Project Description: (please use a separate page if necessary)

The Lockhart Solar PV II Project (Project) includes development of a utility scale, solar photovoltaic (PV) electricity generation and energy storage facility that would produce up to 150 megawatts (MW) of solar power and include up to 4 gigawatt hours (GWh) of energy storage capacity rate in a battery energy storage system (BESS) on approximately 690 acres of land. The Project is bordered on the south by the approved Lockhart Solar I Facility. The Project would share operations and maintenance facilities (i.e., O&M building, warehouse and employee building), water and septic systems, as well as switchyard and electrical transmission infrastructure, and a new collector substation to be constructed within the Lockhart Solar I Facility site to connect the Project to the existing transmission line which runs to the SCE-owned Kramer Junction substation.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
