

Notice of Determination

Appendix D

TO: Office of Land Use and Climate Innovation
 State Clearinghouse
 P.O. Box 3044, Room 113
 Sacramento, CA 95812-3044

FROM: Central Valley Flood Protection Board (Board)
 3310 El Camino Avenue, Suite 170
 Sacramento, CA 95821
 Jordan Robbins, (916) 524-3454
Jordan.Robbins@CVFlood.ca.gov

SUBJECT: Filing of Notice of Determination pursuant to Public Resources Code Section 21108.

State Clearinghouse Number (SCH No.): 2021090183

Project Title: Permit No. 19644 – Storm Drain Zone 36/Zone 39 Improvement Project

Project Applicant: City of Manteca

Lead Agency/Address: City of Manteca, 1215 West Center Street, Suite 201, Manteca, CA 95337

Lead Agency Contact Person: Kevin Jorgensen, (209) 456-8460

Project Location/City/County: The project is located on the right (east) bank of Walthall Slough and on the right (east) bank levee of the San Joaquin River, approximately 0.75 miles downstream of the Interstate 5 overpass across the San Joaquin River, southwest of the City of Manteca in San Joaquin County.

Project Description: Approval of Permit No. 19644, under California Code of Regulations, Title 23, Article 3, Section 6, for work within an adopted plan of flood control: To install two (2) 30-inch diameter welded steel storm drain discharge pipes through the right (east) bank levee of the San Joaquin River. Additional improvements include installing a concrete outfall structure with removable guardrails along the riverbank; and placing 175 linear feet of erosion protection material along the waterside slope and surrounding the outfall structure. A temporary cofferdam will be installed during construction, the area within the cofferdam will be dewatered by pumping into ponds or tanks on the landside of the levee to allow for settling prior to discharging to the river. In addition to the encroachments listed above, a stormwater pumping plant, control building, chain link fence, levee access ramp, 500-foot long 66-inch diameter welded steel pipe (pumping plant intake), and 2,700-foot long 48-inch diameter welded steel pipe (pumping plant discharge) will be constructed parallel to the existing landside seepage berm toe and within the existing flood control easement.

This is to advise that the Board, as the **Responsible Agency**, approved the above-described project on February 28, 2025 and made the following determinations regarding the above-described project:

1. The project [will / will not] have a significant effect on the environment (This determination is limited to effects within the Board’s permitting jurisdiction as a responsible agency).
2. [An Environmental Impact Report (EIR) / A Mitigated Negative Declaration] was prepared by the lead agency for the original project.
3. Additional mitigation measures [were / were not] made a condition of the Board’s approval of the project.
4. A Mitigation Monitoring and Reporting Plan [was / was not] adopted by the Board for this project
5. A Statement of Overriding Considerations [was / was not] adopted by the Board for this project.
6. Findings [were / were not] made by the Board pursuant to the provisions of CEQA.

Responsible Agency Statement: The Mitigated Negative Declaration, prepared by the lead agency for the project, is available to the general public at the lead agency’s office listed above. The Board’s administrative record related to the encroachment permit is available for public review at the Board’s office.
