

# NOTICE OF AVAILABILITY OF DRAFT ENVIRONMENTAL DOCUMENT (INITIAL STUDY) AND INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION FOR PG&E'S NAPA BUNDLE NORTHERN CORRIDOR GAS PIPELINE MAINTENANCE PROGRAM

The California Department of Transportation (**Caltrans**) has prepared an Initial Study with Proposed Mitigated Negative Declaration (IS-MND) pursuant to the California Environmental Quality Act for consideration of Pacific Gas & Electric Company's proposal to construct the Napa Bundle Northern Corridor Gas Pipeline Maintenance Program (proposed project).

## WHAT'S BEING PLANNED?

The proposed project would perform pipeline strength tests, replace transmission pipeline, and install distribution pipeline within an 8-mile stretch between post miles 27.4 to 35.5 on State Route 29. The project is needed to assess and ensure the safety of the pipeline installed in 1930 between the cities of St. Helena and Calistoga, and improve the transmission and distribution system's capacity to meet projected increases in demand for natural gas.

## WHY THIS AD?

Caltrans has prepared the IS-MND to explain why the proposed project would, with mitigation, have less than significant impacts on the environment. This public notice is to inform you that an IS-MND has been prepared and is now available for review during the public comment period. A virtual public meeting will be held for the project.
