**PHASE I
ENVIRONMENTAL SITE ASSESSMENT
6157 LONG BEACH BLVD.
LONG BEACH, CALIFORNIA**

1.0 SUMMARY

Chow Engineering, Inc. (CE) has prepared this Phase I Environmental Site Assessment Report (ESA) in support of a real estate transaction, for the site situated at the above-referenced location.

CE performed this ESA in October 2016 incorporating the standard data gathering techniques common to performance of ESAs nationwide. CE has utilized and employed established techniques and guidance provided by the American Society for Testing & Materials (ASTM) guidance document E1527-13 as the minimum criteria for performance and compilation of this ESA. The assessment and investigatory techniques used for this project included site reconnaissance, a regulatory records search, review of aerial photographs for historical documentation, interviews with stakeholders, and a review of the site topography and geology. At completion of the above tasks and evaluation of the information obtained, the following conditions were determined:

- A review of the database search was conducted according to ASTM E1527-13 standards. Specific results of the regulatory database search are summarized in Section 5.1 of this report. None of the notations were related to the subject site. None of mapped sites were noted in the text as potentially of significant concern with regard to the subject site location.

There are no recognized environmental conditions on the site.

2.0 INTRODUCTION

2.1 Purpose

This Phase I Environmental Site Assessment was performed for the California Water Service Company (CalWater) in acquiring the property (Figure 1, Vicinity Map).

The Site consists of a rectangular lot, approximately 17,000 square foot in area, designed by APN number 7307-008-053. This 0.39 acre of land is surrounded by residential homes to the north across E. Romie Lane, to the west along E. Romie Lane, and to the south facing Katherine Avenue, with unoccupied commercial space directly to the east at 242 E. Romie Lane, as presented on Figure 2, Site Plan.

2.2 Scope of Work

The scope of work for this ESA included the following tasks:

- ◆ Apply the ASTM standards (E1527-13) for the Phase I Environmental Site Assessment.
- ◆ Obtain and review a Radius Map with Geocheck data of the subject property and adjoining properties.
- ◆ Request and perform an evaluation of Historical Aerial Photographs of the subject property.
- ◆ Request and perform an evaluation of Sanborn Maps of the subject property.
- ◆ Review the title history of the subject property.
- ◆ Perform a Site Inspection and review operation documentation, including historic reports and current documents.
- ◆ Perform interviews with the site owner, agencies, and purchaser.
- ◆ Prepare and submit a Phase I Environmental Site Assessment Report signed and certified by an Environmental Professional.

2.3 Significant Assumptions

It has been assumed that the information provided to CE during the course of this ESA was true and accurate at the time it was prepared or presented. This includes information that there has been no previous releases of contaminants to the environment, and there is no history of any spills at the site.

2.4 Limitations and Exceptions

In performing these professional services on site, CE has utilized the degree of care and skill commonly exercised under similar circumstances by members of the environmental profession practicing in the same or similar locality under similar conditions. All activities conducted for this project utilized the concept of appropriate inquiry as governed by the parameters discussed in Section 1.2 of this report. The standard of care shall be judged exclusively as of the time these services are rendered and not according to any later standards, which may evolve.

CE makes no express or implied warranty beyond its conformance to these standards. CE shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld or not fully disclosed to us during preparation of this report or during performance of the assessment, if any. CE believes all information contained in this report is factual, but no guarantees are made on the factual validity of any representations or information provided by others.

Disclosure of the information contained herein is restricted as governed under the provisions of established State and Federal law. CE shall not be responsible for any losses, damage or liability arising from any improper or inappropriate use or disclosure of information contained herein by any persons arising from the interpretation or application of the information contained herein.

A quantitative assessment was not performed of any potential contamination or negative environmental factors reported. No sampling, testing, or investigation of materials, soil and/or groundwater was required as part of the present scope. A title report was not provided by the User for this assessment. The owners were not available during the assessment.

2.5 Special Terms and Conditions

None.

2.6 User Reliance

The user should not rely on the information contained herein without an independent review to verify site conditions and to establish that there have been no changes in use or occupancy since the time of this report.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Site consists of a rectangular shaped lot, approximately 17,000 square foot in area, designed by APN number 7307-008-053. This 0.39 acre of land is surrounded by residential houses to the north and west along W. Barclay St., and commercial usage to the east and south along Long Beach Blvd., as presented on Figure 2, Site Plan.

The property is currently not occupied.

Based on the site visit, the site is undeveloped with no evidence of structures.

3.2 Site and Vicinity General Characteristics

The site is comprised of approximately 0.39 acres (Figure 2). The local topography for the site as described by reference to the US Geological Survey 7.5 Minute Topographical Map for the Long Beach Quadrangle depicts a fairly constant slope trending from east to west.

The site lies at an approximate elevation of 51 feet MSL. Projection and interpretation of surface contours and features from the topographic map would appear to show a slight hydraulic gradient to the west. The actual subsurface gradient which exists beneath the site may vary considerably from this projection and cannot be definitively confirmed without a complete subsurface investigation which was beyond the scope of this report.

The site does not lie within the primary Alquist-Priolo Special Studies Zone area associated with the Newport-Inglewood Fault Zone which is situated approximately 1 mile to the south.

3.3 Current Use of the Property

The current use of the Site is as vacant land.

3.4 Descriptions of Structures, Roads, Other Improvements on the Site

The site is vacant, with gravel and low grass.

3.5 Current Uses of the Adjoining Properties

At the time of the site visit, the subject site was surrounded by commercial/retail use to the north, east and south along Long Beach Blvd. and residential use to the north/northwest along W. Barclay Street.

4.0 USER PROVIDED INFORMATION

4.1 Title Records

A title report was not provided by the user.

4.2 Environmental Liens or Activity and Use Limitations

Based on the information provided and user knowledge, there are no known environmental liens or activity and use limitations on the site.

4.3 Specialized Knowledge

The user reported no specialized knowledge of the site including:

- No pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on or from the property
- No pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property,
- No notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.4 Commonly Known or Reasonably Ascertainable Information

None provided.

4.5 Valuation Reduction for Environmental Issues

The user reported no knowledge that the purchase price of the property is significantly less than the purchase price of comparable properties, which have no environmental issues.

4.6 Owner, Property Manager, and Occupant Information

Owner

Not provided by the user.

Occupant

None

4.7 Reason for Performing Phase I

CalWater has contracted with CE to perform this Phase I ESA as part of their due diligence in identifying potential environmental conditions that exist at the site in conjunction with a real estate transaction.

4.8 Other

None.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Public documents and databases were examined to establish the environmental risk from the listed active and inactive hazardous materials sites and waste sites in the vicinity. Some sites may appear in multiple databases due to the various activities at each site. Attached in Appendix B to this report is the complete listing of sites within a 1-mile radius of the subject location. A summary of the most significant findings is described below:

ARCHIVED RCRA TSDF: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists Resource Conservation and Recovery Act (RCRA) hazardous waste transportation, storage, disposal and treatment facilities.

CERCLIS NFRAP: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database Comprehensive Environmental Response Compensation and Liability Act (CERLIS) No Further Remedial Action Planned sites that have been removed and archived.

SEMS_8R) ARCHIVED SITES: **1 Site** was identified within approximately 1 mile radius of the subject site. This database lists archived sites from Superfund Enterprise Management System (SEMS) which have been determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

CORRACTS: **2 Sites** were identified within approximately 1 mile radius of the subject site. This database lists facilities where RCRA Corrective Action Program has been used to investigate and remediate hazardous releases.

RCRA_LQG: **2 Sites** were identified within approximately 0.25 mile radius of the subject site. This database lists RCRA licensed large quantity generators.

RCRA_SQG: **2 Sites** were identified within approximately 0.25 mile radius of the subject site. This database lists RCRA licensed small quantity generators.

- AST - CA: **1 Site** was identified within approximately 0.25 mile radius of the subject site. This database lists tank facilities that are subject to the California Aboveground Petroleum Storage Act.
- FID UST - CA: **2 Sites** were identified within approximately 0.25 mile radius of the subject site. This State Water Resources Control Board (SWRCB) Facility Inventory Database lists underground storage tank locations.
- HIST UST - CA: **4 Sites** were identified within approximately 0.25 mile radius of the subject site. This database lists historical underground storage tanks (UST)
- UST - CA: **2 Sites** were identified within approximately 0.25 mile radius of the subject site. This database lists active underground storage tank facilities.
- UST_CITY OF LONG BEACH: **1 Site** was identified within approximately 0.25 mile radius of the subject site. This database lists City of Long Beach underground storage tank sites.
- LUST REG 4 - CA: **4 Sites** were identified within approximately 0.5 mile radius of the subject site. This database lists leaking USTs in Region 4: Los Angeles, Ventura counties (small parts of Kern and Santa Barbara counties).
- SLIC REG 4 - CA: **2 Sites** were identified within approximately 0.5 mile radius of the subject site. This database lists GeoTracker Site Cleanup Program (formerly known as SLIC) sites in Region 4: Los Angeles, Ventura counties (small parts of Kern and Santa Barbara counties).
- VCP - CA: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists Voluntary Cleanup Program remediation sites.
- CORRECTIVE ACTIONS 2020: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists facilities expected to need corrective action.
- SWRCY – CA: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists facilities that perform recycled materials processing activities.

CASE LIST_SAN DIEGO COUNTY: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists San Diego county hazardous chemical releases.

ENVIROSTOR: **22 Sites** were identified within approximately 1 mile radius of the subject site. This database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restriction have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

COAL GAS: **1 Site** was identified within approximately 1 mile radius of the subject site. This database describes manufactured gas plant locations.

DIGITAL OBSTACLE: **2 Sites** were identified within approximately 1 mile radius of the subject site. This database lists known obstacles of interest o aviation users in the U.S. with limited coverage of the Pacific, Caribbean, Canada, and Mexico.

BOND EXPENDITURE PLAN - CA: **22 Sites** were identified within approximately 1 mile radius of the subject site. This database lists orphan sites from the Hazardous Substance Cleanup Bond Act of 1984, Article 7.5 of the Health and Safety Code 25385.

HAZNET: **33 Sites** were identified within approximately 0.25 mile radius of the subject site. This database lists hazardous waste manifests from when hazardous waste is transported from generators to permitted recycling, treatment, storage, or disposal facilities by registered hazardous waste transporters.

HIST CORTESE: **1 Site** was identified within approximately 0.5 mile radius of the subject site. This database lists the location of hazardous material release sites.

HWP: **2 Sites** were identified within approximately 1 mile radius of the subject site. This database lists the Department of Toxic Substances Control (DTSC) hazardous waste transporters and corrective action.

NFA: **2 Sites** were identified within approximately 0.5 mile radius of the subject site. This database lists no further action cleanup sites.

None of the listed sites was the subject site.

The sites listed in the database search included the Betz Laboratory at 3154 Harcourt Street, Compton, CA. It was listed under the Archived RCRA TSDF, Bond Expenditure Plan, Envirostor, CORRACTS, Corrective Action_2020, RCRA LQG and RCRA SQG databases. The site was used as a hazardous waste storage container and storage tank facility in the 1980s and 1990s. The site was closed in 1995. Following closure of the facility, no further action was required at the site. This site is approximately a ¼ mile to the west of the subject site and is not likely to have impacted the subject site.

Also listed was the Subway site at 6145 Long Beach Blvd. which is adjacent to the subject site to the south. This site is listed under the AST-CA database as having an aboveground tank. The site does not appear to be listed in other databases or have reported environmental issues.

There is a fueling station at 6204 Long Beach Blvd. that is listed under the HIST UST-CA, FID UST, and UST-CA sites under Long Beach Texaco, Speed Fuel, Target Service Station, and OK Fuel. The site is undergoing remediation for petroleum hydrocarbons and related Volatile Organic Compounds (VOCs) in the subsurface. This site is approximately 250 feet north and is likely upgradient of the subject site. Recent groundwater well monitoring data reported that the highest concentrations of contaminants in the groundwater were concentrated on the service station site with lower contour lines reaching the middle of Long Beach Blvd. in front of the site. Since the site is actively undergoing monitoring and remediation, and the plumes of gasoline, benzene and MTBE are reportedly stable or decreasing over the last 9 years, it is not likely that this site will have a negative impact on the subject site.

The Luxavia Station site at 6020 Long Beach Blvd., was listed under the LUST Reg. 4 database. This site is approximately 1/8 mile to the southeast of the subject site. The Luxavia site was investigated for diesel and gasoline contamination and underwent remediation. It was closed in March 2016. This site is likely downgradient of the subject site.

The Robert Shaw / Invensys Climate Controls site at 100 W. Victoria Street is listed on the SLIC REG 4 – CA, Envirostor, VCP, RCRA-LQG, and other databases. This site is approximately 1/8 mile south of the subject site on the south side of Victoria Street. The

site was used for manufacturing, assembly, storage, machining, parts cleaning, testing, and engineering/administration in Building 1; die casting, forging, plating, and waste water treatment in Building 2; and storage and maintenance in Buildings 3 and 4, respectively. The site was subdivided and currently the northwestern portion is the Colin Powell Elementary School. Site investigation and remediation activities were conducted at this site due to subsurface impact from petroleum hydrocarbon and VOCs. This site is currently active and under Regional Water Quality Control Board oversight.

The Arco AM/PM station at 6001 Long Beach Blvd., is approximately 1/8 mile south-southeast of the subject site. It is listed in the HAZNET and UST_City of Long Beach databases. The site has three underground storage tanks and does not appear to be undergoing investigation or remedial action. This site is likely downgradient of the subject site.

Several companies along West Victoria Street south/southwest of the subject site are in the HAZNET database as using various quantities of chemicals but do not appear to have investigation or remedial activities associated with them. For instance, there are oxygenated solvents used and disposed of (e.g., acetone and butanol) at Advanced Semiconductor Products (143 W. Victoria St.), halogenated organic compounds at World Trade Printing Center Inc. (151 W. Victoria St.), and CalWater has corrosive waste generated at 169 W. Victoria St.

Due to inadequate address information, twenty-two (22) sites were not mapped in the database search and are listed as Orphan sites. Therefore, the distance and direction from the subject site could not be evaluated in every case for this report.

5.2 Additional Environmental Record Sources

There were no Sanborn Insurance map coverage of the subject site.

According to the City Directory historical listings, the subject site did not have an address listing in 1926 or 1930. It did have a residence listing between 1907 and 2015.

Between 1955 and 1975, the nearby site at 6158 Long Beach Blvd. was listed in the City Directory search as the French Mode Dry Cleaner or Brown Derby Dry Cleaner. In the 1980 directory, there was no address listed. By 1985, the 6158 Long Beach Blvd. address was listed as the Good Samaritan Church. The regulatory database search did not list 6158 Long Beach Blvd., however, if dry cleaning operations were performed on the premises, it would have involved use of VOCs.

5.3 Physical Setting Source(s)

Based on U.S. Geological Survey (USGS) topographic maps and 7.5 min Digital Elevation Model, the Site's elevation is approximately 51 feet above mean sea level. Topography of the Site and adjoining vicinity generally slopes to the west. The near surface soils consist of loamy sand. Based on the results of our review of local, state, and Federal databases, there were eighteen (18) recorded wells within a 1/2- to 1-mile radius of the Site.

Details of topographic and ground water information are presented in Appendix D, Aerial Photographs and Maps and Appendix E, regulatory agency Database Report.

5.4 Historical Use Information on the Property

Historic aerial photographs were examined to help establish the environmental risk from potential hazardous materials and waste sites that existed in the vicinity of the target property during facility operations. CE reviewed aerial photographs taken in 1960 and periodically through 2014.

In the 1963 aerial photograph, the subject site appears to be undeveloped.

In the 1968 aerial photograph, there appears to be a structure, likely a residence, in the center of the site with another structure toward the southwest at the back of the site. There is a driveway leading to the first structure with the remainder of the site appears to be grass and landscaping.

In the 1972 aerial photograph, the subject site remains undeveloped.

In the 1987 aerial photograph, there do not appear to be any structures on the subject site.

In the 1994 aerial photograph

In the 2005 aerial photograph, the site has no structures and no landscaping. There appear to be no significant changes in the use of the site in the 2010 and 2014 aerial photographs.

5.5 Historical Use Information on Adjoining Properties and Surrounding Areas

In the 1963 aerial photograph, the residences along W. Barclay Street have been developed north/northwest of the subject site. The commercial spaces across Long Beach Blvd. to the east are developed. The adjacent space south of W. Barclay to W. Victoria is undeveloped between Long Beach Blvd. and S. Susana Road. The residential development to the north/northwest and east have been built. There are still open and agricultural areas to the west and southwest.

In the 1972 aerial photograph, the adjoining properties to the north/northwest and east remain developed. The retail sites to the south along Long Beach Blvd. have started to be developed. The large industrial buildings on the west side of Susana Road have been built.

In the 1987 aerial photograph, the adjoining properties appear to have been built with commercial buildings along E. Victoria Street having been built. The surrounding areas have been developed.

In the 1994 aerial photograph, there does not appear to be any change in the adjoining properties. The Robert Shaw site south of Victoria Street has been modified with fewer buildings present.

In the 2002 aerial photograph, there does not appear to be any change in the adjoining properties. The Colin E. Power Elementary School has been built at the north end of the former Robert Shaw campus. The 2005 aerial photograph does not appear to have significant changes with the exception that the adjoining retail building to the south has been developed.

There does not appear to be any significant changes in the adjoining and surround area property uses in the 2010 or 2014 aerial photographs.

5.6 Other

A Tier 1 screen for vapor encroachment was conducted using state and federal database records to identify sites with the potential to affect subsurface vapor conditions. Vapor Encroachment Concerns were identified within the radius search for a Tier 1 screen but review of existing soil gas data and regulatory databases indicate a low risk for vapor encroachment at the subject site due to active soil vapor extraction and other remediation and monitoring.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

CE performed a visual site inspection on October 4, 2016. The purpose of this site inspection was to conduct a site visit and evaluate the physical characteristics of the property, as well as to verify the contents of the regulatory database search in the area.

6.2 General Site Setting

The subject site is a rectangular shaped plot that is undeveloped along Long Beach Blvd. It is surrounded by residential homes to the north/northwest along W. Barclay and commercial/retail space on the east, south, and southwest.

6.3 Exterior Observations

The site inspection was performed on October 4, 2016 at 1 PM, on a clear day. A visual inspection of the site found that the site had no structures. There is dry grass over most of the site with a palm tree and short weeds. There is a 5-foot concrete wall to the north along the boundary with Jaime's Auto Repair, a chainlink fence along the northwest boundary with the residential houses along W. Barclay, a 6-inch concrete curb along the boundary to the south (Subway), and a 6-foot wooden wall covered in ivy and other vegetation to the west.

There were no driveways. There was no significant debris observed on the site besides some wooden boards and concrete blocks. Two darker spots of stained grass were observed toward the north/northwest side of the site. They did not appear to be extensive or have pooled liquid. During a visual inspection no evidence of leaks, spills or other contamination was noted. No pools of liquid, wells, stressed vegetation, or other indicators of potential environmental impact were noted.

6.4 Interior Observations

There are no structures on the subject site.

7.0 INTERVIEWS

7.1 Interview with Owner / Site Manager / Occupant

Contact with the current owners was not made available. There are no occupants at the site.

7.2 Interview with User

CalWater personnel knew of no environmental cleanup liens, Activity & Use Limitations (AULs), specialized knowledge, or other indication of environmental contamination at the site. The User reported that there are land use restrictions, mostly related to utility easements and structural height restrictions.

7.3 Interview with Local Government Officials

There were no records related to underground storage tanks, hazardous material storage, or other environmental issues for the subject site.

8.0 FINDINGS

This section summarizes the known or suspect environmental conditions associated with the property, which may include recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, and de minimis conditions, among other environmental conditions.

- Based on the regulatory database search, city directory listings and historic aerial photographs, it does not appear that the site has been developed.
- It appears that there is the historic presence of a dry cleaners in the mid-1950s through the mid-1970s across Long Beach Blvd. at 6158 Long Beach Blvd. The 6158 Long Beach Blvd. site is currently a church. If dry cleaning operations were conducted at the facility, there is the potential risk that the volatile organic compounds typically used in dry cleaning may have impacted the subsurface. This site is approximately 100 feet east of the subject site. The risk is low that soil vapor under the subject site would be impacted by this historic use. Groundwater flow in the area is likely to the south/southwest and the risk is again low that the subject site would have been impacted if there was historic dry cleaning operations on site at 6158 Long Beach Blvd.

9.0 OPINION

The information collected during the course of this assessment indicates that the site has been vacant and undeveloped for at least 50 years. No evidence of USTs or regulated material was found onsite. Adjoining parcels have been single family residential units or commercial/retail usage and have not changed use in recent decades. No evidence was observed during the subject site inspection of the presence of petroleum products, hazardous waste or chemical products on the subject site.

The subject site is not listed in the database searches. The surrounding sites listed in the database searches are either closed, currently under investigation, remediation, or other agency order or do not pose a significant risk as they are a significant distance from the site or down-gradient or cross-gradient to the site.

No evidence of current or historic conditions, releases, or activities were observed or evaluated that would indicate a negative environmental impact on the site.

10.0 CONCLUSIONS

This Phase I Environmental Site Assessment has been performed in conformance with the scope and limitations of ASTM Practice E 1527-13 of the site encompassing APN 7307-008-053. Any

exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental condition in connection with the property.

11.0 DEVIATIONS

None.

City Directory Report

2016

Envirosite's City Directory report is a screening tool designed to assist in evaluating a subject property and possible adjacent properties resulting from past activities. It includes a search and abstract of available city directories and cross reference directories at five year intervals or the closest available intervals. Public map sources are reviewed to determine possible adjoining properties to the front, back, left and right of the property.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

<u>YEAR:</u>	<u>SOURCE:</u>

THIS REPORT IS PROVIDED BY ENVIROSITE CORPORATION ("COMPANY") TO PURCHASER AND PURCHASER ACCEPTS THIS REPORT, STRICTLY ON AN "AS IS" BASIS. ALL CONDITIONS, REPRESENTATIONS AND WARRANTIES, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF ACCURACY OR CORRECTNESS OF INFORMATION CONTAINED HEREIN, MERCHANTABILITY, FITNESS FOR A PARTICULAR USE OR PURPOSE, OR NON-INFRINGEMENT OF THIRD PARTY RIGHTS, ARE HEREBY DISCLAIMED TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW BY THE COMPANY AND ITS LICENSORS. IN NO EVENT SHALL THE COMPANY BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING FROM USE OF OR RELIANCE ON THIS REPORT. ANY LIABILITY ON THE PART OF THE COMPANY IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.

This Report may contain certain information obtained from a variety of public and other sources reasonably available to the Company. Company does not claim nor represent that coverage information for the subject and surrounding properties does not exist from other sources. Furthermore, any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Information contained in this Report should not be construed as legal advice and accordingly, the Company disclaims any liability whatsoever for any loss arising from or in reliance in whole or in part on the contents of the Report. This Report or any map, analyses and other information contained herein is protected by copyright and is provided to Purchaser for its internal use only. Any copying, reproduction or dissemination or other use, in whole or in part, without prior written permission from the Company is prohibited by law. All trademarks and logos used herein are proprietary to Envirosite Corporation and their respective owners and licensors.

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIM), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjacent properties.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2016 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

Disclaimer - Copyright and Trademark Notice

THIS REPORT IS PROVIDED BY ENVIROSITE CORPORATION ("COMPANY") TO PURCHASER AND PURCHASER ACCEPTS THIS REPORT, STRICTLY ON AN "AS IS" BASIS. ALL CONDITIONS, REPRESENTATIONS AND WARRANTIES, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF ACCURACY OR CORRECTNESS OF INFORMATION CONTAINED HEREIN, MERCHANTABILITY, FITNESS FOR A PARTICULAR USE OR PURPOSE, OR NON-INFRINGEMENT OF THIRD PARTY RIGHTS, ARE HEREBY DISCLAIMED TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW BY THE COMPANY AND ITS LICENSORS. IN NO EVENT SHALL THE COMPANY BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES ARISING FROM USE OF OR RELIANCE ON THIS REPORT. ANY LIABILITY ON THE PART OF THE COMPANY IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.

This Report may contain certain information obtained from a variety of public and other sources reasonably available to the Company. Company does not claim nor represent that coverage information for the subject and surrounding properties does not exist from other sources. Furthermore, any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Information contained in this Report should not be construed as legal advice and accordingly, the Company disclaims any liability whatsoever for any loss arising from or in reliance in whole or in part on the contents of the Report. This Report or any map, analyses and other information contained herein is protected by copyright and is provided to Purchaser for its internal use only. Any copying, reproduction or dissemination or other use, in whole or in part, without prior written permission from the Company is prohibited by law. All trademarks and logos used herein are proprietary to Envirosite Corporation and their respective owners and licensors.

A search of available environmental records was conducted by Envirosite Corporation. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for all Appropriate inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed from the evaluation of environmental risks associated with a parcel of real estate. Executive Summary does not include a summary of report findings related to the selected Map Layers, this information is contained in the Map Findings section as well as being displayed on appropriate maps.

SURROUNDING SITES: SEARCH RESULTS:

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative equal to or higher than the subject property have been differentiated below from sites with an elevation lower than the subject property.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

AREA MAP

SUBJECT NAME: CalWater

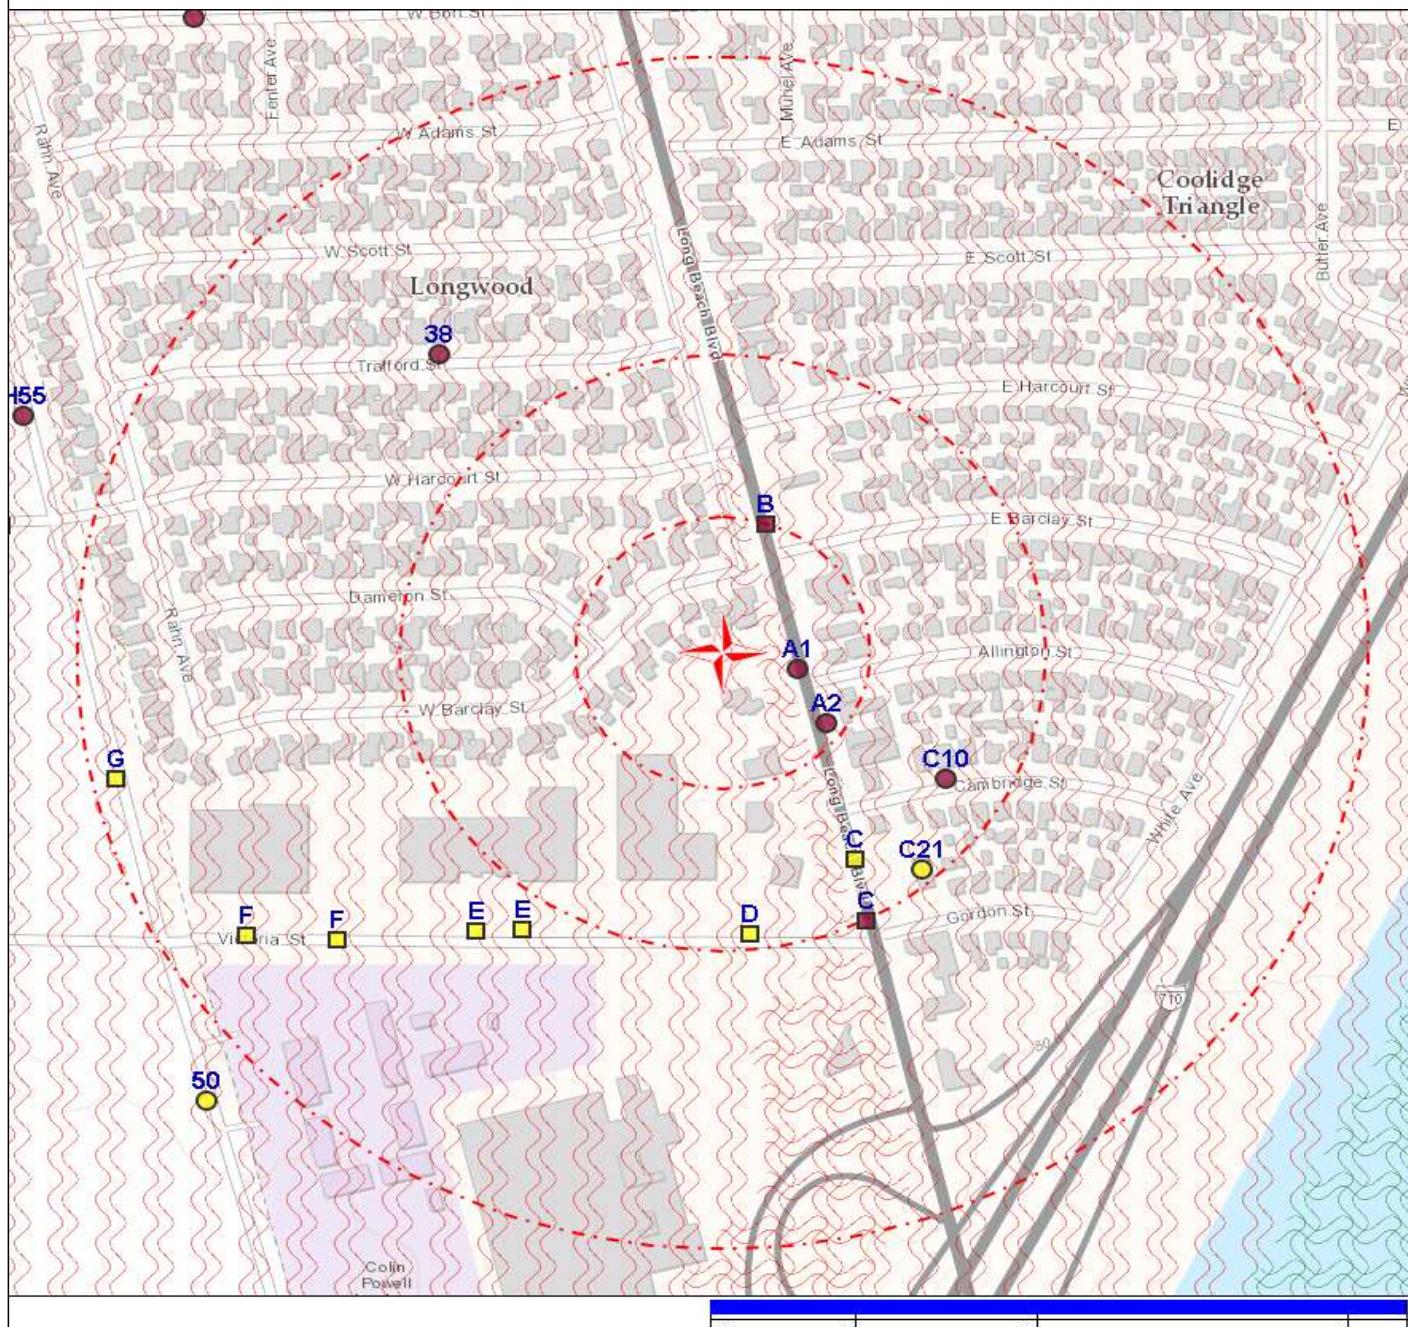

ADDRESS: 6157 Long Beach Boulevard, Long Beach, CA 90805

LAT/LONG: 33.866598 / -118.200947

PREPARED FOR: Chow Engineering

ORDER #: 7555

REPORT DATE: September 30, 2016

Subject Property

Fire Hazard Zone (No Data)

Seismic (No Data)

DFIRM Floodzone 500

Equal/Higher Elevation

National Priority List (No Data)

Indian Reservation (No Data)

DFIRM Floodzone 100

Lower Elevation

Federal Lands (No Data)

CDC HAZDAT (No Data)

FEMA FloodZone 100

FEMA FloodZone 500

Department of Defense (No Data)

Map Findings Summary does not include summary of Map Layers Data.

---------------	--------------

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Waste Generator Summary 1995

Generator EPA ID :	CAC000935944
Generator County :	Los Angeles
TSDF EPA ID :	CAD089446710
TSDF Disposal County :	Los Angeles
State Waste :	Unspecified oil-containing waste
Disposal Method :	Transfer station
Tons :	16.68

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California

Handler Activities Summary :

U.S. importer of hazardous waste :	No
Mixed waste (haz. and radioactive) :	No
Recycler of hazardous waste :	No
Transporter of hazardous waste :	No
Treater storer or disposer of HW :	No
Underground injection activity :	No
On-site burner exemption :	No
Furnace exemption :	No
Used oil fuel burner :	No
Used oil processor :	No
Used oil refiner :	No
Used oil fuel marketer to burner :	No
Used oil Specification marketer :	No
Used oil transfer facility :	No
Used oil transporter :	No

Facility has No violations / inspections reported.

---------------	--------------

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Status Date : 12/22/2014
Status : Open - Remediation
Begin Date : 09/01/1996
Global ID : SL184501433

Site History :

Robertshaw developed the Site into three manufacturing buildings and one smaller building that spanned approximately 300,000 square feet, between 1954 and 1970. Buildings 1 and 2 were constructed between 1954 and 1956. Building 1 was used for manufacturing, assembly, storage, machining, parts cleaning, testing, and engineering/administration. Historical operations in former Building 2 included die casting, forging, plating, and waste water treatment. Buildings 3 and 4 were constructed in 1968 and 1970, respectively, and used for storage and maintenance. Currently, only Building 1 remains, and is vacant. Site investigations began in 1991. Phased site investigations and remediation activities have continued at the Site to the present time, to assess and remediate chemical impacts to soils and groundwater from past manufacturing operations.

Waste code : D001
Waste name : IGNITABLE WASTE

Waste code : D002
Waste name : CORROSIVE WASTE

Waste code : D009
Waste name : MERCURY

Waste code : F001

Waste name :

THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:
TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE,
1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL
SPENT SOLVENT MIXTURES/BLENDs USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL
OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED
SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS
FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Completed Date : 04/11/2016
Area Name : OU2 Soil Gas and Groundwater
Sub Area Name : N/R
Document Type : Technical Report

Comments :

DTSC forwarded comments on the Semiannual Groundwater Monitoring Report and request a response prior to the next semi-annual monitoring event. Based on review of data, DTSC reiterated its comment from April 6, 2015 and recommended submittal of a workplan to install permanent soil vapor probes around the school buildings near MW-32 and MW-28/MW-29, collect and analyze soil vapor samples for potential contaminants of concern, and model potential vapor intrusion and evaluate risk and hazard using updated toxicity criteria for TCE.

Completed Date : 03/30/2016
Area Name : PROJECT WIDE

Sub Area Name :	N/R
Document Type :	Annual Oversight Cost Estimate
Comments :	DTSC provided an updated list of activities that included review of additional documents for fiscal year 2015/2016.
Completed Date :	12/10/2015
Area Name :	OU2 Soil Gas and Groundwater
Sub Area Name :	N/R
Document Type :	Technical Report
Comments :	Document was forwarded to DTSC for information. The document is for the adjacent Former Robertshaw Controls Facility.
Completed Date :	10/30/2015
Area Name :	OU2 Soil Gas and Groundwater
Sub Area Name :	N/R
Document Type :	Technical Report
Comments :	Final document submitted. Reviewed document to monitor potential impact of soil vapor and groundwater concentrations originating from the adjacent Former Robertshaw Facility, currently under the oversight of the Los Angeles Regional Water Quality Control Board.
Completed Date :	07/09/2015
Area Name :	OU2 Soil Gas and Groundwater
Sub Area Name :	N/R
Document Type :	Technical Workplan
Comments :	DTSC concurred with installation of monitoring well MW-29 on Colin Powell Academy in an email dated July 6, 2015. The final version of the document, dated July 9, 2015, was a formal submittal to the RWQCB following DTSC concurrence.

Comments :	N/R

Completed Date :	04/06/2015
Area Name :	OU2 Soil Gas and Groundwater
Sub Area Name :	N/R
Document Type :	Technical Report

Comments :

Elevated concentrations of TCE were detected in groundwater samples collected from wells MW-28 (300 µg/L), MW-32 (910 µg/L), MW-20 (220 µg/L), and VES-29 (210 µg/L). An elevated concentration of TCE was also detected in a soil vapor sample collected from the deeper probe (approximately 15 feet below ground surface) at SG-85D (17 µg/L). However, the concentration of TCE at the corresponding shallow probe (approximately 5 feet below ground surface) was relatively low (1.4 µg/L). The geology in this area includes discontinuous layers of silty clay and clay. DTSC recommends obtaining additional information on geology and concentrations (soil vapor and groundwater) of volatile organic compounds, including TCE, in the following areas: (1) between MW-32 and the school buildings to the west and (2) between MW-28 and the school buildings to the north. This resulting information should be used to model potential vapor intrusion and evaluate risk and hazard using California Environmental Protection Agency's SchoolScreen software with updated toxicity criteria for TCE. DTSC requests a response to these comments from AECOM (formerly URS) prior to the next semi-annual groundwater and soil vapor monitoring event in June 2015.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

APN :	7306-012-005, 7306-012-009, 7306012005, 7306012009
National Priorities List :	NO
Regulatory Agencies Involved :	DTSC - Site Cleanup Program
Lead Agency :	DTSC - Site Cleanup Program
Project Manager :	Moises Carvalho
Supervisor :	Philip Chandler
Division Branch :	Cleanup Chatsworth
Envirostor ID :	60000354
Site Code :	401301
Assembly :	64
Senate :	35
Congressional District :	44
Special Program :	Voluntary Cleanup Program
Status :	Active
Past Uses :	MANUFACTURING - INDUSTRIAL MACHINERY, TRANSFORMER REPAIR
Potential COC :	Benzene; Polychlorinated biphenyls (PCBs); Tetrachloroethylene (PCE); TPH-diesel; Trichloroethylene (TCE)

Map Id: I66
Direction: W
Distance: 0.685 mi.
Actual: 3617.696 ft.
Elevation: 0.01 mi. / 52.001 ft.
Relative: Higher

Site Name: FORMER WESTINGHOUSE FACILITY

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Comments : N/R

Completed Date : 05/09/1995
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Site Screening
Comments : Site referred to RWQCB, NFA for DTSC.

Completed Date : 08/21/1990
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Site Screening

Comments :

A copy of a letter to LA County DHS (now Fire Dept) was received. Counsel to Axel Johnson, RP, informs LA County that GW monitoring will be done. A site sampling report prepared by Metcalf & Eddy was submitted. One sample detected 8800 ppb of DCE (above RWQCB level of 1600ppb) in the sw area of the site. TPH @ 15 ft was 103,400 ppm at the same location. No metals were detected above STLC by WET. Staff recommends referral to RWQCB.

Completed Date : 12/02/1987
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Site Screening
Comments : Site Screening Done: History of violations; no records of post cleanup sampling.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

FRS

Registry ID : 110013848701

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

---------------	--------------

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Government Records Searched / Data Currency Tracking

2016

To maintain currency of the following federal and state databases, Envirosite Corporation contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

STANDARD ENVIRONMENTAL RECORDS:

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Date of Government Version: 08/22/2016
Date Release Frequency: Varies
Next Scheduled Contact: 10/31/2016

Source: U.S. Environmental Protection Agency
Telephone: 215-814-2469
Last Contact: 08/22/2016

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Date of Government Version: 08/22/2016
Date Release Frequency: Quarterly
Next Scheduled Contact: 10/31/2016

Source: U.S. Environmental Protection Agency
Telephone: 215-814-2469
Last Contact: 08/22/2016

FEDERAL CERCLIS LIST

CERCLIS: Comprehensive Environmental Response Compensation and Liability Act program sites reported to the Environmental Protection Agency and can be proposed for the NPL List

Date of Government Version: 06/29/2016
Date Release Frequency: Quarterly
Next Scheduled Contact: 11/16/2016

Source: U.S. Environmental Protection Agency
Telephone: 800-424-9346
Last Contact: 09/07/2016

CERCLIS NFRAP: Comprehensive Environmental Response Compensation and Liability Act No Further Remedial Action Planned sites that have been removed and archived

Date of Government Version: 06/29/2016
Date Release Frequency: Quarterly
Next Scheduled Contact: 11/16/2016

Source: U.S. Environmental Protection Agency
Telephone: 800-424-9346
Last Contact: 09/07/2016

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Date of Government Version: 12/25/2015
Date Release Frequency: Varies
Next Scheduled Contact: 12/12/2016

Source: U.S. Environmental Protection Agency
Telephone: 703-603-8712
Last Contact: 09/15/2016

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Date of Government Version: 09/13/2016
Date Release Frequency: Quarterly
Next Scheduled Contact: 11/22/2016

Source: U.S. Environmental Protection Agency
Telephone: 703-603-8867
Last Contact: 09/13/2016

Government Records Searched / Data Currency Tracking

2016

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Date of Government Version: 09/13/2016

Source: U.S. Environmental Protection Agency

Date Release Frequency: Quarterly

Telephone: 703-603-8867

Next Scheduled Contact: 11/22/2016

Last Contact: 09/13/2016

Federal RCRA CORRACTS facilities list

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Date of Government Version: 08/22/2016

Source: U.S. Environmental Protection Agency

Date Release Frequency: Quarterly

Telephone: 202-566-1667

Next Scheduled Contact: 10/31/2016

Last Contact: 08/22/2016

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Date of Government Version: 09/13/2016

Source: U.S. Environmental Protection Agency

Date Release Frequency: Quarterly

Telephone: 703-603-8867

Next Scheduled Contact: 11/22/2016

Last Contact: 09/13/2016

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Date of Government Version: 09/13/2016

Source: U.S. Environmental Protection Agency

Date Release Frequency: Quarterly

Telephone: 703-603-8867

Next Scheduled Contact: 11/22/2016

SUBJECT PROPERTY ADDRESS:

CalWater
6157 Long Beach Boulevard
Long Beach, CA 90805

SUBJECT PROPERTY COORDINATES:

Latitude(North):	33.866598 - 33° 51' 59.8"
Longitude(West):	-118.200947 - -118° 12' 3.4"
Universal Transverse Mercator:	Zone 11N
UTM X (Meters):	388918.98
UTM Y (Meters):	3748013.61
Elevation:	51.001 ft. above sea level

USGS TOPOGRAPHIC MAP:

Subject Property Map: 33118g2 LONG BEACH, CA
Most Recent Revision: 2012

Geological Landscape Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION:

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

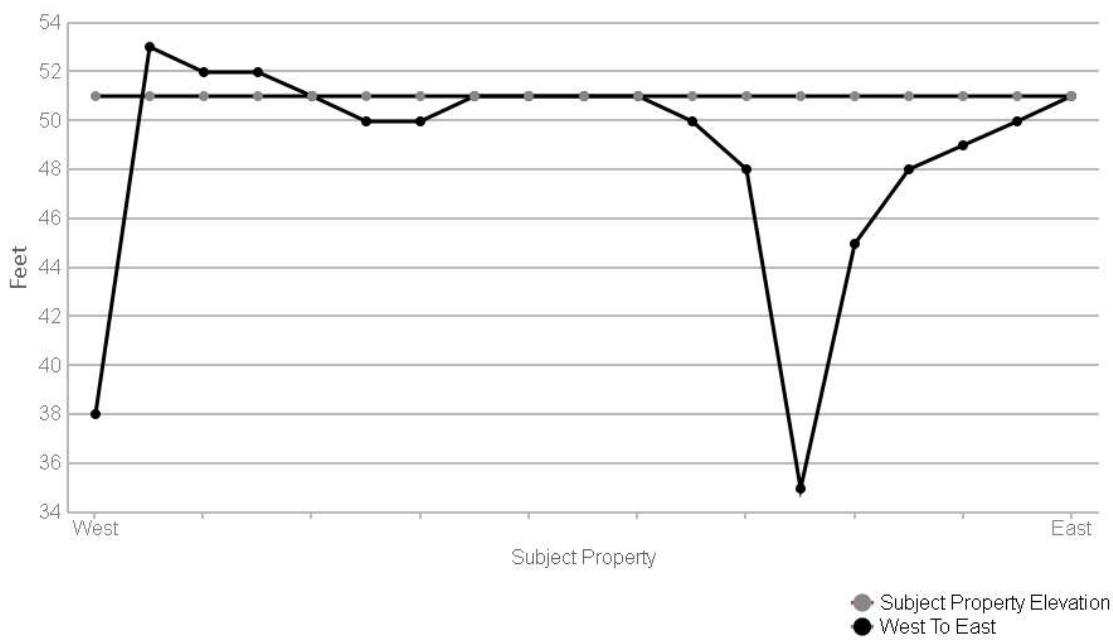

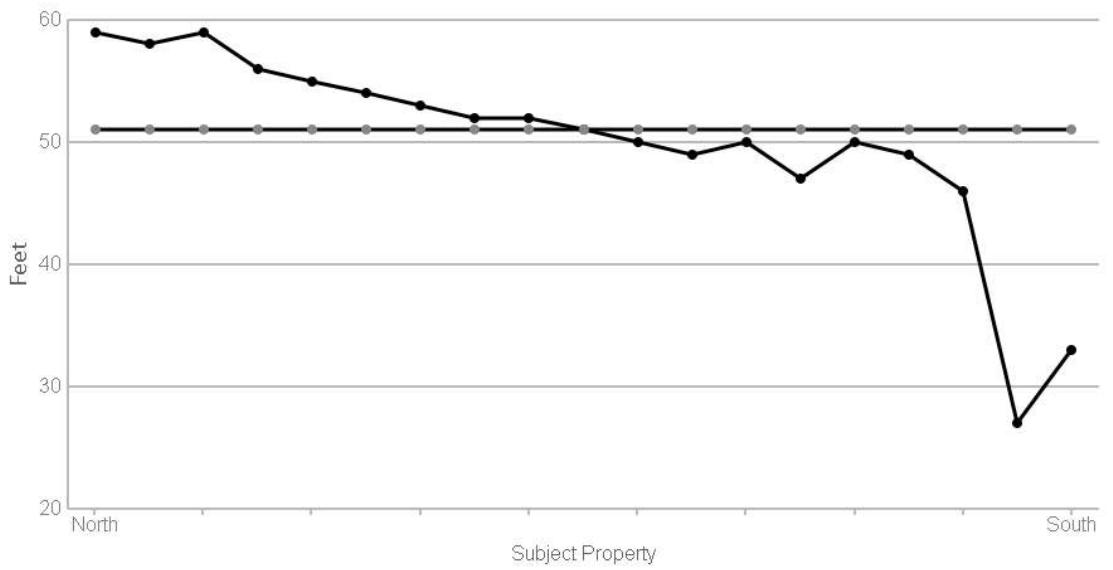

TOPOGRAPHIC INFORMATION:

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the subject property, what downgradient sites might be impacted

SUBJECT PROPERTY TOPOGRAPHY:

General Topographic Gradient: S

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROGEOLOGIC INFORMATION:

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the subject property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

DFIRM FLOOD ZONE:

Subject Property County:
LOS ANGELES COUNTY

NATIONAL WETLAND INVENTORY:

NWI Quad at Subject Property:
LONG BEACH

NWI Electronic
Data Coverage:
Yes - refer to the Geological Setting Source Map

GROUNDWATER FLOW VELOCITY INFORMATION:

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF SUBJECT PROPERTY:

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT:

Era: N/R
System: N/R
Series: Quaternary
Code: Q

GEOLOGIC AGE IDENTIFICATION

Category: 4 Q Quaternary

— SSURGO

— STATSGO

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF SUBJECT PROPERTY:

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO/STATSGO data.

SOIL MAP ID: 1

Soil Component Name:	NOTCOM
Soil Surface Texture:	Not Reported
Hydrologic Group:	Not Reported
Soil Drainage Class:	Not Reported
Hydric Status:	0
Corrosion Potential - Uncoated Steel:	Not Reported

SOIL MAP ID: A

Soil Component Name:	Metz
Soil Surface Texture:	Loamy sand
Hydrologic Group:	B
Soil Drainage Class:	Not Reported
Hydric Status:	3
Corrosion Potential - Uncoated Steel:	High

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0	30	Loamy sand	No data	No data	Min:42.343, Max:14.1143	Min:8.4, Max:6.6
2	30	97	Sand	No data	No data	Min:42.343, Max:14.1143	Min:8.4, Max:6.6
3	97	152	Sand	No data	No data	Min:42.343, Max:14.1143	Min:8.4, Max:6.6

LOCAL / REGIONAL WATER AGENCY RECORDS:

Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

LOCAL / REGIONAL WATER AGENCY RECORDS

CIWQS - CA

California Integrated Water Quality System

CA State Water Resources Control Board

916-341-5791

California Integrated Water Quality System database facilities listing which include owner information violations inspections and other regulatory matters

STATE RECORDS

GAMA - CA

California Groundwater Ambient Monitoring Assessment

State Water Resources Control Board

916-341-5791

Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

NPDES - CA

National Pollutant Discharge Elimination System

State Water Resources Control Board

916-341-5810

A listing of National Pollutant Discharge Elimination System permits including stormwater

HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.
