Date of Report: April 30, 2020

On Site Date: February 28, 2019

Project Summary Table

Report Section	Acceptable	Routine Solution	Phase II	REC	Estimated Cost
Significant Data Gaps	Yes				
Current Use of Project	Yes				
Hazardous Materials	Yes				
Storage Tanks	Yes (1)			No	N/A
Waste Generation	No (2)	Yes		No	N/A
Surface Areas	Yes				
Adjoining Property Use	Yes				
Historical Review	Yes (3)			No	N/A
Project Regulatory Database Review	Yes (4)			Historical	N/A
Off-Site Regulatory Database Review	Yes				
Vapor Migration	Yes				
Asbestos	No (5)	Yes		No	\$499
Radon Gas	Yes				
Lead-Based Paint	Yes				
Lead in Drinking Water	Yes				
Moisture Conditions	No (6)	Yes		No	Refer to PCA

Conditions noted in the Project Summary Table are representative of the overall conditions of the property. The Project Summary Table should not be used as a stand alone document. REC - Recognized Environmental Condition, as defined by ASTM E1527-13.

Footnotes:

1. A "gasol" pump was identified in the southeastern corner of 511 South Arroyo Parkway based on Sanborn maps dated 1950 and 1970. "Gasol" is an abbreviated term for gasoline, which is used on Sanborn maps during this time period. A "gasol" pump generally consists of a fuel dispenser and most commonly a mechanical pump and nozzle. Based on the lack of information related to the historical presence of a "gasol" pump on-site, Ramboll US Corporation (Ramboll) conducted a Phase II Environmental Site Assessment to evaluate the subsurface conditions in the vicinity of the pump. On February 13, 2018, Spectrum Geophysics of Chatsworth conducted a geophysical survey to mark subsurface utility lines, subsurface structures, and underground obstructions in the area of concern. During the geophysical survey, two approximately 2-inch diameter metal conduits were observed extending above ground surface in the general vicinity of the former "gasol" pump. One conduit was located within an elevated concrete pad, extended approximately three inches above the ground surface and was backfilled with concrete. The second conduit extended approximately two inches above the ground surface and was open to an approximate depth of five feet below ground surface (bgs). A petroleum-like odor was noted on the measuring tape used to measure the total depth of the open conduit. Finally, a subsurface metallic anomaly, suggestive of piping, was detected approximately 0.5 foot bgs and extended laterally between the two aforementioned conduits. Two soil borings were also advanced to 20 feet bgs in the vicinity of the former pump. Soil samples were collected from borings at approximate depths of 5, 10, 15, and 20 feet and were field screened for organic vapors with a photoionization detector (PID).

The soil samples were also submitted to a laboratory for the analysis of volatile organic compounds (VOCs), oxygenates and methyl tert butyl ether (MTBE), total petroleum hydrocarbons (TPH)-gasoline range organics (GRO), TPH-diesel range organics (DRO), TPH-oil range organics (ORO), and lead. Groundwater samples were not collected due to the typical depth to groundwater in the area (more than 140 feet bgs). No VOC, MTBE or TPH were detected in soil samples. Lead was detected at concentrations ranging from 3.8 mg/kg to 10 mg/kg; however, all concentrations were below the USEPA regional screening levels for residential and commercial/industrial use, and within typical background levels for California. Based on this information, the former "gasol" pump represents a de minimis condition associated with the Project. No further action or investigation is recommended.

2. One cooking grease bin and an in-ground grease trap which are not currently in use were identified at the vacant former Margarita Jones restaurant (541 South Arroyo Parkway) and an additional in-ground grease trap which is not currently in use was identified at the vacant former Dona Rosa Bakery and Taqueria (577 South Arroyo Parkway) located on the southwest portion of the Project. In addition, a 55-gallon drum was observed on the southwest portion of the Project. According to labeling on the drum, the contents are "Non-hazardous" and consist of soil cuttings that were generated during the completion of a subsurface investigation at the Project in 2018. No evidence of releases from the grease bin, traps or drum, such as staining or dead vegetation, was observed. The cooking grease in the bin and any remaining cooking grease located in the grease traps, as well as the contents of the soil cutting drum, should be disposed by a licensed contractor in accordance with applicable regulations.
3. The review of the historical data available for the Project identified that a bus facility (and later a distributing company, auto repair facility, tire center and auto detailing shop) with an associated fueling station was located on the northern portion of the Project, in the area of the current Whole Foods store, from approximately the 1930s through 2007. Sanborn Maps from 1950 through 1970 depicted "gas and oil tanks" in the southern portion of the Whole Foods site. Furthermore, a UST was formerly associated with 455 South Arroyo Parkway, in the area of the current Whole Foods store. No details regarding the size or contents of the UST were provided. Additionally, Absolute Automotive at 451 South Arroyo Parkway was also listed on the historical auto station database which may have also been associated with this address/business. No records regarding the installation or removal of USTs were found during this assessment. Based on the fact that a three-story underground parking garage was constructed at the Whole Foods building, it appears likely that any onsite USTs or potentially contaminated soils associated with USTs would have been excavated and removed during the construction of the parking garage. Based on the excavation of onsite soils during the redevelopment in 2008 and anticipated depth to groundwater, the former bus fueling facility and historical USTs do not appear to represent a recognized environmental condition. No further action or investigation is recommended at this time.
4. The review of the historical data available for the Project and the regulatory database report identified that a service station, the former ARCO station located at 125 East California Boulevard, was located at the Project from approximately the 1930s to 2002 and utilized at least three USTs. This facility was located on the southern portion of the Project, the site of the current vacant restaurant at 577 South Arroyo Parkway. An unauthorized gasoline release impacting groundwater was first reported in 1988 and soil vapor extraction operations were initiated. In 1998, three USTs were removed from the site and various soil and groundwater investigations were subsequently conducted. The Project received a "no further action" letter from the Pasadena Fire Department dated May 24, 2000; however, the site also received an additional clarification letter regarding the "no further action" letter stating that while the site has complied with the regulatory requirements for the site investigation/remediation, contamination remained at the Project below regulatory action levels. A Declaration of Environmental Restriction allowing access for remediation was recorded on August 21, 2002 that was to terminate 90 days after No Further Action was received. Quarterly monitoring was completed and 761 cubic yards of soil was removed. The LARWQCB granted case closure on December 3, 2004 with no property use restrictions, activity and use limitations, institutional controls, or engineering controls. The monitoring wells were abandoned in 2005. Based on the "no further action" status, the historical use of the Project as a service station represents a historical recognized environmental condition. No further action or investigation is recommended at this time.

5. Based on the date of construction (1921, 1925, 1951, 2003 and 2008), there is a potential that asbestos containing materials (ACM) exist at the Project. The suspect asbestos containing roofing materials, ceiling tile, wallboard/joint compound, vinyl floor tile, vinyl sheet flooring and various mastics were observed in generally good condition with the exception of some limited areas of damage noted in the 499/511 Building and the 577 Building. These materials can be maintained in place if an Operations and Maintenance (O&M) Program is developed and implemented. A properly designed O&M Program is sufficient to maintain the materials in accordance with current regulatory standards.
6. Moisture conditions (including standing water on the floors) were observed on the ceiling, wall and floor areas at the 499/511 Building (currently a vacant building). The areas affected by the moisture were approximately 320 square feet in size. In addition, moisture conditions were observed on the second floor ceiling tiles at the 577 Building (former Dona Rosa Bakery and Taqueria). The areas affected by the moisture were approximately 20 square feet in size. Refer to the EMG Property Condition Assessment (PCA) report (EMG Project Number 136895.19R000-001.264) for further discussion.

1.0 Executive Summary

EMG performed a Phase I Environmental Site Assessment of the property summarized below on February 28, 2019.

Project Description	
Project Name:	465, 491, 503, 525 and 577 South Arroyo Parkway (the "Project")
Project Address:	465, 491, 503, 525 and 577 South Arroyo Parkway, Pasadena, Los Angeles County, California 91105
Additional Current/Historical Addresses:	441-577 South Arroyo Parkway; 112-118 East Bellevue Drive; 101-125 East California Boulevard
Assessor Parcel Number(s):	5722-008-002, 5722-008-012, 5722-008-016, 5722-008-017, 5722-008-019
Site Visit Date:	February 28, 2019
Property Type:	Retail
Land Area (acres)/Source:	3.3 from assessing records
Number of Units:	8 units
Number of Buildings:	8
Year Constructed:	1921 (499/501/511), 1925 (485-497), 1951 (523/541), 2003 (577), and 2008 (441-483)
Basement:	Yes (499 Building and Subterranean Parking Garage in 441-483 Building)
Building Area (SF)/Source:	147,725 from client provided information (rent roll)
Domestic Sewage:	Public utility - City of Pasadena

East elevation of Project

East elevation of Project

East-southeast elevation of Project

Northeast elevation of 441-483 Building (Whole Foods)

1.1 Findings, Opinions, & Conclusions

EMG performed a *Phase I Environmental Site Assessment* using methods and procedures consistent with good commercial and customary practice in conformance with ASTM E1527-13 of 465, 491, 503, 525 and 577 South Arroyo Parkway, Pasadena, Los Angeles County, California 91105. Any exceptions to, or deletions from, this practice are described in Section 2 of this report.

This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), significant data gaps, or significant business environmental risks in connection with the Project, except as discussed below.

Storage Tanks

De Minimis Condition: Historic "Gasol pump" identified

A "gasol" pump was identified in the southeastern corner of 511 South Arroyo Parkway based on Sanborn maps dated 1950 and 1970. "Gasol" is an abbreviated term for gasoline, which is used on Sanborn maps during this time period. A "gasol" pump generally consists of a fuel dispenser and most commonly a mechanical pump and nozzle. Based on the lack of information related to the

historical presence of a "gasol" pump on-site, Ramboll US Corporation (Ramboll) conducted a Phase II Environmental Site Assessment to evaluate the subsurface conditions in the vicinity of the pump. On February 13, 2018, Spectrum Geophysics of Chatsworth conducted a geophysical survey to mark subsurface utility lines, subsurface structures, and underground obstructions in the area of concern. During the geophysical survey, two approximately 2-inch diameter metal conduits were observed extending above ground surface in the general vicinity of the former "gasol" pump. One conduit was located within an elevated concrete pad, extended approximately three inches above the ground surface and was backfilled with concrete. The second conduit extended approximately two inches above the ground surface and was open to an approximate depth of five feet below ground surface (bgs). A petroleum-like odor was noted on the measuring tape used to measure the total depth of the open conduit. Finally, a subsurface metallic anomaly, suggestive of piping, was detected approximately 0.5 foot bgs and extended laterally between the two aforementioned conduits. Two soil borings were also advanced to 20 feet bgs in the vicinity of the former pump. Soil samples were collected from borings at approximate depths of 5, 10, 15, and 20 feet and were field screened for organic vapors with a photoionization detector (PID). The soil samples were also submitted to a laboratory for the analysis of volatile organic compounds (VOCs), oxygenates and methyl tert butyl ether (MTBE), total petroleum hydrocarbons (TPH)-gasoline range organics (GRO), TPH-diesel range organics (DRO), TPH-oil range organics (ORO), and lead. Groundwater samples were not collected due to the typical depth to groundwater in the area (more than 140 feet bgs). No VOC, MTBE or TPH were detected in soil samples. Lead was detected at concentrations ranging from 3.8 mg/kg to 10 mg/kg; however, all concentrations were below the USEPA regional screening levels for residential and commercial/industrial use, and within typical background levels for California. Based on this information, the former "gasol" pump represents a de minimis condition associated with the Project.

No further action or investigation is recommended.

Waste Generation

Business Environmental Risk: Unused cooking grease bin, grease traps and soil cutting drum identified

One cooking grease bin and an in-ground grease trap which are not currently in use were identified at the vacant former Margarita Jones restaurant (541 South Arroyo Parkway) and an additional in-ground grease trap which is not currently in use was identified at the vacant former Dona Rosa Bakery and Taqueria (577 South Arroyo Parkway) located on the southwest portion of the Project. In addition, a 55-gallon drum was observed on the southwest portion of the Project. According to labeling on the drum, the contents are "Non-hazardous" and consist of soil cuttings that were generated during the completion of a subsurface investigation at the Project in 2018. No evidence of releases from the grease bin, traps or drum, such as staining or dead vegetation, was observed.

The cooking grease in the bin and any remaining cooking grease located in the grease traps, as well as the contents of the soil cutting drum, should be disposed by a licensed contractor in accordance with applicable regulations.

Historical Review

De Minimis Condition: Historical bus facility fueling station/USTs identified

The review of the historical data available for the Project identified that a bus facility (and later a distributing company, auto repair facility, tire center and auto detailing shop) with an associated fueling station was located on the northern portion of the Project, in the area of the current Whole Foods store, from approximately the 1930s through 2007. Sanborn Maps from 1950 through 1970 depicted "gas and oil tanks" in the southern portion of the Whole Foods site.

Furthermore, a UST was formerly associated with 455 South Arroyo Parkway, in the area of the current Whole Foods store. No details regarding the size or contents of the UST were provided. Additionally, Absolute Automotive at 451 South Arroyo Parkway was also listed on the historical auto station database which may have also been associated with this address/business.

No records regarding the installation or removal of USTs were found during this assessment. Based on the fact that a three-story underground parking garage was constructed at the Whole Foods building, it appears likely that any onsite USTs or potentially contaminated soils associated with USTs would have been excavated and removed during the construction of the parking garage. Based on the excavation of onsite soils during the redevelopment in 2008 and anticipated depth to groundwater, the former bus fueling facility and historical USTs do not appear to represent a recognized environmental condition.

No further action or investigation is recommended at this time.

Project Regulatory Database Review

Historical Recognized Environmental Condition: Historic service station identified

The review of the historical data available for the Project and the regulatory database report identified that a service station, the former ARCO station located at 125 East California Boulevard, was located at the Project from approximately the 1930s to 2002 and utilized at least three USTs. This facility was located on the southern portion of the Project, the site of the current vacant restaurant at 577 South Arroyo Parkway. An unauthorized gasoline release impacting groundwater was first reported in 1988 and soil vapor extraction operations were initiated. In 1998, three USTs were removed from the site and various soil and groundwater investigations were subsequently conducted. The Project received a "no further action" letter from the Pasadena Fire Department dated May 24, 2000; however, the site also received an additional clarification letter regarding the "no further action" letter stating that while the site has complied with the regulatory requirements for the site investigation/remediation, contamination remained at the Project below regulatory action levels. A Declaration of Environmental Restriction allowing access for remediation was recorded on August 21, 2002 that was to terminate 90 days after No Further Action was received. Quarterly monitoring was completed and 761 cubic yards of soil was removed. The LARWQCB granted case closure on December 3, 2004 with no property use restrictions, activity and use limitations, institutional controls, or engineering controls. The monitoring wells were abandoned in 2005. Based on the "no further action" status, the historical use of the Project as a service station represents a historical recognized environmental condition.

No further action or investigation is recommended at this time.

Asbestos

Business Environmental Risk: Suspect ACM Identified

Based on the date of construction (1921, 1925, 1951, 2003 and 2008), there is a potential that asbestos containing materials (ACM) exist at the Project. The suspect asbestos containing roofing materials, ceiling tile, wallboard/joint compound, vinyl floor tile, vinyl sheet flooring and various mastics were observed in generally good condition with the exception of some limited areas of damage noted in the 499/511 Building and the 577 Building.

These materials can be maintained in place if an Operations and Maintenance (O&M) Program is developed and implemented. A properly designed O&M Program is sufficient to maintain the materials in accordance with current regulatory standards.

Moisture Conditions

Business Environmental Risk: Moisture conditions identified

Moisture conditions (including standing water on the floors) were observed on the ceiling, wall and floor areas at the 499/511 Building (currently a vacant building). The areas affected by the moisture were approximately 320 square feet in size. In addition, moisture conditions were observed on the second floor ceiling tiles at the 577 Building (former Dona Rosa Bakery and Taqueria). The areas affected by the moisture were approximately 20 square feet in size.

Refer to the EMG Property Condition Assessment (PCA) report (EMG Project Number 136895.19R000-001.264) for further discussion.

1.2 Recommendations

EMG recommends the following:

Recommendation	Estimated Cost
The cooking grease in the bin and any remaining cooking grease located in the grease traps, as well as the contents of the soil cutting drum, should be disposed by a licensed contractor in accordance with applicable regulations.	Not Applicable
The development and implementation of an Asbestos O&M Program. Costs indicated are for O&M Program Document development only. Comprehensive survey costs, if required, will be identified as a result of O&M Program implementation.	\$499
Refer to the EMG Property Condition Assessment (PCA) report (EMG Project Number 136895.19R000-001.264) for further discussion of the identified moisture conditions.	To Be Determined

1.3 Certification

EMG certifies that EMG has no undisclosed interest in the subject property, that EMG's relationship with the Client is at arms-length, and that EMG's employment and compensation are not contingent upon the findings or recommendations provided in the Report.

If you have any questions regarding this report, please contact Kelly Hoover at (800) 733-0660 x6279 or khoover@emgcorp.com.

Environmental Professional and Reviewed By:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Kelly Hoover, Senior Environmental Consultant

1.4 Reliance

1. May be relied upon by Lender and its successor in determining whether to make a loan evidenced by a note "Property Note" secured by the Subject Property.
2. May be relied upon by any purchaser in determining whether to purchase the Property Note for this transaction from Lender.
3. May be relied upon by any Rating Agency in rating securities issued by Lender and representing an interest in the Property Note.
4. May be included with and referenced to in materials offering the Property Note or an interest in the Property Note for sale to intended third party beneficiaries to this Report, except as expressly stated herein.

Lender (to be identified), its parent, affiliates and their successors and assigns, bond holders and potential bond holders, the underwriters

of and securitization of the loan secured by the Property, the rating agencies rating such securitization, and each of such parties' counsel, are entitled to rely upon this Report and to use its contents and conclusions as may be appropriate. This report is also for the use and benefit of, and may be relied upon by, Allstate Insurance Company, an Illinois Insurance company, Arroyo Parkway, LLC, Arroyo Parkway Property Owner, LLC, Edgewood Realty Partners, LLC, Adept Development and The Kutzer Company, and any of their affiliates, partners, members, officers, employees, agents, assigns, and their respective heirs, executors, administrators, transferees, successors in interest, and third parties authorized in writing by Edgewood Realty Partners, LLC, and EMG, including the lender(s) in connection with a secured financing of the site, and their respective successors and assigns. The above mentioned parties agree by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the site that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of EMG, is at the sole risk and expense of such third party except as noted in the reliance language above.

2.0 Scope of Work

2.1 Purpose

The purpose of this report is to provide the Client the results of a commercially prudent and reasonable inquiry designed to identify recognized environmental conditions at the Project taking into account reasonably ascertainable information. In accordance with ASTM E1527-13, the level of environmental assessment was guided by several factors, including the type of property and the risk tolerance of the user.

The user informed EMG that the purpose of the assessment is for financing.

2.2 Scope of Work

The assessment was conducted utilizing generally accepted Phase I industry standards, using American Society for Testing and Materials (ASTM) Standard Practice E 1527-13.

This assessment is based on the evaluation of the information gathered, laboratory analyses of samples collected (when required), and accessibility at the time of the assessment.

The Scope of Work included an evaluation of:

- Interviews with individuals knowledgeable about the Project for the purpose of gathering information regarding the potential for contamination at the Project.
- Available pertinent documents obtained by EMG or provided by the client.
- Reasonably ascertainable federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project.
- The Project history in an attempt to identify possible ownership(s) and/or uses, as identified through review of reasonably ascertainable standard historical sources.
- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic data, wetlands, soils, geology, and groundwater data.
- Current Project conditions (as applicable) as they pertain to the presence or absence of: facility storage tanks, drums, containers (above or below ground), etc., transformers and other electrical equipment which utilize fluid which may potentially contain PCBs, the use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes.
- An evaluation of information contained in programs such as the NPL, SEMS, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify sites that represent a recognized environmental condition. The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The search is designed to meet the requirements of ASTM Standard Practice E 1527-13. The information provided is assumed to be correct and complete.
- Visual observation of the adjoining properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

2.3 ASTM E1527 Non-Scope Considerations

At the Client's request, the assessment included a screening approach for the following Non-ASTM Considerations, which are otherwise beyond the Scope of ASTM E1527-13.

Non-ASTM Considerations	
Asbestos Containing Materials:	The identification of suspect asbestos containing materials in accessible areas. Sampling of suspect materials was not performed.
Radon Gas:	Radon gas propensity, through the review of the USEPA's Map of Radon Zones.
Lead-Based Paint:	The identification of lead-based paint for residential and daycare properties constructed prior to 1978. Sampling of suspect materials was not performed.
Lead In Drinking Water:	A screening for lead in water, based on information provided by the municipal water provider.
Moisture Conditions:	The identification of visible moisture conditions and conditions conducive for moisture conditions. In addition, EMG interviewed Project personnel regarding any known or suspected moisture conditions, water intrusion, or mildew like odors.
Wetlands:	Review of readily available wetlands map data available from the US Fish and Wildlife Service. A site specific wetland delineation is beyond the scope of this assessment.
Flood Zone:	Review of readily available flood zone map designations available from regulatory agencies, such as the Federal Emergency Management Agency (FEMA).

3.0 User Provided Information

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments") (if desired), the user must provide certain information (if available) identified in the User Questionnaire to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Within this Phase I Environmental Site Assessment, EMG's reference to the Client follows the ASTM guide's definition of user, that is, the party that retains EMG for the preparation of a baseline ESA of the Project. A user may include, without limitation, a purchaser, potential tenant, owner, existing or potential mortgagee, lender, or property manager of the Project.

3.1 User Questionnaire

EMG submitted the following User Questionnaire to the user pursuant to the responsibilities described in Section 6 of ASTM Standard E 1527-13. All Appropriate Inquires (40 CFR Part 312) requires that these questions be answered by or on behalf of a party seeking to qualify for limited liability protections to CERCLA liability.

A completed User Questionnaire was not returned to EMG. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the User Questionnaire does not represent a significant data gap. A copy of the User Questionnaire is included in Appendix D.

3.2 Environmental Lien/AUL Search

The presence of an Activity and Use Limitation (AUL) at a property is an indication that there may be residual levels of hazardous substances or petroleum products present above unrestricted land use levels. Although Environmental Liens and AULs are often recorded with the property deed at the local land title office, in some cases they are filed in a separate environmental agency database or in project documentation, such as agency closure letters. ASTM E1527-13 does not require the environmental professional to undertake a review of recorded land title records and judicial records for environmental liens and AULs. Such a review is performed at the discretion of the user, based on their need to meet the requirements of 40 CFR 312.20 and 312.25.

The user did not engage EMG to review title and judicial records for environmental liens or AULs recorded against the Project. Furthermore, these documents were not provided to EMG for review. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the Environmental AUL/Lien search does not represent a significant data gap.

4.0 Physical Setting

ASTM E1527-13 requires that the current 7.5-minute USGS Topographic Map (or equivalent) showing the area on which the Project is located be reviewed. Additional physical setting sources, such as soil survey maps, groundwater maps and geologic maps may be obtained and reviewed at the discretion of the environmental professional. The purpose of this review is to evaluate whether hazardous substances or petroleum products are likely to migrate to the Project.

4.1 Topography

The most recent version of the USGS Topographic Map available is discussed below. Historical USGS Topographic Maps, if available, are discussed in Section 6.

USGS Topographic Map and Google Earth Review	
Topographic Map Name:	Pasadena, California
Topographic Map Year:	2015
Project Topography	
Upper Elevation (feet):	790
Lower Elevation (feet):	790
Surface Slope:	Relatively flat
Slope Direction:	South
General Vicinity Topography	
Slope Direction:	South
Nearest Surface Water Feature:	Arroyo Seco Creek
Nearest Surface Water Feature Distance:	5,950 feet
Nearest Surface Water Feature Direction:	West

4.2 Geology

The generalized geology of the Project area was researched using seamless USGS geological maps provided in the ERIS Physical Setting Report (PSR) and/or readily available geologic maps. The PSR is included in Appendix H.

Generalized Geology	
Source:	ERIS
Unit Name:	Quaternary alluvium and marine deposits
Primary Rock Type:	Alluvium
Secondary Rock Type:	Terrace

4.3 Hydrogeology

Groundwater conditions at the Project are estimated based on reasonably available data such as groundwater maps, previous subsurface investigations conducted at, or in the vicinity of the Project, and local conditions. Shallow groundwater flow is generally expected to follow the ground level slope of surface elevations towards the nearest open body of water. Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

Hydrogeology	
Source:	A previous subsurface investigation completed at the Project.
Estimated Depth to Shallow Groundwater:	146-155 feet below ground surface
Estimated Direction of Shallow Groundwater Flow:	South-southeast

4.4 Soils

The Soil Survey Geographic Database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Review of the SSURGO data available in the PSR (Appendix H) and/or from the NRCS Web Soil Survey identified the following soil type(s) at the Project:

Soil Series Name	Drainage	Texture
Urban land-Palmview-Tujunga complex	Well drained to somewhat excessively drained	Sandy loam and loamy sand

5.0 Site Reconnaissance

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property. In accordance with ASTM E1527-13, EMG attempted to visually observe the periphery of the Project and all structures to the extent not obstructed by obstacles. In addition, EMG attempted to visually observe interior common areas, maintenance and repair areas, and a representative sample of occupant spaces. In general, EMG does not look under floors, above ceilings, behind walls, in confined spaces, in transformer vaults, or in other areas not considered to be safe to access.

Site Reconnaissance Conditions	
Date Completed:	February 28, 2019
EMG Project Manager:	Jeanie Schulz
Weather Conditions:	Partly cloudy
Temperature (F):	70s
Percent of Units Observed:	Approximately 85%
Access Limitations:	A representative sample of interior areas of the tenant space located at 501 South Arroyo Parkway was not made available to EMG for access due to the privacy concerns as patients/clientele were present. Additionally, EMG was unable to access the roofs. The lack of access represents a data gap. However, based on the conditions observed in the accessed areas, discussions with the site contact, and review of other available information, the lack of access does not represent a significant data gap.

5.1 Units

The units located at the Project are discussed below.

Commercial Units Observed		
Unit #	Tenant Name	Tenant Operations
441-483 South Arroyo Parkway (441-483 Building)	Whole Foods	Grocery store
485-497 South Arroyo Parkway (485-497 Building)	K9 Loft	Pet product retail store and pet daycare/boarding
499/511 South Arroyo Parkway (499/511 Building)	Vacant	Not applicable
501 South Arroyo Parkway (501 Building)	Encompass Wells and Gold Line Pilates	Wellness center and Pilates studio
523 South Arroyo Parkway	Town and Country	Party rental retail store
541 South Arroyo Parkway (541 Building)	Vacant	Not applicable

Commercial Units Observed		
Unit #	Tenant Name	Tenant Operations
577 South Arroyo Parkway/125 East California Boulevard (577 Building)	Vacant	Not applicable

Whole Foods store interior (441-483)

Whole Foods office space (441-483)

Whole Foods parking garage (441-483)

K9 Loft store interior (485-497)

K9 Loft dog play area (485-497)

499/511 Building interior

499/511 Building interior

499/511 Building basement interior

Encompass Wellness patient treatment room (501)

Town and County interior (523)

541 Building interior

541 Building kitchen

577 Building interior

577 Building kitchen

5.2 Project Use

Environmentally Suspect Project Use	
Project Use	Currently Located at the Project
Cellular Communications Equipment:	No
Commercial Printing:	No
Dry Cleaner:	No
Emergency Generator or Diesel Fire Pump:	No
Gas Station:	No
Industrial Use:	No
Landfill:	No
Machine Shop:	No
Meth Lab:	No
Military Use:	No

Environmentally Suspect Project Use	
Project Use	Currently Located at the Project
Petroleum Exploration/Production:	No
Photograph/X-Ray Developing:	No
Vehicle Repair:	No

5.3 Hazardous Materials and Petroleum Products

Accessible interior and exterior areas of the Project were observed for the presence of hazardous materials and petroleum products.

EMG evaluated any observed manways, vent pipes, fill connections, concrete pads, and unknown saw cuts to determine if USTs are present at the Project, or if USTs were historically located at the Project. In addition, the Key Site Manager and other property management personnel were interviewed regarding the presence of USTs at the Project.

EMG observed the Project for the presence of potentially PCB-containing equipment such as electrical transformers and hydraulic lifts. Equipment installed after 1979 is unlikely to contain PCBs.

EMG observed the Project for visual evidence of petroleum and natural gas pipelines, such as pipeline markers.

Storage and Use of Hazardous Materials and Petroleum Products	
Feature	Identified at Project
Drums and Small Containers:	Yes. Further discussed below.
Underground Storage Tanks (USTs):	No
Aboveground Storage Tanks (ASTs):	No
Oil Cooled Transformers:	Yes. Further discussed below.
Hydraulic Elevators:	Yes. Further discussed below.
Hydraulic Lifts:	Yes. Further discussed below.
Other Hydraulic Equipment:	Yes. Further discussed below.
Petroleum or Natural Gas Pipelines:	No

Drums and Small Containers			
Material	Quantity	Storage Location	Spills or Leaks
Janitorial and maintenance supplies	Retail-size containers	Janitor closets and other designated areas	No

Review of the hazardous materials use and storage at the Project did not identify any recognized environmental conditions or environmental concerns with regards to the materials listed in the table above.

Typical janitorial supply storage in tenant spaces

Janitorial supply storage at Whole Foods

Maintenance supply storage at Whole Foods

Oil Cooled Transformers	
Type:	Vaulted
Number of Units:	2
Owner:	Utility company
Labeled:	Not labeled
Age:	Appears to have been installed after 1979
PCB Status:	Unlikely to be PCB-contaminated based on the apparent age of the equipment.
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Vaulted transformer on northwest exterior of 441-483 Building

Vaulted transformer on western exterior of 577 Building

Hydraulic Elevators	
Number of Elevators:	2
Owner:	Tenant
Age:	Appears to have been installed after 1979
PCB Status:	Unlikely to be PCB-contaminated based on the apparent age of the equipment.
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Hydraulic elevator equipment in parking garage

Hydraulic elevator equipment in parking garage

Hydraulic Lifts	
Number of Lifts:	1
Owner:	Property
Installation:	Below grade
Age:	Appears to have been installed prior to 1980
PCB Status:	Potentially contains PCBs
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Hydraulic lift equipment in the basement of the 499 Building

Other Hydraulic Equipment	
Type of Equipment:	Box baler
Number of Units:	1
Owner:	Tenant
Age:	Appears to have been installed after 1979
PCB Status:	Unlikely to be PCB-contaminated based on the apparent age of the equipment.
Spills or Leaks Observed:	No
Conclusion:	Based on the information above, the presence of this equipment does not represent a recognized environmental condition.

Hydraulic box baler

5.4 Waste Generation, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. The areas of waste generation and storage were observed for evidence of current and past releases.

Although a waste disposal regulatory compliance audit is beyond the scope of this assessment, general waste disposal procedures were evaluated to determine if any deficiencies exist that are likely to result in a release to the Project.

Waste Generation and Disposal	
Feature	Identified at Project
Waste Generation:	Yes. Further discussed below.
Septic Systems:	No
Sewer Lift Stations:	No
Grease Traps:	Yes. Further discussed below.
Oil Water Separators:	Yes. Further discussed below.
Unknown Drums or Containers:	No
Waste Disposal Ponds or Lagoons:	No

Waste Generation			
Waste Type	Disposal Method	Storage Location	Spills or Leaks
Domestic sewage	Sanitary sewer	Not applicable	No
Municipal trash	Contracted waste hauler	Dumpsters	No
Retail waste (damaged or expired product)	Contracted waste hauler	Whole Foods warehouse (441-483)	No
Cooking grease	Contracted waste hauler	Grease traps and bin	No
Non-hazardous soil cuttings	Contracted waste hauler	Western exterior of 577 Building	No

A grease bin containing minimal quantities of grease was observed on the western exterior of the 541 Building. In addition, a drum was observed on the western exterior of the 577 Building with labeling indicating the contents consisted of non-hazardous soil cuttings. According to the Key Site Manager, the grease bin has not been used in several years and the soil cuttings in the drum were generated during a 2018 subsurface investigation completed at the 499/511 Building. Refer to Sections 1.1 and 6.3 for further discussions.

Review of waste storage and disposal information did not identify any recognized environmental conditions or environmental concerns with regards to the wastes listed in the table above.

Dumpsters

Retail waste storage in Whole Foods (441-483)

Below-grade grease trap on western exterior of 541 Building

Below-grade grease trap on northern exterior of 577 Building

Grease trap in parking garage of 441-483 Building (Whole Foods)

Grease trap in parking garage of 441-483 Building (Whole Foods)

Empty grease bin on western exterior of 541 Building

Drum labeled as non-hazardous soil cuttings on western exterior of 577 Building

Grease Traps	
Type:	In-ground concrete (2 traps)
Wastes:	Cooking grease
Year Installed:	Unknown
Currently Active:	No
Reported Condition:	Good
Observed Condition:	Good
Location:	Western exterior of 541 Building and northern exterior of 577 Building
Discharge Location:	Storm sewer
Waste Removal:	According to the Key Site Manager, the grease traps have been inactive for several years.
Waste Manifests:	Copies of the most recent disposal manifests were not available.
Conclusion:	Based on the information above, no recognized environmental conditions or environmental concerns were identified.

Below-grade grease trap on western exterior of 541 Building

Below-grade grease trap on northern exterior of 577 Building

Grease Traps	
Type:	Above ground plastic (2 traps)
Wastes:	Cooking grease
Year Installed:	2008
Currently Active:	Yes
Reported Condition:	Good
Observed Condition:	Good
Location:	Lower level of parking garage below Whole Foods building (441-483)
Discharge Location:	Storm sewer
Waste Removal:	A contracted waste hauler reportedly removed the waste as needed
Waste Manifests:	Copies of the most recent disposal manifests were not available but the equipment appears to be serviced regularly based on field observations and discussion with the Key Site Manager.
Conclusion:	Based on the information above, no recognized environmental conditions or environmental concerns were identified.

Grease trap in parking garage of 441-483 Building (Whole Foods) Grease trap in parking garage of 441-483 Building (Whole Foods)

Oil Water Separators	
Type:	In-ground concrete
Wastewater Source:	Parking facility
Year Installed:	2007
Currently Active:	Yes
Reported Condition:	Good
Observed Condition:	Good
Location:	Lower level of parking garage beneath Whole Foods building (441-483)
Discharge Location:	Storm sewer
Waste Removal:	A contracted waste hauler removes the waste as needed.
Waste Manifests:	A copy of the most recent disposal manifest was not available but the equipment appears to be serviced regularly based on field observations and discussion with the Key Site Manager.
Conclusion:	Based on the information above, no recognized environmental conditions or environmental concerns were identified.

Sump and oil-water separator in parking garage of 441-483 Building

5.5 Surface Areas

The interior and exterior surface areas were observed for environmentally significant features such as wells, sumps, staining, and pits.

Surface Areas	
Feature	Identified at Project
Environmentally Significant Floor Drains, Sumps and Pits:	Yes. Further discussed below.
Pools of Liquid Waste:	No
Surface Staining:	No
Unusual or Noxious Chemical Odors:	No
Landfilling:	No

Surface Areas	
Feature	Identified at Project
Stressed Vegetation:	No
Stormwater Retention/Detention Basins:	No
Domestic Water Wells:	No
Monitoring Wells:	No
Irrigation Wells/Dry Wells:	No
Evidence of Former Subsurface Investigation:	Yes. Further discussed below.
Railroad Tracks:	Yes. Further discussed below.

Environmentally Significant Floor Drains, Sumps, and Pits					
Type of Drain	# of Drains	Discharge Point	Staining or Odors Observed	Connected to Oil/Water Separator	Location
Sump	1	Storm sewer	No	Yes	Lower level of parking garage beneath Whole Foods building (441-483)

Sump and oil-water separator in parking garage of 441-483 Building

Evidence of Former Subsurface Investigation	
Evidence:	Three apparent boreholes
Location:	North, northwest and west exterior of 577 Building
Staining:	No
Stressed Vegetation:	No
Dumping of Hazardous Waste:	No
Conclusion:	Refer to Sections 1.1 and 6.3 for further discussions.

Evidence of former soil boring on western exterior of 577 Building

Evidence of former soil boring on north- northwest exterior of 577 Building

Evidence of former soil boring on north exterior of 577 Building

Railroad Tracks	
Location:	Abutting west of the Project
Type:	Thru-railway
Rail Yard:	Not associated with a rail yard or other area of concentrated activity
Timeframe:	Since at least 1890

Railroad Tracks	
Current Status:	Active
Staining:	No
Distressed Vegetation:	No
Other Evidence of Contamination:	No
Conclusion:	Based on this information, the presence of the railroad tracks does not appear to represent a recognized environmental condition at this time.

Abutting west railroad tracks

5.6 Utilities, Heating, and Cooling

Utilities	
Domestic Water:	Public utility - City of Pasadena
Electricity:	Public utility - City of Pasadena
Natural Gas:	Public utility - Southern California Gas Company
Domestic Sewer:	Public utility - City of Pasadena

Heating and Cooling	
Type of Heating:	Natural gas units
Type of Cooling:	Electric units

Water heater

5.7 Adjoining Property Use

The adjoining properties were visually observed for evidence of recognized environmental conditions, such as property uses likely to result in a release and visual evidence of surface migration of releases. ASTM E1527-13 defines adjoining properties as any real property that is contiguous or partially contiguous with the Project or that would be but for a street, road, or other public thoroughfare separating them. The following adjoining properties were identified:

North	
Bordering Street/Road:	East Bellevue Drive
Address Range:	412 South Raymond Avenue, 411 South Arroyo Parkway, 432 South Arroyo Parkway
Description of Property Use:	Union Station Homeless Services adult center (northwest), Arroyo Parkway Self Storage (north), Snyder Diamond retail store (northeast)
East	
Bordering Street/Road:	South Arroyo Parkway
Address Range:	450-560 South Arroyo Parkway, 171 East California Boulevard
Description of Property Use:	Commercial/retail businesses (Lifestyle Outdoors, MC2Fit, Cisco Home, Denong Fine Tea, Parkway Grill, Arroyo Chop House, Bryan's Cleaners and Laundry, Granny's Pantry and West World Imports) and condominiums
South	
Bordering Street/Road:	East California Boulevard
Address Range:	100 East California Boulevard, 605 South Arroyo Parkway, 160 East California Boulevard
Description of Property Use:	Medical office building (Retina Institute/The California Clinic to the southwest), Valero service station (south) and Arroyo-California Car Wash/Chevron service station (southeast)
West	
Bordering Street/Road:	Railroad tracks
Address Range:	442-552 South Raymond Avenue
Description of Property Use:	Commercial/retail businesses (Plati German Car Service, Absolute Automotive, SoCal Public Radio/KPCC, CMG Design and U-Haul Rentals and Self Storage)

Findings	
Environmentally Suspect Uses:	<p>Yes, two service stations (Valero and Chevron) are located at 605 South Arroyo Parkway and 160 East California Boulevard, adjacent to the south and southeast of the Project. In addition, two auto repair facilities (Plati German Car Service and Absolute Automotive) are located at 442 and 450 South Raymond Avenue), adjacent to the west of the Project. Lastly, a dry cleaner (Bryan's Cleaners and Laundry) is located at 544 South Arroyo Parkway, adjacent to the east of the Project.</p> <p>No monitoring wells or other visual evidence of a current or past release associated with the service stations, auto repair facilities and dry cleaner were observed.</p>
Visual Evidence of a Release:	No visual evidence of a release, such as staining or monitoring wells, was observed near the Project boundary closest to these facilities.
Releases Reported:	The adjacent SoCal Public Radio/KPCC and U-Haul Rentals and Self Storage facilities are identified on the LUST and CHMIRS databases, respectively, indicating releases occurred at these facilities.
Conclusion:	Refer to Section 7.1.2 for further discussion of the regulatory database listing associated with the adjacent properties. No other recognized environmental conditions or environmental concerns were identified.

Adjacent north Arroyo Parkway Self Storage

Adjacent northeast Snyder Diamond and Lifestyle Outdoor retail stores

Adjacent east mixed-used building and Cisco Home store

Adjacent east-southeast Granny's Pantry and Bryan's Cleaners and Laundry

Adjacent southeast Chevron service station

Adjacent south Valero service station car wash and auto repair

Adjacent west railroad tracks and Plati German Car Service

Adjacent west railroad tracks and U-Haul facility

5.8 Interviews

5.8.1 Key Site Manager

EMG attempted to interview the Key Site Manager as part of this assessment. In addition, a Questionnaire was provided to the Key Site Manager to assist EMG in determining if recognized environmental conditions exist at the Project.

Key Site Manager Interviews			
Name	Relationship To Property	Years With Property	Telephone Number
Claudia Rodriguez	Property Manager	1	626.441.9620

Refer to Section 1.1 for further discussions of historical uses of the Project and the moisture conditions identified by the Key Site Manager Questionnaire. A copy of the Key Site Manager Questionnaire is included in Appendix D.

5.8.2 Current Occupants

EMG made a reasonable attempt to interview all major occupants and also those other occupants whose operations are likely to indicate a recognized environmental condition.

No occupants of the Project were available or would agree to an interview. The lack of occupant interviews represents a data gap. However, based on the conditions observed in the accessed areas, discussions with the site contact, and review of other available information, the lack of this information does not represent a significant data gap.

5.8.3 Current Owner

EMG submitted an Owner Questionnaire to the client in an effort to identify the owner of the Project who could be interviewed to provide information regarding proceedings involving the Project.

A completed Owner Questionnaire was not returned to EMG. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the Owner Questionnaire does not represent a significant data gap. A copy of the blank Owner Questionnaire is included in Appendix D.

5.8.4 Past Owners and Occupants

No past owners of the Project, who likely would have material information regarding recognized environmental conditions at the Project, were identified.

5.8.5 Nearby Owners and Occupants

The Project was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjoining or nearby property owners or occupants.

6.0 Historical Use Information

The purpose of the historical review is to determine the previous uses of the Project and surrounding area in order to identify the likelihood of past uses having led to a recognized environmental condition. Historical sources that are both reasonably ascertainable, and likely to be useful are reviewed in an attempt to document the historical use of the Project and surrounding areas dating back to 1940, or the first developed use, whichever is earlier.

Copies of representative historical maps/aerial photographs are included in Appendix C. Other historical documentation, such as City Directory abstracts, copies of building department records, and ownership records are included in Appendix F, when available.

The following standard historical sources were researched:

Standard Historical Sources		
Data Type	Source	Years Covered
Aerial Photographs:	Environmental Risk Information Services (ERIS)	1928, 1934, 1938, 1944, 1949, 1956, 1964, 1972, 1980, 1988, 1994, 2002, 2005, 2010, 2012, 2014, 2016
Fire Insurance (Sanborn) Maps:	ERIS	1890, 1894, 1903, 1910, 1931, 1950, 1970
USGS Topographic Maps:	ERIS	1894, 1896, 1900, 1928, 1940, 1953, 1966, 1972, 1988, 1995, 2015
Local Street Directories:	ERIS	1921, 1924, 1928, 1933, 1937, 1940, 1943, 1947, 1951, 1955, 1960, 1965, 1970, 1975, 1979, 1985, 1990, 1995-96, 2000-01, 2005-06, 2012, 2018
Building Department Records:	City of Pasadena Building and Safety Department	1920s - Current
Fire Department Records:	City of Pasadena Fire Department	Not applicable
Zoning/Land Use Records:	City of Pasadena Planning Department	2005 - Current
Property Tax Files and Land Title Records:	Los Angeles County Assessor	2002 - Current
Key Site Manager Interview:	Pre-Survey Questionnaire	2018 - Current
Oil and Gas Well Map:	ERIS	Current
Previous Environmental Reports:	Refer to Section 6.3	Refer to Section 6.3
Other Historical Sources:	Not applicable	Not applicable

EMG was not able to obtain standard historical sources that document the Project history in five-year intervals. Furthermore, EMG was not able to document the use of the Project back to the first developed use, or back to 1940, whichever is earlier. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of this information does not represent a significant data gap.

6.1 Project Historical Use

Based on review of the historical resources identified in Section 6.0, the following chronological history was developed for the Project.

Chronological History of Project			
Years	Project Use	Tenants	Environmental Concern
Prior to 1890	No historical data available.	Not applicable	No
1890s	Residences and vacant lots	Residential	No
1900s	A factory and vacant lots	Voting machine factory	No
1910s	Vacant building and vacant lots	Not applicable	No
1920s - Mid 1930s	Various commercial buildings (including current 485-497, 499/511 and 501 Buildings) and vacant lots	Pacific Electric RV Company motor bus garage and office, a storage building, roofing material storage building/offices, sheet metal works, wholesale groceries warehouse/offices, and a plumbing supply warehouse/office	No
Late 1930s - 1940s	Various commercial buildings (including current 485-497, 499/511 and 501 Buildings) and a service station on the southeast portion of the Project.	Pasadena City Lines bus garage/office and an associated fueling station (439-457 S Arroyo), G. Rose used lumber (473), Destruxol Corporation Insecticides (495), Market Basket office (501) and S Connolly Richfield Service Station (125 E California)	Yes. Refer to Section 1.1 for further discussion.
1950s - Early 1960s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a service station on the southeast portion of the Project. Of note, a "gasol pump" was noted on the 1950 Sanborn map located on the southeast corner of the 499/511 building.	Pasadena City Lines (bus garage, office, paint spray booth, wash rack and fueling station) (439-483), various warehouses and offices (485), Destruxol Corporation Insecticides (495), Taverner & Fricke wholesale paper/Dorr Bros. Moving/Rade Corporation (501), Home & Industrial Supply building materials/Skills Unlimited (523) and Chick & John Richfield Service Station/Patterson Richfield Service Station (125)	Yes. Refer to Section 1.1 for further discussion.
Mid 1960s - Late 1960s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a service station on the southeast portion of the Project	Pasadena City Lines (bus garage, office, wash rack, spray paint booth and fueling station) (439-483), Servisoft Water Service (491), multi-tenant building (495), Commercial Commodities/Dorr Bros. Moving/Pasadena Scientific Industries/Marick Corporation (501), Westward Ho restaurant (541) and Patterson Richfield Service Station (125)	Yes. Refer to Section 1.1 for further discussion.

Chronological History of Project			
Years	Project Use	Tenants	Environmental Concern
1970s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a service station on the southeast portion of the Project. Of note, a "gasol pump" was noted on the southeast corner of the 499/511 building in the 1970 Sanborn map.	A municipal vehicle maintenance facility (including a garage, office, spray paint booth, wash rack and fueling station (439-483), Cimino Distributing/ Foto Beverage Company (455), Servisoft Water Service (491), multi-tenant office/warehouse facility (495), Huntington Desk Company (499), Commercial Commodities Company/Pasadena Scientific Industries/John R. Anderson (501), Robert Masten (503), Lewis Unique Iron (523), Westward Ho/Duck Soup restaurant (541) and Patterson Richfield Service Station (125)	Yes. Refer to Section 1.1 for further discussion.
1980s - Early 1990s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a service station on the southeast portion of the Project	ATW/A&S Tire Sales/American Tire Warehouse/Capitol Group Tire/ Discount Tire Center (455), Rags to Riches (491), multi-tenant office/ warehouse building (495), Huntington Desk Company (499), John R. Anderson/Rae Mar Development (501), Lewis Wrought Iron/Colonial Antiques/ Phil Harbaugh Auto/Porte La Grande Auto (523), Manana restaurant (541) and Patterson Richfield Service Station (165)	Yes. Refer to Section 1.1 for further discussion.
Mid 1990s - Late 1990s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a	Absolute Automotive Service/Mark Kramer Construction (451), Discount Tire Centers (455), multi-tenant office/ warehouse building (495), Huntington Desk Company/Business Interiors (499), Bruce Anderson (501), Roy Aldridge Auto (523), Manana restaurant (541) and ARCO service station (125)	Yes. Refer to Section 1.1 for further discussion.
Early 2000s - Mid 2000s	Various commercial buildings (including current 485-497, 499/511, 501, 523 and 541 Buildings) and a service station on the southeast portion of the Project. Of note, the service station was demolished in approximately 2002 and replaced by the current 577 Building.	Absolute Automotive Service/Frank's Detail Shop (451), Discount Tire Centers (455), Absolute Auto Detail (491), Corporate Furniture Resources (499), Parkway Antiques (523), Margarita Jones restaurant (541), Dona Rosa/HMS Catering (577), Vic's ARCO Mini Market and Service Station (125) in 2000-2002	Yes. Refer to Section 1.1 for further discussion.

Chronological History of Project			
Years	Project Use	Tenants	Environmental Concern
2008 - Current	Various commercial buildings (including current 441-483, 485-497, 499/511, 501, 523, 541 and 577 Buildings)	Whole Foods Market (465), K9 Loft (499), AAA Board Up/E-Biome/Gold Line Pilates/Encompass Wellness/Jensen Construction (501), Margarita Jones restaurant (541) and Dona Rosa Bakery and Tacqueria (577)	No

Tax files and land title records can include general property information, current and historical ownership names, and title records provided by the user. Readily available ownership records are reviewed from the local tax assessor. A 50-year chain of title search was not performed based on the Scope of Work. The following ownership history was identified.

Ownership History of Project		
Year Purchased	Owner Name	Environmental Concern
Prior to 2002	BP Coast Products, LLC (southern portion of Project)	Yes. Refer to Section 1.1 for further discussion.
2002	125 ECP, LLC (southern portion of Project)	No
2007	Marc Itah Trust	No

6.2 Off-Site Historical Use

Based on review of the historical resources identified in Section 6.0, the following chronological history was developed for the adjoining properties.

Chronological History of Adjoining Properties		
Years	Adjoining Property Use	Environmental Concern
North		
Prior to 1890	No historical data available	No
1890 - 1930s	Undeveloped land	No
1940s - Current	General commercial (including a former dry cleaner to northeast)	Yes. Refer to Section 7.1.2 for further discussion.
East		
Prior to 1890	No historical data available	No
1890 - 1920s	Residential and undeveloped land	No
1930s - 1940s	General commercial, residential and undeveloped land	No
1950s - Current	General commercial (including dry cleaners) and residential	Yes. Refer to Section 7.1.2 for further discussion.
South		
Prior to 1890	No historical data available	No
1890 - Mid 1900s	Undeveloped land	No

Chronological History of Adjoining Properties		
Years	Adjoining Property Use	Environmental Concern
Late 1900s - Mid 1930s	General commercial	No
Late 1930s - Current	General commercial including two service stations to the south and southeast	Yes. Refer to Section 7.1.2 for further discussion.
West		
Prior to 1890	No historical data available	No
1890 - 1920s	Railroad tracks, residential and undeveloped land	No
1930s - 1950s	Railroad tracks, residential, warehouses and office buildings	No
1960s - Current	Railroad tracks, warehouses and office buildings (businesses include various auto repair facilities)	Yes. Refer to Section 7.1.2 for further discussion.

Refer to Section 7.1.2 for further discussion of the historical adjacent properties.

6.3 Historical Environmental Documentation

In accordance with ASTM E1527-13, EMG requested that the user provide copies of previous environmental assessments for review. Furthermore, EMG may have obtained prior environmental assessments and regulatory records from local, state, and federal regulatory agencies. The purpose of reviewing prior environmental assessments is to determine if any recognized environmental conditions have previously been identified. Documentation provided to EMG which is unrelated to the completion of this report may not be reviewed.

LUST Case Summary for ARCO Facility No. 510	LARWQCB	Current	Regulatory agency	Appended	Yes. Further discussed below.

Historical Recognized Environmental Condition: Historical service station identified

The review of the historical data available for the Project and the regulatory database report identified that a service station (former ARCO station located at 125 East California Boulevard) was located at the Project from approximately the 1930s to 2002 and utilized at least three USTs. This facility was located on the southern portion of the Project (site of the current vacant restaurant at 577 South Arroyo Parkway). An unauthorized gasoline release impacting groundwater was first reported in 1988 and soil vapor extraction operations were initiated. In 1998, three USTs were removed from the site and various soil and groundwater investigations were subsequently conducted. The Project received a "no further action" letter from the Pasadena Fire Department dated May 24, 2000; however, the site also received an additional clarification letter regarding the "no further action" letter stating that while the site has complied with the regulatory requirements for the site investigation/remediation, contamination remained at the Project below regulatory action levels. A Declaration of Environmental Restriction allowing access for remediation was recorded on August 21, 2002 that was to terminate 90 days after No Further Action was received. In addition, the Declaration indicates that written approval would be required from BP West Coast Products LLC prior to the construction of any improvements or installing any equipment within the Restricted Area for a period of 90 days after the receipt of a No Further Action letter. Quarterly monitoring was completed and 761 cubic yards of soil was removed. The LARWQCB granted case closure on December 3, 2004 with no property use restrictions, activity and use limitations, institutional controls, or engineering controls. The monitoring wells were abandoned in 2005. Based on the "no further action" status, the historical use of the Project as a service station represents a historical recognized environmental condition.

De minimis condition: Historical bus station fueling facility/USTs identified

The review of the historical data available for the Project identified that a bus facility (and later a distributing company, auto repair facility, tire center and auto detailing shop) with an associated fueling station was located on the northern portion of the Project, in the area of the current Whole Foods store, from approximately the 1930s through 2007. Sanborn Maps from 1950 through 1970 depicted "gas and oil tanks" in the southern portion of the Whole Foods site. No records regarding the installation or removal of USTs were found during this assessment. Based on the fact that a three-story underground parking garage was constructed at the Whole Foods building, it appears likely that any onsite USTs or potentially contaminated soils associated with USTs would have been excavated and removed during the construction of the parking garage. Based on the excavation of onsite soils during the redevelopment in 2008, the former bus fueling facility does not represent a recognized environmental condition.

De minimis condition: Historical UST identified

The 2014 EBI Phase I Environmental Site Assessment indicated a UST was formerly associated with 455 South Arroyo Parkway, in the area of the current Whole Foods store. No details regarding the size or contents of the UST were provided. Additionally, 451 South Arroyo Parkway (Absolute Automotive Service) was listed on the historical auto station database which may have been associated with this address/business. No records regarding the installation or removal of UST(s) at this site were found during this assessment. Based on the fact that a three-story underground parking garage was constructed at the Whole Foods building, it appears likely that any onsite USTs or potentially contaminated soils associated with USTs would have been excavated and removed during the construction of the parking garage. Based on the excavation of onsite soils during the redevelopment in 2008, the reported SWEEPS UST or historical usage of the Project does not represent a recognized environmental condition.

De minimis condition: Historical "gasol pump" identified

A "gasol pump" was identified in the southeastern corner of 511 South Arroyo Parkway based on Sanborn maps dated 1950 and 1970. "Gasol" is an abbreviated term for gasoline, which is used on Sanborn maps during this time period. A "gasol pump" generally consists of a fuel dispenser and most commonly a mechanical pump and nozzle. Based on the lack of information related to the historical presence of a gasol pump on-site, Ramboll US Corporation (Ramboll) conducted a Phase II Environmental Site Assessment to evaluate the subsurface conditions in the vicinity of the pump. On February 13, 2018, Spectrum Geophysics of Chatsworth conducted a geophysical survey to mark subsurface utility lines, subsurface structures, and underground obstructions in the area of concern. During the geophysical survey, two approximately 2-inch diameter metal conduits were observed extending above ground surface in the general vicinity of the former gasol pump. One conduit was located within an elevated concrete pad, extended approximately three inches above the ground surface, and was backfilled with concrete. The second conduit extended approximately two inches above the ground surface and was open to an approximate depth of five feet below ground surface (bgs). A petroleum-like odor was noted on the measuring tape used to measure the total depth of the open conduit. Finally, a subsurface metallic anomaly, suggestive of piping, was detected approximately 0.5 foot bgs and extended laterally between the two conduits. Two soil borings were also advanced to 20 feet bgs in the vicinity of the former pump. Soil samples were collected from borings at approximate depths of five, ten, 15, and 20 feet and were field screened for organic vapors with a photoionization detector (PID). The soil samples were also submitted to a laboratory for the analysis of volatile organic compounds (VOCs), oxygenates and methyl tert butyl ether (MTBE), total petroleum hydrocarbons (TPH)-gasoline range organics (GRO), TPH-diesel range organics (DRO), TPH-oil range organics (ORO), and lead. Groundwater samples were not collected due to the typical depth to groundwater in the area (more than 140 feet bgs). No VOCs, MTBE or TPH were detected in soil samples. Lead was detected at concentrations ranging from 3.8 mg/kg to 10 mg/kg; however, all concentrations were below the USEPA regional screening levels for residential and commercial/industrial use, and within typical background levels for California. Based on this information, the former gasol pump represents a de minimis condition associated with the Project.

Refer to Section 1.1 for further discussion.

7.0 Environmental Records Review

The purpose of the records review is to obtain and review records that will help identify recognized environmental conditions. ASTM E1527-13 requires the review of reasonably ascertainable records from standard sources as defined in Section 8.2.1 of ASTM E1527-13. Additional records sources, such as local fire department records, local building department records, and local environmental health department records may be obtained and reviewed at the discretion of the environmental professional.

The availability of record information varies widely, depending on the source. Reasonably ascertainable records are those records that are publicly available, obtainable within reasonable time and cost constraints, and practically reviewable. In addition, the records must be provided by the agency within 20 calendar days of receiving a request, at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information.

7.1 Regulatory Database Review

EMG obtained a regulatory database report from a commercial database provider in an effort to determine if the Project is a listed regulatory site and whether there are any mappable regulatory database sites within the search distances specified by ASTM E1527-13. EMG attempted to field-verify the locations of the identified regulatory sites, as well as confirm distances and locations relative to the Project using available mapping software. Therefore, the distances and/or directions noted in this section may not match the Database Report. In addition, EMG reviewed the unmappable sites in the database report, cross-referencing addresses and site names.

In accordance with ASTM E1527-13, regulatory files and/or records associated with standard environmental record sources may be obtained and reviewed when the files and/or records are reasonably ascertainable, the files/records are expected to contain significant information for the purpose of identifying recognized environmental conditions, and an alternative source of the information is not available. Furthermore, review of regulatory files and/or records may be limited by the scope of work. Unless otherwise noted in Section 1.1, further review of regulatory agency files and/or records is not considered to be warranted based on the general nature of the regulatory database listing, the level of detail provided in the regulatory database, the availability of information from alternative sources, and/or the low likelihood that the agency files and/or records will contain information indicating the presence of a recognized environmental condition.

A copy of the full regulatory database report is included in Appendix H.

Facility Index System (FINDS)

The FINDS database cross-references various federal and state database listings and does not, in and of itself, typically contain environmentally significant information. The FINDS database provides the following pertinent information:

- Facility Name: Whole Foods #37
- Facility Address: 465 South Arroyo Parkway
- Program Cross Referenced: CERS

- Facility Name: Dona Rosa Bakery and Taqueria
- Facility Address: 577 South Arroyo Parkway
- Program Cross Referenced: CERS

- Facility Name: ARCO #0510
- Facility Address: 125 East California Parkway
- Program Cross Referenced: LUST

- Facility Name: Crowell and Lyons Equipment
- Facility Address: 495 South Arroyo Parkway
- Program Cross Referenced: RCRA Gen

The information provided is not indicative of a recognized environmental condition and no further action or investigation is recommended.

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

HAZNET		
Facility Name	Wastes Generated	Years Generated
Mrs. Gooch's Natural Foods Market (Whole Foods)	Alkaline solution without metals, surplus inorganics, solvent mixture, surplus organics, inorganic solid waste	2014, 2015
ARCO Products Company BP West Coast Products Patterson's Arco 510 Arco Products Company	Hydrocarbon solvents, oil-containing waste, aqueous solution with organic residues	1993, 1994, 1997, 1998, 1999, 2000
Absolute Automotive	NR	NR
Bellevue Ventures LLC	Organic solids, aqueous solution	2007

Discount Tire Centers	Solvent mixture, aqueous solution with organic residues, waste oil	1996, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005
Belview Center	Solvent mixture, aqueous solution with organic residues, waste oil	2006
Pro Auto Center	NR	NR
Crowell and Lyons Equipment	NR	NR
Builders Plus	NR	NR

NR-Not Reported

The information provided in this database is not indicative of a recognized environmental condition and no further action or investigation is recommended.

RCRA Generators

The RCRA Generators database is a listing of facilities that generate, transport, store, treat and/or dispose of hazardous waste and does not necessarily indicate that a release to the environment has occurred. Refer to Section 5.4 for further discussion of wastes currently generated at the Project.

RCRA Generators				
Facility Name	Classification	Violations Noted	Wastes Generated	Years Generated
Crowell and Lyons Equipment	Non-generator	Compliance evaluation	NR	1982-1985
Mrs. Gooch's Natural Foods Market Inc. DBA Whole Foods Market ARR 37	Non-generator	None	NR	2014

NR-Not Reported

The information provided in this database is not indicative of a recognized environmental condition and no further action or investigation is recommended.

CERS HAZ

The California Environmental Reporting System Hazardous Waste Sites (CERS HAZ) database is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. The CERS HAZ database indicates Whole Foods is a chemical storage facility and a hazardous waste generator with minor violations (e.g., failure to submit update on business plan, failure to submit hazardous material inventory, failure to submit site plan, etc.) reported in December 2015. The facility returned to compliance in March 2016.

Leaking Underground Storage Tank (LUST)

The LUST database is maintained by the individual California Regional California Water Quality Control Boards (RWQCB) to track sites where releases have been reported through the Leaking Underground Storage Tank program. These sites typically include releases related to petroleum products, such as gasoline and diesel fuel. The LUST database provides the following pertinent information:

- Facility Name: ARCO #0510
- Facility Address: 125 East California Boulevard
- Case Type: LUST Cleanup Site
- Release Date: October 10, 1988
- Facility Status: Case Closed

- Status Date: December 3, 2004
- Lead Agency: Los Angeles Regional Water Quality Control Board
- Potential Media Affected: Soil and groundwater
- Potential Contaminants of Concern: Gasoline

Refer to Section 1.1 for further discussion of the LUST database listing for the Project.

HIST MANIFEST

A list of historic hazardous waste manifests received by the DTSC from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments. The Historic Manifest database indicates the former ARCO facility (125 East California Boulevard) generated gas scrubber waste in 1989, contaminated soil from site cleanup in 1990 and 1992, and aqueous solution with total organic residues less than 10 percent in 1992.

HHSS

The Historical Hazardous Substance Storage (HHSS) database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker. The HHSS database indicates the former ARCO facility (125 East California Boulevard) had three, 4,000-gallon gasoline USTs installed in 1954, one, 6,000-gallon gasoline UST installed in 1970, one 10,000-gallon gasoline UST installed in 1977, and one 280-gallon waste oil UST with an unknown installation date. The HIST TANK and DELISTED TNK databases appear to cross-reference this information.

LA HMS

List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (LA HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles. The LA HMS database indicates the Discount Tire Centers site (455 South Arroyo Parkway) had equipment removed and the ARCO site (125 East California Boulevard) site had an underground storage tank operating permit, had underground storage tank equipment removed, and had other equipment removed. No additional detail was provided in this database.

7.1.2 Off-Site Regulatory Database Review

Regulatory database listings which have a reasonable potential to impact the Project are discussed below. This determination is based on, but not limited to, factors such as the topographic gradient in relation to the Project, the estimated groundwater flow direction in the vicinity of the Project, the distance between the listed site and the Project, the type of site or materials involved, and/or whether a release to the environment is known or likely to have occurred.

Home Van Vechten/Derek Bedell Ent. in the Home	
Facility Address:	450 South Arroyo Parkway
Databases:	DRYCLEANERS, FED DRYCLEANERS, EMISSIONS, FINDS, HAZNET, RCRA-SQG
Distance:	Adjacent
Direction:	East
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Parallel to or away from the Project

Release Reported:	No
Other Significant Database Information:	None
Significant Information from Other Sources:	While this address is technically adjacent, the building is located approximately 100 feet to the east of the northern portion of the Whole Foods tenant space, across a divided highway. Furthermore, if any impacted soil had existed at the Project as the result of this facility it likely would have been encountered and removed during the construction of the existing Whole Foods and below-grade parking structure in 2008. The on-site parking garage also employs a ventilation system in order to removed fumes from the underground levels.
Significant Factors:	Lack of a reported release. Estimated direction of groundwater flow. Estimated depth to groundwater. Lack of current dry cleaning operations.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

Laundry Partners Limited/Munson & White Company/Tyler Cobleigh	
Facility Address:	432 South Arroyo Parkway
Databases:	DRYCLEANERS, HIST MANIFEST, LA HMS, HAZNET
Distance:	Adjacent
Direction:	Northeast
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Parallel to or away from the Project
Release Reported:	No
Other Significant Database Information:	None
Significant Information from Other Sources:	While this address is technically adjacent, the building is located approximately 115 feet to the northeast of the northern portion of the Whole Foods tenant space, across a divided highway. Furthermore, if any impacted soil had existed at the Project as the result of this facility it likely would have been encountered and removed during the construction of the existing Whole Foods and below-grade parking structure in 2008. The the on-site parking garage also employs a ventilation system in order to removed fumes from the underground levels.
Significant Factors:	Lack of a reported release. Estimated direction of groundwater flow. Estimated depth to groundwater.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

Bryan's Cleaners and Dyers	
Facility Address:	544 South Arroyo Parkway

Databases:	DRYCLEANERS, HHSS, HIST TANK, EMISSIONS, FINDS, HIST MANIFEST, LA HMS, HAZNET, RCRA-SQG, FED DRYCLEANERS, CERS HAZ
Distance:	Adjacent
Direction:	East
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Parallel to or away from the Project
Release Reported:	No
Other Significant Database Information:	None
Significant Information from Other Sources:	While this address is technically adjacent, the building is located approximately 100 feet to the east of the vacant 541 Building, across a divided highway. Review of the HHSS database indicates a UST containing Stoddard (petroleum-based) solvent was installed in 1939. According to AQMD records, this facility used petroleum-based solvent through the 1970s, converted to PCE use in the 1980s and 1990s, and reverted back to petroleum-based solvent in the early 2000s. Soil samples collected at the former Arco facility in the southern portion of the Project in 2002 were analyzed for chlorinated solvents and no contaminants of concern were detected.
Significant Factors:	Removal of the USTs. Current regulatory status. Current solvent used. Estimated direction of groundwater flow. Lack of reported release. Estimated direction of groundwater flow.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

Arroyo Car Wash Corporation/Lung Chu/Tosco Unocal Dealer/Unocal Service Station #9693	
Facility Address:	605 South Arroyo Parkway
Databases:	UST, CERS TANK, FINDS, HHSS, HIST TANK, FINDS, LA HMS, HAZNET, DELISTED TNK
Distance:	Adjacent
Direction:	South
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Away from the Project
Release Reported:	No
Other Significant Database Information:	The facility was in compliance at the time of the most recent compliance inspection in 2018.
Significant Information from Other Sources:	Not Applicable
Significant Factors:	Lack of a reported release. Estimated direction of groundwater flow. Estimated depth to groundwater. Current regulatory status.

Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

ZAQ Chevron/Chevron Station No. 91410/Bill Barry	
Facility Address:	160 East California Boulevard
Databases:	UST, CERS TANK, FINDS, HHSS, HIST MANIFEST, LA HMS, HIST TANK, HAZNET, RCRA-SQG, EMISSIONS
Distance:	Adjacent
Direction:	Southeast
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Away from the Project
Release Reported:	No
Other Significant Database Information:	The facility was in compliance at the time of the most recent reported compliance inspection in 2017.
Significant Information from Other Sources:	Not Applicable
Significant Factors:	Lack of a reported release. Estimated direction of groundwater flow. Estimated depth to groundwater. Current regulatory status.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

U-Haul Corporation/Pasadena Moving Center	
Facility Address:	552 South Raymond Avenue
Databases:	CHMIRS, HHSS, HIST TANK, ALT FUELS, CERS HAZ, FINDS, HIST MANIFEST, HAZNET
Distance:	Adjacent
Direction:	West
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Parallel to the Project
Release Reported:	Yes
Release Date:	May 14, 2014
Contaminant(s) of Concern:	Propane
Media Impacted:	Air (vapor)
Regulatory Status of Release:	Cleaned up
Regulatory Status Date:	May 14, 2014

Other Significant Database Information:	Storage tank valve leaked causing the release. Fire Department on the scene, contractor en route for containment and cleanup. The spill report indicates a vapor release.
Significant Information from Other Sources:	Not Applicable
Significant Factors:	Current regulatory status. Nature of the release. Removal of the petroleum source.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

Southern California Public Radio/Jurgensens Grocery Company/Image of Ink	
Facility Address:	474-494 South Raymond Avenue
Databases:	LUST, HIST MANIFEST, HAZNET, CERS HAZ, CERS TANK, FINDS, HHSS, LA HMS, HIST TANK
Distance:	Adjacent
Direction:	West
Estimated Groundwater Flow:	South-southeast
Relationship to Project:	Parallel to or towards the Project
Release Reported:	Yes
Release Date:	June 19, 2009
Contaminant(s) of Concern:	Not reported
Media Impacted:	Not reported
Regulatory Status of Release:	Completed - Case Closed
Regulatory Status Date:	October 9, 2009
Other Significant Database Information:	This site currently operates an AST. The facility was found to be in compliance during an April 2018 compliance inspection.
Significant Information from Other Sources:	A copy of the No Further Action letter is included in Appendix F.
Significant Factors:	Current regulatory status. Estimated depth to groundwater. Lack of reported groundwater contamination. Length of time that has passed since closure was granted.
Conclusion:	Based on the factors discussed above, this facility is unlikely to have impacted the Project and therefore does not represent a recognized environmental condition.
Vapor Migration Concern:	Unlikely

7.1.3 Vapor Migration

Indoor air quality concerns are generally excluded from the scope of ASTM E1527-13 and this assessment. However, the migration of vapors caused by a release of hazardous substances or petroleum products to the environment can represent a recognized environmental condition in certain conditions.

For the purposes of this assessment, the potential for migrating vapors to represent a recognized environmental condition was evaluated using a limited screening method based on technical guidance documents from the US EPA and *ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. In addition, screening tools created by regulatory agencies may be used to evaluate the significance of a release with respect to the vapor migration and/or vapor intrusion potential. EMG's vapor migration screening is not a human health risk assessment and is not intended to comply with regulatory requirements that might exist for the evaluation of vapor migration.

Based on the review of regulatory database records in Section 7.1.1 and 7.1.2, no vapor migration concerns were identified.

7.2 Local Agency Records

The following additional environmental records were reviewed to supplement the standard environmental record sources discussed in Sections 7.1.1 and 7.1.2.

Reasonably ascertainable records for the Project may be reviewed for evidence of recognized environmental conditions and other environmental concerns such as underground storage tanks, significant hazardous materials use, the presence of septic systems, and/or the presence of wells.

In the case of pending requests, upon receipt and review any significant information not identified through other sources will be provided to the Client.

Building Department	
Name of Agency:	City of Pasadena Building and Safety Department
Contact Name/Telephone:	Jackie Adkins, Permit Technician/626.744.4150
Review Method:	Telephone interview and online records review
Records Date Back To:	1920s - Current
Summary of Records Reviewed:	General permits were on file and included information indicating the current buildings were constructed in 1921, 1925, 1951, 2003 and 2008.
Environmentally Significant Information:	A permit, dated 2015, was issued to install a grease interceptor at 465 South Arroyo Parkway. Various permits, dated 1998, 1999 and 2007, were on file that reference an auto detailing shop at 491 South Arroyo Parkway. Permits, dated 1988 and 2002, were on file to remove five USTs, to install a temporary vapor extraction system, and demolish a service station at 125 East California Boulevard.

Fire Department	
Name of Agency:	City of Pasadena Fire Department
Contact Name/Telephone:	Records Request/626.744.4655
Review Method:	Not Applicable
Records Date Back To:	Not Applicable
Summary of Records Reviewed:	No response has been received to date. However, based on review of other historical and regulatory resources, it is not anticipated the information from this agency, if any, would significantly alter the findings and conclusions of this report. Upon receipt and review, any environmentally significant information not identified through other sources will be provided to the Client.
Environmentally Significant Information:	Not anticipated

Planning/Zoning Department	
Name of Agency:	City of Pasadena Planning Department
Contact Name/Telephone:	Martin Potter, Planner/626.744.6710
Review Method:	Telephone interview and online records review.
Records Date Back To:	2005 - Current
Current Zoning:	CD-6 - Central District-6
Historical Zoning:	The Project has maintained the current zoning since at least 2005.
Environmentally Significant Information:	None identified

8.0 ASTM E1527 Non-Scope Considerations

The items discussed in this section are outside the scope of ASTM E1527-13. These are included at the discretion of the user based upon the scope of work.

8.1 Asbestos

In accordance with the scope of work, EMG performed a screening to document the presence of known and/or suspect asbestos containing materials (ACM) at the Project. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition or renovation purposes. All materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book") are considered suspect.

Some non-friable building products, such as sheet vinyl floor tile, vinyl floor tile, floor tile mastic, asbestos-cement board, and roofing materials can still be manufactured with asbestos and installed in the United States. However, U.S. manufacturers have largely excluded asbestos fibers from their building products since 1981. In addition to a visual assessment, EMG reviewed provided documentation to determine if asbestos has been previously documented at the Project.

Suspect Asbestos Containing Materials		
Material	Friable	Condition
Roofing materials	No	Good
Ceiling tile	Yes	Poor to Good
Wallboard/joint compound	No	Good
Vinyl composition tile	No	Poor to Good
Vinyl sheet flooring	No	Good
Mastic	No	Good

Based on the scope of work, sampling of suspect asbestos containing materials was not performed. Refer to Section 1.1 for further discussion.

Damaged vinyl floor tile in second floor of 577 Building

8.2 Radon Gas

Radon originates from the natural (radioactive) breakdown of uranium in soil, rock, and water and is the second leading cause of lung cancer in the United States. Radon can move up through the ground and into living spaces through cracks and other holes in the foundation. The USEPA has developed the EPA Map of Radon Zones to assist National, State, and local organizations in implementing radon-resistant building codes. This map assigns each county in the U.S. to one of three zones based on radon potential. The USEPA uses a continuous exposure level of 4.0 pCi/L (picoCuries per liter of air) as an action level at which additional action is recommended.

The USEPA Radon Zones are defined as:

- Zone 1 (Highest potential) - Average indoor radon screening level greater than 4 pCi/L
- Zone 2 (Moderate potential) - Average indoor radon screening level between 2 and 4 pCi/L.
- Zone 3 (Lowest potential) - Average indoor radon screening level less than 2 pCi/L.

For the purposes of this assessment, the radon zone and the use of the Project have been used to determine the level of risk associated with radon. However, the USEPA and the Surgeon General recommend testing all homes for radon, regardless of geographic location.

The property is located in USEPA Radon Zone 2.

Radon sampling was not performed based on the non-residential use of the Project and the Scope of Work. No further action or investigation is recommended regarding radon.

8.3 Lead-Based Paint

All paint applied prior to 1978 is considered suspect. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. This screening approach does not comply with Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing. This approach does not constitute a pre-occupancy survey or the basis of attainment of "Lead Free" certification.

Considering the dates of construction (1921, 1925, 1951, 2003 and 2008), there is a potential that the paint at the Project is lead-based. The painted surfaces were observed to be in generally good condition, with no chipping, peeling, or cracking paint observed. Furthermore, the Project is not a residential use and there is no regulatory requirement to sample suspected lead-based painted surfaces at this time. Therefore, no samples were collected. No further action or investigation is recommended regarding lead-based paint.

8.4 Lead in Drinking Water

Lead is commonly used in household plumbing materials and water service lines. Exposure to lead in drinking water above the USEPA action level can result in adverse health effects in children and adults. Lead is rarely found in source water, but enters tap water through corrosion of plumbing materials. Homes built before 1986 are more likely to have lead pipes, fixtures and solder. The most common problem is with brass or chrome-plated brass faucets and fixtures which can leach significant amounts of lead into the water. The USEPA action level for lead-in-drinking water is 15 parts per billion (ppb).

According to information from the local water utility, the water supplied to the Project is within federal, state, and local drinking water quality standards. No further action or investigation is recommended regarding lead in drinking water at the Project.

8.5 Moisture Conditions

EMG performed a limited visual and olfactory assessment for evidence of moisture conditions in readily accessible interior areas of the Project. In addition, the Key Site Manager was interviewed regarding the presence of current and historical moisture conditions. This assessment was not designed to discover all areas which may be affected by moisture conditions. Rather, it is intended to provide an indication of significant moisture conditions observed during the site visit. Moisture conditions may be present in areas not observed,

such as pipe chases, HVAC systems, and behind enclosed walls and ceilings. De minimis moisture conditions, such as small, isolated, water stains on ceiling tiles, and mildew at bathtubs and sinks are considered to be routine maintenance issues and are not addressed in this Report.

Observed Moisture Conditions		
Location	Approximate SF	Observed Condition
499/511 Building	320	Standing water was observed on the ground floor and in the basement areas and evidence of moisture conditions was observed on the walls and ceiling tiles
577 Building	20	Evidence of moisture conditions was observed on the second floor ceiling tiles

Refer to Section 1.1 for further discussion of the moisture conditions discussed above.

Moisture condition in ground floor of 499 Building

Moisture condition in basement of 499 Building

Moisture condition in basement of 499 Building

Evidence of moisture condition in second floor ceiling of 577 Building

Evidence of moisture condition in second floor ceiling of 577 Building

8.6 Wetlands

For regulatory purposes under the Clean Water Act, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas." A wetlands delineation is beyond the scope of this assessment. However, review of National Wetlands Inventory (NWI) data, provided by the PSR and/or the United States Fish and Wildlife Service, indicated the following:

Wetlands Review	
Project	Adjoining Properties
Review of the NWI data did not identify any wetlands.	Review of the NWI data did not identify any wetlands.

No wetlands were identified. No further action or investigation is recommended regarding wetlands.

8.7 Flood Zone

FEMA identifies flood hazards, assesses flood risks and partners with states and communities to provide accurate flood hazard and risk data to guide them to mitigation actions. Flood hazard mapping is the basis for the National Flood Insurance Program (NFIP) and flood insurance requirements. FEMA maintains and updates data through Flood Insurance Rate Maps (FIRMs) and risk assessments. FIRMs include statistical information such as data for river flow, storm tides, hydrologic/hydraulic analyses and rainfall and topographic surveys. Review of the FIRM available from the PSR and/or from the FEMA website indicated the following:

Flood Zone Map Review		
Map Date	Area	Project Flood Zone
September 26, 2008	Entire Project	Zone X (unshaded), minimal risk areas outside the one percent and 0.2 percent annual chance floodplains. No base flood elevations or base flood depths are shown within these zones.

The flood zone designation is provided for informational purposes only. A determination of the need for flood insurance is beyond the scope of this assessment.

9.0 Limitations, Key Terms, and References

9.1 Limitations

The opinions EMG expresses in this report were formed utilizing the degree of skill and care ordinarily exercised by any prudent Environmental Professional in the same community under similar circumstances. EMG assumes no responsibility or liability for the accuracy of information contained within this report that has been obtained from the Client or the Client's representatives, from other interested parties, or from the public domain. The conclusions presented represent EMG's professional judgment based on information obtained during the course of this assignment.

Factual information regarding operations, conditions, and test data provided by the Client or the Client's representative has been assumed to be correct and complete. The conclusions presented within this report are based on the data provided, observations made, and conditions that existed specifically on the date of the assessment.

EMG's ESA cannot wholly eliminate the uncertainty regarding the presence of recognized environmental conditions and environmental business risk. The report is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the Project. The report is limited in budget and scope. The nature of subsurface soil and ground water at the Project cannot be confirmed, given the limited budget and scope of this ESA. The report is not and should not be considered a warranty or guarantee about the presence or absence of environmental contaminants which might affect the Project. It should be understood that EMG's suggested remedy may be determined under time constraints or may be formed without the aid of engineering calculations, testing, exploratory probing, the removal of materials, or design. Furthermore, there may be other alternate or more appropriate schemes or methods to remedy the noted environmental conditions.

9.3 Key Terms

Business environmental risk - A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations. For the purposes of this assessment, a significant business environmental risk is both included in the agreed upon scope of work and requires further action at this time.

Controlled recognized environmental condition - A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Data gap - The lack of or inability to obtain information required by ASTM E 1527-13 despite good faith efforts is considered a data gap. A data gap is considered significant if it affects the ability of the environmental professional to identify recognized environmental conditions.

De minimis condition - A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

Environmental Professional - A person meeting the education, training, and experience requirements set forth in 40 CFR 312.10(b).

Historical recognized environmental condition - A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g. property use restriction, AULS, institutional controls, or engineering controls), at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusion section of the report as a REC.

Material threat - A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.

Practically reviewable - Information that is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data.

Release - Any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), with certain exclusions as defined in 42 U.S.C. 9601 (22).

Reasonably ascertainable - Information that is publicly available, obtainable from its source within reasonable time and cost constraints, and practically reviewable.

Recognized environmental condition - The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Standard environmental record sources - Environmental records contained in various regulatory databases, with search distances defined by ASTM E1527-13, unless otherwise specified by client in the scope of work.

Standard historical sources - Reasonably ascertainable records, including aerial photographs, fire insurance maps, property tax files, recorded land title records, USGS topographic maps, local street directories, building department records, and zoning/land use records.

Appendix D: Questionnaires

PHASE I: KEY SITE MANAGER QUESTIONNAIRE

Name of person completing questionnaire: Claudia Rodriguez
Association with property: Property Manager
Length of association with property: 1 year
Are you a representative of the Owner:
Phone Number: 626.441.9620
Property Name: 465, 491, 503, 525 & 577 South Arroyo Parkway
EMG Project Number: 136895.19R000-001.135
Signature: _____ **Date:** 02/28/19

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any **yes or unknown responses** should be provided in the "Comments" column.

	QUESTION	RESPONSE			COMMENTS
		Y	N	Unk	
1	Are the Property or any adjoining properties currently or previously in industrial use <input type="checkbox"/>	X			Service stations are located adjacent to the south and southeast and a dry cleaner is located adjacent to the east
2	Have the Property or adjoining properties currently or previously been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility <input type="checkbox"/>	X			Former service stations on-site and current and former service stations and dry cleaners are adjacent to the east and south
3	Are there currently or previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Property <input type="checkbox"/>			X	None currently/previously unknown
4	Are there currently or have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Property <input type="checkbox"/>		X		
5	Are there currently or previous any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Property <input type="checkbox"/>			X	
6	Are there currently or previously any pits, ponds, or lagoons located on the Property in connection with waste treatment or waste disposal <input type="checkbox"/>		X		
7	Are there any significant areas of stained soil on the Property (currently or previously) <input type="checkbox"/>		X		
8	Are there currently or previously any storage tanks (above or underground) located on the Property <input type="checkbox"/> If so, please indicate the material stored and if the tank is registered.	X			Former USTs on southern portion of the Project and possibly on the northern portion as well

QUESTION		RESPONSE			COMMENTS
		Y	N	Unk	
9	Are there currently or previously any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property <input type="checkbox"/>		X		
10	Are there currently or previously any flooring, drains, or walls located at the Property that are stained by substances other than water or are emitting foul odors <input type="checkbox"/>		X		
11	If the Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system <input type="checkbox"/> Has the well been designated as contaminated by any government environmental/health agency <input type="checkbox"/>		X		
12	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Property or any facility located on the Property <input type="checkbox"/>	X			Former service stations on the northern and southern portions of the Project
13	Have there been any environmental site assessments of the Property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Property or recommended further assessment of the Property <input type="checkbox"/>	X			Provided for EMG's review
14	Does the Property discharge waste water on or adjacent to the Property, other than storm water, into a storm water sewer system <input type="checkbox"/>		X		
15	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials been dumped above grade, buried, and/or burned on the Property <input type="checkbox"/>		X		
16	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs <input type="checkbox"/>			X	
17	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Property <input type="checkbox"/>			X	
18	Has there ever been any asbestos-containing materials testing conducted on the Property <input type="checkbox"/>			X	
19	Is there an Asbestos Operations and Maintenance (O&M) program in place at the Property <input type="checkbox"/>		X		
20	Is there now or has there ever been any lead-based paint (LBP) applications on the Property <input type="checkbox"/>			X	
21	Has there ever been lead-based paint testing conducted on the Property <input type="checkbox"/>			X	
22	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Property <input type="checkbox"/>		X		
23	Has the water at the Property ever been tested for lead <input type="checkbox"/>			X	
24	Has radon testing ever been conducted at the Property <input type="checkbox"/>			X	
25	Has any part of the Property ever contained visible mold growth <input type="checkbox"/>	X			Yes – Significant moisture conditions are present in the 499 Building
26	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s) <input type="checkbox"/>			X	

QUESTION		RESPONSE			COMMENTS
		Y	N	Unk	
27	Is there a Mold Operations and Maintenance (O&M) program in place at the Property <input type="checkbox"/>			X	
28	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of <input type="checkbox"/> If so, please provide details.		X		
29	Has fill dirt been brought onto the Property which originated from a contaminated site or is of an unknown origin <input type="checkbox"/>		X		
30	Is the Property or any portion of the Property located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species) <input type="checkbox"/>		X		
31	Have you been informed of the past existence of environmental violations with respect to the Property or any facility located on the Property <input type="checkbox"/>		X		
32	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Property or any facility located on the Property <input type="checkbox"/>		X		
33	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the Property <input type="checkbox"/>		X		
34	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Property <input type="checkbox"/>		X		
35	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products <input type="checkbox"/>		X		
Summarize historical Property use (when was the Property developed with the current improvements, what modifications have taken place, what was the Property used for prior to its current use)					
On the day of the site visit, provide EMG's Field Observer access to all of the available documents listed below.					
<ul style="list-style-type: none"> ▪ Previous Environmental Site Assessment and Compliance Audit reports ▪ Site plans, ALTA surveys, etc. ▪ Asbestos, Lead Based Paint, Mold Operations and Maintenance Programs (O&Ms) ▪ Environmental permits, including registrations for aboveground and underground storage tanks and registrations for underground injection systems ▪ Material Safety Data Sheets ▪ Hazardous waste generator notices or reports ▪ Community Right-to-Know Plan, Risk Assessments, Safety plans, SPCC plans, FRP Plans, etc. ▪ Reports regarding hydrogeological conditions on the Property or adjoining properties ▪ Notices from government agencies regarding past or current violations of environmental laws ▪ Environmental liens and recorded Activity and Use Limitations ▪ Geotechnical surveys

**ASTM E1527 USER QUESTIONNAIRE
 PHASE I ENVIRONMENTAL SITE ASSESSMENT**

EMG has been retained to conduct a Phase I Environmental Site Assessment (ESA) on your property as contracted. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM E1527 Scope of Work, we are required to ask the following questions to the User of the report seeking to fulfill the User Requirements of the Standard. Please complete and return this questionnaire to EMG (within two days of receipt).

Date: _____

Company name: _____

Property Name/Street Address: _____

Property City/State/Zip: _____

Name of person completing questionnaire: _____ **Phone Number:** _____

Role/Title: _____ **Fax Number:** _____

Length of association with property: _____ **E-mail address:** _____

Please check one: **User:** **User Representative:**

Signature: _____

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column. ~ Note: *U* indicates "Unknown", *NR* indicates "No Response" and "N/A" indicates not applicable.

QUESTION	RESPONSE				COMMENTS
	Y	N	U	NR	
1 Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2 Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
3 Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4 Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
5 Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

QUESTION		RESPONSE				COMMENTS
		Y	N	U	NR	
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8 (a)	Do you know the past uses of the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8 (b)	Do you know of specific chemicals that are present or once were present at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8 (c)	Do you know of spills or other chemical releases that have taken place at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8 (d)	Do you know of any environmental cleanups that have taken place at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

If you have access to any of the following helpful documents, please indicate them below and then send them to EMG via standard mail or e-mail/fax along with this questionnaire. Mailing address: 10461 Mill Run Circle, Suite 1100 Owings Mills, MD 21117

Helpful Documents to be forwarded EMG:

- Environmental site assessment reports (i.e., Phase I, Phase II, tank testing results, radon, lead paint, or asbestos testing, etc.)
- Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
- Environmental permits (i.e., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
- Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)
- Registrations for underground injection systems
- Material safety data sheets
- Community right-to-know plan
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc
- Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area
- Notices/correspondence from any agency relating to past/current violations of environmental laws, or liens encumbering the property
- Hazardous waste generator notices or reports
- Other:

**ASTM E1527 OWNER QUESTIONNAIRE
 PHASE I ENVIRONMENTAL SITE ASSESSMENT**

EMG has been retained to conduct a Phase I Environmental Site Assessment (ESA) on your property as contracted. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM E1527 Scope of Work, we are required to ask the following questions to the Owner or Owner representative. Please complete and return this questionnaire to EMG (within two days of receipt).

Date: _____

Company name: _____

Property Name/Street Address: _____

Property City/State/Zip: _____

Name of person completing questionnaire: _____ **Phone Number:** _____

Role/Title: _____ **Fax Number:** _____

Length of association with property: _____ **E-mail address:** _____

Please check one: **Owner:** **Owner Representative:**

Signature: _____

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column. ~ Note: *U* indicates "Unknown", *NR* indicates "No Response" and "N/A" indicates not applicable.

QUESTION	RESPONSE				COMMENTS
	Y	N	U	NR	
1 Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2 Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
3 Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Interviews with Owners and Occupants: The ASTM E1527 Standard recommends in addition to the three specific questions above, the Environmental Professional shall attempt to interview owners, operators, and occupants of the property to obtain information indicating recognized environmental conditions in connection with the property. As such, EMG is providing a Pre-Survey Questionnaire under separate cover to the Key Site Manager or other site representative as designated by either the current owner or the intended User of the assessment data.

If you have access to any of the following documents, please indicate them below and then send them to EMG via standard mail or e-mail along with this questionnaire. Mailing address: 10461 Mill Run Circle, Suite 1100, Owings Mills, MD 21117

Helpful Documents to be forwarded EMG:

- Environmental site assessment reports (i.e., Phase I, Phase II, tank test results, radon, lead paint, or asbestos testing, etc.)
- Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
- Environmental permits (i.e., solid and hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
- Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)

**UNDERGROUND TANK PROGRAM - NOTIFICATION TO FEE TITLE HOLDER
WITH INTENT TO CLOSE CASE
FORMER ARCO SERVICE STATION NO. 510
125 EAST CALIFORNIA BOULEVARD, PASADENA (ID # 911050025)**

Dear Mr. Scully,

The California Regional Water Quality Control Board, Los Angeles Region, is the primary agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within Los Angeles and Ventura counties. As such, we are the lead regulatory agency for overseeing corrective action and cleanup of releases from leaking underground storage tank systems at the site located at **125 East California Boulevard, Pasadena**. We have completed our review and evaluation of information provided to this agency for the underground storage tank release(s) at the above-described location, and have determined that this case meets the Regional Board low risk criteria for case closure.

Pursuant to recent changes of the California Health and Safety Code (Sections 25299.37.2) and Division 7 the Porter Cologne Water Quality Control Act under AB 681, the Regional Board is required to notify all current fee title holders for a site impacted by underground storage tank release(s) prior to considering corrective action or granting case closure. You have been identified as a fee title holder for the subject site or a site impacted by an underground storage tank release and we are notifying you of our plan to close this low risk underground storage tank case. In order to expedite the closure process we are requesting that you provide us with any comments on the proposed plan to close this case in writing by **November 22, 2004**. If you do not wish to participate, you need not respond. If we do not receive a response by **November 22, 2004**, the case will be closed and you will be notified of our action.

If you wish to obtain additional information about the case, you may arrange to review the UST case file for this site by mailing in a written request by the response date to the address in the letterhead above or by faxing in a written request to (213) 576-6707. Regional Board staff will then contact you and arrange a time and date to visit the Regional Board and review the files requested.

Artesia, CA 90702-6038

**Subject: Underground Storage Tank Closure Activities at ARCO Facility #510,
125 E California Bl., in Pasadena, California [PFD ID 000042]**

Dear Mr. Zapka:

This letter contains some important clarifications that you should consider in addition to the accompanying "closure" or "no further action" letter. These letters should always be filed and reviewed together in order to accurately reflect the status of this property.

The "no further action" letter indicates that you have complied with the regulatory requirements for site investigation and/or site remediation at this site, at this time. It does not indicate that the site is free from contamination. In fact, contamination is present at the site. The contamination, as it currently exists, is below the level of regulatory concern. However, if the site is excavated or subsurface work is conducted, excavated materials may be regulated and site workers may require protective equipment.

Additionally, while no further action is required relating to the contamination at this time, neither this letter nor the accompanying letter should be viewed as a guarantee that the property can be used without restriction. Each project proposed for this site should be evaluated to ensure that the specific project will not impact the health of workers at the site, off-site members of the community, water quality, or have other environmental impacts.

To restate, this letter is provided to merely clarify some issues not fully addressed in the accompanying "no further action" letter. This letter does not change the determination that no further action is required at this site, at this time.

If you have any questions, please contact this office at (626) 744-4115.

Sincerely,

James C. Weckerle
Hazardous Materials Specialist

ARCO Facility No. 510
125 East California Boulevard
Pasadena, California
Delta Project No. L098-628

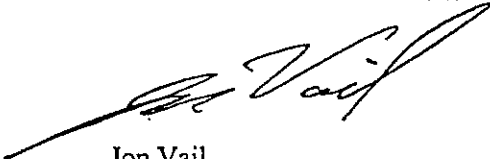

Dear Mr. Weckerle:

Delta Environmental Consultants, Inc. (Delta) is contracted by ARCO Products Company (ARCO) to obtain information from the Pasadena Fire Department concerning closure at ARCO Facility No. 510, located at 125 East California Boulevard in Pasadena, California. A request for closure letter report, dated February 23, 1998 was submitted to you by Brown and Caldwell, Inc. (ARCO's previous consultant for this site). We request your review of this site and your concurrence with our recommendation for closure. We appreciate your attention in this matter.

If you have any questions, please contact me at (949) 363-3306.

Sincerely,

DELTA ENVIRONMENTAL CONSULTANTS, INC.

Subject: Notice of Detection of Site Contamination and Landowner Notification Requirements for ARCO Facility 510, 125 E California Bl., in Pasadena, California

Dear Name:

This letter serves as notice to you that your facility has been determined to have suffered an unauthorized release of a hazardous substance from an underground storage tank system. As such, you are subject to, and directed to comply with, the corrective action and landowner notification requirements contained in Chapter 6.7 of the California Health and Safety Code.

This letter is to inform you of legislative requirements pertaining to cleanup and closure of sites where an unauthorized release of hazardous substance, including petroleum, has occurred from an underground storage tank (UST). Section 25297.15(a) of Ch. 6.7 of the Health & Safety Code requires the primary or active responsible party to notify all current record owners of fee title to the site of: 1) a site cleanup proposal, 2) a site closure proposal, 3) a local agency intention to make a determination that no further action is required, and 4) a local agency intention to issue a closure letter. Section 25297.15(b) requires the local agency to take all reasonable steps to accommodate responsible landowners' participation in the cleanup or site closure process and to consider their input and recommendations.

For purposes of implementing these sections, you or your client has been identified as the primary or active responsible party. Please provide to this agency, within twenty (20) calendar days of receipt of this notice or before your next submittal to this agency, a complete mailing list of all current record owners of fee title to the site. You may use the enclosed list of landowners form (sample letter 2) to comply with this requirement. If the list of current record owners of fee title to the site changes, you must notify the local agency of the change within twenty (20) calendar days from when you are notified of the change.

If you are the sole landowner, please indicate that on the landowner list form. The following notice requirements do not apply to responsible parties who are the sole landowner for the site.

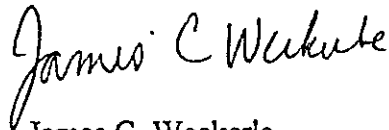

In accordance with Section 25297.15 (a) of Ch. 6.7 of the Health & Safety Code, you must certify to the local agency that all current record owners of fee title to the site have been informed of the proposed action before the local agency may do any of the following:

- 1) consider a cleanup proposal (corrective action plan) ;
- 2) consider a site closure proposal;
- 3) make a determination that no further action is required; and/or,
- 4) issue a closure letter.

You may use the enclosed notice of proposed action form (sample letter 3) to comply with this requirement. Before approving a cleanup proposal or site closure proposal, determining that no further action is required, or issuing a closure letter, the local agency will take all reasonable steps necessary to accommodate responsible landowner participation in the cleanup and site closure process and will consider all input and recommendations from any responsible landowner.

If you have any questions, please contact the undersigned at (626) 744-4115.

Sincerely,

James C. Weckerle
Hazardous Materials Specialist

**Subject: Underground Storage Tank Closure Activities at ARCO Facility #510,
125 E California Bl., in Pasadena, California [PFD ID 000042]**

Dear Mr. Zapka:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former tank(s) are greatly appreciated.

Based upon information in the above referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action to the underground tank release is required.

This notice is issued pursuant to a regulation contained in Section 2721(e) of Title 23 of the California Code of Regulations.

Please contact our office if you have any questions regarding this manner.

Sincerely,

James C. Weckerle
Hazardous Materials Specialist

ATLANTIC RICHFIELD COMPANY QUARTERLY REPORT
Quarter 4, 2004 (January 15, 2004)

Former Station No.: 0510 Address: 125 East California Boulevard, Pasadena, California
Atlantic Richfield Company Environmental Engineer/Phone No.: Mr. Ray Vose/818-957-1755
Consulting Co./Contact Person/Phone No.: SECOR/Mr. Gareth Roberts/ (805) 230-1266 Ext 240
SECOR Project No.: 37BP.U0510.05
Primary Agency/Regulatory ID No.: LARWQCB / Ms. Chandra Cansler /File No. 911050025
Other Agencies to Receive Copies: None

WORK PERFORMED THIS QUARTER [Fourth - 2004]:

1. Completed quarterly groundwater sampling and prepared Quarterly Status Report.
2. Received Case Closure from the LARWQCB in their letter dated December 3, 2004.

WORK PROPOSED FOR NEXT QUARTER [First - 2005]:

1. Abandon groundwater monitoring wells MW-1, MW-2, and MW-3 and submit Well Abandonment Report.

Current Phase of Project:	<u>Monitoring</u>	(Assmnt, Remed. etc)
Frequency of Sampling:	<u>Quarterly</u>	(Quarterly, etc.)
Frequency of Monitoring:	<u>Quarterly</u>	(Monthly, etc.)
Liquid Phase Hydrocarbon Present On-Site	<u>No</u>	(Yes/No)
Cumulative LPH Recovered to Date:	<u>None</u>	(gallons)
LPH Recovered This Quarter:	<u>None</u>	(gallons)
Bulk Soil Removed to Date:	<u>761</u>	(cubic yards)
Bulk Soil Removed This Quarter:	<u>None</u>	(cubic yards)
Water Wells or Surface Waters (4000-ft radius)	<u>4057H-3,000' S</u>	
Radius & Their Respective Directions:	<u>N/A</u>	(Distance and Direction)
Current Remediation Techniques:	<u>None</u>	(SVES, LPH Removal, etc.)
Permits for Discharge:	<u>N/A</u>	(NPDES, POTW, etc.)
Approximate Depth to Groundwater:	<u>Range: 146.59 to 147.28</u>	(Measured Feet)
Groundwater Gradient:	<u>Southeast</u>	(Direction)
	<u>0.004 feet/foot</u>	(Magnitude)

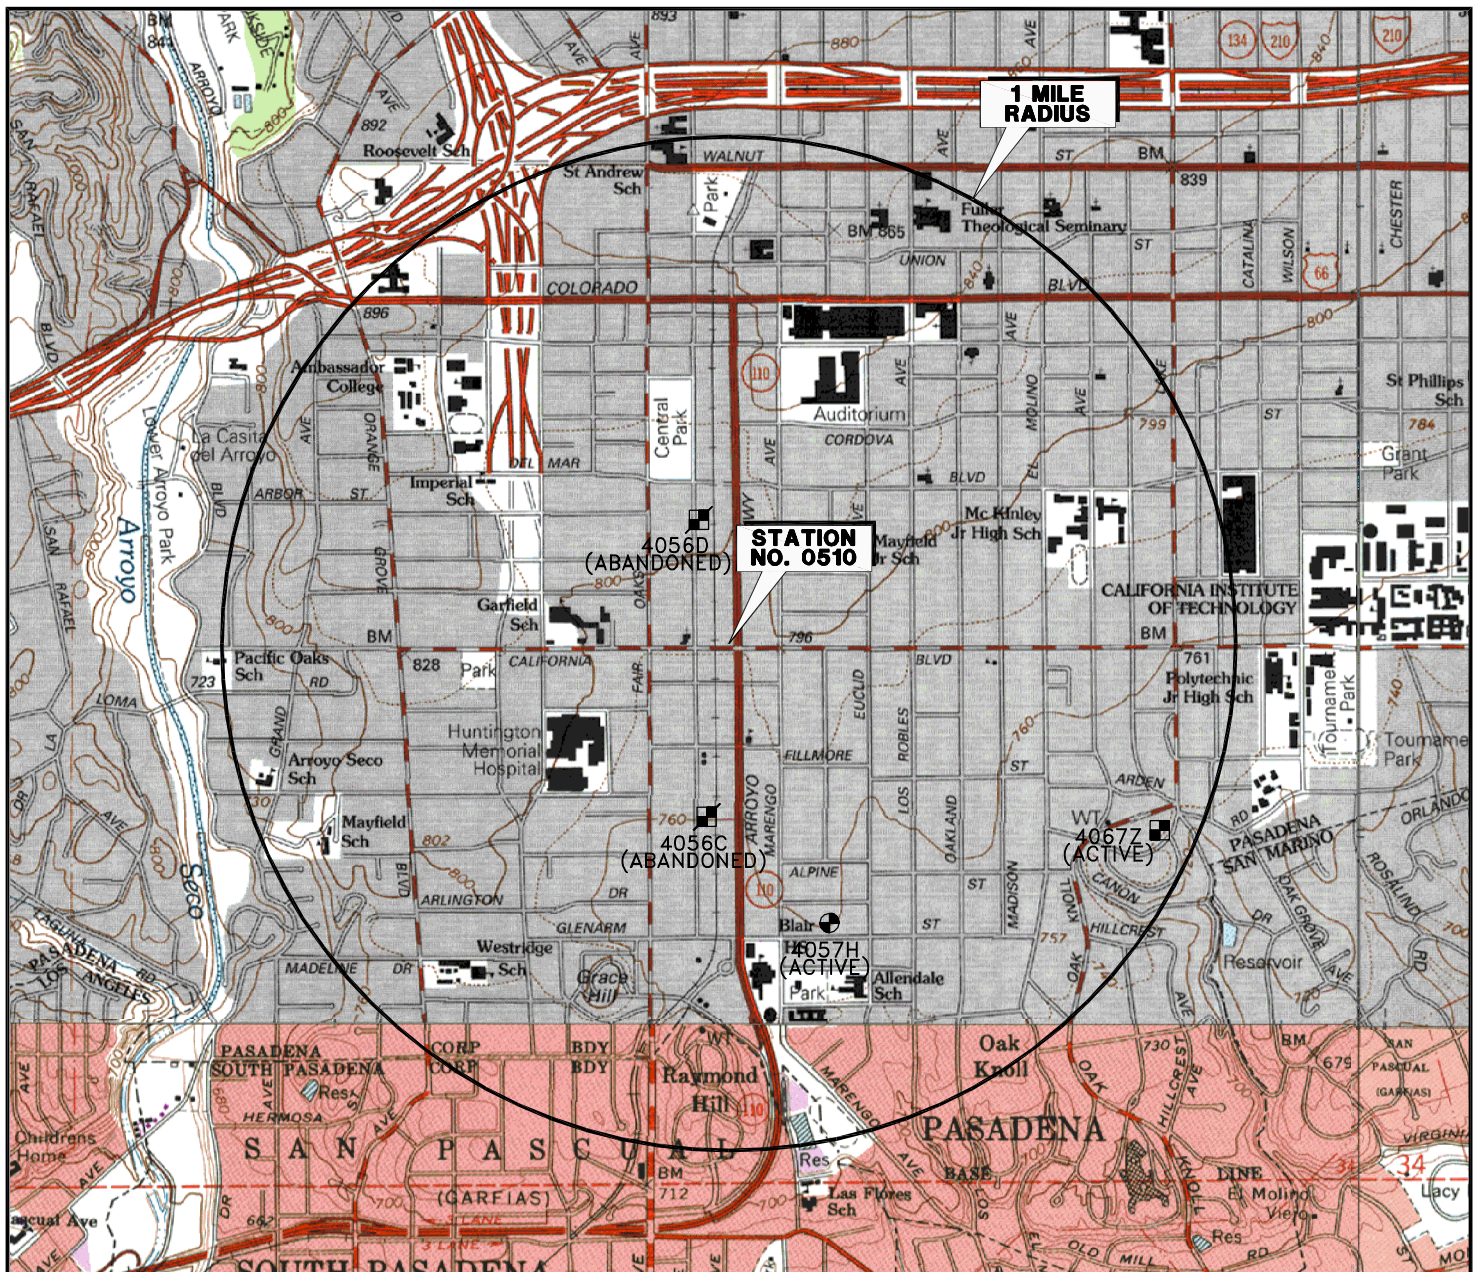

Agency Directive Requirement: LARWQCB letter dated December 3, 2004, issuing Case Closure.

Notes:

GRO Gasoline range organics

B Benzene

T Toluene

E Ethylbenzene

X Total xylenes

MTBE Methyl tert-butyl ether

TBA Tert-butyl alcohol

DIPE Di-isopropyl ether

ETBE Ethyl tert-butyl ether

TAME Tert-amyl methyl ether

SPH Separate phase hydrocarbons

TOC Top of casing (surveyed)

Calc. GW Elev. Calculated groundwater elevation TOC - Depth to Water 0.75 (Measured SPH Thickness); assuming a specific gravity of 0.75 for SPH

ft-MSL feet above mean sea level

µg/L Micrograms per liter

Analyte was not detected above the specified method reporting limit

- Not measured or analyzed

J Estimated value (less than the method reporting limit and greater than or equal to the method detection limit)

Refer to the reports in which data was first presented for more information on historical data.

GRO analyzed by EPA Method 8015 Modified. The carbon chain range used for analysis is C4-C12.

BTEX and oxygenates analyzed by EPA Method 8260B.

DUP Duplicate sample

NS Well not sampled

Laboratory Report and Chain-Of-Custody Document

LABORATORY REPORT

Prepared For: SECOR International, Inc.-Thousand Oaks
 290 Conejo Ridge Avenue, Suite 200
 Thousand Oaks, CA 91361
 Attention: Gareth Roberts

Project: ARCO 0510, Pasadena

Sampled: 12/10/04
 Received: 12/13/04
 Issued: 12/29/04 12:02

NELAP #01108CA CA ELAP #1197 CSDLAC #10117

*The results listed within this Laboratory Report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the applicable certifications as noted. All soil samples are reported on a wet weight basis unless otherwise noted in the report. This Laboratory Report is confidential and is intended for the sole use of Del Mar Analytical and its client. This report shall not be reproduced, except in full, without written permission from Del Mar Analytical. The Chain of Custody, 1 page, is included and is an integral part of this report.
 This entire report was reviewed and approved for release.*

CASE NARRATIVE

SAMPLE RECEIPT: Samples were received intact, at 6°C, on ice and with chain of custody documentation.

HOLDING TIMES: All samples were analyzed within prescribed holding times and/or in accordance with the Del Mar Analytical Sample Acceptance Policy unless otherwise noted in the report.

PRESERVATION: Samples requiring preservation were verified prior to sample analysis.

QA/QC CRITERIA: All analyses met method criteria, except as noted in the report with data qualifiers.

COMMENTS: Results that fall between the MDL and RL are 'J' flagged.

SUBCONTRACTED: Refer to the last page for specific subcontract laboratory information included in this report.

Report Number: INL0912

Sampled: 12/10/04
 Received: 12/13/04

DATA QUALIFIERS AND DEFINITIONS

- BB,LM** Sample > 4x spike concentration, The MS and/or MSD were above the acceptance limits. See Blank Spike (LCS).
- BB,LN** Sample > 4x spike concentration, The MS and/or MSD were below the acceptance limits. See Blank Spike (LCS).
- BH** Reporting limits raised due to high level of non-target analytes
- J,DX** EPA Flag - Estimated value, Value < lowest standard (MQL), but > than MDL
- MB** Analyte present in the method blank
- PV** Hydrocarbon result partly due to individ. peak(s) in quant. range
- RB** RPD exceeded method control limit; % recoveries within limits.
- ND** Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified.
- RPD** Relative Percent Difference

ADDITIONAL COMMENTS

For GRO (C4-C12):

GRO (C4-C12) is quantitated against a gasoline standard. Quantitation begins immediately following the methanol peak.

8015 Analysis EDF Parlabel Cross Reference

Declaration of Environmental Restriction and other Environmental Covenants and Conditions recorded August 21, 2002.

A declaration entered into by 125 ECP, LLC (“Owner”) and BP West Coast Products, LLC (“West Coast,” former owner of the property).

(1) Grant to West Coast unrestricted access rights to assess, monitor, and perform corrective actions on contamination released during the operation of a gas station.

Oral or written notice must be provided before exercise their access right.

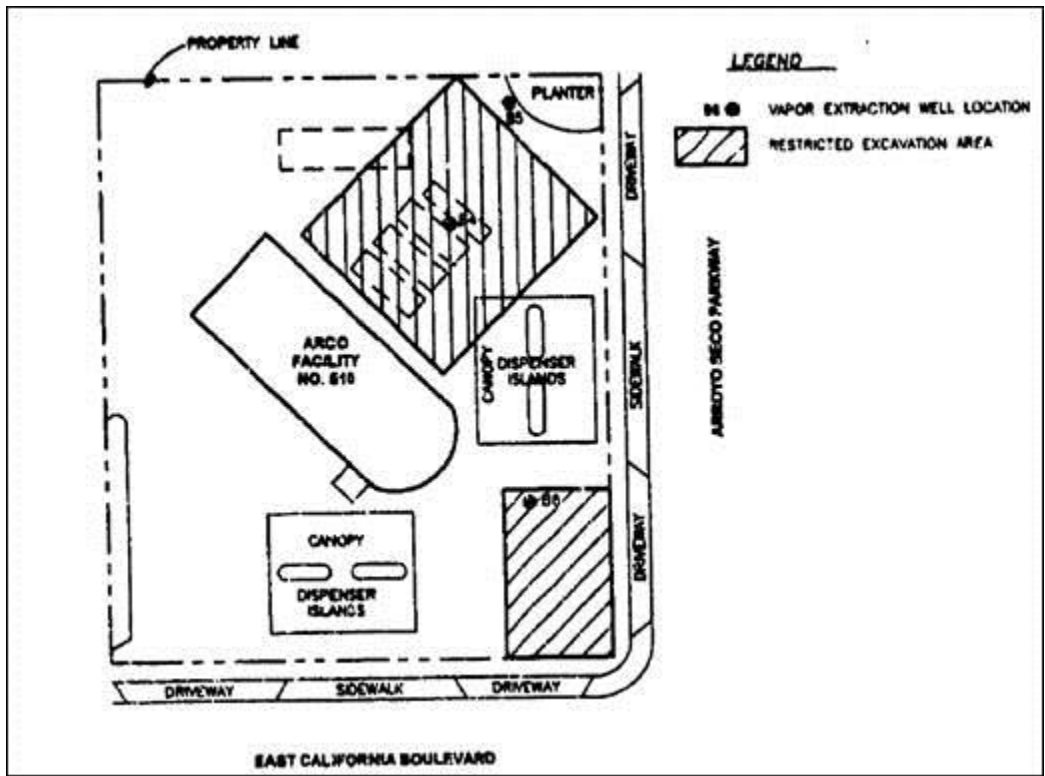

Access rights terminate 90 days after West Coast receives a letter by environmental regulatory agency that no further action with respect to the real estate is required.

(2) Construction Restriction

Requires Owner to obtain, during the access period, West Coast’s written approval before constructing any improvements or installing any equipment that would be likely to materially adversely interfere with access rights or affect corrective action.

Restricts Owner from constructing or installing any improvement on or under any Restricted Area, except for asphalt surfacing or landscaping, until 90 days after West Coast receives the no further action letter. Thereafter, until 25 years after the recordation of the instrument, Owner may construct or install improvements on or under any Restricted Area, but only if the construction or installation does not involve excavation at a depth greater than 4 feet below the grade of the Restricted Area.

Restricted Area Depicted below.

**UNDERGROUND TANK PROGRAM – CASE CLOSURE
FORMER ARCO STATION NO. 510
125 EAST CALIFORNIA BOULEVARD, PASADENA (ID# 911050025)**

Dear Mr. Vose,

This letter confirms the completion of a site investigation and corrective action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground tank(s) site is in compliance with the requirements of subdivision (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required. This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

You may decide to retain all or some of the existing groundwater monitoring wells for future monitoring purposes. However, if you choose to abandon the existing groundwater monitoring wells or vapor extractions wells at the subject property, you must comply with the following:

1. All wells must be properly located and abandoned.
2. Well abandonment permits and all other necessary permits must be obtained from the appropriate agencies prior to the start of work.
3. You must submit a report on the abandonment of the wells to this office by **February 3, 2005**. This report must include, at a minimum, a site map, a description of the well abandonment process, and copies of all signed permits.

California Environmental Protection Agency

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.

ATTN: Mark Cousineau

Subject: Underground Storage Tank Closure Activities at Southern California Public Radio, 474 S. Raymond Ave., in Pasadena, California

Dear Mr. Cousineau:

This letter confirms the completion of a closure project for the underground storage tank(s) formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness is greatly appreciated.

Based upon information in the above referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action to the underground tank removal is required.

Additionally, while no further action is required at this time, this letter should not be viewed as a guarantee that the property is contamination-free and/or can be used without restriction. Each project proposed for this site should be evaluated to ensure that the specific project will not impact the health of workers at the site, off-site members of the community, water quality, or have other environmental impacts.

Please contact our office if you have any questions regarding this manner.

Sincerely,

Kim Nguyen
Hazardous Materials Inspector

San Clemente, CA 92672
ATTN: Mark Cousineau

Subject: Underground Storage Tank Closure Activities at Southern California Public Radio, 474 S. Raymond Ave., in Pasadena, California

Dear Mr. Cousineau:

This letter contains some important clarifications that you should consider in addition to the accompanying "closure" or "no further action" letter. These letters should always be filed and reviewed together in order to accurately reflect the status of this property.

The "no further action" letter indicates that you have complied with the regulatory requirements for site investigation and/or site remediation at this site, at this time. It does not indicate that the site is free from contamination. In fact, contamination is present at the site. The contamination, as it currently exists, is below the level of regulatory concern. However, if the site is excavated or subsurface work is conducted, excavated materials may be regulated and site workers may require protective equipment.

Additionally, while no further action is required relating to the contamination at this time, neither this letter nor the accompanying letter should be viewed as a guarantee that the property can be used without restriction. Each project proposed for this site should be evaluated to ensure that the specific project will not impact the health of workers at the site, off-site members of the community, water quality, or have other environmental impacts.

To restate, this letter is provided to merely clarify some issues not fully addressed in the accompanying "no further action" letter. This letter does not change the determination that no further action is required at this site, at this time.

If you have any questions, please contact this office at (626) 744-4115.

Sincerely,

Kim Nguyen
Hazardous Materials Inspector

**HAZARDOUS MATERIALS UNDERGROUND STORAGE
SITE ASSESSMENT/REMEDIAL ACTION PLAN
FACILITY LOCATION: 474 SOUTH RAYMOND AVENUE**

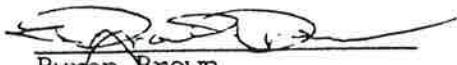

This office has reviewed the soil/groundwater assessment report submitted on 3/15/90 required as a part of the subject site assessment/remedial action plan. Based on the information submitted, we find that:

- The use of excavated soils is unrestricted. The site assessment/remedial action is final and no further action is required at this time.
- Excavated soils may be a hazardous waste and are not suitable for fill material or disposal on site. Contaminated soils must be manifested, transported and disposed of pursuant to Chapter 6.5, California Health and Safety Code, unless evidence is presented indicating that disposal is proper at a less restricted facility. Copies of completed manifests or other appropriate evidence indicating legal disposal must be submitted to this office before this project can be considered closed.
- The site assessment/remedial action is final and no further action is required at this time.
- Closure Permit No. 5298 is final and no further action is required at this time.
- Other _____

This letter is not intended and shall not be interpreted to indicate that this site is totally free from contamination, or that the site is appropriate for any intended future use.

Any questions regarding this matter should be directed to Byron Brown at the Pasadena Fire Department, Hazardous Materials Section, 175 North Marengo Avenue, Pasadena, CA 91101, (818) 405-4115.

KAYA K. PEKEROL
Fire Chief

RE: CITY DIRECTORY RESEARCH
465,491,503,525 & 577 South Arroyo Parkway
465 Pasadena, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

350-650 of South Arroyo Parkway

Appendix G: Historical Environmental Documents

Mr. Pete Kutzer
Edgewood Realty Partners, LLC
c/o The Kutzer Company
716 Mission Street
South Pasadena, California 91030

**REPORT OF LIMITED SUBSURFACE INVESTIGATION
511 SOUTH ARROYO PARKWAY
PASADENA, CALIFORNIA**

Dear Mr. Kutzer:

Date March 12, 2018

At your request, Ramboll US Corporation (Ramboll) has prepared this report to document the limited subsurface investigation conducted at 511 South Arroyo Parkway, Pasadena, California (herein referred to as the "site" or "property", Figures 1 and 2). It is Ramboll's understanding that the site is slated for redevelopment.

Ramboll
350 South Grand Avenue
Suite 2800
Los Angeles, CA 90071
USA

BACKGROUND

The property is located in a commercial area along Arroyo Parkway in Pasadena, California, which is slated for potential redevelopment including excavation to approximately 22 feet. A Phase I environmental site assessment (ESA) for the entire block including this property was recently completed EMG in January 2018. According to the EMG Phase I ESA, a "gasol" pump was identified in the southeastern corner of 511 South Arroyo Parkway based on Sanborn maps dated 1950 and 1970. "Gasol" is an abbreviated term for gasoline, which is used on Sanborn maps during this time period. A "gasol" pump generally consists of a fuel dispenser and most commonly a mechanical pump and nozzle.

T +1 213 943 6300
F +1 213 943 6301
www.ramboll.com

OBJECTIVE

The objective of the limited subsurface investigation was to evaluate current soil conditions in the area of the former "gasol" pump.

SCOPE OF WORK AND FINDINGS

The scope of work associated with the subsurface investigation included: 1) pre-field activities and site visit; and 2) soil sampling and analyses. A summary of the findings, data evaluation, conclusions and recommendations are presented below.

Pre-field Activities and Site Visit

As part of the pre-field activities, Ramboll performed a site visit on February 7, 2018 to confirm proposed soil sampling locations and made adjustments to proposed sampling locations as appropriate. Ramboll contracted with the appropriate

subcontractors for the planned fieldwork (utility locators, drillers, and analytical laboratory). Drilling and sampling activities were directed by Ramboll field personnel working under the supervision of a California Registered Professional Geologist.

Ramboll prepared a Site-specific Health and Safety Plan (HASP) prior to the start of work. The HASP is designed to minimize exposure of Ramboll's field personnel to potentially hazardous materials. All field personnel involved in the project conducted the field work in accordance with the HASP. Ramboll also notified Underground Service Alert (USA) 48 hours prior to the start of drilling activities to mark the locations of all major utilities in the proposed boring locations.

Soil Sampling and Analyses

On February 13, 2018, Ramboll retained Spectrum Geophysics of Chatsworth, California, a private utility locator, to conduct a geophysical survey to mark subsurface utility lines, subsurface structures, and underground obstructions during the site visit. Upon completion of the utility locating, under Ramboll oversight, Millennium Environmental, Inc. (MEI) of Anaheim, California, advanced two soil borings, designated as Borings SB-6 and SB-7¹, to a depth of approximately 20 feet below ground surface (bgs) at the locations shown on Figure 3. Prior to drilling, borings were concrete cored and hand augered to approximately five feet bgs. The initial borehole was advanced using a skid-steer-mounted direct push drilling rig; however, refusal was encountered at an approximate depth of 10 feet and this borehole was abandoned. Borings SB-6 and SB-7 were advanced using a truck mounted direct push drill rig to a total approximate depth of 20 feet.

Soil samples were collected from borings at approximate depths of 5, 10, 15, and 20 feet and submitted for chemical analysis (see below for details), and monitored for organic vapors with a photoionization detector (PID).

In accordance with USEPA Method 5035, soil samples were collected by extracting aliquots from the designated sampling sleeve using TerraCores®. Soil samples selected for other analytical methods were collected jars capped with Teflon® caps. Soil samples were analyzed for volatile organic compounds (VOCs), oxygenates and methyl-tert-butyl-ether (MTBE) by USEPA Method 8260B, total petroleum hydrocarbons (TPH)-gasoline range organics (GRO), TPH-diesel range organics (DRO), TPH-oil range organics (ORO) by USEPA Method 8015M, and lead by USEPA Method 6010. All soil samples were stored in a chilled cooler and delivered to a California state-certified laboratory under strict chain-of-custody procedures.

After the collection of soil samples, the borings were backfilled with a bentonite/cement slurry and completed to surface to match the existing surface material. Investigation derived waste consisting of soil cuttings and decontamination water were containerized in two Department of Transportation-rated 55 gallon drums and stored at a nearby site pending characterization and disposal.

Findings

During the geophysical survey, two approximately 2-inch diameter metal conduits were observed extending above ground surface in the general vicinity of the "gasol" pump (Figure 3). One conduit was located within

¹ Note that this work at this site was performed in conjunction with work on other properties, which included advancing Borings SB-1 through SB-5.

an elevated concrete pad, extended approximately three inches above the ground surface, and was backfilled with concrete. The second conduit extended approximately two inches above ground surface and was open to an approximate depth of five feet bgs. A petroleum-like odor was noted on the measuring tape used to measure the total depth of the open conduit. Finally, a subsurface metallic anomaly, suggestive of piping, was detected approximately 0.5 foot bgs and extended laterally between the two aforementioned conduits (see Figure 3).

In general, the lithology of the upper 20 feet of Borings SB-6 and SB-7 is comprised of mostly fine to coarse grain sands with silts. According to the historical environmental reports, groundwater is present in the vicinity of the site at approximately 147 feet bgs and was not encountered during this investigation. PID readings collected from soil samples ranged from 0.0 parts per million by volume (ppmv) to 3.1 ppmv at Boring SB-7 (depth of 20 feet).

Soil Analyses

A summary of analytical results are presented in Tables 1A and 1B. Complete laboratory reports are included in Attachment A and data validation is included in Attachment B. In summary:

- VOCs, TPH-GRO and TPH-DRO were not detected in soil samples.
- TPH-ORO was detected at concentrations ranging from 5.2U milligrams per kilogram (mg/kg) (Boring SB-7 at 10 feet bgs) to 6.9U mg/kg² (Boring SB-6 at 15 feet bgs). The TPH-ORO data was qualified as "U" based on the data validation (see Attachment B). The "U" qualification indicates that the analyte was analyzed for and not detected above the laboratory reporting limit. Therefore, the concentrations reported as TPH-ORO are considered non-detect.
- Lead was detected at concentrations ranging from 3.8 mg/kg at Boring SB-6 (depth of 5 and 10 feet) to 10 mg/kg at SB-7 (depth of 20 feet).

Data Evaluation

As part of the data evaluation, concentrations of lead in soil were compared to USEPA regional screening levels for chemical contaminants for residential and commercial/industrial use scenarios and background concentrations in California soils (see Table 1B). The concentrations of lead in soil are below regional screening levels for residential and commercial/industrial use scenarios and considered to be within the range of background concentrations.

CONCLUSIONS AND RECOMMENDATIONS

Ramboll understands that redevelopment plans for the site will likely include demolition of current site buildings and earthwork may include excavation to approximately 22 feet bgs for construction of the parking structure. In summary:

- No VOCs or TPH were reported in the soil samples. The concentrations of lead in soil are considered to be within the range of background conditions.
- Two metal above ground conduits were observed in the vicinity of the "gasol" pump and a petroleum-like odor was detected at the base of the conduit extending to an approximate depth of

² TPH-ORO detections were qualified as "B" by the laboratory (indicating that ORO was detected in the laboratory blank samples).

5 feet bgs. A subsurface metallic anomaly, suggestive of piping, was detected in the area between the two conduits.

Based on observations of the conduits and the subsurface metallic anomaly identified near the historic "gasol" pump described above, as a precautionary measure Ramboll recommends that the contractor takes appropriate measures prior to removing the conduits and excavating soil in that area of the site.

CLOSURE

Ramboll appreciates the opportunity to work with you on this project. If you have any questions, please contact Eddie Arslanian at 213.943.6326.

Yours sincerely,

Eddie Arslanian, PE

SB-7-10	10		<0.320	<5.0	5.2 U
SB-7-15	15		<0.340	<4.8	<4.8
SB-7-20	20		<0.290	<4.9	5.2 U

Notes:

TPH: total petroleum hydrocarbons

USEPA: United States Environmental Protection Agency

GRO: Gasoline Range Organics

DRO: Diesel Range Organics

ORO: Oil Range Organics

bgs: below ground surface

ug/kg: micrograms per kilogram

mg/kg: milligrams per kilogram

<Reporting Limit: analyte not detected above laboratory reporting limit

“U” qualification indicates that the analyte was analyzed for and not detected above the laboratory reporting limit. As a result, the concentrations reported as TPH-ORO are considered non-detect.

Samples were also analyzed for volatile organic compounds (VOCs) by USEPA Method 8260B. No VOC detections were reported above laboratory reporting limits. See Attachment A for laboratory analytical report.

TestAmerica Job ID: 440-203322-1

Job ID: 440-203322-1

Laboratory: TestAmerica Irvine

Narrative

Job Narrative 440-203322-1

Comments

This report was revised to show DRO/ORO results for EPA 8015B-extractable test. Only the results for borings SB6 and SB7 are included in this report.

Receipt

The samples were received on 2/13/2018 6:45 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.3° C and 2.9° C.

GC/MS VOA

Method(s) 8260B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and/or precision for selected analytes in analytical batch 440-457637 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA

Method(s) 8015B: The method blank for preparation batch 440-457571 and analytical batch 440-457450 contained ORO (C24-C40) above the reporting limit (RL). Associated sample(s) were not re-extracted and/or re-analyzed. The sample results for ORO (C24-C40) range should be considered possible high bias.

Method(s) 8015B: Surrogate recovery for the following 8015-DRO batch QC sample was outside control limits due to the "dark clay-like" matrix: (440-203436-H-1-A MS). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	N/A	Not present
Sample custody seals, if present, are intact.	N/A	Not Present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

**ATTACHMENT B
DATA VALIDATION**

Ramboll reviewed one laboratory report, dated March 6, 2018, by TestAmerica for the 1690006935 project. The report contains analytical data for soil and field quality control (QC) samples collected on February 13, 2018. All samples were analyzed for Volatile Organic Compounds (VOCs) by United States Environmental Protection Agency (USEPA) Method 8260B, for Gasoline Range Organics (GRO) and Diesel Range Organics/Oil Range Organics (DRO/ORO) by USEPA Method 8015B, and for lead by USEPA Method 6010B.

Ramboll's validation review was based on procedures published by the USEPA Contract Laboratory Program in their National Functional Guidelines for both organic and inorganic data review (USEPA 2017). The guidelines provide the criteria to review laboratory and field quality control information and attach the appropriate data qualifiers to the laboratory data. The QC information checked by Ramboll included chain-of-custody (COC) forms, holding times, reporting limits, matrix spike/matrix spike duplicate (MS/MSD) analyses, laboratory control sample/laboratory control sample duplicate (LCS/LCSD) analyses, surrogate recoveries, duplicates, and blanks.

Ramboll noted the following findings based on our review:

- The laboratory noted that this report was revised to show only the results for borings SB6 and SB7, and include the DRO/ORO results for EPA 8015B-extractable test. Samples SB-1 through SB-5, although present on the COC, will be reported separately. No data qualification is necessary.

VOCs

- For the Method 8260B MS/MSD analysis, the laboratory noted that the Percent Recovery (%R) value for 1,1,2,2-tetrachloroethane (1,1,2,2-PCA) was below the lower acceptable laboratory limit of 40%, at 14% (MS) and 4% (MSD) in analytical batch 457637. The Relative Percent Difference (RPD) limit exceeded the acceptable laboratory limit of 30%, at 119%. The laboratory noted that sample matrix interference is suspected because the associated LCS %R value was acceptable. Because 1,1,2,2-PCA was not detected above the reporting limit in the associated samples, the results for this analyte are "R"-qualified (results unusable).
- For the Method 8260B analysis, the laboratory noted that the MS/MSD %R value for trichloroethene (TCE) exceeded the upper acceptable laboratory limit of 140%, at 174% (MS) and 191% (MSD) in analytical batch 457637. The laboratory noted that sample matrix interference is suspected because the associated LCS recovery was acceptable. Because TCE was not detected above the reporting limit in the associated samples, no data qualification is necessary.
- For the Method 8015 analysis, the laboratory noted that ORO (C24-C40) was reported in the method blank in preparation batch 457571 at 5.11 mg/kg. The EPA Guidelines state that any reported concentration less than ten times the reported concentration in an associated blank (in this case, any concentrations less than 10 x 5.11 mg/kg, or 51.1 mg/kg) should be qualified as not detected. Because ORO was not detected above the reporting limit or was detected above the reporting limit in the associated samples but at less than 51.1 mg/kg, the results for ORO in Samples SB-6-15, SB-6-20, SB-7-5, SB-7-10, SB-7-20 are "U"-qualified (analyte was analyzed for, but not detected above the reporting limit).
- For the Method 8015-DRO analysis, the laboratory noted that the MS %R value for the surrogate n-octacosane in preparation batch 457571 was below the lower acceptable laboratory limit of 40%, at 37%. The laboratory noted that evidence of matrix interference is present due to the "dark clay-like" matrix and re-extraction and/or re-analysis was not performed. Because surrogate %R values were acceptable in the individual analytical samples, no data qualification is necessary.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

EI ID: 10622149 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 3/6/2015
Violation Division: Pasadena Fire Department
Violation Program: HMRRP
Violation Source: CERS
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 05/21/2015.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.

Violations

Violation Date: 3/6/2015
Violation Division: Pasadena Fire Department
Violation Program: HMRRP
Violation Source: CERS
Citation: 19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 05/21/2015.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violations

Violation Date: 3/6/2015
Violation Division: Pasadena Fire Department
Violation Program: HMRRP
Violation Source: CERS
Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)
Violation Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Returned to compliance on 05/21/2015.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to electronically update business plan within 30 days of any one of the following events:
 A 100 percent or more increase in the quantity of a previously disclosed material.
 Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
 A change of business address, business ownership, or business name.

Violations

Violation Date: 3/6/2015
Violation Division: Pasadena Fire Department
Violation Program: HMRRP
Violation Source: CERS
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 05/21/2015.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 3/6/2015
Violation Division: Pasadena Fire Department
Violation Program: HMRRP
Violation Source: CERS

Violation/Evaluation Summary

Note: NO RECORDS: As of Dec 2018, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Waste Code Description:					SILVER	
Hazardous Waste Code:					F003	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					U003	
Waste Code Description:					ACETONITRILE (I,T)	
Hazardous Waste Code:					U147	
Waste Code Description:					2,5-FURANDIONE (OR) MALEIC ANHYDRIDE	
Hazardous Waste Code:					U190	
Waste Code Description:					1,3-ISOBENZOFURANDIONE (OR) PHTHALIC ANHYDRIDE	
Hazardous Waste Code:					U194	
Waste Code Description:					1-PROPANAMINE (I,T) (OR) N-PROPYLAMINE (I,T)	
Hazardous Waste Code:					D002	
Waste Code Description:					CORROSIVE WASTE	
Hazardous Waste Code:					D028	
Waste Code Description:					1,2-DICHLOROETHANE	
Hazardous Waste Code:					F005	
Waste Code Description:					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
Hazardous Waste Code:					P014	
Waste Code Description:					BENZENETHIOL (OR) THIOPHENOL	
Hazardous Waste Code:					U246	
Waste Code Description:					CYANOGEN BROMIDE (CN)BR	
Hazardous Waste Code:					U404	
Waste Code Description:					ETHANAMINE, N,N-DIETHYL- (OR) TRIETHYLAMINE	
Hazardous Waste Code:					P028	
Waste Code Description:					BENZENE, (CHLOROMETHYL)- (OR) BENZYL CHLORIDE	
Hazardous Waste Code:					U002	
Waste Code Description:					2-PROPANONE (I) (OR) ACETONE (I)	
Hazardous Waste Code:					U044	
Waste Code Description:					CHLOROFORM (OR) METHANE, TRICHLORO-	
Hazardous Waste Code:					U077	
Waste Code Description:					ETHANE, 1,2-DICHLORO- (OR) ETHYLENE DICHLORIDE	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Hazardous Waste Code: Waste Code Description:					U108 1,4-DIETHYLENEOXIDE (OR) 1,4-DIOXANE	
Hazardous Waste Code: Waste Code Description:					U117 ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)	
Hazardous Waste Code: Waste Code Description:					U037 BENZENE, CHLORO- (OR) CHLOROBENZENE	
Hazardous Waste Code: Waste Code Description:					U112 ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Violations

Violation Date: 5/27/2016 **Violation Program:** UST
Violation Division: Pasadena Fire Department **Violation Source:** CERS
Citation: HSC 6.7 25291 - California Health and Safety Code, Chapter 6.7, Section(s) 25291
Violation Notes:

Returned to compliance on 06/28/2016.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid.

Violations

Violation Date: 5/27/2016 **Violation Program:** UST
Violation Division: Pasadena Fire Department **Violation Source:** CERS
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Notes:

Returned to compliance on 06/28/2016.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the underground storage tank and/or

failure to maintain written monitoring and maintenance records on site, or off site if approved by the CUPA, for a period of 3 years, 6 1/2 years for cathodic protection, and 5 years for written performance claims pertaining to release detection systems and calibration and maintenance records for such systems.

Violation Date: 5/22/2015
Violation Division: Pasadena Fire Department
Citation: 23 CCR 16 2636(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)
Violation Program: UST
Violation Source: CERS
Violation Notes:

Returned to compliance on 05/23/2015.; Note: data in [Violation Notes] field for some records is truncated from the source.

Violation Description:

Failure to continuously monitor the interstitial space of the tank, piping and/or sumps sump such that the leak detection activates an audible/visual alarm when a leak is detected.

CYANIDE (FREE), METALS, UNCATEGORIZED

Site History:

In the early 1900's this 2.4 acre site was used by the gas company for the production of manufactured gas which is made from coal and oil. The former gas plant property is presently occupied by several industrial and warehouse structures. Byproduct residues have been found in soils at this former gas plant site. PAH's and heavy metals such as lead and arsenic were found at this site. In January 2006 a removal action was completed at the site.

Document Type:					Site Screening	
Date Completed:					4/6/1992	
Comments:					The site consists of 2.4 acres. The former gas plant property is presently occupied by several industrial and warehousing concerns. The surrounding area is fully developed and occupied by commercial and industrial uses. Black discolored soil was noted in the 1966 Site Reconnaissance. In the early 1900s, the site was used by gas companies for the production of 'manufactured gas,' made from coal and oil. The byproducts from this operation were tars, oils, sludges, lampblack, etc, which were sold for various industrial uses. Some of these byproduct residues have been found in soils at former town gas plant sites. Out of these, polycyclic aromatic hydrocarbons (PAH) are hazardous. Also, elevated levels of heavy metals such as lead, arsenic, and cyanides were found at a few sites. A PEA is required at the site to determine if any emergency removal action is required to reduce the potential threat to public health & the environment. The Dept received a Notice of Intent dated March 20, 1992, to initiate the PEA.

Comments:		Remedial Action Completion report approved for all three parcels. Parcel 815 has been remediated to unrestricted land use standards. For Parcels 835 and 859 the accessible areas have been remediated to unrestricted land use standards however there remains some contamination beneath the existing structures. This contamination will be remediated at a later time when those soils become accessible. Institutional controls will be utilized for the remaining contamination at these two parcels to prevent inappropriate land uses.

<i>Document Type:</i>			Site Screening			
<i>Date Completed:</i>			4/6/1992			
<i>Comments:</i>			The site consists of 2.4 acres. The former gas plant prop- erty is presently occupied by several industrial and warehousing concerns. The surrounding area is fully developed and occupied by commercial and industrial uses. Black discolored soil was noted in the 1966 Site Recon- naissance. In the early 1900s, the site was used by gas companies for the production of 'manufactured gas,' made from coal and oil. The byproducts from this operation were tars, oils, sludges, lampblack, etc, which were sold for various industrial uses. Some of these byproduct residues have been found in soils at former towne gas plant sites. Out of these, polycyclic aromatic hydrocarbons (PAH) are hazardous. Also, elevated levels of heavy metals such as lead, arsenic, and cyanides were found at a few sites. A PEA is required at the site to determine if any emergency removal aciton is required to reduce the potential threat to public health & the environment. The Dept received a Notice of Intent dated March 20, 1992, to initiate the PEA.

Office: SOUTHERN CALIFORNIA SCHOOLS & BROWNFIELDS OUTREACH
Past Use that Caused Contam: METAL PLATING - CHROME, METAL PLATING - OTHER
Potential Media Affected: SOIL, SOIL VAPOR
Potential Contaminant of Concern:

CHROMIUM III, CHROMIUM VI, TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE)

Site History:

Site History: Monitor Polishing and Plating, Inc. has been operating at the site for over 25 years anodizing and electroplating metals such as copper, brass, nickel, cadmium, chrome and tin. Established as a plating shop when environmental regulations were almost non-existent. Like most old plating operations Monitor Polishing and Plating did not concern itself with equipment set-up nor with the discharge of liquids onto the shop floor which drained directly into the shop's clarifier.

As regulatory standards and requirements has increased steadily thru the years, the shop has changed practices. Secondary containment was provided around plating, chemical and rinse tanks in addition to FVC tank liners. Electrical heaters were used instead of gas burners. The plating tanks were reconfigured so that the tanks were in line and always with a holding or rinse tank or both located next to the plating tank.

Pasadena City Fire Dept. provided the following information regarding the site history. Mr. James N. Nelson was living at 390 South Pasadena in April 1940 and had been cited by police for burning out of hours. In response, he later came to the city's offices and requested a new permit for a concrete incinerator. On May 4, 1951 a fire occurred on the property and twelve days later a citation was issued to remove rubbish. On January 21, 1960, an inspection was conducted on the site for an operational junkyard. The business was cited for bad electrical wiring, combustible rubbish, rat harborage, and a fence in need of repair. By December 6, 1977, the junkyard had already been replaced by a metal plating shop. A notice was issued to remove flammable liquids and discontinue a spray booth. In May of 1987, the first hazardous materials permit was issued for the site.

The site has been in use as a metal-plating facility for more than 25 years. Since being purchased by the owners in 1994, the site has undergone a number of improvements. During the upgrades, three areas of concern (AOCs) were identified within the facility building. Two AOCs were areas where the concrete floor was found to be etched from past solution releases. Water-based solutions of sulfuric acid and caustic soda were used in one of these areas, and nickel, chrome, cadmium, and copper metal solutions were used in the plating process in the other area. A third AOC was identified in the vicinity of the cyanide destruction unit and a lacquer spray booth.

On April 9, 2002 a fire incident occurred resulting in a total loss of business. Fire Department responded to the incident. All chemicals and debris were contained and manifested to disposed at an offsite Facility. In 2002, the property was sold to the current owner. A Phase I Environmental Assessment verification inspection was conducted at the site on March 25, 2003. Four areas of concern were observed. On January 14, 2004 DTSC issued a draft Corrective Action Consent Agreement to RP for signature. On May 20, 2004 DTSC responded to a letter from the RP stating that the property does not have any environmental problems. DTSC concluded after review of a report by Black Rock Geosciences that a risk assessment is required and sent a draft Corrective Action Consent Agreement to the RP for signature.

On September 24, 2004 DTSC conducted a meeting with the company representative, attorney, consultant, DTSC OLC and TPCAB Branch Chief to discuss issues and concerns regarding the recent investigation, subcontractors, insurances coverage, owner and operator, subsurface contamination (metals and VOCs- PCE, TCA, TCE, DCE & xylene) at the site. On September 29, 2004 DTSC conducted a meeting with the Pricipal and Director of the School located next to the site. Purpose of the meeting was to inform the school regarding the issues and concerns at the site and conduct a walk through of the school. On October 1, 2004 DTSC collected Indoor Air Samples to find out if there is any impact of near by site on the school.

Groundwater Contamination is present beneath the site, but it is not known at this time if the release from Monitor the source or has contributed to the groundwater contamination.

Project Description: Phase 1 Assessment, soil vapor extraction system installed and operated.

On May 16, 2014, Monitor submitted the Soil Vapor Assessment Report. The Report concluded that the likelihood of vapor intrusion of VOCs into the proposed warehouse building at concentrations that may present an unacceptable health risk appears to be low and proposed warehouse building design that would further reduce the risk: installation of a minimum 10 millimeter thick multi-layer polyolefin resin plastic vapor barrier between the refurbished concrete slab and a second 6-inch thick concrete slab; building height will be 30 feet; and building would also utilize numerous vented skylights as part of the design. DTSC concurred with the Report conclusions and approved the Report provided Monitor Plating complies with the enclosed comments during future activities and/or submittals. DTSC also notified as follows:

1. Pursuant to the CACA, the next step in the corrective action process is submittal of an Interim Measure Proposal (IMP). The purpose of the IMP is to present the measures proposed in the Report for public review and comment. The IMP process includes public participation activities and compliance with the California Environmental Quality Act (CEQA) requirements. At the end of the public comment period, DTSC will modify and/or approve the IMP.
2. A land use covenant (LUC) should to be placed on the property restricting the use of the property for industrial/commercial. The LUC should be signed by the current property owners and DTSC, and recorded with the County of Los Angeles.
3. An operation and maintenance agreement should be signed with DTSC and a proper financial assurance mechanism should be in place.
4. In order to close the data gaps, off-site soil vapor investigation needs to be completed. Further soil vapor samples need to be collected from the adjacent property south of Monitor Polishing. If further investigation reveals that the neighboring property is impacted, then mitigation measures should be implemented according to DTSC standards and guidelines.
5. The existing vapor extraction wells should be accessible for future extractions if necessary.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

6. Selected vapor probes and the groundwater monitoring wells should be protected during construction and placed in flush-mounted well boxes within the final concrete slab for future sampling.

7. Groundwater investigation is required to determine whether the site has impacted groundwater. If groundwater investigation shows significant impact from the Site to the underlying groundwater, then corrective measure for groundwater would be necessary.

8. If the planned groundwater investigation shows significant impact from the Site to the down-gradient groundwater, Soil vapor extraction (SVE) would be necessary to address on-site VOC source in soil.

As of March 11, 2015, the DTSC and the RP have not reached an agreement on payment of DTSC's oversight. This project is pending the resolution of payment issue.

The request for PPS supported is cancelled by the PM on April 24, 2015 after a conversation with Maya Akula, explaining that the project is currently on suspend.

Site History:

Site Description according to RFA dated 08/18/1991- The Monitor Polishing and Plating (Monitor) site is located on a parcel of land at 390 South Pasadena Avenue in Pasadena, California. A second non-contiguous parcel of land on the same block with an address ,of 166 Vaverly Drive is also being considered as part of the site. The site covers less than 1 acre in a commercial and residential area.

The site consists of two buildings separated by a privately owned property. Plating and polishing facilities are located at 390 South Pasadena Avenue; a painting facility, the office, and building supplies are located at 166 Vaverly Drive. The property on South Pasadena Avenue is owned by Mr. Robert Ingrassita and the property located at Vaverly Drive is owned by Mr. Richard Hard.

This facility electroplates the following metals: cadmium, brass, chrome, copper, nickel and tin. Aluminum anodizing, spray painting, and polishing are also part of facility operations. The majority of electroplating is done for industrial parts for a variety of industries.

3/26/2018 update--This facility submitted a Part A on 12/1/1980 and was issued an ISD on 8/30/1983. The facility requested a variance from permitting requirements both on 4/19/84 and 2/3/87 but were denied. EPA requested a Part B on 4/29/1988. As of 4/1991, Monitor Polishing has not submitted a Part B. On 08/24/2006, the facility entered into a Corrective Action Consent Agreement with DTSC. As of now, the corrective action still has not been completed.

4/25/2018- Previous Project Manager, Shahir Hadid, confirmed that the facility is inactive and the current owner does not plan to proceed. However, cleanup work is not entirely done so this facility is still undergoing closure.

Status: UNDERGOING CLOSURE

Site History:

Site Description according to RFA dated 08/18/1991- The Monitor Polishing and Plating (Monitor) site is located on a parcel of land at 390 South Pasadena Avenue in Pasadena, California. A second non-contiguous parcel of land on the same block with an address ,of 166 Vaverly Drive is also being considered as part of the site. The site covers less than 1 acre in a commercial and residential area.

The site consists of two buildings separated by a privately owned property. Plating and polishing facilities are located at 390 South Pasadena Avenue; a painting facility, the office, and building supplies are located at 166 Vaverly Drive. The property on South Pasadena Avenue is owned by Mr. Robert Ingrassita and the property located at Vaverly Drive is owned by Mr. Richard Hard.

This facility electroplates the following metals: cadmium, brass, chrome, copper, nickel and tin. Aluminum anodizing, spray painting, and polishing are also part of facility operations. The majority of electroplating is done for industrial parts for a variety of industries.

3/26/2018 update--This facility submitted a Part A on 12/1/1980 and was issued an ISD on 8/30/1983. The facility requested a variance from permitting requirements both on 4/19/84 and 2/3/87 but were denied. EPA requested a Part B on 4/29/1988. As of 4/1991, Monitor Polishing has not submitted a Part B. On 08/24/2006, the facility entered into a Corrective Action Consent Agreement with DTSC. As of now, the corrective action still has not been completed.

4/25/2018- Previous Project Manager, Shahir Hadid, confirmed that the facility is inactive and the current owner does not plan to proceed. However, cleanup work is not entirely done so this facility is still undergoing closure.

DIOXIN (AS 2,3,7,8-TCDD TEQ)						
Site History:						
The Site is located at he southeast corner of the intersection of South Fair Oaks Avenue and East Glenarm Street in Pasadena. The Site was first developed in the early 20th century with the existing warehouse building in it southwest corner the Site currently contains an inactive oil and natural gas-fired electric generating station used by the Pasadena Water and Power Department from 1906 through 1977.						
City of Pasadena is responsible for supplying electricity to its residents. Pasadena will install a new electric generating unit (GT-5 Combined Cycle Installation)to replace the oldest unit on the Site. Back in the 1940's the City of Pasadena operated a municipal incinerator in the Broadway Facility until it was demolished in 1966. The former incinerator site is now the site of the gas compressor for one of the generating unit. The project site is located about 500 feet away from the former incinerator site. The California Union for Reliable Energy (CURE) and the City of Pasadena will be doing the investigation via a Project Labor Agreement (PLA). The City of Pasadena has agreed to consider the use of PLA and entered into an Environmental Settlement Agreement with CURE to do the dioxin testing. City of Pasadena, Department of Water and Power and DTSC have entered into a Voluntary Cleanup Agreement for DTSC to Provide oversight on the focused dioxin sampling Workplan, investigation and report for the GT-5 Combined Cycle Installation (Repowering project) site that is approximately 500 feet away from the former municipal incinerator. If appropriate, DTSC will issue a "No						

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Further Action" letter for the Site.

The City of Pasadena, Department of Water and Power and DTSC entered into a Voluntary Cleanup Agreement October 28, 2013 for DTSC to oversee the Dioxin investigation at the site. After the investigation was completed, DTSC reviewed the Limited Soil Sampling and Analysis for Dioxin Report and issues a No Further Action Required letter with regard to Dioxin investigation on March 5, 2013.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Dec 12, 2018

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Dec 12, 2018

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Dec 12, 2018

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Nov 14, 2018

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Nov 14, 2018

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Dec 17, 2018

RCRA non-CORRACTS TSD Facilities:

RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Dec 17, 2018

RCRA Generator List:

RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Dec 17, 2018

RCRA Small Quantity Generators List:

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Dec 17, 2018

RCRA Conditionally Exempt Small Quantity Generators List:

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt Small Quantity Generators (CESQG) generate 100 kilograms or less per month of hazardous waste or one kilogram or less per month of acutely hazardous waste.

Government Publication Date: Dec 17, 2018

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Dec 17, 2018

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 20, 2016

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jan 20, 2016

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Sep 24, 2018

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 11, 2019

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

LIEN on Property:

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Nov 14, 2018

Superfund Decision Documents:

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Nov 14, 2018

State

State Response Sites:

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Dec 20, 2018

EnviroStor Database:

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Dec 20, 2018

Delisted State Response Sites:

DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Dec 20, 2018

Solid Waste Information System (SWIS):

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 11, 2019

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Dec 20, 2018

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Nov 30, 2018

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Nov 30, 2018

Permitted Underground Storage Tank (UST) in GeoTracker:

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Nov 30, 2018

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Proposed Closure of Underground Storage Tank Cases:

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Dec 11, 2018

Historical Hazardous Substance Storage Information Database:

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks:

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Delisted Storage Tanks:

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Nov 30, 2018

California Environmental Reporting System (CERS) Tanks:

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Nov 29, 2018

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Dec 20, 2018

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Nov 30, 2018

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Dec 20, 2018

GeoTracker Cleanup Sites Data:

[CLEANUP SITES](#)

A list of cleanup sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Nov 30, 2018

Delisted California Environmental Reporting System (CERS) Tanks:

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Nov 29, 2018

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Underground Storage Tanks (USTs) on Indian Lands:

[INDIAN UST](#)

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Delisted Tribal Leaking Storage Tanks:

[DELISTED ILST](#)

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

Delisted Tribal Underground Storage Tanks:

[DELISTED IUST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

County

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Los Angeles County - Burbank City CUPA List:

[BURBANK CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Burbank. This list is made available by the City of Burbank Fire Department.

Government Publication Date: Feb 4, 2019

Los Angeles County - El Segundo City Underground Storage Tanks List:

[UST ELSEGUNDO](#)

List of registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County, made available by El Segundo City Fire Department.

Government Publication Date: Jan 17, 2017

Los Angeles County - Santa Fe Springs Underground Storage Tank:

[UST SANTAFESP](#)

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Fe Springs. This list is made available by Santa Fe Springs Department of Fire-Rescue.

Government Publication Date: Jun 30, 2017

Los Angeles County - Santa Monica City Aboveground Storage Tank List:

[SANTAMON AST](#)

List of registered Aboveground Storage Tanks (ASTs) made available by the Santa Monica Fire Department in the City of Santa Monica of Los Angeles County, California.

Government Publication Date: Aug 21, 2018

Los Angeles County - Santa Monica City CUPA Facilities List:

[SANTAMON CUPA](#)

The Santa Monica Fire Department's office maintains a list of CUPA Facilities located in Santa Monica city.

Government Publication Date: Aug 21, 2018

Los Angeles County - Santa Monica City Underground Storage Tank List:

[UST SANTA MONICA](#)

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Monica made available by Santa Monica Fire Prevention Division.

Government Publication Date: Nov 21, 2018

Los Angeles County - Torrance City Underground Storage Tanks:

[UST TORRANCE](#)

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Oct 2, 2018

Los Angeles County - Vernon City CUPA List:

[VERNON CUPA](#)

The Vernon City Fire Department's office maintains a list of CUPA Facilities located in Vernon city.

Government Publication Date: Oct 23, 2018

Los Angeles County - Vernon City UST List:

[UST VERNON](#)

A list of Underground Storage Tanks (UST) in Vernon City provided by the Vernon City Fire Department.

Government Publication Date: Jan 16, 2019

Los Angeles County - HMS List:

[LA HMS](#)

List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles.

Government Publication Date: Dec 12, 2018

Los Angeles County - Long Beach UST List:

[UST LONGB](#)

List of registered Underground Storage Tanks (USTs) in the City of Long Beach, Los Angeles County, made available by the Long Beach Certified Unified Program Agency (CUPA). The Long Beach CUPA operates under oversight shared by the Long Beach Fire Department and Health Department.

Government Publication Date: Jul 9, 2018

Los Angeles County - Solid Waste Sites:

[LA SWF](#)

List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.

Government Publication Date: Nov 23, 2018

Orange County - Anaheim City UST Cleanup Cases:

[UST CLEANUP](#)

A list of UST Cleanup Cases in the City of Anaheim in Orange County. As part of its Groundwater Protection Program, the City of Anaheim managed the UST Cleanup Oversight Program from April 1991 to June 2014. This list is published by the City of Anaheim Underground Storage Tank Cleanup Program.

Government Publication Date: May 26, 2015

San Francisco County - Maher Ordinance:

[MAHER SF](#)

List of development projects that are located on sites with known or suspected soil and/or groundwater contamination are subject to the provisions of Health Code Article 22A, which is administered by the San Francisco County Department of Public Health (DPH).

Government Publication Date: Jan 23, 2019

Los Angeles County - City of Los Angeles UST List:

[UST LA CITY](#)

A list of active and inactive underground storage tank facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jan 1, 2019

Los Angeles County - City of Los Angeles AST List:

[AST LA CITY](#)

A list of active and inactive above ground petroleum storage tanks made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jan 1, 2019

Los Angeles County - City of Los Angeles Hazardous Materials Facilities:

[LA CITY HAZMAT](#)

A list of active and inactive hazardous materials facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jan 1, 2019

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Oct 17, 2018

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2017

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: May 23, 2018

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Jul 18, 2018

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2017

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Dec 20, 2018

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 29, 2018

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 29, 2018

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Oct 23, 2018

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Nov 1, 2018

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Jan 30, 2018

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 15, 2019

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 1, 2018

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Sep 14, 2018

State

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Jan 18, 2019

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 18, 2019

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Hazardous Waste and Substances Site List - Site Cleanup:

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Dec 4, 2018

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 2, 2018

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Dec 20, 2018

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jun 19, 2018

Hazardous Waste Manifest Data:

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List:

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Nov 29, 2018

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Nov 30, 2018

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2016

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Dec 31, 2017

Tribal

No Tribal additional environmental record sources available for this State.

County

Los Angeles County - Site Mitigation List:

[LA SML](#)

A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.

Government Publication Date: Jan 9, 2019

Los Angeles County - Santa Monica City Hazardous Materials Facilities:

[SANTAMON HAZ](#)

A list of Hazardous Materials Facilities in the City of Santa Monica, Los Angeles county. This list is made available by Santa Monica Fire Prevention Division which has been designated as the CUPA for the City.

Government Publication Date: Aug 21, 2018

Los Angeles County - Santa Monica City Hazardous Waste Facilities:

[SANTAMON HW](#)

A list of Hazardous Waste Facilities in Los Angeles County, City of Santa Monica. This list is made available by Santa Monica Fire Prevention Division.

Government Publication Date: Aug 21, 2018

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Property Information

Order Number:	20190215102p
Date Completed:	February 16, 2019
Project Number:	136895.19R000-001.135
Project Property:	465,491,503,525 & 577 South Arroyo Parkway 465 Pasadena CA 91105
Coordinates:	
Latitude:	34.137103
Longitude:	-118.14781
UTM Northing:	3777952.80164 Meters
UTM Easting:	394170.162254 Meters
UTM Zone:	UTM Zone 11S
Elevation:	793.55 ft
Slope Direction:	S

Geologic Information.....	7
Soil Information.....	9
Wells and Additional Sources.....	11
Summary.....	12
Detail Report.....	19
Radon Information.....	476
Appendix.....	477
Liability Notice.....	479

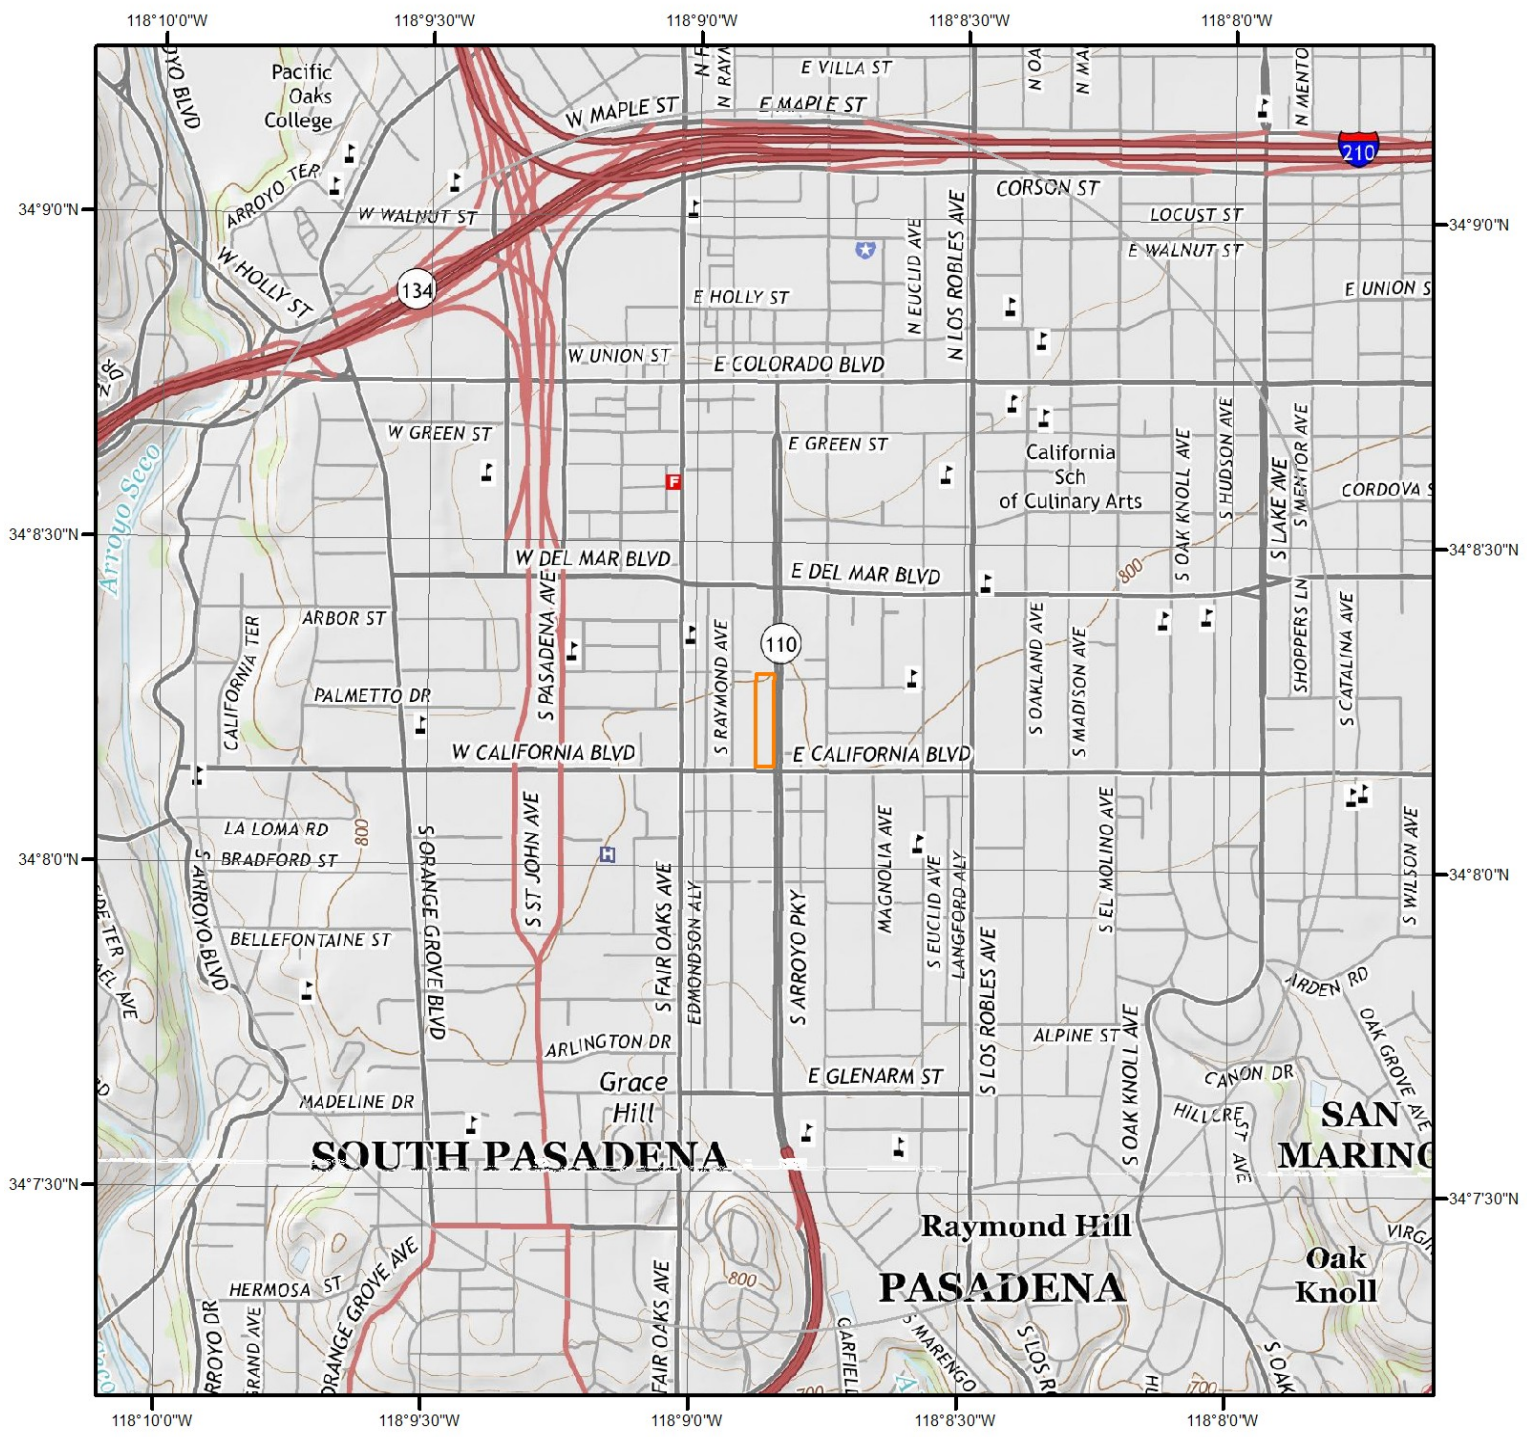

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo

Quadrangle(s): Los Angeles, CA; Pasadena, CA

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 793.55 ft
Slope Direction: S

Hydrologic Information

Wetland

This map shows wetland existence using data from US Fish & Wildlife. Data coverage is shown to the right. Gray indicates no data available in the area.

Flood Hazard Zones

This map shows FEMA flood hazard zones. FIRM panels are shown to the right, and blank indicates no data is available.

 A	 AH	 VE	 OPEN WATER
 A99	 AO	 D	 NOT POPULATED
 AE	 V	 X	 AREA NOT INCLUDED

Hydrologic Information

The Wetland Type map shows wetland existence overlaid on an aerial imagery. The Flood Hazard Zones map shows FEMA flood hazard zones overlaid on an aerial imagery. Relevant FIRM panels and detailed zone information is provided below.

Available FIRM Panels in area: 06037C1375F(effective:2008-09-26)

Flood Zone X-12

Zone: X
Zone subtype: AREA OF MINIMAL FLOOD HAZARD

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *LOS ANGELES* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *LOS ANGELES* County

No Measures/Homes:	69
Geometric Mean:	0.4
Arithmetic Mean:	0.7
Median:	0.5
Standard Deviation:	1
Maximum:	5.6
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Public Water Supply Wells

PWSW

List of community water supply wells in California. This data was made available by California Department of Water Resources, Division of Statewide Integrated Water Management, who indicates that the management of the data in an ongoing project, and some county data is not represented. Location information is provided using the Public Land Survey System (PLSS) and is subject to the accuracy limitations inherent to the PLSS system.

Water Wells

WATER WELLS

A list of water wells maintained by the Department of Water Resources (DWR) Water Data Library.

Well Investigation Program Case List

WIP

The Well Investigation Program (WIP) was developed by the State Water Resources Control Board (SWRCB) to locate, assess and remediate sources of solvent contamination impacting drinking water wells. This list contains WIP cases (active and historical) for the San Gabriel and San Fernando Valley area and was provided by the Los Angeles Regional Water Quality Control Board.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix I: Key Personnel Resumes

Kelly Hoover

Senior Environmental Consultant

Education

BS, Animal Biology, University of Glasgow

Project Experience

Phase I Environmental Site Assessments, Nationwide, Environmental

- Ms. Hoover had been performing, writing and reviewing Phase I Environmental Site Assessments for various types of national and international properties for over 14 years. Ms. Hoover has also been performing various other environmental assessments such as asbestos surveys, mold assessments and indoor air quality assessments for over 16 years.

Portfolio Management, Various, Environmental

- Ms. Hoover has managed over 40 Phase I Environmental Site Assessment portfolios, including large scale portfolios, nursing home properties, industrial facilities, gas stations, hotels, retail properties, self-storage facilities, multi-family residential properties, and department stores. Ms. Hoover has managed portfolios within the United States, Canada and the United Kingdom since joining EMG in 2014.

Gas Station Portfolio, Nationwide, Environmental

- Ms. Hoover managed a Phase I ESA portfolio of 717 retail fueling stations located throughout multiple states. The properties included gasoline filling stations with convenience stores, highway rest stop facilities and auto repair/service stations using a report format specifically developed to meet the Client's Scope of Work. Under Ms. Hoover's leadership, EMG's thorough and timely work facilitated the smooth completion of a multi-million-dollar transaction, completing the work ahead of schedule.

Hotel Portfolio, Nationwide, Environmental

- Ms. Hoover managed a portfolio of over 300 hotel properties throughout the United States. The assessments included observations of the facilities, review of previous assessment reports, review of regulatory records, interviews with property staff and research of municipal records. Ms. Hoover provided technical guidance to the team, report reviews, management of the schedule and deliverable targets, with all reports completed within two months of engagement.

Regional Location

Tampa, FL

Project Experience Cont.

Industrial Development, Deland, Florida, Environmental

- Ms. Hoover performed a Phase I Environmental Site Assessment of a 47.70 acre industrial facility that was constructed in phases between 1971 and 2002. Previous occupants had included an aluminum fence manufacturing company, and a defense related manufacturing facility, which developed ultra-lightweight camouflage nets, chemical and biological warfare alarms and detectors, carbon fiber resin reinforced aircraft components, and equipment/ordnance components.

Marina Property, Key West, Florida, Environmental

- Ms. Hoover performed a Phase I Environmental Site Assessment of a former marina in Key West, Florida as part of the refinance of the property. During review of regulatory files, Ms. Hoover identified that the Project was listed as a Leaking Underground Storage Tank (LUST) site; however, through file review determined that the LUST case had been attributed to the wrong property in error. Ms. Hoover was able to resolve the discrepancy with the regulators, which led to the release being rescinded and the case was closed prior to foreclosure.

Jeanie Schulz

PROJECT MANAGER

Education

BA, Business Administration, Vanguard University, 1989

AS, Environmental Studies, Portland State University, currently enrolled

Project Experience

School District Portfolio; Orange County, CA – As a Project Manager, Ms. Schulz performed assessments of multiple schools covering over 200+/- acres and 80+/- structures. Ms. Schulz performed environmental assessments, environmental audits, various NEPA reports, assessed condition of the building structures and systems and developed thorough reports. Ms. Schulz also developed Phase II recommendations, including scopes of works and work plans related to subsurface investigations. Ms. Schulz' work help complete this project on schedule and within the budget

Hotel Portfolio; Various Cities, CA, OR, WA, ID – Ms. Schulz served as the Project Manager and performed environmental assessments on multiple hotel sites as part of a portfolio. Her observations were critical in assisting the client in their final business decision.

Assisted Living Portfolio; Various Cities, CA, NV, UT, TX, AL – As a Project Manager, Ms. Schulz performed environmental assessments on various assisted living facilities across the United States. Ms. Schulz' involvement in this portfolio was crucial to the decision-making process of the client by providing the necessary information to negotiate the purchase of these properties.

REGIONAL LOCATION

Portland, OR

Project Experience Cont.

Retail/Commercial Strip Center; Whittier, CA – As a Project Manager, Ms. Schulz performed an environmental assessment on a retail/commercial strip center containing both current and former service stations and current and former dry cleaning operations. Ms. Schulz also developed and implemented Phase II recommendations and agency file reviews at the appropriate federal, state and local regulatory agencies. Additionally, Ms. Schulz assisted in the development, review and submittal of a closure request/reports to these agencies.

Multiple Dry Cleaners, Various Cities, CA, AZ, NV – As a Project Manager, Ms. Schulz performed environmental assessments on multiple current and former dry cleaning facilities across several states. Additionally, Ms. Schulz both developed work plans and conducted Phase II subsurface investigations and submitted of closure reports and formal requests to appropriate regulatory agencies.

Multiple Service Stations, Various Cities, CA, AZ, NV – As a Project Manager, Ms. Schulz performed environmental assessments on multiple current and former service station facilities across several states and both developed work plans and conducted Phase II subsurface investigations. Additionally, Ms. Schulz supervised underground storage tank removals and managed the applicable regulatory closure processes including the development and submittal of closure reports and formal requests to appropriate regulatory agencies.
