State Water Resources Control Board General Permit for vineyard properties, Napa River Watershed. For road systems on parcels that fall under this permit, the Water Board requires the following:

- All roads with surface type and stream crossing type must be mapped
- All culverted stream crossings, on unpaved roads, must have reduced plug potential
- All culverted stream crossings, on unpaved roads, must have reduced diversion potential
- No greater that 25% of the total unpaved road mileage can be draining to the stream system

No unpaved roads exist on the parcel. RCD finds the following 'Action Item(s)' need to be implemented to meet the Water Board compliance.

- Map showing the paved road and stream crossing type.

Thank you,

A handwritten signature in blue ink that reads "Bill Birmingham".
