Dear Mr. Salazar:

The California Department of Fish and Wildlife (Department) has reviewed the Mitigative Negative Declaration for the above-referenced project (Project). The Department's review of this Project is pursuant to our role as the State's trustee and responsible agency for fish and wildlife resources under the California Environmental Quality Act, California Public Resources Code section 21000 et seq. The Project *"is a truck yard and distribution facility consisting of a 5,936-square-foot cross-dock distribution terminal with docking for 18 semi-trucks including approximately 290-square-feet of office space, an outdoor storage area that would accommodate at least six tractors, ten 28-foot trailers, two 48-foot trailers, and three 53-foot trailers, onsite water well, onsite wastewater treatment system, employee parking, landscaping along the project frontage, trash enclosure, building sign, and screened fencing with automated gates. The truck yard and distribution facility would be surfaced with asphalt paving except at the loading docks which would be paved with a concrete apron. Other road and road frontage improvements would be constructed as part of the project, including road widening, curb gutter and sidewalk, and street lighting (some road and/or frontage improvements may be deferred pending future annexation)."* The Department commented on this Project on May 13, 2021 via electronic mail. Based on the mitigation measures incorporated into the Project, the Department has no comment. If the Project description changes in any way or additional biological resource information becomes available, the Department should be notified and provided an opportunity to offer comments regarding the updated information.

If you have any further questions or comments, please feel free to contact me.

Thank you,

Amy Henderson
