

Memo Prepared for Caltrans to Facilitate 4(f) Analysis for the Proposed 13th Street Bridge Project

County of San Diego, Department of Public Works, Environmental Services Unit

February 12, 2015

RE: Trail Connectivity in the Vicinity of the 13th Street Bridge Project

Background

The County of San Diego (County) Department of Public Works (DPW) is proposing the 13th Street Bridge and the 13th Street Gap Projects located in the unincorporated community of Ramona within San Diego County, California. The 13th Street Bridge Project is a U.S. Department of Transportation (U.S. DOT) Federal Highway Administration (FHWA) funded bridge project that consists of the improvement of 13th Street and Maple St. between Main Street and Walnut Street and construction of an approximately 480 foot long bridge over Santa Maria Creek to replace the existing corrugated steel culvert. The 13th Street Gap Project consists of roadway and pathway improvements along the unpaved portions of Walnut Street east of 13th Street/Main Street and 13th Street/Maple St. between Main Street and Walnut Street and is contiguous to the 13th Street Bridge Project (Figure 1). The objective of the 13th Street Gap Project is to connect the proposed pathways, sidewalks and roadways to the existing improved areas at Walnut Street so that these features can ultimately be included as part of the 13th Street Bridge Project. These improvements will provide adequate and safe crossing over the Santa Maria Creek for pedestrians and trail users (Figure 1).

A trail component across the 13th Street Bridge Project is an integral project feature that will significantly enhance bicycle, equestrian and pedestrian travel in the community of Ramona. A trail component along the 13th Street Bridge is a critical link in establishing an interconnecting network of existing trails in the community. These interconnecting trails are incorporated in a number of the County's land use and planning documents, including the County General Plan, County Trails Program and Community Trails Master Plan, and Ramona Community Trails and Pathway Plan.

The purpose of this memo is to provide a narrative of the County's land use policies and plans for the interconnectivity of community trails in Ramona and applicable U.S. DOT regulations that are considered as part of the development of the 13th Street Bridge Project.

County of San Diego General Plan – Mobility Element

The County General Plan (dated August 2011) provides a framework for land use and development decisions in the unincorporated areas of the County. Specifically, the Mobility Element of the County General Plan requires the provision of multi-modal facilities to accommodate alternative modes of travel, such as public transportation, bicycling, and walking. The Mobility Element recognizes that a well planned and designed multi-modal road network, complete with non-motorized travel options that include bicycle and pedestrian facilities as well as hiking, equestrian, and mountain biking trails and

pathways offer an important alternative to motor-vehicle use and enhances recreational use. Mobility Element Goal M-12 of the Mobility Element calls for a safe, scenic, interconnected, and enjoyable non-motorized multi-use trail system to be developed and managed, and maintained according to the County Trails Program, Regional Trails Plan, and the Community Trails Master Plan. Furthermore, Policy M-12.1, County Trails System, directs the implementation of a County Trails Program by developing the designated trails and pathways alignments and implementing goals and policies identified in the Community Trails Master Plan.

There is a Final Environmental Impact Report (SCH#2002111067) associated with the General Plan dated August 2011. The EIR considers the potential impact to recreation and includes a discussion of pathways, which are typically included within road right-of-way and provide critical connections to create a functional trail system. The EIR discusses the County Trails Program (CTP) and the implementing documents: the County Trails Master Plan and the Regional Trails Plan (discussed more below). The General Plan EIR goes on to identify that the CTP, and other County plans, would ensure that the County has the necessary recreational facilities to accomplish its vision, mission and strategic initiatives for the future.

County Trails Program and Community Trails Master Plan

The County Trails Program (CTP) and the Community Trails Master Plan (CTMP) was approved by the County Board of Supervisors in January 2005 to develop a system of interconnected regional and community trails and pathways (Attachment 1). A Mitigated Negative Declaration (SCH#2004081130) was prepared and adopted for the project. These trails and pathways are intended to address an established public need for recreation and transportation, and provide health and quality of life benefits associated with hiking, mountain biking, and horseback riding throughout the County's biologically diverse environments. The CTMP is the implementing document for the County Trails Program and contains adopted individual community trails and pathways plans, including the CTMP for the community of Ramona (Attachment 2).

The CTMP also discusses when a project intersects land that includes a trail corridor, the specific location of a proposed trail within the trail corridor would be determined based on a trail route study in order to locate trails where they avoid causing impacts to sensitive habitat and other significant environmental resources.

Ramona Community Trails and Pathway Plan

According to the Ramona Community Trails and Pathway Plan (RCTPP), community trails are considered "local public facilities" in close proximity to residents that provide transportation, recreation, access, infrastructure linkages, and safe routes throughout a community. The vision of the Ramona Trails Association is to provide a comprehensive trail system that connects all a parts of the community to provide safe, non-motorized routes to schools and public facilities to help reduce motorized traffic and encourage a healthier mode of transportation, while preserving the community's rural character. The trail component of the 13th Street Bridge Project is identified as Trail #122, Library Trail, in the Ramona Trails Map Index of the RCTPP, and would connect to trail #'s 54, 30, and 8 (see page RM37 of

Attachment 2 and Attachment 3 for a map of the Ramona Community Trails and Pathways Plan). As such, development of the 13th Street Bridge Project must consider the proposed Trail #122 as a planned facility under the CTMP subject to Section 4(f) of the U.S. DOT Act of 1966. An overview of the applicability of this statute is provided below.

Department of Transportation Act (DOT Act) of 1966 – Section 4(f)

Since the 13th Street Bridge Project is an FHWA-funded project, the project is subject to Section 4(f) of the U.S. DOT Act of 1966 that provides for “the consideration of park and recreation lands, wildlife and waterfowl refuges, and historic sites during transportation project development.” In addition, Section 4(f) applies to a planned facility when “a public entity owns the property and has formally designated and determined it to be significant for park, recreation area, or wildlife and waterfowl refuge purposes.” Evidence of formal designation is the inclusion of the publicly owned land, and its function as a Section 4(f) property, into a City or County Master Plan.¹

Use of a Section 4(f) property occurs: (1) when land is permanently incorporated into a transportation project; (2) when there is a temporary occupancy of land that is adverse in terms of the statute's preservation purpose; or (3) when there is a constructive use (a project's proximity impacts are so severe that the protected activities, features, or attributes of a property are substantially impaired). Before approving a project that uses Section 4(f) property, FHWA must determine that there is no feasible and prudent alternative that avoids the Section 4(f) properties and that the project includes all possible planning to minimize harm to the Section 4(f) properties; or, FHWA makes a finding that the project has a de minimis impact on the Section 4(f).²

Conclusion

In consideration of the above County land use policies and plans and the U.S. DOT regulations presented above, Trail #122 is identified in the RCTPP as part of the CTMP is a Section 4(f) property. As a “planned facility” under the “Other Considerations” designation of Section 4(f) of the U.S. DOT regulation, impacts to Trail #122 must be considered in the development of the 13th Street Bridge Project since this project will be FHWA-funded.

Ramona Community Trails and Pathways Plan

Trails: The Community Connection

The Community Trails Master Plan will be utilized to develop a system of interconnected regional and community trails and pathways. These trails and pathways are intended to address an established public need for recreation and transportation, but will also provide health and quality of life benefits associated with hiking, biking, and horseback riding throughout the County’s biologically diverse environments.

Community trails serve a different function than regional trails, which are focused on the provision of long linear distances. Instead, community trails are “local public facilities” in close proximity to residents that provide transportation, recreation, access, infrastructure, linkages, and safe routes throughout a community. The Community Trails Master Plan (CTMP) involves both trail development and management on public, semi-public and private lands. The CTMP has established two forms of non-motorized facilities called “Trails” and “Pathways” that provide passive recreational and alternative modes of transportation.

Ramona Community Trail

Trails are typically away from vehicular roads that are primarily recreational in nature but can also serve as an alternative mode of transportation. They are soft-surface facilities for single or multiple uses by pedestrians, equestrians, and mountain bicyclists.

Pathways are a non-motorized transportation facility located within a parkway or road right of way. A riding and hiking trail located in the road right of way is considered a pathway. They are soft-surfaced

facilities intended to serve both circulation and recreation purposes. Pathways help make critical connections and are an integral part of a functional trail system.

COMMUNITY TRAIL STATEMENT

The community of Ramona is located in the foothills of San Diego County. Pioneers with a rich history of ranching founded it as a prominent stopover for many heading to Julian and beyond. The Butterfield Stage ran through the region. Main Street is unique for having been constructed very wide. Wagons of forgone times had the ability to do a u-turn. Before the Battle of San Pasqual, Kearney and his soldiers rested here beneath the oaks near Highland Valley Road. We refer to Ramona as Valley of the Sun. Coming into Ramona, north on Route 67 by Mt Woodson, it is obvious why, as you drop into a vast valley surrounded by mountains of National Forest. The Santa Maria Valley is home to people who strive to live a rural, country lifestyle. Important to Ramonans is the opportunity to raise their families and livestock on large parcels. Horses are a major part of that lifestyle. It has been shown that the local economy is impacted by conservatively \$24 million annually by the equine industry. Between 8,000 and 12,000 horses reside here. More equestrians are looking to relocate to Ramona from other communities because of the opportunities for pursuing an equestrian lifestyle. Our 4-H and Future Farmers of America (FFA) programs our important to

this community, encouraging our young people to consider careers in agriculture.

Our valley features a variety of environments. The Santa Maria Creek runs through the region, coming from the mountains to the east, through Town Center, the grasslands, and on down Bandy Canyon to connect to the San Dieguito River. There are oak groves, stands of eucalyptus and sycamores. We have a significant inventory of vernal pools and grasslands, which are vital to many species of animals, some endangered or threatened by development.

There are pioneer trails throughout the community. Only a very few have been preserved by dedication thus far. The vision of Ramona Trails Association is to provide a comprehensive trail system that connects all parts of the community. We seek to achieve a trails system that will provide safe, non-motorized routes to schools and public facilities helping to reduce motorized traffic and encourage a healthier mode of transportation.

There is a national health crisis of obesity and heart disease in our country, from our youth to our senior citizens. Trails provide a low-impact exercise opportunity to get away from our televisions and computers and walk a trail. There is a stronger sense of community when neighborhoods are connected with a trail. It has been shown that mental and social well-being is increased by the ability to experience a dirt path. These greenways provide wildlife

corridors and buffer zones. Persons with disabilities are able to share trail experiences, whether by wheelchair or astride an equine. Everyone benefits from trails and pathways.

There are a number of organizations that would benefit from a comprehensive trail system, including several equestrian groups, 4-H, a burgeoning high school agriculture program, Future Farmers of America (FFA), amateur radio, school children for field studies in science and history, orienteering and many youth groups. Ramona is a destination for many bicyclists. Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in our area. RTA works with local and county agencies to create a trails system in Ramona. This service group participates in many community events including the Ramona Rodeo, July 4th Rotary Fireworks, and the Country Fair. Annually RTA has a fundraising multi use Poker Ride that is very well attended by horseback riders, mountain bikers, and hikers from all over the region.

With our close proximity to the National Forest and other popular recreational venues such as the San Dieguito River Park, Trans-County Trail a.k.a Sea-to-Sea Trail, and the County Open Space Preserves such as Mt. Gower, Simon Park, Barnett Ranch, and San Vicente Highlands, our community can benefit from eco-tourism. It has been proven that properties located adjacent or near a trail have greater value and tend to sell faster.

This community has looked at creating a Parks Authority, which would help to provide construction and maintenance of trails and the public parks they would connect. Ramona Trails Association currently provides part of this service.

As the County of San Diego continues to grow, the community of Ramona strives to retain its rural character. A viable trails system will help to achieve that goal. With such a large population of equestrians it will enhance that way of life. A connective trails system will provide our residents safe and healthy means to get from one place to another while preserving our rural lifestyle.

THE NEED FOR TRAILS

The community trail needs are based on an equation established by the Trails System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people.

The “Trail Need” is the minimum length of trail miles (baseline level of service) for each Community and Subregional Plan Area. The TSA calculations for community trail needs are as follows:

- **Trail Need** = (Community Population /1,000 residents x 0.8 miles of trails)
- **2000 Trail Need** = (2000 population /1,000 residents x 0.8 miles of trails)

- **2020 Trail Need** = (2020 population /1,000 residents x 0.8 miles of trails)

Population statistics from the 2000 U.S. Census were used to determine the current trail needs in Ramona. Based on the census, the population of the Ramona Community Plan Area is 33,450 and there is a current need for 27 miles of community trails. In the year 2020, the population is projected to increase to 53,340 and there would be a future need for 43 miles of community trails.

For additional information about the baseline level of service and trail needs, please refer to the discussion under “**The Need for Trails**” and **Tables NT-1 and NT-2** in the CTMP.

COUNTYWIDE TRAIL GOALS AND POLICIES

The “**Countywide Goals and Policies**” contained in the CTMP apply to all community and sub-regional plan areas. Community-specific goals and policies are intended to accommodate specific needs and they will be implemented when feasible. The Ramona Community Planning Group developed Community Specific Goals and Policies for their community trails plan. The abbreviations are as follows:

SG = Community Specific Goal

SP = Community Specific Policy

Goal: SG 1

Expand Ramona’s pathway system to provide convenient and safe connections with the community trail system.

Goal: SG 2

The community will seek support of property owners when important trail connections are needed, the community will seek support of the affected landowner and encourage their voluntary participation.

Goal: SG 3

Trail easements be shared between County and local trail agencies in anticipation of a future parks district.

Policy: SP 1

New pathways are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater.

Where Community-specific goals and policies are not addressed, the “**Countywide Goals and Policies**” contained in CTMP shall apply.

DESIGN AND CONSTRUCTION GUIDELINES

Countywide trail guidelines in the Community Trails Master Plan apply to all community and sub-regional plan areas. Ramona has prepared community-specific

trail design guidelines. Community-specific guidelines are intended to accommodate specific community needs and the County will implement when feasible. Where Community specific guidelines are not addressed, the Countywide “**Design and Construction Guidelines**” contained in the CTMP shall apply.

Ramona Subdivision Trail

RAMONA COMMUNITY-SPECIFIC TRAIL DESIGN GUIDELINES

GUIDELINES	NOTES	NOTES	TYPE A	TYPE B	TYPE C	TYPE D
			Urban/Suburban	Rural	Primitive	Pathway
	Tread Width	1 a b c d e	10' - 12'	8' - 10'	4' - 6'	15'
	Easement Width	2 3 6 g	12' - 20'	10' - 20'	30' - 50'	10' - 15'
	Function		Recreation/ Transportation	Recreation/ Transportation	Remote Recreation	Transportation/ Limited Recreation
	Slope	4	< 15%	< 20%	< 40%	< 15%
	Cross Slope		1 - 2%	1 - 5%	1 - 8%	1 - 2%
	Surface Material		D.G./ Binding Agent	D.G. or Suitable Native Soil	Suitable Native Soil	D.G./ Binding Agent
	Anticipated User Volume		Hi	Medium	Med - Low	Hi
	Horizontal Clearance	5	2' Beyond Tread Edge	At Edge	1' Beyond Tread Edge	At Edge
Vertical Clearance	f	12'	10'	10'	12'	

Countywide CTMP Guideline Notes:

- 1) Tread width within the *optimum range will be based on site specific conditions.
- 2) Easement width within the *optimum range will be dependant on topographical or environmental conditions, i.e. steep slope, rugged terrain, rock outcroppings, or sensitive biological resources or habitat will require the maximum easement width.
- 3) The *optimum easement width for any class of trail identified as "Regional" is 20' - 50'.
- 4) These are *optimum slope ranges. The following additional criteria can be applied to Type A and B trails if warranted by site conditions.
 - Ideal : 0% - 5%
 - Acceptable: Average running slope of 10% or less, for distances over 200ft.
 - Acceptable: Average running slope of 15% or less, for distances under 200ft.
 - Acceptable: Average running slope of 20% or less, for distances under 100ft.
 - Sufficient switchbacks should be provided to avoid excessive slopes
- 5) Type B trails at 4 feet shall provide horizontal clearance 1 foot beyond tread edge to a minimum height of 3 feet .
- 6) Pathways are trails within road right-of-way. The minimum width specified corresponds to the current minimum parkway (aka pathway) width in the County Public Road Standards. Depending on the discretionary project being contemplated, an additional 5 feet of road right-of-way may be required, thus providing a total width of 15 feet for pathway / parkway purposes.

Ramona Guideline Notes: (Shaded Areas Represent Augments to the Countywide CTMP Guidelines)

- a) Exceptions to tread widths are acceptable for short distances where constraints occur i.e.. topographical, environmental, or archeological.
- b) 8' Minimum tread width is acceptable for trail type A for short distances from exceptions mentioned in note (a) above.
- c) 4' Minimum tread width is acceptable for type B for short distances under 20' from exception mentioned in note (a) above.
 - 8' - 10' tread width is recommended for public safety when 3 user groups are expected to share a trail in areas where barriers the trail has physical barriers such as fencing.
 - 6' - 8' trail tread where **no** physical barriers exist for sections of trail longer than 20', the trail shall be 8'-10' and a minimum of 4' is allowable for very short segments where topographical situations prohibit recommended width.
- d) Costs for construction and mitigation for trails in Ramona may be slightly higher because of variances from Countywide Design Guidelines, i.e. increased widths etc....
- e) Type C trails: 2' is an acceptable minimum where constraints such as topographical, environmental, archeological or where user groups are restricted.
- f) Optimal pathway/ Type D trail is one having vertical separation from the roadway but implementation is often limited by road right-of-way widths, topographic conditions and increased construction cost.
- g) Pathways/ Type D trails are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater

* "**Optimum**" means the best or most favorable condition for a particular trail situation from the perspective of responsible management.

RAMONA COMMUNITY TRAIL IMPLEMENTATION INFORMATION

The Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in Ramona. RTA works with local and county agencies to provide construction and maintenance activities. The Ramona community is considering creating a Parks Authority, which would not only provide construction and maintenance of trails, but also public facilities within local parks.

The Ramona Community Planning Group developed implementation strategies for their community trails plan. The abbreviation is as follows:

SIS = Community Specific
Implementation Strategies

Implementation Strategy: SIS 1

New pathways that provide critical connections to the trail system will be identified and added to the CTMP for future implementation.

Implementation Strategy: SIS 2

Where trails or pathways are required as a condition for development, they should be designed to connect with existing and proposed trails or pathways adjacent to the property.

Implementation Strategy: SIS 3

The community will encourage utility providers to allow public trail easements over their utility easements and rights-of-way.

Implementation Strategy: SIS 4

Review tax default properties, vacation of easements and County properties being considered for sale to determine opportunities to secure trail routes.

Implementation Strategy: SIS 5

Encourage Caltrans to provide pathways that are identified on the community trails map within their controlled right-of-way.

Implementation Strategy: SIS 6

Continue to seek support from property owners for trails along existing private roads when important connections are needed.

RAMONA COMMUNITY TRAILS MAP SUMMARY

As a result of the community trails outreach process for development of the CTMP, the Ramona Community Planning Group completed several tasks, and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a community trails map and index.

Proposed trails shown on trails maps contained in the Community Trail Master Plan depict corridors of general alignments. The term “general alignment” is used to describe the general location of a future trail within a designated corridor so that the specific alignment can be determined during the review and approval process when a discretionary application is submitted for a development permit for land that includes a trail corridor. The designated corridor is approximately one-quarter mile wide. A general alignment is useful because it allows

the trail to be located to avoid extreme topographical conditions, sensitive habit or other site-specific constraints.

RAMONA COMMUNITY TRAILS MAP INDEX

The following community trails map index was completed by the Ramona Community Planning Group and will be used as a reference tool. Neighboring communities are italicized and where trail or pathway connections exist, the community trail name and number are included.

STAGING AREAS

1. North Rancho Ballena Trail at Coast to Crest Trail junction.
2. South Rancho Ballena Trail, just north of SR78
3. Hatfield Creek, intersection of Old Julian Highway and SR78
4. Creek Hollow, Old Julian Highway and Creek Hollow Drive
5. Punch Bowl, Thornbush Road off of Ramona Oaks Road
6. Rainbird Road
7. Simon Park East, Woods Hill Lane
8. Simon Park West, Griffith Road and Hanson Lane

STAGING AREAS (continued)

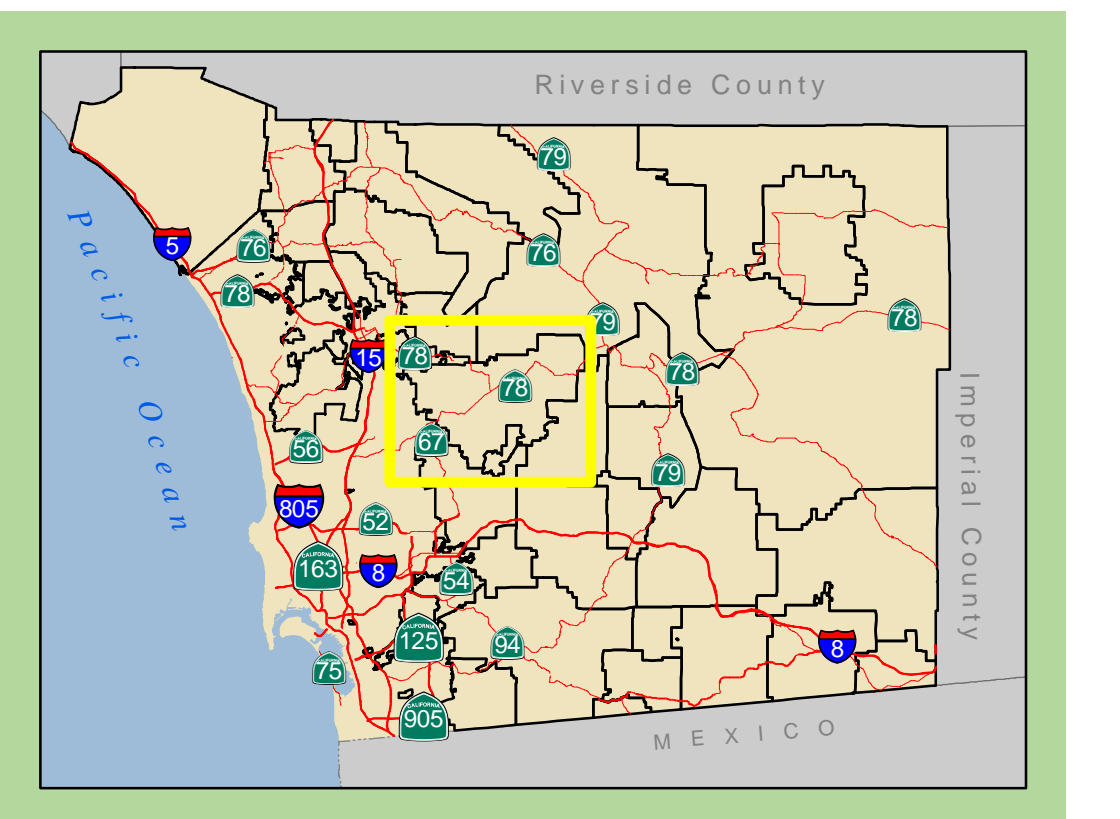

9. San Vicente Road Pathway, San Vicente Road and Chuck Wagon Road
10. Monte Vista Trail, approximately 1.25 miles along Chuck Wagon Road
11. Barnett Ranch, San Vicente Road and Barnett Ranch Trail
12. Dye Road and Southern Oaks Road
13. Holly Oaks, Southern Oak Road
14. Pamo Road and Burma Road
15. Santa Maria Creek at the end of North Kalbaugh Street
16. Santa Maria Creek on Montecito Road
17. Pine Street and Katherines View Way
18. Boden Canyon, at the end of Lilac Road
19. Pamo Road and Cleveland National Forest Border
20. Montecito Way and El Paso Street
21. Ramona Airport, at Ramona Airport Road and Wood Energy Road
22. Dos Picos Park, Dos Picos Park Road
23. Highland Valley Road Pathway at the Oak Country Trail junction
24. Santa Maria Creek and Gildred Loop Trail
25. Kearny Historic/Old Survey 97 Trail at Santa Maria Creek Trail junction
