Notice of Determination, Attachment A

Booster Station 5513W/5514 Improvements and Reservoir 5514-2

Project Description

The proposed Booster Station 5513W/5514 Improvements and Reservoir 5514-2 Construction Project ("proposed project") would construct a new, above-ground steel domestic water tank (referred to as Reservoir 5514-2) on the existing CVWD Reservoir Site 5514. To accommodate placement of Reservoir 5514-2, the existing Booster Station 5514 would be demolished and relocated to existing CVWD Site 5513 (which would then be renamed Booster Station 5513-W). To further support improvements, the existing motor control center located at Site 5513 would be replaced to accommodate both the existing booster station and new booster station 5513-W. In addition, approximately 600-feet of pipeline would be replaced in the roadway to tie the new BS 5513-W into the existing water distribution system that serves the old BS 5514 pressure zone. The proposed project would improve CVWD's domestic water infrastructure at two existing CVWD sites (Site 5513 and Site 5514) to alleviate water storage deficiencies and increase water storage capacity, reliability, and efficiency within the CVWD domestic water distribution system.

Refer to the attached figure for a depiction of the proposed project area. The proposed project is located within a gated, residential community in the city of Rancho Mirage, Riverside County, California. Rancho Mirage is located southwest of the cities of Palm Springs and Cathedral City, and northwest of the city of Palm Desert. California State Route (SR) 111 runs northwest to southeast through Rancho Mirage. Physically, the project site is bounded by the Santa Rosa Mountains to the west, and the Indio Hills and the edge of Joshua Tree National Park to the northeast. The project consists of two CVWD-owned sites (Site 5513 and Site 5514) that total three parcels: APN 690-070-008, APN 690-190-001, and APN 690-190-002.
