Project Description (Proposed actions, location, and/or consequences).

1. A Tentative Parcel Map to divide approximately 10 gross acres into four lots and a remainder lot.
2. A Design Review to comply with the Countywide Design Guidelines.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project does not have any potentially significant effects; however, mitigation has been included to further reduce the likelihood of project-related impacts to plant and wildlife species.

Species surveys have been required as mitigation measures to ensure that construction will not result in nest abandonment for Swainson's hawk, nesting raptors, and migratory birds.

Compensatory replacement plantings have been added as mitigation measures to ensure that any non-native or native trees will be replanted on site.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
