**Subject: Phase I Environmental Site Assessment**

4350 El Camino Real  
Los Altos, California 94022  
AEI Project No. 396135  
Client Reference Name: El Camino 76

Dear Angie Galatolo:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 559-7600 or [TGolino@aeiconsultants.com](mailto:TGolino@aeiconsultants.com).

Sincerely,

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by El Camino 76 to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 4350 El Camino Real, Los Altos, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

<b>PROPERTY INFORMATION</b>	
<b>Site Address(es)</b>	4350 El Camino Real, Los Altos, Santa Clara County, California 94022
<b>Property ID (APN or Block/Lot)</b>	167-11-041
<b>Location</b>	Southern corner of the intersection of Los Altos Avenue and El Camino Real
<b>Property Type</b>	Gas Station
<b>SITE AND BUILDING INFORMATION</b>	
<b>Approximate Site Acreage/Source</b>	.67/Assessor's Office
<b>Number of Buildings</b>	1
<b>Building Construction Date(s)</b>	1968
<b>Building Square Footage (SF)/Source</b>	1,610/Property Owner
<b>Number of Floors/Stories</b>	1
<b>Basement or Subgrade Area(s)</b>	None identified
<b>Number of Units</b>	One
<b>Additional Improvements</b>	Fuel canopies, asphalt-paved parking areas and associated landscaping
<b>On-site Occupant(s)</b>	76-branded gas station
<b>Current On-site Operations/Use</b>	Gas station and auto repair activities
<b>Current Use of Hazardous Substances</b>	Yes; refer to Section 7.1
<b>REGULATORY INFORMATION</b>	
<b>Regulatory Database Listing(s)</b>	LUST (3), HIST LUST, HIST UST (2), HIST CORTESE, HAZNET (4), RGA LUST (3), UST (2), FINDS (2), EDR HIST AUTO (2), RCRA-LQG, SWEEPS UST, CA FID UST, CUPA LISTINGS (2), CERS HAZWASTE, CERS TANKS, CERS

A chronological summary of historical subject property information is as follows:

<b>Date Range</b>	<b>Subject Property Description and Use (Historical Addresses)</b>	<b>Source(s)</b>
Prior to 1948	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records
1948-1960	Agricultural land and a portion of a small residence	Aerial photographs
1968	Construction of the current gas station and auto repair shop	Agency records
1968-Present	Developed with the current gas station and auto repair shop	Aerial photographs, agency records, city directories, interviews

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
<b>Northeast</b>	El Camino Real followed by:  Multi-tenant commercial building (4335 El Camino Real, Palo Alto)  Country Inn Motel (4345 El Camino Real, Palo Alto)  Apartments (2700 El Camino Real, Mountain View)	None identified
<b>South</b>	Apartments (4388 El Camino Real)	None identified
<b>Northwest</b>	Los Altos Avenue followed by:  Forever Young Salon, Spotless Dry Cleaning (1176-1188 Los Altos Avenue)  Courtyard by Marriott Hotel (4320 El Camino Real)	EDR HIST CLEANER (1176-1188 Los Altos Avenue)  SWEEPS UST, CA FID UST, HIST UST (4320 El Camino Real)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

## FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- According to historical and agency sources, the subject property has been occupied by a gas station and auto repair shop since 1968. The following features of concern have been noted on-site:
  - The subject property is currently equipped with two 12,000 gallon gasoline USTs and a 550 gallon waste oil UST, which were installed in 1990. The USTs are double-walled, fiberglass-reinforced plastic and equipped with leak-detection system. The product piping for the fuel USTs is double-walled, fiberglass-reinforced plastic and equipped with leak-detection system (replaced in 2001). AEI reviewed information pertinent to the status and operation of the current storage tank system. The documents reviewed did not reveal any reported discharges. However, based on the age of the USTs, AEI is unable to rule out the potential that a release from the USTs has affected the subsurface of the subject property. On this basis, the storage of petroleum products in USTs at the subject property is considered a REC.
  - The subject property is equipped with three below-ground hydraulic lifts. The lifts were presumably installed in 1968, when the building was constructed. Based on the pre-1977 installation of the lifts, the potential exists that the hydraulic fluid within the lift systems previously contained PCBs. Two of the lifts are no longer in use, and one is still in operation. Due to the age of the

equipment, the integrity of the equipment is unknown; therefore, the potential exists that a release of hydraulic fluid which may have contained PCBs has occurred on site. Therefore, the presence of the hydraulic lifts represents a REC.

- During AEI's on-site reconnaissance, evidence of significant staining associated with leakage from the containers was observed within the auto repair bays and the exterior hazardous waste storage area. No storm drains or other subsurface conduits were located in the immediate vicinity of the stains. Based on the presence of the staining, the length of time hazardous materials have been used on the subject property, and the lack of secondary containment, AEI is unable to rule out the potential that release to the subsurface may have occurred in this area.
- According to a 2002 SCCDEH Inspection Record and the regulatory database, an oil-water separator (also referred to as a sump) used to exist on the subject property. The size and age of the separator was not noted, and no site maps were on file with the SCCDEH indicating its location. Separators can act as conduits to the subsurface of properties and when utilized to treat waste water streams, can act as preferential pathways for contaminants in the waste streams. Additionally, the structural integrity of separators and their associated piping can become compromised over time, especially when located in areas prone to high seismic activity freeze/thaw cycles. Based on the use of hazardous materials on site and the presumed length of time the separator system had been in place, there is a potential that oils or other petroleum-based materials present in the waste water stream could impact the subsurface of the subject property if the separator or drain system has been compromised.
- Based on a review of historical sources, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- In October 1990, two 10,000 gallon gasoline steel USTs and a 550 gallon waste oil steel UST (circa 1969) were removed from the subject property (same locations as current USTs). Initial soil sampling indicated that elevated levels of TPHg existed under the former USTs, and therefore the pits were overexcavated. In March 1991, three monitoring wells were installed. Soil and groundwater samples were collected from the wells. None of the analytes in soil samples were detected at or above LMDLs, except for methylene chloride at 0.011 ppm. Analytical results from groundwater samples showed

concentrations of TPHg at 66 ppb and benzene at 0.37 ppm. A fourth monitoring well was installed in 1992. A temporary soil vapor extraction system was operated for a few weeks in 1992, and a groundwater extraction system was operated for 8.5 hours in 1992. Groundwater samples collected from MW1 to MW3 contained no reportable detections of TPHg or BTEX since the first quarter of 1993, at which time well MW4 was destroyed. The after cleanup maximum documented contaminant concentrations were noted as follows: 1,900 ppm TPHg, 6.4 ppm TPHd, 1.7 ppm benzene, 68 ppm toluene, 33 ppm xylene, 220 ppm ethylbenzene, ND Oil & Grease and EPA Methods 8010/8270 in soil. All COCs (TPHg, TPHd, BTEX) were ND in groundwater, with exception of MTBE, which remained at 60 ppb. Three of the monitoring wells were maintained upon closure. In 1996, the SCVWD granted the case closure with no further action required based on the current land use.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- According to a client-provided 2013 Phase I ESA report prepared by ENCON, ATC (Section 6.3, appendices) advanced six soil borings near the existing fuel and waste oil USTs, as well as the fuel dispensers in July 2007. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentrations of 1.1 mg/L in a sample. Chromium, Nickel and Zinc were detected in groundwater at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively. ENCON concluded that based on the absence of VOCs and fuel oxygenates above laboratory detection limits in both soil and groundwater samples collected, low concentration of diesel range hydrocarbon in groundwater is not likely to pose a significant environmental concern.
- According to the property owner, demolition of the subject property building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and

the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

- Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property building are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 75 tests were conducted for radon levels in the subject property zip code (94022) in 2016. Four of the tests exceeded the action level of 4.0 pCi/L set forth by the US EPA. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L. Consequently, radon does not appear to be a widespread concern; however, radon sampling would be required to determine site-specific radon levels.
- AEI was unable to verify the current permit status of the three USTs. A current permit was not on file under SCCDEH records, and a copy of the permit was not available for review during AEI's on-site reconnaissance. The most recent permit expired in 2014. It would be prudent for the property owner to verify the permit status of the USTs.

## CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 4350 El Camino Real, Los Altos, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

## **1.0 INTRODUCTION**

---

This report documents the methods and findings of the Phase I ESA performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 4350 El Camino Real, Los Altos, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

### **1.1 SCOPE OF WORK**

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

### **1.2 ADDITIONAL SERVICES**

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

### **1.3 SIGNIFICANT ASSUMPTIONS**

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## 1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

### **1.5 LIMITING CONDITIONS/DEVIATIONS**

The performance of this Phase I ESA was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this Phase I ESA. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance.

### **1.6 DATA FAILURE AND DATA GAPS**

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

### 1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

<b>Data Failure</b>	The earliest historical resource obtained during this assessment was an aerial photograph from 1948 indicating that the subject property was developed agriculturally and with a portion of a residence. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural and/or residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
<b>Information/Sources Consulted</b>	City directories, Sanborn fire insurance maps, aerial photographs, agency records, interviews

### 1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

### 1.7 RELIANCE

All reports, both verbal and written, are for the benefit of El Camino 76. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's contract and Standard Terms and Conditions executed by El Camino 76 on October 10, 2018. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	4350 El Camino Real, Los Altos, Santa Clara County, California 94022
Property ID (APN or Block/Lot)	167-11-041
Location	Southern corner of the intersection of Los Altos Avenue and El Camino Real
Property Type	Gas Station
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	.67/Assessor's Office
Number of Buildings	1
Building Construction Date(s)	1968
Building Square Footage (SF)/Source	1,610/Property Owner
Number of Floors/Stories	1
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Fuel canopies, asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	76-branded gas station
Current On-site Operations/Use	Gas station and auto repair activities
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	LUST (3), HIST LUST, HIST UST (2), HIST CORTESE, HAZNET (4), RGA LUST (3), UST (2), FINDS (2), EDR HIST AUTO (2), RCRA-LQG, SWEEPS UST, CA FID UST, CUPA LISTINGS (2), CERS HAZWASTE, CERS TANKS, CERS

### 2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Los Altos
Sewage Disposal/Treatment	City of Los Altos

Utility source/system information listed in the table above is provided by Mr. Greg Galatolo, Property Owner, unless otherwise noted above.

### 2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial and residential area of Los Altos, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
<b>Northeast</b>	El Camino Real followed by:  Multi-tenant commercial building (4335 El Camino Real, Palo Alto)  Country Inn Motel (4345 El Camino Real, Palo Alto)  Apartments (2700 El Camino Real, Mountain View)	None identified
<b>South</b>	Apartments (4388 El Camino Real)	None identified
<b>Northwest</b>	Los Altos Avenue followed by:  Forever Young Salon, Spotless Dry Cleaning (1176-1188 Los Altos Avenue)  Courtyard by Marriott Hotel (4320 El Camino Real)	EDR HIST CLEANER (1176-1188 Los Altos Avenue)  SWEEPS UST, CA FID UST, HIST UST (4320 El Camino Real)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

### 2.4 PHYSICAL SETTING

<b>Geologic Unit: Description/Source</b>	Qpa: Alluvium (Pleistocene)/USGS and United States Department of the Interior
<b>Soil Series: Description/Source</b>	Based on a review of the USDA Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as Urban Land. The Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures. Due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property.
<b>Groundwater Flow Direction/Source</b>	Northeast to east/GeoTracker documentation for subject property closed LUST case
<b>Depth to Groundwater/Source</b>	24 to 28 feet bgs/GeoTracker documentation for subject property closed LUST case
<b>Surface waters on the subject property or adjacent sites</b>	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

### 3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1948	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records
1948-1960	Agricultural land and a portion of a small residence	Aerial photographs
1968	Construction of the current gas station and auto repair shop	Agency records
1968-Present	Developed with the current gas station and auto repair shop	Aerial photographs, agency records, city directories, interviews

Environmental concerns associated with the on-site gas station are further discussed in Section 4.1 and 7.1.

Based on a review of historical sources, the subject property was historically used for agricultural purposes. There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

If available, copies of historical sources are provided in the report appendices.

#### 3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the ERIS collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1948, 1954	Agricultural land and a portion of a small residence	NORTHEAST: Agricultural land and residences beyond El Camino Real SOUTH: Agricultural land and residences NORTHWEST: Agricultural land
1956**	No significant changes	NORTHEAST: Commercial buildings and vacant/agricultural land beyond El Camino Real SOUTH: No significant changes NORTHWEST: One of the current commercial buildings and a gas station

Year(s)	Subject Property Description	Adjacent Site Descriptions
1960	No significant changes	NORTHEAST: The current hotel, a commercial building and vacant land SOUTH: A residence and vacant land NORTHWEST: One of the current commercial buildings and a gas station
1968**	Vacant lot	Commercial buildings in all directions, with a gas station to the northwest
1970*	The current gas station	NORTHEAST: The current hotel and apartments and a commercial building SOUTH: A commercial building NORTHWEST: Commercial buildings
1980 1987** 1991	No significant changes	NORTHEAST: The current commercial buildings, hotel and apartments SOUTH: A commercial building and parking lot NORTHWEST: Commercial buildings
2006	No significant changes	NORTHEAST: No significant changes SOUTH: Partially graded/under construction NORTHWEST: The current commercial building and hotel
2014	No significant changes	NORTHEAST: No significant changes SOUTH: The current apartments NORTHWEST: No significant changes

\*Due to poor image quality and/or scale, detailed observation of site features was not possible in various images.

Environmental concerns associated with the former agricultural uses are further discussed in Section 3.1.

Environmental concerns associated with the on-site gas station/auto repair operations are further discussed in Section 4.1 and 7.1.

\*\*Reviewed via [www.historicaerials.com](http://www.historicaerials.com)

According to a review of historical sources, the adjacent site to the northwest was formerly a gasoline service station from at least 1956 until 1968. This site was not listed on the regulatory database as a current or former UST site; however, based on the former use, it is apparent that USTs were located on site. The location of the former USTs at this site are unknown. Based on the lack of a documented release, the groundwater gradient, relative distance, and the fact that the site has undergone redevelopment since that time, the former adjacent gas station is not expected to represent a significant environmental concern.

Adjacent sites listed on the regulatory database are discussed in Section 5.1.

### 3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

### 3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1970 to 2014. The first listing for the subject property appeared in 1970. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Year(s)	Address - Occupant Listed
1970	Bolton Felix Jr, Felixs Union Serv, Interstate Rent A Car
1975, 1980, 1986	Bolton Felix Jr, Felixs Union Serv
1992	El Camino Unocal, Patel Amrit K
1995, 2000, 2005, 2010, 2014	El Camino Unocal

*If listed above, XXXX indicates that the address is valid but there is no occupancy information available.*

Environmental concerns associated with the on-site gas station/auto repair operations are further discussed in Section 4.1 and 7.1.

### 3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

### 3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

## 4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### 4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	October 16, 2018	Email	Ms. Melissa Belloso	Records discussed below

#### Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1984	Union 76	Hazardous Material Management Plan (HMMP)	Facility stores three USTs
1985	Union Oil Company of CA	Permit	Permit for three USTs, installed in 1969
1987, 1989	Union	Notice of Inspection	Minor violations noted
1987-1996	Union	Permit	Permit for USTs
1988	Union	Hazardous Materials Business Plan (HMBP)	Facility stores 20,000 gallon gasoline, 400 gallons motor oil, 15 gallons gear lubricant, 15 gallons grease, 75 gallons petroleum naphtha solvent, 550 gallons waste oil, and 50 gallons antifreeze
1988	Unocal	Tank Testing	All tests passed for three USTs
1988, 1990	Unocal	Hazardous Waste Generator Permit	Facility generates 1,000 gallons of waste oil, 50 gallons waste antifreeze and 50 gallons waste misc solvents annually
1990	Unocal Corporation	Unauthorized Release Form	A release from the waste oil UST was noted. Substances involved were noted as gasoline and waste oil.
1990, 1993, 1995, 1997, 1999, 2000, 2001, 2002, 2004, 2005, 2006, 2007, 2008, 2009, 2011	Tosco	Secondary Containment Testing, Tank Annular Testing, Secondary Pipe Testing, Piping Sump Containment Testing, UDC Testing, Leak Detector Test	All tests passed, with the exception of 2006, 2008 tests (parts replaced)

Date	Occupant	Document Type	Document Notes/Violations
1991	Unocal Service Station	Facility Closure Permit	Closure of two 10,000 gallon gasoline USTs and a 550 gallon waste oil UST
1998	Tosco	UST Upgrade Certificate	Upgrade compliance with State of California 1998 requirements
1992, 1993, 1994, 1995, 1996, 1997, 1999, 2000, 2001, 2002, 2004, 2005, 2006, 2008, 2011	El Camino 76	HMBP	Facility stores 24,000 gallons gasoline, 300 gallons motor oil, 80 gallons antifreeze, 520 gallons motor oil, propane, 200 pounds used oil filters, 55 gallons used antifreeze, and waste batteries
1992, 1995, 1996, 2000, 2004, 2006, 2007, 2008, 2009, 2011, 2012, 2013	Union	Notice of Inspection	Minor violations noted
2001-2005, 2003-2008, 2008-2013, 2010-2014	Union Station	UST Permit to Operate	Permit for two 12,000 gallon gasoline USTs and a 500 gallon waste oil UST
2001	Union	Underground Piping System Closure Permit	UST piping replacement - 2 gasoline tanks
2000	Tosco Station	Notice of Inspection	Minor violations noted, HMBP does not note solvent parts cleaner on site, and the <b>"oil-water separator was closed several years ago and should be deleted from map."</b>  *AEI Note: No older site maps were found to indicate the location of this former feature.
2002	Tosco	Soil Sampling	In December 2001, the excavation and removal of the UST product piping lines and trench lines and dispensers was performed. 13 soil samples were collected from these areas. None of the analyzed soil samples detected TPHg, BTEX, MTBE or 7 analyzed fuel oxygenates at or above their respective LMDLs.
2008	ConocoPhillips	Construction Permit	Replace spill bucket

Date	Occupant	Document Type	Document Notes/Violations
2018	El Camino 76	CERS	Facility stores: 300 gallons motor oil, 110 gallons antifreeze, a 500 gallon waste oil UST, 200 pounds used oil filters, 110 gallons waste antifreeze, and two 12,000 gallon gasoline USTs

Site maps were not provided in the SCCDEH records.

According to historical and agency sources, the subject property has been occupied by a gas station and auto repair shop since 1968. Features of concern have been noted on-site and are further discussed in Section 7.1 and the Findings Section.

#### Closed LUST case

In October 1990, two 10,000 gallon gasoline steel USTs and a 550 gallon waste oil steel UST (circa 1969) were removed from the subject property (same locations as current USTs). Initial soil sampling indicated that elevated levels of TPHg existed under the former USTs, and therefore the pits were overexcavated. In March 1991, three monitoring wells were installed. Soil and groundwater samples were collected from the wells. None of the analytes in soil samples were detected at or above LMDLs, except for methylene chloride at 0.011 ppm. Analytical results from groundwater samples showed concentrations of TPHg at 66 ppb and benzene at 0.37 ppm. A fourth monitoring well was installed in 1992. A temporary soil vapor extraction system was operated for a few weeks in 1992, and a groundwater extraction system was operated for 8.5 hours in 1992. Groundwater samples collected from MW1 to MW3 contained no reportable detections of TPHg or BTEX since the first quarter of 1993, at which time well MW4 was destroyed. The after cleanup maximum documented contaminant concentrations were noted as follows: 1,900 ppm TPHg, 6.4 ppm TPHd, 1.7 ppm benzene, 68 ppm toluene, 33 ppm xylene, 220 ppm ethylbenzene, ND Oil & Grease and EPA Methods 8010/8270 in soil. All COCs (TPHg, TPHd, BTEX) were ND in groundwater, with exception of MTBE, which remained at 60 ppb. Three of the monitoring wells were maintained upon closure. In 1996, the SCVWD granted the case closure with no further action required based on the current land use. Based on this information, the closed LUST case represents a CREC.

## 4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Fire Department (SCCFD)	October 16, 2018	Office visit	Ms. Jennifer Collins	No hazardous materials records on file

### 4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Altos Building Department (LABD)	October 16, 2018	Email	Ms. Sarah Hendricks	Records discussed below

#### Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1968	Union Oil Company	New service station
1990	Unocal	Demolition of two tanks at a gas station, demo dispensing islands, electrical and plumbing
1994	Not listed	Tenant improvement - sales room remodel
2001	Not listed	Raise exterior canopies, remove and replace UST piping
2006	Not listed	New sign
2008	Not listed	Install enhanced vapor recovery system

Environmental concerns associated with the on-site gas station are further discussed in Section 4.1 and 7.1.

### 4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Altos Planning Department (LAPD)	October 16, 2018	Telephone	N/A	No evidence indicating the existence of AULs on file for the subject property

### 4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	October 16, 2018	Telephone	N/A	Information obtained is discussed below

#### Records Summary

<b>APN</b>	167-11-041
<b>Acreage</b>	.67 acres
<b>Construction Date</b>	1968
<b>Building Square Footage</b>	1,610 square feet
<b>Current Owner</b>	Not provided

#### 4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	October 16, 2018	Website	N/A	Records discussed below
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	October 16, 2018	Website	N/A	Records discussed below
CA DTSC Envirostor	October 16, 2018	Website	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	October 16, 2018	Email	Ms. Rochelle Reed	Records discussed below
Santa Clara Valley Water District (SCVWD) Well Division	October 16, 2018	Email	Mr. Bill Cameron	Records discussed below
SCVWD Fuel Leaks / Solvents Database	October 16, 2018	Website	n/a	No records on file

##### *SWRCB GeoTracker Database Summary*

The subject property is listed as a closed LUST case, which is further discussed in Section 4.1.

##### *California DTSC HWTS Database Summary*

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
1x Felix's Unocal	1988	No records found	N/A
Unocal Service Station #6115	1993, 1995, 1996, 2000	Aq sol w org residues $\geq 10\%$ , tank bottom waste (1993), other empty containers $\geq 30$ gallons (1993)	Less than 1.5 per year
El Camino 76	1993-2007	Unspecified organic liquid mixture, blank/unknown	Less than 3 per year
Tosco Corporation SS#31096	2002	Unspecified organic liquid mixture	0.17
Conoco Phillips #256115	200-2007	Aq sol w org residues $\geq 10\%$ , other organic solids	Less than 0.3 per year

The 1993 listings for tank bottom waste/other empty containers may be evidence of removal of an underground feature or tank. However, review of regulatory files indicates that the first generation of USTs were removed/replaced in 1990. It is possible that this listing may be associated with the former oil-water separator, noted in environmental health department inspection records, or activities related to the closed LUST case (Section 4.1).

Environmental concerns associated with the on-site auto repair shop are further discussed in

Section 4.1 and 7.1.

#### *BAAQMD Records Summary*

The subject property is permitted for two USTs associated with gasoline dispensing operations, which are further discussed in Section 4.1.

#### *SCVWD Records Summary*

Mr. Cameron indicated that there are four properly destroyed wells on the subject property, which are further discussed in Section 4.1.

### **4.7 OIL AND GAS WELLS**

<b>Agency</b>	<b>Date Referenced</b>	<b>Resource</b>	<b>Oil or gas wells located within 500 feet of the subject property</b>
State of California Department of Conservation, Division of Oil, Gas & Geothermal Resources (CA DOGGR)	October 29, 2018	CA DOGGR Map	No

### **4.8 OIL AND GAS PIPELINES**

<b>Agency</b>	<b>Date Referenced</b>	<b>Resource</b>	<b>Pipelines located within 500 feet of the subject property</b>
National Pipeline Mapping System (NPMS)	October 29, 2018	NPMS Public Map Viewer	No

### **4.9 STATE ENVIRONMENTAL SUPERLIENS**

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

### **4.10 STATE PROPERTY TRANSFER LAWS**

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjacent site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

### 5.1 RECORDS SUMMARY

<b>Facility Name</b>	SPOTLESS CLEANERS
<b>Address</b>	1176 Los Altos Avenue
<b>Distance &amp; Direction</b>	Adjacent to the northwest, beyond Los Altos Avenue
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	EDR HIST CLEANER
<b>Comments</b>	<p>This site is listed as a dry cleaning plant from 1988 to 2014. The EDR Historical Cleaners database does not report a release, but rather identifies businesses, based on name, that may have been associated with cleaning activities.</p> <p>Based on the lack of a documented release, lack of other listings (HAZNET, RCRA, etc) and the relative distance, the review of regulatory agency files for this site was not deemed necessary, and the listing is not expected to represent a significant environmental concern.</p>

<b>Facility Name</b>	FOUR SEASONS MOTEL
<b>Address</b>	4320 El Camino Real
<b>Distance &amp; Direction</b>	Adjacent to the northwest, beyond Los Altos Avenue
<b>Hydrologic Position</b>	Cross-gradient
<b>Databases Listed</b>	SWEEPS UST, CA FID UST, HIST UST
<b>Comments</b>	<p>The Four Seasons Motel is listed as having an UST (no specific information) that was last used in 2003. The contents and size were not reported. No additional information was noted.</p> <p>Based on the lack of a documented release and gradient, the review of regulatory agency files for this site was not deemed necessary, and the listings are not expected to represent a significant environmental concern.</p>

## 5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in the Findings Section.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Mr. Greg Galatolo	October 25, 2018	In Person	1988	Interviewed; see Interview Summary table below
Key Site Manager	Mr. Greg Galatolo	October 25, 2018	In Person	1988	Owner is acting Key Site Manager; see Interview Summary table below

#### Interview Summary

Question	Owner (Representative) Response/Comment	Key Site Manager Response/Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	Yes; Mr. Galatolo stated that there are USTs on-site	Yes
Do you have any knowledge of previous environmental investigations conducted on site?	Yes; Mr. Galatolo stated that there have been previous environmental investigations but did not provide AEI with a copy	Yes
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	Yes; Mr. Galatolo stated that the subject property has been used as a gas station since the 1960s	Yes
Are you aware of any known plans for site redevelopment or change in site use?	Yes; Mr. Galatolo stated that there are plans for residential redevelopment	Yes
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No

Question	Owner (Representative) Response/Comment	Key Site Manager Response/Comment
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No

### 6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information of Mr. Greg Galatolo, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

### 6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

## 6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/Comment
<p><b>1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)</b></p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?</p>	Information not provided
<p><b>2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).</b></p> <p>Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?</p>	Information not provided

Question	Response/ Comment
<p><b>3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</b></p> <p>Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	Information not provided
<p><b>4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</b></p> <p>Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?</p>	Information not provided
<p><b>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</b></p> <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the property?</p> <p>(c) Do you know of spills or other chemical releases that have taken place at the property?</p> <p>(d) Do you know of any environmental cleanups that have taken place at the property?</p>	Information not provided
<p><b>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</b></p> <p>Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?</p>	Information not provided

### 6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by the property owner during this assessment. A summary of this information follows:

*Phase I Environmental Site Assessment (4350 El Camino Real, Los Altos, CA 94022), prepared by ENCON Solutions, Inc. (January 16, 2013)*

The report was prepared in accordance with the ASTM E1527-05 standard.

This report describes the subject property generally consistent with current conditions as a 76-branded gas station with auto repair shop. Three underground hydraulic lifts were located in the three auto repair bays. Waste oil filters and waste coolant were stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property. The current USTs were also located on-site.

According to ENCON, ATC advanced six soil borings near the existing fuel and waste oil USTs, as well as the fuel dispensers in July 2007. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected

in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentrations of 1.1 mg/L in a sample. Chromium, Nickel and Zinc were detected in groundwater at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively. ENCON concluded that based on the absence of VOCs and fuel oxygenates above laboratory detection limits in both soil and groundwater samples collected, low concentration of diesel range hydrocarbon in groundwater is not likely to pose a significant environmental concern. A copy of the 2007 report text was appended to the Phase I ESA.

ENCON identified RECs for the following conditions:

- Due to the age of the current fueling system (since 1990) and absence of compliance testing records for the earlier years of fueling operations, inherent environmental risk exists and such risk is expected to increase as the fueling systems age.
- Subsurface investigations under the hazardous material storage areas, abandoned clarifier, hoists and vehicle service area would be the sole measure to obtain higher levels of comfort in ascertaining subsurface environmental conditions at the property.
- In the event that the site is redeveloped or soil/groundwater is disturbed, a soil management plan should be prepared.
- A groundwater well exists on the property, ENCON recommended proper decommissioning of the groundwater well

A copy of the report is included in the appendices.

Secondary Containment Testing Report Form, Monitoring System Certification (June 21, 2017)

All tests passed for the two gasoline USTs, with the exception of UDC 1/2, which was retested and passed.

A copy of the report is included in the appendices.

Note: If the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

#### **6.4 ENVIRONMENTAL LIEN SEARCH**

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

## 7.0 SITE RECONNAISSANCE

<b>Site Reconnaissance Date</b>	October 25, 2018
<b>AEI Site Assessor(s)</b>	Megan Nolet
<b>Property Escort(s)/ Relationship(s) to Property</b>	Mr. Greg Galatolo, Property Owner
<b>Units/Areas Observed</b>	Building interiors as well as exterior areas
<b>Area(s) not accessed and reason(s)</b>	Refer to Section 1.5 for discussion of limiting condition(s).
<b>Other Physical Constraints</b>	Refer to Section 1.5 for discussion of limiting condition(s).

### *Reconnaissance Findings Summary*

<b>Feature</b>	<b>Observed on Subject Property (see Section 7.1)</b>	<b>Observed on Adjacent Property (see Section 7.2)</b>
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use	✓	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✓	
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✓	✓
Interior Stains or Corrosion	✓	
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✓	✓
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✓	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells	✓	
Septic Systems		
Biomedical Wastes		
Other		

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

**7.1.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE**

<b>Substance/Waste (size/quantity)</b>	<b>Location</b>	<b>Operations Associated with Material</b>	<b>Disposal Method/Frequency</b>	<b>Secondary Containment</b>	<b>Staining/Spills</b>
New motor oil (two 55 gallon drum)	Repair bay	Auto repairs	N/A	No	Staining on the concrete floor
Antifreeze (Approximately 6 <1 gallon containers)	Repair bay	Auto repairs	N/A	No	None
Used oil (30 gallon mobile caddie, 550 gallon UST)	Repair bay interior and parking lot	Auto repairs	N/A	No	None
Gasoline (two 12,000 gallon USTs)	Parking lot	Car fueling	N/A	N/A	N/A
Used antifreeze (100 gallon AST)	Exterior storage	Auto repairs	As needed	None	Yes
Used oil filters (three 55 gallon drums)	Exterior storage	Auto repairs	As needed	No	No
Propane (20 5 gallon containers)	Exterior storage	Retail sales	N/A	No	No

Evidence of significant staining associated with leakage from the containers was observed within the auto repair bays and the exterior hazardous waste storage area. No storm drains or other subsurface conduits were located in the immediate vicinity of the stains. Based on the presence of the staining, the length of time hazardous materials have been used on the subject property, and the lack of secondary containment, AEI is unable to rule out the potential that release to the subsurface may have occurred in this area. Based on this information, the staining represents a REC.

**7.1.2 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTS/USTS)**

AST(s)

Size (gallons)	Contents	Installation Date	AST Condition	Location	Construction/ Secondary Containment	Product Piping (Aboveground/ Underground)	Staining/ Spills
200	Empty (formerly contained new oil)	Unknown	Unknown	Auto repair bays	Unknown	Aboveground	None

No environmental concerns were observed in association with the AST.

UST(s)

	UST #1	UST #2	UST #3
Tank Capacity (Gallons)	12,000	12,000	550
Tank Contents	Gasoline	Gasoline	Waste Oil
Tank Installation Date	1990	1990	1990
Tank Material	Fiberglass	Fiberglass	Fiberglass
Tank Construction	Double Wall	Double Wall	Double Wall
Piping Installation Date	2001	2001	N/A
Piping Material	Fiberglass	Fiberglass	N/A
Piping Construction	Double Wall	Double Wall	N/A
Cathodic Protection Present	No	No	No
Spill/Overfill Protection Present	Yes	Yes	Yes
Tank Release Detection Method	Veeder Root	Veeder Root	Veeder Root
Piping Release Detection Method	Veeder Root	Veeder Root	Veeder Root
Date of Last Spill Bucket and Secondary Containment Test	2017	2017	2011
Spill Bucket and Secondary Containment Test Results Passed	Yes	Yes	Yes
Permitting Agency	SCCDEH	SCCDEH	SCCDEH
Permit/ Registration Confirmed	No	No	No
Permit Expiration Date	2014	2014	2014
UST Testing Requirements	Annual	Annual	Annual

	<b>UST #1</b>	<b>UST #2</b>	<b>UST #3</b>
Additional Information	Additional tests conducted in 2017 including Line Leak Detector testing, monitoring system certification, static pressure testing, back pressure, vapor pressure, and nozzle bag testing all passed	Additional tests conducted in 2017 including Line Leak Detector testing, monitoring system certification, static pressure testing, back pressure, vapor pressure, and nozzle bag testing all passed	N/A

The subject property is currently equipped with two 12,000 gallon gasoline USTs and a 550 gallon waste oil UST, which were installed in 1990. The USTs are double-walled, fiberglass-reinforced plastic and equipped with leak-detection system. The product piping for the fuel USTs is double-walled, fiberglass-reinforced plastic and equipped with leak-detection system (replaced in 2001). AEI reviewed information pertinent to the status and operation of the current storage tank system. The documents reviewed did not reveal any reported discharges. However, based on the age of the USTs, AEI is unable to rule out the potential that a release from the USTs has affected the subsurface of the subject property. On this basis, the storage of petroleum products in USTs at the subject property is considered a REC.

### **7.1.3 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

#### *Below-Ground Hydraulic Lifts*

The subject property is equipped with three below-ground hydraulic lifts. The lifts were presumably installed in 1968, when the building was constructed. Based on the pre-1977 installation of the lifts, the potential exists that the hydraulic fluid within the lift systems previously contained PCBs. Two of the lifts are no longer in use, and one is still in operation. Due to the age of the equipment, the integrity of the equipment is unknown; therefore, the potential exists that a release of hydraulic fluid which may have contained PCBs has occurred on site. Therefore, the presence of the hydraulic lifts represents a REC.

#### *Above-Ground Hydraulic Lifts*

The interior of the auto repair bays are equipped with two aboveground lifts. Each of the lifts is equipped with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed, and the lifts are therefore not expected to represent a significant environmental concern.

### **7.1.4 INTERIOR STAINS OR CORROSION**

Surficial staining was observed during AEI's on-site reconnaissance. Please refer to the above discussion above for additional information.

### **7.1.5 DRAINS, SUMPS, AND CLARIFIERS**

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

### **7.1.6 STAINED SOIL AND PAVEMENT**

Surficial staining was observed in the exterior hazardous waste storage area during AEI's on-site reconnaissance. Please refer to the above discussion above for additional information.

Minor surficial staining, typical of this type of facility, was observed in the filling areas during AEI's site reconnaissance. Based on the nature of the staining, it is not expected to represent a significant environmental concern.

### **7.1.7 WELLS**

Multiple groundwater monitoring well plates were observed on site. According to the SCVWD, these are decommissioned wells. Refer to Section 5.1 for discussion relating to the associated subject property closed LUST case.

## **7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS**

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### **7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

#### *Transformers*

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

One pole-mounted transformer was observed on an adjacent site during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

### **7.2.2 DRAINS, SUMPS, AND CLARIFIERS**

Several storm drains were observed in the parking areas of the adjacent properties and adjacent

roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

DRAFT

## 8.0 NON-ASTM SERVICES

---

### 8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900's and peaked in the period between 1940 and into the 1970's. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980's. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the property owner, demolition of the subject property building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

## 8.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has  $\geq 1$  mg/cm<sup>2</sup> (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm<sup>2</sup> to 2.0 mg/cm<sup>2</sup>. Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, LCP is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property building are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **8.3 RADON**

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 75 tests were conducted for radon levels in the subject property zip code (94022) in 2016. Four of the tests exceeded the action level of 4.0 pCi/L set forth by the US EPA. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L. Consequently, radon does not appear to be a widespread concern; however, radon sampling would be required to determine site-specific radon levels.

### **8.4 MOLD/INDOOR AIR QUALITY ISSUES**

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this

inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

DRAFT

## **9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS**

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

4350 EL CAMINO REAL  
LOS ALTOS, CA 94022

#### COORDINATES

Latitude (North): 37.4040840 - 37° 24' 14.70"  
Longitude (West): 122.1182290 - 122° 7' 5.62"  
Universal Transverse Mercator: Zone 10  
UTM X (Meters): 578042.1  
UTM Y (Meters): 4139860.8  
Elevation: 68 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 5641106 MOUNTAIN VIEW, CA  
Version Date: 2012  
  
Northwest Map: 5640620 PALO ALTO, CA  
Version Date: 2012

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 24 LUST sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

## EXECUTIVE SUMMARY

site within approximately 0.125 miles of the target property.

LOZANO INC	2690 EL CAMINO REAL	ESE 0 - 1/8 (0.089 mi.)	C21	73

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

EPA Region: 09  
Classification: Large Quantity Generator  
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

Violation Date: 11-18-2014  
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)  
Violation Description: Failure to maintain all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment.  
Violation Notes: Returned to compliance on 11/18/2014. THE 87 TURBINE PUMP DID NOT SHUTDOWN AS REQUIRED WHEN THE 87 PIPING SECONDARY CONTAINMENT SENSOR WAS TESTED. THE UST SERVICE TECHNICIAN DETERMINED IT WAS DUE TO THE RELAY SWITCH BEING STUCK. AFTER CLEANING THE RESIDUE OFF OF THE RELAY SWITCH IT WORKED PROPERLY. NO FURTHER ACTION REQUIRED.

Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34  
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.  
Violation Notes: This is a repeat violation. Certification of Financial Responsibility (CFR) dated 4/14/2016 shows incorrect per-occurrence coverage amount in Sections A and C. Required financial responsibility for petroleum marketers is \$995,000 per occurrence and annual aggregate (\$495,000 per occurrence coverage is allowed only for non-marketers). Section C does not state that UST Cleanup Fund covers corrective action. Upload corrected CFR to California Environmental Reporting System (CERS) website and submit within 30 days for all 3 of your gas stations.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: UST  
Violation Source: CERS

Site ID: 27683  
Site Name: EL CAMINO 76  
Violation Date: 11-24-2015  
Citation: Un-Specified  
Violation Description: UST Program - Design/Construction - For use of Local Ordinance only.  
Violation Notes: In February of this year, dispenser conversion frames were used to attach new Gilbarco dispensers to the station's existing under dispenser containment (UDC) sumps. The Gilbarco dispensers are significantly larger than the previous dispensers, so the UDC manufacturer, S. Bravo Systems, provides metal fluid diversion inserts with the conversion frames to channel leaks from piping and fuel filters inside the dispensers that overhang the areas not directly above the UDC openings into the UDC. During this inspection, none of the diversion inserts were installed, so leaks from the fuel filters and some of the piping inside the dispensers will not be secondarily contained. Immediately replace the fluid diversion inserts and keep them in place at all times.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).

Violation Notes: This is an uncorrected violation originally cited in the 11/24/2015 Official Notice of Inspection. The dispenser conversion frames for the 6 Gilbarco Encore dispensers have not been equipped with the required S. Bravo Systems "Deflector Plates" to direct fuel releases from piping and filters inside the dispensers into the monitored under dispenser containment (UDC) sumps. Deflector plates are available from local distributors of S. Bravo Systems' equipment. This is a significant UST violation. Failure to provide required secondary containment as directed may result in your tanks being Red Tagged to prevent fuel deliveries. Once installed, the deflector plates shall be kept in place at all times except when temporary removal is required for equipment maintenance and testing.

Violation Source: CERS

Site ID: 27683  
Site Name: EL CAMINO 76  
Violation Date: 11-09-2017  
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)

Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).

Violation Notes: Alarm history reports were not attached to the monthly DUSTO Inspection reports for August, September, and October 2017.

Evaluation:  
Eval General Type: Other/Unknown  
Eval Date: 01-22-2016  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: A follow-on inspection was performed today from the previous 11/24/15 UST inspection to witness the re-testing of LLDs that were originally tested by Chris Bishop. Mr. Bishop's certifications had expired and previous testing that had been performed was not valid. Mr. Bishop's required certifications are now current and today's re-testing was acceptable. 2 mechanical LLDs were tested at leak rates of 3 gph at 10 psi and passed. Send a copy of the testing report to our office within 30 days.

date by James Moore. ICC Service Technician Certification 5254517 exp. date = 7/26/15, Incon Level 4 certification #6063063703, exp. date = 5/23/15 The following secondary containment components were tested: 87 and 91 tank annular space, at 7 inches Hg vacuum for one hour.(8:55 to 9:55 AM). Gages did not drop. Gages returned to zero. Test result = pass. Waste oil tank annular space, at 7 inches Hg vacuum for one hour. (11:15 AM to 12:15) Gage did not drop. Gage returned to zero. Test result = pass. 87 and 91 product lines were tested under 5 psi nitrogen for one hour. Both lines failed on the first attempt. The 91 line had a leak at the test gage and the 87 line had leaks at the test boot fittings at dispensers 1/2 and 5/6. All leaks were eliminated and the lines were re-tested for one hour (8:55 to 9:55 AM). Gages did not drop. Gages returned to zero. Test result = pass. The 87 and 91

Eval Notes: An annual monitoring certification was performed today by Chris Bishop. All of his required certifications were reviewed and were current. The VMI 890 LDT tester two-year calibration date was 6/22/16 and is current. The TLS350 showed no leak alarms at the beginning and the end of the inspection. Deflector plates were observed installed at the dispensers above the UDC sumps to properly convey any fuel releases into the sumps. System set up and alarm history reports were reviewed and returned to the service technician. The 2 STP sumps were dry, sensors at their low points, and piping test boots were separated to provide proper communication. 3 spill buckets passed their required one-hour lake tests. 2 overflow alarm sensors were programmed to alarm at 90% of tank capacity and properly provided visual and audible alarms when tested. 3 tank annular space alarms provided audible and visual alarms when tested water. 1 piping sensor in UDC 13/14 an

Eval Notes: Annual underground storage tank inspection was performed on this date. The annual monitoring certification was performed by Chris Bishop. All of his required certifications are current. The VMI LDT-890 2-year calibration date = 6/21/2012. "All Functions Normal" was displayed at the TLS-350 control panel at the beginning and end of the inspection. Indicator lights at the alarm panel were not working and were replaced by the service technician. The system set-up and alarm history reports were obtained from the service technician and were reviewed. The 87 and 91 turbine sumps plus the 7 UDC sumps were inspected and were dry. The 2 turbine sump sensors were positioned at their low points plus the product piping test boots were separated to allow communication to occur between the product piping and the sump sensors. The following sensors were tested and provided audible and visual alarms: 3 tank annular space sensors (87, 91, used oil), 2 turbine sump sensors (87 and [Truncated])

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.  
Violation Notes: This is a repeat violation. Certification of Financial Responsibility (CFR) dated 4/14/2016 shows incorrect per-occurrence coverage amount in Sections A and C. Required financial responsibility for petroleum marketers is \$995,000 per occurrence and annual aggregate (\$495,000 per occurrence coverage is allowed only for non-marketers). Section C does not state that UST Cleanup Fund covers corrective action. Upload corrected CFR to California Environmental Reporting System (CERS) website and submit within 30 days for all 3 of your gas stations.

Violation Description: UST Program - Design/Construction - For use of Local Ordinance only.  
Violation Notes: In February of this year, dispenser conversion frames were used to attach new Gilbarco dispensers to the station's existing under dispenser containment (UDC) sumps. The Gilbarco dispensers are significantly larger than the previous dispensers, so the UDC manufacturer, S. Bravo Systems, provides metal fluid diversion inserts with the conversion frames to channel leaks from piping and fuel filters inside the dispensers that overhang the areas not directly above the UDC openings into the UDC. During this inspection, none of the diversion inserts were installed, so leaks from the fuel filters and some of the piping inside the dispensers will not be secondarily contained. Immediately replace the fluid diversion inserts and keep them in place at all times.

Violation Notes: This is an uncorrected violation originally cited in the 11/24/2015 Official Notice of Inspection. The dispenser conversion frames for the 6 Gilbarco Encore dispensers have not been equipped with the required S. Bravo Systems "Deflector Plates" to direct fuel releases from piping and filters inside the dispensers into the monitored under dispenser containment (UDC) sumps. Deflector plates are available from local distributors of S. Bravo Systems' equipment. This is a significant UST violation. Failure to provide required secondary containment as directed may result in your tanks being Red Tagged to prevent fuel deliveries. Once installed, the deflector plates shall be kept in place at all times except when temporary removal is required for equipment maintenance and testing.

Eval Type: Routine done by local agency  
Eval Notes: Inspection began on 11/16/2015 and ended today. All underground

storage tank (UST) system leak detection equipment was tested on 11/16/2015 by UST Service Technician Christopher Bishop of Confidence UST Services, Inc. and functioned properly. Mr. Bishop has current ICC California UST Service Technician certification (exp. 4/30/2016), Veeder-Root Level 4 certification (exp. 5/15/2016), and Vaporless Manufacturing (VMI) LDT-890 line leak detector tester certification (exp. 8/13/2017). As noted above, his Franklin Fueling Systems FE Petro Submersible Pumping Systems (line leak detector) certification has expired. The 3 Veeder-Root model 794390-420 tank annular sensors were tested using water to obtain audible and visual fuel alarms on the Veeder-Root TLS-350 console. Three Veeder-Root model 794380-208 sensors monitoring the 2 submersible turbine pump (STP) sumps and the

**Violations:**

Site ID: 27683  
Site Name: EL CAMINO 76  
Violation Date: 11-18-2014  
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)  
Violation Description: Failure to maintain all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment.  
Violation Notes: Returned to compliance on 11/18/2014. THE 87 TURBINE PUMP DID NOT SHUTDOWN AS REQUIRED WHEN THE 87 PIPING SECONDARY CONTAINMENT SENSOR WAS TESTED. THE UST SERVICE TECHNICIAN DETERMINED IT WAS DUE TO THE RELAY SWITCH BEING STUCK. AFTER CLEANING THE RESIDUE OFF OF THE RELAY SWITCH IT WORKED PROPERLY. NO FURTHER ACTION REQUIRED.

Violation Program: UST  
Violation Source: CERS

Site ID: 27683  
Site Name: EL CAMINO 76  
Violation Date: 11-24-2015  
Citation: Un-Specified  
Violation Description: UST Program - Design/Construction - For use of Local Ordinance only. In February of this year, dispenser conversion frames were used to attach new Gilbarco dispensers to the station's existing under dispenser containment (UDC) sumps. The Gilbarco dispensers are significantly larger than the previous dispensers, so the UDC manufacturer, S. Bravo Systems, provides metal fluid diversion inserts with the conversion frames to channel leaks from piping and fuel filters inside the dispensers that overhang the areas not directly above the UDC openings into the UDC. During this inspection, none of the diversion inserts were installed, so leaks from the fuel filters and some of the piping inside the dispensers will not be secondarily contained. Immediately replace the fluid diversion inserts and keep them in place at all times.

Violation Notes: certification to the CUPA within 30 days of completion of the test Christopher Bishop's Franklin Fueling Systems FE Petro Submersible Pumping Systems (line leak detector) certification expired on 10/23/2014, so the line leak detector testing he performed on 11/18/2014 and 11/16/2015 is not valid. Have the LLDs retested within 30 days by a technician with current manufacturer's training certification and submit a copy of the testing documentation within 30 days of the test date. Ensure the technicians for future testing have all required training and certifications.

Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.

Violation Notes: Returned to compliance on 01/03/2014. Observed 2 x 55-gallon used filter drums in the outside rear storage area that have rusted lids and the lids were not properly sealed to the containers. Replace the lids with ones that are in good condition and use the drum rings to seal the lids to the containers.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).

Violation Notes: This is an uncorrected violation originally cited in the 11/24/2015 Official Notice of Inspection. The dispenser conversion frames for the 6 Gilbarco Encore dispensers have not been equipped with the required S. Bravo Systems "Deflector Plates" to direct fuel releases from piping and filters inside the dispensers into the monitored under dispenser containment (UDC) sumps. Deflector plates are available from local distributors of S. Bravo Systems' equipment. This is a significant UST violation. Failure to provide required secondary containment as directed may result in your tanks being Red Tagged to prevent fuel deliveries. Once installed, the deflector plates shall be kept in place at all times except when temporary removal is required for equipment maintenance and testing.

Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)  
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).  
Violation Notes: Alarm history reports were not attached to the monthly DUSTO Inspection reports for August, September, and October 2017.

Eval Type: Other, not routine, done by local agency  
Eval Notes: A follow-on inspection was performed today from the previous 11/24/15 UST inspection to witness the re-testing of LLDs that were originally tested by Chris Bishop. Mr. Bishop's certifications had expired and previous testing that had been performed was not valid. Mr. Bishop's required certifications are now current and today's re-testing was acceptable. 2 mechanical LLDs were tested at leak rates of 3 gph at 10 psi and passed. Send a copy of the testing report to our office within 30 days.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Evaluation:**

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-13-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency

Eval Notes: Annual Monitoring Certification was performed by Chad White. All of his required certifications are current. Monitoring panel indicated "All Functions Normal" at the beginning and end of the inspection. LinkedIn took over control of the building in December 2015. The underground tank system consists of a diesel suction system with one supply piping run to a day tank in the emergency generator room and then return & supply piping between the day tank and the emergency generator. There are three sensors in the system; one that monitors the piping in the generator room, one that monitors the supply piping in the tank top piping sump, and one that monitors the tank annular space. All 3 sensors provided audible and visual alarms when tested. All sensors were positioned in the low points of containment. In addition, there is a remote alarm in the security room on the ground floor that also provided audible & visual alarms when the 3 sensors were tested. The spill bucket [Truncated]

There are three sensors in the system; one that monitors the piping in the generator room, one that monitors the supply piping in the tank top piping sump, and one that monitors the tank annular space. All 3 sensors provided audible and visual alarms when tested. All sensors were positioned in the low points of containment. In addition, there is a remote alarm in the security room on the ground floor that also provided audible & visual alarms when the 3 sensors were tested. The spill bucket passed its one-hour lake test. Flapper [Truncated]

Evaluation:

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-13-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Annual Monitoring Certification was performed by Chad White. All of his required certifications are current. Monitoring panel indicated "All Functions Normal" at the beginning and end of the inspection. LinkedIn took over control of the building in December 2015. The underground tank system consists of a diesel suction system with one supply piping run to a day tank in the emergency generator room and then return & supply piping between the day tank and the emergency generator. There are three sensors in the system; one that monitors the piping in the generator room, one that monitors the supply piping in the tank top piping sump, and one that monitors the tank annular space. All 3 sensors provided audible and visual alarms when tested. All sensors were positioned in the low points of containment. In addition, there is a remote alarm in the security room on the ground floor that also provided audible & visual alarms when the 3 sensors were tested. The spill bucket [Truncated]

. Waste code: 122  
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 141  
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 214  
. Waste name: Unspecified solvent mixture

. Waste code: 311  
. Waste name: Pharmaceutical waste

. Waste code: 331  
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001  
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002  
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

**FINDS:**

Registry ID: 110002931061

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:  
 Site ID: 109630  
 CERS ID: 10076677  
 CERS Description: RCRA LQ HW Generator

**Violations:**

Site ID: 109630  
 Site Name: CVS Pharmacy #9684  
 Violation Date: 01-12-2017  
 Citation: 22 CCR 12 66262.23(a)(4) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)(4)  
 Violation Description: Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.  
 Violation Notes: Returned to compliance on 01/27/2017. Generator failed to submit the "generator's initial copy" of the uniform hazardous waste manifests.  
 Violation Division: Santa Clara County Environmental Health  
 Violation Program: HWLQG  
 Violation Source: CERS

Site ID: 109630  
 Site Name: CVS Pharmacy #9684  
 Violation Date: 01-12-2017  
 Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)  
 Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.  
 Violation Notes: Observed numerous manifests indicating that facility shipped a non-RCRA hazardous waste which does not have a U.S. DOT description but failed to provide a generic name of the waste and/or the phrase Non-RCRA Hazardous Waste, Solid or Non-RCRA Hazardous Waste, Liquid . [CCR 66262.23]. See manifest # 008666715FLE shipped on 9-15-2016 or 008628632FLE shipped on 6-27-16 for an example.

Evaluation:

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-12-2017  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Stand-alone store and pharmacy. Store generates various hazardous wastes. Store inventory includes many hazardous materials that, if and when they become wastes, would be state or federal hazardous wastes. Examples include: Aerosols (sunscreen, pesticide, muscle rub, skin protectants), insecticides, Cleaning (eg corrosive CLR, Lime away), beauty products containing hydrogen peroxide, zinc based skin protectants, metal containing vitamins, phenol containing throat spray, rubbing alcohol, etc. The pharmacy generates waste pharmaceuticals and examples of potential RCRA hazardous wastes include: insulin (cresol), Warfarin, Selenium. CVS has a barcode scanning system directing pharmacy staff where to place unwanted pharmaceuticals. Per pharmacist Eunho Im, unwanted and expired items and empty warfarin containers are placed in a tray and are sorted 1-2 times per month. They are eventually inventoried and placed in the hazardous waste pharmaceutical container. NOTE: PERFORM [Truncated]

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

CPS-SLIC:

Region: STATE  
**Facility Status: Open - Verification Monitoring**  
Status Date: 04/20/2018  
Global Id: T10000005126  
Lead Agency: SANTA CLARA COUNTY LOP  
Lead Agency Case Number: 06S2W20D03s  
Latitude: 37.4022244786568  
Longitude: -122.113659874344  
Case Type: Cleanup Program Site  
Case Worker: AC  
Local Agency: SANTA CLARA COUNTY LOP  
RB Case Number: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affected: Soil, Soil Vapor  
Potential Contaminants of Concern: Tetrachloroethylene (PCE)  
Site History: Release of PCE from a dry cleaner. A dry cleaner known to use PCE operated at this site from 1988-2002. It is reported that subsequent dry cleaners at this location did not use PCE. PCE has been detected in soil vapor.

**CERS HAZ WASTE:**

Site ID: 385390  
CERS ID: 10356844  
CERS Description: Hazardous Waste Generator

**Violations:**

Site ID: 385390  
Site Name: ARCO AM/PM  
Violation Date: 10-01-2013  
Citation: HSC 6.95 Multiple Sections - California Health and Safety Code, Chapter 6.95, Section(s) Multiple Sections  
Business Plan Program - Administration/Documentation - General  
Violation Description: Observed a rack of 14, 5 gal propane containers that were not disclosed on the HMBP. Include these BBQ sized propane tanks in addition to the already disclosed 500 gal propane tank. Additionally, the underground storage tanks that are currently reported at 10,000 gallons actually are 12,000 gallon tanks. This should be accurately reflected in your hazardous materials inventory.

Eval Date: 03-27-2015  
Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: A SB-989 Secondary Containment testing inspection was performed on this date. Testing was performed by Randy Johnson. All of his required certifications were reviewed and were current including his Caldwell Accelerated Testing certification which has an expiration date of January 2017. The following components were tested using the Caldwell accelerated test method for 30 minutes: 4 UDCs at a depth of 10 inches which were above the product piping penetrations. Dispenser UDC 5/6 failed on the first attempt and then passed on the second attempt. Test result = pass on the first attempt for all other UDCs 3 turbine sumps at a level 2 inches above the highest product piping penetration. Test result = pass 3 product lines were tested at 5 psi nitrogen for one hour. Test result = pass. 3 tank annular spaces were tested at -10 psi vacuum for one hour. The 91 and 87 siphon tank passed their one-hour tests. At the conclusion of the inspection, the 87 master tank was [Truncated]

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: Onsite to witness testing for the construction project to convert an existing UST from gasoline to diesel, install new diesel piping, two new UDC pans and all new dispensers. Alex Puentes was onsite today overseeing this construction project. Certifications for this project are on file with the permit application. On this date I observed the following testing: - Diesel secondary containment piping from tank to Dispensers 1/2 and 3/4: pressure test at 5 psi for one hour. While under pressure the secondary containment pipe fittings were soap tested with no leaks observed. Following the one hour pressure test, the gauge (connected at the piping end in the STP sump) was observed while the pressure was slowly released from the valve stems on the penetration fittings/boots (used to isolate the secondary containment piping) in UDC's 1/2 and 3/4. Test results = Pass. - Diesel STP sump: hydrostatic test using an Incon TS-STC system. Test results = Pass. The UDC s for [Truncated]

Eval Notes: COMMENTS: On site 10-1-13 to oversee annual UST monitoring system and spill bucket testing. Testing was conducted by Al Milburn from EPIC Compliance Systems, Inc. Mr. Milburn holds valid/current ICC, Veeder-Root, Red Jacket and VMI certifications. Site consists of three tanks (87-1, 87-(Siphon), and 91) and 4 dispenser pairs. Monitoring panel is a Veeder-Root TLS 350 panel. Sumps, annular spaces, and UDCs are monitored by veeder-Root sensors. Sumps were dry upon arrival with exception of the 91 STP sump which had about 1/4 inch of standing liquid. All liquid was removed by technicians. TESTING: The sumps (STP and Fill), annular, and UDC sensors were tested with water and provided audible and visible alarms in addition to positive shutdown of the turbines. Sensor out and power out (fail safe) provided positive shutdown of the turbines. Overfill protection is provided by Audible visual alarm at 90%. Red Jacket ELLDs installed on turbines were tested at dispenser [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 10-08-2014  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: The monitoring certification was performed by Al Milburn. Service Technician ICC 878949. All of his required certifications were reviewed and were current. VMI LDT-890 tester 2-year calibration date = 2/19/2014. All of the following components provided audible and visual alarms plus positive shut-down when tested: 3 tank annular space sensors, 3 fill sumps, 3 turbine/piping sumps, and 4 UDC dispenser pan sumps. The 2 turbines also provided positive shut-down under conditions of sensor-out and failsafe. The 87 electronic line leak detector tested from dispenser 7/8 properly detected leaks when tested at 3 gph & 10 psi. 3 overflow alarms set at 90% provided audible and visual alarms when tested. 3 spill buckets passed their one-hour lake tests. The emergency shut-off switch properly shut down the 2 turbines when tested. Recommend that you provide an "emergency shutoff switch with arrow" sign on the side of the building that faces dispensers 5/6 & 7/8 [Truncated]

Citation: HSC 6.95 Multiple Sections - California Health and Safety Code, Chapter 6.95, Section(s) Multiple Sections  
Business Plan Program - Administration/Documentation - General  
Violation Description: Observed a rack of 14, 5 gal propane containers that were not disclosed on the HMBP. Include these BBQ sized propane tanks in addition to the already disclosed 500 gal propane tank. Additionally, the underground storage tanks that are currently reported at 10,000 gallons actually are 12,000 gallon tanks. This should be accurately reflected in your hazardous materials inventory.

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On-site today to witness annual monitoring certification, spill bucket testing, and perform an inspection of the underground storage tank (UST) system. Testing performed by Brian Dunahay of Epic Compliance Systems and has all required certifications to perform such testing. All components and leak detection devices that were witnessed performed as required. Did not remain on-site to witness testing of diesel electronic line leak detector. Overfill was not witnessed but was to be demonstrated by removing probes and moving float up to 90% and hearing a audible alarm. Reviewed the following documentation: Permit Monitoring Plan Response Plan Dusto Agreement Financial Responsibility Monthly DO Inspections Training Records System Set-up & Alarm History NOTE: In next CERS submission, do not indicate "yes" next to "UDC Monitoring Stops Flow of Product at Dispenser" in the UDC monitoring plan section for all 3 tanks.

Eval Type: Routine done by local agency  
Eval Notes: The monitoring certification was performed by AI Milburn. Service Technician ICC 878949. All of his required certifications were reviewed and were current. VMI LDT-890 tester 2-year calibration date = 2/19/2014. All of the following components provided audible and visual alarms plus positive shut-down when tested: 3 tank annular space sensors, 3 fill sumps, 3 turbine/piping sumps, and 4 UDC dispenser pan sumps. The 2 turbines also provided positive shut-down under conditions of sensor-out and failsafe. The 87 electronic line leak detector tested from dispenser 7/8 properly detected leaks when tested at 3 gph & 10 psi. 3 overflow alarms set at 90% provided audible and visual alarms when tested. 3 spill buckets passed their one-hour lake tests. The emergency shut-off switch properly shut down the 2 turbines when tested. Recommend that you provide an "emergency shutoff switch with arrow" sign on the side of the building that faces dispensers 5/6 & 7/8 [Truncated]

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violation Notes: Returned to compliance on 11/05/2014. According to the manager, the site identification name on the Business Owner Operator page in CERS should be changed from ARCO AM/PM to Grand Petro Los Altos. Also, change the owner name in CERS from Grand Petroleum to Grand Petroleum INC. The hazardous waste generator box on the Business Activities page in CERS should be checked "yes" instead of "no". Please re-submit these changes in CERS in order to update your electronic submittal in CERS.

Eval Type: Other, not routine, done by local agency  
Eval Notes: A SB-989 Secondary Containment testing inspection was performed on this date. Testing was performed by Randy Johnson. All of his required certifications were reviewed and were current including his Caldwell Accelerated Testing certification which has an expiration date of January 2017. The following components were tested using the Caldwell accelerated test method for 30 minutes: 4 UDCs at a depth of 10 inches which were above the product piping penetrations. Dispenser UDC 5/6 failed on the first attempt and then passed on the second attempt. Test result = pass on the first attempt for all other UDCs 3 turbine sumps at a level 2 inches above the highest product piping penetration. Test result = pass 3 product lines were tested at 5 psi nitrogen for one hour. Test result = pass. 3 tank annular spaces were tested at -10 psi vacuum for one hour. The 91 and 87 siphon tank passed their one-hour tests. At the conclusion of the inspection, the 87 master tank was [Truncated]

Eval Notes: COMMENTS: On site 10-1-13 to oversee annual UST monitoring system and spill bucket testing. Testing was conducted by AI Milburn from EPIC Compliance Systems, Inc. Mr. Milburn holds valid/current ICC, Veeder-Root, Red Jacket and VMI certifications. Site consists of three tanks (87-1, 87-(Siphon), and 91) and 4 dispenser pairs . Monitoring panel is a Veeder-Root TLS 350 panel. Sumps, annular spaces, and UDCs are monitored by veeder-Root sensors. Sumps were dry upon arrival with exception of the 91 STP sump which had about 1/4 inch of standing liquid. All liquid was removed by technicians. TESTING: The sumps (STP and Fill), annular, and UDC sensors were tested with water and provided audible and visible alarms in addition to positive shutdown of the turbines. Sensor out and power out (fail safe) provided positive shutdown of the turbines. Overfill protection is provided by Audible visual alarm at 90%. Red Jacket ELLDs installed on turbines were tested at dispenser [Truncated]

RB Case Number: Not reported  
File Location: Not reported  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
Site History: April 2011, employees noted that the freight elevator did not rise up to the floor level of the 2nd floor. Elevator maintenance company came out and added oil to the system and did not note a leak at that time. The release was reported to OES on 4/18/11. In May, the elevator jack was removed. Groundwater entered the elevator shaft and is normally pumped out with a sump pump to the sanitary sewer. The sump pump was shut off. The cylinder has been capped with a concrete slurry to stop the flow of groundwater into the elevator pit.

#3 Pipeline:	Not reported
#1 Vessel >= 300 Tons:	Not reported
#2 Vessel >= 300 Tons:	Not reported
#3 Vessel >= 300 Tons:	Not reported
Evacs:	Not reported
Injuries:	Not reported
Fatals:	Not reported
Comments:	Not reported
Description:	Released onto parking lot, local FD mobilized and disposed of the substance into a lot. Sears has contracted with All-Waste to dispose of sand and diesel in the proper way. Unknown cause of spill.

**FINDS:**

Registry ID: 110002836343

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: 21-067  
Local Agency: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S2W20E01f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline  
Site History: The Site is a former Unocal-branded service station, which was located at the northeast corner at the intersection of North San Antonio Road and Sherwood Avenue in Los Altos, California. Original (first generation) Site features included a station building, two 10,000-gallon gasoline underground storage tanks (USTs) located near the northwest corner of the Site, and two product dispenser islands. In 1985, the two 10,000-gallon gasoline USTs (second generation) were installed in the southwest corner of the Site. The station building, USTs (second generation), and dispenser islands were removed in 1992, and the Site remains a vacant lot except for a consists primarily of commercial and residential properties. Soil vapor extraction with air sparge were used to remediate the site.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018

. Waste name: BENZENE

Completed Document Type: Public Notice  
Completed Date: 01/26/2016  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 03/02/2017  
Comments: The soil vapor extraction system operated continuously on the site from April 2016 through October 2016. There was a 47-day shutdown for rebound assessment that followed and the system was briefly operated in December 2016 and January 2017. DTSC approved decommissioning of the soil vapor extraction system in a March 9, 2017 letter.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Pilot/Treatability Study Report  
Completed Date: 01/15/2015  
Comments: The Second Vapor-Extraction Pilot-Study Evaluation report presents the results of a soil vapor extraction pilot study that was conducted using one multi-phase extraction well for 8 days and 2 extraction wells for 7 days. This study was completed prior to DTSC becoming involved at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 01/11/2018  
Comments: The soil vapor extraction system operated from April 2016 to January 2017 and sampling showed that the removal action goal for PCE in soil gas for residential development at the Site has been achieved.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/17/2017  
Comments: The Soil Management Plan provides procedures for managing potentially contaminated soil excavated for the subterranean parking garage of the proposed development project.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 03/10/2017  
Comments: The report summarizes soil gas remediation activities at the Site since the soil vapor extraction (SVE) system was initially started in April 2016. A total of 16.7 pounds of tetrachloroethylene (PCE) was removed by the SVE system and soil gas concentrations beneath the Site are below the removal goal of 3,900 micrograms per cubic meter established for residential development.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 04/17/2017  
Comments: The Plan summarizes the results of soil sampling conducted at the Site to profile for disposal and/or reuse the soil that will be

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 12/15/2014  
Comments: The Phase I Environmental Site Assessment was conducted to identify  
recognized environmental conditions at the Site. The findings and  
conclusions of the Report were based on the results of a  
reconnaissance-level site visit and review of available and pertinent  
background information. This assessment was completed prior to DTSC  
becoming involved at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 12/15/2014  
Comments: The Additional Phase II Environmental Assessment report presents the  
results of subsurface soil-gas, soil, and groundwater sampling that  
was performed to evaluate the lateral and vertical extent of impact  
from PCE and other volatile organic compounds. These investigations  
were completed prior to DTSC becoming involved at the Site.

Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 07/02/2015  
Comments: The soil gas sampling included in the Additional Site Characterization Workplan was repeated due to leakage in the sampling equipment that occurred during the first sampling event.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Characterization Report  
Completed Date: 09/04/2015  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Workplan  
Completed Date: 03/04/2016  
Comments: Soil vapor extraction is identified in the Removal Action Workplan as the selected remedy for the Site to address tetrachloroethene and trichloroethene in soil vapor at the site and on an adjacent property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 03/02/2017  
Comments: The soil vapor extraction system operated continuously on the site from April 2016 through October 2016. There was a 47-day shutdown for rebound assessment that followed and the system was briefly operated in December 2016 and January 2017. DTSC approved decommissioning of the soil vapor extraction system in a March 9, 2017 letter.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Pilot/Treatability Study Report  
Completed Date: 01/15/2015  
Comments: The Second Vapor-Extraction Pilot-Study Evaluation report presents the results of a soil vapor extraction pilot study that was conducted using one multi-phase extraction well for 8 days and 2 extraction wells for 7 days. This study was completed prior to DTSC becoming involved at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 01/11/2018  
Comments: The soil vapor extraction system operated from April 2016 to January 2017 and sampling showed that the removal action goal for PCE in soil gas for residential development at the Site has been achieved.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/17/2017  
Comments: The Soil Management Plan provides procedures for managing potentially contaminated soil excavated for the subterranean parking garage of the proposed development project.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 03/10/2017  
Comments: The report summarizes soil gas remediation activities at the Site since the soil vapor extraction (SVE) system was initially started in April 2016. A total of 16.7 pounds of tetrachloroethylene (PCE) was removed by the SVE system and soil gas concentrations beneath the Site are below the removal goal of 3,900 micrograms per cubic meter established for residential development.

Completed Sub Area Name: Not reported  
Completed Document Type: Phase 1  
Completed Date: 12/15/2014  
Comments: The Phase I Environmental Site Assessment was conducted to identify recognized environmental conditions at the Site. The findings and conclusions of the Report were based on the results of a reconnaissance-level site visit and review of available and pertinent background information. This assessment was completed prior to DTSC becoming involved at the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 12/15/2014  
Comments: The Additional Phase II Environmental Assessment report presents the results of subsurface soil-gas, soil, and groundwater sampling that was performed to evaluate the lateral and vertical extent of impact from PCE and other volatile organic compounds. These investigations were completed prior to DTSC becoming involved at the Site.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste2: Contaminated Ground Water  
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.  
 Secondary Waste: Not reported  
 Secondary Waste Type: Not reported  
 Design Flow: 0  
 Baseline Flow: 0  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.  
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

CA BOND EXP. PLAN:  
 Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN  
 Project Revenue Source Company: Plessey, Inc.  
 Project Revenue Source Addr: 325 Westchester Avenue  
 Project Revenue Source City,St,Zip: White Plains, NY 10604  
 Project Revenue Source Desc: DHS has issued a remedial action order and Plessey has stipulated to comply with this order. DHS has budgeted \$50,000 for oversight and monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.  
 Site Description: From about the mid-1960s to 1981, Plessey manufactured electronic components. Chemical processes used included plating and etching. Wastewater was drained to underground storage tanks where material or waste was neutralized and stored prior to disposal.  
 Hazardous Waste Desc: Wastes include perchloroethylene (PCE), trichloroethylene (TCE), chromic acid and xylene.  
 Threat To Public Health & Env: Depth of the shallowest aquifer is about 32 feet. Ground water contamination and its potential impact on drinking water supplies is the primary concern.  
 Site Activity Status: Plessey Micro Sciences, Inc., retained a contractor and completed a preliminary investigation in June, 1987. Result of the investigation indicated ground water contamination by perchloroethylene, trichloroethylene and methylene chloride. A Phase II RI report was submitted September, 1988. It appears that further investigation will be required before the FS and RAP can be Started.

 Completed Sub Area Name: Not reported  
 Completed Document Type: Work Notice  
 Completed Date: 08/25/2017  
 Comments: The Work Notice was mailed to addresses on the project mailing list informing groundwater monitoring activity at off-site wells located on and adjacent to Towne Circle and on Ortega Avenue in the City of Mountain View.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Remedial Investigation Workplan  
 Completed Date: 05/05/2015  
 Comments: Shallow soil sampling will be conducted upon demolition of buildings at the site.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Remedial Action Plan Amendment  
 Completed Date: 12/08/2016  
 Comments: Cleanup actions as proposed in the Remedial Action Plan Amendment include excavation of an estimated 1,800 cubic yards of soil contaminated with metals and VOCs at depths up to 12 feet below ground surface for off-site disposal at permitted facilities, injection of chemical to enhance reductive dechlorination in groundwater at targeted areas, and establishment of a land use covenant to restrict groundwater usage and to require vapor intrusion mitigation systems for new buildings if necessary based on future data. Field activities are anticipated to be completed in four weeks.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Site Characterization Report  
 Completed Date: 07/29/2016  
 Comments: This investigation was conducted to collect shallow soil samples for laboratory analysis to delineate the extent of VOCs and metals, including hexavalent chromium, in shallow soil in preparation for site redevelopment.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report

MAP FINDINGS

Comments: Community Update for Draft Remedial Action Plan Amendment

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Design  
Completed Date: 12/20/2016  
Comments: The Remedial Implementation Workplan describes the field activities for excavation of contaminated soil and in-situ groundwater treatment injections at the former Plessey Micro System site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 12/16/2016  
Comments: DTSC published a display advertisement on the December 16, 2016 Mountain View Voice (page 3) announcing the approval of the Remedial Action Plan Amendment for cleanup activities at the Plessey Micro Science site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Work Notice  
Completed Date: 01/30/2017  
Comments: DTSC issued a Work Notice informing the public that the following cleanup activities will begin on 1/30/17 at the site: Excavation on the Plessey Site of an estimated 1,800 cubic yards of soil contaminated with metals and volatile organic compounds at varying depths to 12 feet below ground surface for off-site disposal at permitted facilities, Injection of Hydrogen Release Compound, a food grade substance, to enhance reductive dechlorination in groundwater at targeted areas both on the Plessey Site and along Towne Circle, and Establishment of a land use covenant to restrict groundwater usage and to require vapor intrusion mitigation systems for new buildings if necessary based on future data.

**PLESSEY MICRO SCIENCE (Continued)**

**S103981838**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Health & Safety Plan  
Completed Date: 01/12/2017  
Comments: DTSC has completed the review of the "Health and Safety Plan, Excavation and In-situ Groundwater Treatment" for the Plessey Micro Science site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/31/2017  
Comments: The Vapor Intrusion Mitigation Plan describes the design and installation of a sub-slab passive venting system coupled with a vapor barrier/gas membrane system beneath every new building within the Mora-Ortega Parcel encompassing approximately 5.15 acres.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 08/29/2017  
Comments: ERRG conducted groundwater monitoring at off-site wells.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 12/14/2017  
Comments: ERRG conducted a groundwater monitoring event in August 2017 at 17 groundwater monitoring wells adjacent to the Plessey Micro Science site. This is the first sampling event following in-situ injections at the Plessey site in April and May 2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 05/22/2018  
Comments: The Completion Report summarizes the following remediation activities conducted at the site: 1. Excavation and off-site disposal of soil contaminated with hexavalent chromium, cobalt, nickel, and volatile organic compounds (VOCs); and 2. In-situ treatment of VOC-contaminated groundwater to reduce chemical concentrations. These activities were performed pursuant to the January 2017 DTSC-approved "Remedial Implementation Workplan".

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 04/20/2018  
Comments: The Work Plan proposes soil gas sampling at an approximately 5.2-acre residential development area located east of the Mora Drive and Ortega Avenue intersection in Mountain View, California. DTSC is overseeing environmental investigation and cleanup of a 1.0-acre parcel, identified as the Plessey Micro Science site, within the 5.2-acre residential development area. Since the Work Plan proposes several soil gas sampling locations within the Plessey Micro Science site, DTSC commented on the Work Plan.

Completed Document Type: CEQA - Responsible Agency Review  
Completed Date: 12/08/2016  
Comments: The project consists of DTSC approval of the Remedial Action Plan Amendment for Plessey Micro Science prior to residential development. The proposed cleanup actions include soil excavation, groundwater injection, and institutional controls. DTSC prepared a Statement of Findings concluding that the project will not result in significant and unavoidable effects to the environment; therefore, DTSC approved the Notice of Determination. DTSC filed the approved Notice of Determination with the California Office of Planning and Research on 12/8/16.

Completed Document Type: Remedial Action Completion Report  
Completed Date: 02/07/2000  
Comments: Completed RA. Soil vapor extraction (SVE) and air inlet wells were abandoned. 600 cubic yards of soil was excavated in the former SVE area, aerated and redeposited.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Manual  
Completed Date: 04/15/1997  
Comments: Amended Operation and Maintenance Plan for air stripper

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 09/12/1996  
Comments: Approved design for horizontal extraction wells to enhance the existing remedial system. The design was not implemented due to access issues.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/16/1993  
Comments: Completed RA. Groundwater extraction at Well T-6 by the existing remedial system was stopped due to detection of dense non-aqueous phase liquid (DNAPL) of trichloroethylene. The DNAPL was pumped and collected in a baker tank and treated onsite.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/24/1993  
Comments: Completed RA. Soil vapor extraction/treatment and groundwater extraction/treatment system constructed with three groundwater extraction wells, and 34 soil vapor extraction and 25 air inlet wells were installed. Soil vapor was treated using carbon absorption. Groundwater was treated using ultra violet light/hydrogen peroxide. The units were constructed inside the building at 2296 Mora Drive and include a volatile organic compound and water separator unit, a UV/peroxide unit, and a liquid carbon absorption unit. Treated water is discharged to the sanitary sewer under permit from the City of Mountain View or to the storm drain under a permit from the Regional Water Quality Control Board.

Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 12/01/1985  
Comments: Completed PA. In January 1982, samples were collected from standing water in two of the tanks and the results detected perchloroethylene (PCE), chromium, and xylene. Investigations were conducted to delineate the lateral extent of the soil and groundwater contamination originating from releases at the tanks. Trichloroethylene (TCE), PCE, dichloroethylene (DCE), benzene, toluene, xylene and ethylbenzene were detected in the groundwater. These chemicals and chromium were also detected in the soils near the tanks.

Completed Document Type: Work Notice  
Completed Date: 02/04/2015  
Comments: March 2015 GW monitoring

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Work Notice  
Completed Date: 08/25/2017  
Comments: The Work Notice was mailed to addresses on the project mailing list informing groundwater monitoring activity at off-site wells located on and adjacent to Towne Circle and on Ortega Avenue in the City of Mountain View.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Workplan  
Completed Date: 05/05/2015  
Comments: Shallow soil sampling will be conducted upon demolition of buildings at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan Amendment  
Completed Date: 12/08/2016  
Comments: Cleanup actions as proposed in the Remedial Action Plan Amendment include excavation of an estimated 1,800 cubic yards of soil contaminated with metals and VOCs at depths up to 12 feet below ground surface for off-site disposal at permitted facilities, injection of chemical to enhance reductive dechlorination in groundwater at targeted areas, and establishment of a land use covenant to restrict groundwater usage and to require vapor intrusion mitigation systems for new buildings if necessary based on future data. Field activities are anticipated to be completed in four weeks.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Characterization Report  
Completed Date: 07/29/2016  
Comments: This investigation was conducted to collect shallow soil samples for laboratory analysis to delineate the extent of VOCs and metals, including hexavalent chromium, in shallow soil in preparation for site redevelopment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 06/15/2015  
Comments: Based on the results of the March 2015 monitoring event, the following actions are recommended: 1. Continue groundwater monitoring at a reduced schedule (e.g., semiannually) to monitor VOC

Completed Document Type: Health & Safety Plan  
Completed Date: 01/12/2017

MAP FINDINGS

**PLESSEY MICRO SCIENCE (Continued)**

**S103981838**

Comments: DTSC has completed the review of the "Health and Safety Plan, Excavation and In&#8208;Site Groundwater Treatment" for the Plessey Micro Science site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 05/31/2017  
Comments: The Vapor Intrusion Mitigation Plan describes the design and installation of a sub-slab passive venting system coupled with a vapor barrier/gas membrane system beneath every new building within the Mora-Ortega Parcel encompassing approximately 5.15 acres.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 08/29/2017  
Comments: ERRG conducted groundwater monitoring at off-site wells.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 12/14/2017  
Comments: ERRG conducted a groundwater monitoring event in August 2017 at 17 groundwater monitoring wells adjacent to the Plessey Micro Science site. This is the first sampling event following in-situ injections at the Plessey site in April and May 2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 05/22/2018  
Comments: The Completion Report summarizes the following remediation activities conducted at the site: 1. Excavation and off-site disposal of soil contaminated with hexavalent chromium, cobalt, nickel, and volatile organic compounds (VOCs); and 2. In-situ treatment of VOC-contaminated groundwater to reduce chemical concentrations. These activities were performed pursuant to the January 2017 DTSC-approved "Remedial Implementation Workplan".

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 04/20/2018  
Comments: The Work Plan proposes soil gas sampling at an approximately 5.2&#8208;acre residential development area located east of the Mora Drive and Ortega Avenue intersection in Mountain View, California. DTSC is overseeing environmental investigation and cleanup of a 1.0&#8208;acre parcel, identified as the Plessey Micro Science site, within the 5.2&#8208;acre residential development area. Since the Work Plan proposes several soil gas sampling locations within the Plessey Micro Science site, DTSC commented on the Work Plan.

Comments: Not reported

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: CEQA - Responsible Agency Review

Completed Date: 12/08/2016

Comments: The project consists of DTSC approval of the Remedial Action Plan Amendment for Plessey Micro Science prior to residential development. The proposed cleanup actions include soil excavation, groundwater injection, and institutional controls. DTSC prepared a Statement of Findings concluding that the project will not result in significant and unavoidable effects to the environment; therefore, DTSC approved the Notice of Determination. DTSC filed the approved Notice of Determination with the California Office of Planning and Research on 12/8/16.

Completed Sub Area Name: Not reported  
Completed Document Type: State/Federal Funded Site Work Order  
Completed Date: 11/29/2016  
Comments: Work Order 001 for Contract 16-T4229 authorizes ERG to prepare a remedial implementation workplan, conduct fieldwork, prepare a completion report, and submit a letter report following each of the four groundwater monitoring events.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 01/12/2000  
Comments: Approved Design. The remedial enhancement plan to address full plume containment and/or groundwater remediation was approved. Four wells will be installed further downgradient at the northern boundary of the TRW/Vidar site. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 10/13/1999  
Comments: Approved Remedial Design for source control remedial enhancement to address soil and groundwater contamination near the source areas. Ten dual-phase vertical extraction wells will be installed within the Site near the former underground tank locations. The extraction wells will be connected to the existing treatment system.

Completed Area Name: PROJECT WIDE

Completed Date: 04/15/1997  
Comments: Amended Operation and Maintenance Plan for air stripper

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 09/12/1996  
Comments: Approved design for horizontal extraction wells to enhance the existing remedial system. The design was not implemented due to access issues.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/16/1993  
Comments: Completed RA. Groundwater extraction at Well T-6 by the existing remedial system was stopped due to detection of dense non-aqueous phase liquid (DNAPL) of trichloroethylene. The DNAPL was pumped and collected in a baker tank and treated onsite.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/24/1993  
Comments: Completed RA. Soil vapor extraction/treatment and groundwater extraction/treatment system constructed with three groundwater extraction wells, and 34 soil vapor extraction and 25 air inlet wells were installed. Soil vapor was treated using carbon absorption. Groundwater was treated using ultra violet light/hydrogen peroxide. The units were constructed inside the building at 2296 Mora Drive and include a volatile organic compound and water separator unit, a UV/peroxide unit, and a liquid carbon absorption unit. Treated water is discharged to the sanitary sewer under permit from the City of Mountain View or to the storm drain under a permit from the Regional Water Quality Control Board.

Comments: Approved RAP. Soil cleanup by soil vapor extraction/treatment with activated carbon, and groundwater extraction/ treatment by ultra-violet peroxidation which was constructed during the pilot study.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 10/25/1991  
Comments: Completed RA. Five concrete underground tanks (A,B,C,D and F) were removed from a location behind the commercial buildings located at 2274-2296 Mora Drive. Tank E was removed in August 1989. The excavated pits were backfilled with clean fill approximately 455 cubic yards of soil were removed, aerated and disposed offsite. A soil vapor extraction system was installed to remediate the remaining volatile organic compounds in soil in other site areas. Initiated August 17, 1991 and completed October 25, 1991.

water in two of the tanks and the results detected perchloroethylene (PCE), chromium, and xylene. Investigations were conducted to delineate the lateral extent of the soil and groundwater contamination originating from releases at the tanks. Trichloroethylene (TCE), PCE, dichloroethylene (DCE), benzene, toluene, xylene and ethylbenzene were detected in the groundwater. These chemicals and chromium were also detected in the soils near the tanks.

Completed Date: 06/29/2001  
Comments: Completed RIFS. The results did not indicate a groundwater contamination source on the property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 01/10/1995  
Comments: Completed RA. Approximately 1.5 cubic yards of soil was excavated and disposed off-site. The building was steam cleaned. In addition, 3 cubic yards of ground concrete was disposed off-site as part of the removal of the concrete sump and clarifier.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 11/13/1992  
Comments: Approved PEA. Shallow soil samples showed copper as high as 7,900 ppm and lead as high as 2,000 ppm. Other metal contaminants were also found in soil along with tetrachloroethylene as high as 940 ppm, and 1,1,1-TCA as high as 440 ppm. Although Symtron is located in an area known to have groundwater problems, no groundwater investigation was conducted.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 09/24/1991  
Comments: Completed Site Screening. Copper, lead and volatile organics have been detected in the soil. Site referred to DTSC by Mountain View Fire Department. 2227 Mora Drive address housed Symtron's hazardous materials storage area where acids, bases, oxidizers, & flammable liquids, as well as copper animated plates, were kept. 2235 Mora housed offices, photo darkroom, wet and dry quality control labs, and process operations. 2245 Mora operations included copper etching and black oxide operations & clean rooms used for Symtron's dry process. Symtron operated an onsite waste water treatment plant. Treated waste water and effluent went directly to the Mountain View sewer via an inground sump which served as a final clarifier. Closure sampling was conducted in March 1991 and included soil concrete chip, and wipe samples. Copper was detected as high as 7,900 ppm and 1,600 ppm in soil and concrete chip samples respectively. Lead was detected as high as 1,000 ppm in soil. Volatile organic compounds (VOCs) all tested below 1 ppm.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 09/27/2012  
Comments: Presents results of soil samples collected from this site, and soil and soil gas results from adjacent sites. This work not conducted under DTSC oversight.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported

**FINDS:**

Registry ID: 110002146375

**Environmental Interest/Information System**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/17/2018	Source: EPA
Date Data Arrived at EDR: 08/09/2018	Telephone: N/A
Date Made Active in Reports: 09/07/2018	Last EDR Contact: 10/04/2018
Number of Days to Update: 29	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

EPA Region 9  
Telephone: 415-947-4246

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/17/2018	Source: EPA
Date Data Arrived at EDR: 08/09/2018	Telephone: N/A
Date Made Active in Reports: 09/07/2018	Last EDR Contact: 10/04/2018
Number of Days to Update: 29	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/17/2018  
Date Data Arrived at EDR: 08/09/2018  
Date Made Active in Reports: 09/07/2018

Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Telephone: 703-603-8704  
Last EDR Contact: 07/06/2018  
Next Scheduled EDR Contact: 10/15/2018  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/17/2018  
Date Data Arrived at EDR: 08/09/2018  
Date Made Active in Reports: 09/07/2018

Last EDR Contact: 10/04/2018  
Next Scheduled EDR Contact: 10/29/2018  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/17/2018	Source: EPA
Date Data Arrived at EDR: 08/09/2018	Telephone: 800-424-9346
Date Made Active in Reports: 09/07/2018	Last EDR Contact: 10/04/2018
Number of Days to Update: 29	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 09/19/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 09/19/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 09/19/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 09/19/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019
	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 09/19/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/14/2018	Source: Department of the Navy
Date Data Arrived at EDR: 05/18/2018	Telephone: 843-820-7326
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 07/16/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 11/26/2018
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 08/28/2018
Number of Days to Update: 17	Next Scheduled EDR Contact: 12/10/2018
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 08/28/2018
Number of Days to Update: 17	Next Scheduled EDR Contact: 12/10/2018
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/18/2018

Date Data Arrived at EDR: 06/27/2018

Date Made Active in Reports: 09/14/2018

Number of Days to Update: 79

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 09/25/2018

Next Scheduled EDR Contact: 01/07/2019

Data Release Frequency: Quarterly

## **State- and tribal - equivalent NPL**

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 07/30/2018

Date Data Arrived at EDR: 07/31/2018

Date Made Active in Reports: 09/07/2018

Number of Days to Update: 38

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/31/2018

Next Scheduled EDR Contact: 11/12/2018

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/30/2018

Date Data Arrived at EDR: 07/31/2018

Date Made Active in Reports: 09/07/2018

Number of Days to Update: 38

Source: Department of Toxic Substances Control

Next Scheduled EDR Contact: 11/26/2018

Data Release Frequency: Quarterly

## **State and tribal leaking storage tank lists**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LUST REG 1: Active Toxic Site Investigation

Del Norte, Humboldt, Lake, Mendocino, Modoc, Siskiyou, Sonoma, Trinity counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 02/01/2001	Source: California Regional Water Quality Control Board North Coast (1)
Date Data Arrived at EDR: 02/28/2001	Telephone: 707-570-3769
Date Made Active in Reports: 03/29/2001	Last EDR Contact: 08/01/2011
Number of Days to Update: 29	Next Scheduled EDR Contact: 11/14/2011
	Data Release Frequency: No Update Planned

## LUST REG 7: Leaking Underground Storage Tank Case Listing

Leaking Underground Storage Tank locations. Imperial, Riverside, San Diego, Santa Barbara counties.

Date of Government Version: 02/26/2004	Source: California Regional Water Quality Control Board Colorado River Basin Region (7)
Date Data Arrived at EDR: 02/26/2004	Telephone: 760-776-8943
Date Made Active in Reports: 03/24/2004	Last EDR Contact: 08/01/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 11/14/2011
	Data Release Frequency: No Update Planned

## LUST: Leaking Underground Fuel Tank Report (GEOTRACKER)

Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/10/2018	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/12/2018	Telephone: see region list
Date Made Active in Reports: 10/08/2018	Last EDR Contact: 09/12/2018
Number of Days to Update: 26	Next Scheduled EDR Contact: 12/24/2018
	Data Release Frequency: Quarterly

## LUST REG 9: Leaking Underground Storage Tank Report

Orange, Riverside, San Diego counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 03/01/2001	Source: California Regional Water Quality Control Board San Diego Region (9)
Date Data Arrived at EDR: 04/23/2001	Telephone: 858-637-5595
Date Made Active in Reports: 05/21/2001	Last EDR Contact: 09/26/2011
Number of Days to Update: 28	Next Scheduled EDR Contact: 01/09/2012
	Data Release Frequency: No Update Planned

## LUST REG 6V: Leaking Underground Storage Tank Case Listing

Leaking Underground Storage Tank locations. Inyo, Kern, Los Angeles, Mono, San Bernardino counties.

Date of Government Version: 06/07/2005	Source: California Regional Water Quality Control Board Victorville Branch Office (6)
Date Data Arrived at EDR: 06/07/2005	Telephone: 760-241-7365
Date Made Active in Reports: 06/29/2005	Last EDR Contact: 09/12/2011
Number of Days to Update: 22	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: No Update Planned

## LUST REG 6L: Leaking Underground Storage Tank Case Listing

For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 09/09/2003	Source: California Regional Water Quality Control Board Lahontan Region (6)
Date Data Arrived at EDR: 09/10/2003	Telephone: 530-542-5572
Date Made Active in Reports: 10/07/2003	Last EDR Contact: 09/12/2011
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: No Update Planned

## LUST REG 5: Leaking Underground Storage Tank Database

Leaking Underground Storage Tank locations. Alameda, Alpine, Amador, Butte, Colusa, Contra Costa, Calveras, El Dorado, Fresno, Glenn, Kern, Kings, Lake, Lassen, Madera, Mariposa, Merced, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Solano, Stanislaus, Sutter, Tehama, Tulare, Tuolumne, Yolo, Yuba counties.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/18/2018

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/30/2018	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 07/31/2018	Telephone: 916-323-3400
Date Made Active in Reports: 09/07/2018	Last EDR Contact: 07/31/2018
Number of Days to Update: 38	Next Scheduled EDR Contact: 11/12/2018
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2017	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/12/2018	Telephone: 916-255-6504
Date Made Active in Reports: 08/06/2018	Last EDR Contact: 10/05/2018
Number of Days to Update: 55	Next Scheduled EDR Contact: 01/21/2019
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 08/03/2018
Number of Days to Update: 88	Next Scheduled EDR Contact: 11/19/2018
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/17/2018	Source: EPA
Date Data Arrived at EDR: 08/09/2018	Telephone: 703-416-0223
Date Made Active in Reports: 10/05/2018	Last EDR Contact: 10/04/2018
Number of Days to Update: 57	Next Scheduled EDR Contact: 12/17/2018
	Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/22/2018	Telephone: 202-564-8600
Date Made Active in Reports: 10/05/2018	Last EDR Contact: 07/20/2018
Number of Days to Update: 44	Next Scheduled EDR Contact: 11/05/2018

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 10/17/2014	Telephone: 202-564-6023
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 10/04/2018
Number of Days to Update: 3	Next Scheduled EDR Contact: 11/19/2018
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 06/01/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: 202-566-0500

Number of Days to Update: 76	Next Scheduled EDR Contact: 12/17/2018
	Data Release Frequency: Varies

## COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 07/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/10/2014	Telephone: N/A
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 09/04/2018
Number of Days to Update: 40	Next Scheduled EDR Contact: 12/17/2018
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 05/24/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/30/2017	Telephone: 202-566-0517
Date Made Active in Reports: 12/15/2017	Last EDR Contact: 07/27/2018
Number of Days to Update: 15	Next Scheduled EDR Contact: 11/05/2018
	Data Release Frequency: Varies

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/02/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2018	Telephone: 202-343-9775
Date Made Active in Reports: 10/05/2018	Last EDR Contact: 10/03/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

	Data Release Frequency: Varies

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Ms. Tina Berry  
Unocal Corp.  
2000 Crow Canyon Place, Suite 400  
San Ramon, CA 94583

Dear Ms. Berry:

Subject: Underground Storage Tank Case Closure—Unocal No. 6115, 4350 El Camino Real, Los Altos, CA

This letter confirms the completion of site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Enclosed is the Case Closure Summary for the referenced site for your records.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e).

Please contact Ms. Christine Tulloch at the Santa Clara Valley Water District's Camden Office, (408) 927-0710, extension 2636, if you have any questions in this matter.

Sincerely,

*ORIGINAL SIGNED BY*

James S. Crowley, P.E.  
Associate Civil Engineer  
Leaking Underground Storage Tank Oversight Program

Description of Interim Remediation Activities: Overexcavation was performed at Tanks B and WO. Overexcavation samples at Tank B resulted in an increasing concentration of gasoline constituents with depth. However, a vapor extraction system was operated at this site and reduced groundwater concentrations of petroleum hydrocarbons by more than 98 percent. It is also assumed that the vapor extraction system reduce levels of residual petroleum hydrocarbons in soil. Two thousand and two hundred (2,200) gallons of groundwater was also removed during an operation of a temporary groundwater extraction system.

#### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: Yes	Number Decommissioned: 1	Number Retained: 3
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances: The highest levels of pollution in soil and groundwater were observed below Tank B and appears to have been localized. MW-4 at the source area was destroyed prior to completion of verification monitoring. However, the last sample contained only 58 parts per billion (ppb) Total Petroleum Hydrocarbons as Gasoline and 1.1 ppb Benzene, showing a considerable reduction in dissolved groundwater pollution. Methyl t-butyl ether (MTBE) was also analyzed for groundwater samples from MW-3 from 07/92 to 07/93, but was discontinued after a significant decline from 480 ppb to 60 ppb. Due to remedial actions and declining levels, continued MTBE analyses are not being requested.

Conclusion: The remedial measures have been effective in reducing pollution to water quality objectives. Therefore, further corrective action is not required.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Christine A. Tulloch	Title: Water Quality Specialist
Signature: <i>Christine A. Tulloch</i>	Date: 10/30/96
Approved by: James S. Crowley, P.E.	Title: Associate Civil Engineer
Signature: <i>James S. Crowley</i>	Date: 11/04/96

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

VII. REGIONAL BOARD NOTIFICATION

Regional Board Staff Name: John West	Title: E.S. III
RB Response: Concur, based solely upon information contained in this case closure summary.	Date Submitted to RB:
Signature: <i>See attached Facsimile</i>	Date:

Attachment: Site Plan

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

**Hazardous Materials**

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?

**Yes****Underground Storage Tank(s) (UST)**

Does your facility own or operate underground storage tanks?

**Yes****Hazardous Waste**

Is your facility a Hazardous Waste Generator?

**Yes**

Does your facility treat hazardous waste on-site?

**No**

Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?

**No**

Does your facility consolidate hazardous waste generated at a remote site?

**No**

Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?

**No**

Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.

**No**

Is your facility a Household Hazardous Waste (HHW) Collection site?

**No****Excluded and/or Exempted Materials**

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?

**No**

Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.

**No**

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?

**No****Additional Information**

No additional comments provided.

Gas Station			Automobile Maintenance			
THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply)					A5.	
<input checked="" type="checkbox"/> 1. HAZARDOUS MATERIALS; <input checked="" type="checkbox"/> 2. HAZARDOUS WASTES						

**B. INTERNAL RESPONSE**

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply)	B1.
<input checked="" type="checkbox"/> 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)	
<input checked="" type="checkbox"/> 2. CALLING HAZARDOUS WASTE CONTRACTOR	
<input checked="" type="checkbox"/> 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM	

**C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS**

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the Governor's Office of Emergency Services at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply)	C1.

## D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and, preventing and mitigating associated harm to persons, property, and the environment.)

1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
5. BUILT-IN BERM IN WORK / STORAGE AREA;
6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
8. STOP PROCESSES AND/OR OPERATIONS;
9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
21. OTHER (Specify):

D1.

D2.

## E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY):

1. BELLS;
2. HORNS/SIRENS;
3. VERBAL (i.e., SHOUTING);
4. OTHER (Specify):

E1.

E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.)  
SOUTH SIDE OF SITE

E3.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

EVACUATION ROUTE MAP(S) POSTED AS REQUIRED

E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

## F. ARRANGEMENTS FOR EMERGENCY SERVICES

**Explanation of Requirement:** Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following)

F1.

1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

## G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g.,  CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE <sup>G1.</sup>	LOCATION	CAPABILITY (If applicable)
<b>Safety and First Aid</b>	1. <input type="checkbox"/> CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS

## H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply) <input checked="" type="checkbox"/> 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA <input type="checkbox"/> 2. PROCESS LINES / PIPING <input type="checkbox"/> 3. LABORATORY <input type="checkbox"/> 4. WASTE TREATMENT AREA	H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab) See Site Map	H2.
			H3.
			H4.
			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply) <input type="checkbox"/> 1. SHELVES, CABINETS AND RACKS <input checked="" type="checkbox"/> 2. TANKS (EMERGENCY SHUTOFF) <input checked="" type="checkbox"/> 3. PORTABLE GAS CYLINDERS <input checked="" type="checkbox"/> 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES <input type="checkbox"/> 5. SPRINKLER SYSTEMS <input type="checkbox"/> 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)	H6.	LOCATIONS Service Bay 1-North Ext. Bldg. Wall, 1-Storage Area Propane- Exterior Wall In Service Bay Storage Area	H7.
			H8.
			H9.
			H10.
			H11.
			H12.

## I. EMPLOYEE TRAINING

**Explanation of Requirement:** Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- |   |  |
|---|--|
| <ul style="list-style-type: none"> <li>• Material Safety Data Sheets;</li> <li>• Hazard communication related to health and safety;</li> <li>• Methods for safe handling of hazardous substances;</li> <li>• Fire hazards of materials / processes;</li> <li>• Conditions likely to worsen emergencies;</li> <li>• Coordination of emergency response;</li> <li>• Notification procedures;</li> <li>• Applicable laws and regulations;</li> </ul> | <ul style="list-style-type: none"> <li>• Communication and alarm systems;</li> <li>• Personal protective equipment;</li> <li>• Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);</li> <li>• Decontamination procedures;</li> <li>• Evacuation procedures;</li> <li>• Control and containment procedures;</li> <li>• UST monitoring system equipment and procedures (if applicable).</li> </ul> |
|---|--|

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply)	11.
<input type="checkbox"/> 1. FORMAL CLASSROOM; <input type="checkbox"/> 2. VIDEOS; <input checked="" type="checkbox"/> 3. SAFETY / TAILGATE MEETINGS;	
<input type="checkbox"/> 4. STUDY GUIDES / MANUALS (Specify): _____	12.
<input checked="" type="checkbox"/> 5. OTHER (Specify): <u>All Employees are trained within 30 days of hire date by designated operator, yearly follow ups.</u>	13.
<input type="checkbox"/> 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES	

**Large Quantity Generator (LQG) Training Records:** Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

## J. LIST OF ATTACHMENTS

(Check one of the following) <input type="checkbox"/> 1. NO ATTACHMENTS ARE REQUIRED; <i>or</i> <input checked="" type="checkbox"/> 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: Emergency Response Procedures	J1.   J2.
---	--------------------

## K. SIGNATURE / CERTIFICATION

**Certification:** Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

SIGNATURE OF OWNER/OPERATOR Greg Galatolo		DATE SIGNED June 18, 2014	K1.
NAME OF SIGNER (print) Greg Galatolo	K2.	TITLE OF SIGNER Owner	K3.

## EMERGENCY RESPONSE PROCEDURES

### 1. PREVENTION

Describe the kinds of hazards associated with the materials present at your business. Provide information on the steps taken at your business, or the policies or procedures now in place, to **help prevent** an accidental release of a hazardous material. Issues for discussion may include safety, storage, and containment procedures. Please be specific for each type of Hazardous Material at your facility.

The hazardous at this business are fire and spills associated with gasoline dispensing. Gasoline dispensing is supervised by trained personnel. Additional hazardous materials are stored in minimum quantities and stored in small, unbreakable containers. All underground storage tanks are monitored using an approved monitoring method.

The station also has a fire and pressure release hazard associated with the propane. Trained personnel are only authorized to only handle the propane.

### 2. MITIGATION

Describe the procedures to be followed to **reduce the severity** of a release or threatened release of a hazardous material at your business. The procedures should detail the actions to be taken by employees to stop a release, contain a release, or to reduce the problems associated with a release. What is your immediate response to a spill, fire, explosion or airborne release at your business? Do not write procedures that exceed the capabilities of employees or equipment at your business or that violate any worker's safety laws.

Small incidents: For leaks and spills less than 5 gallons, isolate the area and contain with absorbent material. Clean up the spill immediately to prevent spreading. For fires, turn off pumps, use fire extinguisher if it can be done safely.

Larger incidents: Turn off pumps using emergency pump shut-off, call 9-1-1, evacuate to emergency assembly area, wait for emergency personnel to respond. Immediately contact the business owner, if not already on site.

In the event of a line break or other gas release, evacuate the area and thoroughly ventilate the area until the gas dissipates. Immediately contact the gas supplier for assistance.

### 3. ABATEMENT

Describe what you would do to **stop** and **remove** each hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your business? What aspects of the response are beyond your ability and need to be handled by others? Who would you call to handle the release?

Small incidents will be handled with the on-site clean-up equipment, (i.e., brooms, shovel, absorbent material, mops, etc.). For larger incidents, the on-site manager will turn off the pumps, call 9-1-1, and the owner. For suspected leaks the owner will contact an authorized contractor to assist in the investigation of the incident. If a UST leak is confirmed, then reporting will be done by the owner, which complies with UST regulations. The owner will coordinate with any contractors required to stop a release, clean up a release and/or dispose of materials. All materials will be disposed of in accordance with state, federal and local laws and regulations. Vacate the building and ventilate thoroughly.

### 4. EVACUATION

Describe the procedures to be followed for immediate notification and evacuation of your facility.

If warranted, evacuate to the designated assembly located at: SOUTH SIDE OF SITE  
The manager or lead employee will take a head count to verify all employees have evacuated safely. The manager or employee will confer the responding agencies to indicate the magnitude of the emergency. Re-Entry into the facility will only take place after the owner or manager verifies with the responding agency personnel to ensure it is safe.

### 5. EARTHQUAKES

Identify the areas and equipment in your business, which would require **immediate inspection or isolation** due to their vulnerability to earthquake related ground motion. Check for equipment such as gas cylinders, piping, drums, etc., that may need to be Secured or spillage that may require mitigation or abatement.

Key areas to inspect are the UST tank monitor alarm panel, dispenser islands, and any additional hazardous materials storage areas.

# Spill/Release Response Procedures for Propane

The Propane used can be hazardous in the event of a spill or release, or if there is a fire at the facility. Propane is flammable, in the event of a fire; the container could explode violently due to the high heat of the fire.

Propane is an odorless, colorless, flammable gas. Often an odorant is added for fuel purposes. A release in a confined area may cause rapid breathing, diminished mental alertness, impaired muscular coordination, faulty judgment, depression of all sensations, emotional instability and fatigue. As asphyxiation progresses, nausea, vomiting and loss of consciousness may result.

## **Spill or Release:**

In the event of a release from the propane tank/cylinder, do the following:

1. Evacuate all personnel from the affected area.
2. Stay upwind of the release and out of low-lying areas.
3. Avoid breathing gases.
4. If the leak is in a container or valve, contact the propane supplier for assistance.
5. Ventilate the area before attempting to re-enter the area.
6. Do not enter the building until emergency personnel have notified you that it is safe.
7. Contact management using the emergency phone list procedure.

## **Fire:**

1. Follow the Fire and Explosion evacuation procedures.
2. Notify emergency personnel of the tank location.

## **Prevention Procedures:**

1. Store tank and/or cylinders with valve protection caps installed.
2. Tank and cylinders should be stored upright and firmly secured to prevent falling or being knocked over.
3. Containers should be stored in a cool, dry, well-ventilated area away from sources of heat or ignition and direct sun light.
4. If you suspect any problems with the tank notify the supplier immediately to have the system inspected.

## **Hazardous Materials Business Plan Employee Training Plan**

All facilities subject to the Hazardous Materials Business Plan (HMBP) Program must have a training program and a written employee training plan for hazardous materials safety and emergency response. The training plan is a required section of the HMBP which must be submitted electronically as part of the complete HMBP submission. The training program should be designed for the business size and type. Initial training is required for new employees (e.g., within 30 days from date of hire) followed by annual refresher training.

To satisfy the HMBP training program elements, the program must, at a minimum, include:

- Hazardous materials handling and safety procedures
- Emergency response agency coordination procedures
- Appropriate use and maintenance of emergency response equipment and supplies
- Emergency response plans and procedures
- Procedures for immediate notification of local emergency response agencies, CUPA, Cal EMA, and onsite emergency personnel
- Identification of local emergency medical assistance resources
- Hazard mitigation, prevention, and abatement procedures
- Facility notification and evacuation procedures
- Identification of facility areas, equipment, and systems vulnerable to earthquakes

*Note: If your facility generates hazardous waste, refer to the Consolidated Emergency Response/Contingency Plan Section I. Employee Training for additional details.*

Complete the training plan checklist below for your training plan. If you already have a separate training plan maintained onsite that meets the HMBP training plan requirement, you can submit the checklist below as a training plan summary to satisfy the training plan requirement.

**Personnel** are trained in the following:

- Internal alarm and notification
- Evacuation, assembly point locations, and re-entry
- Emergency incident reporting
- External emergency response organization/agency notification
- Location and content of Emergency Response/Contingency Plan
- Identification of local emergency medical assistance resources

**Chemical Handlers** are additionally trained in the following:

- Safe methods for handling and storage of hazardous materials
- Location, use, and maintenance of emergency response equipment and supplies
- Hazard mitigation, prevention, and abatement procedures (e.g., spill control)

- Proper use of personal protective equipment
- Hazard awareness for each hazardous material to which they may be exposed (e.g., chemical properties, routes of exposure, first aid)
- Identification of facility areas, equipment, and systems vulnerable to earthquakes
- Hazardous waste personnel are additionally trained in hazardous waste management procedures specific to their job duties

Complete the section below if you have an on-site emergency response team.

**Emergency Response Team Members** are additionally trained in the following:

- Personnel rescue procedures
- Shutdown of operations and equipment necessary to prevent or minimize a release
- Communication and coordination with responding agencies (e.g., Incident Command System)
- Use, maintenance, and replacement of emergency response equipment
- Refresher training provided at least annually
- Emergency response drills

### **Record Keeping**

Facilities subject to hazardous materials training programs must maintain records to document compliance with applicable programs. Complete the record keeping checklist below for the applicable subjects.

- Current employee training records (to be retained until closure of the facility)
- Former employee training records (to be retained at least three years after termination of employment)
- Training Program (i.e., written description of initial and periodic training)
- Current copy of the HMBP and the Emergency Response/Contingency Plan
- Record of reportable hazardous material releases and threatened releases
- Record of hazardous material and/or hazardous waste storage area inspections
- Record of hazardous waste tank inspections
- Description and documentation of facility emergency response drills

*Note: This list of records does not identify every type of record required to be maintained by the facility.*

## CERTIFICATION OF FINANCIAL RESPONSIBILITY FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in CCR, Title 23 Division 3, Chapter 18, Section 2807:

500,000 dollars per occurrence  
 or  
 1 million dollars per occurrence

AND

1 million dollars annual aggregate  
 or  
 2 million dollars annual aggregate

B. GREG GALATOLO hereby certifies that it is in compliance with the requirements of California Code of Regulations, Title 23, Division 3, Chapter 18, Article 3, Section 2807.  
(Name of Tank Owner or Operator)

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Compensation
UST CLEAN UP FUND	UST CLEAN UP FUND P.O. BOX 944212 SAC. CA.	N/A	\$995,000.00 Per Occurance and Annual Aggregate	Annual	Yes	YES
CFO LETTER	CFO / OWNER LETTER	N/A	5,000. <sup>00</sup>	ANNUAL	YES	YES

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance and shall remain in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address
EL CAMINO 76	4350 EL CAMINO REAL LOS ALTOS CA.
LOS ALTOS 76	330 S. SAN ANTONIO LOS ALTOS CA.
RANCHO 76	101 FREMONT LOS ALTOS CA.

E. Signature of Tank Owner or Operator	Date	Name and Title of Tank Owner or Operator
	6-15-18	GREG GALATOLO OWNER
Signature of Witness or Notary	Date	Name of Witness or Notary
	6-15-18	Nora Hayward

Submit original to local UST regulatory agency. Keep a copy at each UST facility.

(Instructions on Next Page)

## UNDERGROUND STORAGE TANK RESPONSE PLAN – PAGE 2

### VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

**Recordable Releases:** Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

**Reportable Releases:** Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release cannot be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

**Record Retention:** Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

### VII. OWNER/OPERATOR SIGNATURE

**LETTER FROM CHIEF FINANCIAL OFFICER**

I am the Chief Financial Officer for EL CAMINO 76 , 4350 EL CAMINO REAL ,LOS ALTOS .CA. 94022

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least \$5,000.00 per occurrence and \$5,000.00 annual aggregate coverage.

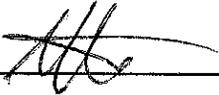

Underground storage tanks at the following facilities are assured by this letter:  
LOS ALTOS 76. 330 S. SAN ANTONIO RD. LOS ALTOS CA94022  
EL CAMINO 76 4350 EL CAMINO REAL LOS ALTOS, CA 94022  
RANCHO 76 601 FREMONT AVE. LOS ALTOS, CA94024

- |  |              |
|--|--------------|
| 1. Amount of annual aggregate coverage being assured by this letter                          | 5,000.00     |
| 2. Total tangible assets   | 8,970,000.00 |
| 3. Total liabilities   | 4,365,500.00 |
| 4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1) | 4,604,500.00 |

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at LOS ALTOS, CA on 6/15/18 .

Los Altos, California

Dear Ms. Jakaby:

Per the request of Mr. Ron Bock of Unocal Corporation, enclosed please find our reports dated November 5, 1990, November 8, 1990, and December 14, 1990, as well as our work plan/proposal dated November 8, 1990, for the above referenced site.

Should you have any questions, please feel free to call our office at (707) 746-6915.

Sincerely,

Kaprealian Engineering, Inc.

RE: Stockpiled Soil Sampling for  
Unocal Service Station #6115  
4350 El Camino Real  
Los Altos, California

Dear Mr. Bock:

This letter report summarizes the results of the stockpiled soil sampling and laboratory analyses for the referenced site. The soil analyses were conducted to comply with the County Health Department requirements for proper disposal of contaminated soil.

On November 19, 1990, soil samples from approximately 100 cubic yards of aerated stockpiled soil (previously sampled as Comp Q and Comp R) at the referenced site were collected to determine proper disposal of the soil. Two composite soil samples (designated as Comp QQ and Comp RR) were taken. Each composite sample consisted of four individual grab samples taken at various locations and depths ranging from 1 to 2 feet. The samples were collected in two-inch diameter, clean brass tubes, which were then sealed with aluminum foil, plastic caps and tape, and placed in a cooled ice chest for subsequent delivery to a certified laboratory for analysis. All samples were analyzed at Sequoia Analytical Laboratory in Redwood City and Concord, California, and were accompanied by properly executed Chain of Custody documentation. Samples were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 1.

After review of the analytical results of samples Comp QQ and Comp RR, the stockpiled soil was further aerated, and on November 26, 1990, two composite samples (designated as Comp 1 and Comp 2) were taken. Samples were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 2.

Stockpiled soil (approximately 50 cubic yards) represented by Comp 1 was further aerated, and on December 3, 1990, one composite sample (designated as Comp 1-1) was taken. On this same date, soil samples were collected from approximately 50 cubic yards of aerated stockpiled soil previously sampled from the original fuel tank pit excavation as Comp M. One composite sample (designated as Comp MM) was taken. Samples were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 3.

Soil samples were analyzed to determine concentrations of total petroleum hydrocarbons (TPH) as gasoline using EPA method 5030 in conjunction with modified 8015, and benzene, toluene, xylenes and ethylbenzene (BTX&E) using EPA method 8020. Analytical results of the soil samples (Comp 1-1, Comp 2, and Comp MM) indicate levels of TPH as gasoline ranging from 3.6 ppm to 28 ppm. Results of the soil analyses are summarized in Table 1. Copies of the laboratory analyses, and the Chain of Custody documentation are attached to this report.

Based on the analytical results of the soil samples, stockpiled soil represented by samples Comp 1-1, Comp 2 and Comp MM (approximately 150 cubic yards) can be disposed of at an approved Class III disposal site. However, KEI recommends that during disposal, when obvious isolated high contamination is detected within the stockpiled soil, that portion of the soil be separately stockpiled for further sampling and treatment.

#### DISTRIBUTION

A copy of this report should be sent to Ms. Nicole Jakaby of the Santa Clara County Department of Environmental Health, and to the Regional Water Quality Control Board, San Francisco Bay Region.

RE: Work Plan/Proposal  
Unocal Service Station #6115  
4350 El Camino Real  
Los Altos, California

I. INTRODUCTION

This work plan for Phase I subsurface investigation is prepared in accordance with requirements and format of the San Francisco Bay "Regional Board Staff Recommendations for Initial Evaluation and Investigation of Underground Tanks". All work will be performed under the direct supervision of Mr. Don Braun, Certified Engineering Geologist #1310, Expiration Date 6/30/92.

A. Statement of Scope of Work

The scope of work in this work plan/proposal entails defining the extent of subsurface contamination at the site.

B. Site Location

The service station site occupies the southwesterly corner at the intersection of El Camino Real and Los Altos Avenue in Los Altos, California. A Location Map and Site Plans are attached.

C. Background

On October 2, 1990, Kaprealian Engineering, Inc. (KEI) collected soil samples following the removal of two fuel storage tanks and one waste oil tank from the referenced site. Four initial samples, labeled A1, A2, B1 and B2, were collected at depths of approximately 13.5 to 15.5 feet below grade. One additional soil sampled, labeled B2(20.5), was collected beneath sample point location B2 at a depth of about 20.5 feet. The

samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline, benzene, toluene, xylenes and ethylbenzene (BTX&E), and for organic lead. Laboratory analyses indicated non-detectable levels of TPH as gasoline for all initial soil samples except sample B2, which showed 31 ppm. However, analyses of sample B2(20.5), collected after excavation beneath sample location B2 at a depth of about 20.5 feet, indicated TPH as gasoline at 1,900 ppm. Analyses indicated non-detectable levels of organic lead for all samples.

Also on October 2, 1990, one initial soil sample, labeled W01, was collected beneath the waste oil tank at a depth of about 10.5 feet. An additional soil sample, labeled W01(15.5), was collected from beneath sample location W01 at a depth of approximately 15.5 feet. Both samples were analyzed for TPH as gasoline, BTX&E, TPH as diesel, total oil and grease (TOG), EPA 8010 compounds, polychlorinated biphenyls (PCB's) using EPA 8270, and metals - cadmium, chromium, lead and zinc. Analyses of sample W01 indicated non-detectable levels of TPH as gasoline, BTX&E, all 8010 compounds and all 8270 compounds, including PCB's. Analyses did indicate TPH as diesel at 2.1 ppm with 190 ppm of TOG. Analyses of sample W01(15.5), collected after additional excavation, indicated non-detectable levels of TPH as gasoline, BTX&E, TOG, all 8010 compounds and all 8270 compounds, including PCB's. Analyses indicated TPH as diesel at 6.4 ppm.

In order to remove as much contaminated soil as possible, KEI returned to the site on October 12, 1990 to observe additional soil excavation in the area of sample points A2 and B2 from a depth of about 16 feet to a depth of 21 feet. After excavation, but prior to backfilling, two 12-inch diameter conductor casings were installed in the fuel tank pit.

KEI returned to the site on October 23, 1990 to collect soil samples from the product pipe trenches. Eleven soil samples, labeled P1 through P11, were collected at depths ranging from 1.5 feet to 3.5 feet. In addition, KEI also collected four soil samples, labeled V1 through V4, from the vent pipe trenches, as required by the Santa Clara County Department of Environmental Health, at depths ranging from 1.5 feet to 2.5 feet. Analyses indicated non-detectable levels of TPH as gasoline for all samples except sample P11, which

showed 8.4 ppm. Analyses indicated levels of total lead ranging from non-detectable to 16 ppm. Sample point and conductor casing locations are as shown on the attached Site Plan, Figure 1. Laboratory results are summarized in Table 1. Laboratory analyses and Chain of Custody documentation are also attached.

D. Site History

1. The site is used as a gasoline station and automobile maintenance facility. Two 10,000 gallon capacity fuel tanks and one 550 gallon waste oil tank were at the site prior to their removal on October 2, 1990.
2. No previous businesses at the site are known to KEI.
3.
  - a. Two underground fuel tanks and one waste oil tank were removed from the site on October 2, 1990. All of the tanks were made of steel. The fuel tanks were each 10,000 gallons in capacity. One tank contained regular unleaded gasoline, and the other contained super unleaded gasoline. The waste oil tank was 550 gallons in capacity and contained waste oil.
  - b. The tanks were removed on October 2, 1990. No apparent cracks or holes were observed in either of the fuel tanks; however, approximately six holes up to two inches in diameter were observed in the waste oil tank.
  - c. Tank removal was performed by Dan Brenton Construction of San Jose, California. For tank removal documentation and associated manifests, the reader is referred to Dan Brenton Construction.
  - d. An Unauthorized Release form dated 10/3/90 was filed with the Santa Clara County Department of Environmental Health. A copy of the Unauthorized Release form is attached with this work plan.
  - e. No tank testing results or inventory reconciliation methods or results for this site are known to KEI at this time.

- f. An unknown quantity of petroleum hydrocarbons was released into the subsurface environment.
4. No other leaks, spills or previously removed tanks at the site are known to KEI.
5. No previous subsurface work at the site or adjacent sites is known to KEI.

## II. SITE DESCRIPTION

### A. Vicinity Description and Hydrogeologic Setting

The subject site is developed and contains a Unocal Service Station. The site is situated on gently sloping northeast trending topography and is located approximately 3.6 miles southwest of the present shoreline of southern San Francisco Bay. The immediate vicinity of the subject property is generally developed with commercial facilities.

Based on review of regional geologic maps (C.D.M.G. Special Report 107 "Potential Seismic Hazard in Santa Clara County, California" by T.H. Rogers and J.W. Williams, 1974), the subject site is underlain by Quaternary-age Older Alluvial Fan deposits (Qof). The thickness of the alluvial materials underlying the site is estimated at approximately 120 feet based on data indicated on Plate 4 of the above captioned report. Also, as indicated on Plate 5 of the above captioned report, an adjacent CalTrans boring (82-8) was drilled to a depth of 68 feet and encountered ground water at a depth of 35 feet; however, the date drilled is not supplied, but it was drilled prior to 1974, and it is very likely that the depth to the current ground water table has substantially decreased since this boring was drilled.

### B. & C. Vicinity Map

A Location Map and two Site Plans showing various features of the site are attached with this work plan. Figure 2 shows the locations of subsurface utilities, the former tank locations and affiliated piping. No wells are known to KEI to be located on or immediately adjacent to the site.

D. Existing Soil Contamination and Excavation Results

1. Soil sample collection associated with the removal of the fuel tanks was performed in the following manner:

All soil samples taken October 2 and 23, 1990 were witnessed by Santa Clara County Department of Environmental Health personnel. The undisturbed samples collected from the fuel tank pit, waste oil tank pit and pipe trenches were taken from bulk material excavated by backhoe. The samples were placed in clean, two-inch diameter brass tubes, sealed with aluminum foil, plastic caps, and tape, and stored in a cooler on ice prior to delivery to a state-certified laboratory.

2. Ground water was not encountered in the tank pit.
3. The subsurface soils exposed in the tank pit excavation appeared to consist primarily of silty clay materials to a depth of about 16 feet below grade which are inturn underlain by silty sand materials to the maximum depth explored (21 feet). The pit was dry and there was no observed visible evidence of previous high ground water levels in the pit.
4. Soil sample collection locations associated with the tank pits and pipe trenches are shown on the attached Site Plan, Figure 1.

Soil samples were collected by Mr. Richard Bradish of KEI. Tabulated soil sample analytical results are provided in Table 1. Sample collection locations are shown on the attached Site Plan, Figure 1. Copies of the signed laboratory data sheets are attached to this work plan.

5. Any known subsurface conduits or utilities are identified on the attached Site Plan, Figure 2.
6. No unusual problems were encountered at the site.
7. All soil excavated, as described in KEI's reports KEI-J90-1001.R1 and KEI-J90-1001.R2 dated November 5, 1990 and November 6, 1990, will be disposed of to an appropriately classed landfill.

8. All required permits for tank removal were acquired by Dan Brenton Construction of San Jose, California. For copies of such permits, the reader is referred to Dan Brenton Construction.

### III. PLAN FOR DETERMINING EXTENT OF SOIL CONTAMINATION ON-SITE

#### A. Method/Technique for Determining Extent of Contamination On-Site

KEI proposes the installation of monitoring wells to further determine the extent of any soil contamination underlying the site. Soil samples will be collected from the borings for the monitoring wells as discussed below in Section IV. B. below.

### IV. PLAN FOR DETERMINING GROUND WATER CONTAMINATION

#### A. Placement and Rationale for Location of Monitoring Wells

To begin to define the extent of ground water contamination, KEI proposes the installation of three monitoring wells. The depth to and direction of ground water flow at the site are presently unknown to KEI; however, the inferred ground water flow direction is toward the northeast roughly parallel with the ground surface. The locations of the wells are as shown on the attached Site Plan, Figure 2.

#### B. Drilling Method for Construction of Monitoring Wells, including Decontamination Procedures

KEI proposes to install three two-inch diameter monitoring wells using truck mounted eight-inch outside diameter hollow stem auger drilling equipment. Permits will be obtained from the Santa Clara Valley Water District as necessary prior to beginning work.

The wells will be drilled approximately 10 to 15 feet into the saturated zone of the first encountered ground water unless a 5 foot thick clay aquitard is encountered first, at which time drilling will be terminated, and any portion of the clay aquitard drilled into will be sealed with bentonite pellets or a cement/sand slurry. However, in the event the ground water is not encountered within 50 feet of the surface, KEI proposes that the borings will be terminated and

well casings not be installed. The boring should then be sealed using a 10-sack cement/sand slurry to the surface.

Soil samples will be collected at a maximum spacing of 5 foot intervals, significant changes in lithology, obvious areas of contamination, and at or within the soil/ground water interface, beginning at a depth of about 5 feet below grade. Sampling for laboratory analysis and lithologic logging purposes will continue until the first water table is encountered. Sampling will continue below the ground water table for lithologic logging purposes only. However, the first boring drilled will be approximately continuously cored for the total depth drilled. Depending on the results of the first boring drilled, the sampling interval may be reduced; however, the sampling criteria outlined above are considered as the minimum sampling proposed. Classification of soil will be done using the Unified Soil Classification System (USCS) by KEI's field engineer or geologist. Samples will be collected in a California modified split-spoon sampler with two-inch diameter brass liners. The sampler will be advanced ahead of the drilling augers at designated depths by dropping a 140 pound hammer 30 inches. Blow counts will be recorded. The samples will be removed from the sampler, retained in the brass liners, and sealed with aluminum foil, plastic caps and tape. They will be labeled and stored in a cooler on ice for delivery to a state certified laboratory.

California modified split-spoon samplers and brass tubes will be decontaminated prior to each use with a trisodium phosphate solution wash followed by a clean water rinse. Hollow stem augers will be steam cleaned prior to each use. Steam cleaning will be performed on visqueen. Water from the steam cleaning will be contained on the visqueen and placed in DOT-approved 55-gallon drums, pending appropriate disposal. The wells will be constructed in the following manner:

Casing Type: Schedule 40 PVC, flush threaded joints, 0.02 inch factory slot, two-inch diameter. Screen to run from total depth of the well to approximately 5 feet above first encountered ground water. Monterey sand (#3) will fill the annular space from total depth to 2 feet above the screened interval. A two foot thick bentonite seal will be placed in the annular

space on top of the sand pack. A 10-sack cement/sand slurry will be placed from the top of the bentonite seal to the surface.

Well casings will be secured with a waterproof cap and a padlock. A round, watertight, flush-mounted well cover will be concreted in place over the top of the casing. A typical well construction diagram is attached to this work plan.

Drilled cuttings will be stored on-site in DOT-approved, 55-gallon drums, or under visqueen, until appropriate disposal can be determined.

Casing elevations will be surveyed by a licensed land surveyor to Mean Sea Level and to a vertical accuracy of 0.01 feet.

The wells will be developed using a surface pump approximately one week after well completion. Wells will be pumped until expelled water is clear and free of turbidity. Effluent generated during well development will be contained in barrels and hauled from the site by a licensed hazardous waste hauler.

C. Ground Water Sampling Plans

Wells will be checked for depth to the water table, the presence of free product and sheen (using an interface probe and/or paste tape) prior to both development and sampling. Water levels will be measured with an electronic sounder or paste tape.

The wells will be purged with a surface bailer of a minimum of four casing volumes prior to sampling, at least 72 hours after development. Samples will be collected using a clean Teflon bailer and will be promptly decanted into 40 ml VOA vials and/or one liter amber bottles as appropriate. Vials and/or bottles will be sealed with Teflon-lined screw caps, labeled and stored in a cooler on ice for delivery to a state certified laboratory. Properly executed chain of custody documentation will accompany all samples. The sampling bailer will be cleaned with soap and a clean water rinse prior to each use.

Selected soil and all water samples will be analyzed by Sequoia Analytical Laboratory in either Redwood City or

Concord, California, a state certified laboratory, for TPH as gasoline using EPA method 5030 in conjunction with modified 8015 and BTX&E using EPA method 8020. In addition, samples from MW1 adjacent to the waste oil tank pit, will be analyzed for TPH as diesel using EPA method 3550, TOG and EPA 8010 constituents.

For quality assurance purposes, one duplicate water sample will be collected from one well during each sampling event.

Analytical results will be presented in tabular form, showing sample depths, results and detection limits. The results will be used to delineate the vertical and lateral extent of the subsurface contaminants. A cross sectional profile will be constructed as appropriate showing subsurface lithology to depth drilled and first water table depth.

If petroleum hydrocarbons in excess of action levels, as set by the regulatory agencies, are found in the soil during well installation, additional monitoring wells and/or borings will be proposed and installed until zero-lines for soil and ground water contamination are defined.

A report documenting field activities and sample results will be submitted within 45 days after the completion of the field work. The report will set out the collected information in an orderly fashion, and include any recommendations for additional needed work.

## PHASE II

Phase II will discuss the alternatives for continuing the subsurface investigation if Phase I reveals contamination levels in the ground water significantly in excess of action levels.

Phase II will include a proposal for additional monitoring wells to define a zero line of ground water contamination. It will also propose a ground water monitoring and sampling program for the wells installed during Phase I.

The main purpose of Phase II will be to establish a zero line of ground water contamination. The proposal/work plan will be submitted to the regulatory agencies.

KEI-P90-1001.P1  
November 8, 1990  
Page 10

PHASE III

Once the zero line is established through the completion of Phase II, a final remedial plan will be developed. This plan will also be submitted.

Should you have any questions regarding this matter, please do not hesitate to call me at (707) 746-6915.

Sincerely,

Kaprealian Engineering, Inc.

Attention: Mr. Ron Bock

RE: Soil Sampling Report  
Unocal Service Station #6115  
4350 El Camino Real  
Los Altos, California

Dear Mr. Bock:

This report summarizes the soil sampling performed by Kaprealian Engineering, Inc. (KEI) at the referenced site. All work was performed in compliance with the guidelines established by the Regional Water Quality Control Board (RWQCB), and the Santa Clara County Department of Environmental Health.

The scope of the work performed by KEI consisted of the following:

Coordination with regulatory agencies.

Collection of soil samples from beneath the fuel and waste oil tanks, and from the product and vent pipe trenches.

Delivery of samples, including proper Chain of Custody documentation, to a certified analytical laboratory.

Technical review and preparation of this report.

SITE DESCRIPTION AND BACKGROUND

The subject site is presently used as a gasoline station. The site is situated on gently sloping northeast trending topography and is located approximately 3.6 miles southwest of the present shoreline of southern San Francisco Bay. A Location Map and Site Plan are attached to this report. No leaks or previous subsurface work performed at the site are known to KEI.

### FIELD ACTIVITIES

KEI's field work was conducted on October 2, 1990, when two underground fuel storage tanks and one waste oil tank were removed from the site. The tanks consisted of one 10,000 gallon regular unleaded fuel storage tank, one 10,000 gallon super unleaded fuel storage tank, and one 550 gallon waste oil tank. The tanks were made of steel. No apparent holes or cracks were observed in the fuel tanks; however, the waste oil tank had approximately six holes up to two-inches in diameter. Ms. Nicole Jakaby of the Santa Clara County Department of Environmental Health was present during tank removal and subsequent soil sampling.

Four soil samples, labeled A1, A2, B1 and B2, were collected from beneath the fuel tanks at depths of approximately 13.5 to 15.5 feet below grade. After additional excavation of the fuel tank pit, one soil sample, labeled B2(20.5), was collected from the fuel tank pit at a depth of approximately 20.5 feet. One soil sample, labeled W01, was collected from beneath the waste oil tank at a depth of approximately 10.5 feet. After further excavation of the waste oil tank pit, an additional sample, labeled W01(15.5) was collected from the waste oil tank pit at a depth of approximately 15.5 feet. Samples were collected from bulk material excavated by backhoe. Samples were placed in clean, two-inch diameter brass tubes, sealed with aluminum foil, plastic caps and tape, and stored in a cooled ice chest for delivery to a certified laboratory. Sample locations are as shown on the attached Site Plan.

In an attempt to remove as much of the contaminated soil as possible, KEI returned to the site on October 12, 1990, to observe additional soil excavation in the area of sample points A2 and B2 as shown on the attached Site Plan. Soil was excavated from a depth of 16 feet to a depth of 21 feet below grade. After completion of the soil excavation but prior to tank pit backfilling, two 12-inch diameter conductor casings were installed in the fuel tank pit to a depth of about 21 feet. Conductor casing locations are also shown on the attached Site Plan.

KEI returned to the site on October 23, 1990, in order to collect soil samples from the product pipe trenches. Eleven samples, labeled P1 through P11, were collected from bulk material excavated by backhoe at depths ranging from 1.5 to 3.5 feet below grade. In addition, four soil samples, labeled V1 through V4, were collected from the vent pipe trenches at depths ranging from 1.5 to 2.5 feet below grade. Samples were collected from bulk material excavated by backhoe. The pipe trench samples were required by the Santa Clara County Department of Environmental

Health. The samples were collected in the presence of Ms. Nicole Jakaby of the Santa Clara County Department of Environmental Health. Pipe trench samples were also collected in clean two-inch diameter brass tubes, and handled as described above. After soil sampling was completed, pipe trenches were excavated to the sample points. Pipe trench sample point locations are shown on the attached Site Plan.

#### REGIONAL GEOLOGY AND SUBSURFACE CONDITIONS

Based on review of regional geologic maps (C.D.M.G. Special Report 107 "Potential Seismic Hazard in Santa Clara County, California" by T.H. Rogers and J.W. Williams, 1974), the subject site is underlain by Quaternary-age Older Alluvial Fan deposits (Qof). The thickness of the alluvial materials underlying the site is estimated at approximately 120 feet based on data indicated on Plate 4 of the above captioned report. Also, as indicated on Plate 5 of the above captioned report, an adjacent CalTrans boring (82-8) was drilled to a depth of 68 feet and encountered ground water at a depth of 35 feet; however, the date drilled is not supplied, but it was drilled prior to 1974, and it is very likely that the depth to the current ground water table has substantially decreased since this boring was drilled.

The subsurface soils exposed in the tank pit excavation appeared to consist primarily of silty clay to a depth of about 16 feet below grade, which are in turn underlain by silty sand materials to the maximum depth explored (21 feet). The pit was dry and there was no visible evidence of high ground water levels in the pit.

#### ANALYTICAL RESULTS

All samples were analyzed by Sequoia Analytical Laboratory in Concord, California and were accompanied by properly executed Chain of Custody documentation. All soil samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline using EPA method 5030 in conjunction with modified 8015, and benzene, toluene, xylenes and ethylbenzene (BTX&E) using EPA method 8020. Samples collected from the fuel tank pit (A1, A2, B1, B2 and B2[20.5]) were analyzed for organic lead using the DHS LUFT Method. Pipe trench samples (P1 through P11 and V1 through V4) were analyzed for total lead. In addition, soil samples W01 and W01(15.5), collected from the waste oil tank pit, were also analyzed for TPH as diesel using EPA method 3550 in conjunction with modified 8015, total oil and grease (TOG) by EPA 503D&E, EPA 8010 constituents, polychlorinated biphenyls using EPA method 8270, and metals - cadmium, chromium, lead and zinc.

Analytical results of the initial soil samples (A1, A2, B1 and B2), collected from the fuel tank pit, indicate non-detectable levels of TPH as gasoline and BTX&E for all samples except for sample B2, which showed 31 ppm of TPH as gasoline. After additional excavation, analyses of soil sample B2(20.5), collected beneath sample B2 at a depth of approximately 20.5 feet, indicated 1,900 ppm of TPH as gasoline. Analyses indicated non-detectable levels of organic lead for all samples.

Analyses of soil samples (P1 through P11) collected from the product and vent pipe trenches, indicate non-detectable levels of TPH as gasoline for all samples except sample P11, which showed 84 ppm. Benzene was detected in samples P8 and P11 at concentrations of 0.028 ppm and 0.021 ppm, respectively. Analyses indicated concentrations of total lead ranging from non-detectable to 16 ppm for pipe trench soil samples.

Analytical results of the soil sample W01, collected from beneath the waste oil tank pit, indicate non-detectable levels of TPH as gasoline, BTX&E, EPA method 8010 constituents, and all EPA 8270 constituents, including PCB's. In sample W01, TPH as diesel was detected at a concentration of 2.1 ppm, and TOG at 190 ppm. However, after further excavation, analyses of sample W01(15.5) collected beneath sample W01 at a depth of 15.5 feet, indicate non-detectable levels of TPH as gasoline, BTX&E, TOG, 8010 constituents and all 8270 constituents including PCB's. TPH as diesel was detected at a concentration of 6.4 ppm. Results of the soil analyses are summarized in Table 1. Copies of the laboratory analyses and the Chain of Custody documentation are attached to this report.

#### DISCUSSION AND RECOMMENDATIONS

Based on the analytical results and in accordance with the guidelines established by the RWQCB, further work is necessary at the site because of the level of contamination found in the soil. To comply with the requirements of the RWQCB, the Santa Clara Valley Water District and the Santa Clara County Department of Environmental Health, KEI recommends the installation of three monitoring wells at the site to determine the ground water flow direction, and to determine if the ground water has been impacted. KEI's proposal for this work is attached for your review and consideration.

DISTRIBUTION

A copy of this report should be sent to Ms. Nicole Jakaby of the Santa Clara County Department of Environmental Health, to Ms. Chris Tulloch of the Santa Clara Valley Water District, and to Ms. Penny Silzer of the RWQCB, San Francisco Bay Region.

LIMITATIONS

Soil deposits and rock formations may vary in thickness, lithology, saturation, strength and other properties across any site. In addition, environmental changes, either naturally-occurring or artificially-induced, may cause changes in the extent and concentration of any contaminants. Our studies assume that the field and laboratory data are reasonably representative of the site as a whole, and assume that subsurface conditions are reasonably conducive to interpolation and extrapolation.

The results of this study are based on the data obtained from the field and laboratory analyses obtained from a state certified laboratory. We have analyzed this data using what we believe to be currently applicable engineering techniques and principles in the Northern California region. We make no warranty, either expressed or implied, regarding the above, including laboratory analyses, except that our services have been performed in accordance with generally accepted professional principles and practices existing for such work.

Attention: Mr. Ron Bock

RE: Stockpiled Soil Sampling for  
Unocal Service Station #6115  
4350 El Camino Real  
Los Altos, California

Dear Mr. Bock:

This letter report summarizes the results of the stockpiled soil sampling and laboratory analyses for the referenced site. The soil analyses were conducted to comply with the County Health Department requirements for proper disposal of contaminated soil.

On October 2, 1990, soil samples from approximately 250 cubic yards of stockpiled soil excavated from the fuel tank pit were collected to determine proper disposal of the soil. Five composite soil samples (designated as Comp A, Comp B, Comp C, Comp D and Comp E) were taken. Each composite sample consisted of four individual grab samples taken at various locations and depths ranging from 1 to 2 feet. The samples were collected in two-inch diameter, clean brass tubes, which were then sealed with aluminum foil, plastic caps and tape, and placed in a cooled ice chest for subsequent delivery to a certified laboratory for analysis. All samples were analyzed at Sequoia Analytical Laboratory in Concord, California, and were accompanied by properly executed Chain of Custody documentation. Sample point locations are as shown on the attached Site Plan, Figure 1.

On October 12, 1990, KEI returned to the site to collect soil samples from approximately 350 cubic yards of additional stockpiled soil excavated from the fuel tank pit. Seven composite samples (designated as Comp F through Comp L) were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 2.

On October 15, 1990, KEI returned to the site to collect soil samples from approximately 300 cubic yards of additional stockpiled soil excavated from the fuel tank pit. Six composite samples (designated as Comp M through Comp R) were collected and

stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 3.

On October 18, 1990, soil samples from approximately 100 cubic yards of aerated stockpiled soil (previously sampled as Comp A and Comp C) at the referenced site were collected to determine proper disposal of the soil. Two composite soil samples (designated as Comp 1 and Comp 2) were taken. Samples were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 4.

On October 29, 1990, KEI returned to the site to collect soil samples from approximately 100 cubic yards of stockpiled soil excavated from the piping trenches. Two composite samples (designated as Comp S and Comp T) were collected and stored as described above. Sample point locations are as shown on the attached Site Plan, Figure 5.

Soil samples were analyzed to determine concentrations of total petroleum hydrocarbons (TPH) as gasoline using EPA method 5030 in conjunction with modified 8015, benzene, toluene, xylenes and ethylbenzene (BTX&E) using EPA method 8020. In addition, sample Comp A was analyzed for organic lead using the DHS LUFT Manual method. Analytical results of the soil samples (Comp A through Comp P, Comp S, Comp T, Comp 1 and Comp 2) indicate levels of TPH as gasoline ranging from non-detectable to 62 ppm. However, analytical results of the soil samples (Comp Q and Comp R) indicate levels of TPH as gasoline at 660 ppm to 270 ppm, respectively. Results of the soil analyses are summarized in Table 1. Copies of the laboratory analyses, and the Chain of Custody documentation are attached to this report.

Based on the analytical results of the soil samples, stockpiled soil represented by samples Comp A through Comp P, Comp S, Comp T, Comp 1 and Comp 2 can be disposed of at an approved Class III disposal site. However, KEI recommends that during disposal, when obvious isolated high contamination is detected within the stockpiled soil, that portion of the soil be separately stockpiled for further sampling and treatment.

Stockpiled soil represented by Comp Q and Comp R should remain on-site for treatment and further sampling or can be disposed of at an approved Class II disposal site.

18. SPECIAL CONDITIONS AND PROCEDURES TO TEST THIS TANK

Water in tank  Line(s) being tested with LVLLT  
 High water table in tank excavation

See manual sections applicable. Check below and record procedure in log (27).

Use maximum allowable test pressure for all tests. Four pound rule does not apply to doublewalled tanks.

Complete section below

1. Is four pound rule required? Yes  No
2. Height to 12" mark from bottom of tank N/A in.
3. Pressure at bottom of tank N/A P.S.I.
4. Pressure at top of tank N/A P.S.I.

19. TANK MEASUREMENTS FOR TSTT ASSEMBLY

Bottom of tank to grade\* 79 1/2" in.  
 Add 30" for "T" probe assembly 30 in.  
 Total tubing to assemble - approximate 109 1/2" in.

20. EXTENSION HOSE SETTING

Tank top to grade\* 33 1/2" in.  
 Extend hose on suction tube 6" or more below tank top 8" in.

\*If fill pipe extends above grade, use top of fill

USE WITH THERMAL SENSOR PN5039 (Blue Box)

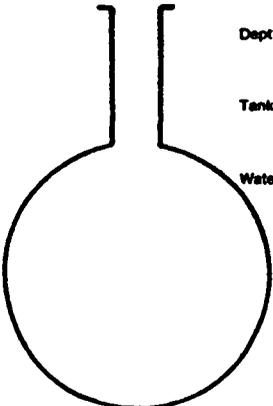

22. Thermal-Sensor reading after circulation 17,112 digits  
74-75 °F

23. Digits per °F in range of expected change 321 digits

21. VAPOR RECOVERY SYSTEM  Stage I  Stage II

24b. COEFFICIENT OF EXPANSION RECIPROCAL METHOD

Type of Product Waste Oil  
 Hydrometer Employed 4 H  
 Temperature in Tank After Circulation 74.4 °F  
 Temperature of Sample 74 °F  
 Difference (+/-) -0.4 °F  
 Observed A.P.I Gravity 32.7  
 Reciprocal 2203 Page # 36  
561 × 2203 = 2546527  
 Total quantity in full tank (17) Reciprocal Volume change in this tank per °F  
 Transfer to Line 26a.

Depth of burial 79 1/2" in.  
 Tank dia. 46" in.  
 Water table to tank bottom 79 1/2" in.

NOTES.

The above calculations are to be used for dry soil conditions to establish a positive pressure advantage, or when using the four pound rule to compensate for the presence of subsurface water in the tank area.

Refer to N.F.P.A. 30, Sections 2-3.2.4 and 2-7.2 and the tank manufacturer regarding allowable system test pressures.

24a. IF USING THERMAL SENSOR DTS-2000 OR QC-2000 WHICH READ 1000 DIGITS PER °F TRANSFER 1000 TO LINE 26, DIGITS PER °F IN TEST RANGE.

24c. FOR TESTING WITH WATER see Table C & D

Water Temperature after Circulation Table C from Thermal Sensor N/A °F

Coefficient of Water Table D N/A

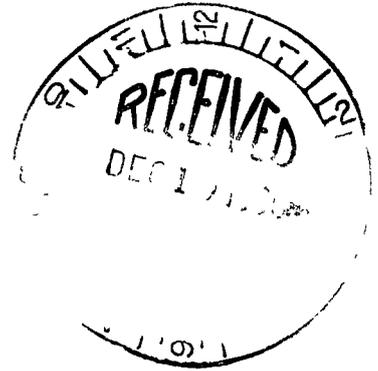

Added Surfactant?  Yes  No Transfer COE to Line 25b

25. (a) N/A × (b) N/A = (c) N/A gallons  
 Total quantity in full tank (17) Coefficient of expansion for involved product Volume change in this tank per °F

26. (a) 2546527 + (b) 321 = (c) .0007933 This is test factor (a)  
 Volume change per °F (25 or 24b) Digits per °F in test Range (23 or 24a) Volume change per digit Compute to 4 decimal places

DRAFT

12/1/89

NICHOLE,

YOU REQUESTED INFORMATION  
FROM 11/14/89 BACK DATING TO 10/10/89  
(MY FIRST DAY OF BUSINESS). MY OCTOBER  
BOOKS ARE STILL WITH MY ACCOUNTANT.  
I'LL HAVE THAT INFORMATION IN APPROX.  
10 DAYS, I'LL SEND IT TO YOU THEN.

GREG GRATLO  
UNOCAL # 6115  
4350 EL CAMINO REAL  
LOS ALTOS CA 94022

The marked items represent violations of the above-referenced codes(s) and must be corrected as follows:

*Closure of 2 - 10,000 gal. gasoline tanks (one unleaded, one leaded). (installed in 1969)*

*Slight corrosion and some pitting over entire surface of tanks but no visible holes. During excavation of one tank spillage occurred from tanks into hole of approximately 5-10 gallons gasoline, water, CO<sub>2</sub> mixture.*

*Soil samples taken from under each tank end at depths of 2', and greater if contamination observed. (5 samples total taken from pit).*

*Visible signs of soil contamination - strong discoloration down to 20', possibly deeper. Strong odor. Samples to be analyzed for TPH as gasoline, BTE & X, tetraethyl lead. Provide analysis to above office within 15 days.*

## INSTRUCTIONS

### EMERGENCY

Indicate whether emergency response personnel and equipment were involved at any time. If so, a Hazardous Material Incident Report should be filed with the State Office of Emergency Services (OES) at 2800 Meadowview Road, Sacramento, CA 95832. Copies of the OES report form may be obtained at your local underground storage tank permitting agency. Indicate whether the OES report has been filed as of the date of this report.

### LOCAL AGENCY ONLY

To avoid duplicate notification pursuant to Health and Safety code Section 25180.7, a designated government employee should sign and date the form in this block. A signature here does not mean that the leak has been determined to pose a significant threat to human health or safety, only that notification procedures have been followed if required.

### REPORTED BY

Enter your name, telephone number, and address. Indicate which party you represent and provide company or agency name.

### RESPONSIBLE PARTY

Enter name, telephone number, contact person, and address of the party responsible for the leak. The responsible party would normally be the tank owner.

### SITE LOCATION

Enter information regarding the tank facility. At a minimum, you must provide the facility name and full address.

### IMPLEMENTING AGENCIES

Enter names of the local agency and Regional Water Quality Control Board involved.

### SUBSTANCES INVOLVED

Enter the name and quantity lost of the hazardous substance involved. Room is provided for information on two substances if appropriate. If more than two substances leaked, list the two of most concern for cleanup.

### DISCOVERY/ABATEMENT

Provide information regarding the discovery and abatement of the leak.

### SOURCE/CAUSE

Indicate source(s) of leak. Check box(es) indicating cause of leak.

### CASE TYPE

Indicate the case type category for this leak. Check one box only. Case type is based on the most sensitive resource affected. For example, if both soil and ground water have been affected, case type will be "Ground Water". Indicate "Drinking Water" only if one or more municipal or domestic water wells have actually been affected. A "Ground Water" designation does not imply that the affected water cannot be, or is not, used for drinking water, but only that water wells have not yet been affected. It is understood that case type may change upon further investigation.

### CURRENT STATUS

Indicate the category which best describes the current status of the case. Check one box only. The response should be relative to the case type. For example, if case type is "Ground Water", then "Current Status" should refer to the status of the ground water investigation or cleanup, as opposed to that of soil. Descriptions of options follow:

No Action Taken - No action has been taken by responsible party beyond initial report of leak.

Leak Being Confirmed - Leak suspected at site, but has not been confirmed.

Preliminary Site Assessment Workplan Submitted - workplan/proposal requested of/submitted by responsible party to determine whether ground water has been, or will be, impacted as a result of the release.

Preliminary Site Assessment Underway - implementation of workplan.

Pollution Characterization - responsible party is in the process of fully defining the extent of contamination in soil and ground water and assessing impacts on surface and/or ground water.

Remediation Plan - remediation plan submitted evaluating long term remediation options. Proposal and implementation schedule for appropriate remediation options also submitted.

Cleanup Underway - implementation of remediation plan.

Post Cleanup Monitoring in Progress - periodic ground water or other monitoring at site, as necessary, to verify and/or evaluate effectiveness of remedial activities.

Case Closed - regional board and local agency in concurrence that no further work is necessary at the site.

IMPORTANT: THE INFORMATION PROVIDED ON THIS FORM IS INTENDED FOR GENERAL STATISTICAL PURPOSES ONLY AND IS NOT TO BE CONSTRUED AS REPRESENTING THE OFFICIAL POSITION OF ANY GOVERNMENTAL AGENCY.

### REMEDIAL ACTION

Indicate which action have been used to cleanup or remediate the leak. Descriptions of options follow:

Cap Site - install horizontal impermeable layer to reduce rainfall infiltration.

Containment Barrier - install vertical dike to block horizontal movement of contaminant.

Excavate and Dispose - remove contaminated soil and dispose in approved site.

Excavate and Treat - remove contaminated soil and treat (includes spreading or land farming).

Remove Free Product - remove floating product from water table.

Pump and Treat Groundwater - generally employed to remove dissolved contaminants.

Enhanced Biodegradation - use of any available technology to promote bacterial decomposition of contaminants.

Replace Supply - provide alternative water supply to affected parties.

Treatment at Hookup - install water treatment devices at each dwelling or other place of use.

Vacuum Extract - use pumps or blowers to draw air through soil.

Vent Soil - bore holes in soil to allow volatilization of contaminants.

No Action Required - incident is minor, requiring no remedial action.

COMMENTS - Use this space to elaborate on any aspects of the incident.

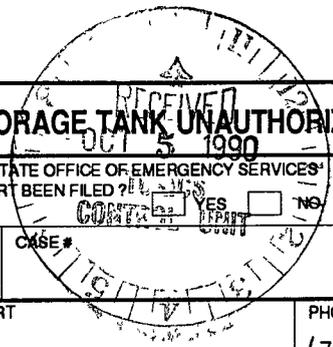

SIGNATURE - Sign the form in the space provided.

### DISTRIBUTION

If the form is completed by the tank owner or his agent, retain the last copy and forward the remaining copies intact to your local tank permitting agency for distribution.

- 1 Original - Local Tank Permitting Agency
- 2 State Water Resources Control Board, Division of Loans and Grants, Underground Storage Tank Program, P O Box 944212, Sacramento, CA 94244-2120
- 3 Regional Water Quality Control Board
- 4 County Board of Supervisors or designee to receive Proposition 65 notifications
- 5 Owner/responsible party

The marked items represent violations of the above-referenced codes(s) and must be corrected as follows:

*Soil samples taken along product line and vapor lines (observed to contain fuel) every 20 linear feet and at bends/intersections in pipe. Fifteen (15) total samples taken by Kaprealian Engineering.*

*Samples to be analyzed for TPH - gasoline, BTEX & X and total lead.*

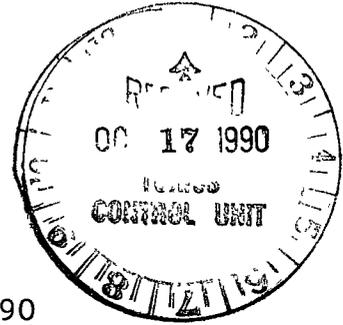

*Provide copy of analysis to Nicole Sakaby at above office within 15 days.*

Los Altos, California

NOTE

Dear Ms. Jakaby:

Unocal understands that the Santa Clara County Department of Environmental Health prefers excavation of contaminated soil over other remedial alternatives. However, considering the backfill requirements of the Santa Clara Valley Water District, we do not consider excavation to be an appropriate or cost-effective solution for the above-mentioned site. Consequently, Unocal intends to install the replacement tanks in the existing tank pit without further excavation. A conductor casing will be installed through the tank backfill to allow for the installation of soil vapor extraction wells, which will be utilized to remediate the soil after the tank replacement is completed.

Unocal understands that removal of the replacement tanks may be required in the future if our chosen remedial alternative proves ineffective.

As always, work plans for any future efforts will be submitted to the appropriate regulatory agencies before commencing remedial activities. If you have any questions, please feel free to call me @ (415) 277-2303.

Sincerely,

*Ronald E Bock*

COMMENTS

Talked to R. Bock about his FAX of this date. I explained that our department does not do remediation. Our concern was with installation of new tanks in contaminated soil that might require future excavation. I told him that the RWQCB (Penny Silver) had told me that SCVWD requires excavation of soil with TPH > 1000 ppm. (their soil sample was ~~1800~~ 1900 ppm TPH & 1.7 ppm benzene). Also I was advised that is the soil was clay that vapor extraction just would not work. I did say that they could go ahead & install new tanks with the provision that they would be removed if excavation of soil was required.

Nicole

**RE: Unocal #6115  
4350 El Camino Real, Los Altos, CA**

The plans for the proposed tank system closure and replacement have been reviewed and approved subject to the following conditions and requirements:

#### Closure

1. Submit a closure permit application and fees at least 30 days before the demolition is scheduled to occur (enclosures).
2. Closure and soil sampling shall be witnessed by a representative from this office. The samples shall be collected from a) the tank excavation, b) at piping turns and every 20 ft. along the piping run, c) from the stockpiled soil, d) other locations as required at the discretion of the TCU representative.
3. The tanks shall be removed from the site immediately after excavation and transported as hazardous waste under manifest to an approved disposal site.

#### New Installation

4. The pipeline leak monitoring proposal does not satisfy California Underground Storage Tank Requirements for single walled piping in lined trenches. Submit a revised proposal which includes automatic fuel shut off upon detection of a pipeline leak.
5. Cathodically protect all exposed metal subject to corrosion. Submit a proposal which references protection for metal risers and piping fittings.

**NOTE: SUBMITTALS REQUIRED IN ITEMS #4 & 5 MUST BE REVISED AND APPROVED BY THIS OFFICE PRIOR TO STARTING CONSTRUCTION.**

6. The following construction inspections are **required** and shall be scheduled with at least **48 hours notice**.

- a) Double wall tank holiday test
- b) Double wall tank air pressure test after setting in excavation. Gauges shall be 0-10 or 0-15 psi with pressure relief valves set for 5 psi.
- c) Primary piping air pressure test
- d) Trench liner flood test
- e) Precision tank system test
- f) A leak monitoring system demonstration shall be required during the final construction inspection before tank systems are placed into service.

If you have any questions about the content of this letter or require further assistance, please contact Nicole Jakaby at (408) 299-6930,

HAZARDOUS MATERIALS MANAGEMENT PLAN (HMMP)

If a plan has previously been submitted to any other public agency which includes substantially the same information required for any part(s) of the HMMP, that plan may be submitted in place of the corresponding part(s).

Part I: Facility Description

Address: 4350 EL CAMINO REAL

Business Name: UNOCAL SS # 6115

Nature of Business: AUTOMOBILE REFUELING STATION

Responsible Official: GREG GALATOLO

Title: DEALER Phone: 415-991-0299

Owner: UNION OIL OF CALIFORNIA

Address: 2175 N. CALIFORNIA BLVD, CONCORD CA

Applicant: GREG GALATOLO

Number of Employees: 10 Shifts per Day: 2

Hours of Operation: 6AM - 10PM

Permits Relating to Hazardous Materials Storage from Other Agencies:

BAY AREA AIR QUALITY MANAGEMENT DISTRICT

Flood Zone: "A"

Water Table: 130 FT ±

Earthquake Faults: \_\_\_\_\_

Surrounding General Land Uses Within One Mile (Zoning):

EAST - SHOPPING MALL / COMMERCIAL-RESIDENTIAL

Special Land Uses Within One Mile (Schools, Hospitals, Institutions, Residential:)

EAST - SHOPPING MALL

Emergency Response Persons (Weekend, holiday, evening):

1. Name: CERIE COLATOLO

Title: DEALER

Phone: 408-968-2140

2. Name: SCOTT KENT

Title: MANAGER

Phone: 408-739-6989

Part 2: Facility Map

On a separate sheet (8½" x 11"), draw a map to legible scale showing the location of all buildings and structures, chemical loading areas, parking lots, internal roads, and storm and sewer drains. Indicate specific uses of adjacent properties.

Include in the map, locations of and access to all hazardous materials storage facilities whether interior, exterior, and underground. Indicate the contents and quantity range of each as well as the location of any emergency equipment.

It is recommended that separate maps be drawn for each building within your facility. A facility storage map key may be used to simplify the drawing. A sample map with key is enclosed.

PLEASE SEE ATTACHED SITE PLAN

Part 3: Separation of Materials

Describe methods to be utilized to ensure separation and protection of stored hazardous materials from factors which may cause a fire or explosion, or the production of a flammable, toxic, or poisonous gas, or the deterioration of the primary or secondary containment.

PLEASE SEE ATTACHED VLOCAL FORM

Part 4: Monitoring Program

Describe monitoring methods including location, type, and manufacturer specifications, to be used in each hazardous materials storage facility.

Specify the frequency of inspections of storage facilities to be conducted by the permittee. Include a blank inspection check sheet or log to be used during routine inspections. The sheet shall provide for the recording of the date and time of inspection, the date and time of any corrective action taken, the name of the inspector, and the counter signature of a responsible official designated in the HMMP. Sample logs are enclosed.

PLEASE SEE ATTACHED VLOCAL FORM

# EMERGENCY RESPONSE PROCEDURE

In the event of a fire, spill, or a leak or suspected leak in the tanks and/or piping, the following steps are to be taken as applicable:

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
  2. If there is any immediate danger, ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately."
  3. CALL FOR HELP in case of an emergency by dialing 9-1-1 and giving the following information:  
  
"THERE IS A FIRE / DANGEROUS GASOLINE SPILL at the UNOCAL Station at (give address)." If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
  4. LOOK AROUND to assure that all others have left the station if necessary, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist, or direct assistance to, anyone having difficulty leaving the station area, and anyone who may be injured.
  5. ATTEMPT TO EXTINGUISH any fire if you can do so safely. Have the fire extinguisher ready to use in the event of any dangerous spill. Try to contain any large spill, or use absorbent on smaller spills.
  6. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
  7. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:
    1. Name/Bus./Home: Greg Galatolo 415-941-0244 / 408-968-2140
    2. Name/Bus./Home: Scott Kent 415-941-0244 / 408-739-6989
  8. NOTIFY your UNOCAL Retail Representative by phone WITHIN 24 HOURS (also use the UNOCAL Emergency Phone, after hours):
    1. UNOCAL REPRESENTATIVE/PHONE NUMBER: M. Fisher 408-292-7600
    2. UNOCAL EMERGENCY PHONE: (415) 561-9322 (24 HOURS)You must mail a completed Unauthorized Release Report to the Rep within 24 hours.
- UNOCAL will notify the appropriate State and Local agencies unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:
1. LOCAL AGENCY: Santa Clara County Office of Hazardous Materials  
PHONE NUMBER: 408-299-6930
  2. CALIFORNIA OFFICE OF EMERGENCY SERVICES: (800) 852-7550 (24 HOURS)
9. Dealer should attempt to isolate leak location by inspection.
  10. UNOCAL Retail Representative will coordinate with UNOCAL Maintenance and Construction whatever corrective actions need to be taken beyond the Dealer's capabilities. UNOCAL Maintenance and Construction will file whatever reports need to be filed with local and state agencies, and send a copy to the station for the Dealer's files.

A COPY OF PAGE MUST BE FILLED OUT AND POSTED CONSPICUOUSLY ON SITE.

## HOW TO USE THIS BOOKLET

The cover sheet of this booklet contains useful information about the underground facilities at your station. Depending on the information given, you must use different forms in this booklet:

1. If your station has any single wall product tanks, use Form C.
2. If your station has any double wall product tanks, use Form B.
3. If your station has a single wall waste oil tank, use Form D.
4. If your station has a double wall waste oil tank, use Form B.
5. If your station has any double wall piping, use Form B.
6. If your station has a piping trench liner, use Form B.
7. If your station has an electronic monitoring system for any double wall piping or trench liner, you need not use Form B for any double wall tanks or piping.
8. If your station has vadose or groundwater monitoring wells, you still need to use Forms C and/or D as applicable.
9. If your station has other hazardous materials (see Daily Visual Monitoring, below), you are responsible also for that portion of Form B.

Also, all stations must complete Form A and send it in every 3 months to the local agency shown on the cover sheet.

In case of a leak or spill, you must complete Form E to attach to Form A, and you must send a copy of Form F to your UNOCAL Representative within 24 hours. You must also notify your representative by phone (and/or call the UNOCAL Emergency Phone after hours).

Your must post a copy of Page 3 at a conspicuous location in your cashiers area.

Your must keep a copy of Form H to document the training received by your employees.

KEEP COPIES OF ALL FORMS YOU MAIL OUT!

### DAILY VISUAL MONITORING

Hazardous Materials stored underground include:

- Gasoline
- Diesel Fuel
- Waste Oil

These products are monitored for leaks in the underground tanks and piping.

Hazardous Materials stored aboveground include:

- Propane
- Waste Oil (prior to dumping in underground tanks)
- Motor Oil
- Transmission Oil
- Gear Lubricant (80W/90)
- Grease
- Solvent (including parts cleaners)
- Battery Acid
- Antifreeze

If your station stores any of these materials, the storage areas must be visually inspected every day for signs of leakage.

If there is a leak or spill of any of the hazardous materials, whether stored above or underground, you must follow the Emergency Response Procedures outlined on Page 3, as applicable.

# MONITORING FOR SINGLE-WALL TANKS

## INSPECTIONS TO BE CONDUCTED BY DEALER

1. Daily reconciliation shall be made of the inventory control records.
2. Daily visual inspection for leaks shall be made in the areas of:
  - Submerged pump
  - Tank fill (also inspected after each delivery)
3. Dealer MUST be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential piping leak.

## PRODUCT TANK GAUGING PROCEDURE

1. Use a gauge stick (dipstick) to measure the level of gasoline in each tank. Lower the stick slowly until it hits the bottom of the tank. The use of fuel-finding paste is recommended.
2. Slowly pull the stick back out, and observe the point where the stick begins to be discolored by the liquid.
3. Write this number down, and repeat the same procedure. If the two numbers are not close, repeat the procedure until the numbers agree.
4. Enter the final number in your dealer books.

If it is raining, water can spoil the readings, and should not be allowed to enter the tank. If it does not stop raining, care must be taken to ensure the stick readings are accurate.

## RECORD KEEPING FOR SINGLE-WALL TANKS

1. Use your dealer books to keep track of your daily dipstick reading.
2. Record daily all dispenser meter readings in your dealer books.
3. Record all deliveries in your dealer books.
4. The dipstick, dispenser meter, and delivery recordings are to be used daily in filling out the "Inventory Reconciliation Sheet" (attached).

## WASTE OIL TANK GAUGING PROCEDURE

1. To monitor the inventory level in the waste oil tank, be prepared to have the tank locked for at least 12 hours or longer if required by your local agency. This shall be done weekly. NO INPUTS OR WITHDRAWALS SHALL OCCUR DURING THESE PERIODS.
2. Stick gauge the tank immediately before closing access to the waste oil tank, and immediately after reopening the tank, and enter those numbers in columns C and D of the "Waste Oil Tank Gauging Sheet" (attached) in both inches and gallons.
3. The difference between those two columns is the actual variation (column E).
4. For allowable variation (column F), use 2.8 gallons if you have a 280 gallon capacity, or 5.0 gallons if you have a 520 or 550 gallon tank.

## WHAT TO DO IF YOU EXCEED THE ALLOWABLE VARIATION

If you EVER exceed the allowable variation (Inventory Reconciliation Sheet, column 13, or Waste Oil Tank Gauging Sheet, column G), follow the RESPONSE PROCEDURE shown on Page 3. Notify your UNOCAL representative within 24 hours of discovery of a suspected leak. UNOCAL will be responsible for coordinating one or more of the following:

- Performing a metered vs. measured inventory reconciliation.
- Contacting the appropriate State and Local agencies.
- Visually inspecting for leaks.
- Calibrating the dispenser meters.
- Hiring a tank tester to determine if there is a leak.
- Having the tank(s) and/or piping repaired or replaced if necessary.

The "Unauthorized Release Report" must be sent to UNOCAL within 24 hours. The "Release Evaluation Checklist" must be attached to the "Inventory Reconciliation Sheet", or the "Waste Oil Tank Gauging Sheet" where the allowable variation was exceeded.

# MONITORING FOR DOUBLE-WALL TANKS

## INSPECTIONS TO BE CONDUCTED BY DEALER

1. Daily reconciliation shall be made of the Inventory Control Records.
2. Daily visual inspection for leaks shall be made in the areas of:
  - Submerged pump
  - Tank fill (also inspected after each delivery)
3. Dealer MUST be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential leak.

## SECONDARY CONTAINMENT MONITORING PROCEDURE

Tank or Piping Secondary Containment (annular space or Piping Trench Liner) shall be monitored daily by the dealer, unless a less frequent period is allowed. This is done to determine if product is leaking from the primary container or if water is entering from an outside source. This procedure is not necessary if an electronic monitoring system is installed to monitor these items. Contact your UNOCAL representative for monitoring port locations.

1. Use a gauge stick (dipstick) to detect any liquid in the tank annular space, double wall piping monitoring ports, or piping trench liner monitoring wells. Lower the stick slowly until it hits the bottom of the tank annular space.
2. Slowly pull the stick back out and observe whether the stick has been discolored by liquid. If product and/or water is detected, immediately contact your representative.
3. Write this number down, and repeat the same procedure. If the two numbers are not close, repeat the procedure until the numbers agree.
4. Enter the final number in the "Secondary Containment Recording Sheet (attached).

NOTE: Piping trench monitoring wells consist of slotted PVC pipe which allows liquid intrusion and a manhole for access. Wells are located at the lowest point of the fiberglass trench liner.

## RECORD KEEPING FOR DOUBLE-WALL TANKS & PIPING

1. Keep track daily of the liquid level on the "Secondary Containment Recording Sheet".
2. If ANY fuel and/or water is discovered in the trench liner, call your representative IMMEDIATELY, and explain the situation.
3. If the representative has been notified, but after 8 hours it has not been possible to remove all the liquid from the secondary containment, dealer must contact the local agency shown on the cover sheet.

## ELECTRONIC MONITORING SYSTEMS

If this station is equipped with an electronic monitoring system for underground tanks and piping, in the event of a leak in the primary containment, product will be contained in the annular space. The sensors for the electronic monitoring system are located at the low end of each tank, and at the low end of the piping where the product will drain back into the tank. There may be sensors at additional locations. Sensors will signal the presence of a leak.

If a leak is discovered, the "Unauthorized Release Report" must be sent to UNOCAL within 24 hours. The "Release Evaluation Checklist" must be attached to the "Quarterly Report".

# OVERFILL/SPILL PROTECTION & CLEANUP

## 1. DELIVERIES/GAUGING

Dealer is responsible to ensure that the delivery he or she requests is not in excess of the tank capacity, taking into consideration the amount currently in tank. Driver is to gauge tank to assure capacity is available for the entire load and must remain in attendance during the entire delivery to monitor the operation.

## 2. BALL VENT LINE FLOAT SYSTEM

(Only for double-wall tanks installed after July 1986.)

The ball float valve system installed with the tank substantially prevents the possibility of overfill occurring. If the tank is filled to the ball float level, the petroleum product delivery will be cut to 3 gallons per minute alerting the driver of a potential overfill condition. In the event that this occurs, the following actions will be taken:

1. The delivery truck driver shall turn off the petroleum product supply at the truck, leaving the hose fully connected to the tank fill pipe line and the truck.
2. The small amount of petroleum product remaining in the hose shall be slowly drained into the tank. Since the ball float valve is 2 to 3 inches below the top of the tank, there remains a 100 + gallon capacity within the tank at the moment when the ball float closes off delivery. The bleed hole in the ball float valve allows the remaining petroleum product in the hose to completely drain through the fill pipe into the tank.
3. The hose shall be disconnected from the fill pipe only when it has fully drained. In the event that spillage occurs upon hose disconnection, the remaining small amount of petroleum product will be properly contained.

## 3. WASTE OIL TANK

1. Station is equipped with waste oil buckets which hold a maximum capacity of 3 gallons (about 3 to 4 cars' worth of waste oil).
2. Prior to dumping any waste oil, dealer is to gauge the tank to assure that holding capacity is greater than that which will be put into the tank.
3. Waste oil is poured directly through fill/pump out pipe, using a funnel. Should any waste oil spill during this operation, it will be properly contained using absorbent material.

#### 4. CLEAN-UP/RECOVERY

1. Small spills (less than 1 gallon and 0.5 inches deep requiring 15 minutes to clean up) shall be cleaned up using absorbent materials.
2. Larger spills occurring during product delivery shall be reported to the terminal by the dealer and/or by delivery truck driver. The terminal supervisor will notify a local petroleum maintenance contractor who is equipped with a N.F.P.A. approved type hand pump, vacuum and transport container. Large spills not caused by delivery shall be reported immediately to your rep.
3. Spills shall be cleaned up within 8 hours of detection, returned to local terminal and/or disposed of in a lawful manner.
4. Dealer shall record all spills whether or not it is due to delivery overflow or accidental spillage, which exceeds approximately one gallon, and action taken on the "Unauthorized Release Report" (attached), and send it to UNOCAL within 24 hours.
5. Large spills (more than 1 gallon) must be reported to the local agency indicated on the cover sheet within 24 hours. If the spill is large enough to pose a significant hazard, it must also be reported to the California Office of Emergency Services at 800-852-7550.

IN CASE OF EMERGENCY CALL 9-1-1

### INSPECTIONS TO BE COORDINATED BY UNOCAL

#### YEARLY INSPECTIONS AND TESTING

Yearly testing shall be made of the following:

1. Pressurized piping systems shall be monitored using in-line leak detectors. Leak detectors shall be tested annually for proper operation. Dealer MUST be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential piping leak.
2. Tanks and piping shall be tested annually for tightness, using a State-Certified test system. (For non-secondarily contained tanks and piping only.)
3. Electronic monitoring systems shall be tested annually for proper operation. (For secondarily contained tanks and piping only.)
4. Dispenser core holes, shear valves, and blending valves shall be annually inspected by UNOCAL for signs of leakage.
5. Dispenser meters (recording total sales in gallons) shall be calibrated once annually by UNOCAL. Any additional calibration will be the responsibility of the dealer. Use the "Dispenser Meter Calibration Form".

#### VADOSE/GROUNDWATER MONITORING WELLS

This section is not applicable unless "Monitoring Methods" line on cover sheet shows "Vadose Wells" or "Groundwater Wells".)

The monitoring of vadose wells and groundwater monitoring wells is contracted out to Applied Geo Systems. Monitoring is performed monthly for vapor analysis of the vadose wells and subjective analysis for traces of product in the groundwater monitoring wells. Monitoring is performed quarterly for laboratory analysis of groundwater samples. Monitoring records are maintained on-site in the dealer's office, and are available for inspection.

# EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline:

## I. FIRST THINGS TO KNOW

- A. Emergency Pump Shut-off: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.

LOCATION: South exterior corner of structure

- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.

LOCATION: West corner of structure

- C. WATER SHUT-OFF: The water shut-off may be necessary in some cases.

LOCATION: In sidewalk of Los Altos Avenue

- D. FIRST AID KIT:

LOCATION: North wall of storage room

- E. FIRE EXTINGUISHERS: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.

LOCATION: 2 -north wall of service bay

- F. ABSORBENT: In the form of crystals or cloth, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spills, merely try to contain it; a vacuum truck should be used to clean up any large spills.

LOCATION: In service bay

- G. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: Veterans Memorial Hospital  
ADDRESS: 3801 Miranda Avenue, Palo Alto  
PHONE NUMBER: 408-493-5000

2. NAME: \_\_\_\_\_  
ADDRESS: \_\_\_\_\_  
PHONE NUMBER: \_\_\_\_\_

II. All employees should review the Service Station Monitoring Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station.

III. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: For direct contact, flush the affected eye(s) with clean water. If irritation or redness develops, seek medical attention.

B. SKIN CONTACT: Wipe product from skin and remove soaked clothing. Cleanse affected area(s) thoroughly by washing with soap and water. If irritation develops and persists, seek medical attention. Do not use solvents or thinners to remove product from skin.

C. INHALATION (Breathing): If symptoms of exposure develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek medical attention. Symptoms include: flushing, blurred vision, dizziness, nausea, headache, drowsiness, loss of coordination, and fatigue. If victim is not breathing or if breathing difficulties develop, artificial respiration or oxygen should be administered by qualified personnel. Seek immediate medical attention.

D. INGESTION (Swallowing):

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!

If victim is conscious and alert, give 2 to 3 cups of milk or water to drink. Seek medical attention.

E. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

# QUARTERLY REPORT

# A

S/S #: \_\_\_\_\_ BUSINESS NAME: \_\_\_\_\_  
 Address: \_\_\_\_\_

Fill out this form quarterly and send in with all other forms, as applicable.  
**KEEP COPIES OF ALL FORMS YOU MAIL OUT.**

Quarter #	Tank #	Capacity (gal)	Product
Start Date:			
End Date:			
Year:			

CHECK ONE BOX BELOW AS APPLICABLE:

I hereby certify under the penalty of perjury that all product level variations for this facility were within allowable limits for this quarter. ("NO" in column 12, Inventory Reconciliation Sheet; "NO" in column 7, Tank Gauging Sheet; "OK" in all applicable columns of the Daily Visual Monitoring Log).

Inventory variation at this facility exceeded the allowable limits for this quarter. I hereby certify under penalty of perjury that the source for the variation(s) was not due to an unauthorized (leak) release. ("YES" to any of the above).

There was an unauthorized (leak) release at this facility during this quarter. I hereby certify under penalty of perjury that all necessary corrective actions have been or are being taken.

DEALER'S SIGNATURE/DATE: \_\_\_\_\_

**RE: Unocal #6115  
4350 El Camino Real, Los Altos, CA**

The plans for the proposed tank system closure and replacement have been reviewed and approved subject to the following conditions and requirements:

### Closure

1. Submit a closure permit application and fees at least 30 days before the demolition is scheduled to occur (enclosures).
2. Closure and soil sampling shall be witnessed by a representative from this office. The samples shall be collected from a) the tank excavation, b) at piping turns and every 20 ft. along the piping run, c) from the stockpiled soil, d) other locations as required at the discretion of the TCU representative.
3. The tanks shall be removed from the site immediately after excavation and transported as hazardous waste under manifest to an approved disposal site.

### New Installation

4. The pipeline leak monitoring proposal does not satisfy California Underground Storage Tank Requirements for single walled piping in lined trenches. Submit a revised proposal which includes automatic fuel shut off upon detection of a pipeline leak.
5. Cathodically protect all exposed metal subject to corrosion. Submit a proposal which references protection for metal risers and piping fittings.

**NOTE: SUBMITTALS REQUIRED IN ITEMS #4 & 5 MUST BE REVISED AND APPROVED BY THIS OFFICE PRIOR TO STARTING CONSTRUCTION.**

6. The following construction inspections are **required** and shall be scheduled with at least **48 hours notice**.
- a) Double wall tank holiday test
  - b) Double wall tank air pressure test after setting in excavation. Gauges shall be 0-10 or 0-15 psi with pressure relief valves set for 5 psi.
  - c) Primary piping air pressure test
  - d) Trench liner flood test
  - e) Precision tank system test
  - f) A leak monitoring system demonstration shall be required during the final construction inspection before tank systems are placed into service.

If you have any questions about the content of this letter or require further assistance, please contact Nicole Jakaby at (408) 299-6930,

Sincerely,

COMMENTS

- Discussed demolition/remodeling plans with T. Lum with Rob. H. Lee, Assoc. He indicated the plans were incomplete and will send the necessary information:
- 1) System uses single wall piping in a fiber glass trench.
- 2) Piping leak detection was inadvertently deleted.
- 3) I also advised him that the mechanical red jacket leak detector was inadequate. That state board requires auto shut of if leak is detected

### III. EMERGENCY RESPONSE TRAINING PLAN

PERSON RESPONSIBLE FOR EMERGENCY RESPONSE TRAINING PROGRAM:

Name FELIX BOLTON Title OWNER

This plan describes the basic training program in use at this facility. The training provided to facility personnel and the records maintained on that training are indicated by a checked box.

#### 1. TRAINING REQUIREMENTS

- All employees are trained and drilled in the following as indicated:
  - Procedures for internal alarm/notification.
  - Procedures for notification of external emergency response organizations.
  - Location and content of emergency response plan.
- Chemical handlers are trained in the following as indicated:
  - Safe methods for handling and storage of hazardous materials.
  - Proper use of personnel protection equipment.
  - Locations and proper use of fire and spill control equipment.
  - Specific hazards of each chemical to which they may be exposed, including the pathways of exposure, i.e., skin absorption, inhalation, ingestion.
- Emergency response team members are trained in the following as indicated:
  - Procedures for shutdown of operations.
  - Procedures for using, maintaining and replacing facility emergency and monitoring equipment.
- All personnel are trained in emergency response procedures within six months of hiring.
- Refresher training is provided at least annually.

2. PERSONNEL TRAINING RECORDS

- Training records are maintained for all employees as indicated:
  - Verification that training was completed by employee.
  - Description of type and amount of introductory and continuing training.
  - Training records of former employees are retained for at least three years.
  - Documentation on facility emergency response drills conducted during the year maintained and available for review

\* \* \* \* \*

For larger and more complex hazardous materials facilities, a more comprehensive and detailed emergency response training plan should be maintained on site and should be available for review by the inspecting jurisdiction.

COMMENTS

Talked to Paul Yamamoto. He's going to send me some info. on how double-wall tanks are going to be monitored. He says the operators now know how to do it & have what they need, but are waiting for written instructions before starting. I told him they are operating without a permit & must get going with the monitoring. He will get right on it & call back when implemented.

UNDERGROUND TANK MONITORING PLANS  
UNOCAL SERVICE STATIONS  
JOB #1183

Gentlemen:

Union Oil Company is now diligently finding their Underground Tank Monitoring Plans to be implemented at gasoline service stations. We regret being still unable to provide you with the final details of these monitoring plans. However, we have advanced to the point where we can give you the essential elements of the final plans that will be implemented as soon as possible.

1. Dealers are required under their lease agreement to perform daily inventory reconciliation at their facilities.
2. All facilities are equipped with pipeline leak detectors.
3. All facilities receive annual meter calibration, inspection of shear valves, and testing of pipeline leak detectors.
4. Annual tank testing is performed at all facilities with single-wall tanks.

Enclosed please find a list of the UNOCAL facilities in your jurisdiction. If you have any questions, please contact:

Dear Ms. Gien:

The fuel and waste oil tanks at Service Station No's 4918 and 5957 are double wall steel fiberglass coated tanks. Monitoring of the annulus consists of "daily sticking" of the access port provided for each tank using a gauge stick and water finding paste.

Service Station No. 6115 has single wall steel fuel and waste oil tanks. State monitoring alternative number five will be utilized for the fuel tank and number seven for the waste oil tank. 1987 tank testing is scheduled for completion by November of this year for our division. Results will be forwarded to your office upon receipt.

Formalized plans will be prepared by our Engineer consultant. Should you have any questions please contact me at (415) 945-7676.

Very truly yours,

- d. Corrosion protection: Steel tanks were installed per code at time and are generally protected from corrosion by wrapping and bituminous coating material.
- e. Piping and fittings: Pipelines are fiberglass or steel. Steel piping is generally wrapped with a vinyl corrosion protective material.

All pipelines are equipped with leak detectors.

- f. Product storage at this site:

	<u>PRODUCT</u>	<u>TANK VOLUME</u>	<u>TANK MATERIAL</u>
(1)	Unleaded gasoline	<u>10,000</u> gallons	<u>Steel</u>
(2)	Leaded gasoline	<u>10,000</u> gallons	<u>Steel</u>
(3)	Waste oil	<u>550</u> gallons	<u>Steel</u>
(4)	Diesel fuel	<u>          </u> gallons	<u>          </u>
(5)	Other:	<u>          </u>	<u>          </u>

7. Separation of material: Each petroleum product grade is stored in individual tank with individual pipeline to dispensers. Each storage tank has a product and capacity tag attached to the fill tube. Fill manhole covers are identified by color code. A greater hazardous situation would not exist due to mixing of products.

- 8. Proposed method for over fill protection:

- a. Operator is to control delivery and gauge tank prior to receiving fuel load to assure tank holding capacity is available for entire delivery. Driver is to gauge tank to assure capacity is available for entire delivery and to remain in attendant during delivery to monitor the operation.
- b. Clean up procedure: Small spills will be cleaned up using absorbent materials. Larger spills will be cleaned up using absorbent materials, pumps, and vacuum truck.
- c. Confirmation of leakages and investigative steps utilized in identifying the source of leak will proceed in accordance with a logical sequential process as outlined in American Petroleum Institute Standard No. 1628, "Underground Spill and Clean-up Manual" or National Fire Protection Association Standard No. 329, "Handling of Underground Leakage of Flammable and Combustible Liquids."

- b. Clean up procedure: Small spills will be cleaned up using absorbent materials. Larger spills will be cleaned up using absorbent materials, pumps, and vacuum truck.
- c. Confirmation of leakages and investigative steps utilized in identifying the source of leak will proceed in accordance with a logical sequential process as outlined in American Petroleum Institute Standard No. 1628, "Underground Spill and Clean-up Manual" or National Fire Protection Association Standard No. 329, "Handling of Underground Leakage of Flammable and Combustible Liquids."

9. Monitoring plan for detection of leaks and spills:

- a. Inventory Control - Inventory records shall be maintained and reconciled by the station operator for each tank and product for indication of possible leakage from tanks or piping. Inventory Control Record Exhibit "C".

The basic daily gasoline inventory record shall contain the following information for each tank:

- 1) Product
- 2) Stick or gauge reading opening physical inventory
- 3) Meter reading of sales
- 4) Delivery receipts
- 5) Inventory balance
- 6) Closing physical inventory
- 7) Volume differential (overage or shortage)
- 8) Signature of person reconciling inventory

Inventory records are to be maintained 1 year and reviewed quarterly.

- b. Inspection

- 1) Daily inspections shall be made of the inventory control records.
- 2) Daily visual inspections shall be made of each tanks submerged pump box and fill box and after each delivery.
- 3) Pressurized piping systems shall be monitored utilizing on line leak detectors. Operator is to be aware that reduction in product flow to 3+ gallons per minute indicates a potential leak. Leak detectors will be tested yearly for proper operation.
- 4) Periodic testing of tanks and piping for tightness will be performed for compliance with National Fire Protection Association Standard No. 329 or local ordinance.
- 5) Dispenser core holes shall be periodically inspected for signs of leakage.

10. Inspection, monitoring, and Recordable Discharge Log

a) Inspections and Monitoring

- 1) Inventory Control Record: Complete daily, review quarterly Exhibit "C".
- 2) Tank area, fill box, pump box, yard area at tanks: Daily visual inspection and after each delivery.
- 3) Dispenser core holes: Inspect quarterly.
- 4) Testing of leak detectors: Yearly test for proper operation.
- 5) Pressure test pipelines: Yearly
- 6) Test tanks: Per NFPA STD No. 329 or as required by local ordinance.
- 7) Safety equipment and supplies: Quarterly or per ordinance.
- 8) Repairs: Enter record of all repairs into Inspection Log.
- 9) All inspection observations and corrective actions to be entered on Visual Inspection Record Exhibit "D".

b. Spill Record Log: Recordable Discharge Log Exhibit "E".

- 1) Record every spill over approximately one gallon in size. Any unauthorized discharge which cannot be cleaned up within 15 minutes shall immediately be reported to owner's representative and entered in log with action taken.

11. Emergency equipment: Record of testing and maintenance

- a) Emergency shut off valves: Inspect Quarterly. Enter results into inspection record.
- b) Leak detectors: Test yearly. Enter test results into inspection record.
- c) Fire extinguishers: Test yearly. Enter test results into inspection record.
- d) Absorbent materials: Inspect supply quarterly. Enter quantity into inspection record.
- e) Emergency power shutoff: Inspect quarterly. Enter test results into inspection record.

f) Other \_\_\_\_\_

g) Delivery vehicle is equipped with following:

a) Fire Extinguishers.

b) Emergency Telephone Numbers.

Maintenance of delivery vehicle is responsibility of driver and terminal.

The above information is true and correct. If there is any change which would materially affect any answer above, I will inform the City and apply for an appropriate amendment to this permit.

I declare under penalty of perjury that the foregoing is true and correct.

RE: Change of Ownership, Former 76 Products Company Hazardous Materials Management Plans (HMMP)

To Whom It May Concern:

JOHN B. HICKS  
Architect  
Vice President

On behalf of Tosco Inc., RHL Design Group, Inc. hereby provides notification that effective April 1, 1997, Tosco Inc. acquired the assets of 76 Products Company from Union Oil Company of California (UNOCAL). Former 76 Products dealer-operated sites in your jurisdiction are provided on the attached list. The dealer-operated sites listed now are registered under the ownership of Tosco Inc., but, will continue to operate under the 76 logo. Also, operation of these sites will remain the responsibility of the business owner, dealer or manager as indicated on the current HMMP on file. Accordingly, the Dun & Bradstreet number for Tosco Inc. is: 04-468-3969.

CECIL R. SPENCER  
Architect  
Vice President

The new mailing address for all correspondence and/or invoices regarding the HMMPs or related hazardous materials permits should be directed to:

BRUCE J. GREENFIELD  
Managing Architect  
Associate

Tosco Marketing Company  
Environmental Compliance, DC-40  
PO Box 52084  
Phoenix, Arizona 85072-2084

HOWARD G. KIMURA  
Architect  
Associate

To date, the following items also have been submitted by Tosco Inc.

1. Underground Storage Tank Permit Application - Form A
2. Permit re-applications and permit fees for underground storage tanks
3. Financial Responsibility Statement

CHRIS LAWTON  
Regional Manager  
Associate

Please contact Steven A. Skanderson, RHL Design Group, Inc., at (707) 765-1660 or Guy Standard, Tosco Inc. at (602) 200-4528 if you have any questions or require additional information regarding this notification or HMMPs.

JAMES E. PRESTEN  
Regional Manager  
Associate

Sincerely,

RHL Design Group, Inc.

**AGENCY**

RE: HAZARDOUS MATERIALS MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the new Hazardous Materials Inventory and Business Plan Certification for your station. This updated HMMP is intended to amend the current HMMP. The "DEALER" copy should be attached to your current HMMP and kept in your "Success at the Pump", and available to all employees and agency personnel at all times.

**DO NOT DISCARD YOUR CURRENT HMMP**

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 3 copies of the CERTIFICATION where flagged and indicated with a "X".
2. Please return the 2 copies marked "AGENCY" and "RHL FILE" to RHL Design in the pre-stamped enclosed envelope.
3. Keep this "DEALER" copy in your Success at the Pump binder, and available for inspection.
4. Have your employees read and understand the contents of this package and sign the attached training log. Keep the training log at your station.

A copy of this HMMP Certification will be sent to: Santa Clara Co. Dept. of Env. Health within 30 days. If you have any questions regarding the content of this document, please contact RHL Design Group, Mr. Roger Beach at (707) 765-1660. If you have any additional questions, including invoicing questions, please contact Tosco Marketing Company, Hazardous Materials Coordinator at (602) 728-7080.

Sincerely,

Tosco Marketing Company

HAZARDOUS MATERIALS  
SUBMITTED FOR CERTIFICATION

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use By All Jurisdictions Within the County of Santa Clara  
Authority Cited: H&SC, 25503.3(c)

To: Agency Name: Santa Clara Co. Dept. of Env. Health  
Agency Mailing Address: P.O. Box 28070  
San Jose, CA 95159-8070

Pursuant to Section 25503.3(c) of California Health and Safety Code (H&SC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: El Camino 76:#256115  
Facility Street Address: 4350 El Camino Real City: Los Altos  
Date of Current HMBP: 01/31/2002

I certify that: (Check the appropriate box.)

- I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) or
- Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): GREG GALATOLO Title: DEALER  
Signature of Owner/Operator: [Signature] Date: 3/4/2

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The HMBP most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

**EMERGENCY RESPONSE PROCEDURES**  
**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  
 "THERE IS A FIRE / GASOLINE SPILL at the Tosco 76 service station at 4350 El Camino Real" If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. ATTEMPT to contain the spill if you can do it safely.
5. LOOK AROUND to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station area, and anyone who may be injured.
6. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
7. CONTACT the station operator if s/he is not already at the station. Use the list below for emergency contacts:

Emergency Coordinator: Greg Galatolo Title: Dealer  
 Address: 1531 Arbor Dr. Los Altos Ca 94024  
 Bus#/Home#/Alt#: 650-941-0244 / 650-948-8302 /  
 Alternate Emergency Coordinator: Tom Segovia Title: Manager  
 Address: \_\_\_\_\_  
 Bus#/Home#/Alt#: 650-941-0244 / /

8. NOTIFY the following IMMEDIATELY to assist in the emergency and agency notification process:  
 Tosco Maintenance Call Center: 1-800-726-2312  
 Tosco Business Operations Manager or District Manager  
 Tosco Environmental Compliance Coordinator: North: Janette Thompson (925) 277-2404  
South: Stephen Boyd (714) 428-6572 or (800) 759-8888 pin#1267507

Tosco Corporation will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the OPERATOR should notify these agencies:

- a) LOCAL AGENCY: Santa Clara Co. Dept. of Env. Health  
PHONE NUMBER: 408-299-8007
- b) CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24 HOURS)
- c) LOCAL POLICE AND FIRE DEPARTMENTS, 911
- d) NATIONAL RESPONSE CENTER 1-800-424-8802 (24 HOURS).

**MINOR INCIDENT:** Any incident that can be contained and cleaned up as part of the routine operations. Whenever in doubt, consider the incident a major release and use the above procedures.

1. FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if used.
2. SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See Training Plan item #H for additional direction.
3. MEDICAL: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. RECORD: Record the event in the daily monitoring log.
5. NOTIFY: the dealer of the event.

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

### I. FIRST THINGS TO KNOW:

A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA

---

B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location: IN SERVICE BAY STORAGE AREA

---

C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA

---

D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: NONE

---

E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE

---

F. PROPANE/LPG: If your station has a propane or liquefied petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.

G. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY

---

H. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.  
Location: IN SERVICE BAY STORE AREA

---

I. EMERGENCY RESPONSE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.

1. Broom: SERVICE BAY
  2. Shovel: SERVICE BAY
  3. Gloves: SERVICE BAY
  4. Goggles: SERVICE BAY
- 

J. FIRST AID KIT:  
Location: 1-IN SERVICE BAY STORE AREA

---

K. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE

---

HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) & MATERIAL SAFETY DATA SHEET (MSDS):

Location: SALES OFFICE

**II. NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME EL CAMINO HOSPITAL

ADDRESS: 2500 GRANT ROAD MOUNTAIN VIEW

PHONE NUMBER: 650-940-7055

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: STANFORD HOSPITAL

ADDRESS: 300 PASTEUR DR STANFORD

PHONE NUMBER: 650-723-5111

**III.** All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

**IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):**

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

E. DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE! If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

F. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

Document prepared by: Environmental Staff, RHL Design Group, Inc., 800-765-1025 Last updated: February 25, 2002

# HAZARDOUS MATERIALS TRAINING REQUIREMENTS

As the owner/operator of a business that handles hazardous materials, you must have the following:

- ◆ A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- ◆ A SARA Tier II Chemical Inventory Report (in California this report is included in the Hazardous Materials Management Plan, also known as the CA Business Emergency Plan)
- ◆ An Emergency Response Plan
- ◆ An Underground Storage Tank Monitoring and Leak Detection Plan
- ◆ A Release Reporting Plan

Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only needs to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.

- ◆ Training for the Hazard Communication Plan must include the following elements:
- ◆ An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
- ◆ Locations of any operations in their work area where hazardous substances are present.
- ◆ Location where a copy of the written Hazard Communication program is made available to them.
- ◆ How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
- ◆ How to detect the presence of or the release of hazardous substances in the work place.
- ◆ How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
- ◆ Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

## Emergency Response/Contingency Plan (Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

Page 1 of 11

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below).

### 1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply):

Bells;  Horns/Sirens;  Verbal (i.e. shouting);  Other (specify) \_\_\_\_\_

b.  Evacuation map is prominently displayed throughout the facility.

*Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.*

### 2. a. Emergency Contacts\*:

Fire/Police/Ambulance ..... Phone No. 911

State Office of Emergency Services ..... Phone No. (800) 852-7550

### b. Post-Incident Contacts\*:

Fire Department Hazardous Materials Program ..... Phone No.: 408-299-8007

Santa Clara County Hazardous Materials Compliance Division ..... Phone No. (408) 299-6930

California EPA Department of Toxic Substances Control ..... Phone No. (510) 540-3739

Cal-OSHA Division of Occupational Safety and Health ..... Phone No. (408) 452-7288

Bay Area Air Quality Management District ..... Phone No. (415) 771-6000

Regional Water Quality Control Board ..... Phone No. (510) 622-2300

\* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.

### c. Emergency Resources:

Poison Control Center ..... Phone No. (800) 876-4766

Nearest Hospital: Name: EL CAMINO HOSPITAL Phone No.: 650-940-7055

Address: 2500 GRANT ROAD City: MOUNTAIN VIEW

### 3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

None

**4. Emergency Procedures:**Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (or his/her designee when the emergency coordinator is on call) shall:
- i. Identify the character, exact source, amount, and a real extent of any released hazardous materials.
  - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.).
  - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
  - iv. Notify appropriate local authorities (i.e. call 911).
  - v. Notify the State Office of Emergency Services at 1-800-852-7550.
  - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
  - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
- i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
  - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
  - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
  - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

**5. Post-Incident Reporting/Recording:**

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (e.g. fire, explosion, etc.);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Emergency Equipment:

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective, Equipment, Safety Equipment, and First Aid Equipment	<input type="checkbox"/> Cartridge Respirators

Additional Equipment (Use Additional Pages if Needed.)			

\* Use the Location Codes (LC) from the Storage Map(s) prepared earlier for your HMBP.

\*\* Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

**EMERGENCY RESPONSE PROCEDURE**  
**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

256115

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch.
2. **EVACUATE**: Verbally **ANNOUNCE** to all persons on the site: "This is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. **CALL 9-1-1**: Give the following information:  
"THERE IS A FIRE / GASOLINE SPILL at the Tosco 76 service station at 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station and anyone who may be injured.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need.
7. **CONTACT** the station operator if he/she is not already at the station. Use the list below for emergency contacts:

Emergency Coordinator: Greg Galatolo Title: Dealer  
Address: 1531 Arbor Dr. Los Altos Ca 94024  
Bus#/Home#/Alt#: 650-941-0244 / 650-948-8302 /  
Alternate Emergency Coordinator: Tom Segovia Title: Manager  
Address: \_\_\_\_\_  
Bus#/Home#/Alt#: 650-941-0244 / /

8. **NOTIFY** the following **IMMEDIATELY** to assist in the emergency and agency notification process:

Tosco Maintenance Call Center: 1-800-726-2312

Tosco Business Operations Manager or District Manager.

Tosco Environmental Compliance Coordinator: **North**: Merliza Alcala (925)277-2319 or (888)671-4350

**South**: Stephen Boyd (714)428-6572 or (800)759-8888 pin#1267507

Tosco Corporation will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the Operator should notify these agencies.

a) LOCAL AGENCY: Santa Clara Co. Dept. of Env. Health

PHONE NUMBER: 408-299-8007

b) CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800)852-7550(24 HOURS)

c) LOCAL POLICE AND FIRE DEPARTMENTS, **911**

d) NATIONAL RESPONSE CENTER 1-800-424-8802 (24 HOURS).

**MINOR INCIDENT**: Any incident that can be contained and cleaned up as part of the routine operations. Whenever in doubt, consider the incident a major release and use the above procedures.

1. **FIRES**: Extinguish with fire extinguisher. Recharge fire extinguisher, if used
2. **SPILLS**: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See Training Plan item #H for additional direction.
3. **MEDICAL**: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD**: Record the event in the daily monitoring log.
5. **NOTIFY**: the dealer of the event.

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

### **I. FIRST THINGS TO KNOW:**

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE
- F. PROPANE/LPG: If your station has propane or liquefied petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.
- G. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- H. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it, a vacuum truck should be used to clean up any large spill  
Location: IN SERVICE BAY STORE AREA
- I. PERSONAL PROTECTIVE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.
1. Broom: SERVICE BAY
  2. Shovel: SERVICE BAY
  3. Gloves: SERVICE BAY
  4. Goggles: SERVICE BAY
- J. FIRST AID KIT:  
Location: 1-IN SERVICE BAY STORE AREA
- K. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE

HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) MATERIAL SAFETY DATA SHEET (MSDS):

Location: SALES OFFICE

II. **NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: EL CAMINO HOSPITAL  
ADDRESS: 2500 GRANT ROAD MOUNTAIN VIEW  
PHONE NUMBER: 650-940-7055

**NEAREST DESIGNATED TRAUMA CENTER:**

2. NAME: STANFORD HOSPITAL  
ADDRESS: 300 PASTEUR DR STANFORD  
PHONE NUMBER: 650-723-5111

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies; and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. **FIRST AID PROCEDURES** (For exposure to gasoline or diesel fuel):

- A. **EYE CONTACT:** Flush with water for 15 minutes while holding eyelids open. Get medical attention.
- B. **SKIN CONTACT:** Flush with water while removing contaminated clothing and shoes. Followed by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.
- C. **INHALATION (Breathing):** Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.
- D. **INGESTION (Swallowing):**

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE! If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

- F. **NOTE TO PHYSICIAN:** If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions, or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:** Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

# Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c), Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

Page 4 of 11

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes that apply. [Note: Items marked with an asterisk (\*) are required.]:

## 1. Personnel are trained in the following procedures:

<input checked="" type="checkbox"/> Internal alarm/notification *
<input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/> Emergency incident reporting
<input checked="" type="checkbox"/> External emergency response organization notification
<input checked="" type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan
<input checked="" type="checkbox"/> Facility evacuation drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

## 2. Chemical Handlers are additionally trained in the following:

<input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/> Spill procedures/emergency procedures
<input checked="" type="checkbox"/> Proper use of personal protective equipment *
<input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e. inhalation, ingestion, absorption). *
<input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *

## 3. Emergency Response Team Members are capable of and engaged in the following:

<input checked="" type="checkbox"/> Personnel rescue procedures
<input checked="" type="checkbox"/> Shutdown of operations
<input checked="" type="checkbox"/> Liaison with responding agencies
<input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/> Refresher training, which is provided at least annually *
<input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

**Record keeping**  
(Hazardous Materials Business Plan Module)

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials record keeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (\*) are required.]:

<input checked="" type="checkbox"/> Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/> Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/> Training Program(s) (i.e. written description of introductory and continuing training) *
<input checked="" type="checkbox"/> Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/> Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/> Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/> Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/> Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. (Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)

Check the appropriate box:

<input checked="" type="checkbox"/> We will use the "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
<input type="checkbox"/> We will use our own documents to record inspections. (A blank copy of each document used must be attached to this HMBP.)

# Aboveground Separation, Containment, and Monitoring Plan

(Appendix to Hazardous Materials Business Plan)

Complete one column for each aboveground storage area shown on the Hazardous Materials Business Plan Storage Map(s). Write the appropriate location code in the box provided at the top of each column, then moving down the column, check all boxes which apply to that location. Make additional copies of this page if needed.

RE: HAZARDOUS MATERIALS MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the new Hazardous Materials Inventory and Business Plan for your station. This new HMMP is intended to replace the current HMMP. The "DEALER" copy should be kept in your "Success at the Pump: Keeping the Zone in Compliance Manual", and available to all employees and agency personnel at all times.

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 3 copies of the HMMP where flagged and indicated with a "X".
2. Please return the 2 copies marked "AGENCY" and "RHL FILE" to RHL Design in the pre-stamped enclosed envelope.
3. Keep the "DEALER" copy of the HMMP in your Environmental Compliance book, and available for inspection.
4. Have your employees read and understand the contents of this package and sign the attached training log. Keep the training log at your station.

A copy of the HMMP will be sent to Santa Clara Co. Dept. of Env. Health within 30 days

If you have any questions regarding the content of this document, please contact RHL Design Group, Mr. Steve Skanderson at (707) 765-1660. If you have any additional questions, including invoicing questions, please contact Tosco Marketing Company, Hazardous Materials Coordinator at (602) 728-7080.

Sincerely,

Tosco Marketing Company

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use By All Jurisdictions Within the County of Santa Clara  
Authority Cited: H&SC, 25503.3(c)

To: Agency Name: Santa Clara Co. HazMat Compliance Div.  
Agency Mailing Address: 2220 Moorpark Avenue  
San Jose, CA 95128

Pursuant to Section 25503.3(c) of California Health and Safety Code (H&SC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: El Camino 76 #256115

Facility Street Address: 4350 El Camino Real City: Los Altos

Date of Current HMBP: 4/27/98 ← ? 2-20-97 IS LAST COMPLETE SUBMITAL

I certify that: (Check the appropriate box.)

- I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) or
- Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): X GREG GALATOLD Title: X DEALER  
Signature of Owner/Operator: X [Signature] Date: X 3/30/00

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The HMBP most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

### I. FIRST THINGS TO KNOW:

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE
- F. PROPANE/LPG: If your station has propene or liquefied petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1, as appropriate.
- G. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- H. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it, a vacuum truck should be used to clean up any large spill  
Location: IN SERVICE BAY STORE AREA
- I. PERSONAL PROTECTIVE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.
1. Broom: SERVICE BAY
  2. Shovel: SERVICE BAY
  3. Gloves: SERVICE BAY
  4. Goggles: SERVICE BAY
- J. FIRST AID KIT:  
Location: 1-IN SERVICE BAY STORE AREA
- K. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP), MATERIAL SAFETY DATA SHEET (MSDS):  
Location: SALES OFFICE

47-10  
II. **NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: EL CAMINO HOSPITAL

ADDRESS: 2500 GRANT ROAD MOUNTAIN VIEW

PHONE NUMBER: 650-940-7055

**NEAREST DESIGNATED TRAUMA CENTER:**

2. NAME: STANFORD HOSPITAL

ADDRESS: 300 PASTEUR DR STANFORD

PHONE NUMBER: (650) 723-5111

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. **FIRST AID PROCEDURES** (For exposure to gasoline or diesel fuel):

- A. **EYE CONTACT:** Flush with water for 15 minutes while holding eyelids open. Get medical attention.
- B. **SKIN CONTACT:** Flush with water while removing contaminated clothing and shoes. Followed by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.
- C. **INHALATION (Breathing):** Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.
- D. **INGESTION (Swallowing):**

**DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!** If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

- F. **NOTE TO PHYSICIAN:** If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions, or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials:

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:** Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

Document prepared by: Environmental Staff, RHL Design Group, Inc., 800-765-1025 Last updated: December 21, 1999

# HAZARDOUS MATERIALS TRAINING REQUIREMENTS

As the owner/operator of a business that handles hazardous materials, you must have the following:

- ◆ A Hazard Communication Plan (also known as an Employee Right-to-Know Plan).
- ◆ A SARA Tier II Chemical Inventory Report (in California this report is included in the Hazardous Materials Management Plan, also known as the CA Business Emergency Plan).
- ◆ An Emergency Response Plan.
- ◆ An Underground Storage Tank Monitoring and Leak Detection Plan.
- ◆ A Release Reporting Plan.

Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only needs to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.

- ◆ Training for the Hazard Communication Plan must include the following elements:
  - ◆ An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
  - ◆ Locations of any operations in their work area where hazardous substances are present.
  - ◆ Location where a copy of the written Hazard Communication program is made available to them.
  - ◆ How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
  - ◆ How to detect the presence of or the release of hazardous substances in the work place.
  - ◆ How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
  - ◆ Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

RE: HAZARDOUS MATERIAL MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the Hazardous Materials Inventory and Business Plan Certification for your station. This Certification is intended to amend the current HMMP. The "DEALER" copy should be attached to your current HMMP and kept in Section 4 of your Green Book, on the premises, and available to all employees and agency personnel at any time.

**DO NOT DISCARD YOUR CURRENT HMMP.**

**THIS CERTIFICATION MUST BE RETURNED TO RHL DESIGN GROUP, INC. AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 3 copies of the Certification where flagged and indicated with a "X".
2. Return the 2 copies marked "AGENCY" and "FILE" to RHL Design Group, Inc. in the pre-stamped envelope provided.
3. Place the "DEALER" copy of this HMMP update in your Green Book and keep it on the premises, available to all employees and agency personnel at any time. Place the additional documents in your Green Book as indicated on each.

Copies of the Certification will be sent to the Santa Clara Co. HazMat Compliance Div. within 30 days. If you have any questions regarding the content of this HMMP please contact RHL Design Group, Inc., Mr. David Lundy at (707) 765-1660. If you have any additional questions, including invoicing questions please contact Tosco Marketing Company Hazardous Materials Coordinator at 602-728-8000.

Sincerely,

Tosco Marketing Company

### BIENNIAL REVIEW AND RECERTIFICATION:

I certify that the Business Plan has been reviewed and the information contained in it is accurate and complete as of the date below.

I certify that I have review the previously submitted Business Plan and have updated the following items on the attached pages:

- Emergency contacts names and/or phone numbers.
- Site/Facility map.
- Other Updates: \_\_\_\_\_

### ANNUAL INVENTORY UPDATE:

Inventory Forms are correct for the upcoming reporting year. NO changes are necessary.

Inventory Forms required updating. Replace previous inventory pages with attached inventory pages.

I certify under penalty of law, that I have personally examined and I am familiar with the information submitted in this and all attached documents, and based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate and complete.

**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  
"THERE IS A FIRE / GASOLINE SPILL at the Tosco 76 service station at 4350 El Camino Real" If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. ATTEMPT to contain the spill if you can do it safely.
5. LOOK AROUND to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station area, and anyone who may be injured.
6. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
7. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:

Emergency Coordinator: Greg Galatolo Title: Dealer  
 Address: 1531 Arbor Dr. Los Altos Ca 94024  
 Bus#/Home#/Alt#: 650-941-0244 / 650-948-8302 /  
 Alternate Emergency Coordinator: Jack Galatolo Title: Manager  
 Address: 1791 Paroit Drive, San Mateo 94402  
 Bus#/Home#/Alt#: 650-948-4771 / 650-345-7531 /

8. NOTIFY your Fixed Fee contractor IMMEDIATELY.  
 Business Operations Manager: \_\_\_\_\_ Phone Number: \_\_\_\_\_

Tosco Corporation will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:

1. LOCAL AGENCY: Santa Clara Co. HazMat Compliance Div.  
 PHONE NUMBER: 408-299-6930
2. CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24 HOURS)
3. LOCAL POLICE AND FIRE DEPARTMENTS, 911
4. NATIONAL RESPONSE CENTER 1-800-424-8802 (24 HOURS):

**MINOR INCIDENT:** Any incident that can be contained and cleaned up as part of the routine operations. Whenever in doubt, consider the incident a major release and use the above procedures.

FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if used.  
SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See Training Plan item #H for additional direction.  
MEDICAL: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.  
RECORD: Record the event in the daily monitoring log.  
NOTIFY: the dealer of the event.

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

I. FIRST THINGS TO KNOW:

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE
- F. PROPANE/LPG: If your station has a propane or liquified petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.
- G. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- H. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.  
Location: IN SERVICE BAY STORE AREA
- I. EMERGENCY RESPONSE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.
  - 1. Broom: SERVICE BAY
  - 2. Shovel: SERVICE BAY
  - 3. Gloves: SERVICE BAY
  - 4. Goggles: SERVICE BAY
- J. FIRST AID KIT:  
Location: 1-IN SERVICE BAY STORE AREA
- K. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE

L. HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) & MATERIAL SAFETY DATA SHEET (MSDS):

Location: SALES OFFICE

II. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: EL CAMINO HOSPITAL

ADDRESS: 2500 GRANT ROAD, LOS ALTOS

PHONE NUMBER: 650-940-7055

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: STANFORD MEDICAL CENTER

ADDRESS: 300 PASTEUR DRIVE, STANFORD

PHONE NUMBER: 650-723-5111

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

**DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!** If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

E. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

F. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

Document prepared by: Environmental Staff, RHL Design Group, Inc., 800-765-1025  
Last updated: February 4, 1999

# HAZARDOUS MATERIALS TRAINING REQUIREMENTS

As the owner/operator of a business that handles hazardous materials, you must have the following:

- ▶ A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- ▶ A SARA Tier II Chemical Inventory Report (in California this report is included in the Hazardous Materials Management Plan, also known as the CA Business Emergency Plan)
- ▶ An Emergency Response Plan
- ▶ An Underground Storage Tank Monitoring and Leak Detection Plan
- ▶ A Release Reporting Plan

Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required and the introduction of new hazardous materials or changes in procedures require immediate retraining. Training requirements that are common to more than one of these plans only needs to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.

Training for the Hazard Communication Plan must include the following elements:

- ◆ An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
- ◆ Locations of any operations in their work area where hazardous substances are present.
- ◆ Location where a copy of the written Hazard Communication program is made available to them.
- ◆ How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
- ◆ How to detect the presence of or the release of hazardous substances in the work place.
- ◆ How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
- ◆ Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

**AGENCY**

Greg Galatolo  
El Camino Unocal #6115  
4350 El Camino Real  
Los Altos, CA 94022

RE: HAZARDOUS MATERIAL MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the new Hazardous Materials Inventory and Business Plan for your station. This new HMMP is intended to replace the current HMMP. The "DEALER" copy should be kept in Section 4 of your Green Book, on the premises, and available to all employees and agency personnel at any time.

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP, INC. AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 3 copies of the HMMP where flagged and indicated with a "X".
2. Return the 2 copies marked "AGENCY" and "FILE" to RHL Design Group, Inc. in the pre-stamped envelope provided.
3. Keep the "DEALER" copy of the HMMP at the site, in Section 4 of your Green Book, and available for inspection. Place the additional documents in your Green Book as indicated on each.
4. Have your employees read and understand the contents of this package and sign the attached training log. Keep the training log at your station.

Copies of the HMMP will be sent to the Santa Clara Co. HazMat Compliance Div. within 30 days. If you have any questions regarding the content of the HMMP please contact RHL Design Group, Inc., Mr. David Lundy (707) 765-1660. If you have any additional questions please contact the ERC Department for 76 Products Company at (714) 428-6557.

Sincerely,

ERC Department

**Employee Training Plan**  
 (Uniform Hazardous Materials Business Plan Module)  
 Authority Cited: H&SC, Section 25504(c); 22 CCR, Section 66265:16

All facilities which handle hazardous materials must have a written employee training plan. This plan is a required module of the Uniform Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes which apply. [Note: Items marked with an asterisk (\*) are required.]:

1. Personnel are trained in the following procedures:

<input checked="" type="checkbox"/>	Internal alarm/notification *
<input checked="" type="checkbox"/>	Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/>	Emergency incident reporting
<input checked="" type="checkbox"/>	External emergency response organization notification
<input checked="" type="checkbox"/>	Location(s) and contents of Emergency Response/Contingency Plan
<input checked="" type="checkbox"/>	Facility evacuation drills, which are conducted at least (specify) <u>annually</u> (e.g. "Quarterly", etc.)

2. Chemical Handlers are additionally trained in the following:

<input checked="" type="checkbox"/>	Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/>	Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/>	Spill procedures/emergency procedures
<input checked="" type="checkbox"/>	Proper use of personal protective equipment *
<input checked="" type="checkbox"/>	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e. inhalation, ingestion, absorption) *
<input checked="" type="checkbox"/>	Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *

3. Emergency Response Team Members are capable of and engaged in the following:

<input checked="" type="checkbox"/>	Personnel rescue procedures
<input checked="" type="checkbox"/>	Shutdown of operations
<input checked="" type="checkbox"/>	Liaison with responding agencies
<input checked="" type="checkbox"/>	Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/>	Refresher training, which is provided at least annually *
<input checked="" type="checkbox"/>	Emergency response drills, which are conducted at least (specify) <u>annually</u> (e.g. "Quarterly", etc.)

**Recordkeeping**  
**(Uniform Hazardous Materials Business Plan Module)**

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Uniform Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes which apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (\*) are required.]:

<input checked="" type="checkbox"/>	Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/>	Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/>	Training Program(s) (i.e. written description of introductory and continuing training) *
<input checked="" type="checkbox"/>	Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/>	Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/>	Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/>	Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/>	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. (Exception: Attached, you will find a Uniform Monitoring Inspection Log Sheet which you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)

Check the appropriate box:

<input checked="" type="checkbox"/>	We will use the Uniform Monitoring Inspection Log Sheet to document inspections.
<input type="checkbox"/>	We will use our own documents to record inspections. A blank copy of each document used is attached to this HMBP.

# Aboveground Separation, Containment, and Monitoring Plan

(Appendix to Uniform Hazardous Materials Business Plan)

Complete one column for each aboveground storage area shown on the Uniform Hazardous Materials Business Plan Storage Map(s). Write the appropriate location code in the box provided at the top of each column, then moving down the column, check all boxes which apply to that location. Make additional copies of this page if needed.

Location Code	B	B

**Emergency Response/Contingency Plan**  
**(Uniform Hazardous Materials Business Plan Module)**  
*Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 15, Art. 4 CCR*

All facilities which handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities which generate hazardous waste must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Uniform Hazardous Materials Business Plan (HMBP). If you already have a plan which meets these requirements, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials which could threaten human health and/or the environment. At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below).

**1. Evacuation Plan:**

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply):

Bells;  Horns/Sirens;  Verbal (i.e. shouting);  Other (specify) \_\_\_\_\_

b.  Evacuation map is prominently displayed throughout the facility.

*Note: The HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing which shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.*

**2. a. Emergency Contacts\*:**

Fire/Police/Ambulance ..... Phone No. 911  
State Office of Emergency Services ..... Phone No. (800) 852-7550

**b. Post-Incident Contacts\*:**

Fire Department Hazardous Materials Program ..... Phone No: 408-299-6930  
Santa Clara County Hazardous Materials Compliance Division ..... Phone No. (408) 299-6930  
California EPA Department of Toxic Substances Control ..... Phone No. (510) 540-3739  
Cal-OSHA Division of Occupational Safety and Health ..... Phone No. (415) 557-1677  
Bay Area Air Quality Management District ..... Phone No. (415) 771-6000  
Regional Water Quality Control Board ..... Phone No. (510) 286-1255

\* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.

**c. Emergency Resources:**

Poison Control Center ..... Phone No. (408) 885-6000  
Nearest Hospital: Name: EL CAMINO HOSPITAL Phone No.: 415-940-7055  
Address: 2500 GRANT ROAD City: LOS ALTOS

**3. Arrangements With Emergency Responders:**

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

None

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

- a. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (or his/her designee when the emergency coordinator is on call) shall:
  - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
  - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.).
  - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
  - iv. Notify appropriate local authorities (i.e. call 911).
  - v. Notify the State Office of Emergency Services at 1-800-852-7550.
  - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
  - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
  - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
  - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
  - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
  - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident which triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (e.g. fire, explosion, etc.);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

# Underground Separation, Containment, and Monitoring Plan

Appendix to Uniform Hazardous Materials Business Plan

Authority Cited: 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

Complete a separate page for each underground storage tank, sump, vault, below-grade treatment system, etc. shown on the Uniform Hazardous Materials Business Plan Storage Map(s). For items marked with an asterisk (\*), specify the name of the manufacturer of the equipment and the equipment model number on the "Comments" lines provided at the bottom of this page. Make additional copies of this page if needed. Attach a blank copy of the UST monitoring log/form used by the facility. If your facility already has a written separation, containment, and monitoring plan, you do not need to complete the blank plan below, but must submit your current plan with your HMBP.

Location Code: A

**Primary Containment Construction:** (Check all which apply)

Tank	Piping
<input type="checkbox"/> Steel <input type="checkbox"/> Fiberglass <input checked="" type="checkbox"/> Other (specify): <u>Composition</u>	<input type="checkbox"/> Steel <input checked="" type="checkbox"/> Fiberglass <input type="checkbox"/> Other (specify):

**Secondary Containment Details:** (Check all which apply)

Tank	Piping
<input checked="" type="checkbox"/> Double wall tank <input type="checkbox"/> Tank in vault <input checked="" type="checkbox"/> Overflow prevention device(s) installed <input checked="" type="checkbox"/> Overspill prevention device(s) installed <input type="checkbox"/> Other (specify):	<input checked="" type="checkbox"/> Double wall piping <input type="checkbox"/> Piping in trench or vault <input type="checkbox"/> Other (specify):

**Monitoring** (Check all which apply)

**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  
"THERE IS A FIRE / GASOLINE SPILL at the 76 Products Company service station at 4350 El Camino Real"  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation..
4. ATTEMPT to contain the spill if you can do it safely.
5. LOOK AROUND to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station area, and anyone who may be injured.
6. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
7. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:

Emergency Coordinator: Greg Galatolo Title: Dealer  
 Address: 1531 Arbor Dr. Los Altos Ca 94024  
 Bus#/Home#/Alt#: 415 941-0244 / 415 948-8302 /  
 Alternate Emergency Coordinator: Scott Kent Title: Manager  
 Address: 1054 Wheeler Street, Stockton, CA 95206  
 Bus#/Home#/Alt#: 415 941-0244 / 209-983-8543 /

8. NOTIFY your Fixed Fee contractor IMMEDIATELY.  
 Business Operations Manager: Harry Allen Phone Number: 510-277-2428

76 Products Company will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:

1. LOCAL AGENCY: Santa Clara Co. HazMat Compliance Div.  
 PHONE NUMBER: 408-299-6930
2. CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24 HOURS)
3. LOCAL POLICE AND FIRE DEPARTMENTS; 911
4. NATIONAL RESPONSE CENTER 1-800-424-8802 (24 HOURS).

**MINOR INCIDENT:** Any incident that can be contained and cleaned up as part of the routine operations. Whenever in doubt, consider the incident a major release and use the above procedures.

- FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if used.  
SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See Training Plan item #H for additional direction.  
MEDICAL: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.  
RECORD: Record the event in the daily monitoring log.  
NOTIFY: the dealer of the event.

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

I. FIRST THINGS TO KNOW:

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE
- F. PROPANE/LPG: If your station has a propane or liquified petroleum gas tank. In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.
- G. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- H. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.  
Location: IN SERVICE BAY STORE AREA
- I. EMERGENCY RESPONSE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.
1. Broom: SERVICE BAY
  2. Shovel: SERVICE BAY
  3. Gloves: SERVICE BAY
  4. Goggles: SERVICE BAY
- J. FIRST AID KIT:  
Location: 1-IN SERVICE BAY STORE AREA
- K. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE

I. HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) & MATERIAL SAFETY DATA SHEET (MSDS):

Location: SALES OFFICE

II. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: EL CAMINO HOSPITAL

ADDRESS: 2500 GRANT ROAD, LOS ALTOS

PHONE NUMBER: 415-940-7055

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: STANFORD MEDICAL CENTER

ADDRESS: 300 PASTEUR DRIVE, STANFORD

PHONE NUMBER: 415-723-5111

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

**DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!** If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

E. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

F. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

Document prepared by: Environmental Staff, RHL Design Group, Inc., 800-765-1025

Last updated: February 14, 1997

# HAZARDOUS MATERIALS TRAINING REQUIREMENTS

As the owner/operator of a business that handles hazardous materials, you must have the following:

- ▶ A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- ▶ A SARA Tier II Chemical Inventory Report (in California this report is included in the Hazardous Materials Management Plan, also known as the CA Business Emergency Plan)
- ▶ An Emergency Response Plan
- ▶ An Underground Storage Tank Monitoring and Leak Detection Plan
- ▶ A Release Reporting Plan

Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required and the introduction of new hazardous materials or changes in procedures require immediate retraining. Training requirements that are common to more than one of these plans only needs to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.

Training for the Hazard Communication Plan must include the following elements:

- ◆ An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
- ◆ Locations of any operations in their work area where hazardous substances are present.
- ◆ Location where a copy of the written Hazard Communication program is made available to them.
- ◆ How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
- ◆ How to detect the presence of or the release of hazardous substances in the work place.
- ◆ How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
- ◆ Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

RE: HAZARDOUS MATERIAL MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the Hazardous Materials Inventory and Business Plan Certification for your station. This Certification is intended to amend the current HMMP. The "DEALER" copy should be attached to your current HMMP and kept in Section 4 of your Green Book, on the premises, and available to all employees and agency personnel at any time.

**DO NOT DISCARD YOUR CURRENT HMMP.**

**THIS CERTIFICATION MUST BE RETURNED TO ROBERT H. LEE & ASSOCIATES, INC. AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 4 copies of the Certification where flagged and indicated with a "X".
2. Return the 3 copies marked "76 PRODUCTS", "AGENCY" and "FILE" to Robert H. Lee & Associates in the pre-stamped envelope provided.
3. Place the "DEALER" copy of last year's HMMP in your Green Book and keep it on the premises, available to all employees and agency personnel at any time. Place the additional documents in your Green Book as indicated on each.

Copies of the Certification will be sent to the Santa Clara Co. Hlth Dept, Toxic Enforce within 30 days. If you have any questions regarding the content of the HMMP from last year please contact Robert H. Lee & Associates, Mr. Steve Skanderson, (707) 765-1660. If you have any additional questions please contact Mr. Dave Corder of 76 Products Company at (714) 428-6560.

Sincerely,

*David P. Corder*

Location: SERVICE BAY STORAGE AREA
- D. **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- E. **NATURAL GAS SHUT-OFF:** If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location: NONE
- F. **PROPANE/LPG:** If your station has a propane or liquified petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.
- G. **FIRE EXTINGUISHER:** Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- H. **ABSORBENT:** In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.  
Location: IN SERVICE BAY STORE AREA
- I. **EMERGENCY RESPONSE EQUIPMENT:** These items shall be used by employees to prevent direct skin contact with a hazardous material.
1. Broom: SERVICE BAY
  2. Shovel: SERVICE BAY
  3. Gloves: SERVICE BAY
  4. Goggles: SERVICE BAY
- J. **FIRST AID KIT:**  
Location: 1-IN SERVICE BAY STORE AREA
- K. **EMERGENCY ASSEMBLY AREA:** Location where all employees are to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE

**I. HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) MATERIAL SAFETY DATA SHEET (MSDS):**

Location: SALES OFFICE

**II. NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention.

**1. NAME: EL CAMINO HOSPITAL**

ADDRESS: 2500 GRANT ROAD, LOS ALTOS

PHONE NUMBER: 415-940-7055

**NEAREST DESIGNATED TRAUMA CENTER:**

**2. NAME: STANFORD MEDICAL CENTER**

ADDRESS: 300 PASTEUR, STANFORD

PHONE NUMBER: 415 723-7570

**III.** All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

**IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):**

**A. EYE CONTACT:** Flush with water for 15 minutes while holding eyelids open. Get medical attention.

**B. SKIN CONTACT:** Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

**C. INHALATION (Breathing):** Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

**D. INGESTION (Swallowing):**

**DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!** If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

**E. NOTE TO PHYSICIAN:** If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

**F.** For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:** Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

Last updated: February 22, 1996

# HAZARDOUS MATERIALS TRAINING REQUIREMENTS

As the owner/operator of a business that handles hazardous materials, you must have the following:

- ▶ A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- ▶ A SARA Tier II Chemical Inventory Report (in California this report is included in the Hazardous Materials Management Plan, also known as the CA Business Emergency Plan)
- ▶ An Emergency Response Plan
- ▶ An Underground Storage Tank Monitoring and Leak Detection Plan
- ▶ A Release Reporting Plan

Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required and the introduction of new hazardous materials or changes in procedures require immediate retraining. Training requirements that are common to more than one of these plans only needs to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.

Training for the Hazard Communication Plan must include the following elements:

- ◆ An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
- ◆ Locations of any operations in their work area where hazardous substances are present.
- ◆ Location where a copy of the written Hazard Communication program is made available to them.
- ◆ How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
- ◆ How to detect the presence of or the release of hazardous substances in the work place.
- ◆ How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
- ◆ Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

DRAFT

# Instructions for Completing HAZARDOUS WASTE TRAINING

Each employee must be given training in all hazardous waste management procedures he/she is required to perform within six months of hire and annually thereafter.

These documents are permanent records and should be kept in Section 5 of the Greenbook.

1. Read the "Hazardous Waste Training Program."
2. Modify the "Hazardous Waste Training Program" to agree with operations at your station.
  - a. Cross out any sections that do NOT apply to your operation.
  - b. Write in or type in corrections that DO apply to your operation.
  - c. Add numbered sections describing omitted procedures unique to your operation.
3. Make copies of the blank "Job Description and Roster" and "Hazardous Waste Management Training Log" forms before writing on them. You will need several of each.
4. Complete a "Job Description and Roster" for each position at your service station that handles hazardous waste.
  - a. Enter the job title on the appropriate line, (for example, "Mechanic").
  - b. Under Duties and Required Training, enter the sections of your training program that are required for each job description. For example, This job requires training described in Hazardous Waste Training Program Section Numbers 1, 2, 3 and 8.
  - c. Enter the names of employees that are assigned to the job.
5. Document on your "Hazardous Waste Training Log" that each employee has received the hazardous waste management training appropriate to his/her job.

In spaces provided:

- a. Enter the job title
- b. Copy the section numbers from the "Job Description and Roster" page.
- c. Print employee's name.
- d. Have employee sign and date when training has been completed.

## HAZARDOUS WASTE TRAINING PROGRAM

### 1. GENERAL:

The intent of a hazardous waste management program is to protect the environment and human health from hazardous waste. Hazardous wastes are controlled under very strict laws. These laws require that records be kept of the dates when hazardous wastes are generated, the amounts of wastes generated, how and where the wastes are transported from our station, and how they are treated, recycled or disposed. Unless you know what a material is you must treat it as a hazardous waste. If you don't know that a waste is non-hazardous, ask the Dealer/Manager before disposing of it.

In servicing automobiles there are a number of wastes that are routinely generated. Remember:

- ▶ Never mix any of the different types of hazardous waste we generate together. (For example, don't mix used oil and spent solvent.)
- ▶ If you spill any products or hazardous wastes, clean them up immediately and report the spill to the Dealer/Manager immediately. Spills of hazardous materials and hazardous wastes are to be handled in accordance with the Emergency Response Plan found in the HMMP and the Leak Response Plan found in the Underground Storage Tank Monitoring Plan. (Both plans are in the Greenbook).
- ▶ As an employee you are expected to properly handle wastes. If you have any questions about any of the hazardous wastes/materials that you handle or about how to manage them, please ask the Dealer/Manager. Never pour any hazardous waste down a sewer or into a dumpster.
- ▶ All drums containing hazardous waste or recyclable materials (waste) having hazardous waste characteristics must be kept closed at all times except when material is being put into or removed from the drum.

### 2. USED MOTOR OIL:

Used oil is classified as a hazardous waste by California law. Used oil must be recycled properly. Placing used oil into commercial dumpsters or pouring it into sewers, waterways or onto the ground is prohibited by law. This includes oil contained in wastes such as used oil filters.

- ▶ Make sure each time oil is drained from an automobile that all of the used oil is collected and transferred to the used oil tank or properly labelled drum.
- ▶ If any oil is spilled, collect as much of the liquid as possible and transfer it to the used oil tank or drum. Use rags or absorbent as necessary to collect any remaining oil.

- ▶ Used oil may only be accumulated for 90 days from the date the first used oil is generated by an oil change and placed in the used oil drum or underground storage tank. At the end of the 90 days, a recycler must remove all the used oil from the facility. The recycler must leave a shipping paper when the used oil is collected. The shipping paper must have on it:

- The name, address, and telephone number of this station.
- the signature of a station employee
- the date of the pick-up
- a State manifest number
- the volume of used oil picked up
- the words "Used Oil, Non-RCRA Hazardous Waste, liquid."
- the name and address of the facility to which the used oil will be taken.
- the Hauler's name, address, and EPA ID number
- the driver's signature.

- ▶ Make sure this shipping paper is given to the Dealer/Manager.
- ▶ Make sure the Dealer/Manager knows if there is a leak or problem with the used oil tank or container.
- ▶ If the used oil is stored in a drum, the lid must be secured at all times, except when used oil is being added or removed from the drum.

### 3. USED OIL FILTERS:

- ▶ Be sure each time an oil filter is changed to drain all oil from the filter into the container provided. Drain until no further drops of oil come from the filter.
- ▶ Place the drained oil filter in the drum labelled "Drained Used Oil Filters". The drum must remain in an area protected from the rain and must have a secured lid on it at all times, except when filters are being put into it or are being removed.
- ▶ A metal reclaimer will pick up the drum when it is full.
- ▶ The reclaimer must leave a shipping paper like the one described for used oil, except the name of the waste will be "Used Oil Filters, Non-RCRA Hazardous Waste, Solid".
- ▶ Be sure the Dealer/Manager gets this shipping paper.
- ▶ Be sure the Dealer/Manager is immediately informed of any problem with the Used Oil Filter drum.
- ▶ Oil that drains from the used oil filters into the container provided is to be poured into the used oil tank or container.

#### 4. SPENT ETHYLENE GLYCOL ANTIFREEZE:

Antifreeze is regulated as a hazardous waste because it contains ethylene glycol, which is toxic. Antifreeze may also be hazardous due to heavy metals from the engine. It must never be poured down a sewer or drainage system or onto the ground.

- ▶ Anytime there is a possibility of draining antifreeze, make sure there is a container in which to collect it. Pour the spent antifreeze into the drum that is labelled antifreeze. Do not put anything else into the drum.
- ▶ A recycler will pick up the drum every 90 days. A shipping paper like the used oil shipping paper must be left when the antifreeze is picked up, except the name of the waste will be "Spent Ethylene Glycol Antifreeze, Non-RCRA Hazardous Waste, Liquid". Make sure the Dealer/Manager gets this paper.
- ▶ Make sure that the lid is secured on the drum at all times, except when coolant/antifreeze is being added or removed.
- ▶ Make sure the Dealer/Manager knows about any leak or problem with the antifreeze drum.

#### 5. USED LEAD ACID BATTERIES:

- ▶ Anytime you change a battery or receive a used battery, make sure it is stored in the accumulation area.
- ▶ The batteries must be stored off the ground.
- ▶ No battery can be stored on the ground or outside the shop in an unsecured area.
- ▶ Battery acid is very dangerous. Make sure the Dealer/Manager knows immediately if there is a battery acid leak.
- ▶ The supplier of new batteries or a battery recycler will pick up all the used batteries periodically.
- ▶ The supplier or recycler will leave a shipping paper for the pick up. Make sure the Dealer/Manager gets this paper.

#### 6. SOLVENT (PARTS DEGREASER):

- ▶ Anytime you use the solvent tank, make sure there is no leak.
- ▶ Make sure to close the lid when you are finished using the tank. If you see it open when no one is using it, close the lid.
- ▶ Keep all of the solvent in the tank.

- ▶ Promptly clean up any spills and immediately report them to the Dealer/Manager.
- ▶ A solvent recycler will pick up and recycle all the solvent.
- ▶ The recycler will leave a shipping paper like the one for Used Oil. Make sure the Dealer/Manager gets this paper.
- ▶ Make sure the Dealer/Manager knows about any leaks or problems with the solvent tank.

#### 7. REQUIRED INSPECTIONS:

- ▶ Each drum containing hazardous waste must be inspected once a week. Each drum must be inspected to ensure that:
  - the drum is in good condition.
  - there are no signs of deterioration, damage, or corrosion.
  - the label contains the words "Hazardous Waste", the composition of the waste (i.e. used oil), the physical state of the waste (liquid or solid), hazard class or property (ignitable, toxic, corrosive, etc.), the accumulation start date, and the name and address of this service station.
- ▶ Each aboveground tank or aboveground portion of an underground storage tank that contains a hazardous waste must be inspected daily to ensure that:
  - there are no signs of leaks, deterioration, or damage.
  - the fill pipe is labelled with the words "Hazardous Waste", and the composition of the waste contained in the tank.
  - the accumulation start date may be recorded here or in records kept in the office on-site.
- ▶ The inspections must be documented by the inspector of the day signing and dating the daily inspection sheet.
- ▶ Any deficiencies noted in the inspections must be reported to the Dealer/Manager and corrected immediately.

#### 8. RECORD RETENTION:

- ▶ All Uniform Hazardous Waste Manifests must be kept for a minimum of 3 years. Records relating to any enforcement action must be kept until the issue is resolved. The same requirements apply to Milkrun Collection shipping papers, except that they must be kept at your place of business for at least 3 years. The Uniform Hazardous Waste Manifests do not have to be kept on-site, but must be made available to regulatory agents on request.
- ▶ The hazardous waste management training log must be kept until this service station closes or until 3 years after all of the employees shown on a given page are no longer employed at this facility.

- ▶ A copy of each Biennial Report and Exception Report must be kept for at least 3 years after the reports due date.
- ▶ All analyses or determinations of composition of hazardous waste will be kept for at least 3 years after the last date that hazardous waste was recycled or disposed.
- ▶ All hazardous waste container and tank inspection logs must be kept for 3 years.
- ▶ A file for each Milkrun Collection Transporter shall be kept for at least 3 years after a Milkrun agreement has been terminated. The file must contain:
  - o A copy of the Transporter's variance from the State of California allowing the Transporter to operate a Milkrun Collection.
  - o A copy of the agreement between this service station and the Transporter which authorizes the Transporter to provide a Milkrun Collection service to this service station.
  - o A copy of the Land Disposal Restriction notification and certification which must be supplied to the Transporter by this service station.

## **DEALER INSTRUCTIONS FOR THE HAZARDOUS WASTE CONTINGENCY PLAN**

Verify by personal inspection that the information listed on page one of the Hazardous Waste Contingency Plan is found on the pages shown on the form.

Check the line on page one of the Hazardous Waste Contingency Plan in front of each hazardous waste that you generate at your service station.

Call the hospital and trauma center listed in the HMMP Employee Training Plan (page 3) and ask them if they want a copy of your HMMP and Hazardous Waste Contingency Plan. If they want copies, it is your responsibility to supply them the copies. Check the appropriate lines on page two of the Hazardous Waste Contingency Plan.

These documents are permanent records and should be kept in Section 4 of the Greenbook.

## HAZARDOUS WASTE CONTINGENCY PLAN

In accordance with California Health and Safety Code article 25503.4, the following checked items found in this business's Hazardous Materials Management Plan are incorporated as part of the Hazardous Waste Contingency Plan required of Generators of Hazardous Waste.

- ◆ Site Plan Site plan showing the location of emergency shutoff controls, safety equipment, hazardous materials (including hazardous wastes), and emergency response equipment (fire extinguishers, first aid, absorbent, etc.)
  
- ◆ An Emergency Response Plan which includes:
  - Page 1 Release response procedures appropriate to hazardous materials and hazardous wastes found on this site.
  - Page 2 An evacuation procedure.
  - Page 1 The telephone number for the California Office of Emergency Services.
  - Page 1 The names and telephone numbers of local emergency response agencies (police, fire department).
  - Page 1 Required internal (76 Products and Dealer) and external (Regulatory agencies) notifications.
  
- ◆ An Employee HMMP Training Plan which includes:
  - Page 2 Location and operation of emergency shut-offs for the pumps, electrical power, water, and natural gas.
  - Page 1 Location of Underground Storage Tank monitoring alarm, if appropriate
  - Page 2 Location of fire extinguishers, absorbent, first aid kit, emergency response equipment (shovels, gloves, etc.), and emergency assembly area.
  - Page 2 Location of Material Safety Data Sheets.
  - Page 3 Name, address, and phone numbers for the nearest medical facility and the nearest designated trauma center.
  - Page 4 Training Log which has each employee's printed name, signature, date of training, and type of training.

The Emergency Coordinator and Alternate Emergency Coordinator for this Hazardous Waste Contingency Plan are the Primary and Secondary Contacts named in the HMMP.

The hazardous wastes generated by this business are:

- \_\_\_\_\_ Used Oil
- \_\_\_\_\_ Spent Ethylene Glycol Antifreeze
- \_\_\_\_\_ Drained Automotive Oil Filters
- \_\_\_\_\_ Spent Lead Acid Automotive Batteries
- \_\_\_\_\_ Spent Solvent From a Parts Degreasers

Each of the above wastes is normally collected by a recycler. In the event of a release of any of the above wastes, an appropriate combination of scoops, shovels, and absorbent will be used to contain and return as much liquid to containers for recycle as possible. Material collected in absorbent will be stored in an approved drum for disposal.

RE: HAZARDOUS MATERIAL MANAGEMENT PLANS

Dear Greg Galatolo:

Attached is the Hazardous Materials Inventory and Business Plan Certification for your station. This Certification is intended to amend the current HMMP. The "DEALER" copy should be kept in Section 4 of your Green Book, on the premises, and available to all employees and agency personnel at any time.

**DO NOT DISCARD YOUR CURRENT HMMP.**

**THIS CERTIFICATION MUST BE RETURNED TO ROBERT H. LEE & ASSOCIATES, INC. AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 4 copies of the Certification where flagged and indicated with a "X".
2. Return the 3 copies marked "UNOCAL", "AGENCY" and "FILE" to Robert H. Lee & Associates in the pre-stamped envelope provided.
3. Place the "DEALER" copy on last year's HMMP, in your Green Book and keep on the premises, and available to all employees and agency personnel at any time. Place the additional documents in your Green Book as indicated on each.

Copies of the Certification will be sent to the Santa Clara Co. Hlth Dept, Toxic Enforce within 30 days. If you have any questions regarding the content of the HMMP from last year please contact Robert H. Lee & Associates, Mr. Steve Skanderson, (707) 765-1660. If you have any additional questions please contact Mr. Dave Corder of Unocal at (714) 572-7651.

Sincerely,

*David P. Corder*

**RE: HAZARDOUS MATERIAL MANAGEMENT PLANS**

Dear Greg Galatolo:

Attached is the Hazardous Materials Inventory and Business Plan Update for your station. This new HMMP is intended to replace the current HMMP. The "DEALER" copy should be kept on the premises, and available to all employees and agency personnel at any time.

**THESE FORMS MUST BE RETURNED TO ROBERT H. LEE & ASSOCIATES, INC. AS SOON AS POSSIBLE. FAILURE TO RETURN AND IMPLEMENT THIS PLAN MAY RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 4 copies of the HMMP where flagged and indicated with a "X".
2. Return the 3 copies marked "UNOCAL", "AGENCY" and "FILE" to Robert H. Lee & Associates in the pre-stamped envelope provided.
3. Keep the "DEALER" copy at the site and available for inspection.
4. Have your employees read and understand the contents of this package and sign the attached training log. Keep the training log at your station.

Copies of the HMMP will be sent to the Santa Clara County, HD/Toxics Control within 30 days. If you have any questions regarding the content of the HMMP please contact Robert H. Lee & Associates, Mr. Steven Skanderson, (707) 765-1660. If you have any additional questions please contact Mr. David Corder of Unocal at (714) 572-7651.

Sincerely,

PLEASE NOTE: An amended Hazardous Materials Business Plan must be submitted to the County within 30 days of any of the following events: 1) change of business address; 2) change of business ownership; 3) change of business name; 4) any handling of a previously undisclosed hazardous material; 5) a 100% or more increase in the quantity of a previously disclosed hazardous materials; 6) substantial change in the handler's operation.

## II. EMERGENCY RESPONSE PLAN

This plan describes the personnel, procedures and equipment available for responding to a release or threatened release of hazardous materials that are stored, handled or used at this site.

The immediate response procedures to be followed and the equipment available for response are indicated by a checked box. A check in the box states that that specific procedure is followed at this facility or the equipment specified is available on site.

### NOTIFICATION/ALARM

(1)  CALL 911 FOR FIRE DEPARTMENT (Local emergency responder)

(2)  NOTIFY ON SITE RESPONDERS:

Phone No.	Name	Title
(415) 948-8302	Greg Galatolo	Dealer
(408) 739-6964	Scott Kent	Manager

(3)  ACTIVATE LOCAL ALARM SYSTEMS

(4)  NOTIFY State Office of Emergency Services 800-852-7550

(5)  Notify the Administering Agency - Santa Clara County  
Toxics Control Unit (408) 299-6930 or dial 911

### EVACUATION

Immediate area evacuation routes defined and procedures developed

Assembly areas preplanned

Entire building evacuation procedures developed

Evacuation maps posted

\* \* \* \* \*

For larger and more complex hazardous materials facilities, supplemental and detailed emergency response information should be maintained on site and should be available for review by the inspecting jurisdiction.

Supplemental hazardous materials emergency response information maintained on site:

Location In Sales Office

Responsible person Greg Galatolo

Telephone Number (415) 941-0244

### III. EMERGENCY RESPONSE TRAINING PLAN

#### PERSON RESPONSIBLE FOR EMERGENCY RESPONSE TRAINING PROGRAM:

Name Greg Galatolo Title Dealer

This plan describes the basic training program in use at this facility. The training provided to facility personnel and the records maintained on that training are indicated by a checked box.

#### 1. TRAINING REQUIREMENTS

- All employees are trained and drilled in the following as indicated:
  - Procedures for internal alarm/notification.
  - Procedures for notification of external emergency response organizations.
  - Location and content of emergency response plan.
- Chemical handlers are trained in the following as indicated below:
  - Safe methods for handling and storage of hazardous materials.
  - Proper use of personnel protection equipment.
  - Locations and proper use of fire and spill control equipment.
  - Specific hazards of each chemical to which they may be exposed, including the pathways of exposure, i.e., skin absorption, inhalation, ingestion.
- Emergency response team members are trained in the following as indicated:
  - Procedures for shutdown of operations.
  - Procedures for using, maintaining and replacing facility emergency and monitoring equipment.
- All personnel are trained in emergency response procedures within six months of hiring.
- Refresher training is provided at least annually.

#### 2. PERSONNEL TRAINING RECORDS

- Training records are maintained for all employees as indicated:

- Verification that training was completed by employee.
- Description of type and amount of introductory and continuing training.
- Training records of former employees are retained for at least three years.
- Documentation on facility emergency response drills conducted during the year maintained and available for review.

\* \* \* \* \*

For larger and more complex hazardous materials facilities, a more comprehensive and detailed emergency response training plan should be maintained on site and should be available for review by the inspecting jurisdiction:

Comprehensive and detailed emergency response training plan maintained on site:

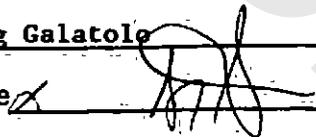

Location IN SALES OFFICE

Responsible Person Greg Galatolo

Telephone Number (415) 941-0244

V. CERTIFICATION

I hereby certify that the information provided in this Business Plan is in conformance with the requirements of the Health and Safety Code, Chapter 6.95 and that the foregoing information is true and correct. I also understand that I may be required to show proof of compliance during any facility inspection conducted by local county or state authorities and that any change in inventory, business address, business ownership, business name and/or operations which differ from this plan requires that an amendment to this Hazardous Materials Business Plan be submitted within 30 days of a change.

Name Greg Galatolo Title Dealer  
Signature  Date 4-1-94

**NOTE:** At least once every two years this Hazardous Materials Business Plan must be reviewed by a responsible company officer to determine if a revision is needed and must certify in writing to the administering agency that a review was made and that any necessary changes were made to the plan. A copy of the revised plan and/or certification must be sent to the Santa Clara County Health Department, Toxics Control Unit.

## SECTION B. CHEMICAL INVENTORY FORM

INSTRUCTIONS: Complete a separate form for each building or area where hazardous materials or waste are located. Please refer to the instruction packet and photo copy extra copies of this form before completing it.

BUSINESS NAME: El Camino Unocal #6115

BUILDING/AREA NAME:

BUSINESS ADDRESS: 4350 El Camino Real

## UNOCAL LEAK RESPONSE PLAN

All calls for maintenance from Unocal service stations (both Company owned/operated and Company owned/leased to Dealer) come into Maintenance Dispatch in Los Angeles, California via (800) 723-7600. This includes calls to report spills, leaks, dispensers damaged by cars, or alarms triggered by leak detection equipment except fuel delivery spills which are reported through the Supervisor for Safety and Environment.

1. Upon detection of an unauthorized release, spill or overfill of hazardous material from an underground storage tank, the Operator shall immediately notify Unocal Maintenance. Unocal will notify the local agency within 24 hours after detection.

### VARIATION IN INVENTORY RECONCILIATION

If the dealer exceeds the allowable variation on his monthly inventory reconciliation, (variation equals .50% of fuel deliveries plus 100 gallons) he will immediately notify his Territory Manager: T.M. Name: Kathy Crouse Phone Number: 510 277-2457

Unocal T.M. shall do the following:

T.M. will make an immediate inquiry regarding any losses during recent inventory reconciliation. If necessary, he will review the records at the site.

To verify inventory reconciliation records, the territory manager will take the following steps:

1. Within 24 hours of discovering the variation, the territory manager will review the inventory records for the preceding 30 days and determine if there is a calculation error. Within that same 24-hour period, if a variation is confirmed, the T.M. will notify Unocal Maintenance. Maintenance will notify the local agency.
2. Coordinate with Unocal maintenance to check the underground tank system for signs of a leak.
3. Coordinate for calibration of the dispenser meters within 24 hours of the system inspection.
4. The dealer or territory manager will continue to conduct inventory reconciliation as required.

If the review of the inventory reconciliation records indicates that no release has taken place, no further release detection steps need to be taken. Unocal will notify the local agency that the suspected release was not confirmed.

### OTHER SUSPECTED RELEASES INCLUDING:

Tank Overfill  
Tank Monitor Alarm Activated  
Spills  
Drive Offs

The discovery of released hazardous substances at the site including the presence of free product or vapors in soils, basements, sewer lines, utility lines, surface waters, or drinking waters.

Unusual operating conditions such as: erratic behavior of dispensers, sudden loss of product from the product tanks, or the unexplained presence of water in the product tank. The exception is if the equipment is not functioning properly and the system has not leaked.

**IMMEDIATELY REPORT ANY OF THESE CONDITIONS TO UNOCAL MAINTENANCE AT 1-800-723-7600.**

1. Unocal will notify the local agency of any of the above mentioned conditions which are still under investigation after eight hours.
2. Unocal will authorize and order any contractors necessary to assist in the clean up effort.
3. If it is determined at any time during the process that there has been a release (as defined in Chapter 6.7 of Division 20 of the Health & Safety Code), a leak report will be prepared and provided to the local agency within 5 working days in accordance with Article 5, Section 2651(b), of the California Underground Storage Tank Regulations. This report will be filed by the Unocal maintenance engineer. On going remediation will be supervised by the Unocal Area Manager, Environmental Remediation.

#### **BATTERY STORAGE (NEW OR USED)**

All automotive batteries, when stored at the service station, will have a plastic (polyethylene) pan underneath. The pan or pans must have a 1" lip on all four sides of the pan to contain any battery acid that may leak from the batteries stored.

#### **DISPOSAL PROCEDURE FOR ANTI-FREEZE**

Used anti-freeze will be placed in a D.O.T. approved 55 gallon drum or similar container and the container labeled "Waste Anti-freeze / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call an "Anti-freeze Recycling Contractor" to remove the container of used anti-freeze. The dealer will not, under any circumstances, pour used or new anti-freeze or a mixture thereof on the floor or on the ground and hose it down to floor drains or storm drains.

#### **DISPOSAL PROCEDURE FOR USED OIL FILTERS**

The dealer will put Used oil filters in a 55 gallon drum or similar container and the container labeled "Waste Oil Filters / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call a "Waste Oil Recycling Contractor" to remove the container of used oil filters.

The dealer will drain all used oil filters of free-flowing oil prior to placement into the above noted container. Free flowing oil is defined as a continuous stream of oil exiting the filter when the filter is inverted. Oil exiting drop by drop is not considered free flowing. If oil exiting the filter is restricted in any way, the filter shall be manipulated to allow used oil to exit the filter freely.

Used oil filters will not be placed in a refuse disposal container.

**DAI VISUAL MONITORING PROCEDURES  
FOR ABOVEGROUND HAZARDOUS MATERIALS**

**Hazardous Materials stored aboveground include:**

**Motor Oil**

**Transmission Oil**

**Antifreeze**

**Grease**

**Gear Lubricant (80W/90)**

**Solvent (including parts cleaners)**

**Propane**

**Battery Acid \***

**Car Wash Products**

**Kerosene**

**CO<sub>2</sub>**

**Waste Oil (prior to dumping in underground tank)**

**Spent Anti-freeze \***

**Used Oil Filters**

**The storage areas for these hazardous materials must be visually inspected every day for signs of leakage. Items designated with a (\*) require secondary containment with the contents of each container clearly labeled.**

**If there is a leak or spill of any of the hazardous materials, whether stored above- or underground, Dealer must follow the "Emergency Response Procedures," attached.**

**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  
 "THERE IS A FIRE / GASOLINE SPILL at the Unocal service station at 4350 El Camino Real" If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. LOOK AROUND to assure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist, or direct assistance to, anyone having difficulty leaving the station area, and anyone who may be injured.
5. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
6. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:

Primary Contact: Name: Greg Galatolo Title: Dealer  
 Address: 1521 Topaz Dr. Los Altos Ca 94024  
 Bus #/Home #: 415 941-0244 / 415 948-8302  
 Secondary Contact: Name: Scott Kent Title: Manager  
 Address: 1411 Muender Ave. Sunnyvale 94086  
 Bus #/Home #: 415 941-0244 / 408 739-6964

7. NOTIFY Unocal Maintenance Dispatch by phone IMMEDIATELY 1-800-723-7600.  
NOTIFY your Territory Manager IMMEDIATELY  
 TERRITORY MANAGER: Kathy Crouse Phone Number: 510 277-2457

Unocal will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:

1. LOCAL AGENCY: Santa Clara County, HD/Toxics Control  
 PHONE NUMBER: 408-299-6930
2. CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24 HOURS)
3. LOCAL POLICE AND FIRE DEPARTMENTS, 911

**MINOR INCIDENT:**

FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if necessary.

SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary.

MEDICAL: Treat with on-site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.

RECORD: Record the event in the daily monitoring log.

NOTIFY: the dealer of the event.

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign this document upon completion of training. Retain these records for a minimum of three years.

I. FIRST THINGS TO KNOW:

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.

LOCATION: NORTH EXTERIOR BLDG. WALL, STORAGE AREA

- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.

LOCATION: IN SERVICE BAY STORAGE AREA

- C. TANK MONITORING ALARM: Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.

LOCATION: SERVICE BAY STORAGE AREA

- D. WATER SHUT-OFF: The water shut-off may be necessary in some cases.

LOCATION: IN SIDEWALK ALONG LOS ALTOS AVENUE

- E. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.

LOCATION: NONE

- F. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.

LOCATION: 2-IN SERVICE BAY

- G. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.

LOCATION: IN SERVICE BAY STORE AREA

- H. EMERGENCY RESPONSE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.

1. Broom: SERVICE BAY

2. Shovel: SERVICE BAY

3. Gloves: SERVICE BAY

4. Goggles: SERVICE BAY

- I. FIRST AID KIT:

LOCATION: IN SERVICE BAY STORE AREA

- J. EMERGENCY ASSEMBLY AREA: Location where all employees are to meet in the event of an emergency.

LOCATION: SOUTH SIDE OF SITE

- K. HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) AND MATERIAL SAFETY DATA SHEET (MSDS):

LOCATION: SALES OFFICE

II. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

1. NAME: El Camino Hospital

ADDRESS: 2500 Grant Road, Los Altos

PHONE NUMBER: 415 940-7000

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: Stanford Medical Center

ADDRESS: 300 Pasteur, Stanford

PHONE NUMBER: 415 723-7570

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies; and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE! If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

E. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

F. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

Responsible person Greg Galatolo  
Telephone Number 415 941-0244

### III. EMERGENCY RESPONSE TRAINING PLAN

PERSON RESPONSIBLE FOR EMERGENCY RESPONSE TRAINING PROGRAM:

Name Greg Galatolo Title Dealer

This plan describes the basic training program in use at this facility. The training provided to facility personnel and the records maintained on that training are indicated by a checked box.

#### 1. TRAINING REQUIREMENTS

- All employees are trained and drilled in the following as indicated:
  - Procedures for internal alarm/notification.
  - Procedures for notification of external emergency response organizations.
  - Location and content of emergency response plan.
- Chemical handlers are trained in the following as indicated below:
  - Safe methods for handling and storage of hazardous materials.
  - Proper use of personnel protection equipment.
  - Locations and proper use of fire and spill control equipment.
  - Specific hazards of each chemical to which they may be exposed, including the pathways of exposure, i.e., skin absorption, inhalation, ingestion.
- Emergency response team members are trained in the following as indicated:
  - Procedures for shutdown of operations.
  - Procedures for using, maintaining and replacing facility emergency and monitoring equipment.
- All personnel are trained in emergency response procedures within six months of hiring.
- Refresher training is provided at least annually.

#### 2. PERSONNEL TRAINING RECORDS

- Training records are maintained for all employees as indicated:

- Verification that training was completed by employee.
- Description of type and amount of introductory and continuing training.
- Training records of former employees are retained for at least three years.
- Documentation on facility emergency response drills conducted during the year maintained and available for review.

See UNOCAL Monitoring Plan, Following -

\* \* \* \* \*

For larger and more complex hazardous materials facilities, a more comprehensive and detailed emergency response training plan should be maintained on site and should be available for review by the inspecting jurisdiction.

Comprehensive and detailed emergency response training plan maintained on site:

Location IN Dealers Office

Responsible Person Greg Galatola

Telephone Number 415 941-0244

V. CERTIFICATION

I hereby certify that the information provided in this Business Plan is in conformance with the requirements of the Health and Safety Code, Chapter 6.95 and that the foregoing information is true and correct. I also understand that I may be required to show proof of compliance during any facility inspection conducted by local county or state authorities and that any change in inventory, business address, business ownership, business name and/or operations which differ from this plan requires that an amendment to this Hazardous Materials Business Plan be submitted within 30 days of a change.

Name Greg Galatolo Title Dealer  
Signature  Date 04-08-93

NOTE: At least once every two years this Hazardous Materials Business Plan must be reviewed by a responsible company officer to determine if a revision is needed and must certify in writing to the administering agency that a review was made and that any necessary changes were made to the plan. A copy of the revised plan and/or certification must be sent to the Santa Clara County Health Department, Toxics Control Unit.

## SECTION B. CHEMICAL INVENTORY FORM

**INSTRUCTIONS:** Complete a separate form for each building or area where hazardous materials or waste are located. Please refer to the instruction packet and photo copy extra copies of this form before completing it.

## UNOCAL LEAK RESPONSE PLAN

All calls for maintenance from Unocal service stations (both Company owned/operated and Company owned/leased to Dealer) come into Maintenance Dispatch in Los Angeles, California via (800) 723-7600. This includes calls to report spills, leaks, dispensers damaged by cars, or alarms triggered by leak detection equipment except fuel delivery spills which are reported through the Supervisor for Safety and Environment.

1. Upon detection of an unauthorized release, spill or overfill of hazardous material from an underground storage tank, the Operator shall immediately notify Unocal Maintenance. Unocal will notify the local agency within 24 hours after detection.

### VARIATION IN INVENTORY RECONCILIATION

If the dealer exceeds the allowable variation on his monthly inventory reconciliation, (variation equals .50% of fuel deliveries plus 100 gallons) he will immediately notify his Territory Manager: (T.M.) Name: Kathy Crouse Phone Number: 510 277-2457

Unocal T.M. shall do the following:

T.M. will make an immediate inquiry regarding any losses during recent inventory reconciliation. If necessary, he will review the records at the site.

To verify inventory reconciliation records, the territory manager will take the following steps:

1. Within 24 hours of discovering the variation, the territory manager will review the inventory records for the preceding 30 days and determine if there is a calculation error. Within that same 24 hour period, if a variation is confirmed, the T.M. will notify Unocal Maintenance. Maintenance will notify the local agency.
2. Coordinate with Unocal maintenance to check the underground tank system for signs of a leak.
3. Coordinate for calibration of the dispenser meters within 24 hours of the system inspection.
4. The dealer or territory manager will continue to conduct inventory reconciliation as required.

If the review of the inventory reconciliation records indicates that no release has taken place, no further release detection steps need to be taken. Unocal will notify the local agency that the suspected release was not confirmed.

### OTHER SUSPECTED RELEASES INCLUDING:

Tank Overfill  
Tank Monitor Alarm Activated  
Spills  
Drive Offs

The discovery of released hazardous substances at the site including the presence of free product or vapors in soils, basements, sewer lines, utility lines, surface waters, or drinking waters.

Unusual operating conditions such as erratic behavior of dispensers, sudden loss of product from the product tanks, or the unexplained presence of water in the product tank. The exception is if the equipment is not functioning properly and the system has not leaked.

**IMMEDIATELY REPORT ANY OF THESE CONDITIONS TO UNOCAL MAINTENANCE AT 1-800-723-7600.**

1. Unocal will notify the local agency of any of the above mentioned conditions which are still under investigation after eight hours.
2. Unocal will authorize and order any contractors necessary to assist in the clean up effort.
3. If it is determined at any time during the process that there has been a release (as defined in Chapter 6.7 of Division 20 of the Health & Safety Code), a leak report will be prepared and provided to the local agency within 5 working days in accordance with Article 5, Section 2651(b), of the California Underground Storage Tank Regulations. This report will be filed by the Unocal maintenance engineer. On going remediation will be supervised by the Unocal Area Manager, Environmental Remediation.

## DISPOSAL PROCEDURE FOR ANTI-FREEZE

Used anti-freeze will be placed in a D.O.T. approved 55 gallon drum or similar container and the container labeled "Waste Anti-freeze / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call an "Anti-freeze Recycling Contractor" to remove the container of used anti-freeze. The dealer will not, under any circumstances, pour used or new anti-freeze or a mixture thereof on the floor or on the ground and hose it down to floor drains or storm drains.

DRAFT

## DISPOSAL PROCEDURE FOR USED OIL FILTERS

The dealer will put Used oil filters in a 55 gallon drum or similar container and the container labeled "Waste Oil Filters / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call a "Waste Oil Recycling Contractor" to remove the container of used oil filters.

The dealer will drain all used oil filters of free-flowing oil prior to placement into the above noted container. Free flowing oil is defined as a continuous stream of oil exiting the filter when the filter is inverted. Oil exiting drop by drop is not considered free flowing. If oil exiting the filter is restricted in any way, the filter shall be manipulated to allow used oil to exit the filter freely.

Used oil filters will not be placed in a refuse disposal container.

DRAFT

DAI VISUAL MONITORING PROCEDURES  
FOR ABOVEGROUND HAZARDOUS MATERIALS

Hazardous Materials stored aboveground include:

- Motor Oil
- Transmission Oil
- Antifreeze
- Grease
- Gear Lubricant (80W/90)
- Solvent (including parts cleaners)
- Propane
- Battery Acid \*
- Car Wash Products
- Kerosene
- CO<sub>2</sub>
- Waste Oil (prior to dumping in underground tank)
- Spent Anti-freeze \*
- Used Oil Filters

The storage areas for these hazardous materials must be visually inspected every day for signs of leakage. Items designated with a (\*) require secondary containment with the contents of each container clearly labeled.

If there is a leak or spill of any of the hazardous materials, whether stored above- or underground, Dealer must follow the "Emergency Response Procedures," attached.

**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  
 "THERE IS A FIRE / GASOLINE SPILL at the Unocal service station at 4350 El Camino Real" If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. LOOK AROUND to assure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist, or direct assistance to, anyone having difficulty leaving the station area, and anyone who may be injured.
5. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
6. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:

Primary Contact: Name: Greg Galatolo Title: Dealer

Address: 1521 Topar Dr. Los Altos Ca 94024

Bus #/Home #: 415 941-02444 / 415 948-8302

Secondary Contact: Name: Scott Kent Title: Manager

Address: 1411 Muender Ave. Sunnyvale 94086

Bus #/Home #: 415 941-0244 / 408 739-6964

7. NOTIFY Unocal Maintenance Dispatch by phone IMMEDIATELY 1-800-723-7600  
NOTIFY your Territory Manager IMMEDIATELY  
 TERRITORY MANAGER: Kathy Crouse Phone Number: 510 277-2457

Unocal will notify the appropriate State and Local agencies within 24 hours, unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:

1. LOCAL AGENCY: Santa Clara County, HD/Toxics Control  
PHONE NUMBER: 408 299-6930

2. CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24-HOURS)  
 3. LOCAL POLICE AND FIRE DEPARTMENTS; 911

**MINOR INCIDENT:**

FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if necessary.

SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary.

MEDICAL: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.

RECORD: Record the event in the daily monitoring log.

NOTIFY: the dealer of the event.

EMPLOYEE TRAINING PLAN

6115

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign this document upon completion of training. Retain these records for a minimum of three years.

I. FIRST THINGS TO KNOW:

- A. EMERGENCY PUMP SHUT-OFF: This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.

LOCATION: 1-NORTH 1-SOUTH SIDE OF SERVICE BUILDING

- B. ELECTRICAL PANEL: The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.

LOCATION: IN SERVICE BAY STORE ROOM

- C. WATER SHUT-OFF: The water shut-off may be necessary in some cases.

LOCATION: IN SIDEWALK ALONG LOS ALTOS AVENUE

- D. NATURAL GAS SHUT-OFF: If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.

LOCATION: NONE

- E. FIRST AID KIT:

LOCATION: IN SERVICE BAY STORE ROOM

- F. FIRE EXTINGUISHER: Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.

LOCATION: 2-IN SERVICE BAY

- G. ABSORBENT: In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.

LOCATION: IN SERVICE BAY STORE ROOM

- H. EMERGENCY RESPONSE EQUIPMENT: These items shall be used by employees to prevent direct skin contact with a hazardous material.

1. Broom: IN STOREROOM

2. Shovel: IN STOREROOM

3. Gloves: IN STOREROOM

4. Goggles: IN STOREROOM

II. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

I. NAME: Veterans Memorial Hospital

ADDRESS: 3801 Miranda Avenue, Palo Alto

PHONE NUMBER: 408 493-5000

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: Stanford Medical Center

ADDRESS: 300 Pasteur, Stanford

PHONE NUMBER: 415 723-7570

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

**DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE** If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

E. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

F. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

I have reviewed, understand and have been properly drilled in the above employee training program.

## AGENCY

*1992 business plan*

December 31, 1991

Greg Galatolo  
Unocal SS #6115  
4350 El Camino Real  
Los Altos, CA 94022

Dear Greg Galatolo:

The attached revised Hazardous Materials Management Plan (HMMP) is intended to replace any previous HMMP currently on file at your facility. Verify the information provided, and sign each copy on all pages tagged with flags. The "Dealer" copy is to be placed in the office at the site and kept up to date. All remaining copies are to be returned to Robert H. Lee in the attached envelope. Upon receipt, RHL will distribute these HMMP's to the appropriate governing agencies and UNOCAL departments.

It is very important that you read, understand, and instruct your employees on the implementation of this new HMMP. Should you have any concerns after having made a thorough review of it, notify your UNOCAL Area Representative immediately for clarification.

RHL has made a commitment on behalf of UNOCAL to submit a signed completed HMMP to the local administering agency within 30 days. Please, sign the Acknowledgement of Receipt at the bottom of this page and return it to your area manager.

Sincerely,

ROBERT H. LEE & ASSOCIATES

II. EMERGENCY RESPONSE PLAN

This plan describes the personnel, procedures and equipment available for responding to a release or threatened release of hazardous materials that are stored, handled or used at this site.

The immediate response procedures to be followed and the equipment available for response are indicated by a checked box. A check in the box states that that specific procedure is followed at this facility or the equipment specified is available on site.

NOTIFICATION/ALARM

(1)  CALL 911 FOR FIRE DEPARTMENT (Local emergency responder)

(2)  NOTIFY ON SITE RESPONDERS:

For larger and more complex hazardous materials facilities, supplemental and detailed emergency response information should be maintained on site and should be available for review by the inspecting jurisdiction.

Supplemental hazardous materials emergency response information maintained on site:

Location IN DEALERS OFFICE

Responsible person GREG GALATOLO

Telephone Number 415-941-0244

### III. EMERGENCY RESPONSE TRAINING PLAN

PERSON RESPONSIBLE FOR EMERGENCY RESPONSE TRAINING PROGRAM:

Name GREG GALATOLO Title DEALER

This plan describes the basic training program in use at this facility. The training provided to facility personnel and the records maintained on that training are indicated by a checked box.

#### 1. TRAINING REQUIREMENTS

- All employees are trained and drilled in the following as indicated:
  - Procedures for internal alarm/notification.
  - Procedures for notification of external emergency response organizations.
  - Location and content of emergency response plan.
- Chemical handlers are trained in the following as indicated below:
  - Safe methods for handling and storage of hazardous materials.
  - Proper use of personnel protection equipment.
  - Locations and proper use of fire and spill control equipment.
  - Specific hazards of each chemical to which they may be exposed, including the pathways of exposure, i.e., skin absorption, inhalation, ingestion.
- Emergency response team members are trained in the following as indicated:
  - Procedures for shutdown of operations.
  - Procedures for using, maintaining and replacing facility emergency and monitoring equipment.
- All personnel are trained in emergency response procedures within six months of hiring.
- Refresher training is provided at least annually.

#### 2. PERSONNEL TRAINING RECORDS

- Training records are maintained for all employees as indicated:

- Verification that training was completed by employee.
- Description of type and amount of introductory and continuing training.
- Training records of former employees are retained for at least three years.
- Documentation on facility emergency response drills conducted during the year maintained and available for review.

\* \* \* \* \*

For larger and more complex hazardous materials facilities, a more comprehensive and detailed emergency response training plan should be maintained on site and should be available for review by the inspecting jurisdiction.

Comprehensive and detailed emergency response training plan maintained on site:

V. CERTIFICATION

I hereby certify that the information provided in this Business Plan is in conformance with the requirements of the Health and Safety Code, Chapter 6.95 and that the foregoing information is true and correct. I also understand that I may be required to show proof of compliance during any facility inspection conducted by local county or state authorities and that any change in inventory, business address, business ownership, business name and/or operations which differ from this plan requires that an amendment to this Hazardous Materials Business Plan be submitted within 30 days of a change.

Name GREG GALATOLO Title DEALER  
Signature X [Signature] Date 1-21-92

NOTE: At least once every two years this Hazardous Materials Business Plan must be reviewed by a responsible company officer to determine if a revision is needed and must certify in writing to the administering agency that a review was made and that any necessary changes were made to the plan. A copy of the revised plan and/or certification must be sent to the Santa Clara County Health Department, Toxics Control Unit.

Inspection Type: <input checked="" type="checkbox"/> Hazardous Materials <input type="checkbox"/> Hazardous Waste <input type="checkbox"/> Tiered Permit <input type="checkbox"/> Toxic Gas <input type="checkbox"/> Cal-Accidental Release Prevention Program <input type="checkbox"/> Other	Hazardous Waste Generator Type: <input type="checkbox"/> < 1,000 Kg./mo. <input type="checkbox"/> ≥ 1,000 Kg./mo. <input type="checkbox"/> CESQG <input type="checkbox"/> Satellite Only

**VIOLATIONS:** Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	<b>Note to Greg Galatolo: Please immediately forward this report to Janette Thompson of Tosco Environmental Compliance.</b>	
<b>2305</b>	<b>Revisions to the station's Hazardous Materials Business Plan (HMBP) were submitted in March of this year. However, the annual HMBP inventory certification was not made as required. Review certification requirements and certify the inventory every year.</b>	
<b>2301</b>	<b>Inventory certified on 3/4/2001 states that largest container size for virgin antifreeze is 1 gallon. Facility has a 110-gallon aboveground tank for this material. Propane storage area is not shown on HMBP Storage Map. The phone number for this Department in the HMBP and in posted emergency information at the station is incorrect. The correct number is (408) 918-3400. Submit HMBP revisions within 30 days. Revise posted emergency information.</b>	
<b>2399</b>	<b>No copy of the UST Permit to Operate is available at the facility.</b>	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

**OFFICIAL NOTICE OF INSPECTION**  
 (Continuation Page)

Facility Name: Tosco Station #256115

Inspection Date: 12-31-2002

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Post a copy of the permit. No copies of the most recent HMBP, UST Monitoring Plan, UST Response Plan, or UST Financial Responsibility documentation are maintained at the facility. Keep current copies at the facility.	
2358	Facility's written Underground Storage Tank Monitoring Program is still incomplete and not approved. Plan dated 2/7/2002 has no plot plan, does not identify sensor manufacturer/models, does not address fail-safe pump shutdown for piping sump sensors, and does not address required line tightness testing.	
2361	Facility's UST Response Plan does not include the name(s) and title(s) of responsible persons. These are repeat violations.  Submit fully-compliant UST monitoring and response plans within 30 days. Recommend you have your environmental consultant contact this Department regarding regulatory requirements. [Note: Do not use the Unidocs "Underground Separation, Containment, and Monitoring Plan" form as part of your HMBP. That form is obsolete. Recommend you use the new UST Monitoring Plan and UST Response Plan forms now available at <a href="http://www.unidocs.org">www.unidocs.org</a> . Also, please keep UST monitoring and response plans separate from the HMBP (i.e., as stand-alone documents).]	
2371	No test report has been submitted covering the line tightness tests reportedly performed by Tank-Tek on or about 1/18/2002. No	
2366	copy of such a report is available at the facility. Test reports must be submitted within 30 days of testing. Submit a copy of the test

JANETTE THOMPSON  
TOSCO CORP.  
2000 CROW CANYON PL., #400  
SAN RAMON, CA 94583

**Re: UST Secondary Containment Testing and Under-Dispenser Containment.**

Dear JANETTE THOMPSON:

This department is the local agency which regulates underground storage tanks (UST) at your facility, TOSCO #256115. We are sending this letter to remind you of upcoming regulatory deadlines regarding management of UST systems.

**The deadline for initial testing of UST secondary containment systems installed prior to January 1, 2001 is January 1, 2003.** Such testing is now required to be performed every three years. If you have not yet had such testing done, you should contact a qualified licensed contractor as soon as possible to ensure that you meet the deadline. Please review the enclosed Guidelines for Testing of UST Secondary Containment Systems and State reminder bulletin. Additional information is available on the Internet at [www.swrcb.ca.gov/cwphome/ust/docs/secondary\\_containment/index.html](http://www.swrcb.ca.gov/cwphome/ust/docs/secondary_containment/index.html).

**The deadline for installation of Under-Dispenser Containment equipment in all UST systems not subject to earlier upgrade deadlines is December 31, 2003.** This requirement applies to tank systems such as those dispensing motor vehicle fuels, including bulk fuel loading systems. Tank systems supplying standby generators typically do not have dispensers. If you do not currently have approved secondary containment (i.e. containment sumps or dispenser pans) for all dispensers, you should contact a qualified licensed contractor as soon as possible to ensure that installation of the new equipment is completed before the deadline. Please note that approval by this Department is required prior to modifying UST systems. Plan check forms and guidelines are available on our website at [www.ehinfo.org/hmcd/hazmat/default.asp](http://www.ehinfo.org/hmcd/hazmat/default.asp).

Owners/operators who fail to meet the above deadlines may be subject to enforcement action. Should you have any questions, please do not hesitate to contact the undersigned at (408) 918-1978.

Sincerely,

Greg Breshears

RE: Phillips Petroleum Company (Phillips 66)  
Gasoline Dispensing Facilities  
California

Dear Agency Representative,

As you may know, Phillips Petroleum Company (Phillips 66) recently acquired Tosco Corporation and its legal entities and assets. Many of the assets acquired by Phillips under this acquisition include the gasoline dispensing facilities and convenience stores operating under the banners of 76 service stations and Circle K convenience stores.

Please be advised that the following contacts are still valid for environmental compliance matters at these facilities:

Tina Berry  
Senior Compliance Specialist  
Phone: 925-277-2319  
Email: [tberry@tosco.com](mailto:tberry@tosco.com); or [berryt@ppco.com](mailto:berryt@ppco.com)  
Contact for Air Districts and air quality issues

Janette Thompson  
Compliance Specialist  
Phone: 925-277-2404  
Email: [jthomps@ppco.com](mailto:jthomps@ppco.com)  
Contact for CUPAs and UST inspection issues

Correspondence should continue to be addressed as follows:

Tosco Marketing Company  
Environmental Compliance Department  
2000 Crow Canyon Place, Suite 400  
San Ramon, CA 94583  
Fax: 925-277-2361

Most of our operating permits are issued under the name of Tosco Corporation or Circle K Stores, Inc. As fully-owned subsidiaries of Phillips 66 Company, these entities are still legal and valid and may continue to be in use for a period of time.

We would also like to request that we be placed on your mailing and distribution lists (if not already) for current and updated ARB and SWRCB-UST regulations and correspondence. Janette and I are also available to assist and respond to notices of violations and non-compliance issued for our stations.

Please contact Janette or me if there are any compliance matters that require our attention. We look forward to working and building our relationships with you.

Sincerely,

Tina Berry  
Senior Compliance Specialist

CHECK  
ATTACHED

Subject: Response to Notice of Inspection  
Dated 7/13/2000

Dear Inspector (Greg B. ?),

I am in receipt of the inspection report and am providing the attached plan and fee's in response to items 2351 and 2352 listed in that report.

Our records indicate that in February of 1998, the existing monitoring panel and its associated sensing probes were removed and replaced with a more sophisticated system. The original system (a 'Leak Alert' brand) was functioning and was certified at the time of the replacement. The new system (a Veederroot TLS 350) was installed in the same location as the original system and the exchange was made by a Veederroot approved installer.

As such, we viewed this upgrade as a maintenance item, not a 'construction' project. No new electrical circuits were needed or added. All existing probes were replaced, none were eliminated or added.

Please accept the check for the permit fee's, and the attached plan as our response to your request. It is my understanding that we will then be in full compliance.

Sincerely,

Chester Bennett  
Project Consultant

Dear Mr. Breshears,

Per the subject inspection report (copy attached for reference), attached are the following documents:

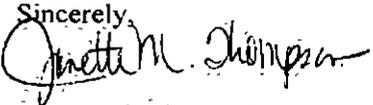

- Monitoring and Spill response plan. *BOTH INCOMPLETE*
- Monitor Certification. *← FAIL 4-26-00 TESTING ONLY (WAS SUBMITTED ON 5-9-00 TOO)*
- New Form A & B. *← MULTIPLE ERRORS*
- Letter to the dealer requesting replacement of hose and nozzles.

Steve Skanderson with RHL Designs will be forwarding a copy of the revised Business plan to you and to the site (Violation Code 2301 & 2302).

Work order documentation/repairs have been issued to our Maintenance Service Center (Violation Code 2377). Repair documents will be forwarded to you upon completion.

In regards to the submittal of the work plans to remove the LeakAlert 08 and to replace the monitoring with a new TLS-350 (Violation Codes 2351 & 2352), our Construction Group is looking into the situation. They should be in contact with you in the near future.

If you need any additional information, please contact me at (925) 277-2305.

Sincerely,

Dear Mr. Galatolo,

Attached is a copy of the inspection report we received that includes findings for your service station, citing the following conditions:

- Replace cracked nozzle vapor recovery boot on Dispenser #3 – 89 Octane.
- Replace cracked nozzle vapor recovery boot on Dispenser #5 – 92 Octane.
- Replace vapor recovery hose on Dispenser #10 – 89 Octane.

Per your Tosco Dealer Service Station Lease and Motor Fuel Supply Agreement, it is your responsibility to address the items listed above. Please make sure that you perform the necessary corrective actions as soon as possible.

We appreciate your assistance in this matter. If you have any questions or require additional information, please contact your Business Operations Manager or myself at (925) 277-2305.

Sincerely,

Janette M. Thompson

**Re: Copies of Official Notices of Inspection - Union Stations No. 5957 and 6115.**

Ms. Alcala:

This Department inspected the above facilities on July 12 and 13, 2000. At the conclusion of the inspections, the Operator, Greg Galatolo, was given original copies of the Official Notices of Inspection with directions to forward them to Tosco. Enclosed are photocopies of the reports in case this was not done. Please ensure that written responses to all Notices of Violation, along with any applicable document submittals, are sent to my attention by the specified deadlines.

Should you have any questions, please contact me at (408) 299-8007.

## OFFICIAL NOTICE OF INSPECTION

Facility Name: <u>UMON STATION # 6115</u>	Inspection Date: <u>7-12-2000</u>
Site Address: <u>4350 EL CAMINO REAL - LOS ALTOS</u>	Work Area:
Contact Person(s): <u>GREG GALATTO</u>	Employee No.: <u>4686</u>
Inspection Type: <input checked="" type="checkbox"/> Hazardous Materials' <input type="checkbox"/> Cal-Accidental Release Prevention Program <input checked="" type="checkbox"/> Hazardous Waste <input type="checkbox"/> Medical Waste Storage/Treatment <input type="checkbox"/> Toxic Gas <input type="checkbox"/> Medical Waste Generator	Samples Taken? <input type="checkbox"/> Yes; <input checked="" type="checkbox"/> No. Photographs Taken? <input type="checkbox"/> Yes; <input checked="" type="checkbox"/> No.

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2301	BUSINESS PLAN MAP <del>DATA</del> DOES NOT SHOW	
2302	PROPANE STORAGE OR SOLVENT PART CLEANER. OIL-WATER SEPARATOR WAS CLOSED SEVERAL YEARS AGO AND SHOULD BE DELETED FROM MAP. INVENTORY DOES NOT INCLUDE PROPANE STORAGE (14 x 17 1/2 # CYLINDERS). BOTH VIRGIN AND WASTE ANTIFREEZE ARE STORED IN POLY BULK TANKS. SUBMIT A REVISED BUSINESS PLAN WITHIN 30 DAYS. (NOTE: PROPANE ON SITE FOR PAST 5 TO 6 MONTHS.) REVISE MAP TO SHOW CORRECT WASTE STORAGE LOCATIONS.	
2358	NO LST MONITORING PLAN WAS SUBMITTED AFTER INSTALLING VEEDER-ROOT TLS-350 MONITORING SYSTEM AND SENSORS. SUBMIT A PLAN WITHIN 30 DAYS. (NOTE: IT IS NOT CLEAR WHETHER PITCHING MONITORING EQUIPMENT WAS DONE WITH PLAN SUBMITTED TO AND APPROVED BY THIS DEPARTMENT.)	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

Received by: [Signature] Inspected by: GREG BREIDENBACH Entered by: 1002

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator: \_\_\_\_\_ Title: \_\_\_\_\_ Date: 7/1/00

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

### Hazardous Waste Violations

- Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

**HAZARDOUS MATERIALS STORAGE PROGRAM VIOLATION CODES  
 GENERAL STORAGE PROVISIONS**

Authority Cited: *Hazardous Materials Storage Ordinance (SO); Health and Safety Code (H&SC); California Code of Regulations, Title 8, Div. 4.1 (CCR).*

This document has been prepared to explain Violation Codes associated with the storage of hazardous materials which may have been noted in the attached Santa Clara County Hazardous Materials Compliance Division (HMCD) Official Notice of Inspection. The sections of State Law and local Ordinance corresponding to each Violation Code have been briefly described. For a complete citation of these laws and regulations, it is recommended that you use the Internet, visit your local library, or visit our office located at 2220 Moorpark Avenue in San Jose, where the complete text of the laws/regulations referenced below can be viewed. Health and Safety Code is available on the Internet at <http://www.leginfo.ca.gov/calaw.html>. Title 23 CCR is available on the Internet at <http://www.calregs.com>. If you would like to discuss any interpretations of these laws or regulations, please call our department at (408) 299-6930 and ask for the Hazardous Materials Program Manager.

**A. Permits, HMBP/HMMP**

V	N/A	Violation Code	Regulatory Citation
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2300	SO 301.03(a) 303.01
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2301	H&SC 25503.5 SO 304.02

**Hazardous Materials Storage Permit** - Any facility that stores or uses hazardous materials must apply for and obtain a hazardous materials storage permit from HMCD.

**Hazardous Materials Business Plan (HMBP) Submitted/Complete** - The owner of a facility must complete a HMBP and submit a copy to HMCD for each site which handles any individual hazardous material or mixture containing a hazardous material which has an aggregate quantity on site at any one time during the reporting year equal to or greater than 500 pounds for solids, 55 gallons for liquids, or 200 cubic feet for gases. It must include:

- Hazardous materials inventory information;
- Emergency response plans and procedures in the event of a reportable release or threatened release of a hazardous material, including, but not limited to, notification of local emergency response agencies; HMCD, and the state Office of Emergency Services; procedures for the mitigation of a release or threatened release to minimize any potential harm or damage to persons, property, or the environment; and evacuation plans and procedures, including immediate notice, for the facility;
- Training for all new employees and annual training, including refresher courses, for all employees in safety procedures in the event of a release or threatened release of hazardous material, including, but not limited to, familiarity with facility emergency response plans and procedures;
- A facility site plan and hazardous materials storage map.

[Notes: (1) There are limited exceptions to the reporting quantities specified above. The exceptions are listed in the Hazardous Materials Business Plan Information Sheet. (2) Any hazardous material in a rail car or rail or marine freight container remaining at a facility longer than 30 days is deemed stored and subject to HMBP requirements. Per H&SC §25501.4(c), HMCD must be notified immediately of such storage.]

V	N/A	Violation Code	Regulatory Citation	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2302	H&SC 25505(b) 25510	<p><b>HMBP Changes Reported</b> - Within 30 days of any one of the following events, a facility shall submit to HMCD an amended HMBP:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> A 100% or more increase in the quantity of a previously disclosed material;</li> <li><input checked="" type="checkbox"/> Any handling of a previously undisclosed hazardous material in HMBP quantities;</li> <li><input type="checkbox"/> Change of business address;</li> <li><input type="checkbox"/> Change of business ownership;</li> <li><input type="checkbox"/> Change of business name;</li> <li><input type="checkbox"/> A substantial change in the handler's operations (e.g. personnel changes, installation or closure of hazardous materials storage/handling systems, etc.) occurs.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2303	H&SC 25505(e)	<p><b>HMBP Review/Certification</b> - A facility shall review its HMBP at least once every three years to determine if a revision is needed and shall certify to HMCD that the review was made and that any necessary changes were made to the plan. A copy of any changes to the plan shall accompany the certification.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2304	H&SC 25503.6	<p><b>Written Notice to Property Owner</b> - Any facility which is required to establish and implement a HMBP and is located on leased or rented real property shall notify, in writing, the owner of the property that the business is subject to HMBP requirements (i.e. H&amp;SC §25503.5) and has complied with its provisions, and shall provide a copy of the HMBP to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent. A copy of this notification should be kept at the facility.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2305	H&SC 25505(d)	<p><b>Annual Hazardous Materials Inventory Certification/Submittal</b> - Any facility that handles hazardous materials in HMBP quantities shall, on an annual basis, either: 1.) Submit to HMCD a completed "Hazardous Materials Business Plan Certification Form"; or 2.) Submit a report of its hazardous materials inventory in a format approved by HMCD.</p>
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2306	SO 304.01	<p><b>Hazardous Materials Management Plan (HMMP) Submitted/Complete</b> - Any facility that stores or uses hazardous materials in quantities less than those specified for the HMBP must file a HMMP. The HMMP shall be updated any time there is a significant change in the quantities of hazardous materials or changes in the process in which the hazardous materials are being used. (Note: The Hazardous Materials/Waste Registration Form serves as a Short Form HMMP.)</p>
<input type="checkbox"/>	<input type="checkbox"/>	2307	SO 303.01.	<p><b>Permit for Installation/Construction/Repair/Closure</b> - Any facility which intends to install, construct, repair, or close a hazardous materials storage/handling system or area (e.g. tank, room, etc.) must first obtain a permit from HMCD.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2308	SO 303.06(b)	<p><b>Modifications to a Facility</b> - Any substantial modification to, or repair of, a storage facility, other than minor or emergency repairs, shall be performed in accordance with written plans submitted to and approved by HMCD prior to the initiation of work.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2309	SO 303.04(a) 303.04(c)	<p><b>Abandoned Facility or Tank</b> - No hazardous materials storage facility may be abandoned. Owners/operators of facilities permanently taken out of service, or which are not monitored in accordance with an approved written monitoring plan, shall submit a closure plan application and obtain a closure permit at least 30 days prior to final closure of the facility or aboveground/underground storage tank. Once the plan has been approved, a final walk-through inspection must be completed by HMCD.</p>

**B. Separation, Containment, Monitoring:**

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2310	SO 303.08	<b>Secured Storage Areas</b> - Access to hazardous materials storage areas shall be secured by means of fences and/or locks. Gates and doorways to such areas shall be kept securely locked when unattended.
<input type="checkbox"/>	<input type="checkbox"/>	2311	SO 303.02(e)	<b>Separation of Incompatible Materials</b> - Materials which in combination might cause a fire, explosion, or the production of a flammable or toxic gas shall be separated so as to avoid potential intermixing in the event of a release.
<input type="checkbox"/>	<input type="checkbox"/>	2312	SO 303.07(a)	<b>Safe Chemical Handling</b> - Dispensing and mixing of hazardous materials shall not be done in such a manner as to substantially increase the risk of an unauthorized discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2313	SO 303.07(b)	<b>Movement of Materials Within Facility</b> - Hazardous materials shall not be stored in a travel path (e.g. hallway, aisleway, etc.). They may remain in the travel path only for the time reasonably necessary to move them. Such movement shall be in a manner which will not result in an unauthorized discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2314	SO 303.02(c)(1)	<b>Primary Containment Product-Tight</b> - All primary containment (i.e. the container in which a material is stored) used for the storage of hazardous materials shall be product-tight (i.e. not leaking and compatible with the chemical being stored).
<input type="checkbox"/>	<input type="checkbox"/>	2315	SO 303.02(c)	<b>Secondary Containment Provided</b> - Secondary containment (i.e. containment external to and separate from primary containment) constructed so as not to be structurally weakened as a result of contact with the material stored shall be provided. It shall be capable of containing 110% of the volume of the primary container if a single container is used, or in the case of multiple containers, 150% of the volume of the largest container or 10% of the aggregate, whichever is larger. In addition, the secondary containment, if open to rainfall, must be capable of accommodating the volume of a 24-hour rainfall from a 100-year storm (i.e. approximately an additional 4 1/2 inches in depth or height of the secondary containment).
<input type="checkbox"/>	<input type="checkbox"/>	2316	SO 303.02(f)	<b>Removal of Water from Secondary Containment</b> - Any water which has entered the secondary containment shall be removed, analyzed for contamination by hazardous substances, and disposed of properly. A system to prevent uncontrolled removal of such water shall be provided.
<input type="checkbox"/>	<input type="checkbox"/>	2317	SO 303.02(d)	<b>Overfill Protection Provided</b> - Primary containment of tanks holding hazardous materials shall be equipped with a high-level alarm (i.e. an alarm which sounds when the tank is 90% full) and/or other approved overfill protection devices to prevent spills when filling the tank.
<input type="checkbox"/>	<input type="checkbox"/>	2318	SO 303.02(b) 303.05(a)	<b>Monitoring System (Provided)</b> - Each area in which hazardous materials are stored shall be monitored. Monitoring methods shall include at least one system for detecting leakage from the primary containment. Visual inspection of both primary and secondary containment is preferable; however, other methods may be allowed or required by HMCD. Per SO §303.04(b), facilities which are temporarily out of service, and are intended to be returned to use, shall continue to be monitored and inspected.
<input type="checkbox"/>	<input type="checkbox"/>	2319	SO 303.03 304.01	<b>Monitoring System (Approved)</b> - Procedures and/or equipment used to monitor hazardous materials must be approved by HMCD.

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2320	SO 303.05(b)	<b>Inspection and Testing of Monitoring Equipment</b> - All monitoring systems shall be tested and inspected monthly, at a minimum, to ensure that they are in working order. Records of all inspection/maintenance/repairs shall be kept on-site and be available for inspection by HMCD.
<input type="checkbox"/>	<input type="checkbox"/>	2321	SO 303.05(a)	<b>Visual/Audible Alarm</b> - Whenever monitoring devices are provided, they shall be connected to attention-getting visual and audible alarms.
<input type="checkbox"/>	<input type="checkbox"/>	2322	SO 303.03 304.02(d) 304.03(b)(4)	<b>Written Monitoring Plan Submitted/Approved/Implemented</b> - A written monitoring plan must be prepared and submitted to HMCD. The monitoring plan shall describe the location, type, manufacturer specifications (if applicable), and suitability of monitoring methods used in each storage area. Frequency of monitoring must be specified.
<input type="checkbox"/>	<input type="checkbox"/>	2323	SO 303.05(b)	<b>Monitoring/Maintenance Records</b> - Any facility that stores or uses hazardous materials must test, monitor, and inspect the facility in compliance with the approved written monitoring plan and maintain records adequate to demonstrate compliance therewith. SO §307.02 requires that the facility maintain an inspection check sheet or log, in a format approved by HMCD, designed to be used in conjunction with routine inspections. A blank copy of this log must be submitted as an attachment to the facility's HMBP.
<input type="checkbox"/>	<input type="checkbox"/>	2324	SO 303.06(a)	<b>Maintenance, Repairs, or Replacement</b> - The facility owner/manager shall carry out all necessary maintenance, ordinary upkeep, and minor repairs needed to keep equipment (e.g. monitoring systems, piping, etc.) in proper operating condition. This work shall be performed in a careful and safe manner. Emergency repairs may be made immediately, but within 5 working days after such repairs have been started, a written plan describing the repairs shall be submitted to HMCD for review and approval.

**C. Training, Emergency Response, Unauthorized Discharges**

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2325	H&SC 25504(c)	<b>Emergency Response Training</b> - At facilities required to prepare a HMBP, training shall be provided for all new employees in the event of a release or threatened release of a hazardous material, including, but not limited to, familiarity with the facility's emergency response plans and procedures. Annual refresher courses shall be provided for all employees. The training program may take into consideration the position of each employee. It shall include, but not limited to, all of the following: <ul style="list-style-type: none"> <li><input type="checkbox"/> Immediate notification to HMCD and to appropriate local emergency rescue personnel and the State Office of Emergency Services.</li> <li><input type="checkbox"/> Procedures for the mitigation of a release or threatened release to minimize any potential harm or damage to persons, property, or the environment.</li> <li><input type="checkbox"/> The facility's evacuation plans and procedures.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2326	SO 303.09	<b>Emergency Equipment</b> - Emergency equipment shall be provided, regularly tested, and adequately maintained, and shall be reasonable and appropriate to potential emergencies presented by the stored hazardous materials.
<input type="checkbox"/>	<input type="checkbox"/>	2327	SO 303.10	<b>Posted Emergency Procedures</b> - Any facility which stores hazardous materials shall conspicuously post simplified emergency procedures (i.e. what to do in the case of fire, spill, etc.) in locations where hazardous materials are stored.

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2328	SO 306.01(a)(1)	<b>Unauthorized Discharge (Recordable)</b> - Any facility which has had a recordable unauthorized discharge, must record it in the facility's monitoring records. A recordable unauthorized discharge is one that: <ul style="list-style-type: none"> <li>° Is from primary containment to secondary containment; and</li> <li>° Is cleaned up before it leaves the secondary containment; and</li> <li>° Results in no increase in the possibility of explosion or fire.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2329	SO 306.01(a)(1)	<b>Unauthorized Discharge (Reportable)</b> - Any facility which has had a reportable unauthorized discharge must report it to HMCD immediately. A reportable discharge is any unauthorized discharge that does not meet the definition of a recordable discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2331	SO 306.01(a) 306.02	<b>Cleanup of Unauthorized Discharge</b> - Any business or facility which stores or uses hazardous materials shall initiate and complete all actions necessary to remedy the effects of any unauthorized discharge.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2348	H&SC 25270.5(c)	<b>Spill Prevention Control and Countermeasure (SPCC) Plan</b> - The owner or operator of any facility which stores more than 1,320 gallons of petroleum aboveground, or stores petroleum in an aboveground tank larger than 660 gallons in capacity, shall prepare a SPCC Plan in accordance with guidelines contained in Part 112 of Title 40 of the Code of Federal Regulations. <i>(Exception: Tank facilities located on a farm, nursery, logging site, or construction site are not required to prepare a SPCC Plan if no tank exceeds 20,000 gallons and cumulative storage capacity does not exceed 100,000 gallons.)</i>

### D. Record Keeping, Labeling

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2332	SO 307.05	<b>Records (Retention Time)</b> - All records (e.g. maintenance, monitoring, training, unauthorized discharge logs, etc.) shall be maintained for no less than 3 years and must be available for review by HMCD upon request.
<input type="checkbox"/>	<input type="checkbox"/>	2333	8 CCR 5227	<b>Labeling</b> - Hazardous materials containers shall be labeled with either the chemical or common name (not trade name only), of the material and hazard information equivalent to that specified in 8 CCR §5227(c) and 5228.

### E. Urban Runoff

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2349	Ordinance No. NS-517.55 B11.5-3.	<b>Illegal Discharge</b> - It is unlawful to discharge, or cause, allow or permit to be discharged into any part of the stormwater system or watercourse any sewage, industrial wastes, petroleum, or petroleum products, coal tar, chemicals, detergents, solvents, paints, contaminated or chlorinated swimming pool water, pesticides, herbicides and fertilizers, soil sediments, washwater, cans, bottles, refuse, motor vehicles or parts thereof, or any material that may be deleterious to aquatic life.

## HAZARDOUS MATERIALS STORAGE PROGRAM VIOLATION CODES UNDERGROUND STORAGE TANKS

*Authority Cited: Hazardous Materials Storage Ordinance (SO); Health and Safety Code (H&SC);  
 California Code of Regulations, Title 23, Div. 3, Chapter 16 (CCR)*

This document has been prepared to explain any Violation Codes associated with hazardous materials underground storage tank systems which may have been noted in the attached Santa Clara County Hazardous Materials Compliance Division (HMCD) Official Notice of Inspection. If you would like to discuss any interpretations of these laws or regulations, please call our department at (408) 299-6930 and ask for the Hazardous Materials Program Manager.

### A. General Requirements

v	N/A	Violation Code	Regulatory Citation	Description
<input type="checkbox"/>	<input type="checkbox"/>	2350	H&SC 25284(a)	<b>Permit to Operate</b> - Any business or facility that owns or operates an underground storage tank holding a hazardous material must apply for and obtain from HMCD an Underground Storage Tank Permit to Operate. Completion and submittal of Unified Program Consolidated Forms for Underground Storage Tanks [i.e. "Facility" form (for site), Tank Pages 1 and 2 (for each tank), and "Installation Certificate of Compliance" (for new installations and piping replacement)] along with a new or revised Hazardous Materials Business Plan, written UST Monitoring Plan, and written UST Response Plan satisfies permit application requirements.
OK				
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2351	H&SC 25286(a)	<b>Change in Tank Usage or Monitoring Procedures</b> - Any business or facility that stores hazardous materials in a UST must notify and receive approval from HMCD prior to making any changes in the usage of the tank, including the storage of different hazardous materials or modification of monitoring procedures. Unified Program Consolidated Forms, Monitoring Plan, and Response Plan must be revised as necessary and submitted along with this notification.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2352	H&SC 25285.1(a)(1)	<b>Compliance With Terms or Conditions of Permit to Operate</b> - USTs must be operated in accordance with the terms and conditions of the permit. Such terms include, but are not limited to, operating according to the approved monitoring procedures and response plan. HMCD may revoke or modify a UST permit for violation of any terms or conditions of the permit.
<input type="checkbox"/>	<input type="checkbox"/>	2353	H&SC 25292.1(a)	<b>Safe Operation</b> - Tanks must be operated to prevent any unauthorized releases, including spills and overfills.
<input type="checkbox"/>	<input type="checkbox"/>	2354	H&SC 25291(b); or 25292(a)	<b>Monitoring Systems Provided</b> - Each tank system must be equipped with monitoring systems (i.e. equipment and procedures) capable of detecting an unauthorized release of the hazardous material stored.
OK				
<input type="checkbox"/>	<input type="checkbox"/>	2355	H&SC 25293	<b>Monitoring System Approved</b> - Each underground tank system must be monitored by the methods required by the Permit to Operate (i.e. in accordance with the facility's written Underground Storage Tank Monitoring Plan approved by HMCD).
OK				

V	N/A	Violation Code	Regulatory Citation	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2357	CCR 2630(d); 2641(j)	<p><b>Installation, Calibration, Operation, and Maintenance of Monitoring Equipment</b> - Equipment and devices used to monitor UST systems must be installed, calibrated, operated, and maintained in accordance with manufacturer's instructions, <u>including routine maintenance and service checks at least once per calendar year</u> for operability or running condition.</p>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2358	CCR 2632(d)(1); or 2641(h)	<p><b>Written Monitoring Plan</b> - Written monitoring procedures must specify:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The frequency of performing the monitoring (e.g. continuous, monthly, etc.);</li> <li><input checked="" type="checkbox"/> The methods and equipment, <u>identified by name and model</u>, to be used for performing the monitoring;</li> <li><input checked="" type="checkbox"/> The location(s), <u>identified on a plot plan</u>, where the monitoring will be performed (i.e. locations of sensors, line leak detectors, control panels, etc.);</li> <li><input type="checkbox"/> The name(s) and titles(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment;</li> <li><input type="checkbox"/> The reporting format (e.g. monitoring log sheets);</li> <li><input type="checkbox"/> The preventive maintenance schedule for the monitoring equipment. The schedule must be at least annually and in accordance with the manufacturer's instructions;</li> <li><input type="checkbox"/> A description of the training necessary for the operation of both the tank system and the monitoring equipment;</li> </ul> <p><i>N/A</i> <input type="checkbox"/> For hydrostatic annular monitoring systems, the proposed method(s) for determining the presence or absence of hazardous substance in the interstitial space if monitoring indicates a possible unauthorized release. CCR, 2632(c)(2)(C)</p>
<input type="checkbox"/>	<input type="checkbox"/>	2359	CCR 2712(b)	<p><b>Monitoring Records (content)</b> - Written monitoring records must include:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The date and time of all monitoring or sampling;</li> <li><input type="checkbox"/> Monitoring equipment calibration and maintenance records;</li> <li><input type="checkbox"/> The results of any visual observations;</li> <li><input type="checkbox"/> The results of all sample analyses performed in a laboratory or in the field, including laboratory data sheets and analysis used;</li> <li><input type="checkbox"/> The logs of all readings of gauges or other monitoring equipment, groundwater elevations, or other test results;</li> <li><input type="checkbox"/> The results of inventory readings and reconciliations;</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2360	CCR 2712(b)	<p><b>Monitoring Records (retention time)</b> - Written monitoring records must be maintained on-site for the following minimum periods:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> 3 years for monitoring and maintenance records;</li> <li><input type="checkbox"/> 5 years for written performance claims pertaining to release detection systems and calibration/maintenance records for such systems;</li> <li><input type="checkbox"/> 6½ years for cathodic protection maintenance records.</li> </ul> <p><i>(Exception: If prior approval is received from HMCD, records for unmanned facilities may be maintained off-site at an agreed upon location.)</i></p>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2361	CCR 2632(d)(2); or 2641(h)	<p><b>Written Response Plan</b> - A written response plan must demonstrate, to the satisfaction of HMCD, how an unauthorized release will be handled (i.e. controlling the leak or spill, reporting, cleanup, etc.). The response plan must include, but is not limited to, the following:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> A description of the proposed methods and equipment to be used for removing and properly disposing of any hazardous substances, including the location and availability of the required equipment if not permanently on-site, and an equipment maintenance schedule for the equipment located on-site;</li> </ul> <p><i>(Continued on Next Page)</i></p>

*(Written Response Plan - Continued)*

- The name(s) and title(s) of the person(s) responsible for authorizing any work necessary under the response plan;
- In the case of secondarily-contained tanks, the plan must state that any unauthorized release will be removed from the secondary containment system within the time consistent with the ability of the secondary containment system to contain the hazardous substance, but not more than 30 calendar days.

2362 H&SC 25294

**Recording of Unauthorized Release** - Any facility which has had a recordable unauthorized release must record it in the facility monitoring log. A recordable unauthorized release is one that:

- Does not escape from the secondary containment; and
- Is cleaned up within 8 hours after it was detected or reasonably should have been detected; and
- Results in no increase in the possibility of fire or explosion; and
- Does not cause any deterioration of the secondary containment.

2363 H&SC 25295

**Reporting of Unauthorized Release** - Any facility that has had a reportable unauthorized release must report it to HMCD within 24 hours after the release is detected or reasonably should have been detected. A reportable release is any release which does not meet the requirements of a recordable release as described above. State law requires that a full written report [e.g. Underground Storage Tank Unauthorized Release (Leak)/Contamination Site Report] be submitted to HMCD within 5 working days of the release which describes:

- The nature and volume of the release; and
- Any corrective or remedial actions already taken; and
- Any further corrective or remedial actions, including investigative actions, proposed to be taken to clean up the release and abate its effects, including a time schedule for implementation of those actions.

2364 H&SC 25292.2

OK

**Financial Responsibility** - With the exception of state and federal government facilities, owners and operators of USTs must maintain evidence of financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by a release. This is accomplished through completion and submittal of the "Certification of Financial Responsibility" form and maintenance of the current copy of the certification form and all required supporting documentation (e.g. letters from chief financial officer, certificates of deposit, insurance policies, etc.) at the tank site. If used as financial responsibility mechanisms, financial tests (e.g. chief financial officer letter, government financial test, etc.) must be updated annually. [Note: The "Petroleum Underground Storage Tank Financial Responsibility Guide", a complete guidance document on financial responsibility is available from HMCD at (408) 299-6930 or the State Water Resources Control Board at (800) 813-3863.]

2365 H&SC 25284

OK

**Written Contract Between Tank Owner and Tank Operator** - If the tank owner is not the tank operator, the owner must provide the operator with a copy of the Permit to Operate, enter into a written contract with the operator which requires the operator to monitor the tank system as described in the approved written monitoring plan, and provide the operator with a copy or summary of Health and Safety Code Section 25299 (available from HMCD upon request). A copy of this contract must be kept at the tank site. The tank owner must notify HMCD of any change of operator within 30 days by submitting a revised "Form A."

2366 H&SC 25293

**Record Keeping** - Records of monitoring, testing, repairs, and closure must be maintained in sufficient detail to enable HMCD to determine if a tank system is in compliance. Records must be maintained for at least 3 years and must be available for HMCD review.

2367 H&SC 25287

OK

**Permit Fees** - A permit fee and state surcharge must be paid to HMCD by any person who submits an application for a permit to operate a UST or to renew or amend a permit.

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2368	H&SC: 25298(a)	<b>Abandoned/Out-of-Service Underground Tanks</b> - No facility shall abandon a UST system or close or temporarily cease operating a UST system unless prior approval from HMCD has been granted. Per 23 CCR, 2670(e), the period between cessation of hazardous substance storage and application for tank closure shall not exceed 90 days. UST closure permit applications can be obtained by calling (408) 299-6930.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2369	H&SC: 25292.1(b)	<b>Training in Cathodic Protection</b> - When equipped with cathodic protection (i.e. sacrificial anodes or impressed current systems), tanks must be operated by persons with sufficient training and experience in corrosion prevention.
<input type="checkbox"/>	<input type="checkbox"/>	2370	H&SC: 25284.4(a)	<b>Integrity Tests</b> - Integrity (i.e. precision) tests of tanks and piping shall be performed only by, or under the direct and personal supervision of, a tank tester with a currently valid tank testing license.
<input type="checkbox"/>	<input type="checkbox"/>	2371	CCR 2643(g)	<b>Tank/Piping Test Reporting</b> - The UST owner or operator must: <ul style="list-style-type: none"> <li><input type="checkbox"/> Notify HMCD 48 hours before conducting a tank or piping integrity test unless the notification requirement is waived by HMCD;</li> <li><input type="checkbox"/> Within 30 calendar days of completion of a UST or piping integrity test, provide HMCD with a written test report;</li> <li><input type="checkbox"/> Within 30 calendar days of completion of any test performed on underground tanks or piping to detect an unauthorized release, submit to HMCD a report in written and/or tabular format, at a level of detail appropriate for the release detection method used.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2372	H&SC: 25291(a)(1)	<b>Primary Containment Product-Tight</b> - Primary containment in all tanks and piping used for the storage of hazardous materials must be product-tight.
<input type="checkbox"/>	<input type="checkbox"/>	2399		<b>Other Hazardous Materials Storage Violations</b> - (See the Official Notice of Inspection for details.)

**B. Construction and Monitoring of Tanks**

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2373	H&SC: 25291(a); or CCR 2662(b)	<b>Secondary Containment</b> - All tanks installed on or after 1/1/84, and all tanks installed prior to 1/1/84, that contain hazardous substances other than motor vehicle fuel, must be provided with secondary containment.
<input type="checkbox"/>	<input type="checkbox"/>	2374	CCR 2635(b); or 2665	<b>Spill Prevention Containers</b> - Each tank fill opening must be equipped with an approved spill prevention container of minimum 5 gallon capacity which is equipped with a drain valve to permit spilled hazardous material to be drained into the tank primary containment.
<input type="checkbox"/>	<input type="checkbox"/>	2375	CCR 2635(b); or 2665	<b>Overfill Prevention Equipment</b> - Each tank fill opening must be equipped with approved overfill prevention equipment which can not allow manual override and must either: <ul style="list-style-type: none"> <li>o Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or by triggering an audible and visual alarm; or</li> <li>o Restrict flow to the tank at least 30 minutes prior to tank overfill, provided that the restriction occurs at no more than 95% of tank capacity and triggers an audible and visual alarm at least 5 minutes prior to tank overfill; or</li> <li>o Provide positive shut-off (100% restricted flow) of flow to the tank when the tank is no more than 95% full.</li> </ul>

(Continued on Next Page)

*(Overfill Prevention Equipment - Continued)*

*[Exception: Per 23 CCR, 2635(b)(3), tanks holding used oil may be exempted from this requirement provided that the tank fill inlet is located in an observable area, the spill container is adequate to collect any overfill, and the tank system is filled by transfers of no more than 25 gallons of oil at one time.]*

WASTE OIL

- 2376 CCR 2631(c), or 2662(d) **Striker Plates** - Tank primary containment must be equipped with striker plates or drop-tube-mounted bottom protectors installed beneath each accessible opening.
- 2377 H&SC 25291(e) **Water in Secondary Containment** - The facility must have a means of monitoring for water intrusion into secondary containment systems, and a means for removing any water found. In addition, the removed water must be analyzed for contamination and, if contaminated, properly disposed of at an authorized disposal facility.
- 2378 CCR 2632(c)(2)(B) 2662(b) **Audible and Visual Alarm System** - Continuous monitoring systems must be connected to an audible and visual alarm system approved by HMCD.
- 2379 CCR 2635(a) 2662(b) **Cathodic Protection Systems (Testing)** - Cathodic protection systems (i.e. sacrificial anodes or impressed current corrosion-control systems) must be tested under the direction of a qualified cathodic protection tester within 6 months of installation and at a minimum every three years thereafter.

**C. Construction and Monitoring of Piping Systems**
