

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Yolo Bypass East Levee Reach

Lead Agency: West Sacramento Area Flood Control Agency

Contact Name: Greg Fabun, General Manager

Email: gregf@cityofwestsacramento.org

Phone Number: 916-617-4855

Project Location: West Sacramento

City

Yolo

County

Project Description (Proposed actions, location, and/or consequences).

The USACE and WSAFCA propose to install stability berms, replenish waterside revetment, reconstruct maintenance roads, and improve the levee drainage system of the Yolo Bypass East Levee in West Sacramento, California. The proposed Project is the first increment of the larger federal West Sacramento Project that will improve the West Sacramento Levee System.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the results of the Initial Study, WSAFCA determined that construction and operation of proposed Project would not have significant impacts on the environment. All potentially significant impacts identified in the Initial Study would be reduced to less than significant levels with implementation of appropriate mitigation measures. Specifically, mitigation measures would be implemented to address Air Quality and GHG emissions reduction; Biological Resources habitat and special status species protection; Cultural Resources awareness training and measures for inadvertant discovery of cultural materials and human remains; Hydrology and Water Quality measures to ensure preparation of stormwater pollution prevention plan and aquisition of waste discharge requirements; Transportation measures include development and implementation of a traffic control plan.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The proposed project is intended to protect urban areas and reduce overall flood risk for the City of West Sacramento. There are no known areas of controversy associated with the proposed project.

Provide a list of the responsible or trustee agencies for the project.

Lead agencies include The U.S. Army Corps of Engineers (USACE), Sacramento District (Federal NEPA Lead Agency) and West Sacramento Area Flood Control Agency (WSAFCA) as State Lead Agency. Responsible agencies include the State of California Central Valley Flood Protection Board. Trustee agencies include California Department of Fish and Wildlife and the Central Valley Regional Water Resources Control Board.
