Project Conditions

Existing Plus Project conditions represent the baseline condition with the addition of the Project. Traffic volumes for Existing Plus Project conditions include existing traffic volumes plus traffic generated by the Project. Existing Plus Project conditions were compared to Existing conditions to determine potential immediate project impacts. Existing Plus Project conditions were also evaluated with the reconfiguration associated with two potential alternatives of the Produce Avenue/Utah Avenue interchange project for informational purposes only.

3.2.3 Cumulative Conditions

Cumulative conditions include transportation demand resulting from reasonably foreseeable land use changes and conditions associated with funded transportation projects at year 2040. Cumulative conditions are based on land use and transportation conditions included in Plan Bay Area 2040, as represented in the C/CAG-VTA Bi-County Transportation Demand Model (C/CAG model). The C/CAG model is a four-step trip-based travel demand model designed to forecast how land uses and transportation interact within San Mateo and Santa Clara Counties. Cumulative conditions were also evaluated with the reconfiguration associated with two potential alternatives of the Produce Avenue/Utah Avenue interchange project for informational purposes only.

3.2.4 Cumulative Plus Project Conditions

Cumulative Plus Project conditions represent the cumulative condition with the addition of the Project to determine the extent to which the Project would contribute to long-term cumulative transportation impacts. Cumulative Plus Project conditions were also evaluated with the reconfiguration associated with

two potential alternatives of the Produce Avenue/Utah Avenue interchange project for informational purposes only.

N:\Projects\2020_P\Projects\SF20-1088_PS-Business-Park-EIR\Graphics

Figure 3-1
Utah Interchange Improvements Alternative 5 and Alternative 6

3.3 Vehicle Miles Traveled

According to the VMT threshold guideline, projects located within 0.5 miles of a high-quality transit area are presumed less than significant VMT impacts unless any of the following is true:

- Floor Area Ratio (FAR) < 0.75
- More parking than required by City code
- Inconsistent with the applicable RTP/SCS, as determined by the City
- Replacing affordable housing units with market-rate units

The Project is located within 0.5 miles of both the existing and the proposed new South San Francisco Caltrain Station, as shown in **Figure 3-2**. The Caltrain station is a regional commuter rail station and is considered a major transit stop per OPR Guidance.

The FAR for Building 1 at the Project site is 2.81 and the FAR for Building 2 is 2.92. Thus, the total FAR is higher than the 0.75 threshold.

A total of 560 parking spaces are proposed to be provided with the Project, which is less than the 720¹ required by the City code, given the Project's unit types. The City of South San Francisco requires 1 parking space per studio unit, 1.5 parking spaces per one-bedroom unit, 1.8 parking spaces per two-bedroom unit, and 2 parking spaces per three-bedroom unit.

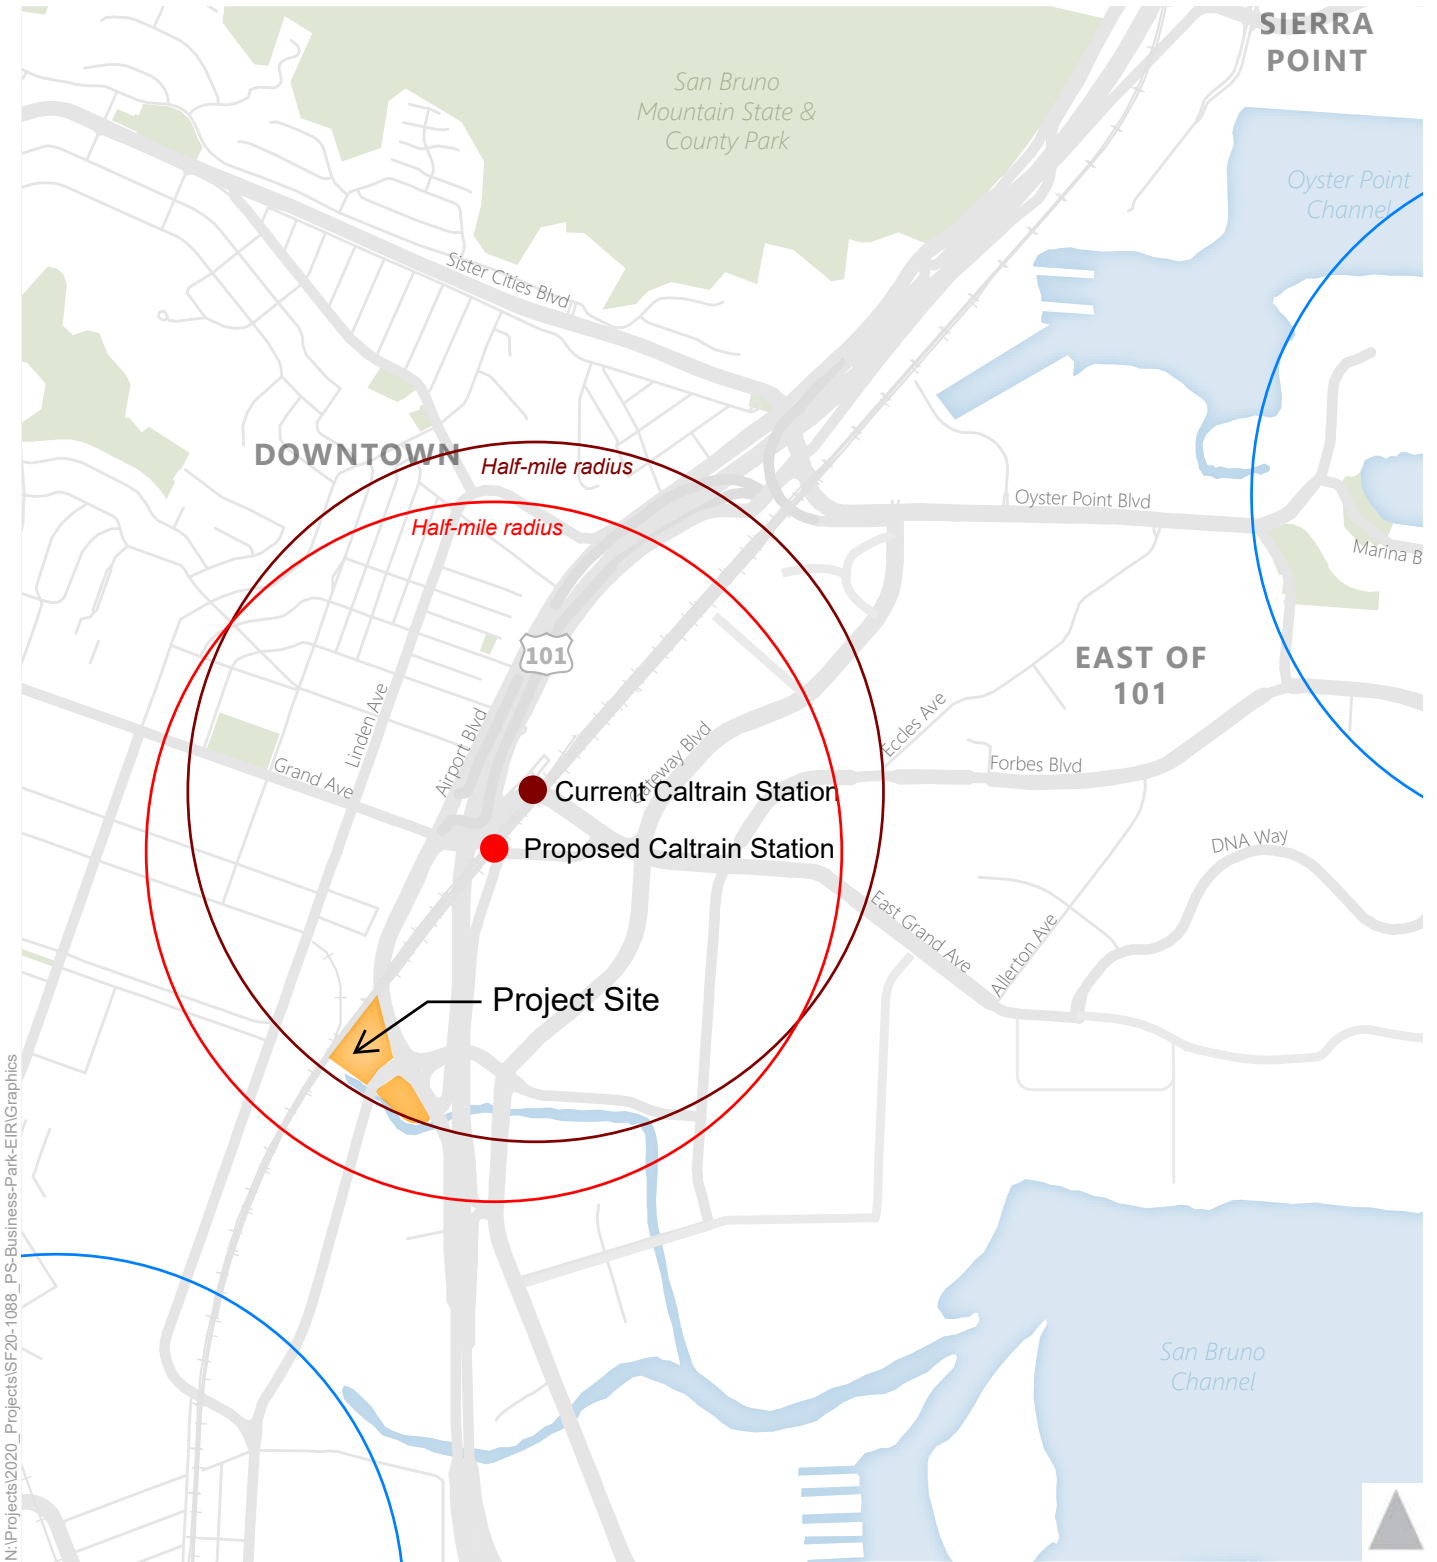

Plan Bay Area is the relevant Regional Transportation Plan / Sustainable Communities Strategy (RTP/SCS) for South San Francisco. Since the Project's proposed land use is consistent with the use and intensity that is included in *Plan Bay Area* and the Project falls within the projected land use totals for South San Francisco.

The Project is not proposing to replace affordable housing units with market-rate units.

Although the Project is presumed to have a less than significant impact on VMT based on its proximity to high-quality transit and meeting the above criteria, quantitative VMT analysis is also provided for informational purposes only. Project-generated home-based work (HBW), home-based other (HBO), and non-home based (NHB) vehicle trip lengths were obtained from the most recently available California Household Travel Survey (CHTS) for San Mateo County. Based on CHTS trip lengths by trip purpose, the weighted average trip length for the Project is approximately 7 miles. Multiplying the total net new daily trip generation as described in Section 3.4 by the average trip length, results is a daily net-added Project VMT of 7,931 miles.

¹ The Project proposes to include 98 studio units, 228 one-bedroom units, 140 two-bedroom units, and 14 three-bedroom units, resulting in a code requirement of 720 parking spaces.

Figure 3-2
Caltrain Half Mile Radius

3.4 Trip Generation, Distribution, and Assignment

The amount of traffic added to the roadway system by the Project was estimated using a three-step process: (1) trip generation, (2) trip distribution, and (3) trip assignment. The first step estimates the amount of traffic that would be generated once the Project was built and fully occupied. The second step estimates the direction of travel to and from the Project site. The third step assigns the Project trips to specific street segments and intersection turning movements. The results are described below.

3.4.1 Project Trip Generation

Project traffic added to the surrounding roadway system was estimated using a combination of existing driveway counts from existing office buildings and the locally sensitive trip generation methodology known as MXD+ for the Project. The MXD+ method accounts for built environment factors such as the density and diversity of land uses, design of the pedestrian and bicycle environment, demographics of the site, and distance to transit to develop more realistic trip generation estimates than traditional traffic engineering methods.

Driveway count data was collected at four driveways at the existing site, representing existing trips for the 80,680 square foot office buildings. The existing number of trips was then subtracted from the estimated project trips for the Project to get the net new trips for the Project. The sample site driveway traffic data is presented in **Appendix C**.

Vehicle trips from existing office buildings, the Project, and net new trips are shown in **Table 3.1**. According to this trip generation analysis, the Project would generate approximately 1,133 daily, 61 AM peak hour (-11 inbound and 71 outbound), and 87 PM peak hour (66 inbound and 21 outbound) net new trips.

Table 3.1 Project Trip Generation

| Land Use | Size | Daily | AM Peak Hour | | PM Peak Hour | | | |
|--|-------------|-------|--------------|-----|--------------|-----|-----|-------|
| | | Total | In | Out | Total | In | Out | Total |
| Project Site | 480 Units | 2,614 | 41 | 118 | 159 | 122 | 78 | 200 |
| Existing office building (existing trips to be removed) ¹ | 80,680 SqFt | 1,011 | 43 | 21 | 63 | 30 | 39 | 68 |
| Project Site (net new trips) | 480 Units | 1,133 | -11 | 71 | 61 | 66 | 21 | 87 |

Notes:

1. Trip Generation for existing office building based on 2020 driveway count data collected at the Project site.

3.4.2 Project Trip Distribution

The directions of approach and departure for the Project traffic were estimated based on the City/County Association of Governments of San Mateo County (C/CAG)'s Travel Demand Model and the City of South

San Francisco's Travel Demand Model, which has greater sensitivity to local travel patterns. **Figure 3-3** shows the general trip distribution pattern for the Project. 30 percent of the Project traffic is evenly split between the north (15%) and south (15%) US-101 approaches. Five percent and 30 percent of the Project traffic is projected to come from the east and west of US-101 to the north. Similarly, five percent and 20 percent of the Project traffic is projected to come from the east and west of US-101 to the South. In addition, 10 percent of the Project traffic is projected to come from Bayshore Boulevard to the north.

3.4.3 Project Trip Assignment

The Project trips were assigned to the roadway system based on the directions of approach and departure discussed above. The locations of complimentary land uses and local knowledge of the study area helped determine specific trip routes. **Figure 3-3** shows the expected increases in peak hour intersection turning movement volume due to the Project.

Project traffic would access the roadway network via driveways along the San Mateo Avenue, Airport Boulevard, and Produce Avenue frontages.

3.5 Freeway Ramp Queueing Analysis

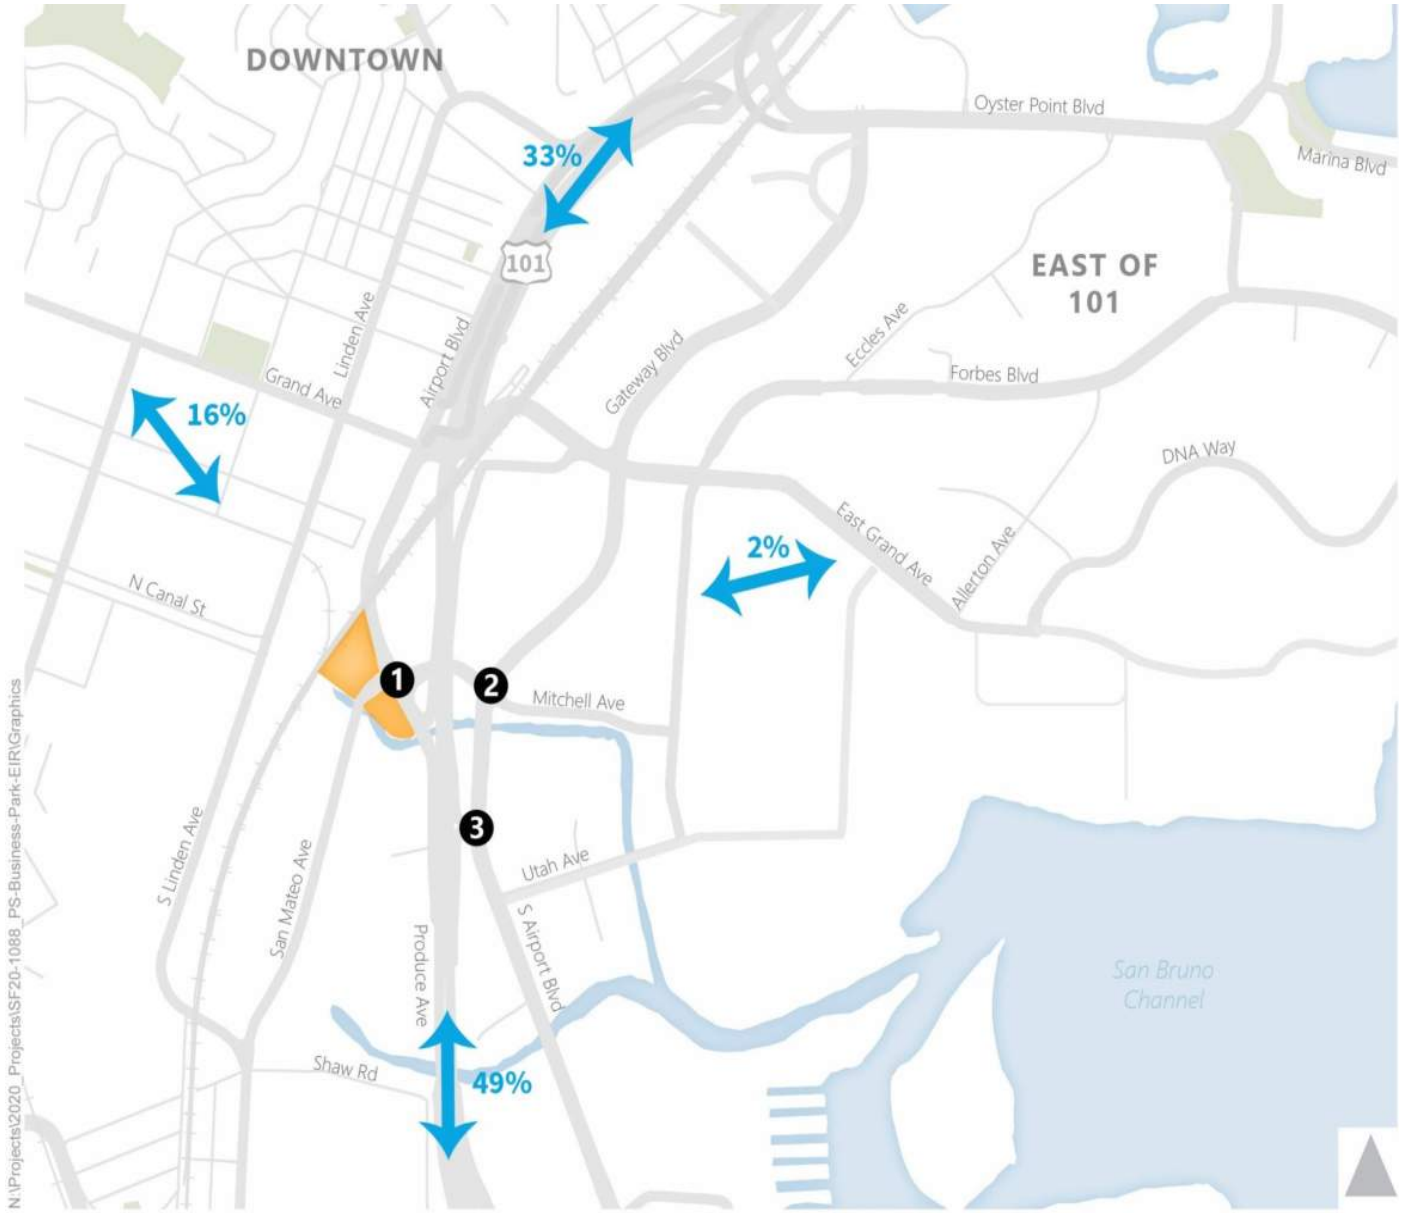

Two freeway off-ramps were selected for queueing analysis to assess conditions where the addition of Project trips may result in hazards to road users. The study locations are listed below.

1. US-101/Produce Avenue (southbound off-ramp)
2. US-101/South Airport Boulevard (northbound off-ramp)

Table 3.2 presents weekday PM peak hour vehicle queues at the two US-101 off-ramp study locations. The PM peak hour was selected as the analysis period since the Project is a residential project and the majority of project-added off-ramp trips will be in the PM. Therefore, the off-ramps queueing analysis during the PM peak hour is expected to encompass all potential impacts. The Project would not extend or contribute to queues longer than storage distances at both off-ramp locations. The Project therefore would not result in a hazardous condition at this location.

Cumulative Plus Project traffic volumes are presented in **Appendix C** and the volume relevant to the freeway ramp queueing assessment is presented in **Table 3.3**. The Project would not extend or contribute to queues longer than storage distances at both off-ramp locations. Cumulative Plus Project traffic therefore would not result in a hazardous condition at this location.

3.6 Bicycle, Pedestrian, and Transit

The project would generate new pedestrian and bicycle trips, particularly residents walking to downtown South San Francisco and the Caltrain station. These trips would occur via Airport Boulevard through existing slip right-turn lanes at the northwest and southwest corners of the Airport Boulevard/Produce Avenue/San Mateo Avenue intersection, which may exacerbate conflicts between vehicles, pedestrians, and bicyclists given the wide turning radii, relatively high speeds, yield-control, and lack of separation of bicycle movements. Increasing pedestrian and bicycle activity through the slip lanes at this intersection may present a hazardous condition.

The Project would not create inconsistencies with adopted bicycle or pedestrian system plans, guidelines, or policy standards, as described in **Appendix B**.

The Project includes 240 long-term protected (class I) bicycle parking spaces, which exceeds the City's code requirement for the Project of 121 spaces. Class I bicycle parking spaces are typically lockers or restricted access parking rooms and are intended for employees.

The Project would generate vehicle trips in the vicinity of existing transit services and would generate some new transit trips to existing routes. SamTrans bus routes travel along the Project's frontage on Airport Boulevard and Caltrain operates less than 0.5 miles from the Project site. The addition of 87 net new vehicle trips during the PM peak hour, or approximately one to two new vehicles per minute, would not create a disruption to transit service surrounding the Project site. Project-added vehicle trips represent approximately one percent of entering volumes at study intersections during the AM and PM peak hours. The Project may add net new transit trips to Caltrain and other public transit routes, but ridership may be accommodated through available capacity. The Project would not include features that would disrupt existing or planned transit routes or facilities. The Project's driveways would not cause disruptions to existing or planned transit service or transit stops. The Project would not conflict with any adopted transit system plans, guidelines, policies, or standards, as described in **Appendix B**.

The Project's effects under cumulative 2040 conditions would be similar to that of existing conditions. Improvements to Caltrain via the Peninsula Corridor Electrification and the South San Francisco Station Improvement projects would provide enhanced connectivity and capacity to accommodate project trips. There are no fully funded changes to bicycle, pedestrian, or transit conditions adjacent to the Project site.

4. Impacts and Mitigations

This section includes the evaluation of the Project's potential impacts under Existing Plus Project and Cumulative Plus Project conditions. This section also describes the associated mitigation measures required by the Project.

4.1 Vehicular Traffic

This section includes the evaluation of the Project's potential VMT and freeway ramp queuing impacts.

4.1.1 Vehicle Miles Traveled

Impact TRANS-1: Based on OPR and City of South San Francisco guidelines, the Project is located within 0.5 miles of a major transit stop and is presumed to have no impact on vehicle miles traveled (VMT) under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant*)

As documented in Section 3.3, the Project meets all of the screening criteria to presume the impact to VMT is less than significant. The Project site is located within 0.5 miles of a major transit stop, has a FAR greater than 0.75, does not provide more parking than required by the City code, is consistent with the RTP/SCS Plan Bay Area, and does not replace affordable housing units with market-rate units.

Additionally, the Project has prepared a TDM plan, as required by the City. The TDM Plan serves to encourage non-auto trips and specifically seeks to reduce non-drive-alone vehicle trips which will help to further reduce the Project's impact on VMT.

Mitigation Measures: None Required

4.1.2 Freeway Ramp Queuing

Impact TRANS-2: Development of the Project would not cause vehicle queues approaching a given movement downstream of Caltrans freeway facilities to exceed existing storage space for that movement or add vehicle trips to existing freeway off-ramp vehicle queues that exceed storage capacity resulting in a potentially hazardous condition under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant*)

As documented in Section 3.5, Project vehicle trips that could affect with the freeway mainline are concentrated at the US-101 Southbound off-ramp at Produce Avenue and the US-101 Northbound off-ramp at South Airport Boulevard, but Project trips would not exceed ramp storage capacities and interfere with the freeway mainline. Therefore, the Project would have a less-than-significant impact on freeway ramp queuing under Existing Plus Project conditions and would not be a cumulatively considerable contributor to significant cumulative impacts under Cumulative Plus Project conditions.

Mitigation Measures: None required

4.2 Bicycle, Pedestrian, and Transit

Impact TRANS-3: Development of the Project would not conflict with adopted plans and programs under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant*)

The Project would not produce a detrimental impact to existing bicycle or pedestrian facilities or conflict with adopted policies in adopted city plans summarized in **Appendix B**. Therefore, the Project's impacts to walking and biking are less-than-significant under Existing Plus Project conditions and the Project would not be a cumulatively considerable contributor to significant cumulative impacts under Cumulative Plus Project conditions.

Implementation of Improvement Measure TRANS-1 would improve pedestrian and bicycle access to the project site and would be consistent with relevant City plans and policies.

Mitigation Measures: None required

The Project does not conflict with any adopted plans or programs and no mitigation measure is required. However, the following improvement measure supports and enhances the accessibility of the Project site. Components of Improvement Measure TRANS-1 are shown in **Figure 4-1**.

IMPROVEMENT MEASURE TRANS-1 The applicant may provide funding toward the City's design and construction of the following off-site improvements to support the connectivity of the Project site, improve accessibility to high-quality transit, and enhance the Project's first- and last-mile TDM strategies necessary to support auto trip reduction measures.

- The Project may contribute towards the installation of pedestrian-scale lighting along both sidewalks of the Airport Boulevard undercrossing directly to the north of the Project site. This improvement would provide a safer and more supportive pedestrian route connecting the Project site and the Caltrain Station and downtown South San Francisco.
- The Project may contribute towards the construction of new Class IV bicycle lanes on Airport Boulevard between Miller Avenue and San Mateo Avenue. This improvement would include striping new bicycle lanes. New protected bicycle lanes would support enhanced bicycle access to and from the Project site, as identified in the draft Active South City Bicycle and Pedestrian Master Plan.

Impact TRANS-4: Project development or Project traffic would not produce a detrimental impact to local transit or shuttle service under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant*)

The Project would not produce a detrimental impact to existing transit facilities or conflict with adopted policies in adopted city plans summarized in **Appendix B**. Therefore, the Project's impacts to transit are

less-than-significant under Existing Plus Project conditions and the Project would not be a cumulatively considerable contributor to significant cumulative impacts under Cumulative Plus Project conditions.

Implementation of Improvement Measure TRANS-1 would improve access between the Project site and existing/future transit stops and would be consistent with relevant City plans and policies.

Mitigation Measures: None required

4.3 Hazards

Impact TRANS-5: Development of the Project may substantially increase hazards due to a geometric design feature under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant with Mitigation*)

The Project design does not create any new geometric design features that cause hazards. The Project provides two right-in right-out only driveways off Airport Boulevard and two full-access driveways off San Mateo Avenue. The driveways on Airport Boulevard do not change the existing roadway geometry, while the San Mateo Avenue driveways include short (approximately 50 feet) left-turn pockets. Sight distance at the proposed driveways is not expected to change from what is available under existing conditions and is expected to be adequate for drivers exiting the project site and for pedestrians crossing the driveways. Any future vegetation located within the sight triangles at driveways should be maintained so as not to restrict drivers sight distance when exiting the driveways.

The Project may worsen an existing hazard by generating new person trips that use the existing slip lanes at the Airport Boulevard/Produce Avenue/San Mateo Avenue intersection, which may exacerbate conflicts between vehicles, pedestrians, and bicyclists given the wide turning radii, relatively high speeds, yield-control, and lack of separation of bicycle movements. Therefore, the Project would have a significant impact on hazards under Existing Plus Project conditions and Cumulative Plus Project conditions.

Mitigation Measures: The following mitigation measure seeks to reduce the hazard at the Airport Boulevard/Produce Avenue/San Mateo Avenue intersection for pedestrians, bicyclists, and motorists. Components of Mitigation Measure TRANS-1 are shown in **Figure 4-1**.

MITIGATION MEASURE TRANS-1 The applicant shall design and construct the following off-site improvement to the satisfaction of the City to reduce hazards to Project-generated person trips.

- The Project shall remove the northwestern and southwestern slip lanes at the intersection of Airport Boulevard/San Mateo Avenue/Produce Avenue, as identified in the design concepts by the City of South San Francisco shown in **Figure 3-1**. This mitigation would replace these slip lanes with tighter curb radii, add directional curb ramps, stripe high-visibility continental crosswalks, and stripe southbound and eastbound bicycle lane approaches at the intersection. Removing slip lanes would help slow right-turning vehicles, providing a safer experience for bicycles and pedestrians. Enhanced crosswalks will also provide shorter crossing distances for pedestrians, reducing their

exposure to vehicle traffic. The Project shall review existing intersection signal timing and adjust if necessary, to accommodate the new pedestrian crossing times.

Significance after mitigation: Implementation of Mitigation Measure TRANS-1 would reduce the Project's impacts to hazards to less-than-significant under Existing Plus Project conditions and less than cumulatively considerable under Cumulative Plus Project conditions.

4.4 Emergency Access

Impact TRANS-6: Development of the Project would not result in inadequate emergency access under Existing Plus Project and Cumulative Plus Project conditions. (*Less than Significant*)

Vehicle trips generated by the Project would represent a very small percentage of overall daily and peak hour traffic on roadways and freeways in the study area. The Project generates 61 AM peak hour and 87 PM peak hour net new vehicle trips which are distributed to study intersections. Project-added vehicle trips represent approximately one percent of entering volumes at study intersections during the peak hours. The Project does not include features that would alter emergency vehicle access routes or roadway facilities; fire and police vehicles would continue to have access to all facilities around the entire city. Upon construction, emergency vehicles would have full access to the Project site. Therefore, the Project is expected not to result in inadequate emergency access, and the Project's impacts to emergency access are less-than-significant under Existing Plus Project conditions and less than cumulatively considerable under Cumulative Plus Project conditions.

Mitigation Measures: None required

N:\Projects\2020_Projects\SF20-1088_PS-Business-Park-EIR\Graphics

- Project Site
- Improvement Areas

- 1** Improvement: Contribute towards constructing pedestrian lighting along sidewalks in Airport Boulevard tunnel under railroad tracks
- 2** Mitigation: Remove northwest and southwest right-turn slip lanes at Airport Boulevard/San Mateo Avenue/Produce Avenue intersection and reconstruct curbs and crossings
- 3** Improvement: Contribute towards constructing new Class IV bicycle lanes on Airport Boulevard between San Mateo Avenue and Miller Avenue

Figure 4-1
Project Mitigation and Improvement Measures

Appendix A: VMT Technical Context

Senate Bill 743 (Stats. 2013, ch. 386) (SB 743) is intended to better align CEQA transportation impact analysis practices and mitigation outcomes with the State's goals to reduce greenhouse gas (GHG) emissions, encourage infill development, and improve public health through more active transportation. The law creates several key statewide changes to the California Environmental Quality Act (CEQA).

First, the law requires the Governor's Office of Planning and Research (OPR) to establish new metrics for determining the significance of transportation impacts of projects within transit priority areas (TPAs) and allows OPR to extend use of the metrics beyond TPAs. OPR selected vehicle miles of travel (VMT) as the preferred transportation impact metric and applied their discretion to require its use statewide.

Second, this legislation establishes that aesthetic and parking impacts of a residential, mixed-use residential, or employment center projects on an infill site within a TPA shall not be considered significant impacts on the environment.

Third, the new CEQA Guidelines that implement this legislation state that generally, vehicle miles traveled is the most appropriate measure of transportation impacts, and that as of July 1, 2020, this requirement shall apply statewide, but that until that date, lead agencies may elect to rely on VMT rather than LOS to analyze transportation impacts.

Finally, the law establishes a new CEQA exemption for a residential, mixed-use, and employment center project a) within a transit priority area, b) consistent with a specific plan for which an EIR has been certified, and c) consistent with a Sustainable Communities Strategy (SCS). This exemption requires further review if the project or circumstances changes significantly.

To aid in SB 743 implementation, the following state guidance has been produced:

- *Technical Advisory on Evaluating Transportation Impacts in CEQA*, California Governor's Office of Planning and Research, December 2018¹
- *California Air Resources Board (CARB) 2017 Scoping Plan-Identified VMT Reductions and Relationship to State Climate Goals*, California Air Resources Board, January 2019²
- *Local Development – Intergovernmental Review Program Interim Guidance, Implementing Caltrans Strategic Management Plan 2015-2020 Consistent with SB 743*, Caltrans, November 9, 2016³

The California Air Resources Board 2017 *Scoping Plan-Identified VMT Reductions and Relationship to State Climate Goals* provides recommendations for VMT reduction thresholds that would be necessary to achieve the State's GHG reduction goals. CARB finds per-capita light-duty vehicle travel would need to be

¹ http://opr.ca.gov/docs/20190122-743_Technical_Advisory.pdf

² https://ww2.arb.ca.gov/sites/default/files/2019-01/2017_sp_vmt_reductions_jan19.pdf

³ <https://dot.ca.gov/programs/transportation-planning/office-of-smart-mobility-climate-change/sb-743>

approximately 16.8 percent lower than existing by 2050, and overall per-capita vehicle travel would need to be approximately 14.3 percent lower than existing levels by 2050 under that scenario. CARB also acknowledges that the SCS targets are not sufficient to meet climate goals. As stated in the report, "...the full reduction needed to meet our climate goals is an approximately 25 percent reduction in statewide per capita on-road light-duty transportation-related GHG emissions by 2035 relative to 2005."

OPR considered this research when developing recommended VMT thresholds. In the *Technical Advisory on Evaluating Transportation Impacts in CEQA* (December 2018), OPR recommends that a per capita or per employee VMT that is 15 percent below that of existing development may be a reasonable threshold. This threshold is based on the above mentioned research documents from CARB as well as evidence that suggests a 15 percent reduction in VMT is achievable at the project level in a variety of place types⁴ and would help the State towards achieving its climate goals. However, each jurisdiction must apply the statewide VMT analysis guidance based on available travel data and tools.

Appendix B: Relevant Plans & Policies

Agencies with Jurisdiction over Transportation in South San Francisco

The City of South San Francisco has jurisdiction over all local City streets and City-operated traffic signals within the study area. Several regional agencies, including the City/County Association of Governments of San Mateo County (C/CAG), the Congestion Management Agency in San Mateo County, and the Metropolitan Transportation Commission (MTC), coordinate and establish funding priorities for regional transportation improvement programs. Freeways serving South San Francisco (U.S. 101, I-380, and I-280), associated local freeway ramps, and local surface highway segments (SR-82) are under the jurisdiction of the State of California Department of Transportation (Caltrans). Transit service providers such as BART, Caltrain, SamTrans, and the Water Emergency Transportation Authority (ferry service), have jurisdiction over their respective services. These agencies, their responsibilities, and funding sources are more specifically described below.

City of South San Francisco

The City of South San Francisco is responsible for planning, constructing, and maintaining local public-serving transportation facilities, including all City streets, City-operated traffic signals, sidewalks, and bicycle facilities. These local services are funded primarily by gas-tax revenue and land development Impact Fees.

San Mateo City/County Association of Governments (C/CAG)

C/CAG is the Congestion Management Agency (CMA) for San Mateo County authorized to set State and federal funding priorities for improvements affecting the San Mateo County Congestion Management Program (CMP) roadway system. The C/CAG-designated CMP roadway system in South San Francisco include SR 82 (El Camino Real), U.S. 101, I-380, and I-280. C/CAG has set the level of service standards for U.S. 101 segments in the vicinity of the Project site.

C/CAG has adopted guidelines to reduce the number of net new vehicle trips generated by new land development. These guidelines apply to all developments that generate 100 or more net new peak-hour vehicular trips on the CMP network and are subject to CEQA review. The goal of the guidelines is that the developer and/or tenants will reduce the demand for all new peak hour trips (including the first 100 trips) projected to be generated by the development.

Peninsula Traffic Congestion Relief Alliance (Commute.org)

The Alliance is a joint powers authority dedicated to implementing transportation demand management programs in San Mateo County and providing alternatives to single-occupant auto travel, including both commuter and community shuttles. A Board of Directors consisting of elected officials from each of its 17-

member cities and one representative from the County Board of Supervisors governs the Alliance. The Alliance manages 26 shuttle routes in San Mateo County. In South San Francisco, the Alliance runs seven first- and last-mile weekday peak hour and direction commuter routes that connect riders with the South San Francisco Caltrain and BART stations, and the South San Francisco Bay Ferry (WETA) terminal.

California Department of Transportation (Caltrans)

Caltrans has authority over the State highway system, including mainline facilities, interchanges, and arterial State routes. Caltrans approves the planning and design of improvements for all State-controlled facilities. Caltrans facilities in South San Francisco include US-101 and its interchanges, I-280 and its interchanges, I-380 and its interchanges, and SR 82 (El Camino Real).

SamTrans

The San Mateo County Transit District (SamTrans) is the primary public transportation provider in San Mateo County. SamTrans manages local and regional bus service, paratransit services, and Caltrain commuter rail. There are over 50 routes in the county that can be categorized as community, express, BART connection, Caltrain connection, and BART and Caltrain connection routes.

Caltrain

Caltrain operates 50 miles of commuter rail between San Francisco and San Jose, and limited service trains to Morgan Hill and Gilroy during weekday commute periods and directions. Caltrain is governed through the Peninsula Corridor Joint Powers Board and managed by SamTrans. On weekdays, Caltrain operates approximately 100 trains per day of local, limited stop, and Baby Bullet express service in both directions. The South San Francisco station is currently served by two limited-stop trains per hour during peak weekday commute periods and directions.

Water Emergency Transit Agency (WETA)

The San Francisco Bay Area Water Emergency Transportation Authority (WETA) operates the San Francisco Bay Ferry, a regional ferry service on the San Francisco Bay and coordinates water transit response to regional emergencies. WETA provides public ferry service to the cities of Alameda, Oakland, San Francisco, South San Francisco, and Vallejo.

Relevant Plans and Policies

State of California Senate Bill 743

Discussed in **Appendix A**.

City of South San Francisco General Plan Transportation Chapter

The City of South San Francisco General Plan (1999) defines transportation and land use policies for the City. The General Plan establishes transportation policies pertinent to the Project, including:

- *4.2-G-1: Undertake efforts to enhance transportation capacity, especially in growth and emerging employment areas such as in the East of 101 area.*
- *4.2-G-10 Make efficient use of existing transportation facilities and, through the arrangement of land uses, improved alternate modes, and enhanced integration of various transportation systems serving South San Francisco, strive to reduce the total vehicle-miles traveled.*
- *4.2-1-10: Design roadway improvements and evaluate development proposals based on LOS standards.*
- *4.3-I-16 Favor Transportation Systems Management programs that limit vehicle use over those that extend the commute hour.*

The City of South San Francisco's General Plan is currently being updated through the *Shape SSF General Plan 2040* public engagement process and is targeted for adoption in late 2021. Since the update is underway, this document refers to policies and programs from the approved 1999 general plan and relevant adopted amendments.

South San Francisco Complete Streets Policy

The City of South San Francisco adopted its Complete Streets Policy (2012) to serve all street users:

- *Resolution 86-2012: Create and maintain complete streets that provide safe, comfortable, and convenient travel along and across streets including streets, roads, highways, bridges, and other portions of the transportation system through a comprehensive, integrated transportation network that serves all categories of users, including pedestrians, bicyclists, persons with disabilities, motorists, movers of commercial goods, users and operators of public transportation, seniors, children, youth, and families.*
- The Complete Streets Policy was incorporated into the amended General Plan and includes the following policy related to the Project:
- *4.2-I-11: In all street projects include infrastructure that improves transportation options for pedestrians, bicyclists, and users of public transportation of all ages and abilities. Incorporate this infrastructure into all construction, reconstruction, retrofit, maintenance, alteration, and repair of streets, bridges, and other portions of the transportation network.*

South San Francisco Bicycle Master Plan

The City of South San Francisco Bicycle Master Plan (2011) identifies and prioritizes street improvements to enhance bicycle access. The plan analyzes bicycle demand and gaps in bicycle facilities and recommends

improvements and programs for implementation. The Bicycle Master Plan establishes the following policy related to the Project:

- *3.2-1: All development projects shall be required to conform to the Bicycle Transportation Plan goals, policies and implementation measures.*

South San Francisco Pedestrian Master Plan

The City of South San Francisco Pedestrian Master Plan (2012) identifies and prioritizes street improvements to enhance pedestrian access. The plan analyzes pedestrian demand and gaps in pedestrian facilities and recommends improvements and programs for implementation. The Pedestrian Master Plan establishes the following policy related to the Project:

- *Policy 3.2: Pedestrian facilities and amenities should be provided at schools, parks, and transit stops, and shall be required to be provided at private developments, including places of work, commercial shopping establishments, parks, community facilities and other pedestrian destinations.*

South San Francisco Transportation Demand Management Ordinance

The City of South San Francisco TDM Ordinance (Ord. 1432 § 2, 2010) seeks to reduce the amount of traffic generated by nonresidential development and minimize drive-alone commute trips. The ordinance establishes a performance target of 28 percent minimum alternative mode share for all nonresidential projects resulting in more than 100 average daily trips and identifies a higher threshold for projects requesting a floor area ratio (FAR) bonus.

As documented in Section 1, while the City's TDM Ordinance does not require a specific alternate mode-share (AMS) requirement for residential projects, the Project has prepared a TDM Plan, consistent with the City's goals of increasing AMS and decreasing single occupancy vehicle traffic.

C/CAG Congestion Management Program Guidelines

C/CAG has adopted guidelines as a part of its Congestion Management Program (CMP), which are intended to reduce the regional traffic impacts of substantive new developments. The guidelines apply to all projects in San Mateo County that will generate 100 or more net new peak-hour trips on the CMP network and are subject to CEQA review. C/CAG calls for projects that meet the criteria to determine if a combination of acceptable measures is possible that has the capacity to "fully reduce," through the use of a trip credit system, the demand for net new trips that the project is anticipated to generate on the CMP roadway network (including the first 100 trips). C/CAG has published a list of mitigation options in a memorandum. The Project does not generate more than 100 net new peak hour trips and therefore is not subject to C/CAG's ordinance.

Appendix C:

Non-CEQA: Traffic Operations Analysis

This traffic operations analysis studies the vehicle congestion effects of the Project at signalized and unsignalized intersections using level of service (LOS). LOS is a quantitative description of an intersection's performance based on the average delay per vehicle. Intersection levels of service range from LOS A, which indicates free flow or excellent vehicle flow conditions with short delays, to LOS F, which indicates congested or overloaded vehicle flow conditions with extremely long delays. The City of South San Francisco General Plan establishes LOS A through LOS D as acceptable operations, while LOS E and LOS F are considered unsatisfactory unless there is no mitigation feasible, except at intersections within ¼ mile of rail stations or ferry terminals where LOS does not apply. LOS for the study intersections were analyzed using the Highway Capacity Manual (HCM) 2000 and 6th Edition methodology and the Synchro traffic analysis software to maintain consistency with previous studies. Due to the relatively small Project size, detailed freeway analysis was not performed unless Project trips exceeded one percent of capacity.

While HCM methodology and Synchro traffic analysis software represent the state of the practice in evaluating isolated intersection operations, this methodology presents some limitations for both signalized and unsignalized intersections within a congested network. Under highly congested conditions, use of deterministic traffic modeling tools such as Synchro may not fully reflect the extent of vehicular queuing and spillover effects between intersections. To partially account for these conditions, saturated flow rates were manually adjusted based on field observations and traffic monitoring data. Similarly, these tools cannot anticipate how drivers may react to day-to-day variations in traffic conditions. Finally, this analysis is predicated on data collected on specific days; while existing conditions were counted on "typical" weekdays, traffic flows may vary by up to ten percent from day to day.

The analysis results are presented for information only and are not intended to inform the environmental review process. As documented in Appendix A, VMT Technical Analysis, Senate Bill 743 stipulates that vehicle LOS and similar measures related to auto delay shall not be used as the sole basis for determining the significance of transportation impacts under the California Environmental Quality Act (CEQA). However, local agencies may continue to use vehicle congestion metrics for non-CEQA transportation planning and evaluation.

Signalized Intersections

The method from Chapter 16 of the *Highway Capacity Manual* (HCM) bases signalized intersection operations on the average control delay experienced by motorists traveling through it. Control delay incorporates delay associated with deceleration, acceleration, stopping, and moving up in the queue. This method uses various intersection characteristics (such as traffic volumes, lane geometry, and signal phasing) to estimate the average control delay. **Table C.1** summarizes the relationship between average delay per vehicle and LOS for signalized intersections according to the HCM 6th Edition methodology.

Table C-1 Signalized Intersection LOS Criteria

| Level of Service | Description | Average Control Delay Per Vehicle (Seconds) |
|------------------|--|---|
| A | Operations with very low delay occurring with favorable progression and/or short cycle length. | ≤ 10 |
| B | Operations with low delay occurring with good progression and/or short cycle lengths. | > 10 and ≤ 20 |
| C | Operations with average delays resulting from fair progression and/or longer cycle lengths. Individual cycle failures begin to appear. | > 20 and ≤ 35 |
| D | Operations with longer delays due to a combination of unfavorable progression, long cycle lengths, or high volume-to-capacity (V/C) ratios. Many vehicles stop and individual cycle failures are noticeable. | > 35 and ≤ 55 |
| E | Operations with high delay values indicating poor progression, long cycle lengths, and high V/C ratios. Individual cycle failures are frequent occurrences. | > 55 and ≤ 80 |
| F | Operation with delays unacceptable to most drivers occurring due to over saturation poor progression, or very long cycle lengths. | > 80 |

Source: Transportation Research Board, 2016. Highway Capacity Manual 6th Edition

Unsignalized Intersections

Traffic conditions at the unsignalized study intersections (stop sign and yield sign-controlled intersections) were evaluated using the method from Chapter 17 of the HCM. With this method, operations are defined by the average control delay per vehicle (measured in seconds) for each stop-controlled approach that must yield the right-of-way. At four-way stop-controlled intersections, the control delay is calculated for the entire intersection and for each approach. The delays and corresponding LOS for the entire intersection are reported. At two-way stop-controlled intersections the movement with the highest delay and corresponding LOS is reported. **Table C.2** summarizes the relationship between delay and LOS for unsignalized intersections.

Table C-2 Unsignalized Intersection LOS Criteria

| Level of Service | Description | Average Control Delay Per Vehicle (Seconds) |
|------------------|---|---|
| A | Little or no traffic delays. | ≤ 10 |
| B | Short traffic delays. | > 10 and ≤ 15 |
| C | Average traffic delays. | > 15 and ≤ 25 |
| D | Long traffic delays. | > 25 and ≤ 35 |
| E | Very long traffic delays. | > 35 and ≤ 50 |
| F | Extreme traffic delays with intersection capacity exceeded. | > 50 |

Source: Transportation Research Board, 2016. Highway Capacity Manual 6th Edition

Traffic Operations Policy

The City of South San Francisco’s General Plan includes the following traffic operations policies relevant to the Project traffic operations analysis, including:

- *4.2-G-15 Strive to maintain LOS D or better on arterial and collector streets, at all intersections and on principal arterials in the CMP during peak hours.*
- *4.2-G-16 Accept LOS E or F after finding that: there is no practical and feasible way to mitigate the lower level of service; and, the uses resulting in the lower level of service are of clear, overall public benefit.*
- *4.2-G-17 Exempt development within one-quarter mile of a Caltrain or BART station, or a City-designated ferry terminal, from LOS standards.*

Analysis Scenarios

This analysis evaluates weekday AM peak hour traffic period between 7:00 AM and 9:00 AM and the weekday PM peak hour traffic periods between 4:00 PM and 6:00 PM. Counts were conducted during July 2019. Study intersections were evaluated for the following scenarios:

- **Existing Conditions:** Existing November 2019 traffic volumes for local roadways.
- **Plus Project Conditions:** Existing traffic volumes plus new traffic from the Project, with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection.
- **Cumulative No Project Conditions:** Projected conditions in 2040 without the Project, with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection.
- **Cumulative Plus Project Conditions:** Projected conditions in 2040 with the Project, with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection.

Study Locations

Study locations were selected for evaluation for the Project. The study area for the traffic analysis was selected based on local traffic patterns, trip assignment forecasts, input from the City of South San Francisco, and engineering judgment, to capture the transportation facilities where motorists are likely to experience impacts due to a net increase of trips associated with the Project. The study intersections are listed below and shown on **Figure 1-1** and listed below.

1. Produce Avenue / San Mateo Avenue / Airport Boulevard
2. Airport Boulevard / Mitchell Avenue / Gateway Boulevard
3. US-101 Northbound Ramps / South Airport Boulevard / Wondercolor Lane

Existing Conditions Scenarios

The existing conditions section include the existing no project and existing plus project scenarios. **Figure C-1** shows the existing lane configuration, traffic control, and weekday AM and PM peak hour traffic volume breakdown by movement at each of the eight study intersections.

The Project trip generation and distribution estimates and methodologies are presented in Section 3, Transportation Analysis. The trip distribution assumptions, as described in Section 3.4 were used as the basis for assigning Project-generated vehicle trips to the local transportation network and three study intersections. **Figure 3-3**, Project Trip Assignment, presents vehicle trip assignment at the three study intersections and **Figures C-2, C-3, and C-4** show Existing Plus Project volumes under each scenario. **Figure 3-1** shows the geometry modifications as a part of the Produce Avenue/Utah Avenue interchange project. **Table C-3** presents level of service conditions for the study intersections under existing and existing plus project scenarios (with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection).

All intersections operate at LOS D or better during AM and PM peak hours in both scenarios except for intersection #1 Produce Avenue / San Mateo Avenue / Airport Boulevard. Project traffic does not cause any intersection to operate at LOS E or F that was not already operating at these levels and does not add more than four seconds of delay to intersections that already operate at LOS E or F without the Project. Both reconfiguration alternatives have minimal impacts on the intersection operations.

Cumulative Conditions Scenarios

The cumulative conditions section includes the cumulative no project and cumulative plus project scenarios, with and without reconfiguration of Produce Avenue/San Mateo Avenue/Airport Boulevard intersection. **Figures C-5, C-6, and C-7** show cumulative no project weekday AM and PM peak hour traffic volumes that were obtained from the City of South San Francisco travel model for the year 2040 under each scenario. **Figures C-8, C-9, and C-10** show Cumulative Plus Project volumes under each scenario during weekday AM and PM peak hours. **Table C-4** presents level of service at the three study intersections under all Cumulative Conditions scenarios. Some intersection operate at LOS E or F under Cumulative No Project

conditions. However, the addition of Project trips does not cause any intersection to degrade from LOS D or better to LOS E or F. Additionally, Project-generated traffic does not add more than four seconds of delay to those intersections that already operate at LOS E or F without the Project.

Table C-3 Peak Hour Intersection Levels of Service: Existing Conditions Scenarios

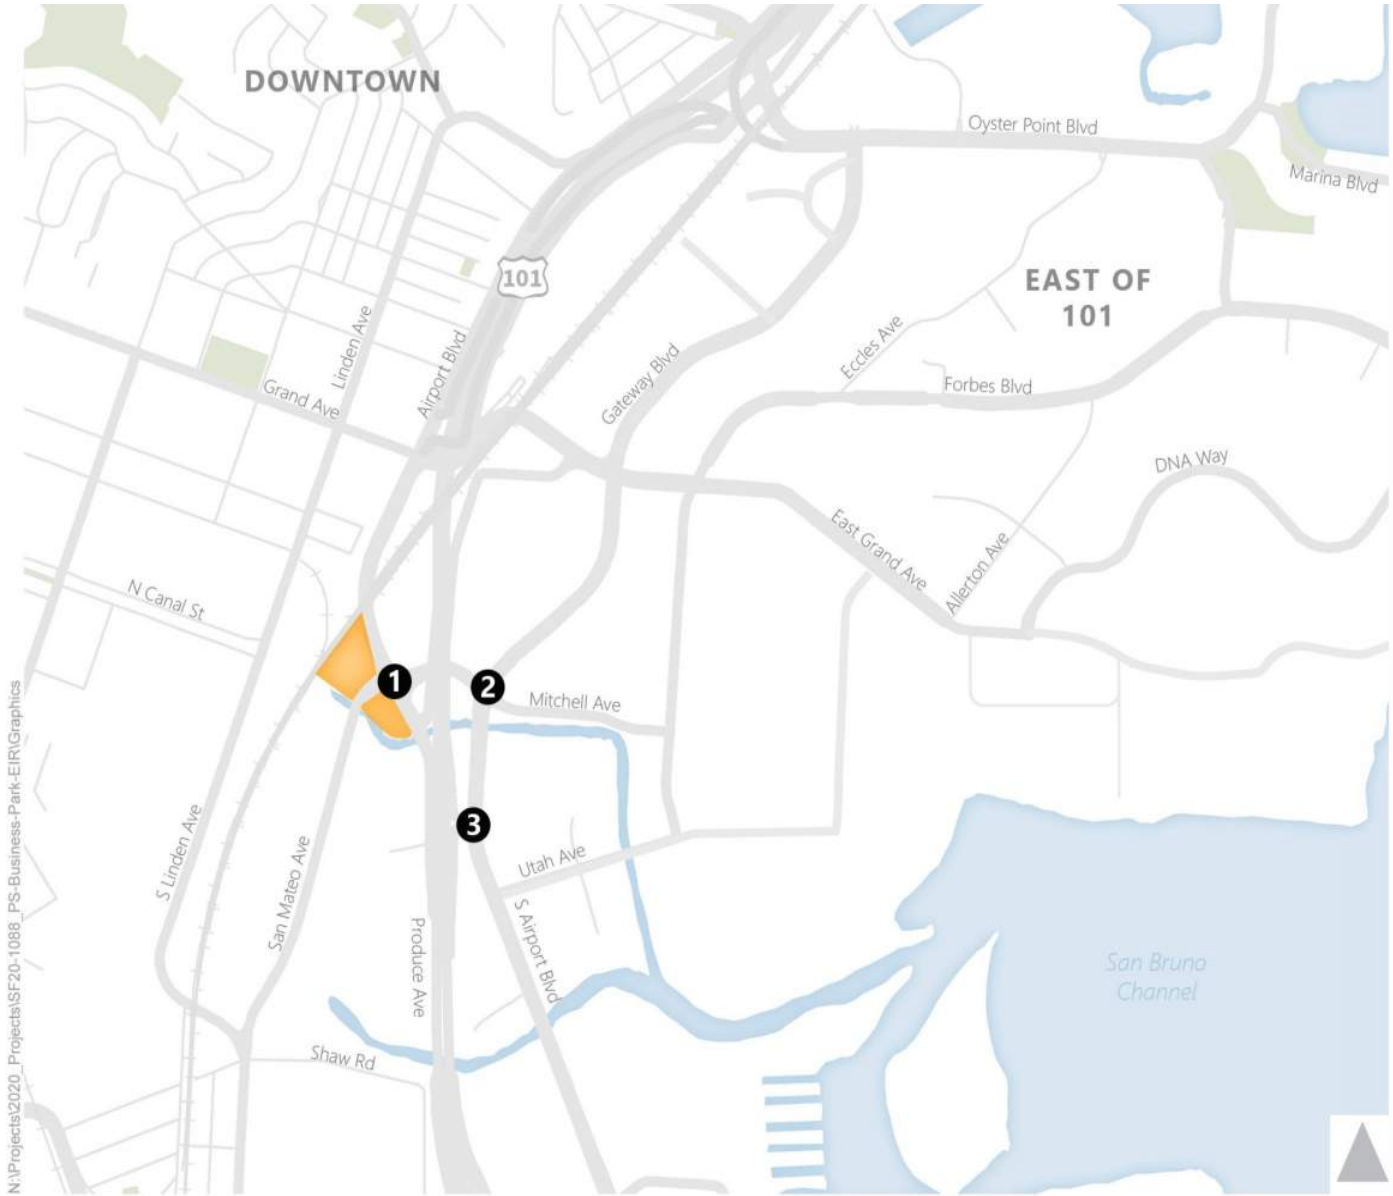

| | Intersection | Traffic Control | Peak Hour | Existing Conditions | | Existing Plus Project | | Existing Plus Project (Alt 5) | | Existing Plus Project (Alt 6) | |
|---|---|-----------------|-----------|---------------------|----------|-----------------------|----------|-------------------------------|----------|-------------------------------|----------|

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 36.9 |
| HCM 6th LOS | D |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 65.4 |
| HCM 6th LOS | E |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 37.4 |
| HCM 6th LOS | D |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 65.3 |
| HCM 6th LOS | E |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 37.4 |
| HCM 6th LOS | D |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 65.1 |
| HCM 6th LOS | E |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 37.9 |
| HCM 6th LOS | D |

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 68.1 |
| HCM 6th LOS | E |

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
 Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 37.8 |
| HCM 6th LOS | D |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 89.2 |
| HCM 6th LOS | F |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, EBR, WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 34.3 |
| HCM 6th LOS | C |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 68.6 |
| HCM 6th LOS | E |

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 40.0 |
| HCM 6th LOS | D |

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

| HCM 6th Ctrl Delay | 89.9 |
| HCM 6th LOS | F |

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
 Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 55.2 |
| HCM 6th LOS | E |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|-------|
| HCM 6th Ctrl Delay | 111.8 |
| HCM 6th LOS | F |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 41.5 |
| HCM 6th LOS | D |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 93.9 |
| HCM 6th LOS | F |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 64.4 |
| HCM 6th LOS | E |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

| | |
|--------------------|------|
| HCM 6th Ctrl Delay | 94.8 |
| HCM 6th LOS | F |

Notes

- User approved volume balancing among the lanes for turning movement.
- * HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.
- Unsignalized Delay for [NBR] is excluded from calculations of the approach delay and intersection delay.

1.

Introduction

This Transportation Demand Management (TDM) program was developed for the proposed residential development at 124 Airport Boulevard and 100 Produce Avenue (Project) in South San Francisco, California.

TDM is a combination of services, incentives, facilities, and actions that reduce single-occupant vehicle (SOV) trips to help relieve traffic congestion, parking demand, and air pollution problems. The purpose of TDM is to (1) reduce the amount of traffic generated by new development; (2) promote more efficient utilization of existing transportation facilities and ensure that new developments are designed to maximize the potential for alternative transportation usage; (3) reduce the parking demand generated by new development and allow for a reduction in parking supply; and (4) establish an ongoing monitoring and enforcement program to guarantee the desired trip and parking reductions are achieved.

Compared to the parking requirements of the South San Francisco Municipal Code, the project would provide fewer than the required number of spaces. The main purpose of this recommended TDM program is to evaluate the parking reduction requirements outlined in Section 20.330.006 of the South San Francisco Municipal Code. The code states that the Planning Commission may grant a Conditional Use Permit for reduced parking if it finds that the project has undertaken a TDM program that will reduce parking demand at the site.

This TDM plan seeks to reduce auto dependency/vehicle ownership through a combination of appropriate measures to promote alternative forms of transportation. Annual reports will be provided regarding the utilization and efficacy of the TDM program through resident surveys to determine mode split and parking occupancy surveys to monitor parking demand and to ensure that the demand does not exceed the supply.

Project Description

The project consists of two parcels, one located at 124 Airport Boulevard (north parcel) and the other at 100 Produce Avenue (south parcel), which are located on the northwest and southwest corners of the Airport Boulevard-Produce Avenue/San Mateo Avenue intersection (see Figure 1). The project proposes to replace the existing business/commercial uses with a total of 480 dwelling units: 294 units in Building 1 on the north parcel and 186 units in Building 2 on the south parcel. Two vehicular access points are planned for each of the two buildings – one on San Mateo Avenue and another on Airport Boulevard for the north parcel and one on San Mateo Avenue and another on Produce Avenue for the south parcel. Because of the raised median, the proposed driveways on Airport Boulevard and Produce Avenue will be restricted to right-in/right-out only movements. The

driveways on San Mateo Avenue are planned to be full access, allowing left turns into and out of the two buildings. The project would provide a total of 560 on-site vehicular parking spaces (341 spaces in Building 1 and 219 spaces in Building 2) within two parking levels within each building. Vehicular parking will be provided at the ratio of 1.16 spaces per unit for Building 1 and 1.18 spaces per unit for Building 2, which is which is less than the City's parking requirement. The parking layouts of the two levels within Building 1 are shown on Figure 2 and Figure 3 and the parking layouts of the two levels within Building 2 are shown on Figure 4 and Figure 5.

Downtown Location and Proximity to Transit

Also called location efficiency, the location of a project within or adjacent to a central business district promotes pedestrian and bicycle travel in a high-density area of complementary land uses. The northern parcel is located in the Downtown Station Area Specific Plan (DSASP), and the southern parcel is located just outside the DSASP boundary. Both parcels will provide development and density within a ½-mile radius of the Caltrain Station, which will promote ridership. The proximity of the project to South San Francisco downtown, employment opportunities in the east of US 101 area, Caltrain and the BART stations are shown on Figure 6. Chapter 2 describes the existing transit services in the study area.

2. Existing Transportation Facilities

Transportation facilities and services that support sustainable modes of transportation include buses and shuttle buses, commuter rail, and bicycle and pedestrian facilities. This chapter describes existing facilities and services near the project site.

Pedestrian Facilities

Sidewalks are provided on most streets in the immediate vicinity of the proposed project. Sidewalks exist in both directions on Airport Boulevard/Produce Avenue and San Mateo Avenue along the project frontages. In the immediate vicinity of the project, crosswalks exist at the signalized intersections of Airport Boulevard/Produce Avenue/San Mateo Avenue and Grand Avenue/Dubuque Avenue for pedestrians to get to the South San Francisco Caltrain station. Crosswalks are also present at intersections along Airport Boulevard and Grand Avenue for pedestrian access to downtown destinations.

Pedestrian access improvements are proposed in the area covered under the South San Francisco Downtown Station Area Specific Plan and citywide under the South San Francisco Pedestrian Master Plan. The plan calls for area-wide improvements, such as establishing a Downtown pedestrian-priority zone, making pedestrian-friendly alley improvements to Downtown lanes, and completing the street grid to reduce block lengths immediately surrounding the Caltrain station. The project is well situated to take advantage of the existing and planned pedestrian facilities and transit services in the immediate vicinity. These services would allow project residents to access employment and many services without an automobile. The new Caltrain station location will shorten the walking distance from the project site and allow easy access to transit services. Pedestrians can access the project site to/from other parts of the downtown via existing sidewalks and crosswalks at signalized intersections.

Overall, the existing network of sidewalks and crosswalks has good connectivity and provides pedestrians with safe routes to transit services and other points of interest in the downtown area. The project will replace existing curbs, gutter, and sidewalks along the project frontages on Airport Boulevard, Produce Avenue and San Mateo Avenue as part of their overall improvement plan.

Bicycle Facilities

Bicycle facilities include bike paths, bike lanes, and bike routes. Bike paths (Class I facilities) are pathways, separate from roadways, which are designated for use by bicycles. Often, these pathways also allow pedestrian access. Bike lanes (Class II facilities) are lanes on roadways

designated for use by bicycles with special lane markings, pavement legends, and signage. Bike routes (Class III) are existing rights-of-way that accommodate bicycles but are not separate from the existing travel lanes. Routes are typically designated only with signs.

The City has 48.3 miles of existing bikeways, though most of them are not signed (see Figure 7). Transit stations, schools, parks and retail centers are all accessible by these bikeways. The following bicycle facilities exist in the project study area.

Class I Bikeway (Multi-Use Path)

- **East Grand Avenue** has a bike path that extends from Poletti Way and ends at Kimball Way. This path connects to Class II bike lanes that begin on Gateway Boulevard south of Grand Avenue.

Class II Bikeway (Bike Lane)

- **Airport Boulevard** has Class II bike lanes in both directions that begin north of Miller Avenue and connect to the Class III bicycle routes on Miller Avenue and Linden Avenue.
- **Gateway Boulevard** has Class II bike lanes in both directions that begin south of East Grand Avenue and extend to South Airport Boulevard.
- **Grand Avenue** has Class II bike lanes in both directions that begin west of Spruce Avenue and connect to the Class III bicycle route on Spruce Avenue.
- **Railroad Avenue** has a short segment of Class II bike lane in the eastbound direction that extends east from Spruce Avenue to Maple Avenue, after which it becomes a Class III bicycle route with sharrow markings. This bike lane connects to the Class III bicycle route on Spruce Avenue.

Class III Bikeway (Bike Route)

- **San Mateo Avenue** is a Class III bicycle route without sharrow markings. The route extends from Airport Boulevard past South Linden Avenue. It connects to the Class III bicycle route on Linden Avenue.
- **Airport Boulevard** has a Class III bicycle route without sharrow markings between Miller Avenue and San Mateo Avenue. It connects to the Class III bicycle route on San Mateo Avenue to the south and the Class II bicycle lane on Airport Boulevard north of Miller Avenue.
- **Linden Avenue** is a Class III bicycle route without sharrow markings. The route extends south from Airport Boulevard to San Mateo Avenue.
- **Spruce Avenue** is a Class III bicycle route with sharrow markings between Hillside Boulevard to the east and Victory Avenue to the south. This bicycle route continues south without sharrow markings to El Camino Real. The route connects to Class II bicycle lanes on Grand Avenue.
- **Miller Avenue** has a Class III bicycle route without sharrow markings between Airport Boulevard to the east and Chestnut Avenue to the west. It connects to the Class II and Class III bicycle facilities on Airport Boulevard and Class II bicycle on Chestnut Avenue.

- **Commercial Avenue** is a Class III bicycle route with sharrow markings between Linden Avenue to the east and Chestnut Avenue to the west. It connects to the Class III bicycle route on Linden Avenue and Chestnut Avenue.
- **Railroad Avenue** is primarily a Class III bicycle route with sharrow markings between Linden Avenue and Orange Avenue, except having a short segment of eastbound Class II bike lane between Maple Avenue and Spruce Avenue. It connects to the Class III bicycle route on Linden Avenue.

The City of South San Francisco adopted its citywide Bicycle Master Plan in 2011, the goal of which is to expand the bicycle network to make it easier and safer for people to bicycle through the City. The Downtown Station Area Specific Plan also included further provisions for expanding the bicycle network.

In the project vicinity, new Class II bike lanes are planned in both directions on Airport Boulevard between San Mateo Avenue and Miller Avenue, as well as Grand Avenue between Spruce Avenue and Airport Boulevard. New Class II bike lanes are also planned on South Airport Boulevard south of Mitchell Avenue. As part of the proposed Caltrain Station reconstruction, a new ped/bike rail crossing tunnel is proposed at the Grand Avenue/Airport Boulevard intersection that would directly connect to the South San Francisco Caltrain station. The new ped/bike tunnel would also provide a good bicycle connection between the downtown and the employment zone to the east of US 101. Bicycle and pedestrian connectivity to the project site is shown on Figure 8.

Colma Creek Canal Trail East-West Bikeway

An east-west bikeway is planned along the Colma Creek Canal that would extend the existing bike path that ends at Spruce Avenue, providing a new connection to the San Francisco Bay Trail to the east. Between Spruce Avenue and Linden Avenue, the path would be a Class IV two-way protected on-street cycle track along North Canal Street. Between Linden Avenue and San Mateo Avenue, the path would be a Class I bike path passing under the Caltrain right-of-way along the Colma Creek Canal. At San Mateo Avenue, the path could transition to a Class IV on-street two-way cycle track through the Produce Avenue intersection and under US 101. East of Gateway Boulevard, the path would be a Class I bike path and run off-street along Mitchell Avenue before connecting to Harbor Way. Harbor Way would provide access to the Bay Trail to the south at Littlefield Avenue.

The Colma Creek Canal will provide a good bicycle connection between the project and the employment zones to the east of US 101.

Transit Services

Existing transit service to the study area is provided by San Mateo County Transit District (SamTrans), commuter shuttles, Caltrain, and BART. The transit services are described below and shown on Figure 9.

SamTrans Bus Routes

The following bus routes serve the project area.

- *SamTrans* 38 connects to Safe Harbor, the Millbrae Transit Center, and San Bruno BART station. This line provides limited northbound service between 5:00 AM and 7:55 AM, and limited southbound service between 5:45 PM and midnight. The bus maintains weekend schedules with limited northbound service between 6:52 AM and 10:03 AM, and limited

southbound service between 3:35 PM and midnight. The nearest bus stop is at the South Airport Boulevard/Utah Avenue intersection.

- *SamTrans 292* provides connection between Downtown San Francisco to the north and Brisbane, South San Francisco, Burlingame and San Mateo to the south. This line provides service in both directions between 3:55 AM and 2:40 AM, with 20- to 30-minute headways during peak weekday hours. The bus maintains weekend schedules between 4:00 AM and 2:30 AM with 30- to 60-minute headways. The nearest bus stop is at the Airport Boulevard/Baden Avenue intersection.
- *SamTrans 397* connects to Downtown San Francisco to the north and Palo Alto Transit Center to the south. This line provides service between 1:00 AM and 6:00 AM with 60-minute headways. The nearest bus stop is at the Airport Boulevard/Baden Avenue intersection.

Commuter Shuttles

Additional commuter bus service is provided by Commute.org. These shuttles provide commuter connections between Caltrain and BART stations and East of US-101 employers:

- The Oyster Point Shuttles connect the Caltrain and South San Francisco BART stations, as well as the South San Francisco ferry terminal to destinations on Oyster Point, Forbes Boulevard, and Eccles Avenue. This line provides service during peak commute hours, between 6:30 AM and 10:00 AM, and between 3:00 PM and 6:00 PM with 30- to 60-minute headways. The Oyster Point Caltrain and ferry terminal shuttles stop at the South San Francisco Caltrain station, which is approximately 0.5 mile north of the project site.
- The Utah-Grand Shuttles connect the Caltrain and South San Francisco BART stations, as well as the South San Francisco ferry terminal to destinations on East Grand Avenue and Utah Avenue. This line provides service during peak commute hours, between 5:30 AM and 9:30 AM, and between 4:00 PM and 6:15 PM with 30-minute headways. The Utah-Grand Caltrain and ferry terminal shuttle services can be accessed at the Caltrain station. All the Utah-Grand shuttles have a stop at the South San Francisco Conference Center at 255 South Airport Boulevard, which is approximately 0.5 mile south of the project site.

Continuous sidewalks are present for pedestrians walking between the proposed project and all the nearest bus stops.

BART

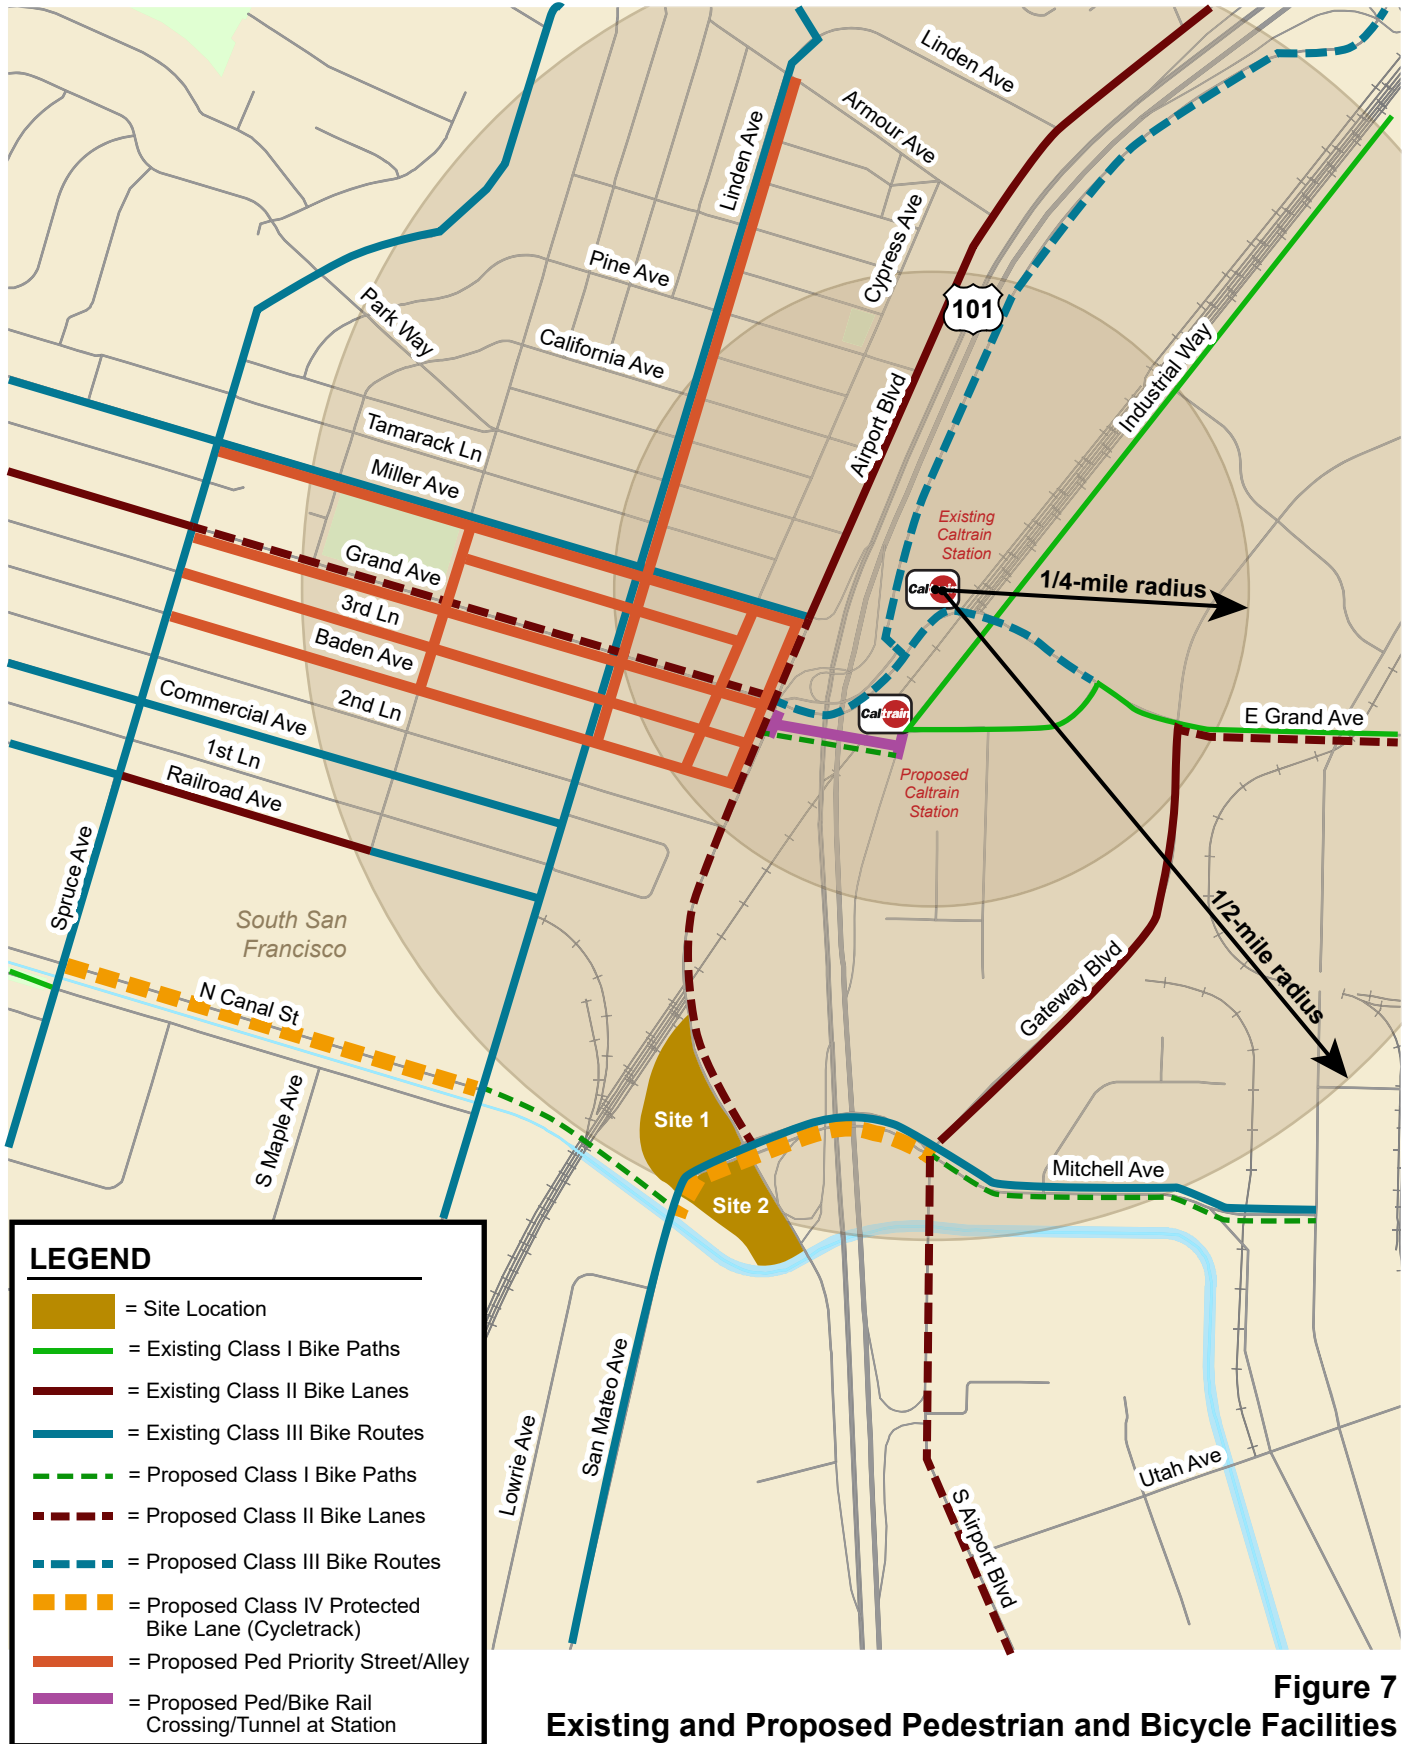

Bay Area Rapid Transit (BART) operates regional rail service in the Bay Area, connecting between San Francisco International Airport and the Millbrae Intermodal Station to the south, San Francisco to the north, and cities in the East Bay. The BART stations closest to the project area are the San Bruno Station located near Huntington Avenue east of El Camino Real, and the South San Francisco Station, located on Mission Road and McLellan Drive. Both stations are located within 3 miles of the Caltrain station, and SamTrans provides service from the stations to Downtown South San Francisco. BART trains operate on 15-minute headways during peak hours and 20-minute headways during off-peak hours.

Caltrain

Caltrain provides commuter rail service between San Francisco and Gilroy. The project is located at about 0.5 miles southwest of the South San Francisco Caltrain station, which is located at 590 Dubuque Avenue, on the east side of US-101, immediately north of East Grand Avenue. The South

San Francisco Caltrain Station serves local and limited-stops trains. Weekday peak commute headways are between 20 and 60 minutes, with more frequent service for AM northbound and PM southbound trains.

Currently, the only access to the South San Francisco Caltrain station is from the west side of the train tracks, via the Grand Avenue overpass. This overpass requires a long and circuitous detour for people walking and bicycling, who have to cross Grand Avenue and descend either a tall metal staircase or use Dubuque Avenue. Recently, the San Mateo County Transportation Authority (SMCTA) Board awarded a \$59 million grant for station reconstruction to improve safety and connectivity to nearby businesses. The station reconstruction will include widening the center platform and building a pedestrian tunnel to connect the station directly to the east end of downtown's Grand Avenue. Passengers will be able to get to the station's center platform via ramps connecting to a tunnel underneath the tracks. The tunnel will connect to a pedestrian plaza at Grand Avenue and Airport Boulevard on the west side of the tracks and a transit plaza at the intersection of Grand Avenue and Poletti Way on the east side of the tracks. Buses and shuttles will pick up and drop off Caltrain passengers from the new east-side plaza instead of the parking lot on the west side of the station. There will be time savings for passengers commuting to the City's biotech job center on the east side of the tracks. With the South San Francisco Caltrain station reconstruction, the proposed project will be approximately 0.4 miles from the station.

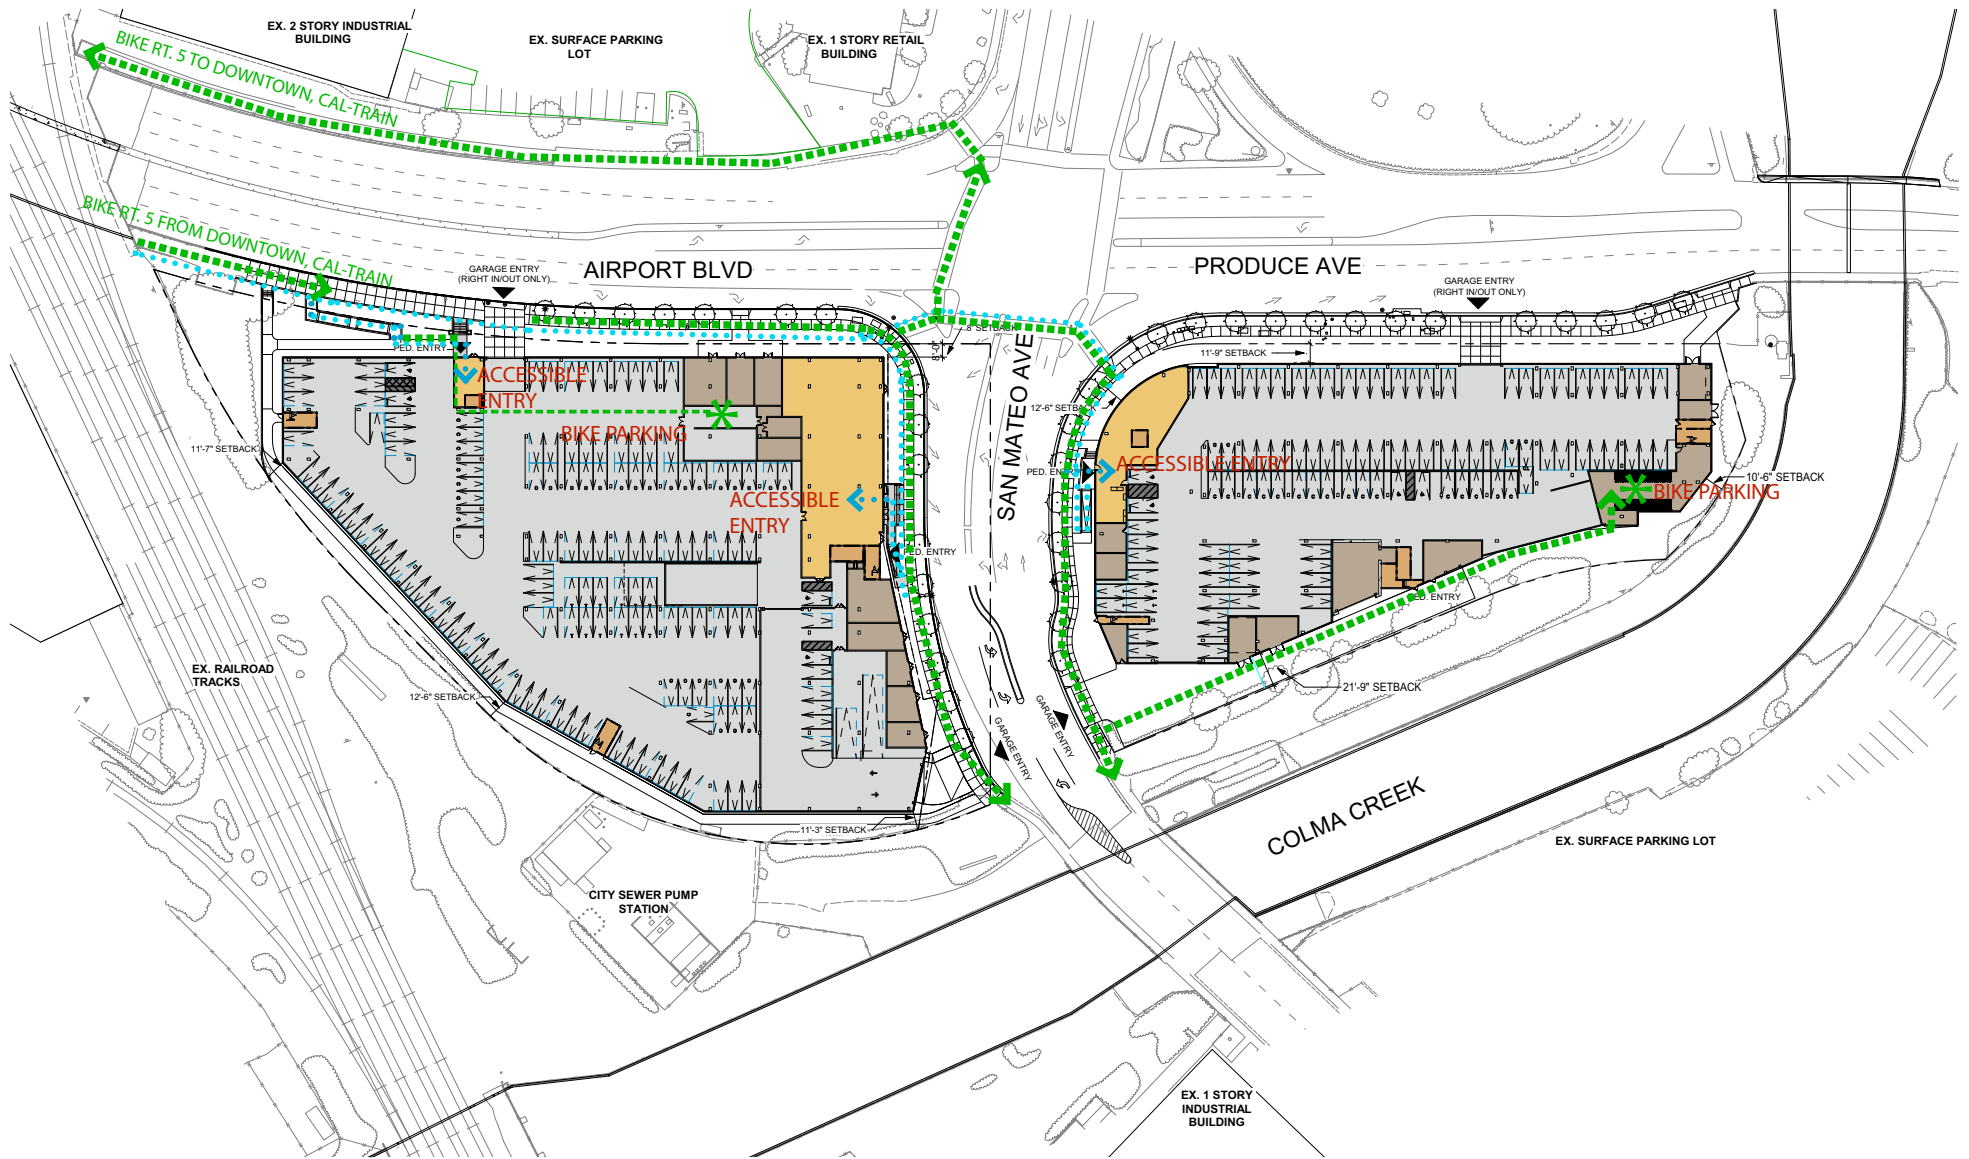

Figure 8
Project Bicycle and Pedestrian Connectivity

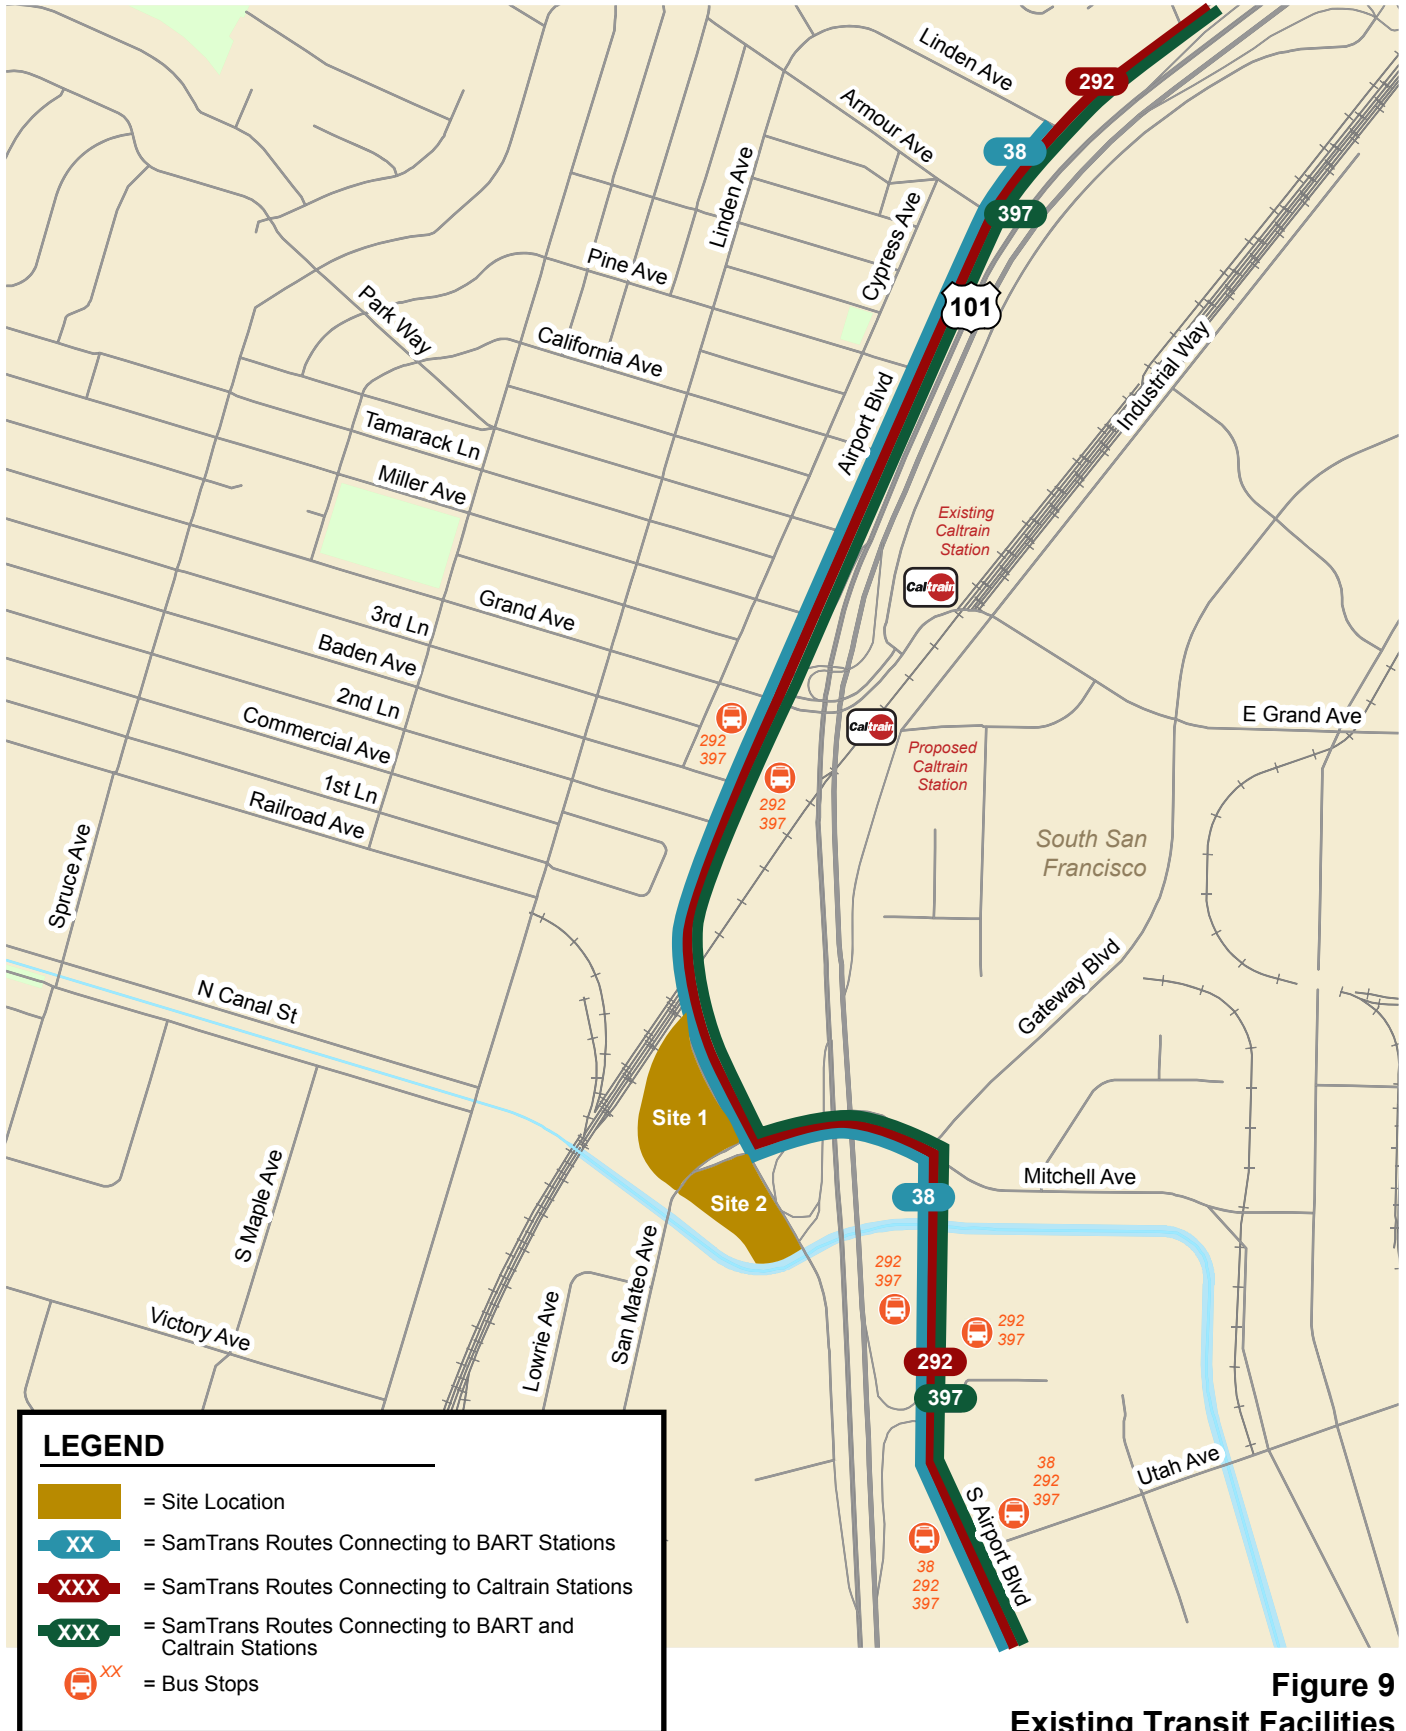

Figure 9
Existing Transit Facilities

3. Parking

Required parking for the project is based on the City of South San Francisco Parking Ordinance (20.330.004 – Required Parking Spaces). However, since both parcels are located within ½ mile of the Caltrain station, and the project is located just outside the downtown district, parking analysis for the proposed project is also compared to the Downtown Parking requirements (Section 20.330.007).

Vehicular Parking

Outside Downtown District

Parking requirements for the proposed project were calculated based on the following parking ratios for multi-family dwelling units outside the downtown district:

- Studio and less than 500 sq ft – 1 space per unit maximum.
- One-bedroom (up to 1,100 sq. ft) – 1.5 spaces per unit.
- Two-bedroom (up to 1,100 sq. ft) - 1.8 spaces per unit.
- Three or more bedrooms and 1,101 sq ft or larger – 2 spaces plus an additional 0.5 space for each additional sleeping room over 3.

The general requirement for multi-unit residential parking calls for one covered space for each unit and one additional guest parking space for every 4 units for projects greater than 10 units.

Downtown District

For projects within the downtown district, the following parking ratios are required for multi-family dwelling units:

- Studio and less than 500 sq ft – 1 space per unit maximum.
- One-bedroom (up to 1,100 sq. ft) - 1 space minimum, 1.5 spaces maximum per unit
- Two-bedroom (up to 1,100 sq. ft) - 1.5 spaces minimum, 1.8 spaces maximum per unit.
- Three or more bedrooms and 1,101 sq ft or larger – 1.5 spaces minimum, 2 spaces maximum per unit.

The general requirement for multi-unit residential parking within the downtown district calls for one covered space for each unit.

Table 1 below summarizes the minimum required parking spaces for the project and compares it to the parking requirement in the downtown district.

**Table 1
Parking Analysis**

| | # of units | | | | Outside Downtown District | | | | Downtown District | | | |
|--------------|------------|------------|------------|-----------|---------------------------|------------|-----------------|------------|-------------------|------------|-----------------|------------|
| | | | | | # of space | | Parking Deficit | | # of space | | Parking Deficit | |
| | Studio | 1 bed | 2 bed | 3 bed | Required | Provided | # Spaces | % | Required | Provided | # Spaces | % |
| Building 1 | 61 | 139 | 89 | 5 | 513 | 341 | 172 | 34% | 341 | 341 | 0 | 0% |
| Building 2 | 37 | 89 | 51 | 9 | 327 | 219 | 108 | 33% | 216 | 219 | -3 | -1% |
| Total | 98 | 228 | 140 | 14 | 840 | 560 | 280 | 33% | 557 | 560 | -3 | -1% |

As shown in Table 1, the project would provide a total of 560 parking spaces (341 spaces in Building 1 and 219 spaces in Building 2). Compared to the parking requirements for projects outside the downtown district, the project would be required to provide a total of 840 parking spaces, which calculates to 1.75 parking space per unit. The project would provide 280 (33%) fewer than the required number of parking spaces at the rate of 1.16 spaces per unit for Building 1 and 1.18 spaces per unit for Building 2. Compared to the parking requirement in the downtown district, there would be a deficit of only 3 parking spaces.

The project will implement a comprehensive TDM program to reduce the project's parking demand. The proposed TDM program is described in detail in Chapter 4.

Bicycle Parking

According to the City's Bicycle Parking Standards, for multi-unit residential developments with eight or more units, short-term bicycle parking should be provided at a rate of 10% of the number of required automobile parking spaces. The code also requires that long-term bicycle parking be provided at a minimum of one bicycle parking space for every four units (0.25 spaces per units) for multi-unit residential projects. This calculates to 56 short-term bicycle parking spaces and 120 long-term bicycle parking spaces. The site plans show that the project would provide 147 long-term bicycle parking spaces in Building 1 and 93 long-term bicycle parking spaces in Building 2, with a total of 240 long-term bicycle parking spaces (at the rate of 0.5 per unit). The project would provide twice the required number of long-term bicycle parking spaces. The total number of on-site long-term bicycle parking spaces would exceed the sum of the required number of short-term and long-term bicycle parking spaces. The project will provide 12 short-term bicycle parking spaces for each building for a total of 24 short-term parking spaces for visitors.

4. Recommended TDM Program

The TDM measures for the project were developed consistent with the City of South San Francisco – Downtown Station Area Specific Plan (DSASP) goals to “provide for a balanced mix of travel modes – including pedestrians, bicyclists, transit and automobiles.”

Due to the availability of transit options and bicycle facilities near the project, as well as the proportion of studio and one-bedroom units being proposed (68%), it is reasonable to assume that not all residents of the proposed development would own a car and require a parking space. Thus, the vehicle parking demand will likely be less than the City’s parking requirement. Implementation of the recommended TDM measures would encourage future residents taking alternative transportation modes (transit, bicycle, and car-share) to further reduce single occupant vehicle use and the need for on-site parking. The project site is well suited to have a successful TDM Program based on its access to bicycle, pedestrian, and transit facilities in the study area.

Recommended TDM Measures

The TDM measures recommended for the project include planning and design measures related to the attributes of the site location, the site design, and on-site amenities. Such measures encourage walking, biking, and use of transit. For the proposed project, these include the following measures, which are also summarized in Table 2.

Site Location and Design-Related Measures

With the South San Francisco Caltrain station reconstruction, the proposed project will be less than a ½ mile (0.4 mile) from the station. Passengers will be able to access the station via a tunnel that will be provided at the east end of downtown’s Grand Avenue. The site will be designed with upgraded sidewalks along the project frontages on Airport Boulevard and San Mateo Avenue to encourage walking to the Caltrain station. Continuous sidewalks will exist between the Caltrain station reconstruction and the project sites. The project sites are also located approximately 0.3 miles (1600 feet) from the bus stops on Airport Boulevard near Baden Avenue, which are served by two SamTrans bus routes.

Access to building amenities, such as the outdoor courtyards, fitness center, swimming pool in Building 1 and community space, as well as free Wi-Fi in the community areas for telecommuting, will be included to allow residents to stay onsite and reduce trips.

Ample bicycle support facilities will be provided including secure and protected bicycle parking for residents, bike racks for visitors, and on-site bicycle repair stations to encourage bicycling as a travel mode.

Table 2
Recommended TDM Measures for 124 Airport Boulevard/ 100 Produce Avenue

| TDM Measure | Implementation Responsibility |
|---|---------------------------------|
| Bicycle and Pedestrian Facilities | |
| Bike Parking | Building Developer |
| Bike Repair Hub | Trans.Coordinator |
| Resources (maps & info) | Trans.Coordinator |
| Carpool and Vanpool Programs | |
| 511 Ridematching Assistance | Available to public |
| Carpool/Vanpool Incentives for New Users | Available to public |
| Transit Elements | |
| \$100 welcome transit pass (One-time) | Trans.Coordinator |
| Online Info Center | |
| "Online Kiosk": website with info | Building Developer ¹ |
| Information Packets for New Residents | Trans.Coordinator |
| Program Marketing, Administration, Monitoring and Reporting | |
| Transportation Coordinator | Building Developer ¹ |
| Event promotions & publications | Trans. Coordinator |
| Resident Surveys | Trans. Coordinator |
| Parking Occupancy Survey | Trans. Coordinator |
| Annual reporting to City | Trans. Coordinator |
| Internet and Telecommuting | |
| Cable wiring to facilitate telecommuting | Building Developer |
| On-Site Amenities | |
| Residential fitness center | Building Developer |
| Swimming Pool | Building Developer |
| Cyber Lounge | Building Developer |
| Parking | |
| Unbundled Parking | Trans. Coordinator |
| <p>Notes:</p> <p>1. The building developer will have initial responsibility for creating an online kiosk and appointing the Transportation Coordinator. After the building is occupied, the Transportation Coordinator will have ongoing responsibility for the online kiosk and various program elements.</p> | |

TDM Administration and Promotion

Designated Transportation Coordinator

Experience with other TDM programs indicates that having a Transportation Coordinator who focuses on transportation issues and who is responsible for implementing and managing the TDM program is key to its success. The building owner or management will need to appoint an individual as the Transportation Coordinator or TDM contact person, and that person's name and contact information should be provided to the City.

The Transportation Coordinator's responsibilities will include organizing and implementing the promotional programs, updating information on the online information board/kiosk, providing trip planning assistance and/or ride-matching assistance to residents who are considering an alternative mode for their commute, and resident survey. The Transportation Coordinator should maintain up-to-date transit schedules and route maps for SamTrans, BART, Caltrain and community shuttles and be knowledgeable enough to answer resident's TDM program-related questions.

Promotional Programs

The Transportation Coordinator should undertake additional marketing activities to encourage residents and employees to try an alternative mode to get to work. Although some marketing, such as the online kiosk and distributing information welcome packets to new residents, should be conducted immediately, additional promotional activities might include email blasts of flyers, brochures or other materials on commute alternatives, ridesharing incentive programs, and transit benefits. SamTrans.com and 511.org can help provide some useful marketing materials.

Bicycle and Pedestrian Facilities

The site has quality access to bicycle and pedestrian routes through South San Francisco, connecting the project to major destinations and transit stations. The presence of other commercial uses in the vicinity of the project site will encourage residents to walk to the retail, and commercial areas nearby. It is expected that bicycle and pedestrian facilities that are included as part of the project will be successful in reducing the need for vehicle ownership and thereby reducing the demand for on-site parking.

Bicycle Parking

Providing secure bicycle parking encourages bicycle commuting and reduces daily vehicle trips.

The site plans show that the project will provide 147 long-term bicycle parking spaces in Building 1 and 93 long-term bicycle parking spaces in Building 2, with a total of 240 long-term bicycle parking spaces (at the rate of 0.5 per unit). The project will provide twice the required number of long-term bicycle parking spaces. The total number of on-site long-term bicycle parking spaces will exceed the sum of the required number of short-term and long-term bicycle parking spaces. The project will provide 12 short-term bicycle parking spaces for each building for a total of 24 short-term parking spaces for visitors.

Bicycle Resources

As part of the information available in the “online kiosk” discussed in more detail below, resources useful to cyclists should be included. For example, the local bikeways map should be posted for easy reference. A map showing the safe routes to the public elementary school, middle school, and high school that will serve the site’s families should also be posted.

The following resources are available to bicycle commuters through 511.org. These resources should be noted on the project’s online information center to make tenants aware of them.

- Free Bike Buddy matching
- Bicycle maps
- Bicycle safety tips
- Information about taking bikes on public transit
- Location and use of bike parking at transit stations
- Information on Bike to Work Day
- Tips on selecting a bike and commute gear
- Links to bicycle organizations

Bicycle Repair Stands In Bike Storage Rooms

The project is proposing to provide bike repair stands/kiosks in the bicycle storage room. The bicycle repair stands will include all the tools necessary to perform basic bike repairs and maintenance, from changing a flat tire to adjusting brakes and derailleurs. Repair stations also provide a singular point where bicyclists can share information on routes, commuting, and maintenance practices to help generate a stronger community that is more engaged in bicycling as a mode of transportation.

Pedestrian Accessibility

The site is currently well-served by pedestrian amenities including sidewalks and crosswalks with pedestrian signal heads. Improvements to these existing facilities, including 6-foot sidewalks and the addition of planting strips along the project frontages on Airport Boulevard, San Mateo Avenue and Produce Avenue to provide buffer between vehicles and pedestrians by the development will encourage individuals to walk to nearby destinations. The proposed public pedestrian and bicycle ways are shown on Figure 7.

Carpool and Vanpool Programs

511 Ride Matching Assistance

The 511 RideMatch service provides an interactive, on-demand system that helps commuters find carpools, vanpools or bicycle partners. This program should be promoted through the online information center and in New Resident Information packets.

This free car and vanpool ride-matching service helps commuters find others with similar routes and travel patterns with whom they may share a ride. Registered users are provided with a list of other commuters near their employment or residential Zip code along with the closest cross street, email, phone number, and hours they are available to commute to and from work. Participants are then able to select and contact others with whom they wish to commute.

Carpool/Vanpool Incentives for New Users

The 511 Regional Rideshare Program offers a number of incentive programs to encourage people to try carpooling and vanpooling. Most of these programs are designed to reward someone for forming or trying a carpool or vanpool and provide an award or subsidy after the first three or six months of use.

- **Vanpool Formation Incentive:** The 511 Regional Rideshare Program provides up to \$500 in gas cards to new vanpools that meet certain eligibility requirements and complete three to six consecutive months of operation. The gas cards are awarded on a first-come, first-served basis, until funds are exhausted.
- **Vanpool Seat Subsidy:** The 511 Regional Rideshare Program also offers a vanpool seat subsidy in the form of gas cards. The seat subsidy will provide \$100 per month, with a limit of three months per van during the program year, to help cover the fare of a lost participant. The gas cards will be offered to eligible vans on a first-come, first-served basis until the funds are exhausted.
- **Discounted Tolls:** The 511 Regional Rideshare Program offers free toll passage on seven of the Bay Area's bridges for vanpools with 11-15 people who register with 511. Additionally, the program also offers toll discounts to carpools with three or more people (two people in a two-seat vehicle) on eight of the Bay Area's bridges during peak commute hours. The discounts vary per bridge, but typically are half of the standard toll price. For example, the San Mateo – Hayward Bridge has a standard toll of \$5, but for a carpool of three people (two people in a two-seat vehicle) the toll is only \$2.50 Monday through Friday between 5-10 AM and 3-7 PM.

Ridematching with Scoop

Scoop is a carpool matching application that helps commuters to connect with carpoolers who share a similar commute in trip planning. Scoop's algorithm matches commuters based on route, predicted traffic, and past feedback. AM and PM trips can be scheduled separately. Morning trips should be scheduled by 9 p.m. the night before and afternoon and evening trips should be scheduled by 3.30 PM the day of the trip. Trips can be scheduled up to a week in advance. Scoop lets commuters know their carpool details well in advance so there's zero stress. Scoop is providing guaranteed rides back home in the evening for the commuters who commuted using the scoop app in the morning and are not able to find a ridematch in the evening. A designated area for drop-off/pickup for ridesharing vehicles will be provided for each of the two buildings (see Figure 10).

Transit Elements

Subsidized Transit Passes

We understand the developer will provide \$100 welcome transit passes per dwelling unit during the initial lease up period. This will encourage residents to explore transit options in the project vicinity and motivate residents to use transit for commuting to work. The Transportation Coordinator should be responsible for administering the program. Each resident should be given a clipper card that can be used on various transit systems like BART, Caltrans and SamTrans. Clipper is the all-in-one transit card for the Bay Area and can be used on all Bay Area transit systems, including Muni.

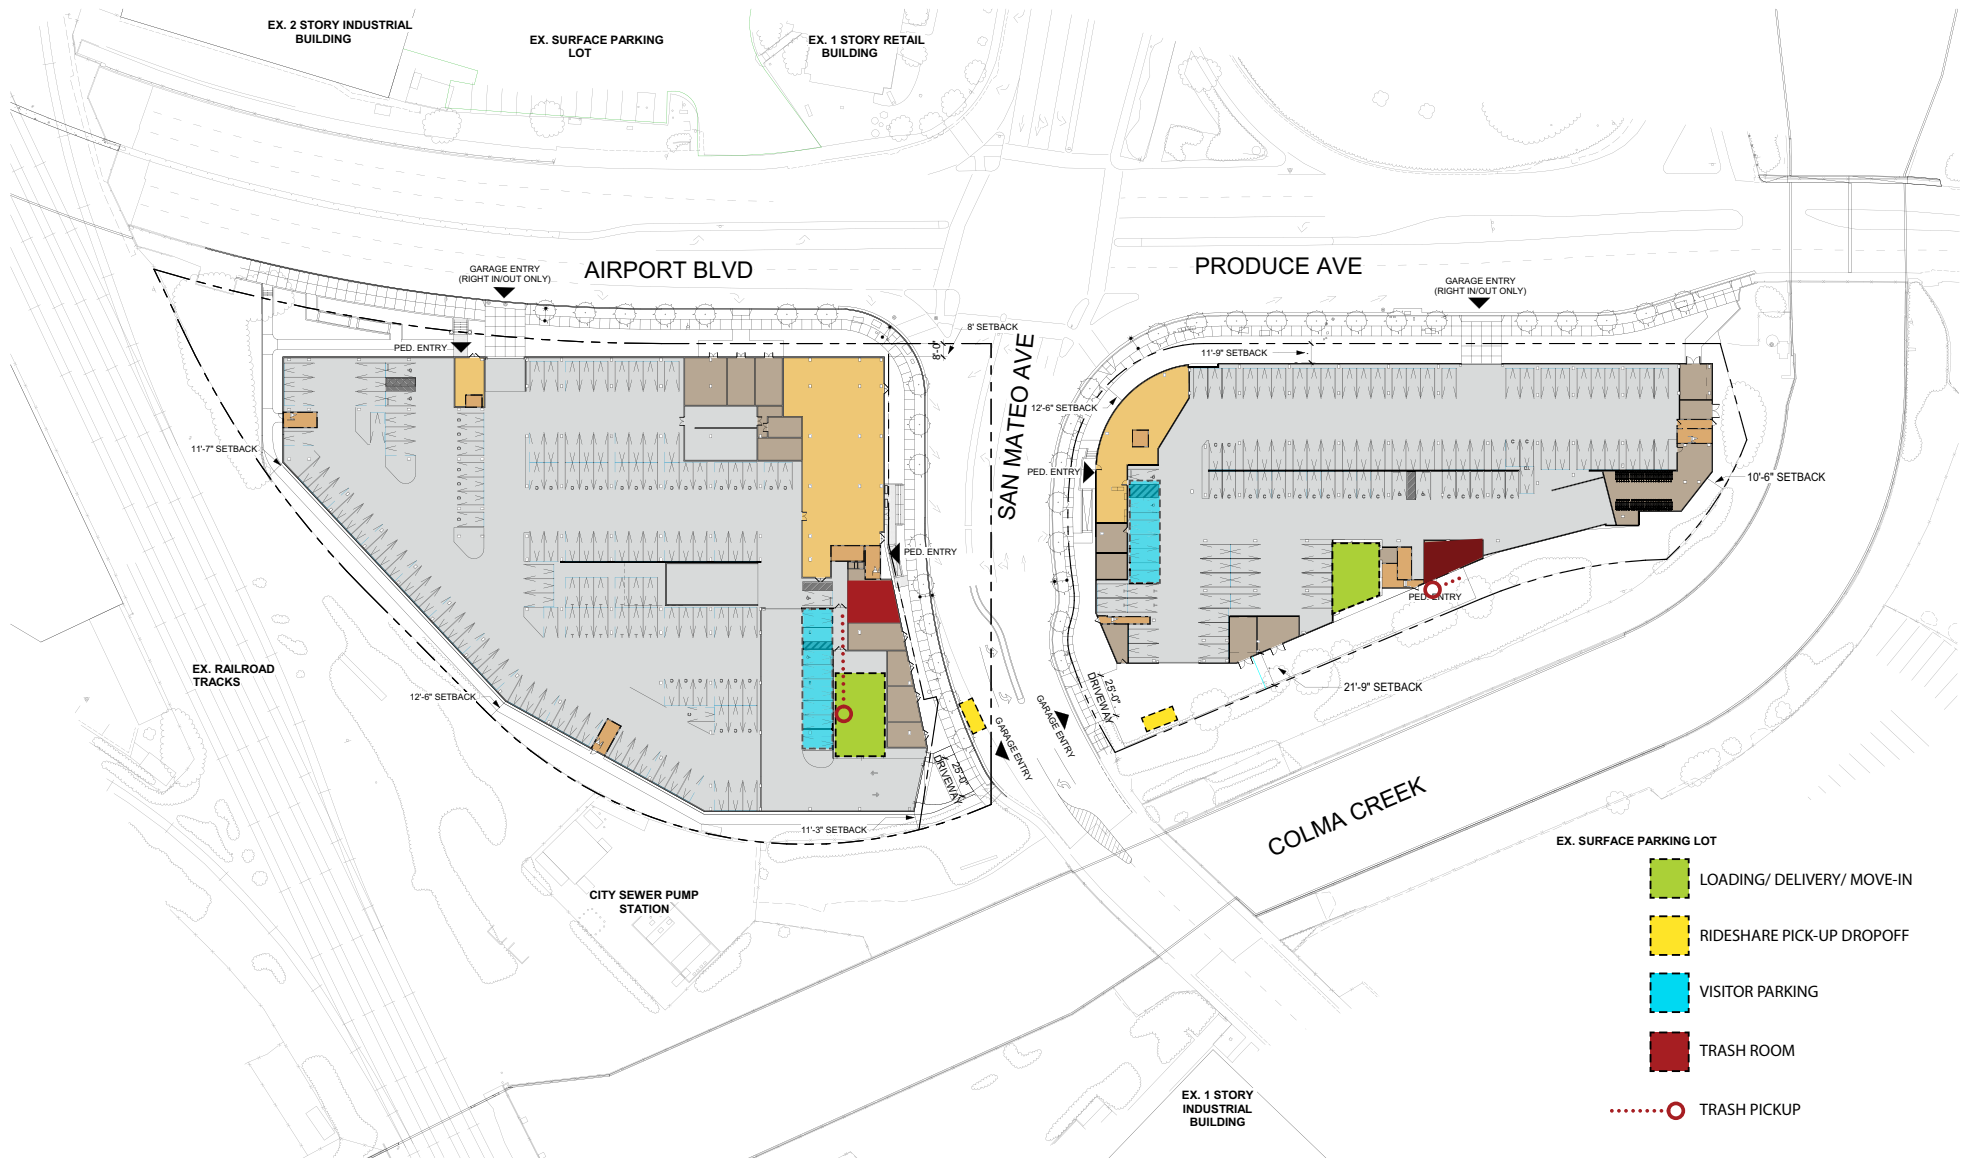

Figure 10
Project Delivery and Loading Plan

Marketing Program for Alternative Travel Modes

“Online Kiosk”: An Online Information Center

This TDM Plan recommends an “online kiosk” with travel information that a resident could access from their home, their workplace, or anywhere else.

A key recommendation of this TDM plan is to set up an attractive, up-to-date “online kiosk” with all of the site-specific information about the transportation resources available to residents. The website should include information about all the measures, services, and facilities discussed in this plan, including:

- A summary of SamTrans buses, BART and Caltrain services and links to further information about their routes and schedules.
- A summary of the “welcome” trial transit passes offered to all residents.
- A local bikeways map, information about the bike lockers/secure bike storage areas on site and those nearby, and information about the Bikeshare program.
- Information about ridematching services (e.g., 511.org, and Scoop) and the incentive programs available to carpools and vanpools.
- Information related to a carshare program, including benefits and nearby locations.
- A link to the many other resources available in the Bay Area, such as Dadrab, the 511 Carpool Calculator, the 511 Transit Trip Planner, real-time traffic conditions, etc.

The building developer should have responsibility for contracting with someone to initially create the website so that it is up and running as soon as residents move in. More specific information can be added later to reflect any programs specific to certain groups of residents. The Transportation Coordinator should be responsible for adding new information to the website (or providing it to the website designer) and including the web address for the online kiosk so that the “online kiosk” remains current and informative.

Information Packet for Residents

In addition to the online information center, the Transportation Coordinator should provide “hard copy” information packets to all residents when they first move into the building. Because all information will be available online, this packet need not be a comprehensive stack of paper about all services available, which residents tend to disregard anyway. Instead, the New Resident Packet should provide a quick easy-to-read announcement of the most important features of the TDM program for residents to know about immediately.

In addition, the packets should include a message to residents that their building manager and/or owner values alternative modes of transportation and takes their commitment to supporting alternative transportation options seriously.

Building Features to Facilitate Telecommuting

In an effort to decrease the number of trips residents have to make to and from work each week, the developer proposes to install cable wiring throughout the residential development to provide residents access to high speed internet service, allowing them to work from home. This TDM measure is meant to encourage telecommuting, whereby residents of the development who typically report to a central office location will be able to work at home one or more days per week.

On-site Amenities

On-site amenities can be beneficial in reducing vehicle trips by offering activities on site. The project will provide a fitness center within each building, a swimming pool in Building 1, and Wi-Fi lounge on site that will be open to all residents. Having a free fitness center and a swimming pool on site will encourage residents to use the available facilities rather than travel to a fitness center elsewhere. Fitness centers can often encourage alternative modes of transportation by educating users of the additional benefits that can be obtained by using active modes of transportation for other trips.

The project site is located approximately 0.3-mile walking distance from downtown South San Francisco and its abundant retail amenities. This will provide more opportunities to meet the necessities of residents without having to travel far from the project site, and possibly without using a car.

Unbundled Vehicular Parking

We understand the project will provide unbundled parking in both the buildings. According to *Section 20.280.006 Supplemental Regulations – downtown* of the South San Francisco Municipal Code, for apartment developments, 50 percent of the required parking may be unbundled. Unbundled parking means separating the cost of parking from residential leases and allowing residents to choose whether or not to lease a parking space. With this approach those tenants without a vehicle will not be required to pay for parking that they do not want or need. This is the most equitable approach and will free up parking for those tenants that require a space and are willing to pay for it. The parking spaces will be priced to avoid tenants parking on the streets or in nearby public parking lots. Unbundling residential parking costs from the cost of housing can reduce tenant vehicle ownership and parking demand and can be implemented on a month-to-month lease basis. With a lease, residents receive a monthly bill showing how much they are spending on a parking space and have the option to give up the space if they no longer need it.

Carshare Programs

Car sharing programs provide individuals with access to a vehicle when they need it at any time of day, so they do not need to drive or own a car of their own. The developer should work with car sharing companies to assess the feasibility of providing car share on-site. However, the success of this program would depend on the interest of the car sharing service providers.

TDM Implementation and Monitoring

As previously stated, the primary purpose of the TDM program is to reduce the project parking demand. As per City of South San requirements, monitoring will be necessary to ensure that the TDM measures are effective and continue to be successfully implemented.

The project applicant will be responsible for ensuring that the TDM trip reduction measures are implemented. After the development is constructed and the units are occupied, the project applicant should identify a TDM coordinator for each of the two apartment buildings. It is assumed that the property manager for the project will be responsible for implementing the ongoing TDM measures. If the TDM coordinator changes for any reason, the City and residents should be notified of the name and contact information of the new designated TDM coordinator.

The TDM program will need to be re-evaluated annually for the life of the project. The project will conduct parking occupancy surveys in the parking garages within each building to monitor the parking demand. If it is determined that parking reduction is not being achieved (i.e., the on-site parking garages reach full capacity), additional TDM measures would need to be introduced to

ensure that the parking is being addressed by the project without the burden being placed on outside entities. In addition, an annual survey should be administered to all residents. The survey will provide information on what modes residents are using to travel to work, and what TDM programs they have found most useful.

Conclusions

The TDM measures recommended for the project complement the attributes of the site location, the site design, and on-site amenities. Such measures encourage walking, biking, and use of transit. The main purpose of the proposed TDM plan for the proposed residential development is to reduce the demand for on-site parking and thereby reduce project trips.

As part of the TDM plan, the unbundled parking spaces should be priced to avoid tenants parking on the streets or within the nearby paid public lots. Therefore, it can be concluded that the proposed parking reduction will not adversely affect the surrounding area, and the project will not rely upon or reduce the public parking supply.

With the implementation of the TDM measures, the project would be able to meet the parking demand generated by the tenants/residents.
