EXECUTIVE SUMMARY

Roux Associates, Inc. (Roux Associates) has performed a Phase I Environmental Site Assessment (Phase I ESA) and a Phase II Subsurface Investigation (Phase II) of real property consisting of three parcels making up approximately 0.4-acres at 1346, 1350, and 1354 West Court Street, Los Angeles, California (Site, Figures 1 and 2). The Phase I ESA is intended to define the historical uses of the Site and identify any potential Recognized Environmental Conditions (RECs) for the Site, as defined by American Society of Testing and Materials' (ASTM) International Standard Practice E1527-13. The Phase II was intended to address RECs at the Site and help to identify and define potential mitigation and/or remediation that may be needed to allow for Site redevelopment.

Based on the findings of the Phase I ESA, Roux Associates identified the following RECs in connection with the Site:

- According to the Sanborn maps and Division of Oil, Gas, and Geothermal Resources (DOGGR) records up to four oil production wells have been located on the Site from as early as the early-1940s. Three of the historic oil and gas wells (APIs: 03725986, 03725989, and 03725059) are reported to be “buried/idle.” Furthermore, it is possible that these wells were never plugged or properly abandoned. The fourth well (API: 03719064), located on the Site’s central parcel, was plugged on February 4, 2005, and DOGGR conducted a surface inspection and approved its abandonment on November 17, 2006.
- There was a potential for the presence of piping and other subsurface infrastructure associated with historic on-Site oil and gas operations. During the Site reconnaissance, Roux Associates observed exposed steel piping throughout portions of the western and central parcels, including a raised steel piping structure located on the extreme southwestern portion of the Site. Due to incomplete documentation, the extent and condition (i.e. leaks) of the piping and other subsurface infrastructure at the Site is unknown.
- There was a potential for the presence of oil storage, pretreatment, and/or processing equipment associated with historic on-Site oil production operations. The California State Mining Bureau’s map of the Los Angeles City Oil Field, shows up to four tanks located on-Site (Appendix A). Sanborn fire insurance maps and aerial photographs from 1950 to

2002, indicate that an oil tank was located on the Site's central parcel. In addition, South Coast Air Quality Management District (SCAQMD) records identify an 80-barrel storage/shipping tank with three 55-gallon wastewater oil/water separators located on-Site. Records obtained from the City of Los Angeles Bureau of Sanitation reference a three-drum clarifier for wastewater located next to a 2,500-gallon holding tank.

- There was a potential for the presence of undocumented fill soils which may contain metals or other contaminants at concentrations above background or published action levels for residential development.

In order to investigate the RECs for the Site, Roux Associates implemented a Phase II, which included multi-depth soil and soil gas investigation in May 2016. Based on the results of the Phase I and Phase II investigation for the Site, the following are our conclusions:

- Total petroleum hydrocarbons (TPH) were not detected in the soil collected from the Site. In soil gas, low detections of TPH were found in two samples collected, which were not in the vicinity of the confirmed oil wells. Methane was not detected in the soil gas samples.
- Low concentrations of volatile organic compounds (VOCs) were detected in both the soil and soil gas, below all available regulatory guidelines. One low concentration of 4,4'-dichlorodiphenyldichloroethylene (DDE) was detected in shallow soil, below all regulatory guidelines.
- Elevated concentrations of lead were detected in concentrations exceeding Department of Toxic Substances Control (DTSC) risk levels of 80 milligrams per kilogram (mg/kg) in three locations. Sampling during grading activities associated with the future development of the Site is recommended to characterize the soil being transported off-Site during and confirm that no elevated concentrations remain on the Site.
- Although sampling in the vicinity of the two oil production wells identified during the geophysical survey did not indicate impacts from the well operations, the three oil production wells identified on the Site by DOGGR should be located, as needed, and abandoned to current DOGGR Standards prior to Site redevelopment. Two of the four oil wells registered with DOGGR, could not be located during the geophysical, possibly due

to inaccessible areas of the Site and interference from chain-link fencing. Prior to Site development, these wells, if they are located on Site, and all related piping associated with oil production, if any, will need to be abandoned under current DOGGR guidelines or removed, as necessary.

1.0 INTRODUCTION

On behalf of 1300 Court Partners, LLC (1300 Court), Roux Associates, Inc. (Roux Associates) performed a Phase I Environmental Site Assessment (Phase I ESA) and Phase II Subsurface Investigation (Phase II) of real property associated with Assessor's Parcel Numbers (APNs) 5160-011-008 (western parcel), 5160-01-009 (central parcel), and 5160-01-010 (eastern parcel) (Site, Figures 1 and 2). The Site is approximately 0.4 acres in size and is located at 1346, 1350, and 1352 West Court Street, Los Angeles, California. The future use of the Site is a planned multi-family complex.

The Phase I ESA/Phase II was conducted in accordance with the scope of work in the contract between Roux Associates and 1300 Court on May 2, 2016, and in general accordance with the American Society of Testing and Materials' (ASTM) International Standard Practice E1527-13 (Standard Practice for Environmental Site Assessments), consistent with the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) Rule (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule¹). The preamble for the AAI Rule states:

In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.²

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields

¹ Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and <https://federalregister.gov/a/2013-31112>.

² Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.

Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.” EPA made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.³

The purpose of the Phase I ESA was to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Site. ASTM Standard Practice E1527-13 defines RECs as:

...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

ASTM Standard Practice E1527-13 provides that identified RECs can be evaluated and classified into Controlled Recognized Environmental Conditions (CRECs) or Historical Recognized Environmental Conditions (HRECs) based on the following definitions. ASTM Standard Practice E1527-13 defines a CREC as:

...a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

ASTM Standard Practice E1527-13 defines a HREC as:

...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

³ Federal Register: December 30, 2013 (Volume 78, Number 250).

In order to assess the potential for RECs associated with the Site, Roux Associates utilized a variety of information sources to perform the Phase I ESA, including a radial information search from federal, state, and local regulatory agency databases; Freedom of Information Act (FOIA)/Public Records Act (PRA) request responses from state and local regulatory agencies; and readily available information from historical aerial photographs, historical topographic maps, historical Sanborn fire insurance maps, city directories, and other published sources, as detailed throughout the Report. Mr. Roger Phillips, key Site manager for KW Commercial Brokerage (KW), was interviewed as a knowledgeable representative for the Site. Mr. Bill McReynolds of DB Companies was interviewed as the User of the Phase I ESA. Owners of the Site were also interviewed. The historical research and interviews were conducted to develop an understanding of the following:

- Current and past uses of the Site;
- Current and past uses of hazardous substances and/or petroleum at the Site, if any;
- Waste management and disposal practices that might have potentially caused releases or threatened releases of hazardous substances and/or petroleum products at the Site;
- Current and past corrective actions and response activities undertaken to address past and ongoing releases of hazardous substances and/or petroleum products at the Site, if any;
- The existence of any engineering and/or institutional controls recorded for the Site; and
- Current and past uses of adjoining properties that could have resulted in releases or threatened releases of hazardous substances and/or petroleum products to the Site.

Mr. Mauricio Escobar, served as the Environmental Professional who conducted the Phase I ESA. Mr. Escobar possesses sufficient specific education, training, and experience to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases, as defined in 40 CFR §312.1(c) on, at, in, or to a Site, sufficient to meet the objectives and performance factors in 40 CFR §312.20(e) and (f). The resume is provided in Appendix N.

2.0 METHODS OF INVESTIGATION

The methods of investigation used to conduct the Phase I ESA are outlined below.

2.1 General

The activities performed in conjunction with the Phase I ESA for the Site include:

- Review of federal, state, and local environmental regulatory agency databases provided by Environmental Data Resources, Inc. of Milford, Connecticut (EDR), indicating locations of environmental concern within specified radii from the Site (Appendix F);
- Submission of FOIA requests/PRA requests and inquiries to federal, state, and local regulatory agencies (Appendix G);
- Review of historical information for the Site and surrounding area;
- Reconnaissance of the Site and surrounding area; and
- Interview with the key Site manager.

2.2 Review of Readily Available Information

The resources compiled and reviewed by Roux Associates to date include the following:

- The EDR Aerial Photo Decade Package (Appendix B);
- The Certified Sanborn® Map Report (Appendix C);
- The EDR Historical Topographic Map Report (Appendix D);
- The EDR City-Directory Abstract (Appendix E);
- The EDR Radius Map™ with GeoCheck® (Appendix F); and
- Client-provided materials including a Phase I ESA conducted by E2ManageTech (E2) on behalf of the Los Angeles Bureau of Sanitation (LASAN).

The agencies contacted during the records review are provided below (Section 5.1; Appendix H):

Agency	Status
South Coast Air Quality Management District (SCAQMD), including online Facility Information Detail (FIND) files	Online database queried on April 28, 2015. PRA response was received on April 29, 2016 (Appendix G2).
Department of Toxic Substances Control (DTSC) Cypress and Chatsworth Offices, including online Envirostor and Hazardous Waste Tracking System (HWTS) files	Online database queried on April 19, 2016. PRA response received on April 19, 2016 (Appendix G1).

Agency	Status
Los Angeles Building & Safety Services Department (LADBS), including online Parcel Profile Report	Online database queried on May 19, 2016. Files reviewed at the counter on April 21, 2016 (Appendix G3).
Los Angeles County Department of Public Works (LADPW)	Response received via email on April 19, 2016 (Appendix G1).
Los Angeles County Department of Sanitation (LACSD)	Response received via email on April 20, 2016 (Appendix G1).
Los Angeles County Public Health Department (PHI)	Response received on April 29, 2016 (Appendix G1).
Division of Oil, Gas, and Geothermal Resources (DOGGR) including online Well Finder files.	Online database queried on April 10, 2016. PRA response received on April 19, 2016 (Appendix G4).
Los Angeles County – Regional Water Quality Control Board (LA-RWQCB), including online Geotracker files	Response received on April 28, 2016 (Appendix G1).
City of Los Angeles Department of Public Works	Files received on April 19, 2016 (Appendix G5).
Los Angeles City Fire Department (LAFD) Hazardous Materials Division	Files received on April 22, 2016 (Appendix G6).
LAFD Underground Storage Tank (UST) Division	Response received on April 29, 2016 (Appendix G1).

2.3 Site and Surrounding Area Reconnaissance

Pursuant to ASTM Standard Practice E1527-13, Roux Associates conducted a reconnaissance of the Site and surrounding area on April 21, 2016, to identify, investigate, and assess potential RECs and other potential environmental concerns. The reconnaissance included observation of the Site, including all structures and buildings, and surrounding area to determine the current use and condition of the Site, indications of past uses of the Site, and current uses of adjoining properties and the surrounding area. During the Site reconnaissance, Roux Associates placed particular emphasis on identifying the following features, if present, in accordance with ASTM E1527-13:

- Hazardous substances and petroleum products in connection with identified uses;
- Storage tanks;
- Odors;
- Pools of liquid;

- Drums;
- Hazardous substances and petroleum products containers;
- Unidentified substance containers;
- Polychlorinated biphenyls (PCBs);
- Heating and cooling systems;
- Stains or corrosion;
- Drains and sumps;
- Pits, ponds, or lagoons;
- Stained soil or pavement;
- Stressed vegetation;
- Solid waste;
- Waste water;
- Wells; and
- Septic systems.

In addition, Roux Associates observed the general topographic setting of the Site and inquired into the source of potable water for the Site and other utilities, as presented in Section 6. Roux Associates did not conduct a visual inspection for asbestos-containing material (ACM) or lead-based paint (LBP) in the on-Site buildings; though it should be noted that this environmental area is considered “out-of-scope” under ASTM E1527-13. Photographs from the Site reconnaissance are presented in Appendix I.

2.4 Interview with Key Site Manager

On April 21, 2016, Mr. Roger Phillips, with KW, was questioned with regards to his involvement and knowledge of the Site (Section 7.1).

3.0 PROPERTY DESCRIPTION

Descriptions of the Site and surrounding properties are included below. Figure 1 presents the location of the Site in the general context of the City of Los Angeles (Section 3.1). The Site plan and surrounding properties are presented in Figure 2.

3.1 Property Location and Description

The Site is approximately 0.4 acres in size and consists of three separate parcels (APNs 5160-011-008, -009, -010). The Site is located on the south side of West Court Street, at the intersection of Douglas Street and West Court Street. The Site is in a residential area. Residential properties are located to the northeast across West Court Street, northwest across the intersection of West Court Street and Douglas Street, and southeast. A recreation center is located to the southwest, across Douglas Street.

The Site is currently occupied by three separate parcels. Two single-family homes occupy the eastern parcel. The central and western parcels to the west are vacant lots. The Site is residential and is occupied. Development in the general vicinity of the Site is residential.

3.2 Current Surrounding Property Usage

Table 1 provides details on surrounding property uses adjacent to the Site.

North and Northeast	West Court Street, the area across the street is developed with multi-family apartments (1355 West Court Street)
East	Single-family residences (1336 West Court Street)
South	Single-family residences (1359-1363 Colton Street)
West and Southwest	Echo Park Deep Pool (1419 Colton Street), an indoor pool and recreation center

3.3 Topographic and Hydrogeologic Setting

According to the U.S. Geological Survey (USGS), Hollywood, (1991, photorevised 1981) California 7.5-minute topographic map, the eastern and central parcels of the Site are located at an elevation of approximately 400 feet above mean sea level (amsl). The western parcel of the Site is located at an elevation of approximately 390 feet amsl. Site topography is steep with slope to the

west. The nearest significant surface water body and National Wetland is Echo Lake, located over a half-mile to the northwest of the Site. According to EDR Radius Map Report (Appendix F), the Site is not located in a 500-year or 100-year flood zone.

3.4 Summary of Previous Environmental Investigation

E2 conducted a Phase I ESA at the Site. E2 identified the former oil production activities as a REC. Specifically, E2 found references to four historical oil and gas production wells on the Site. One of the wells (API: 03719064) on the eastern parcel was designated as ‘plugged’ by the DOGGR. According to DOGGR records, this well was abandoned in 2005. Three ‘buried’ wells (APIs: 03725986, 037525989, and 03725059) were also reported to be on the Site. No abandonment records were found for these ‘buried’ wells.

During Site reconnaissance, E2 found a 2-inch-diameter piece of pipe protruding from the subsurface on the southern portion of the central parcel. E2 concluded that the piping may have been used as a “collection line or ventilation line for the oil production by one or more of the on-Site wells.”

E2 recommended that any potential purchaser of the Site perform additional work, including a geophysical survey in order to identify remaining underground facilities or piping related to historical oil production; evaluate historical on-Site wells with respect to the City of Los Angeles Methane Ordinance and DOGGR well abandonment requirements; potentially perform soil gas sampling with respect to methane; and perform shallow soil sampling across the Site for total petroleum hydrocarbons (TPH), semi-volatile organic compounds (SVOCs), and Title 22 Metals in order to determine the presence and extent of any subsurface impacts.

4.0 SITE HISTORY

The historical uses of the Site and surrounding properties were researched with historical aerial photographs (Appendix B); historical Sanborn fire insurance maps (Appendix C); historical topographic maps (Appendix D); city directories (Appendix E); and an interview with Mr. Roger Phillips with Keller Williams. Throughout their history, the Site's three adjoining parcels were developed for various oil and gas production and/or residential uses.

Currently, the western and central parcels are vacant, and the eastern parcel is developed with two single-story, single-family residential homes.

4.1 Historical Aerial Photographs

Historical aerial photographs were obtained from EDR for the years 1923, 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2010 and 2012, and are presented in Appendix B. The following is a summary of the Site and surrounding property usage, as determined from the aerial photograph review.

Table 2.2 Historical Aerial Photographs	
Date	Description
1923	The Site is developed with two residential structures on the eastern parcel. The central and western parcels are undeveloped. The area to the southeast of the Site has multiple residential homes. To the southwest, northeast, and northwest are undeveloped.
1928	The Site and the surrounding areas are not clearly visible in the aerial photograph. There appears to be little change on the Site and the surrounding areas from the 1923 photograph.
1938	There is little change on the Site and the surrounding areas from the 1928 photograph.
1948	There is little change on the Site and the surrounding areas from the 1938 photograph.
1952	There is little change on the Site from the 1948 photograph. An additional residential structure is located to the southwest. There is little change on the remaining surrounding areas from the 1948 photograph.

**Table 2.2
Historical Aerial Photographs**

Date	Description
1964	<p>There is little change on the Site from the 1952 photograph.</p> <p>Additional residential structures are located to the southeast and northwest. The area to the southwest is graded. There is little change on the remaining surrounding areas from the 1952 photograph.</p>
1970	<p>There is little change on the Site from the 1964 photograph.</p> <p>Additional residential structures are located to the southeast and northwest. A large structure is located to the northwest. There is little change on the remaining surrounding areas from the 1964 photograph.</p>
1977	<p>A small structure can be seen on the central parcel in addition to the structures on the eastern parcel of the Site.</p> <p>There is little change to the surrounding areas from the 1970 photograph.</p>
1983	<p>There is little change on the Site from the 1977 photograph.</p> <p>A large structure is constructed to the southwest. There is little change on the remaining surrounding areas from the 1977 photograph.</p>
1989	<p>Much of the vegetation on the central and western parcels of the Site has been removed.</p> <p>There is little change to the surrounding areas from the 1983 photograph.</p>
1994	<p>There is little change on the Site from the 1989 photograph.</p> <p>There is little change to the surrounding areas from the 1989 photograph.</p>
2002	<p>There is little change on the Site from the 1994 photograph.</p> <p>A large multi-family complex is located to the northeast. There is little change on the remaining surrounding areas from the 1994 photograph.</p>
2005	<p>There is little change on the Site and the surrounding areas from the 2002 photograph.</p>
2009	<p>There is little change on the Site and the surrounding areas from the 2005 photograph.</p>
2010	<p>There is little change on the Site and the surrounding areas from the 2009 photograph.</p>
2012	<p>There is little change on the Site and the surrounding areas from the 2010 photograph.</p>

4.2 Historical Sanborn Maps

Certified Sanborn Maps were obtained from EDR for the years 1890, 1894, 1906, 1950, 1953, 1954, 1957, 1960, 1964, 1965, 1968 and 1970, and are presented in Appendix C. The following is a summary of the Site and surrounding property usage, as determined from the Sanborn Map review.

Table 2.1 Certified Sanborn Maps	
Date	Description
1890	The Site is bordered by Waters Street to the southwest, West Court Street to the northeast and northwest, an alley and additional parcels to the southeast. A residence is located on the central portion of the western parcel. The immediately surrounding areas are either vacant or residential.
1894	An oil production well and a residence are located on the western parcel of the Site. Development in the surrounding areas remains relatively unchanged except for a change in name of the street to the west of the Site from Waters Street to Douglas Street and oil production wells and associated tanks located south of the Site.
1906	There is little change on the Site from the 1894 map. The surrounding areas are primarily vacant except for a machinery storage building south of the Site.
1950	An oil well and tank are developed on the central parcel. Two residential structures are located on the eastern parcel. One residence is located on the western parcel. The oil well derrick located on the 1906 map is no longer on-Site. Residential developments are located south and northwest of the Site. Additionally, new oil production wells are located to the west and north of the Site.
1953	There is little change on the Site and the surrounding areas from the 1950 map.
1954	There is little change on the Site and the surrounding areas from the 1953 map.
1957	There is little change on the Site and the surrounding areas from the 1954 map.
1960	Two residential structures are located on the eastern parcel. An oil production well and associated tank are located on the central parcel. There is little change to the surrounding areas from the 1957 map.
1964	There is little change on the Site and the surrounding areas from the 1960 map.
1965	There is little change on the Site and the surrounding areas from the 1964 map.
1968	There is little change on the Site and the surrounding areas from the 1965 map.
1970	There is little change on the Site and the surrounding areas from the 1968 map.

4.3 Historical Topographic Maps

Historical topographic maps of the Site were obtained from EDR for 1894, 1896, 1900, 1928, 1953, 1966, 1972, 1981, 1991, 1994, and 2012 and are presented in Appendix D. The topographic maps corroborate the reported general development of the Site and surrounding area, as shown in the historical aerial photographs.

4.4 City Directory Search

A city directory abstract of the Site was obtained from EDR and is presented in Appendix E. The directories searched between 1920 and 2013 indicate that the listings associated with the Site and the adjacent properties were residential.

5.0 RECORDS REVIEW

Roux Associates used a computerized environmental database and radius map report prepared by EDR to conduct a government records database search of properties of potential environmental concern within a one mile radius of the Site. A total of 107 environmental databases were reviewed as part of this Phase I ESA. Appendix F contains a complete copy of the EDR Radius Map™ with GeoCheck®. A summary of the pertinent results is provided in Tables 3.1 and 3.2. Table 3.1 tabulates all of the search results with at least one environmental database entry. There are no Federal National Priorities List (NPL) or Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) facilities (RCRA-TSDF) listed within a mile radius of the Site.

Table 3.1 Properties of Potential Environmental Concern from EDR Radius Map Report

The remainder of the discussion concerning review of environmental databases has been restricted to entries located less than one eighth of a mile from the Site (Table 3.2).

Table 3.2 Properties of Potential Environmental Concern <1/8 Mile from Site From EDR Radius Map Report		
Address	Property Listing	Database
200 North Glendale Boulevard	Budget Auto	RCRA-SQG
200 Glendale Boulevard		EDR Hist Auto
202 Glendale Boulevard	White A A	EDR Hist Auto
174 Glendale	G.C. Hewitt Company	SWEEPS UST
174 Glendale	G.C. Hewitt Company	HIST UST
174 Glendale	G.C. Hewitt Company	CA FID UST
174 Glendale	G.C. Hewitt Company	RCRA-SQG
174 Glendale	G.C. Hewitt Company	ENVIROSTOR
174 Glendale	G.C. Hewitt Company	UST
185 North Glendale Boulevard	Independent Auto Works	RCRA-SQG
185 North Glendale Boulevard	Independent Auto Works	EDR Hist Auto
152 North Toluca Street	Bruce Manley	SWEEPS UST
152 North Toluca Street	Bruce Manley	CA FID UST
213 Glendale Boulevard	J & A Autobody	EDR Hist Auto

The EDR Radius Map Report identified seventeen entries and eight distinct addresses for properties, appearing in environmental databases within one eighth of a mile from the target property. No entries were found for the Site. For each listing, EDR reports whether a property is located topographically upgradient or downgradient relative to the Site (Appendix F). The pertinent information concerning Table 3.2 is summarized in the bullet points below, which groups listings based on property address, former uses, and topographic relation to the Site:

- Budget Auto located at 200 North Glendale Boulevard is listed in the RCRA Small Quantity Generator (RCRA-SQG) database. The facility is listed as a hazardous waste handler for less than 1000 kilograms (kg) of hazardous waste during any calendar month. This property is located downgradient of the Site. Impacts to the Site from this property are not anticipated.

- G.C. Hewitt Company (174 Glendale Boulevard) is listed in databases associated with a UST (SWEEPS UST, HIST UST, CA FID UST, UST) as well as the RCRA-SQG and Envirostor databases. The facility is listed as a hazardous waste handler for less than 1000 kg of hazardous waste during any calendar month. The Envirostor listing is classified as historical. A “no further action” was issued by DTSC in 1994. This property is located downgradient. Impacts to the Site from this property are not anticipated.
- Independent Auto Works (185 North Glendale Boulevard) is listed on the RCRA-SQG and the FINDS database. The facility is listed as a hazardous waste handler for less than 1000 kg of hazardous waste during any calendar month. This property is located downgradient of the Site. Impacts to the Site from this property are not anticipated.
- Bruce Manley (151 North Toluca Street) is listed in the SWEEPS UST and CA FID UST databases. There has been no record of any leaks from the potential UST(s) on the property. This property is located downgradient of the Site. Impacts to the Site from this property are not anticipated.
- J & A Autobody (213 Glendale Boulevard) is listed in the EDR Historical Auto database. An automotive body shop has been located on the property from at least 1999 through 2012. No other information or indication of leaks or spills is included in the database listings. This property is located downgradient of the Site. Impacts to the Site from this property are not anticipated.

5.1 FOIA/Public Records Act Request Responses

FOIA/PRA requests for the Site were submitted to federal, state, and local regulatory agencies (Section 2.2, Appendix G1). Information obtained from all agency correspondence, including online database records, is summarized below.

South Coast Air Quality Management District (SCAQMD)

A Facility ID associated with the Site was found on the SCAQMD online database, FIND. The SCAQMD emailed Roux Associates on April 28, 2016 and the records associated with the Site identify an 80-barrel storage/shipping tank with three 55-gallon wastewater oil/water separators located on-Site (Appendix G2)

Department of Toxic Substances Control (DTSC)

No records associated with the Site were found on DTSC's online database Envirostor. No records associated with the Site were found on the HWTS, an additional DTSC database maintained online. DTSC's PRA responses from both the Cypress office and the Chatsworth office on April 19, 2016, indicated that there were no files associated with the Site (Appendix G1).

Los Angeles City Building & Safety Services Department (LADBS)

Roux Associates visited the City of Los Angeles on April 21, 2016, and reviewed records related to the Site (Appendix G2). Pertinent information from files obtained at LADBS is summarized below:

- Building records show that at least two residential structures have existed on northern and southern portions of the Site's eastern parcel, respectively, from approximately 1913 to present.
- Building records show two structures, including one residential dwelling, were removed from the Site between 1956 and 1957. Since that time, the western parcel has not been redeveloped.

In March 2004, the City of Los Angeles passed Ordinance No. 175790 requiring the assessment and protection of buildings located within delineated "methane hazard zones" and "methane buffer zones." In accordance with the Ordinance (Section 91.7103 - General Methane Mitigation Requirements), "all new buildings and paved areas located in a Methane Zone or Methane Buffer Zone shall comply with these requirements and the Methane Mitigation Standard established by the Superintendent of Building." Further, "additions, alterations, repairs, or changes of use or occupancy to existing buildings" may trigger the application of the Methane Mitigation Standard (Section 91.7105 - Existing Buildings). Under the Standard, on-site methane testing and/or methane mitigation measures may be warranted or required to protect new and/or existing buildings, or paved areas, from potential methane hazards. According to a parcel profile report from the LABSD, generated on May 19, 2016, the Site is located within a Methane Hazard Zone (Appendix G3).

Los Angeles County Department of Public Works (LADPW)

On April 19, 2016, Mr. Ian Galvin of LDPW informed Roux Associates that no records were available for the Site (Appendix G1).

Los Angeles County Public Health Investigations (PHI)

On April 29, 2016, PHI, indicated that there were no records associated with the Site (Appendix G1).

Division of Oil, Gas, and Geothermal Resources (DOGGR)

Roux Associates queried the online database maintained by DOGGR and made a PRA request on April 19, 2015 (Appendix G5). Online records show the following pertinent information:

- Records depict at least four historical oil and gas wells on-Site, two of which are mapped on northern (API: 03725986) and southern (API: 03725989) portions of the western parcel, respectively. The status of the wells located on the western parcel is “buried/idle,” and no additional information about the wells is known.
- Beginning from at least 1942, the central parcel had one actively producing oil well (API: 03719064) under various names and ownership. This well was plugged on February 4, 2005, and DOGGR conducted a surface inspection and approved its abandonment on November 17, 2006.
- A report of property and well transfer from 1997 suggests that one of the wells (API: 03725059) may actually be located on the eastern parcel, but the true location of the well is unconfirmed.

Los Angeles Regional Water Quality Control Board (LA-RWQCB)

No records associated with the Site were found on the State Water Resources Control Board (SWRCB) online database, GeoTracker. In addition, the LA-RWQCB, emailed Roux Associates on April 28, 2016, that there were no records associated with the Site (Appendix G1).

City of Los Angeles Department of Public Works

Mr. Enrique C. Zaldivar of the Environmental Management Division of the LADPW sent Roux Associates all files associated with the Site. Records referenced a three-drum clarifier for wastewater located next to a 2,500-gallon holding tank (Appendix G4).

City of Los Angeles Fire Department (LAFD)/Hazardous Materials Division

On April 19, 2016, LACFD, gave Roux Associates records indicating that chemicals including wastewater and crude oil were present on-Site (Appendix G6).

City of Los Angeles Fire Department (LAFD)/Underground Storage Tank (UST) Division

On April 22, 2016, LACFD, indicated that there were no records associated with the Site (Appendix G1).

6.0 SITE RECONNAISSANCE

Roux Associates conducted a Site reconnaissance on April 21, 2016, assisted by Mr. Bill McReynolds of DB Companies and Mr. Roger Phillips of Keller Williams. The three parcels are owned by three separate entities. The parcel associated with addresses 1346 and 1348 West Court Street has two single-family residences on the premises. The parcels associated with 1350 and 1352 West Court are currently vacant lots.

Mr. Phillips indicated that the residence on the northern portion of the parcel at 1346 and 1348 West Court Street is occupied by the owner of the parcel. The home on the southern portion of the parcel is occupied by a tenant of the owner.

The two parcels on the Site that are vacant have a chain-link fence around the perimeter. There is open access to the property from West Court Street. Refuse was observed during Site reconnaissance. Multiple trees including eucalyptus and palm appear to have been on the Site for an extended time. Much of the Site is overgrown with vegetation. An approximately 5-inch diameter steel pipe runs from outside of the chain link fence to inside the fence on the southwestern portion of the Site (Appendix I, Photograph 3). Additionally, an approximately 2-inch diameter pipe daylights vertically on the southcentral portion of the Site (Appendix I, Photograph 4). A non-functioning electrical conduit is located in the vicinity of the pipe (Appendix I, Photograph 5).

Neither Mr. Phillips nor Mr. McReynolds were aware of the historical oil production operations that had taken place on the Site, or had any other specific knowledge on the Site's history.

6.1 Utilities

Utilities are provided by the Los Angeles Department of Water and Power.

6.2 Hazardous Substances

At the time of the Site reconnaissance, Roux Associates observed that approximately 0.5 gallon container of motor oil on the Site (Appendix I, Photograph 6).

6.3 Polychlorinated Biphenyls

Roux Associates did not observe any transformers on the Site.

6.4 Staining and Stressed Vegetation

Stained and stressed vegetation were not observed in the vegetated areas across the Site.

6.5 Drains and Sumps

A drain was observed adjacent to a small block wall approximately two feet in height on the southwestern corner of the Site. The drain appears to divert runoff from the Site to the public right-of-way.

6.6 Solid Waste

Burrtec Waste Industries reportedly provides municipal solid waste collection for the Site.

6.7 Wastewater

Industrial wastewater is not generated on the Site.

6.8 Wells

No wells were observed at the Site. According to the EDR Physical Setting Source Summary (Appendix F), no federal public water supply system information is available for the Site. The nearest well is reportedly located a quarter of a mile to the north-northwest of the Site. There are reportedly 12 private wells located up to a mile from the Site.

7.0 INTERVIEWS AND USER PROVIDED INFORMATION

Roux Associates interviewed a key Site manager and reviewed a completed questionnaire provided by the User as part of this Phase I ESA. Information obtained from these sources was detailed throughout this report. Pertinent findings from these sources are summarized in Sections 7.1 and 7.2. The completed User Questionnaire is provided in Appendix J.

7.1 Interviews

Roux Associates contacted the following key Site managers regarding the Site during the completion of this Phase I ESA:

- On April 21, 2016, Mr. Roger Phillips, with KW, was questioned with regards to his involvement and knowledge of the Site. Mr. Phillips had knowledge of an oil well on the Site, but no specific information regarding the well.
- On April 20, 2016, Ms. Kathryn Best, owner of 1346 West Court Street, was questioned with regards to her involvement and knowledge of the Site. Ms. Best had knowledge of an oil well on the Site, but no specific information regarding the well.
- On April 20, 2016, Mr. David Kerr, trustee of 1350 West Court Street, was questioned with regards to his involvement and knowledge of the Site. He had no knowledge of any environmental concerns that would lead to contamination of the Site.
- On April 20, 2016, Ms. Rozelle Predmore, owner of 1352 West Court Street, was questioned with regards to her involvement and knowledge of the Site. Ms. Predmore had knowledge of an oil well on the Site, but no specific information regarding the well.

7.2 User Questionnaire

Mr. Bill McReynolds, with DB Companies, who had no prior involvement with the Site, completed Roux Associates' questionnaire. Mr. McReynolds answered the following, to the best of his knowledge:

- No environmental cleanup liens exist in connection with the Site;
- No activity and land use limitations are in place at the Site;
- No specialized, personal knowledge or experience is related to the Site or nearby properties, other than the fact that the User is involved in the same line of business as the previous Site owner;
- The purchase price of the Site fairly reflects the fair market value of the Site;
- No commonly known or reasonably ascertainable information is known about the Site, other than the information provided in the Phase I ESA, herein; and

- No knowledge of obvious indicators suggests the presence of contamination at the Site.

8.0 PHASE II SUBSURFACE INVESTIGATION

Based on the findings of the Phase I ESA presented in Sections 1 through 7 of this report, Roux Associates identified the following RECs in connection with the Site:

- According to the Sanborn maps and DOGGR records up to four oil production wells have been located on the Site from as early as the early-1940s. As previously discussed, three of the historic oil and gas wells (APIs: 03725986, 03725989, and 03725059) are reported to be “buried/idle.” Furthermore, it is possible that these wells were never plugged or properly abandoned. The fourth well (API: 03719064), located on the Site’s central parcel, was plugged on February 4, 2005, and DOGGR conducted a surface inspection and approved its abandonment on November 17, 2006. The remaining three oil production wells, if confirmed to exist on Site, may need to be abandoned under current DOGGR guidelines.
- There was a potential for the presence of piping and other subsurface infrastructure associated with historic on-Site oil and gas operations. During the Site reconnaissance, Roux Associates observed exposed steel piping throughout portions of the western and central parcels, including a raised steel piping structure located on the extreme southwestern portion of the Site. Due to incomplete documentation, the extent and condition (i.e. leaks) of the piping and other subsurface infrastructure at the Site is unknown.
- There was a potential for the presence of oil storage, pretreatment, and/or processing equipment associated with historic on-Site oil production operations. As previously discussed, the California State Mining Bureau’s map of the Los Angeles City Oil Field, shows up to four tanks located on-Site (Appendix A). Sanborn fire insurance maps and aerial photographs from 1950 to 2002, indicate that an oil tank was located on the Site’s central parcel. In addition, SCAQMD records identify an 80-barrel storage/shipping tank with three 55-gallon wastewater oil/water separators located on-Site (Appendix G2). Records obtained from the City of Los Angeles Bureau of Sanitation reference a three-drum clarifier for wastewater located next to a 2,500-gallon holding tank (Appendix G4).

- The presence of undocumented fill soils which may contain metals or other contaminants at concentrations above background or published action levels for residential development.

In order to investigate the RECs for the Site, Roux Associates implemented a Phase II, which included soil and soil gas sampling as detailed in the Sections that follow.

8.1 Field Implementation

On May 13, 16, and 17, 2016, Roux Associates implemented a multi-depth soil and soil gas investigation. The scope of work, field observations, laboratory results, conclusions, and recommendations are provided in the sections below.

8.2 Scope of Work

Roux Associates' scope of work included an enhanced geophysical investigation to determine the location of any potentially buried/idle wells, historical oil production infrastructure, including subsurface piping, and utilities. The investigation also included the collection of soil and soil gas samples from 10 locations advanced in the western and central parcels (SB-1 through SB-10, Figure 3). Soil and soil gas locations were selected to surround the former oil wells indicated in the DOGGR files and confirmed by the geophysical survey (Appendix K). These oil wells were located on the central portion of the central parcel and under a tree on the northern portion of the central parcel.

8.2.1 Pre-Sampling

Prior to fieldwork, Underground Service Alert of California (USA or "Dig Alert") was notified of intended subsurface work at the Bank of the West parcel at the Site at least 48-hours prior to drilling (Dig Alert Ticket #B61310480, B61310482, and B61310483).

All field activities associated with the investigation were performed in accordance with the Site-specific health and safety plan (HASP). All field personnel participated in a daily health and safety tailgate meeting, which concluded with the signature of the HASP.

8.2.2 Geophysical

On May 13, 2016, Subsurface Surveys of Carlsbad, California, conducted a geophysical survey of proposed drilling locations using ground penetrating radar (GPR) and electromagnetic survey tools to clear locations and for subsurface obstructions. A more extensive survey was conducted to determine the location of any potentially buried/idle wells, historical oil production infrastructure, including subsurface piping. The results of this geophysical are presented in Appendix K. Two oil production wells were identified on the Site, one of which is listed as abandoned by DOGGR. The well listed as abandoned was located on the central parcel, along the border with the eastern parcel. Another potential well location was found beneath a tree, on the northern portion of the central parcel. In addition to the wells, the geophysical found a metal anomaly in the central portion of the Site.

DOGGR lists two additional wells on the Site, one on the eastern parcel and one on the southwestern portion of the western parcel. This geophysical had some limitations including inaccessible areas due to steep terrain and interference from metal fencing around the Site. Given the limitations of this geophysical, Roux Associates could not confirm the existence of the other two wells on the Site, or full extent of historical oil well production materials such as piping, if any, throughout the Site.

8.2.3 Soil and Soil Gas Sampling

On May 16, 2016, Strongarm Environmental Field Services, Inc. (Strongarm) of Norwalk, California, under the direction of Roux Associates, advanced 10 borings (SB-1 to SB-10) at the Site (Figure 3). Borings SB-1 through SB-6 were advanced on the central parcel of the Site. Borings SB-7 through SB-10 were advanced on the western parcel of the Site. Borings SB-3 through SB-6 were placed near the confirmed oil wells.

Soil Sampling Procedures

Soil samples were collected with a track-mounted push-probe drilling rig (Geoprobe® 6620). Each boring was advanced in 4-foot drives with continuous coring or discrete coring to a total depth between 7.5 and 12 feet bgs. Each boring was advanced until refusal was encountered. Soil samples were collected in 1.5 inch acetate sleeves at 1 foot bgs, 5 feet bgs, and the respective terminal depths of each boring, capped with Teflon and held on ice prior to submittal to Jones

Environmental of Santa Fe Springs, California (Jones) for analysis of VOCs by USEPA Method 5035/8260 and TPH by USEPA Method 8015M. Samples collected from 1 foot bgs were analyzed for Title 22 metals by USEPA Method 6010B/7000 and pesticides by USEPA Method 8081. The soil analytical report is included in Appendix M.

Soil Gas Sampling Procedures

Temporary multi-depth soil gas probes (SV-1 through SV-10) were installed across the Site (Figure 3). Soil gas probes were installed at depths of 5 feet bgs and at the terminal depth of each boring (7.5, 8, 10, or 12 feet bgs), and sampled in a manner consistent with the Department of Toxic Substances Control (DTSC), the LA-RWQCB and the San Francisco RWQCB, *Advisory – Active Soil Gas Investigations*, dated July 2015. Probe installation was accomplished using a track-mounted direct push drill rig. Soil gas probes were installed by placing 1/8-inch nylon (Nylaflow) tubing and a slotted screen into the boring. The probes were completed with a one-foot bottom layer of #2/12 filter sand, followed by one foot of dry bentonite chips, and sealed close to the surface (or next shallowest probe) using cement/bentonite grout (Figure 4). After the installation of each soil gas probe, a minimum two hour equilibrium period was observed prior to sampling.

Soil gas samples were collected in a glass syringe and immediately analyzed on-Site for VOCs by a California-certified mobile laboratory by Jones for VOCs and TPH as gasoline (TPH-g) by Method 8260SV, a modified version of USEPA Method 8260B. Samples were also collected in Tedlar bags and analyzed off-Site for fixed gases, including methane. To ensure that soil gas samples were not compromised by leaks, n-Pentane was used as a leak check compound by a shut-in test. The soil gas laboratory report is included in Appendix M.

8.3 Field Observations and Laboratory Results

VOCs were monitored using a handheld photoionization detector (PID), with values of between 0 and 1.0 parts per million by volume (ppmv) recorded during fieldwork. Soils were logged generally consisted of silts throughout the Site with some deeper soils consisting of clayey silts. The soils were relatively heterogeneous and color was generally light brown to brown. No unusual odors were observed during field activities. Copies of the boring logs are provided in Appendix L.

Soil Results

As shown in Table 1, the only VOCs detected included toluene and ethylbenzene in SB-1-8 at concentrations of 2.1 microgram per kilogram ($\mu\text{g}/\text{kg}$) and 4.1 $\mu\text{g}/\text{kg}$, respectively.

As shown in Table 2, TPH was not reported above the laboratory method report limits (MRL) in any of the 20 samples analyzed.

As shown in Table 3, most of the metal concentrations detected were within typical background levels for California soils as published in 1996 in Bradford, G.R., Chang, A.C., Page, A.L., Bakhtar, D., Frampton, J.A., and Wright, H., *Background Concentrations of Trace and Major Elements in California Soils, Kearney Foundation of Soil Sciences Special Report, Division of Agriculture and Natural Resources, University of California*. The exceptions include arsenic detected in SB-8-1 at 12.2 milligrams per kilogram (mg/kg) and lead detected in SB-10-1 at 145 mg/kg .

As shown in Table 4, one detection of the pesticide 4,4'-dichlorodiphenyldichloroethylene (DDE) was reported at SB-6-1 at a concentration 18 $\mu\text{g}/\text{kg}$.

Appendix M provides the complete soil laboratory report, including Quality Control (QC) data.

Soil Gas Results

As shown in Table 5, low concentrations of tetrachloroethylene (PCE, up to 0.0064 micrograms per liter [$\mu\text{g}/\text{L}$]) and trichloroethylene (TCE, up to 0.038 $\mu\text{g}/\text{L}$) were detected in the soil gas. Additional VOCs detected include benzene (up to 0.011 $\mu\text{g}/\text{L}$), toluene (up to 0.017 $\mu\text{g}/\text{L}$), xylenes (0.491 $\mu\text{g}/\text{L}$), n-butylbenzene (up to 0.061 $\mu\text{g}/\text{L}$), 4-chlorotoluene (0.019 $\mu\text{g}/\text{L}$), 4-isopropyltoluene (up to 0.514 $\mu\text{g}/\text{L}$), and vinyl chloride (up to 0.821 $\mu\text{g}/\text{L}$).

As shown in Table 5, TPH-g was detected at SB-1-5 and SB-7-10 at concentrations of 10.7 $\mu\text{g}/\text{L}$ and 12.4 $\mu\text{g}/\text{L}$, respectively. No methane was detected in the soil gas samples.

Appendix M provides the complete soil gas laboratory report, including QC data.

8.3.1 Regulatory Guidelines Discussion

Reported soil and soil gas concentrations for the Site were compared to 2015 California Environmental Protection Agency (Cal/EPA) Region 9 Regional Screening Levels for residential

air and residential soils (RSLs) or the Alternative Human Health Risk Assessment (HHRA) Soil Screening Levels published by DTSC.

Soil and soil gas results for VOCs were below their respective regulatory guidelines.

With regard to arsenic, the USEPA has acknowledged that in some cases, the predictive risk-based models generate RSL levels that lie within or even below typical background concentrations. If natural background concentrations are higher than the risk-based RSLs, an adjustment of the RSL is probably needed. USEPA uses naturally occurring arsenic in soils as an example. Further, the DTSC has acknowledged that the strict use of RSLs is impractical and has set acceptable levels of arsenic in soil in the range of 8 to 12 mg/kg for school sites in California. One concentration of arsenic (SB-8-1, 12.2 mg/kg) minimally exceeds DTSC's guidelines for school sites.

With regard to lead, DTSC has adopted a risk level for lead of 80 mg/kg for unrestricted residential land use. As shown in Table 3, three detected concentrations exceeded the DTSC risk level for lead, SB-3-1 (90.4 mg/kg), SB-9-1 (85 mg/kg), and SB-10-1 (145 mg/kg).

9.0 SUMMARY AND CONCLUSIONS

The Site is approximately 0.4 acres in size and is located at 1346, 1350, and 1352 West Court Street, Los Angeles, California, associated with APNs 5160-011-008, 5160-01-009, and 5160-01-010. RECs associated with the historical oil production activities were identified for the Site. In May 2016, Roux Associates implemented a multi-depth soil and soil gas investigation. Based on the results of the Phase I and Phase II investigation for the Site, the following are our conclusions:

- TPH was not detected in the soil collected from the Site. In soil gas, low detections of TPH were found in two samples collected, which were not in the vicinity of the confirmed oil wells. Methane was not detected in the soil gas samples.
- Low concentrations of VOCs were detected in both the soil and soil gas, below all available regulatory guidelines. One low concentration of 4,4'-DDE was detected in shallow soil, below all regulatory guidelines.
- Elevated concentrations of lead were detected in concentrations exceeding DTSC risk levels of 80 mg/kg in three locations. Sampling during grading activities associated with the future development of the Site is recommended to characterize the soil being transported off-Site during and confirm that no elevated concentrations remain on the Site.
- Although sampling in the vicinity of the two oil production wells identified during the geophysical survey did not indicate impacts from the well operations, the location and existence of the other two oil production wells identified on the Site by DOGGR on the Site could not be confirmed during the geophysical due to inaccessible areas of the Site and interference from chain-link fencing. Prior to Site development, the location and existence of all three previously unabandoned oil wells and all related piping associated with oil production will need to be confirmed and, if they exist on Site, abandoned under current DOGGR guidelines and removed, as necessary.

DATA GAPS

The following data gaps were identified during the Phase I ESA.

- Although access to the eastern parcel was available, access to the interiors of the residences on the eastern parcel was not available during the Site reconnaissance. Based on the current residential use of the buildings, this is not considered a significant data gap. Roux Associates concludes that the data gap identified above is unlikely to affect the conclusions and recommendations of this Report.
- There is incomplete knowledge related to the origin of non-native/fill materials evident from the Site topography and observations made during the Site reconnaissance. This is considered a significant data gap. As a part of the Phase II, the shallow soil sampling (1 foot bgs) was conducted to characterize the potential fill material. Although some elevated lead was detected at 1 foot bgs, the vertical extent of those impacts was not completely characterized and the potential source for the material was not identified.
- Early oil and gas operations at the Site, as shown on Sanborn fire insurance maps and the California State Mining Bureau map of the Los Angeles City Oil Field, predate the formation of DOGGR. Therefore, it is not anticipated that any publically available information, not already obtained, will further inform the nature of early oil and gas operations at the Site, specifically in regards to: 1) the location(s) and/or status of wells; and, 2) associated subsurface infrastructure. As part of the Phase II, the geophysical survey was conducted in an effort to minimize this data gap. Inaccessible terrain and interference from metal fencing limited the geophysical survey on the western parcel and limited access to the eastern parcel minimized the area surveyed. This is considered a significant data gap. The presence or absence of two potential unabandoned oil production wells could not confirmed. Although a metal anomaly was identified on the central parcel, no definitive oil-related piping or underground structures were identified during the geophysical survey.

Roux Associates performed a Phase I ESA/Phase II in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the requirements of our Master Services Contract with 1300 Court concerning the Site.

10.0 REPORT ASSUMPTIONS AND LIMITATIONS

The Phase I ESA described herein was conducted by Roux Associates in accordance with ASTM Standard Practice E1527-13, which is consistent with the regulatory requirements for conducting all appropriate inquiries (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule⁴). The preamble for the AAI Rule states:

*In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.*⁵

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

*With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." EPA made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.*⁶

It is Roux Associates' understanding that this Phase I ESA was requested by 1300 Court so that 1300 Court may qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). One of the requirements that a person acquiring real property must meet in order to qualify for one of these limitations on liability

⁴ Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and <https://federalregister.gov/a/2013-31112>.

⁵ Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.

⁶ Federal Register: December 30, 2013 (Volume 78, Number 250).

under CERCLA is to perform all appropriate inquiries in conformance with the AAI Rule (or the ASTM Standard Practice E1527-13) prior to acquisition of the property. 1300 Court has acknowledged that, under the AAI Rule, Roux Associates' performance of the Phase I ESA described herein will not alone result in 1300 Court satisfying all of the requirements of the AAI Rule and provide a defense to CERCLA liability. Further, 1300 Court has acknowledged that the AAI Rule requires that certain additional inquiries be undertaken to satisfy the CERCLA AAI requirements. **ACCORDINGLY, ROUX ASSOCIATES MAKES NO GUARANTEES OR WARRANTIES, EXPRESSED OR IMPLIED, REGARDING THIS PHASE I ESA, INCLUDING WITHOUT LIMITATION, ANY WARRANTY THAT THIS PHASE I ESA WILL IN FACT QUALIFY CLIENT FOR A DEFENSE TO CERCLA LIABILITY.**

Roux Associates has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux Associates.

The AAI Rule requires and the conclusions stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Site. As such, these conclusions are based on subjective interpretations and the exercise of discretion. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions must be considered within this context.

1300 Court has agreed that Roux Associates shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the Phase I ESA/Phase II was performed. To the extent practicable, Roux Associates has identified data gaps, and has evaluated the potential significance of such data gaps.

No investigation is thorough enough to describe all conditions of interest at a given site. If conditions are not identified during the Phase I ESA/Phase II, such a finding should not be construed as a guarantee of the absence of such conditions at the site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed. Roux

Associates will not be able to report on, or accurately predict events that may change the Site conditions after the described services are performed.

This Phase I ESA/Phase II should not be considered a legal interpretation of existing environmental laws and regulations. The Phase I ESA/Phase II was conducted with a reasonable degree of inquiry to identify RECs, but uncertainty is not eliminated. No Phase I ESA/Phase II can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The Phase I ESA/Phase II process is intended to reduce, but not eliminate, the uncertainty involved with identifying RECs.

This Phase I ESA/Phase II is not an appraisal or value judgment of the Site. 1300 Court has agreed that Roux Associates shall not be liable for any use of the Phase I ESA/Phase II Report as an appraisal or value judgment of the Site.

The Phase I ESA/Phase II has been prepared for the exclusive use of 1300 Court for specific application to the Site. 1300 Court has agreed that any third-party use of this Phase I ESA/Phase II is 1300 Court's sole responsibility and at 1300 Court's sole liability.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312; and,

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Respectfully submitted,
ROUX ASSOCIATES, INC.

Mauricio H. Escobar, P.G.
Principal Geologist

ADVISORY – ACTIVE SOIL GAS INVESTIGATIONS

included in the project workplan if the project proponent chooses not to use probe support for deep soil gas wells.

Figure 1

Neat-Cement Grout means a mixture in the proportion of 94 pounds of Portland cement and not more than 6 gallons of water. Bentonite up to 5 percent by weight of cement (4.7 pounds of bentonite per 94 pounds of Portland cement) may be used to reduce shrinkage.

3.2.2 Sampling Tubing

Small diameter (1/8 to 1/4 inch) tubing is typically used for probe construction, made of material which will not react or interact with site contaminants. At sites where soil

Notes:

* Bradford, G.R., Chang, A.C., Page, A.L., Bakhtar, D., Frampton, J.A., and Wright, H., 1996, Background Concentrations of Trace and Major Elements in California Soils, Kearney Foundation of Soil Sciences Special Report, Division of Agriculture and Natural Resources, University of California.

RSL = Environmental Protection Agency (EPA) Region 9 Regional Screening Level (RSL) for residential soil, updated November 2015.

** The Department of Toxic Substances Control (DTSC) has established a risk level for lead of 80 mg/kg for residential land use.

NS = No standard currently established.

-- = Sample not analyzed.

Bold concentrations exceed the RSL.

Shaded concentrations exceed typical background concentrations for California soils.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Certified Sanborn® Map Report

04/19/16

Site Name:

1346, 1348, 1350, 1352, 1354 '
1346, 1348, 1350, 1352, 1354 '
Los Angeles, CA 90026
EDR Inquiry # 4595567.3

Client Name:

Roux Associates
5150 E Pacific Coast Highway
Long Beach, CA 90804
Contact: Paige Farrell

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 9A76-48A4-8D31

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Roux Associates (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/01/2016 has revealed that there are 27 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 02/15/2016 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/18/2005
Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program. DTSC concurs with this recommendation.

Local Agency: DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number: 1033
LOC Case Number: 300784
File Location: Regional Board
Potential Media Affect: Aquifer used for drinking water supply, Soil
EDR Link ID: T0603714859
Potential Contaminants of Concern: Benzene, Gasoline
Site History:

The Installation Restoration (IR) Site 1 at Naval and Marine Corps Reserve Center - Los Angeles (NMCRC-LA) consists of a former service station and vehicle lube rack area. The site located on approximately six acres of land, about 1 mile northeast of downtown Los Angeles, and is currently used by the City of Los Angeles Fire Department for training purpose. The former gasoline UST and the presence of several drums of unknown waste at the lube rack are potential historical sources of contamination at the site. Contaminated subsurface soils and groundwater below the area of concern are potential current sources of contamination. Type of contaminants identified in soil and groundwater consisted primarily of petroleum hydrocarbons in gasoline and diesel ranges. Analytical results from site investigations identified subsurface soils in the 15 to 25 feet below ground surface (bgs) depths as the soil strata of greatest contamination. Depth to water is approximately 30 feet bgs. The risk to human health from exposure to soil and groundwater is below the level of concern. Currently there is no drinking water wells on the property or within 1-mile radius in the area. The nearest well is located about 3 miles north of the site, which is upgradient to the source area. As of April 2007, groundwater data collected from the site show steady decrease trends and the plume has contained on site. Of the volatile organic compounds detected in groundwater, only 1,2-dichloroethane exceeded the screening level of 0.5 micrograms per liter (ug/l). Benzene concentration has decreased close to its cleanup goal of 1 ug/l.

Background Info: The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA) consists of approximately 6 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer conducted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide administrative, training, and logistics support to reserve units. The facility has one Installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service Station was built in 1943 and was used for fueling vehicles on site. The aboveground portion of the station has been removed. Adjacent to the former Service Station, the Vehicle Lube Rack was used for vehicle maintenance and drained directly to a waste of oil underground storage tank(UST). Between 1987 to 1989, hazardous substances (including used oil, solvents, hydraulic

, fluid, and other new and used vehicle maintenance products) were stored in 55-gallon drums on the Vehicle Lube Rack. In November 1994, the waste oil UST was removed in 1994 under supervision of the Los Angeles Fire Department. Soil with detected levels of total recoverable petroleum hydrocarbons was excavated and disposed off site. In 1995, an Environmental Baseline Study (EBS) was conducted. The EBS identified the Vehicle Lube Rack and the former Service Station gasoline UST as areas requiring further investigation. In 1996, a subsurface soil investigation conducted for Site 1 indicated the presence of gasoline-range hydrocarbons, benzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroethane.

Comments Date: 01182005
Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CE RCLA IR site, and should fall under State of California UST program. DTSC concurs with this recommendation.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 04/08/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 07/18/2016
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895

	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Number of Days to Update: 53	Next Scheduled EDR Contact: 06/13/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/22/2015	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date: 2012

East Map: 5630795 LOS ANGELES, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood <u>Electronic Data</u>
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic <u>Data Coverage</u>
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A1	1/2 - 1 Mile West	Not Reported
A2	1/2 - 1 Mile West	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene
Code: Tm (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HAMBRIGHT

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 20 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	gravelly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
2	7 inches	16 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
3	16 inches	20 inches	unweathered bedrock	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 silty clay loam
 shaly - clay loam
 sandy loam
 clay
 loamy sand
 clay loam

Surficial Soil Types: loam
 silty clay loam
 shaly - clay loam
 sandy loam
 clay
 loamy sand
 clay loam

Shallow Soil Types: silty clay

Deeper Soil Types: weathered bedrock
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PR3-041816-06

Dear Ms. Farrell:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site/facility referenced above.

We would also like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view Envirostor.

If you have any questions or would like further information regarding your request, please contact me at (818) 717-6522.

Sincerely,

Glenn Castillo/aa
Regional Records Coordinator

Dear Ms. Farrell:

The Department of Toxic Substances Control has received your letter to review records under the Public Records Act.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced above.

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available at each DTSC Regional File Room Office for use by community members to view EnviroStor.

If you have any questions or would like further information regarding your request, please contact me at (714) 484-5337.

Sincerely,

Julie Johnson

Subject: RE: Request for additional well information - Paige Farrell
Date: Tuesday, April 19, 2016 10:59:39 AM

Good morning:

Your request has been completed in the following manner:

There are 3 well records online: 03725059 03719064 and 03719033 are online at this time at:

<https://secure.conservation.ca.gov/WellSearch>

Please enter the API # in the search blank to find the well file.

For the other wells: We do not have any additional records for the well files you requested that are not posted online. The only information we have for those wells is the basic information that you see at <https://secure.conservation.ca.gov/WellSearch/> There is a gap in the API numbers list that corresponds to wells with no record and the APIs for the wells requested-not posted online are part of that gap.

This request is completed. Please reply to acknowledge you received this email. Thank you.

Gregorio Huerta

To: DOGGR Dist1@DOC <DOGDIST1@conservation.ca.gov>
Subject: Request for additional well information

I am conducting an environmental investigation and in addition to the information you have available online, I would like to know if you have any additional records for the following wells designated as:

API: 03725918, District 1, Well #7, Operator: Midland Oil
API: 03725059, District 1, Well #2, Operator: Courtland City Lights
API: 03719064, District 1, Well #1, Operator: Courtland City Lights
API: 03725986, District 1, Well #3, Operator: Parker Morrell
API: 03725989, District 1, Well #4, Operator: Parker Morrell
API: 03719033, District 1, Well #5, Operator: Manley Energy
API: 03725912, District 1, Well #15, Operator: Manley Oil

Thanks so much and please let me know if there is any additional information you need!

Paige

REPORT: On July 17, 2004, I arrived at the 1350 Court St. Los Angeles, CA 90012 to conduct a compliance inspection. The facility is an oil production operation, and before was managed by Manley Energy Resources. The owner is Courtland City Yards. It has one well head, and one storage/shipping tank (80 bbl) with three waste water oil/water seperators, 55 gals each.

During the meeting that I had with Mr. Alex Gershfeld, Cheif Operation Officer, (619) 665-8157, on Feb, 14, 2004, he informed me that Manley Energy Resources is going out of business, and oil well is not operating and the well is in idle condition. I did not see any activity or smell any odor at the facility during the inspection. I will contact the owner of the facility to verify the status of the well in future.

REPORT: On Aug. 27, 2004, I arrived at the corner of Court St. and Douglas St. Los Angeles, CA 90012 to conduct a compliance inspection. The facility is an oil production operation, and before was managed by Manley Energy Resources. The owner is Courtland City Yards. It has one well head, and one storage/shipping tank (80 bbl) with three waste water oil/water separators, 55 gals each.

During the meeting that I had with Mr. Alex Gershfeld, Chief Operation Officer, (619) 665-8157, on Feb, 14, 2004, he informed me that Manley Energy Resources is going out of business, and oil well is not operating and the well is in idle condition. I did not see any activity, but I saw the wellhead wad was not connected to the casing, and near the casing I saw some oils on the ground bubbling on the surface. I conducted surveillance on 08-20-2004, and the well had the same condition. I called at that time to speak with the owner, but I did not get any further information. I spoke with Inspector Supervising, Milt Stimson, and he advised me to contact DOG. I called DOG on 08-20-2004, and spoke with Mr. Floyd Reece, (714) 816-6847, and he told me that the oil well would be abandon in close future. I informed him about the situation of the well and public safety. I will follow up later.

REPORT: I conducted an inspection on 6/29/2011 at 15:40. I arrived at 1540 W Court St, LA 90026. It is an empty plot of land with overgrown grass and 3 large trees on site and the perimeter surrounded by chain-linked fence. I did not even see any signs posted on the fence, nor any equipment on site. The company or the equipment was no where to be found. The ID should be made inactive,

I departed at 15:50.

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the following reason (Section 7031.5, Business and Professions Code Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

OR

I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ Policy Number: _____

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead

20. FINAL DECLARATION

I certify that I have read this application INCLUDING THE ABOVE DECLARATIONS and state that the above information INCLUDING THE ABOVE DECLARATIONS is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

- (1) I accept all the declarations above namely the Owner-Builder Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning and Final Declaration; and
- (2) This permit is being obtained with the consent of the legal owner of the property.

10. FEE ITEM INFORMATION**WATER HEATERS AND GAS SYSTEMS**

Water Heater and Vent (1) 20.00

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

11. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **C36** Lic. No.: **813886** Contractor: **FOX PLUMBING AND CONSTRUCTION****12. WORKERS' COMPENSATION DECLARATION**

I hereby affirm, under penalty of perjury, one of the following declarations:

I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **EMPLOYERS INSURANCE GROUP** Policy Number: **ADP 31416904**

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

13. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

14. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's name (if any): _____ Lender's address: _____

15. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

- (1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
- (2) This permit is being obtained with the consent of the legal owner of the property.

RESOURCES AGENCY OF CALIFORNIA
DEPARTMENT OF CONSERVATION
DIVISION OF OIL, GAS, AND GEOTHERMAL RESOURCES

REPORT OF WELL PLUGGING AND ABANDONMENT

Cypress, California
November 28, 2006

Bennett Greenwald
MANLEY ENERGY RESOURCES, LLC
520 West Ash Street Suite 200
San Diego, CA 92101

Your report of the plugging and **abandonment** of well **Courtland City Lights Association/"Jay Kern" 1**, A.P.I. No. **037-19064**, Section **20**, T. **1S**, R. **13W**, S.B. **B & M.**, **Los Angeles City Field, Los Angeles** County, dated **2-10-05**, received 5-11-05, has been examined in conjunction with operations witnessed and records filed in this office.

We have determined that all of the requirements of this Division have been fulfilled relative to plugging and **abandonment** of the well, removal of well equipment and junk, and the filing of well records.

NOTE:

1. Surface plugging completed on **2-4-05**.
2. Surface inspection made and approved on **11-17-06**.

Report of Investigation

On August 20, 2004, CDOGGR Field Engineer Mel Saw was dispatched to investigate oil well: **Courtland City Light, "Jay Kern" 1, API 037-19064**, located on Douglass and Court Streets in the Los Angeles City Oil Field. The following is what Mel Saw reported to Rich Loverne:

1. Standing fluid in the well cellar. Gas bubbles in well cellar outside of casing. 128% LEL in the well cellar. Approximate rate of bubbles: 30-40 bubbles per minute, bubbles 1"-2" in diameter.
2. Pumping Unit disconnected. Sucker rod in 2 7/8" tubing at the well head with the tubing exposed to the atmosphere.
3. Well head and pumping unit fenced in (Approx. 5' x 8'), but gate unlocked, chain cut.

Mel Saw also took a number of digital pictures of the well and the well site.

Cypress, California
March 11, 2004

Your proposal to abandon well Courtland City Lights Association/"Jay Kern" 1, A.P.I. No. 037-19064, Section 20, T. 1S, R. 13W, S.B. B. & M., Los Angeles City Field, Central area, - pool, Los Angeles County, dated 3/8/2004, received 3/8/2004 has been examined in conjunction with records filed in this office.

THE PROPOSAL IS APPROVED PROVIDED:

1. Blowout prevention equipment equivalent to this Division's Class II2M requirements, or better, shall be installed and maintained in operating condition.
2. All portions of the well not plugged with cement shall be filled with clay base mud having a minimum density of 72 lb/cu ft and a minimum gel-shear strength of 25 lb/100 sq ft.
3. This Division shall be consulted and a Supplementary Notice may be required before making any changes in the proposed program.
4. THIS DIVISION SHALL BE NOTIFIED TO:
 - a. Witness the placing, location and hardness of the cement plug from ~~cleanout to 300' +/-~~.
 - b. Witness the mudding of the hole.
 - c. Witness the placing, location and hardness of the cement plugs from ~~300' to surface~~.
 - d. Inspect and approve the cleanup of the well site.

NOTE:

1. The proposed surface plug shall not contain rock or gravel.
2. The base of the freshwater sands is at 150' ±.
3. This Division does not pass upon your rights to enter the property, but merely approves the proposal as conforming to Division rules and regulations.

Notice of Intention to Abandon Well
File in Duplicate

In compliance with Section 3229, Division 3, Public Resources Code, notice is hereby given that it is our intention to abandon

Well Courtland City Light Assoc. "Jay Kern" #1 API No. 037-19064 Sec. 20 T. 1S R. 13W S.B.B.&M.

Los Angeles City Field Los Angeles County, starting work on 3-15-04

The present condition of the well is

- 1. Total depth: +/- 1000'
- 2. Complete casing record, with plugs and perforations (present hole):
8 5/8" I. 1000'???
- 3. Date last produced or injected: N/A

Additional data for dry hole (show depths)

- 1. Oil or gas shows: N/A
- 2. Stratigraphic markers: N/A
- 3. Formation and age at total depth: N/A
- 4. Base of freshwater sands: N/A

Is this a critical well according to the definition on the reverse side of this form (or on page 2 if you are using the Internet)?

Yes No

The proposed work is as follows:

- 1. MIRU
- 2. Pull and lay down rods and tubing.
- 3. MIRU CTU.
- 4. Clean out to +/- 1000', or as deep as possible.
- 5. Plug with cement from 1000' to 300'.
- 6. Shoot a cavity shot @ 300'.
- 7. Plug with cement from 300' to surface.
- 8. RDMO.
- 9. Cut off casing 5 ft. below grade.
- 10. Tack on steel plate.
- 11. Backfill well.

It is understood that if changes in this plan become necessary, we are to notify you immediately.

Answer to: L. J. Olson
Asst. Oil & Gas, Eng.
Letter of Nov. 3, 1976

Dear Mr. Olson:

On behalf of my wife Marjorie F. Gibson I wish to point out that: Your records are incomplete vis -

1. The above subject well was not idle on April 1, 1973.
2. Subject well has been in operation since (about) May 1969.
3. It is not Mrs. Gibson's intention to abandon this well but to continue its operation.
4. A 3 year Bond premium was paid to Equity Insurance Service under Policy M-133018 Effective Feb 19, 1976.
5. The well was last pulled & re-tubed on April 20, 1976.
6. On Nov 3, 1976 our check #386 in the amount of \$8.25 was sent to Rose E. Layton - City Clerk for a fire permit for the following year.

I trust the above will properly inform you in answer to questions raised in your letter of above subject date.

Very truly yours,

Bradford H. Gibson

Dear Ms. Gibson:

A recent check of our records shows that you have the above idle well in Los Angeles City field. This well was idle on April 1, 1973, has remained idle since that time and may come under Sec. 3237 of the Public Resources Code. It is not the intent of this Division to order the abandonment of any well that may have future use in the efficient production of oil as a producer, injector, or disposal well.

Will you please inform us of your plans for this well and, if possible, some type of timetable for its further use or abandonment. Thank you.

Sincerely,

(Original signed by L. J. Olson)

Gentlemen:

You have not filed production reports on our Form 110 for the months of January, 1965, through June, 1966, for your well(s) in the Los Angeles City field. These reports are long overdue and must be filed immediately.

The Public Resources Code of the State of California requires that a report be filed each month, giving the production of each well for the preceding month.

Sincerely,

WM. C. BAILEY
Deputy Supervisor

Inglewood 3, California

July 28, 1959

Mr. Arthur F. Coe
125 East 54th Street
San Bernardino, California
Agent for ARTHUR F. COE AND MARJORIE F. GIBSON

DEAR SIR:

Your request dated July 24, 1959, relative to change in designation of well (x) in Sec. on Court Street near Douglas, T. B. & M., R. Los Angeles City field, Los Angeles County, District No. 1, has been received;

and in accordance with Section 3203, Public Resources Code, reading in part as follows:

“* * * The number or designation by which any well heretofore drilled has been known, and the number or designation specified for any well in a notice filed as required by Section 3203, shall not be changed without first obtaining a written consent of the Supervisor.”

the proposed change in designation is hereby authorized as follows:

Well No. 1, formerly owned by Arthur F. Coe and Elsie F. Fabrick, will hereafter be known as your well No. "Coe-Gibson" 1.

Dear Sir

Production reports have been received from you for Arthur F. Coe and Marjorie F. Gibson well No. "Coe-Gibson" 1, Los Angeles City field, for the months of January to June 1959. This well is carried in our records as Arthur F. Coe and Elsie C. Fabrick well No. 1.

Please furnish us with the information requested below which may be submitted on the duplicate copy of this letter attached. Please complete the letter, sign and return it to this office as soon as possible. Please also complete the enclosed questionnaire and return it with your reply.

Yours truly

Wm C Bailey
WCB

Re: Coe-Gibson Well #1 (Formerly Coe-Fabrick Well #1)

The well was carried on as a joint venture between Arthur F. Coe and Elsie C. Fabrick, each owning an undivided half-interest in the lot and well (the well was not and is not under lease to anyone). Mrs. Fabrick died, a resident of San Luis Obispo County, California, on October 24, 1958. Her estate is being probated in that county (Prob. No. 9507), and is not yet closed or distributed. Mrs. Fabrick's half-interest will be distributed to Marjorie F. Gibson, her daughter, under the laws of intestate succession.

This memo dated July 24, 1959.

Dear Sir:

Estate of Adda A. Coe, Deceased, well No. 1,
Los Angeles City field, was transferred to Arthur F. Coe
and Elsie C. Fabrick through decree of distribution
issued by the Superior Court of Los Angeles County.

This information is contained in letter
dated May 4, 1943, from Arthur F. Coe. We are changing
our records accordingly.

Request for designation of agent should be
addressed to the new operator at 1332 West 5th Street,
Los Angeles.

Yours truly,

Deputy Supervisor

Gentlemen:

Confirming verbal report, at your request I wish to confirm in writing that that oil in the old Los Angeles Field, on Lot 12, Block 11, of L. A. Imp. Co's. subd. of part of Lots 7 and 8, Blk. 39, Hancock's Survey, as per Book 10, p. 29, Misc. Rec., L. A. County (A. A. Coe Well #1; L. A. F. C. well #36), on Court St. near Douglas, has been transferred, by final decree of distribution of the estate of Adda A. Coe, deceased, #208692, Supr. St., Los Angeles County, to the undersigned, Arthur F. Coe, and Elsie C. Fabrick, who also sometimes signs as Elsie M. Fabrick. The decree of distribution is dated February 11, 1943. Distribution was to said parties, to each an undivided one-half interest, and title now stands in that way.

Yours very truly,

Arthur F. Coe

City of Los Angeles Methane Ordinance and Sampling Protocol

ORDINANCE NO. 175790

An ordinance amending Section 91.106.4.1 and Division 71 of Article 1, Chapter IX of the Los Angeles Municipal Code to establish citywide methane mitigation requirements and include more current construction standards to control methane intrusion into buildings.

WHEREAS, there was a fire in the Fairfax Area of the City of Los Angeles in 1985, due to high volume of methane gas seepage through cracks in the concrete floor of a building;

WHEREAS, the City of Los Angeles adopted an Ordinance, (Ord. No. 161,552, Eff. 8-31-86) which required mitigation for methane gas intrusion into buildings located in the Fairfax area of Los Angeles;

WHEREAS, methane gas which percolates from subsurface geological formations to the atmosphere is a natural phenomenon;

WHEREAS, in 1999, large pockets of methane gas in subsurface geological formations were discovered at the Playa Vista project area of West Los Angeles;

WHEREAS, in 2001, new methane mitigating systems were developed and used in the Playa Vista Project;

WHEREAS, in Council File No. 01-1305, the City Council directed the City's Departments of Building and Safety, Engineering, and Planning, as well as, the Chief Legislative Analyst and Office of Administrative and Research Services, to form a work group and recommend uniform safety requirements regarding methane, for all future development throughout the City;

WHEREAS, a study by the work group was conducted regarding areas throughout the City of Los Angeles to identify areas where subsurface methane gas may be found;

WHEREAS, from the information and data provided by the Division of Oil, Gas and Geothermal Resources, Department of Conservation, State of California, City of Los Angeles Department of Environmental Affairs, Department of Building and Safety and the Fire Department a map was plotted by the Department of Public Works to show other areas within the City of Los Angeles, where there exists a possible potential hazard of methane gas;

WHEREAS, modern construction standards were successfully used as methane mitigation systems for many projects in Playa Vista;

WHEREAS, the work group utilized the research and knowledge gained through the development of the Playa Vista methane mitigation systems;

WHEREAS, many of the modern construction standards to mitigate potential hazard of methane gas intrusion into building were incorporated into the Los Angeles Municipal Code as more restrictive provisions than found in the 2001 edition of the California Building Code based on local geological conditions;

NOW, THEREFORE,

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Section 1. Exception 6 of Section 91.106.4.1 of the Los Angeles Municipal Code is amended to read:

6. The Department shall have the authority to withhold permits on projects located within a Methane Zone or Methane Buffer Zone established under Sections 91.7101 *et seq.* of this Code. Permits may be issued upon submittal of detailed plans that show adequate protection against flammable gas incursion by providing the installation of suitable methane mitigation systems.

Sec. 2. Division 71 of Article 1, Chapter IX of the Los Angeles Municipal Code is amended to read:

**DIVISION 71
METHANE SEEPAGE REGULATIONS**

SEC. 91.7101. PURPOSE.

This division sets forth the minimum requirements of the City of Los Angeles for control of methane intrusion emanating from geologic formations. The requirements do not regulate flammable vapor that may originate in and propagate from other sources, which include, but are not limited to, ruptured hazardous material transmission lines, underground atmospheric tanks, or similar installations.

SEC. 91.7102. DEFINITIONS.

For the purpose of this division, certain words and phrases are defined as follows:

Alarm System shall mean a group of interacting elements consisting of components and circuits arranged to monitor and annunciate the status of gas concentration levels or supervisory signal-initiating devices and to initiate the appropriate response to those signals.

Buildings with Raised Floor Construction shall mean a building with the bottom of the floor system raised above grade where the clearance for each of the following items shall be at least: 12 inches for the girder, 18 inches for the floor joist and 24 inches for the structural floors.

Cable or Conduit Seal Fitting shall mean an approved fitting provided in a cable or conduit system to prevent the passage of gases, vapors, or flames through electrical cable or conduit.

Design Methane Concentration shall mean the highest concentration of methane gas found during site testing.

Design Methane Pressure shall mean the highest pressure of methane gas found during site testing.

De-watering System shall mean a permanent water removal system, consisting of perforated pipes, gravel, sump pumps and pits, designed to permanently maintain the ground water level one foot below the sub-slab vent system.

Gas Detection System shall mean one or more electrical devices that measure the methane gas concentration and communicate the information to the occupants, building management, central station or alarm company with audible or visual signals.

Gravel Blanket shall mean a layer of gravel, sand, or approved material designed to transmit gas to the vent riser without obstructing the venting system.

Impervious Membrane shall mean a continuous gas barrier made of material approved by the Department and installed beneath a building for the purpose of impeding methane migration to the interior of the building.

Mechanical Extraction System shall mean a system operated by a machine which is designed to remove methane gas from below the impervious membrane through the use of fans, blowers, or other powered devices.

Mechanical Ventilation shall mean a fan, blower or other similar group of interacting elements operated by a machine within the building, which introduce and/or remove air from an enclosed space.

Narrow Building shall mean a building that has a width less than 50 feet, a footprint of less than 50,000 square feet and having a minimum 2-foot wide landscaped area immediately adjacent to the exterior wall for at least 50 percent of the perimeter of the building.

Oil Well shall mean a deep hole or shaft sunk into the earth for the exploration of oil or gas; or which is on lands producing or reasonably presumed to contain oil or gas; or which is drilled for the purpose of injecting fluids or gas for stimulating oil recovery, re-pressurizing or pressure maintenance of oil or gas, or disposing of waste fluids from an oil or gas field.

Perforated Horizontal Pipe shall mean an approved pipe which contains a series of small holes or narrow openings placed equidistant along the length of the approved pipe, which is placed horizontally beneath the foundation of a building, for the purpose of venting accumulated methane gas and preventing the development of elevated gas pressures, or for drainage of ground water to an approved location.

PPMV shall mean Parts per Million by Volume.

Pressure Sensor shall mean a device that measures and communicates surrounding gas pressure to an alarm or control system.

Single Station Gas Detector shall mean a device consisting of electrical components capable of measuring methane gas concentration and initiating an alarm.

Trench Dam shall mean an approved subsurface barrier installed within a furrow or ditch adjacent to the foundation of a building, for the purpose of preventing the migration of methane gas beneath that foundation.

Unobstructed Opening shall mean a permanent clearing or gap in the walls, floors or roof-ceiling assemblies without windows, doors, skylights or other solid barriers that may restrict the flow of air.

Vent Riser shall mean an approved pipe which is placed vertically with joints and fittings connected to Perforated Horizontal Pipes to convey and discharge the gas to the atmosphere.

SEC. 91.7103. GENERAL METHANE MITIGATION REQUIREMENTS.

All new buildings and paved areas located in a Methane Zone or Methane Buffer Zone shall comply with these requirements and the Methane Mitigation Standards established by the Superintendent of Building. The Methane Mitigation Standards provide information describing the installation procedures, design parameters and test protocols for the methane gas mitigation system, which are not set forth in the provisions of this division.

Boundaries of the Methane Zones and Methane Buffer Zones are shown on the Methane and Methane Buffer Zones Map designated as Map number A-20960, dated September 21, 2003, which is attached to Council File No. 01-1305.

SEC. 91.7104. GENERAL METHANE REQUIREMENTS.

91.7104.1. Site Testing. Site testing of subsurface geological formations shall be conducted in accordance with the Methane Mitigation Standards. The site testing shall be conducted under the supervision of a licensed Architect or registered Engineer or Geologist and shall be performed by a testing agency approved by the Department.

The licensed Architect, registered Engineer or Geologist shall indicate in a report to the Department, the testing procedure, the testing instruments used to measure the concentration and pressure of the methane gas. The measurements of the concentration and pressure of the methane gas shall be used to determine the Design Methane Concentration and the Design Methane Pressure. The Design Methane Concentration and the Design Methane Pressure shall determine the Site Design Level of Table 71.

EXCEPTION: Site testing is not required for buildings designed to the requirements of Site Design Level V as described in Table 71, or for buildings designed using the exceptions set forth in Sections 91.7104.3.2 or 91.7104.3.3.

91.7104.2. Methane Mitigation Systems. All buildings located in the Methane Zone and Methane Buffer Zone shall provide a methane mitigation system as required by Table 71 based on the appropriate Site Design Level. The Superintendent of Building may approve an equivalent methane mitigation system designed by an Architect, Engineer or Geologist.

Table 71 prescribes the minimum methane mitigation systems, such as, the passive,

active and miscellaneous systems, depending on the concentration and pressure of the methane present at the site. Each component of the passive, active and miscellaneous systems shall be constructed of an approved material and shall be installed in accordance with the Methane Mitigation Standards.

91.7104.2.1. Passive System. The passive system is a methane mitigation system installed beneath or near the building. The components of the passive system may consist of a de-watering system, the sub-slab vent system, and impervious membrane. The sub-slab vent system shall consist of Perforated Horizontal Pipes, Vent Risers, and Gravel Blankets for the purpose of collecting and conveying methane from the soil underneath the building to the atmosphere.

91.7104.2.1.1. De-watering System. The de-watering system is used to lower the ground water table to a level more than 12 inches below the bottom of the Perforated Horizontal Pipes. The de-watering system shall conduct ground water to an approved location.

91.7104.2.2. Active System. The components of the active system shall consist of one or more of the following, sub-slab system, gas detection system, mechanical ventilation, alarm system and control panel. All components shall be constructed of an approved material, installed in accordance with the Methane Mitigation Standards.

91.7104.2.3. Miscellaneous System. The components of the miscellaneous system may consist of Trench Dam, Cable or Conduit Seal Fitting, or Additional Vent Risers. The component of the miscellaneous system shall be a material approved by the Department and shall be installed in accordance with the Methane Mitigation Standards.

91.7104.3. Exceptions to Table 71. The provisions of this section are exceptions to the construction requirements of Table 71.

91.7104.3.1. Narrow Buildings. Narrow Buildings may substitute Pressure Sensors below the Impervious Membrane in lieu of the Gas Detection System and Mechanical Ventilation, if the installation of the Pressure Sensors below the Impervious Membrane is not required per Table 71 and the Narrow Building is constructed with a minimum two feet wide landscaped area covering at least 50 percent of the ground immediately adjacent to the exterior building walls.

91.7104.3.2. Buildings with Raised Floor Construction. If a Building with Raised Floor Construction has underfloor ventilation construction in accordance with the standards below, then the utilities shall be installed with Trench Dams and Cable or Conduit Seal Fittings and a four inch thick gravel blanket shall be installed under and around the elevator pits.

Underfloor ventilation shall be provided by an approved mechanical ventilation system capable of exhausting underfloor air an equivalent of every 20 minutes, or by openings in the underfloor area complying with the following:

A. The top of the openings shall be located not more than 12 inches below the bottom of the floor joists.

B. The openings shall be distributed approximately equally and located to provide cross ventilation, for example, by locating the opening along the length of at least two opposite sides of the building.

C. The openings shall be the larger of:

1. Openings of not less than 1.5 square feet for each 25 linear feet or fraction of exterior wall; or

2. Openings shall be equal to 1 percent of underfloor area.

D. The openings may be covered with corrosion-resistant wire mesh with mesh openings of greater than 3 inch and less than 2 inch in dimension.

91.7104.3.3. Buildings with Natural Ventilation. A building with natural ventilation is a building constructed with the following:

A. The Unobstructed Openings shall exchange outside air.

B. The size of the Unobstructed Opening shall be the larger of:

1. Opening equal to at least 25 percent of the total perimeter wall area of the lowest level of the building, or

2. Opening equal to at least 25 percent of the floor area of the lowest level of the building.

C. The Unobstructed Openings shall be evenly distributed and located within the upper portion of at least two opposite exterior walls of the lowest level of the building.

Buildings with natural ventilation that are constructed as described above, shall have the utilities constructed with Trench Dams and Cable or Conduit Seal Fittings. If there is an enclosed room or space less than 150 square feet within the building, then the enclosed room or space shall be constructed with vent openings

that comply with the requirements of Section 91.7104.3.4.

91.7104.3.4. Enclosed Room or Space within Building. Individual enclosed rooms or enclosed spaces with floor area less than 2,000 square feet may be exempt from providing the Active System as required by Table 71, provided the vent openings comply with all of the following:

1. Vent openings are Unobstructed Openings, except screens made with at least 3 inch mesh or wind driven turbines on the roof shall be permitted.
2. The aggregate size of vent openings shall be the larger of either five percent of the total floor area of the room or the area of enclosed space, or ten percent of the area of walls on the perimeter of the room or enclosed space.
3. The vent openings shall be located to prevent the accumulation of methane gases within the room or enclosed space.
4. The top of the vent opening shall be located not more than 12 inches below roof joists or ceiling joists if located in a wall of a building.
5. The vent openings shall be located on either two opposite walls or two adjacent walls of the room or enclosed space if located in a wall of a building.
6. The vent openings shall be located no more than 50 feet from any point within the room or enclosed space.
7. When using wind driven turbine, the area of the vent opening shall be calculated by the area of the opening at the attachment of the wind driven turbine at the roof.
8. When the vent opening is located in a wall of an adjoining room, then the adjoining room shall be constructed of either an Active System, or have Natural Ventilation as described in Section 91.7104.3.3.

91.7104.3.5. Single Family Dwelling. Single Family Dwellings and buildings accessory to single family dwellings shall comply with all the Methane Mitigation requirements of Table 71, except that the following mitigation system may be substituted:

- A. Pressure Sensors below Impervious Membrane may be installed in lieu of

Gas Detection System when Pressure Sensors below Impervious Membrane is not required; or

B. Single Station Gas Detectors with battery back-up may be installed in lieu of Alarm System and Gas Detection System; or

C. 6 mil thick Visquene may be used in lieu of Impervious Membrane, when the Site Design Levels are I or II; or

D. Additional Vent Risers or Mechanical Ventilation may be omitted for buildings with width less than 50 feet and footprint less than 6,000 square feet in area; or

E. Vent Risers may be substituted in lieu of Mechanical Extraction System, provided the Vent Risers are designed at a rate twice that established by the Methane Mitigation Standards.

91.7104.3.6. Buildings Located in the Methane Buffer Zone. A building, located entirely or partially in the Methane Buffer Zone, shall be designed to the requirements of the Methane Buffer Zone. Buildings located in the Methane Buffer Zone shall not be required to provide any methane mitigation system, if the Design Methane Pressure is less than or equal to two inches of water pressure and is either of the following:

A. Areas which qualify as Site Design Level I or II; or

B. Areas which qualify as Site Design Level III and the utilities are installed with Trench Dams and Cable or Conduit Seal Fitting.

91.7104.3.7. De-watering System. A De-watering system is not required for either of the following:

A. If during the site testing, the groundwater level is deeper than 10 feet below the Perforated Horizontal Pipes, or

B. If the soil investigation or analysis, as approved by the Department, reveals the groundwater level is more than 12 inches below the bottom of the Perforated Horizontal Pipes.

91.7104.3.8. Buildings Located in the First Phase Playa Vista Project. The First Phase Playa Vista project, as approved by the City on September 21, 1993 and December 8, 1995, shall comply with the methane mitigation program as required by the Department pursuant to the Methane Prevention, Detection and Monitoring Program approved by the Department on January 31, 2001, in lieu of the requirements of this

division.

91.7104.4. Paved Areas. Paved areas that are over 5,000 square feet in area and within 15 feet of the exterior wall of a commercial, industrial, institutional or residential building, shall be vented in accordance with the Methane Mitigation Standards.

EXCEPTION: Paved areas located in the Methane Buffer Zone and which qualify for Site Design Levels I, II or III.

SEC. 91.7105. EXISTING BUILDINGS.

Additions, alterations, repairs, changes of use or changes of occupancy to existing buildings shall comply with the methane mitigation requirements of Sections 91.7104.1 and 91.7104.2, when required by Divisions 34, 81 or 82 of this Code.

Approved methane mitigation systems in existing buildings shall be maintained in accordance with Section 91.7106.

SEC. 91.7106. TESTING, MAINTENANCE AND SERVICE OF GAS- DETECTION AND MECHANICAL VENTILATION SYSTEMS.

All gas detection and mechanical ventilation systems shall be maintained and serviced in proper working condition and meet all requirements of the Electrical and Mechanical Code. The testing, maintenance and service procedure for each gas detection and mechanical ventilation systems shall be performed in accordance with the manufacturer's current written instructions and the following:

A. Fire Department. The manufacturer's instructions shall be approved by the Fire Department. Testing and servicing of each system shall be performed by a person certified by the Fire Department.

B. Notification Placard. A permanent notification placard shall be posted and maintained at the front entrance of a building that is constructed with Impervious Membrane, except in residential buildings. The placard shall indicate the presence of the Impervious Membrane.

SEC. 91.7107. EMERGENCY PROCEDURES.

With the exception of single-family dwellings, all buildings required by this division to have a gas-detection system or sub-slab vent system shall, subject to Fire Department approval, have established emergency procedures that include, but are not limited to, the following:

A. Assignment of a responsible person as safety director to work with the Fire Department in the establishment, implementation and maintenance of an emergency plan.

B. Conspicuous posting of the Fire Department's telephone number in areas designated by the Fire Department.

C. Conspicuous posting of emergency plan procedures approved by the Fire Department.

SEC. 91.7108. APPLICATION OF METHANE SEEPAGE REGULATIONS TO LOCATIONS OR AREAS OUTSIDE THE METHANE ZONE AND METHANE BUFFER ZONE BOUNDARIES.

Upon a determination by the Department of Building and Safety that a hazard may exist from methane intrusion at a geographical location or in an area outside the boundaries established in Section 91.7103 of this Code, the Department of Building and Safety and the Fire Department may enforce any or all of the requirements of Division 71 of this Code as required to preclude potential fire or explosion from methane concentration.

SEC. 91.7109. ADDITIONAL REMEDIAL MEASURES.

91.7109.1. General Remedial Measures. In the event the concentration of methane gas in any building located in a Methane Zone or Methane Buffer Zone reaches or exceeds 25 percent of the minimum concentration of gas that will form an ignitable mixture with air at ambient temperature and pressure, the owner shall hire an engineer to investigate, recommend and implement mitigating measures. These measures shall be subject to approval of this Department and the Fire Department.

91.7109.2. Abandoned Oil Well. Any abandoned oil well encountered during construction shall be evaluated by the Fire Department and may be required to be re-abandoned in accordance with applicable rules and regulations of the Division of Oil, Gas and Geothermal Resources of the State of California. Buildings shall comply with these provisions and the requirements of Section 91.6105 of this Code, whichever is more restrictive.

^{1.} See Section 91.7104.3.7 for exception.

^{2.} The Mechanical Extraction System shall be capable of providing an equivalent of a complete change of air every 20 minutes of the total volume of the Gravel Blanket.

^{3.} See Section 91.7104.3.1 for Narrow Buildings.

4. The Mechanical Ventilation systems shall be capable of providing an equivalent of one complete change of the lowest occupied space air every 15 minutes.
5. Vent opening complying with Section 91.7104.3.4 may be used in lieu of mechanical ventilation.
6. The total quantity of installed Vent Risers shall be increased to double the rate for the Passive System.

Sec. 3. The City Clerk shall certify to the passage of this ordinance and have it published in accordance with Council policy, either in a daily newspaper circulated in the City of Los Angeles or by posting for ten days in three public places in the City of Los Angeles: one copy on the bulletin board located in the Main Street lobby to the City Hall; one copy on the bulletin board located at the ground level at the Los Angeles Street entrance to the Los Angeles Police Department; and one copy on the bulletin board located at the Temple Street entrance to the Los Angeles County Hall of Records.

I hereby certify that this ordinance was passed by the Council of the City of Los Angeles, at its meeting of February 12, 2004.

SITE TESTING STANDARDS FOR METHANE

This Information Bulletin establishes the standard protocol for Site Testing that provides design input data for methane mitigation systems required by Division 71 of the Los Angeles Building Code.

The work plan for site testing is summarized in three primary steps:

Step 1 - Schedule Site Testing

Step 2 - Conduct Shallow Soil Gas Test

Step 3 - Conduct Gas Probe Test

The site testing results from these steps are to be organized in a report and included with the building permit application.

I. SITE TESTING FOR METHANE

Site testing shall be conducted using the following three-step testing protocol described in this Bulletin to determine the concentration and pressure of the subsurface methane gas for the design of methane hazard mitigation systems.

STEP 1- SCHEDULE SITE TESTING

1. Site Testing should be scheduled before any site grading. If Site Testing after site grading is unavoidable, then Site Testing shall be conducted at least 30 days after any site grading.

STEP 2- CONDUCT SHALLOW SOIL GAS TEST

1. Methane gas concentration measurements for the Shallow Soil Gas Test (See page 8 for the Shallow Soil Gas Test Equipment Set-Up) shall be taken as follows:
 - a. A minimum of two per project site, and at a rate of one sample per 10,000 square feet of site area, or portion thereof. The site area of very large sites may be calculated as the area of the building footprint plus the area within 100 feet of the building perimeter.

- b. At a depth of not less than 4 feet below ground surface, or
 - c. If ground water is found less than 4 feet below ground surface, then the depth of the Shallow Soil Gas Sample shall be taken above the ground water level.
2. Review the methane gas concentration data from the Shallow Soil Gas Test and site observations to identify locations where high gas concentrations of methane gas may be found.
 3. Shallow Soil Gas measurements shall be made at least once and may be taken at anytime before the installation of Gas Probe Sets.

STEP 3 - CONDUCT GAS PROBE TEST

1. The location of Gas Probe Sets shall be based on the information from the Shallow Soil Gas Test where the highest concentration of soil gas may be found.
2. Methane gas concentration and pressure measurements for the Gas Probe Tests (See page 9 for the Gas Probe Set Equipment Set-Up) shall be taken as follows:
 - a. There shall be at least one gas probe set for every 20,000 square feet or portion thereof of site area. Regardless of area, all sites shall install a minimum of two gas probe sets.
 - b. The site area of very large sites may be calculated as the area of the building footprint plus the area within 100 feet of the building perimeter.
 - c. Each Gas Probe Set shall consist of three probes, installed at approximate sampling depths of 5 feet, 10 feet and 20 feet below the elevation of the lowest building slab or footing.
 - d. Gas Probe Sets shall be installed a minimum of 12 inches above ground water table.
 - e. Gas Probe Sets are not required to be installed below the ground water level.
 - f. Shallow Soil Gas data, collected as described in Step 2, may be used in lieu of Gas Probe Set data when ground water is found less than 5 feet below the ground surface.
3. Record data from the Gas Probe Sets as follows:
 - a. Two sequential measurements shall be taken, with a minimum 24-hour interval following placement of the Gas Probe Sets. Samples shall not be collected during

increasing barometric pressure from a pre-frontal weather condition.

- b. Site testing data shall be recorded on Form 1 – Certificate of Compliance for Methane Test Data and certified by the engineer (see pages 4 and 5).

II. REPORTING SITE TESTING RESULTS

The methane site testing data shall be organized as described below:

1. The Certificate of Compliance for Methane Test Data, Form 1, shall be completed, stamped and signed by an engineer, geologist or architect. This form shall be attached to the methane mitigation construction plans.
2. Site Testing Plan showing:
 - a. Locations of Shallow Soil Gas Samples and Gas Probe Sets.
 - b. Locations and dimensions of the proposed and existing building footprints.

III. CERTIFICATE OF COMPLIANCE AND GAS COLLECTION EQUIPMENT

Form 1- Certificate of Compliance for Methane Test Data
Table I - Gas Collection Equipment
Shallow Sample Equipment Set-Up

Part 1: Certification Sheet

Site Address: _____
 Legal Description: Tract: _____ Lot: _____ Block: _____

Building Use: _____	Architect's, Engineer's or Geologist's Stamp:
Name of Architect, Engineer, or Geologist: _____	
Mailing Address: _____ _____	
Telephone: _____	
Name of Testing Laboratory: _____	
City Test Lab License #: _____ Telephone: _____	

I hereby certify that I have tested the above site for the purpose of methane mitigation and that all procedures were conducted by a City of Los Angeles licensed testing agency in conformity with the requirements of the LADBS Information Bulletin P/BC 2014-101. Where the inspection and testing of all or part of the work above is delegated, full responsibility shall be assumed by the architect, engineer or geologist whose signature is affixed thereon.

Signed: _____ date _____

Required Data:

- Project is in the (Methane Zone) or (Methane Buffer Zone).
- Depth of ground water observed during testing: _____ feet below the Impervious Membrane.
- Depth of Historical High Ground Water Table Elevation*: _____ feet below the Impervious Membrane.
- Design Methane Concentration**: _____ parts per million in volume (ppmv).
- Design Methane Pressure***: _____ inches of water column.
- Site Design Level: (Level I, Level II, Level III, Level IV, Level V) with _____ inches of water column.

De-watering:

- De-watering (is) (is not) required per Section 7104.3.7.
- Pump discharge rate _____ cubic feet per minute per reference geology or soil report: _____ dated _____.

Additional Investigation:

- Additional investigation (was) (was not) conducted.

Latest Grading on Site:

- Date of last grading on site (was) (was not) more than 30 days before Site Testing.
- See Attached explanation of the effect on soil gas survey results by grading operations.

Notes:

* Historical High Ground Water Table Elevation shall mean the highest recorded elevation of ground water table based on historical records and field investigations as determined by the engineer for the methane mitigation system.

** Design Methane Concentration shall mean the highest recorded measured methane concentration from either Shallow Soil Gas Test or any Gas Probe Set on the site.

*** Design Methane Pressure shall mean the highest total pressure measured from any Gas Probe Set on the site.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. For efficient handling of information internally and in the internet, conversion to this new format of code related and administrative information bulletins including MGD and RGA that were previously issued will allow flexibility and timely distribution of information to the public.

TABLE 1 - DATA COLLECTION EQUIPMENT

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. For efficient handling of information internally and in the internet, conversion to this new format of code related and administrative information bulletins including MGD and RGA that were previously issued will allow flexibility and timely distribution of information to the public.

Parameter	Equipment or Procedure	Detection Limit
Barometric Pressure	Barometer or GA-90	0.1" of Hg
Gas Probe Pressure	Pressure Gauge	0.1" of H ₂ O
Methane Concentration	Landtec GA-90 (Field) or EPA 8015 (Lab)	0.1% or 1,000 ppm
Combustible Gas Concentration	LTX-310 (Field) or EPA 8015 (Lab)	0.1% or 1,000 ppm

Notes for Table 1:

1. Gas Probe Sets shall be capable of collecting data for both soil gas pressure and methane concentration.
2. Instruments and test procedures used to determine gas pressure and concentrations shall be in accordance with the test equipment manufacturer's instructions and the listed Detection Limits.
3. Portable Gas Sampling Instruments shall consist of infrared gas analyzer or other combustible gas analyzers. Photo Ionization Detectors (PIDs) shall not be used to measure methane concentrations. Flame Ionization Detectors (FID's) may be used as the primary detector for gas probe monitoring. All portable gas sampling instruments shall be calibrated daily using a laboratory certified methane calibration gas.

SHALLOW SOIL GAS TEST EQUIPMENT SET-UP

*Note: Measurement from Shallow Soil Gas Test shall be taken above ground water level.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. For efficient handling of information internally and in the internet, conversion to this new format of code related and administrative information bulletins including MGD and RGA that were previously issued will allow flexibility and timely distribution of information to the public.

User Questionnaire

ASTM E 1527-13 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the User (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: 1346, 1350, 1352 W. COURT STREET, LOS ANGELES, CA 90026

Person Interviewed/Title: Bill McRenaos, VP of Development Date: 5/2/16

If known, when was the property initially developed? Unknown

If different, when were the current building(s) on the property constructed? Unknown

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

Yes No If you answer yes, please include an explanation in the space provided below:

Buyer has no knowledge regarding the environmental issues at the property beyond those set forth in the environmental reports previously provided to the consultant or any knowledge regarding liens on the property beyond the Preliminary Title Report ("PTR") it has obtained. Buyer can make the PTR available to the consultant if needed.

2. Activity and land use limitations that are in place on the *property* or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed against the *property* under federal, tribal, state, or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes No If you answer yes, please include an explanation in the space provided below:

Buyer has no knowledge regarding the environmental issues at the property beyond those set forth in the environmental reports previously provided to the consultant.

Note 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties?

For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes No If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Buyer negotiated a purchase price for the property with knowledge of the environmental issues set forth in E2 Managetech's Phase 1 for the property. There was no specific reduction due to environmental concerns at the property.

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes No

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes No

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes No

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes No

If you answered yes to any of the questions above, please include an explanation in the space provided below:

Buyer has no knowledge regarding the environmental issues, including any past uses or chemicals used, at the property beyond those set forth in the environmental reports previously provided to the consultant.

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes No If you answer yes, please include an explanation in the space provided below:

Buyer has no knowledge regarding the environmental issues at the property beyond those set forth in the environmental reports previously provided to the consultant.

Please provide the following property contact information:

Attn: Paige Farrell Re: Geophysical Survey Summary Report
W. Court Street – Oil Well Search

This report covers the results of a geophysical survey performed at 1350 W. Court Street, in Los Angeles, California. The purpose of the survey was to search for and map the location of suspected oil wells beneath the property. A secondary objective was to locate and mark out pipe and utility lines for future drilling and excavation work.

The fieldwork was performed on May 13, 2016. An aerial photo is provided on Figure 1 that shows the location and limits of the survey.

Survey Design and Field Procedures

To provide a systematic uniform search, a rectangular survey grid was established using a 5-foot line spacing. The grid origin (0, 0) is located at the southeast corner of the site. Data was recorded in a SE to NW direction.

A Geonics EM-61 metal detector and a Gem GSM-19 magnetometer were the primary instruments used for the survey. Thick vegetation and steep slopes prevented use of the EM-61 over the entire grid. Rather, it was used in a free traversing mode across clear areas and to confirm targets found with the magnetometer.

Instruments used for the utility pipeline mark out are as follows: Ridgid line tracer, Fischer M-scope, and Schonstedt magnetic gradiometer. Data from the utility instruments are normally not recorded and stored for future processing. Instead, the display meters are monitored continuously during the traverses to detect subsurface anomalies. The location of pipes and utility lines are marked on the ground and then transferred to site plans or aerial photos.

Equipment Description and Survey Fundamentals

The Geonics EM-61 instrument is a high resolution, time-domain device for detecting buried metal objects. It consists of a powerful transmitter that generates a pulsed primary magnetic field when its coils are energized, which induces eddy currents in nearby objects. The decay of the

eddy currents, following the input pulse, is measured by the receiver coils. By making the measurements at a relatively long time interval (measured in milliseconds) after termination of the primary pulse, the response is nearly independent of the electrical conductivity of the ground. Thus, the instrument is a super-sensitive metal detector. Due to its unique coil arrangement, the response curve is a single well-defined positive peak directly over a buried conductive object. This facilitates quick and accurate location of targets.

The GSM-19 is a portable high sensitivity magnetometer made by GEM Systems. This instrument provides measurements of the Earth's total magnetic field with a resolution of 0.10 nT and 0.2 nT accuracy over its entire range. A built in GPS receiver is part of the recording console. A notch 60 Hz filter helps to reduce effects from overhead and underground power lines. Spatial variations in the field as recorded along profiles lines or over a grid, are primarily the result of changes in the magnetic mineral content of the rock or soil. Iron objects and cultural features such as fences, buried pipelines and well casing will also produce a magnetic variation or "anomaly".

The Schonstedt magnetic gradiometer has two flux gate magnetic sensors that are passed closely to and over the ground. When not in close proximity to a magnetic object, the instrument emits a sound signal at a low frequency. When the instrument passes over a buried iron or ferrous metal object that produces a significant magnetic gradient, the frequency of the emitted sound increases. The frequency is a function of the gradient between the two sensors.

The Ridgid utility locator is used to passively detect energized high voltage electric lines and electrical conduit (50-60 Hz), VLF signals (14-22 kHz), as well as to actively trace other utilities. Where risers are present, the utility locator transmitter can be connected directly to the object to send a signal (9.8-82 kHz) along the conductor, pipe, conduit, etc. In the absence of a riser, the transmitter can be used to impress an input signal on the utility by induction. In either case, the receiver unit is tuned to the input signal, and is used to actively trace the pipe's surface projection.

Summary of Results

The Magnetic Contour Map displayed on Figures 2 shows the location of two suspected oil well casings. They are marked by a circular purple symbol. The amplitude and lateral extent of an oil well anomaly is primarily a function of casing length, thickness, and diameter. Because of contour interpolation and possible geometric effects from the induced fields, the well locations are thought to be accurate to about ± 2 feet.

The possible well location posted near grid coordinates (x=100, y=40) is considered uncertain because full access was limited by a large tree and waste high vegetation. Based on the measurements around this area, the suspected casing appears to be beneath the tree. The well target near (x=55, y=5) is open and accessible, and was detected with the EM-61. This indicates the top of casing is relatively shallow (i.e. 0-6 feet depth).

A prominent mag and EM anomaly was detected near grid coordinate (x=55, y=35) and is highlighted on Figure 2. The source is thought to be a fairly large metal object, about 3-5 feet in length. The SE half of this feature is located under bushes, but the NW side is clear (see photo on Figure 4).

The south side of the grid, near the power pole and metal fence, is littered with metal debris at the ground surface and along the south facing slope.

No active utility lines were detected across the top of the property. The electric control box next to the power pole is not functional. Water and electric were found at the NW corner of the grid, but do not extend onto the property.

Geophysical Survey Limitations

It should be understood that limitations inherent in geophysical instruments and/or surveying techniques exist at all sites, and nearly all sites exhibit conditions under which instruments and survey methodology may not perform optimally. Consequently, the detection of buried objects in all circumstances **cannot be guaranteed**. Such limitations are numerous and include, but are not limited to, rebar-reinforced ground cover, abrupt changes in ground cover type, above-ground obstacles preventing full traverses or traverses in one direction only, above-ground conductive objects interfering with instrument signal, nearby powerlines or EM transmitters, highly conductive background soil conditions, limited GPR penetration, non-metallic targets, shallower or larger objects shielding deeper or smaller targets, tracing signal jumping from one line to another, and inaccessible risers, cleanouts, valve boxes, and manholes. If one or more geophysical instruments is rendered ineffective and cannot be utilized, the quality of the survey can be somewhat degraded.

Subsurface Surveys reports may include maps and site plans. While they are an accurate general representation of the survey area and our findings, they are not of engineering quality (i.e., measured and mapped by a licensed land surveyor).

Subsurface Surveys and Associates makes no guarantee either expressed or implied regarding the accuracy of the findings and interpretations present. And, in no event will Subsurface Surveys and Associates be liable for any direct, indirect, special, incidental, or consequential damages resulting from interpretations and opinions presented herewith.

All data acquired during this survey is considered confidential and is available for review by your staff at any time. We appreciate the opportunity to participate in this project.

Please call if there are any questions.

Phillip A. Walen
Senior Geophysicist
CA Registration No. GP917

Client Ref. No: 2759.0001L00

Attn: Paola Gomez-Birenbaum

Date Sampled: 5/17/2016

Project: 1300 Court Partners
Project Address: 1346 W. Courts Street
Los Angeles, CA

Date Received: 5/17/2016

Date Analyzed: 5/17/2016

Physical State: Soil Gas

ANALYSES REQUESTED

1. ASTM D1946 – Fixed Gases

Sampling – Soil Gas samples were collected in Tedlar bags.

Analytical – Soil Gas samples were analyzed using ASTM D1946 by GC/TCD. All samples were injected into the GC/MS system within 6 hours of sampling.

ANALYSES REQUESTED

1. EPA 8260B - Volatile Organics by GC/MS + Oxygenates/Gasoline Range Organics

Sampling – Soil Gas samples were collected in glass gas-tight syringes equipped with Teflon plungers.

A tracer gas, n-pentane, was placed at the tubing-surface interface before sampling. This compound was analyzed during the 8260B analytical run to determine if there were surface leaks into the subsurface due to improper installation of the probe. N-pentane was not found in any of the samples reported herein.

The sampling rate was approximately 200 cc/min, except when noted differently on the chain of custody record, using a glass gas-tight syringe. Purging was completed using a pump set at approximately 200 cc/min, except when noted differently on the chain of custody record. A default of 3 purge volumes was used as recommended by July 2015 DTSC/RWQCB guidance documents.

Prior to purging and sampling of soil gas at each point, a shut-in test was conducted to check for leaks in the above ground fittings. The shut-in test was performed on the above ground apparatus by evacuating the line to a vacuum of 100 inches of water, sealing the entire system and watching the vacuum for at least one minute. A vacuum gauge attached in parallel to the apparatus measured the vacuum. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum did not change noticeably. The soil gas sample was then taken.

No flow conditions occur when a sampling rate greater than 10 mL/min cannot be maintained without applying a vacuum greater than 100 inches of water to the sampling train. The sampling train is left at a vacuum for no less than three minutes. If the vacuum does not subside appreciably after three minutes, the sample location is determined to be a no flow sample.

Analytical – Soil Gas samples were analyzed using EPA Method 8260 that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Sampling Blanks were analyzed every 12 hours as prescribed by the method. In addition, a Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) were analyzed with each batch of Soil Gas samples. A duplicate/replicate sample was analyzed each day of the sampling activity. All samples were injected into the GC/MS system within 30 minutes of sampling.

Approval:

Steve Jones, Ph.D.
Laboratory Manager

Qualifications of Key Project Personnel

Mauricio H. Escobar, P.G. Principal Geologist

Technical Specialties:

Professional Geologist with over eighteen years of experience with land development projects and evaluation of site constraints, and alternatives for real estate transactions and redevelopment. Recent projects in Southern California include vapor barrier design for VOCs beneath a high-end residential multi-family development; evaluation and quantification of contaminated soils at a former petroleum tank farm and lumber yard slated for industrial redevelopment; design and implementation of an emulsified vegetable oil injection program at a commercial facility to be sold for redevelopment; and risk evaluation and vapor intrusion assessment at commercial shopping center facilities under the oversight of state agencies.

Significant experience designing, managing, and implementing environmental investigations for characterization and remediation of soil and groundwater plumes at industrial, commercial, and residential properties. Substantial experience strategizing, budgeting, negotiating, and coordinating field investigations for facility closures on behalf of public and private clientele. Extensive field experience using various drilling, soil sampling, groundwater sampling, and soil vapor sampling techniques.

Experience implementing multiple remediation technologies including SVE, DPE, ISCO, pump and treat, thermal, and traditional dig and haul. Worked full-time for 3 years in the Torrance offices of a Fortune 100 Company directly assisting with management of a complex remediation portfolio.

Experience Summary:

18 years of consulting experience: Principal Geologist with Roux Associates (2011 to Present); Senior Manager, Manager, and Senior Associate with ENVIRON International Corporation (2004 to 2011); Project Geologist with URS Corporation (2001 to 2004); Geologist with Hart Crowser (1998 to 2001).

Credentials:

Bachelor of Arts, Earth Science, 1995

University of California, Berkeley

Professional Geologist, State of California, No. 07506

OSHA 40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER) Certified

Research Assistant to UC Berkeley Ph.D. Candidate Dawnika L. Blatter and Professor Ian S. E. Carmichael in Study of Continental Crustal Deformation from Subduction of the Cocos Plate in Western Mexico and Study of Upper Mantle Petrology in Central Mexico, January to April 1996

Continuing Education:

Compounds of Emerging Concern in Groundwater, California Groundwater Resources Association, Concord, California, February 2012

The Remediation Course, Princeton Groundwater, Las Vegas, Nevada, April 2010

Vapor Intrusion Pathway: A Practical Guideline, Interstate Technology and Regulatory Council (ITRC) in conjunction with the California Department of Toxic Substances (DTSC) and California Water Boards, Long Beach, California, June 2009

The Groundwater Pollution and Hydrology Course, Princeton Groundwater, Orlando, Florida, February 2007

Hydrogeologic Analysis of Fractured Bedrock Systems, Midwest GeoSciences Group, University of Nevada Las Vegas and Nevada Test Site at Yucca Mountain, March 2006

Technical Presentations:

Prevalence and Persistence of Hexavalent Chromium During In-Situ Chemical Oxidation of Trichloroethylene with Permanganate, Antony D. G. Jones and Carol L. Serlin, ENVIRON, Irvine, CA; Mauricio H. Escobar, ENVIRON, Los Angeles, CA; George D. Havalias and Maria C. Echarte, American Analytics, Inc., Chatsworth, CA. The 19th Annual AEHS Meeting and West Coast Conference on Soils, Sediments, & Water, San Diego, California, March 2009

Assessment of Microbial Community Composition Throughout In-Situ Chemical Oxidation of Trichloroethylene with Permanganate, Bram Sercu and Patricia Holden, UCSB, Santa Barbara, CA; Antony D. G. Jones and Carol L. Serlin, ENVIRON, Irvine, CA; Mauricio H. Escobar, ENVIRON, Los Angeles, CA. The 19th Annual AEHS Meeting and West Coast Conference on Soils, Sediments, & Water, San Diego, California, March 2009

Evaluation of the Effects of ISCO on TCE Impacted Ground Water in Weathered Granitic Mass, Mauricio H. Escobar, ENVIRON, Los Angeles, CA; Antony D. G. Jones and Carol L. Serlin, ENVIRON, Irvine, CA. The 6th International Conference on Oxidation and Reduction Technologies for In-Situ Treatment of Soil and Groundwater, San Diego, California, September 2008

Assessing Sources of Hexavalent Chromium during In-Situ Chemical Oxidation of Trichloroethylene with Permanganate, Antony D. G. Jones and Carol L. Serlin, ENVIRON, Irvine, CA; Mauricio H. Escobar, ENVIRON, Los Angeles, CA. The 6th International Conference on Oxidation and Reduction Technologies for In-Situ Treatment of Soil and Groundwater, San Diego, California, September 2008

Aggressive DNAPL Remedial Program Replaces Conventional Methods and Facilitates Property Transaction, Mauricio H. Escobar, Bitá Tabatabai, and Douglas Jones, ENVIRON, Irvine, CA. The 4th International Conference on Oxidation and Reduction Technologies for In-Situ Treatment of Soil and Groundwater, Chicago, Illinois, October 2005

Key Projects:

- **Multi-Family Redevelopment of a Former Industrial Parcel, Major Developer, San Jose, California**

In early 2013, Roux Associates was contracted by a major multi-family developer to provide engineering services for the design and construction of passive and active sub-slab vapor mitigation systems (VMS) to mitigate the potential risk to indoor intrusion from residual chlorinated solvents from prior industrial uses.

Roux Associates collaborated with the project architect, various engineering teams, and the general contractor to complete a final design that was incorporated into the project budget and master schedule for construction. After permits were secured, Roux Associates assisted in preparing the construction bid specifications and is providing engineering quality control and assurance for VMS construction. All work is being documented in a construction completion report, which includes an Operations and Maintenance Plan for the VMS. After construction, Roux Associates will continue to provide operations and maintenance of the VMS and compliance reporting in accordance with the air permit.

Mauricio H. Escobar, P.G. Principal Geologist

- **Residential Redevelopment of 100-acre Oil Field Parcel, Institutional Capital Investor, Oxnard, California**

Roux Associates was recently engaged by an institutional capital investor to review the history of a 100-acre oil field parcel that is planned for residential redevelopment with 300 single family homes. Our main focus for this assignment is to identify: potential data gaps, potential risks to our client (the investor), and regulatory drivers that could affect the plans that have been developed for remediation. Remedial costs developed by others will be scrutinized for vapor mitigation systems, soil vapor extraction, groundwater treatment, and soil disposal. In addition, contingency planning will be conducted in the event remediation plans do not follow the path outlined by others.

- **Commercial Redevelopment of Arsenic-Impacted Site, JV Between a Major Developer and Construction Company, Torrance, California**

In early 2013, Roux Associates was brought on-board following completion of Phase I and Phase II work by others to evaluate alternatives for remediation of arsenic-impacted soils on an expedited timeframe for a former oil production site being redeveloped with a national pharmacy chain store. The impacted area was formerly occupied by rail lines that crossed the Site and was therefore, a critical path item for Site construction.

Rather than proposing to excavate and dispose of all shallow soils shown to be impacted with arsenic concentrations above regulatory action levels, Roux Associates designed and implemented an innovative approach, to accurately characterize and surgically excavate contaminated soils. Site-wide and regional soil arsenic concentrations were used to derive a site-specific background concentration used for cleanup decisions, thus saving considerable time and remediation costs.

Field activities consisted of soil sampling, profiling for landfill disposal, and oversight of soil excavation. The Site was successfully remediated and the new commercial business will have its grand opening in December 2013.

- **Industrial Redevelopment of a Former Petroleum Tank Farm and Lumber Yard, Major Developer, Orange County, CA**

From December 2012 to the present, Roux Associates has been involved with the historical assessment, site characterization, and remediation of a 6.5-acre parcel that was historically used as a large petroleum tank farm and later as a lumber yard. The project began with a Phase I Environmental Site Assessment. Based on the findings of the Phase I ESA, Roux Associates recommended a Phase II ESA for the Site. The Phase II investigation identified soil petroleum and methane impacts in the area of former on-site underground fuel tanks, a former petroleum-related settling pond, an on-site rail spur, and former large aboveground petroleum storage tanks. The scope of work included collection of soil and soil gas, and a methane study for the Site, in accordance with local mandates and specifications.

Following Phase II activities, a site-wide trenching investigation was conducted to identify and quantify the volumes of impacted soils potentially requiring export. Upon

characterization of soil impacts, a Removal Action Workplan was written. Remedial activities will be a part of the greater construction grading and demolition schedule and will be the first action completed following final project approval by the local authorities. Site redevelopment is presently on schedule to begin in early 2014.

- **Portfolio Project Control – Fortune 100 Company, Torrance, CA**

Three years of experience working as a full-time in-house consultant for a Fortune 100 Company assisting with management of all aspects of a complex multi-site portfolio. General role included communication with alliance partners, vendors, corporate finance, attorneys, public relations/communications, and procurement to track and facilitate progress of 9 major projects (\$400,000 to \$1 MM/year) and 3 mega projects (\$3MM to \$10MM+/year) that were unique in nature and complexity. Portfolio included former chemical sites, landfills, aerospace facilities, and other heavy use industrial facilities that were undergoing State and RCRA closure, as well as sites under CERCLA Superfund actions with PRP commitments. Charged with helping to develop, evaluate, and refine remedial strategies and lifecycle costs for sites that utilized various cleanup technologies such as application of oxidants and reducing agents, thermal oxidation, groundwater pump and treat, dual-phase and 2-PHASE™ extraction, soil vapor extraction, air sparging, and in-well air stripping. Major role included verifying adequate funding and maintaining documentation consistent with Sarbanes Oxley.

- **Strategy Expert Consulting – Fortune 100 Company, Los Angeles, CA**

Ongoing third-party technical and strategic support to a Fortune 100 company for a major project involving former bulk storage and distribution facilities converted to open public space and residential uses. Site is undergoing remedial investigations and remedial alternatives evaluations under heavy regulatory and public scrutiny. Charged with providing opinions and recommendations as to the direction the current consultant and the regulatory agencies want to take the project and evaluating the conceptual site model and long term technical strategy. Active participant on technical team calls and ongoing direct communications with internal legal team.

- **Shipyard Decommissioning – Subsurface Assessment, Remedial Investigation, Demolition and Closure, Campbell Shipyard – Marco, Port of San Diego, California.**

Lead geologist in the preparation of a comprehensive subsurface study of the former Campbell Shipyard property at the Port of San Diego, California. Over 200 borings were necessary to delineate the extent of impacted soils. Relevant environmental issues included a former coal works gasification plant immediately adjacent to the Site, a 2 to 4-foot thick lens of polynuclear aromatic hydrocarbon (PAH) laden sediment present throughout the Site below the water table, a former on-site diesel and kerosene tank farm, and numerous leaking fuel USTs. Responsibilities also included management of shipyard abandonment activities, such as abatement of asbestos and lead-based paint containing materials, demolition of on-site structures, crushing of asphalt and concrete into Class II base, and a comprehensive geophysical survey to locate all on-site utilities and buried structures. The work was performed under the regulatory

Mauricio H. Escobar, P.G. Principal Geologist

oversight of the San Diego Regional Water Quality Control Board and the San Diego Unified Port District. Total cost of the work was approximately \$1.3MM, implemented over a 15 month period.

- **ISCO Demonstration Plan Using Permanganate, Wyle Laboratories, Riverside County, California.**

Designed, managed, and implemented an ISCO Demonstration Plan using sodium permanganate injection at a former industrial manufacturing facility in Southern California. Main goals of the application were to demonstrate effective oxidation of trichloroethene (TCE) in alluvium and fractured granitic bedrock, evaluate potential mobilization of naturally occurring reduced metals, and evaluate the potential application of ISCO at other areas of the Site, including off-site beneath residential homes. Twelve thousand gallons of 10% permanganate solution were delivered to the subsurface through 47 multi-depth permanent injection probes over a 22 day field event. TCE concentrations were reduced from a maximum of 30,000 microgram per liter ($\mu\text{g/L}$) to non-detect at the source area. Significantly, elevated hexavalent chromium [Cr(VI)] concentrations were observed in the area of injection and immediately downgradient.

Following field observations, a Bench Scale Assessment (BSA) was conducted to evaluate potential significant sources of Cr(VI), evaluate the capacity of the aquifer to naturally attenuate Cr(VI), and provide data sufficient to estimate distance and time Cr(VI) would revert to its trivalent form. BSA and field data showed that principal source of Cr(VI) was from the raw product, with secondary contribution from chromium in the native rock, and deterioration of stainless steel well screens. Natural attenuation of Cr(VI) to background concentrations was estimated at 2 to 3 years post injection. Monitoring of the Demonstration Plan area for the 2+ years has proved those predictions accurate and a Remedial Action Plan (RAP) recommending full-scale on- and off-site treatment of TCE with permanganate was submitted to the California Department of Toxic Substances Control (DTSC). Total cost of the work was \$1.0MM+.

- **Remedial Excavation and ISCO Used to Facilitate Property Transfer, Sanmina, Inc., Irvine, California.**

Managed and implemented an aggressive remedial strategy for a former electronics manufacturing facility in Southern California. The site had TCE concentrations in groundwater suggestive of dense non-aqueous phase liquid (DNAPL) and required expedited soil and groundwater remediation, in lieu of ongoing 2-PHASE™ and dual-phase extraction (DPE) efforts, to accommodate its divestiture and redevelopment. Groundwater was generally encountered at 15 feet below ground surface (bgs) and contained TCE concentrations in the source area as high as 77,000 $\mu\text{g/L}$. The project was successfully completed by installing a 90-well dewatering system, excavating 13,000 cubic yards (cy) of soils, and removing 3,200 cy of TCE impacted soil along the axis of a residual TCE DNAPL mass; total depth of the excavation was 32 feet bgs. ISCO using sodium and potassium permanganate was used to remediate residual TCE-impacted soil and groundwater outside the area of excavation. Following implementation of the aggressive remedial strategy, TCE concentrations in groundwater were reduced by one to three orders of magnitude, suggesting the DNAPL had been removed and/or destroyed. The Orange County Health Care Agency (OCHCA) provided soils closure and the Santa Ana

Regional Water Quality Control Board provided groundwater closure for the site 16 months after completion of remediation. The site was sold and redeveloped. Total cost of excavation and ISCO application was approximately \$1.4MM.

- **Assessment, Remediation and Closure of Former Industrial Facility for Residential Re-development, Former Boeing Plant, Los Angeles, California.**

Managed the assessment, remediation, and closure of a former asphalt batch plant and defense contractor facility on behalf of a residential developer. The work was performed simultaneously with planning and entitlement of the property, under the oversight of the County of Los Angeles Fire Department, Hazardous Materials Division. Unique challenges included the discovery of 15+ feet of buried asphalt debris and soils with elevated arsenic and chromium concentrations requiring off-site disposal. Developed site-specific cleanup thresholds for VOCs and heavy metals by preparing a limited human health risk assessment and incorporating Risk Based Screening Levels (RBSLs) developed by the San Francisco Regional Water Quality Control Board. The entire project was implemented in 15 months from initial assessment to site closure at a cost of \$250,000.

- **PRP Representation of Fortune 100 Company, Omega Chemical Superfund Site, Whittier, California**

Provide ongoing technical consulting to a Fortune 100 Company and major PRP at the Omega Chemical Superfund Site in Whittier, California. Active participant of the Omega PRP Group (OPOG) Technical Committee. Attend all pertinent technical meetings and provide Client with technical and strategic input that protects their best interests. Maintain constant interaction with the legal and finance teams as necessary to ensure the technical and legal strategies are in agreement and that adequate funding is reserved well in advance of regulatory commitments and OPOG cash calls. Pertinent technical issues include soil gas and vapor intrusion, and a regional groundwater plume. Regulatory oversight is provided by USEPA Region IX.

- **PRP Representation of Fortune 100 Company, BKK Corporation Class I Landfill Organized Group, West Covina, California**

Provide ongoing technical consulting to a Fortune 100 Company at the former BKK Corporation Class I Landfill site in West Covina, California. Participant in the BKK Technical Committee and attendant of pertinent technical meetings. Maintain constant communication with the Client's legal and finance teams and responsible for informing Client on the direction the Organized Group is headed. Responsible for identifying financial commitments made as part of technical decisions. Trusted with voicing opinions, concerns, and/or offering direction to the Group (if and when necessary), to ensure the Organized Group's direction is consistent with the Client's strategy. Pertinent technical issues include upgrades to the landfill infrastructure and groundwater remedial investigations in and around the landfill prism. Regulatory oversight is provided by the Department of Toxic Substances Control.
