Present Land Use/Zoning/General Plan Designation:

Existing Generating Station

Project Description: (please use a separate page if necessary)

The Los Angeles Department of Water and Power (LADWP) proposes to implement the proposed project, which would modify the Haynes Generation Unit 8 cooling system by removing the existing ocean-water once-through cooling (OTC) system from service and installing a wet cooling system consisting of a cooling tower. This action is necessary to allow for the continued operation of Unit 8 while complying with mandates related to the statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (OTC Policy), implemented by the California State Water Resources Control Board (SWRCB) to establish standards to comply with federal Clean Water Act Section 316(b) to reduce potential effects on aquatic life associated with the operation of cooling water intake structures.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
