---	-----	----------------	---------------------

<input type="checkbox"/>	<input checked="" type="checkbox"/>	2385	CCR 2636(f)(4)
--------------------------	-------------------------------------	------	----------------

**Annual Testing of Pressurized Piping Systems** - An annual pressure test (i.e. precision line test) must be performed on pressurized piping systems installed on or after 7/1/87. Systems shall be tested at a pressure designated by the equipment manufacturer, provided that the method is capable of detecting a minimum release equivalent to 0.1 gallon/hour defined at 150% of the normal operating pressure of the product piping system at the test pressure with at least a 95% probability of detection and not more than a 5% probability of false alarm. Tests may be performed by licensed tank testers or approved electronic line leak detectors.

*(Exception: The annual pressure test requirement is waived if the piping meets all of the following requirements:*

- The piping secondary containment system is equipped with a continuous monitoring system; and
- The continuous monitoring system is connected to an audible and visual alarm system and the pumping system; and
- The continuous monitor shuts down the pump and activates the alarm system when a release is detected; and
- The pumping system shuts down automatically if the continuous monitoring system fails or is disconnected.)

*[Note: Per CCR, 2636(g)(5), the automatic pump shutdown requirements do not apply to emergency generator systems, provided that the monitoring system is checked at least daily. These monitoring system inspections must be documented in the UST monitoring records.]*

<input type="checkbox"/>	<input type="checkbox"/>	2386	CCR 2635(b) 2666(b)
--------------------------	--------------------------	------	---------------------

**Corrosion Protection** - Underground metal piping must be protected against corrosion with cathodic protection. The cathodic protection system for piping must be meet the same requirements tanks are required to meet [see CCR, 2635(a)].

<input type="checkbox"/>	<input checked="" type="checkbox"/>	2391	CCR 2641(f) 2643(c) 2666(c)
--------------------------	-------------------------------------	------	-----------------------------

**Monitoring of Single-Wall Pressurized Piping** - Monitoring of pressurized piping systems without secondary containment must include an electronic line leak detector (LLD) that:

- Tests the line at least hourly at any pressure *(Exception: If use of the piping is intermittent, leak detection monitoring is required only at the beginning or end of the period during which the piping is under pressure; but in any event there shall not be more than one hour between the time the equipment initiates the test and detection of an unauthorized release.);* and
- Is capable of detecting a release equivalent to 3.0 gallons/hour defined at 10 p.s.i. within one hour of its occurrence; and
- Shuts off the pump and triggers a visual and audible alarm if an unauthorized release is detected, or if the LLD fails or is disconnected;
- Tests the piping as follows:
  - At least monthly at any pressure with an ability to detect a 0.2 gallon/hour leak at normal system operating pressure; or
  - Once, per calendar year at a pressure designated by the equipment manufacturer with an ability to detect a 0.1 gallon/hour leak at 150% of normal operating pressure.

*[Note: Per CCR, 2666(c), the automatic pump shutdown requirements do not apply to emergency generator systems.]*

V	N/A	Violation Code	Regulatory Citation
---	-----	----------------	---------------------

<input type="checkbox"/>	<input checked="" type="checkbox"/>	2392	CCR 2641(c)
--------------------------	-------------------------------------	------	-------------

**Monitoring of Single-Wall Suction Piping - Suction piping must be:**

- Monitored daily for the presence of air in the line as described in CCR, Appendix II (i.e. through completion of the inspection items detailed on the SWRCB's "Suction Piping Daily Log") (Exception: Emergency generator systems may be monitored less often, but at least monthly.); and
- Pressure tested at least every three years at a pressure designated by the test equipment manufacturer by a method capable of detecting a 0.1 gallon/hour leak at a minimum of 40 p.s.i.. [If the piping cannot be isolated from the tank for testing purposes, the piping must be tested using an overfilled volumetric tank integrity test or other test method meeting the requirements of CCR, 2643(f), if approved by HMCD.]

(Exceptions: Underground suction piping is exempt from monitoring requirements if all of the following requirements are met:

- It is gravity-flow piping (i.e. it is sloped so that the contents will drain back into the tank if the suction is released); and
- No valves or pumps are installed below grade and only one check valve is located directly below and as close as practical to the suction pump; and
- An inspection method is provided which readily demonstrates compliance with requirements 1 and 2, above.)

<input type="checkbox"/>	<input checked="" type="checkbox"/>	2393	CCR 2643(e)
--------------------------	-------------------------------------	------	-------------

**Monitoring of Single-Wall Gravity Piping - Gravity piping must be monitored at least once every two years at a pressure designated by the test equipment manufacturer. The method must be capable of detecting a minimum release equivalent to 0.1 gallons/hour at 40 p.s.i..**

[Exception: If the piping cannot be isolated from the tank for testing purposes, the piping must be tested using an overfilled volumetric tank integrity test or other test method meeting the requirements of CCR, 2643(f), if approved by HMCD.]

---	-----	----------------	---------------------

<input type="checkbox"/>	<input type="checkbox"/>	2387	CCR 2645
--------------------------	--------------------------	------	----------

**Monitoring of Single-Wall Tanks: Manual Tank Gauging - If approved for use, manual tank gauging must:**

- Be conducted weekly in accordance with CCR, 2645;
- Be supplemented by an annual tank integrity test if the tank capacity is greater than 1,000 gallons or if the tank capacity is greater than 500 gallons and the gauging period is less than 60 hours;

<input type="checkbox"/>	<input type="checkbox"/>	2388	CCR 2643(b)(1)
--------------------------	--------------------------	------	----------------

**Monitoring of Single-Wall Tanks: Automatic Tank Gauging (ATG) - ATG equipment must:**

- Test the tank at least once per month;
  - Conduct its tests after product delivery or when the UST is filled to within 10% of the highest operating level during the previous month;
  - Be capable of detecting a release of 0.2 gallon/hour.
- (Continued on Next Page)

*(Monitoring of Single-Wall Tanks: Automatic Tank Gauging - Continued)*

- Generate a hard copy of all data reported, including:
  - Time and date;
  - Tank identification;
  - Fuel depth;
  - Water depth;
  - Temperature;
  - Liquid volume;
  - Duration of the test.
  - Calculated leak rate and leak threshold *(Required only for systems installed on or after 01/01/95).*

*[Note: Tank capacity, test period, and other test parameters must be in accordance with values published in the SWRCB's "List of Leak Detection Equipment and Methods for Underground Storage Tanks" (i.e. LG-113).]*

2389 CCR 2643(b)(2)

**Monitoring of Single-Wall Tanks: Automatic Tank Gauging Plus Manual Inventory Reconciliation (MIR)** - If this monitoring method is used, MIR must be conducted daily in accordance with CCR, 2646. The automatic tank gauge system must:

- Test the tank at least once per month;
- Conduct its tests when the product level in the tank is at least 3 feet;
- Be capable of detecting a release of 0.1 gallon/hour;
- Generate a hard copy of all data reported, including:
  - Time and date;
  - Tank identification;
  - Fuel depth;
  - Water depth;
  - Temperature;
  - Liquid volume;
  - Duration of the test.
  - Calculated leak rate and leak threshold *(Required only for systems installed on or after 01/01/95).*

*(Note: The restrictions on groundwater level specified in CCR, 2646(b) do not apply when using this monitoring alternative.)*

2395 CCR 2662(c)

**Steel Motor Vehicle Fuel Tanks** - Steel tanks holding motor vehicle fuel must be equipped with approved cathodic protection systems and internal lining or bladder systems.

Environmental Compliance  
Department

September 18, 1998

Ms. Nicole Pullman  
County of Santa Clara Department of Environmental Health  
2200 Moorpark Avenue, East Wing, Room 204  
San Jose, CA 95128-2690

Dear Ms. Pullman,

Per our conversation, this correspondence should clarify the ownership and responsibility for lube bay operations at Tosco gasoline facilities. The owner and operator of the lube bay operations at each facility is identified in the UST Operator/ Lube Bay Owner column of the attached spreadsheet. All hazardous waste permits pertaining to the lube bay operations should be issued and billed to the actual operator at each facility.

Although Tosco is the owner of the facility itself, Tosco does not own or operate the lube bay operations. (30)

Should you have any questions, please feel free to telephone me at (925) 277-2319.

Sincerely,

A handwritten signature in black ink, appearing to read 'T. DuMont'.

Thomas J. DuMont  
Regional Compliance Manager

INSPECTION USING GENERAL STORAGE & UNDERGROUND STORAGE TANK (UST) VIOLATION CODE SHEETS (ATTACHED).

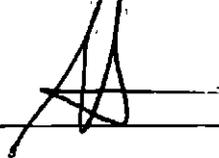

VC (VIOLATION CODE) 2305 - HMIS IN BUSINESS PLAN IS MISSING ALL REQUIRED DATA EXCEPT COMMON NAME, LOCATION, MAXIMUM & AVERAGE STORAGE AMOUNTS & WASTE ANNUAL THROUGHPUT. SUBMIT COMPLETE INVENTORY (SEE HMIS IN HMPP PROVIDED TO YOU FOR REQUIRED INFORMATION).

VC 2359, 2360 & 2366 - THERE ARE GAPS IN THE TANK MONITORING RECORDS AS NOTED IN THE HAZARDOUS WASTE NOTICE OF INSPECTION ALSO PREPARED ON THIS DATE. DOCUMENT PROPER FUNCTIONING OF LEAK ALERT UST MONITORING SYSTEM AS NOTED IN THAT REPORT.

VC 2362 - FITTING INSIDE DISPENSER # 2 APPEARS TO HAVE MINOR LEAK. FIX LEAK & DOCUMENT AS REQUIRED.

~~VIOLATIONS:~~

ALL DISPENSER HOUSINGS & UST FILL MATCHES WERE OPENED & VISUALLY INSPECTED. EXCEPT FOR WASTE OIL OVERFILL, NO PROBLEMS, OTHER THAN THAT NOTED ABOVE, WERE FOUND. MONITORING SYSTEM HAS POWER & APPEARS TO BE FUNCTIONAL.

## HAZARDOUS MATERIALS STORAGE PROGRAM VIOLATION CODES UNDERGROUND STORAGE TANKS

*Authority Cited: Hazardous Materials Storage Ordinance (SO); Health and Safety Code (H&SC);  
 California Code of Regulations, Title 23, Div. 3, Chapter 16 (CCR)*

This document has been prepared to explain any Violation Codes associated with hazardous materials underground storage tank systems which may have been noted in the attached Santa Clara County Hazardous Materials Compliance Division (HMCD) Official Notice of Inspection. The sections of State Law and local Ordinance corresponding to each Violation Code have been **briefly** described. For a complete citation of these laws and regulations, it is recommended that you subscribe to a regulatory update service, visit your local library, or visit our office located at 2220 Moorpark Avenue in San Jose, where the complete text of the laws/regulations referenced below can be viewed. Copies of those documents which are not protected by copyright can be obtained at a cost of \$1.70 for the first page and 5 cents for each additional page. If you would like to discuss any interpretations of these laws or regulations, please call our department at (408) 299-6930 and ask for the Hazardous Materials Storage Program Supervisor.

### A. General Requirements

V	N/A	Violation Code	Regulatory Citation	Description
<input type="checkbox"/>	<input type="checkbox"/>	2350	H&SC 25284(a)	<b>Permit to Operate</b> - Any business or facility that owns or operates an underground storage tank holding a hazardous material shall apply for and obtain from HMCD an Underground Storage Tank Permit to Operate. Completion and submittal of State of California Water Resources Control Board (SWRCB) Underground Storage Tank Program information forms [Form "A" (for site), Form "B" (for each tank), and Form "C" (for new installations/upgrades)], along with a new or revised Hazardous Materials Business Plan, written UST Monitoring Plan, and written UST Response Plan satisfies permit application requirements.
<input type="checkbox"/>	<input type="checkbox"/>	2351	H&SC 25286(a)	<b>Change in Tank Usage or Monitoring Procedures</b> - Any business or facility that stores hazardous materials in a UST shall notify and receive approval from HMCD prior to making any changes in the usage of the tank, including the storage of different hazardous materials or modification of monitoring procedures. SWRCB forms, Monitoring Plan, and Response Plan shall be revised as necessary and submitted along with this notification.
<input type="checkbox"/>	<input type="checkbox"/>	2352	H&SC 25285.1(a)(1)	<b>Violation of Terms or Conditions of Permit to Operate</b> - USTs must be operated in accordance with the terms and conditions of the permit. Such terms include, but are not limited to, operating according to the approved monitoring procedures and response plan. HMCD may revoke or modify a UST permit for violation of any terms or conditions of the permit.
<input type="checkbox"/>	<input type="checkbox"/>	2353	H&SC 25292.1(a)	<b>Operational Requirements</b> - Tanks shall be operated to prevent any unauthorized releases, including spills and overfills.
<input type="checkbox"/>	<input type="checkbox"/>	2354	H&SC 25291(a), 25291(b)	<b>Monitoring System (Installed)</b> - Each tank system shall be equipped with a monitoring system capable of detecting an unauthorized release of the hazardous material stored.

*Farms A&B*

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2355	H&SC 25293(a)	<b>Monitoring System (Approved)</b> - Each underground tank shall be monitored by the method(s) required by the Permit to Operate [i.e. in accordance with written monitoring procedures (plan) approved by HMCD].
<input type="checkbox"/>	<input type="checkbox"/>	2320	SO 303.05(b)	<b>Inspection and Testing of Monitoring Equipment</b> - All monitoring systems shall be tested and inspected monthly, at a minimum, to ensure that they are in working order. Records of all inspection/maintenance/repairs shall be kept on-site and be available for inspection by HMCD.
<input type="checkbox"/>	<input type="checkbox"/>	2357	CCR 2630(d); 2641(j)	<b>Installation, Calibration, Operation, and Maintenance of Monitoring Equipment</b> - Equipment and devices used to monitor UST systems shall be installed, calibrated, operated, and maintained in accordance with manufacturer's instructions, <u>including routine maintenance and service checks at least once per calendar year for operability or running condition.</u>
<input type="checkbox"/>	<input type="checkbox"/>	2358	CCR 2632(d)(1); or 2634(d)(2); or 2641(h)	<p><b>Written Monitoring Plan</b> - Written monitoring procedures shall specify:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The frequency of performing the monitoring;</li> <li><input type="checkbox"/> The methods and equipment, identified by name and model, to be used for performing the monitoring;</li> <li><input type="checkbox"/> The location(s), as identified on a plot plan, where the monitoring will be performed (i.e. locations of sensors, line leak detectors, control panels, etc.);</li> <li><input type="checkbox"/> The name(s) and titles(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment;</li> <li><input type="checkbox"/> The reporting format;</li> <li><input type="checkbox"/> The preventive maintenance schedule for the monitoring equipment. The schedule shall be at least annually and in accordance with the manufacturer's instructions;</li> <li><input type="checkbox"/> A description of the training necessary for the operation of both the tank system and the monitoring equipment.</li> <li><input type="checkbox"/> For methods of monitoring where the presence of the hazardous substance is not determined directly, (e.g. where liquid level measurements in the interstitial space are used as the basis for determination), the proposed method(s) for determining the presence or absence of the hazardous substance in the interstitial space if the indirect methods indicate a possible unauthorized release. CCR 2632(c)(2)(C); or 2634(d)(3)</li> </ul>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2359	CCR 2712(b)	<p><b>Monitoring Records (content)</b> - Written monitoring records shall include:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The date and time of all monitoring or sampling;</li> <li><input type="checkbox"/> Monitoring equipment calibration and maintenance records;</li> <li><input type="checkbox"/> The results of any visual observations;</li> <li><input type="checkbox"/> The results of all sample analyses performed in a laboratory or in the field, including laboratory data sheets and analysis used;</li> <li><input type="checkbox"/> The logs of all readings of gauges or other monitoring equipment, groundwater elevations, or other test results;</li> <li><input type="checkbox"/> The results of inventory readings and reconciliations.</li> </ul>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2360	CCR 2712(b)	<p><b>Monitoring Records (retention time)</b> - Written monitoring records shall be maintained on-site for the following minimum periods:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> 3 years for monitoring and maintenance records;</li> <li><input type="checkbox"/> 5 years for written performance claims pertaining to release detection systems and calibration/maintenance records for such systems.</li> </ul> <p><i>(Exception: If prior approval is received from HMCD, records may be maintained off-site at an agreed upon location.)</i></p>

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2361	CCR 2632(d)(2); or 2634(e); or 2641(h)	<p><b>Written Response Plan</b> - A written response plan shall demonstrate, to the satisfaction of HMCD, that any unauthorized release will be removed from the secondary containment system within the time consistent with the ability of the secondary containment system to contain the hazardous substance, but not more than 30 calendar days. The response plan shall include, but is not limited to, the following:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> A description of the proposed methods and equipment to be used for removing and properly disposing of any hazardous substances, including the location and availability of the required equipment if not permanently on-site, and an equipment maintenance schedule for the equipment located on-site.</li> <li><input type="checkbox"/> The name(s) and title(s) of the person(s) responsible for authorizing any work necessary under the response plan.</li> <li><input type="checkbox"/> For tanks constructed per Alternate Construction Requirements (i.e. per CCR, 2633), if the leak interception and detection system does not meet the volumetric requirements of CCR, 2631(d)(1) through (5), the response plan shall consider the following: CCR, 2634(e)             <ul style="list-style-type: none"> <li><input type="checkbox"/> The volume of the leak interception and detection system in relation to the volume of the primary container;</li> <li><input type="checkbox"/> The amount of time the leak interception and detection system will provide containment in relation to the period of time between detection of an unauthorized release and cleanup of the leaked substance;</li> <li><input type="checkbox"/> The depth from the bottom of the leak interception and detection system to the highest anticipated level of groundwater;</li> <li><input type="checkbox"/> The nature of the unsaturated soils under the leak interception and detection system and their ability to absorb contaminants or to allow movement of contaminants;</li> <li><input type="checkbox"/> The methods and scheduling for removal of all of the hazardous substances which may have been discharged from the primary containment and become located in the unsaturated soils between the primary container and ground water, including the leak interception and detection system sump.</li> </ul> </li> </ul>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2362	H&SC 25294	<p><b>Unauthorized Release (Recordable)</b> - Any facility which has had a recordable unauthorized release must record it in the facility monitoring log. A recordable unauthorized release is one that:</p> <ul style="list-style-type: none"> <li>◦ Does not escape from the secondary containment; and</li> <li>◦ Is cleaned up within 8 hours after it was detected or reasonably should have been detected; and</li> <li>◦ Results in no increase in the possibility of fire or explosion; and</li> <li>◦ Does not cause any deterioration of the secondary containment.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2363	H&SC 25295	<p><b>Unauthorized Release (Reportable)</b> - Any facility that has had a reportable unauthorized release must report it to HMCD immediately (i.e. no more than 24 hours after the release was detected or reasonably should have been detected). A reportable release is any release which does not meet the requirements of a recordable release as described above. State law requires that a full written report be submitted to HMCD within 5 working days of the release which describes:</p> <ul style="list-style-type: none"> <li>◦ the nature and volume of the release; and</li> <li>◦ Any corrective or remedial actions already taken; and</li> <li>◦ Any further corrective or remedial actions, including investigative actions, proposed to be taken to clean up the release and abate its effects, including a time schedule for implementation of those actions.</li> </ul>

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2364	H&SC 25292.2	<b>Financial Responsibility</b> - With the exception of state and federal government facilities, owners and operators of USTs must maintain evidence of financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by a release. This is accomplished through completion and submittal of the "Certification of Financial Responsibility" form and maintenance of the current copy of the certification form and all required supporting documentation (e.g. letters from chief financial officer, certificates of deposit, insurance policies, etc.) at the tank site. [Note: The "Petroleum Underground Storage Tank Financial Responsibility Guide", a complete guidance document on financial responsibility is available from HMCD at (408) 299-6930 or the State Water Resources Control Board at (800) 813-3863.]
<input type="checkbox"/>	<input type="checkbox"/>	2365	H&SC 25293(b)	<b>Written Contract Between Tank Owner and Tank Operator</b> - If the tank owner is not the tank operator, the owner must provide the operator with a copy of the Permit to Operate, enter into a written contract with the operator which requires the operator to monitor the tank system as described in the approved written monitoring plan, and provide the operator with a copy or summary of Health and Safety Code Section 25299 (available from HMCD upon request). A copy of this contract shall be kept at the tank site. The tank owner must notify HMCD of any change of operator.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2366	H&SC 25293(a)	<b>Recordkeeping</b> - Records of monitoring, testing, repairs, and closure shall be maintained in sufficient detail to enable HMCD to determine if a tank system is in compliance. Records of monitoring, testing, repairs, and closure must be maintained for at least 3 years and must be available for HMCD review.
<input type="checkbox"/>	<input type="checkbox"/>	2367	H&SC 25287(a)	<b>Permit Fees</b> - A fee shall be paid to HMCD by any person who submits an application for a permit to operate a UST or to renew or amend a permit.
<input type="checkbox"/>	<input type="checkbox"/>	2368	H&SC 25298(a)	<b>Abandoned/Out-of-Service Underground Tanks</b> - No facility shall abandon a UST system or close or temporarily cease operating a UST system unless prior approval from HMCD has been granted. Closure Permit applications can be obtained by calling (408) 299-6930.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2369	H&SC 25292.1(b)	<b>Training in Cathodic Protection</b> - When equipped with cathodic protection (i.e. sacrificial anodes or impressed current systems), tanks shall be operated by persons with sufficient training and experience in corrosion prevention.
<input type="checkbox"/>	<input type="checkbox"/>	2370	H&SC 25284.4(a)	<b>Tank Integrity Tests</b> - Tank integrity tests shall be performed only by, or under the direct and personal supervision of, a tank tester with a currently valid tank testing license.
<input type="checkbox"/>	<input type="checkbox"/>	2371	CCR 2643(g)	<b>Tank/Piping Test Reporting</b> - The UST owner or operator shall: <ul style="list-style-type: none"> <li><input type="checkbox"/> Notify HMCD 48 hours before conducting a tank or piping integrity test unless the notification requirement is waived by HMCD;</li> <li><input type="checkbox"/> Within 30 calendar days of completion of a UST or piping integrity test, provide HMCD with a written test report;</li> <li><input type="checkbox"/> Within 30 calendar days of completion of any test performed on underground tanks or piping to detect an unauthorized release, submit to HMCD a report in written and/or tabular format, at a level of detail appropriate for the release detection method used.</li> </ul>

**B. Requirements Specific to New Underground Storage Tanks**

N/A

(i.e. Tanks installed on or after 01/01/84)

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2372	H&SC 25291(a)(1)	<b>Primary Containment Product-Tight</b> - All primary containment used for the storage of hazardous materials shall be product-tight.
<input type="checkbox"/>	<input type="checkbox"/>	2373	H&SC 25291(a)	<b>Secondary Containment Provided</b> - All tanks shall be provided with secondary containment.
<input type="checkbox"/>	<input type="checkbox"/>	2374	CCR 2635(b)	<b>Overspill Prevention Containers</b> - Each tank fill opening shall be equipped with an approved overspill prevention container of minimum 5 gallon capacity which is equipped with a drain valve to permit spilled hazardous material to be drained into the tank primary containment.
<input type="checkbox"/>	<input type="checkbox"/>	2375	CCR 2635(b)	<p><b>Overfill Prevention Devices</b> - Each tank fill opening shall be equipped with an approved overfill prevention device which can not allow manual override and must either:</p> <ul style="list-style-type: none"> <li>◦ Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or by triggering an audible and visual alarm; or</li> <li>◦ Restrict flow to the tank at least 30 minutes prior to tank overfill, provided that the restriction occurs at no more than 95% of tank capacity and triggers an audible and visual alarm at least 5 minutes prior to tank overfill; or</li> <li>◦ Provide positive shut-off (100% restricted flow) of flow to the tank when the tank is no more than 95% full.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2376	CCR 2631(c)	<b>Striker Plates</b> - Tank primary containment shall be equipped with striker plates installed, center to center, beneath each accessible opening.
<input type="checkbox"/>	<input type="checkbox"/>	2377	H&SC 25291(e)	<b>Water in Secondary Containment</b> - The facility must have a means of monitoring for water intrusion into the secondary containment and a means for removing any water found. In addition, the removed water must be analyzed for contamination and, if contaminated, properly disposed of at an authorized disposal facility.
<input type="checkbox"/>	<input type="checkbox"/>	2378	CCR 2632(c)(2)(B)	<b>Audible and Visual Alarm System</b> - Continuous monitoring systems shall be connected to an audible and visual alarm system approved by HMCD.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2379	CCR 2635(a)	<b>Cathodic Protection Systems (Testing)</b> - Cathodic protection systems must be tested under the direction of a qualified cathodic protection tester within 6 months of installation and at a minimum of every three years thereafter.

**C. Requirements Specific to New Underground Piping**

N/A

(i.e. Tank systems installed on or after 01/01/84)

V	N/A	Violation Code	Regulatory Citation	Description
<input type="checkbox"/>	<input type="checkbox"/>	2380	CCR 2636(a)	<p><b>Secondary Containment Provided</b> - With the following exceptions, all piping connected to tanks installed after 07/01/87 shall have secondary containment:</p> <ul style="list-style-type: none"> <li>◦ Vent or tank riser piping;</li> <li>◦ Vapor recovery piping, if designed so that it cannot contain liquid-phase hazardous material (i.e. through sloping toward tank, etc.);</li> <li>◦ Suction piping if <u>all</u> of the following requirements are met:                             <ol style="list-style-type: none"> <li>1. It is gravity-flow piping (i.e. it is sloped so that the contents will drain back into the tank if the suction is released); and</li> <li>2. No valves or pumps are installed below grade and only one check valve is located directly below and as close as practical to the suction pump; and</li> <li>3. An inspection method is provided which readily demonstrates compliance with requirements 1 and 2, above.</li> </ol> </li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2381	CCR 2636(c)(1)	<p><b>Secondary Containment Sloped</b> - All secondary containment systems shall be sloped so that all releases will flow to a collection sump located at the low point of the underground piping.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2382	CCR 2636(f)(1)	<p><b>Continuous Monitoring System</b> - The secondary containment system shall be equipped with a continuous monitoring system approved by HMCD.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2383	CCR 2636(f)(1)	<p><b>Audible and Visual Alarm System</b> - Continuous monitoring systems shall be connected to an audible and visual alarm system approved by HMCD.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2384	CCR 2636(f)(2)	<p><b>Automatic Line Leak Detectors</b> - Pressurized piping shall be equipped with approved mechanical or electronic line leak detectors capable of detecting a 3 gallon/hour leak rate at 10 p.s.i. within 1 hour with a probability of detection of at least 95% and a probability of false alarm no greater than 5%.</p> <p><i>(Exception: A continuous monitoring system which <u>shuts down the pump</u>, in addition to activating the alarm system, satisfies the automatic line leak detector requirement.)</i></p>
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2385	CCR 2636(f)(4)	<p><b>Annual Pressure Test</b> - An annual pressure test (precision line test) shall be performed on pressurized piping systems. Systems shall be tested at a pressure designated by the equipment manufacturer, provided that the method is capable of detecting a minimum release equivalent to 0.1 gallon/hour defined at 150% of the normal operating pressure of the product piping system at the test pressure with at least a 95% probability of detection and not more than a 5% probability of false alarm.</p> <p><i>(Exception: The annual pressure test requirement is waived if the piping meets <u>all</u> of the following requirements:</i></p> <ul style="list-style-type: none"> <li>◦ <i>The piping secondary containment system is equipped with a continuous monitoring system; and</i></li> <li>◦ <i>The continuous monitoring system is connected to an audible and visual alarm system and the pumping system; and</i></li> <li>◦ <i>The continuous monitor shuts down the pump and activates the alarm system when a release is detected; and</i></li> <li>◦ <i>The pumping system shuts down automatically if the continuous monitoring system fails or is disconnected.</i></li> </ul>

[Note: Per CCR, 2636(g)(5), the automatic pump shutdown requirements do not apply to an emergency generator, provided that the monitoring system is checked at least daily.]

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2386	CCR 2635(b)	<b>Corrosion Protection</b> - Underground metal piping must be protected against corrosion with cathodic protection. The cathodic protection system for piping must be meet the same requirements the tank systems are required to meet [see CCR, 2635(a)].

**D. Requirements Specific to Existing Underground Storage Tanks**  
*(i.e. Tanks installed before 01/01/84)*

N/A

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2387	CCR 2642(a)	<p><b>Visual Monitoring</b> - An owner or operator who is required to implement a visual monitoring program shall comply with <u>all</u> of the following requirements:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> All visible exterior surfaces shall be inspected at least daily by direct viewing when the substance in the UST is at its highest level;</li> <li><input type="checkbox"/> A written statement of the routine monitoring procedure shall be available at the facility. It shall include:                             <ul style="list-style-type: none"> <li><input type="checkbox"/> Frequency of visual inspections;</li> <li><input type="checkbox"/> Location(s) from which inspections will be made;</li> <li><input type="checkbox"/> Name(s) and title(s) of the person(s) responsible for inspections;</li> <li><input type="checkbox"/> Reporting format;</li> <li><input type="checkbox"/> Written records shall specify the liquid level in the underground storage tank at the time of each inspection. These records shall also include a description of any sampling, analyses, and testing procedures conducted to determine if an unauthorized release has occurred, including any minimum levels of detection used.</li> </ul> </li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2388	CCR 2643(b)(1)	<p><b>Automatic Tank Gauging</b> - If this monitoring method is used, it shall:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Test the tank at least once per month;</li> <li><input type="checkbox"/> Conduct its tests after product delivery or when the UST is filled to within 10% of the highest operating level during the previous month;</li> <li><input type="checkbox"/> Be capable of detecting a release of 0.2 gallon/hour.</li> <li><input type="checkbox"/> Generate a hard copy of all data reported, including:                             <ul style="list-style-type: none"> <li><input type="checkbox"/> Time and date;</li> <li><input type="checkbox"/> Tank identification;</li> <li><input type="checkbox"/> Fuel depth;</li> <li><input type="checkbox"/> Water depth;</li> <li><input type="checkbox"/> Temperature;</li> <li><input type="checkbox"/> Liquid volume;</li> <li><input type="checkbox"/> Duration of the test.</li> <li><input type="checkbox"/> Calculated leak rate and leak threshold <i>(Required only for systems installed on or after 01/01/95).</i></li> </ul> </li> </ul>

## HAZARDOUS MATERIALS STORAGE PROGRAM VIOLATION CODES GENERAL STORAGE PROVISIONS

*Authority Cited: Hazardous Materials Storage Ordinance (SO); Health and Safety Code (H&SC);  
 California Code of Regulations, Title 8, Div. 4.1 (CCR).*

This document has been prepared to explain Violation Codes associated with the storage of hazardous materials which may have been noted in the attached Santa Clara County Hazardous Materials Compliance Division (HMCD) Official Notice of Inspection. The sections of State Law and local Ordinance corresponding to each Violation Code have been **briefly** described. For a complete citation of these laws and regulations, it is recommended that you subscribe to a regulatory update service, visit your local library, or visit our office located at 2220 Moorpark Avenue in San Jose, where the complete text of the laws/regulations referenced below can be viewed. Copies of those documents which are not protected by copyright can be obtained at a cost of \$1.70 for the first page and 5 cents for each additional page. A copy of the Hazardous Materials Storage Ordinance (HMSO) may be obtained for \$3.00. If you would like to discuss any interpretations of these laws or regulations, please call our department at (408) 299-6930 and ask for the Hazardous Materials Storage Program Supervisor.

### A. Permits, HMBP/HMMP

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2300	SO 301.03(a) 303.01	<b>Hazardous Materials Storage Permit</b> - Any facility that stores or uses hazardous materials must apply for and obtain a hazardous materials storage permit from HMCD.
<input type="checkbox"/>	<input type="checkbox"/>	2301	H&SC 25503.5	<p><b>Hazardous Materials Business Plan (HMBP) Submitted/Complete</b> - The owner of a facility must complete a HMBP and submit a copy to HMCD for each site which handles any individual hazardous material or mixture containing a hazardous material which has a quantity at any one time during the reporting year equal to or greater than:</p> <ol style="list-style-type: none"> <li>1. 500 pounds for solid hazardous materials;</li> <li>2. The following amounts for liquid hazardous materials:                             <ol style="list-style-type: none"> <li>a. Lubricating oil as defined by H&amp;SC, 25503.5(b)(2)(B): 55 gallons of each type or 275 gallons aggregate quantity on site;</li> <li>b. All others, including waste oil: 55 gallons;</li> </ol> </li> <li>3. The following amounts of hazardous material gases:                             <ol style="list-style-type: none"> <li>a. Oxygen or Nitrous Oxide stored/handled at a physician, dentist, podiatrist, veterinarian, or pharmacist's place of business: 1,000 cubic feet of each material;</li> <li>b. All others: 200 cubic feet.</li> </ol> </li> <li>4. Amounts of radioactive materials requiring an emergency plan under Parts 30, 40, or 70 of Title 10, Code of Federal Regulations (CFR) or equal to or greater than applicable amounts specified in items 1, 2, or 3, above, whichever amount is smaller.</li> <li>5. Amounts of acutely hazardous materials (AHMs) meeting or exceeding a threshold planning quantity (TPQ) amounts published in Appendix A of Part 355 of Title 40 CFR or in quantities equal to or greater than applicable amounts specified in items 1, 2, or 3, above, whichever amount is smaller. H&amp;SC, 25533(c)(1)</li> </ol> <p><i>(Note: Any hazardous material in a rail car or rail or marine freight container remaining at a facility longer than 30 days is deemed stored and subject to HMBP requirements. Per H&amp;SC, 25501.4(c), HMCD must be notified immediately of such storage.)</i></p>

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2302	H&SC 25505(b) 25510	<p><b>HMBP Changes Reported</b> - Within 30 days of any one of the following events, a facility shall submit to HMCD an amended HMBP:</p> <ol style="list-style-type: none"> <li>1. A 100% or more increase in the quantity of a previously disclosed material;</li> <li>2. Any handling of a previously undisclosed hazardous material in HMBP quantities;</li> <li>3. Change of business address;</li> <li>4. Change of business ownership;</li> <li>5. Change of business name;</li> <li>6. A substantial change in the handler's operations (e.g. personnel changes, installation or closure of hazardous materials storage/handling systems, etc.) occurs.</li> </ol>
<input type="checkbox"/>	<input type="checkbox"/>	2303	H&SC 25505(c)	<p><b>HMBP Biennial Review</b> - A facility shall review its HMBP at least once every two years to determine if a revision is needed and shall certify to HMCD that the review was made and that any necessary changes were made to the plan. A copy of any changes to the plan shall accompany the certification.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2304	H&SC 25503.6	<p><b>Written Notice to Property Owner</b> - Any facility which is required to establish and implement a HMBP and is located on leased or rented real property shall notify, in writing, the owner of the property that the business is subject to HMBP requirements (i.e. H&amp;SC, 25503.5) and has complied with its provisions, and shall provide a copy of the HMBP to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent. A copy of this notification should be kept at the facility.</p>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	2305	H&SC 25505(d)	<p><b>Hazardous Materials Inventory Statement (HMIS) Submitted/Complete</b> - Any facility that handles hazardous materials in HMBP quantities shall submit an inventory of those chemicals in a format approved by HMCD. This form must be updated whenever any substantial change to the inventory is made, and, this form must be reviewed and submitted to HMCD annually.</p>
<input type="checkbox"/>	<input checked="" type="checkbox"/>	2306	SO 304.01	<p><b>Hazardous Materials Management Plan (HMMP) Submitted/Complete</b> - Any facility that stores or uses hazardous materials in quantities less than those specified for the HMBP must file a HMMP. The HMMP shall be updated any time there is a significant change in the quantities of hazardous materials or changes in the process in which the hazardous materials are being used. (Note: The Hazardous Materials/Waste Registration Form serves as a Short Form HMMP.)</p>
<input type="checkbox"/>	<input type="checkbox"/>	2307	SO 303.01	<p><b>Permit for Installation/Construction/Repair/Closure</b> - Any facility which intends to install, construct, repair, or close a hazardous materials storage/handling system or area (e.g. tank, room, etc.) must first obtain a permit from HMCD.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2308	SO 303.06(b)	<p><b>Modifications to a Facility</b> - Any substantial modification to, or repair of, a storage facility, other than minor or emergency repairs, shall be performed in accordance with written plans submitted to and approved by HMCD prior to the initiation of work.</p>
<input type="checkbox"/>	<input type="checkbox"/>	2309	SO 303.04(a) 303.04(c)	<p><b>Abandoned Facility or Tank</b> - No hazardous materials storage facility may be abandoned. Owners/operators of facilities permanently taken out of service, or which are not monitored in accordance with an approved written monitoring plan, shall submit a closure plan application and obtain a closure permit at least 30 days prior to final closure of the facility or aboveground/underground storage tank. Once the plan has been approved, a final walkthrough inspection must be completed by HMCD.</p>

**B. Separation, Containment, Monitoring**

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2310	SO 303.08	<b>Secured Storage Areas</b> - Access to hazardous materials storage areas shall be secured by means of fences and/or locks. Gates and doorways to such areas shall be kept securely locked when unattended.
<input type="checkbox"/>	<input type="checkbox"/>	2311	SO 303.02(e)	<b>Separation of Incompatible Materials</b> - Materials which in combination might cause a fire, explosion, or the production of a flammable or toxic gas shall be separated so as to avoid potential intermixing in the event of a release.
<input type="checkbox"/>	<input type="checkbox"/>	2312	SO 303.07(a)	<b>Safe Chemical Handling</b> - Dispensing and mixing of hazardous materials shall not be done in such a manner as to substantially increase the risk of an unauthorized discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2313	SO 303.07(b)	<b>Movement of Materials Within Facility</b> - Hazardous materials shall not be stored in a travel path (e.g. hallway, aisleway, etc.). They may remain in the travel path only for the time reasonably necessary to move them. Such movement shall be in a manner which will not result in an unauthorized discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2314	SO 303.02(c)(1)	<b>Primary Containment Product-Tight</b> - All primary containment (i.e. the container in which a material is stored) used for the storage of hazardous materials shall be product-tight (i.e. not leaking and compatible with the chemical being stored).
<input type="checkbox"/>	<input type="checkbox"/>	2315	SO 303.02(c)	<b>Secondary Containment Provided</b> - Secondary containment (i.e. containment external to and separate from primary containment) constructed so as not to be structurally weakened as a result of contact with the material stored shall be provided. It shall be capable of containing 110% of the volume of the primary container if a single container is used, or in the case of multiple containers, 150% of the volume of the largest container or 10% of the aggregate, whichever is larger. In addition, the secondary containment, if open to rainfall, must be capable of accommodating the volume of a 24-hour rainfall from a 100-year storm (i.e. approximately an additional 4 1/2 inches in depth or height of the secondary containment).
<input type="checkbox"/>	<input type="checkbox"/>	2316	SO 303.02(f)	<b>Removal of Water from Secondary Containment</b> - Any water which has entered the secondary containment shall be removed, analyzed for contamination by hazardous substances, and disposed of properly. A system to prevent uncontrolled removal of such water shall be provided.
<input type="checkbox"/>	<input type="checkbox"/>	2317	SO 303.02(d)	<b>Overfill Protection Provided</b> - Primary containment of tanks holding hazardous materials shall be equipped with a high-level alarm (i.e. an alarm which sounds when the tank is 90% full) and/or other approved overfill protection devices to prevent spills when filling the tank.
<input type="checkbox"/>	<input type="checkbox"/>	2318	SO 303.02(b) 303.05(a)	<b>Monitoring System (Provided)</b> - Each area in which hazardous materials are stored shall be monitored. Monitoring methods shall include at least one system for detecting leakage from the primary containment. Visual inspection of both primary and secondary containment is preferable; however, other methods may be allowed or required by HMCD. Per SO, 303.04(b), facilities which are temporarily out of service, and are intended to be returned to use, shall continue to be monitored and inspected.
<input type="checkbox"/>	<input type="checkbox"/>	2319	SO 303.03 304.01	<b>Monitoring System (Approved)</b> - Procedures and/or equipment used to monitor hazardous materials must be approved by HMCD.

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2320	SO 303.05(b)	<b>Inspection and Testing of Monitoring Equipment</b> - All monitoring systems shall be tested and inspected monthly, at a minimum, to ensure that they are in working order. Records of all inspection/maintenance/repairs shall be kept on-site and be available for inspection by HMCD.
<input type="checkbox"/>	<input type="checkbox"/>	2321	SO 303.05(a)	<b>Visual/Audible Alarm</b> - Whenever monitoring devices are provided, they shall be connected to attention-getting visual and audible alarms.
<input type="checkbox"/>	<input type="checkbox"/>	2322	SO 303.03 304.02(d) 304.03(b)(4)	<b>Written Monitoring Plan Approved/Implemented</b> - A written monitoring plan must be prepared and submitted to HMCD. The monitoring plan shall describe the location, type, manufacturer specifications (if applicable); and suitability of monitoring methods used in each storage area. Frequency of monitoring must be specified.
<input type="checkbox"/>	<input type="checkbox"/>	2323	SO 303.05(b)	<b>Monitoring/Maintenance Records</b> - Any facility that stores or uses hazardous materials must test, monitor, and inspect the facility in compliance with the approved written monitoring plan and maintain records adequate to demonstrate compliance therewith. SO, 307.02 requires that the facility maintain an inspection check sheet or log, in a format approved by HMCD, designed to be used in conjunction with routine inspections. A blank copy of this log must be submitted as an attachment to the facility's HMBP.
<input type="checkbox"/>	<input type="checkbox"/>	2324	SO 303.06(a)	<b>Maintenance, Repairs, or Replacement</b> - The facility owner/manager shall carry out all necessary maintenance, ordinary upkeep, and minor repairs needed to keep equipment (e.g. monitoring systems, piping, etc.) in proper operating condition. This work shall be performed in a careful and safe manner. Emergency repairs may be made immediately, but within 5 working days after such repairs have been started, a written plan describing the repairs shall be submitted to HMCD for review and approval.

### C. Training, Emergency Response, Unauthorized Discharges

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2325	H&SC 25504(c)	<b>Emergency Response Training</b> - Training shall be provided for all new employees in the event of a release or threatened release of a hazardous material, including, but not limited to, familiarity with the facility's emergency response plans and procedures. Annual refresher courses shall be provided for all employees. The training program may take into consideration the position of each employee. It shall include, but not limited to, all of the following: <ol style="list-style-type: none"> <li>1. Immediate notification to HMCD and to appropriate local emergency rescue personnel and the State Office of Emergency Services.</li> <li>2. Procedures for the mitigation of a release or threatened release to minimize any potential harm or damage to persons, property, or the environment.</li> <li>3. The facility's evacuation plans and procedures.</li> </ol>
<input type="checkbox"/>	<input type="checkbox"/>	2326	SO 303.09	<b>Emergency Equipment</b> - Emergency equipment shall be provided, regularly tested, and adequately maintained, and shall be reasonable and appropriate to potential emergencies presented by the stored hazardous materials.
<input type="checkbox"/>	<input type="checkbox"/>	2327	SO 303.10	<b>Posted Emergency Procedures</b> - Any facility which stores hazardous materials shall conspicuously post simplified emergency procedures (i.e. what to do in the case of fire, spill, etc.) in locations where hazardous materials are stored.

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2328	SO 306.01(a)(1)	<b>Unauthorized Discharge (Recordable)</b> - Any facility which has had a recordable unauthorized discharge, must record it in the facility's monitoring records. A recordable unauthorized discharge is one that: <ul style="list-style-type: none"> <li>◦ Is from primary containment to secondary containment; and</li> <li>◦ Is cleaned up before it leaves the secondary containment; and</li> <li>◦ Results in no increase in the possibility of explosion or fire.</li> </ul>
<input type="checkbox"/>	<input type="checkbox"/>	2329	SO 306.01(a)(1)	<b>Unauthorized Discharge (Reportable)</b> - Any facility which has had a reportable unauthorized discharge must report it to HMCD immediately. A reportable discharge is any unauthorized discharge that does not meet the definition of a recordable discharge.
<input type="checkbox"/>	<input type="checkbox"/>	2330	H&SC 25507(a)	<b>Reporting of Unauthorized Discharge</b> - Any employee, authorized representative, agent, or designee of a facility shall, upon discovery, immediately report any release or threatened release of a hazardous material to HMCD.
<input type="checkbox"/>	<input type="checkbox"/>	2331	SO 306.01(a) 306.02	<b>Cleanup of Unauthorized Discharge</b> - Any business or facility which stores or uses hazardous materials shall initiate and complete all actions necessary to remedy the effects of any unauthorized discharge.

#### D. Record Keeping, Labeling

V	N/A	Violation Code	Regulatory Citation	
<input type="checkbox"/>	<input type="checkbox"/>	2332	SO 307.05	<b>Records (Retention Time)</b> - All records (e.g. maintenance, monitoring, training, unauthorized discharge logs, etc.) shall be maintained for no less than 3 years and must be available for review by HMCD, upon request.
<input type="checkbox"/>	<input type="checkbox"/>	2333	8 CCR 5227	<b>Labeling</b> - Hazardous materials containers shall be labeled with either the chemical or common name (not trade name only) of the material and hazard information equivalent to that specified in 8 CCR, 5227(c) and 5228.

76 PRODUCTS COMPANY

RECEIVED BY  
ENVIRONMENTAL HEALTH  
HMCD

MAR 4 11 27 AM '96

Date: February 28, 1996

Jim Blamey  
Santa Clara Co. Env. Health  
2220 Moorpark Ave., P.O. Box 2807  
San Jose, CA 95159-8070

Subject: Address Change

As of March 11, we will be relocating to a new office. Our new mailing address is:

Environmental Compliance Dept., 9th Floor  
76 Products Company  
P.O. Box 25376  
Santa Ana, CA 92799-5376

Attached is a listing of "Unocal-controlled" sites that we believe to be within your jurisdiction. According to our database, your agency has regulatory control for the following documents:

Hazwaste Permit  
Health Permit  
UST/Hazmat Permit

We would appreciate your help in verifying the accuracy of our database, both in regard to the site listing and the types of documents. Please notify us in writing of any discrepancies.

As the property owner, we ask that you send all invoices and permits (if applicable) for these sites, including sites currently billed to the "equipment location," to our new mailing address.

Feel free to contact me at (714) 572-7660 (until March 7) and (714) 428-6570 (March 11) if you have any questions with regard to the above requests.

Although 76 Products Company is owned by Union Oil Company (Unocal), the anticipated transfer of assets that was to have taken place on or about January 1, 1996, has not occurred and is on hold. We will notify you of any ownership change in the future.

Thank you in advance for your patience and cooperation.

**Re: Inspection Report Follow up**  
**Los Altos, CA 94022**  
**Unocal Service Station # 6115**  
**4350 El Camino Real**

Dear Mary:

As per my previous letter dated October 13, 1995, I have enclosed the following information to close the remaining issues regarding the above referenced Unocal service station:

**Hazardous Materials Storage Inspection:**

1. UST electronic monitoring system certification report

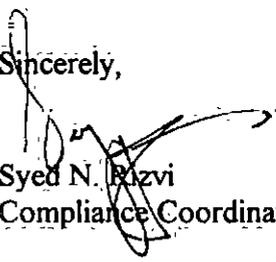

The UST electronic monitoring system certification report. This test was conducted by the NDE Environmental Corporation. As indicated in this report, the product piping is double and is equipped with the positive shutdown system (PSD) on turbines. Please note, the double wall piping containing PSD system does not require the annual line precision test.

2. UST Leak Response Plan

A Response plan has already been mailed to our dealer. This plan must be maintained in his file for your upcoming inspection.

Additionally, with this letter, I am reminding our dealer to mail the Certification of Compliance form to your attention as soon as possible. Thank you for your assistance. If you require any additional information, please call me at (714) 572-7655.

Sincerely,

  
Syed N. Rizvi  
Compliance Coordinator

Re: Inspection Report Follow up  
Los Altos, CA 94022  
Unocal Service Station # 6115  
4350 El Camino Real

Dear Mary:

In response to your inspection report dated August 3, 1995, regarding the above referenced Unocal service station, please find the following response to your concerns:

**Hazardous Materials Storage Inspection:**

1. UST financial responsibility statement

The financial responsibility statement has been made available to the operator. A copy of this UST financial statement which applies to all Unocal controlled facilities in your jurisdiction is also being mailed to your attention.

2. UST system monitoring and test records have been made available on site.

3. UST system monitoring plan and a leak response plan are being mailed to the dealer's attention for his file.

4. UST electronic monitoring system certification and line integrity test report

The UST electronic monitoring system certification and the annual product line integrity test will be performed and results will be mailed to your attention.

**Hazardous Waste Generator Inspection:**

1. Hazardous waste accumulated greater than 90 days

Spoke to dealer and verified that hazardous waste of any type is no longer being stored at the facility for more than 90 days.

FAX (714) 572-7116  
A Unocal Company

2. Hazardous waste containers are not clearly marked or labeled

Spoke to dealer and verified that hazardous waste containers are clearly marked and labeled according to your instruction.

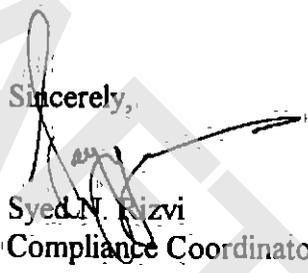

3. Waste manifest receipts were not available or incomplete

Spoke to dealer and verified that all waste manifest receipts have been properly completed and kept on site for your future inspection.

Additionally, the Certification of Compliance form is also being mailed to our dealer to verify in writing that all violation observed during your inspection were properly address and corrected.

Thank you for your assistance regarding this matter. If you require any additional information, please call me at (714) 572-7655.

Sincerely,

Syed N. Rizvi

Comments: (see marked violations on page 1)

HSC 25292.1:

- 1) Dispenser 6, unleaded + : Customer complained that nozzle leaked after being disengaged from car fuel tank. This was confirmed after observing another customer pump fuel from the same line. Repair nozzle (probably auto-shut off malfunction). Repair or change nozzle within 24 hrs. This line will be closed if not repaired within 24 hrs.
- 2) Dispenser 9, unleaded + : Hose shows signs of tearing near the nozzle connection. Correct within 15 days.
- 3) Overspill protection device for waste oil tanks had waste oil. This was corrected during the inspection.

HSC 25292.2 - Submit a copy of financial responsibility documentation within 30 days.

HSC 25293 (a) : a) lead - Alert sensors & red jacket lead detection device inspected 5/18/94 & 4/7/94. No records of 1995 inspections/maintenance records on file. Submit copies of 1995 maintenance inspection within 30 days.

~~Written monitoring plan missing~~  
CCR 2652 (a) <sup>(1)(B)</sup> Written monitoring plan missing.

- a) red jacket on equipment list
- b) model #s for all monitoring systems, probes, detectors.

Comments: (see marked violations on page 1)

CER 2632 (e): Written response plan should be updated to include description of required methods & equipment to be used for moving any hazardous substances. This should be addressed even if contract work is to be used as part of the plan (see letter to D. Corder, copied G. Galatolo, Bob Watson 6/1/94).

CER 2632 (b): Monitoring program not implemented as follows: Audio alarm silenced (off position). This was corrected during the inspection.

Submit the following information within 30 days:

- 1) documentation showing how ruggie & hose ~~etc~~ ~~etc~~ problem cited were corrected. Note that problems must be corrected within time frame given
- 2) financial responsibility documentation
- 3) leak alert & red jacket leak detection device inspection documentation
- 4) updated monitoring plan
- 5) updated response plan
- 6) pipe annual tightness test (1993, 1994, 1995)
- 7) cut-sheet for overfill-prevention device installed for all tanks.

CERTIFIED MAIL

TO WHOM IT MAY CONCERN

Dear Sir/Madam:

Please accept this letter as my written notification for a change of address. Currently, the mail related to environmental compliance issues discussed in the attachment is being directed to the following address:

Unocal Marketing Engineering & Construction (ME&C)  
911 Wilshire Blvd.  
Suite 1100  
Los Angeles, CA 90017  
Attn: Environmental Compliance

Please note, the above address will be changed as of November 15, 1993. The new mailing address is as follows:

Unocal ME&C  
P.O. Box 2390  
Brea, California 92622-2390  
Attn: Environmental Compliance

For your convenience, a list of Environmental Compliance staff and their responsibilities is attached with this letter.

The above request does not include correspondence or permitting for Unocal "branded" Marketing facilities (operated and owned by independent re-sellers and jobbers), or other Unocal Divisions handling their permitting/compliance issues directly with you (i.e. Oil and Gas, Refining, Remediation etc.). Our most current list of Unocal "controlled units" (facilities owned, operated or leased by Unocal) within your jurisdiction is also attached.

Any correspondence concerning on-going site investigation and clean up must continue to be mailed to the responsible Unocal Remediation Engineer at his/her office address.

Thank you for your cooperation in this matter.

Sincerely yours,

*Bea C. Best*

To: S. C. C. Environmental Health Services  
Attn: Mary Anne J. Baker

From: El Camino Unocal  
4350 El Camino Real  
Los Altos, CA 94022

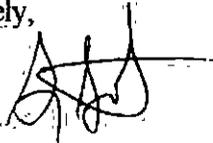

Dear Ms. Baker,

These deficiencies have been corrected as of the month of October:

- (1) Training of personnel on emergency responses to any spills and proper handling and disposing of hazardous waste.
- (2) Started a file of all hazardous waste manifest for easy access.
- (3) Notified Unocal of need to remove six 55 gallon drums known to contain hazardous waste.
- (4) All other violations are currently being addressed.

It has always been my concern of keeping our Service Station environmentally safe and under current regulations.

Sincerely,

Greg Galatolo  
Owner

M. Baker

The marked items represent violations of the above-referenced codes(s) and must be corrected as follows:

(1) Electronic monitoring system with liquid sensors is used to monitor underground tanks (2 fuel & 1 waste oil) and lines. Audible alarm was tested and shown to be functional at time of the inspection. Tanks were installed later part of 1990. Business plan states system will be tested annually for proper operation. No maintenance records were kept on site. Manual that maintenance of monitoring system be kept in accordance with manufacturer's specs and/or business plan. Business plan last updated 1/21/92.

(2) - Personnel training records as required by the emergency response training plan are not kept on site. Documents all training given to personnel & keep on site for 3 years.

Submit a letter to above agency (Attn: M. B.) within 30 days indicating how above violations were addressed.

## Underground Storage Tank Permit to Operate

Permit Number: 201602-308081  
Date Issued: January 1, 2001  
Expiration Date: December 31, 2005  
Facility ID Number: 43-000-201602

Facility Name: UNION STATION #06115  
Site Address: 4350 EL CAMINO REAL  
LOS ALTOS, CA 94022

COPY

Tank Owner Name: TOSCO CORP.  
Permit Contact: MERLIZA ALCALA  
Owner Address: 2000 CROW CANYON PL., #400  
SAN RAMON, CA 94583

The following underground storage tanks are covered by this permit:

<u>Tank Identification Number</u>	<u>Capacity (gal.)</u>	<u>Tank Contents</u>	<u>Owner's Tank ID</u>
43-000-201602-100024	12,000	REGULAR UNLEADED GASOLINE	256115-1
43-000-201602-100023	12,000	PREMIUM UNLEADED GASOLINE	256115-2
43-000-201602-100022	500	WASTE OIL	256115-3

### Permit Conditions

1. In order to maintain this UST permit to operate, the permit holder shall comply with Health and Safety Code, Division 20, Chapters 6.7 and 6.75; and California Code of Regulations (CCR), Title 23, Division 3, Chapters 16 and 18.
2. In the event of a spill, leak, or other unauthorized release, the permittee shall comply with the requirements of 23 CCR, Chapter 16, Article 5. Additionally, the permittee shall operate according to a release Response Plan approved by the County of Santa Clara, Department of Environmental Health, Division of Hazardous Materials Compliance and Solid Waste Enforcement (HMCD).
3. The permittee shall comply with the monitoring procedures described in a UST Monitoring Plan and UST system Plot Plan approved by HMCD.
4. The permittee shall notify, and received approval from, HMCD prior to making any changes in monitoring procedures and/or equipment. The permittee shall notify HMCD within 30 days of any change in the usage of any UST, including changes in hazardous substances stored or change of UST owner and/or operator.
5. The permittee shall perform testing and preventive maintenance on all leak detection monitoring equipment annually, or more frequently if specified by the equipment manufacturer, and maintain documentation of such servicing on-site.
6. The permittee shall obtain approval from HMCD and Fire and Building authorities prior to modifying any UST system.
7. Written records of all monitoring performed shall be maintained on-site by the operator and be available for inspection for a period of at least three years from the date the monitoring was performed.
8. The permittee shall submit annual permit fees and State UST surcharges. Penalties for late payment will be assessed at 25%.
9. Copies of this permit and the approved UST monitoring, response, and plot plans shall be maintained at the tank site.
10. Violation of any of the above conditions may be cause for revocation of this UST permit to operate.

**Re: Permit No. 201602-308081, Underground Storage Tank Permit to Operate.**

Dear MERLIZA ALCALA:

Santa Clara County Environmental Health Department's Hazardous Materials Compliance Division (HMCD) has changed the way we permit underground storage tanks (UST). The new five year UST operating permit for your facility, **UNION STATION #06115**, located at **4350 EL CAMINO REAL, LOS ALTOS, CA**, is enclosed. A copy of this permit must be maintained at the tank site.

Please carefully review the permit information and Permit Conditions. Although the permit term is now five years, fees will continue to be assessed annually as has been our past practice. Should you have any questions, please do not hesitate to contact the undersigned at (408) 299-6930.

Sincerely,

Greg Breshears  
Lead Hazardous Materials Specialist  
Hazardous Materials Compliance Division

## NOTICE TO OWNERS OF UNDERGROUND STORAGE TANKS

**Date: January 30, 2001**

**Subject: Notice to Schedule Annual Underground Storage Tank Compliance Inspections**

Santa Clara County Environmental Health Department's Hazardous Materials Compliance Division (HMCD) now inspects all underground storage tank (UST) facilities annually as required by a recent change in state law.

Effective this year, our compliance inspections will be coordinated to coincide with the required annual testing and certification of your UST monitoring equipment. **Accordingly, please notify the inspector identified below at least fourteen (14) calendar days prior to having your leak detection equipment tested by a qualified technician so that our inspection can be coordinated with the service contractor's visit. Failure to notify and coordinate these visits will result in your having to arrange (and pay for) a second visit by your equipment maintenance contractor.**

Your inspector is identified by the checked box, below:

- Mike Benjamin - (408) 299-6648
- Greg Breshears - (408) 299-8007
- Stephanie Christenberry - (408) 299-3156
- Muhammad Janjua - (408) 299-8852
- Richard Owens - (408) 299-6357

UST leak detection equipment must be tested and certified annually by a qualified technician in accordance with the equipment manufacturer's instructions. This includes functional testing of any programmed automatic pump shut-down capability. Types of equipment affected by this requirement include, but are not limited to, the following:

- Monitoring system control panels;
- Tank annular (interstitial) sensors;
- Piping sump/trench sensors;
- Leak sensors inside dispenser containment sumps/pans (including Bravo Box floats/chains);
- Mechanical or electronic line leak detectors (LLDs) (must be tested by simulating a 3.0 gallon per hour line leak at 10 p.s.i.g.);
- Automatic tank gauge (ATG) probes monitoring single-wall tanks.

# Underground Storage Tank Monitoring Program

1. Operator/Site Number: GREG GALATOLO

Cost Center # 256115

RE# 31096

2. Site Address and Phone Number: 4350 EL CAMINO REAL LOS ALTOS, CA 94022

ph. (650) 941-0244

## 4. Frequency of Monitoring Method and location Where Monitoring will be Performed:

Tanks: Tank(s) 01 02 03 are monitored continuously using an electronic probe in the interstitial space of the tank.

Piping: Pipe(s) 01 02 are monitored by a liquid-detecting probe located in the turbine sump.

Dispenser: Dispenser pans are equipped with continuous mechanical monitoring/mechanical shut-off device.

## 5. Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:

Operator Name and Number: GREG GALATOLO - (650) 941-0244

Maintenance: TOSCO Service Contact Center - 1-800-726-2312

## 6. Reporting Format:

The monitor will be certified annually and a report generated and provided to the operator. The operator is to report all audible or visual alarm conditions that may indicate a potential release to the TOSCO Field Representative or District Manager as well as the responsible party for maintenance, listed under #5. In the event of a test failure, the specific piece(s) of equipment are taken out of service and proper reporting procedures followed. The operator is to report all suspected releases to the TOSCO Field Representative or District Manager, as well as the responsible party for maintenance listed under #5.

## 7. State the Preventative Maintenance Schedule for the Monitoring Equipment:

As recommended by the Manufacturer, the electronic monitoring system is certified annually by a third-party contractor. Repairs are made by the responsible listed under #5 upon notification by the station operator. The station operator is responsible for maintaining copies of testing results and repair records on site and available for agency inspectors. The 3rd-party testing requirements and frequencies for the tank system are summarized below.

### Contractor Tank Tightness Testing Requirements/Frequency

Contractor testing of the primary tank is not required.

The tank secondary containment is tested per manufacturer's specifications every 3 years in accordance with CCR Title 23 Section 2837.

### Line and Other UST System Testing Requirements/Frequency

Mechanical leak detector(s) tested annually.

Contractor testing of the primary piping is not required.

Secondary containment testing for piping, turbine sumps and dispenser pans is conducted every 3 years per manufacturer's specification under CCR Title 23.

## 8. Describe the Training Needed for the Operation of Both the Tank System and the Monitoring Equipment:

The operator has been trained to check the tank system and/or monitor daily for proper operation. If the tank system and/or monitor is not functioning correctly, the operator has been instructed to contact the responsible party for maintenance listed under item #5 for repairs.

### B. Summary of Site Operator Requirements:

For pipes monitored electronically, the site operator is to call the specified maintenance company to report monitoring alarms and maintain a record of all monitoring alarms and repairs. For double wall tanks monitored by interstitial probes, the monitoring equipment must be continuously operational with probes in place. Report all non-inventory monitoring alarms to the specified maintenance company and keep a record of alarms and repair work performed. All sites are responsible for maintaining daily and monthly inventory reconciliation records and notifying the TOSCO Field Representative or District Manager and Regional Environmental Compliance Specialist for inventory variances greater than the regulatory limit.

# Spill Response Plan

## For Minor Releases:

If the release is less than 5 gallons and service station personnel can contain the release immediately (and the release does not go off-site, enter any waterway, or contact bare soils), do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up release material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent material, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state, and local regulations.

## For Major Releases:

If the release is greater than 5 gallons, threatens to leave the site, enter any waterway, or contact bare soils, or there is an injury to a person, do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 911
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify the following personnel:

Regional Environmental Compliance Specialist  
Service Contact Center at 1-800-726-2312

9. Attempt to contain the spill with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1-800-852-7550.
11. In the case of an unauthorized release from the primary containment, Tosco will respond within 8 hours to address necessary repairs to the primary containment and cleanup of the secondary containment. Exceptions to this will be reported to the agency as required under California Health and Safety Code Section 25295.

TOSCO# 255115 / 5115 - GREG GALATOLO 4350 EL CAMINO REAL LOS ALTOS CA 94022 Phone# (650) 941-0244

*RESPONSIBLE PERSONS NOT IDENTIFIED BY NAME IN FILE.*

**Important!**  
**Environmental Compliance Documents**  
**Must be Maintained on Site**

Please find enclosed copies of the Underground Storage Tank documents for your facility, required by Federal Underground Storage Tank Regulations. These are very important documents and **NOT** maintaining copies on site could result in a lease default. All facilities are required to maintain these documents.

In addition, for stations with electronic monitoring systems, you are required to check your monitoring system daily to ensure that it is operating correctly. If your system is not operating correctly or is in alarm, call your Maintenance Service Provider immediately.

Please retain one copy of this Monitoring Plan at your site so that is accessible to all employees and agency personnel upon request. If desired, you may keep an additional copy with your lease.

If you have questions, please contact your Regional Compliance Specialist:

**Southern CA: Stephen Boyd, Phone (714) 428-6572, Fax (714) 428-8080**

**Northern CA: Janette Thompson (925) 277-2404, Fax (925) 277-2361**

**Note: When accepting, you are certifying that the information is accurate. If there are any discrepancies, please make corrections and initial and fax a copy to Environmental Compliance (602) 728-5245.**

# Underground Separation, Containment, and Monitoring Plan

## Appendix to Uniform Hazardous Materials Business Plan

Authority Cited: 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

256115

Complete a separate page for each underground storage tank, sump, vault, below-grade treatment system, etc. shown on the Uniform Hazardous Materials Business Plan Storage Map(s). For items marked with an asterisk (\*), specify the name of the manufacturer of the equipment and the equipment model number on the "Comments" lines provided at the bottom of this page. Make additional copies of this page if needed. Attach a blank copy of the UST monitoring log/form used by the facility. If your facility already has a written separation, containment, and monitoring plan, you do not need to complete the blank plan below, but must submit your current plan with your HMBP.

## Spill Response Plan

VN0N # 6115

### For Minor Releases:

If the release is a small quantity and service station personnel can contain the release immediately (and the release does not leave the site or enter any waterway), do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up released material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state and local regulations.

### For Major Releases or breach in secondary containment:

If the release threatens to leave the site or enter a waterway, or there is an injury to a person, do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 9 1 1
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify: Regional Environmental Compliance Specialist

Maintenance : TMC Service - 1-800-726-2312

9. Attempt to contain with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1 (800) 852-7550.
11. The secondary containment will be cleaned up within 30 days. Tosco Corporation's Environmental Remediation Group will investigate and arrange for proper waste disposal.

**Important!**  
**Environmental Compliance Documents**  
**Must be maintained on site**

Please find enclosed copies of the Underground Storage Tank documents for your facility, required by **Federal Underground Storage Tank Regulations**. These are very important documents and **NOT** maintaining copies on site could result in regulatory action. **All facilities** are required to maintain these documents.

In addition, for stations with electronic monitoring systems, you are required to check your monitoring system daily to ensure that it is operating correctly. If your system is not operating correctly or is in alarm, call your Maintenance Service Provider immediately.

Please retain one copy at your site so that it is accessible to all employees.

If you have any questions, please contact your Regional Compliance Specialist:

Meriza Alcala - 925-277-2319 (northern CA, OR, WA, ID)

Steve Boyd - 714-428-6572 (southern CA, HI)

Ruth Bulmer - 602-728-3217 (AZ, CO, UT, NV)

Fran Franconi - 813-744-5284 (PA, TN, NC, SC, GA)

Date Printed: 09/6/2000

**Note: Please make sure that the information is accurate.**

**If there are any discrepancies, please call Kathy Strickland at 602-728-7149 or Candy Blackwell at 602-728-6613.**

UNDERGROUND STORAGE TANKS (UST) OWNER/OPERATOR AGREEMENT

California Underground Storage Tank Regulations (CCR, Title 23, Division 3, Chapter 16, Article 2, Section 2620(b)) require Tosco Corporation (the tank owner) to execute a written agreement with our Dealers (the tank operators), requiring them to monitor the underground storage tanks (USTs) containing hazardous substances.

PART I: OWNER CERTIFICATION

Tosco Corporation, as owner of the USTs at the above site, certifies that:

1. It is not the tank operator of the USTs at said site.
2. It has applied for the UST permit, and a valid UST permit is on-site or will be delivered to the tank operator when received from the local implementing agency.
3. A copy of the Health and Safety Code, Section 25299 is attached to this Agreement.
4. It will notify the local implementing agency of any operator change within thirty (30) days of any such change.
5. Both Tosco Corporation and the operator have signed this Agreement.

PART II: OPERATOR CERTIFICATION

The law requires the tank operator of USTs containing motor vehicle fuel to comply with the following standards:

1. A valid UST permit shall be maintained on site.
2. A UST Monitoring Program, approved by the local implementing agency, must be implemented.
3. A Spill Response Plan, approved by the local implementing agency, must be implemented.
4. The requirements stipulated in the UST Monitoring Program and Spill Response Plan (attached), must be complied with. This shall include, if necessary, the submittal of an annual written statement to the local implementing agency, verifying under penalty of perjury that all monthly monitoring reports were summarized, and that all data contained within the monitoring reports are within allowable variations. Alternatively, a listing of the times, dates and corresponding monitoring report data that exceeded the allowable variations must be provided.
5. The monitoring and maintenance records must be maintained. This includes inventory readings and reconciliation records, sampling and testing results, all of which must be maintained on-site for at least 3 years, or in an approved off-site location. Said records must be made available upon request, within 36 hours, to the local implementing agency or the State Water Board.
6. Records must be kept in sufficient detail to enable the local implementing agency, at any time, to determine that the tank operator has undertaken all monitoring activities required by the UST Permit to Operate and/or the UST Monitoring Program.
7. Tosco Corporation must be notified of the detection of any unauthorized releases by the fastest means available (no later than 8 hours) or within the time frame mandated by the local implementing agency. The operator must adhere to the procedures contained in the Spill Response Plan. Tosco Corporation will notify the appropriate agency(s) and submit a written report as may be required by the agency(s).
8. Daily inventory measurements must be performed by a trained facility operator or designated facility personnel for each day the facility is in operation.
9. Tosco Corporation must be notified of any malfunctioning of the UST monitoring system. The monitoring equipment shall be operated and maintained in accordance with the regulation per Title 23, Division 3, Chapter 16, Article 4, Section 2641(j) of the California Code of Regulation.
10. Health and Safety Code Section 25299 (attached) must be reviewed.

Unit: 31096

Date Printed: 4/4/97

Furthermore, Tosco Corporation policy under the Lease Agreement requires the Dealer to comply with the following procedures:

1. Daily gauging, recording and inventory reconciliation of each motor vehicle fuel is required. These readings must be within the allowable variances established by the UST permit or lease agreement whichever is more stringent. If not, please follow procedure #6 below.
2. Daily measurement and recording of any water layer in each UST is required.
3. Daily meter readings and recording of UST input and withdrawals of motor vehicle fuels is required.
4. Monitor and maintain any Aboveground Storage Tank(s) according to the California State Aboveground Petroleum Storage Act Guidelines and/or the Uniform Fire Codes.
5. The inventory reconciliation records must be reviewed monthly.
6. The steps described herein will be implemented by the tank operator if inventory reconciliation indicates a loss of product (book volume to physical volume) greater than the allowable variance for each tank:
  - a. Review the inventory reconciliation records within two hours to determine if an error exists which would explain the loss.
  - b. Take a new inventory reconciliation within 8 hours after the initial inventory reconciliation which triggered the evaluation.
  - c. If loss is still indicated, the operator shall notify Tosco Corporation by the fastest possible means, but always within 8 hours of the completion of the daily reconciliation which verified the loss.
  - d. A complete review of all inventory records from the last time a non-loss condition existed shall be performed. This analysis shall be completed within 24 hours after determination that suspected loss is not due to error by the two-hour review described in 6(a) above.
7. A current Tosco Corporation Certificate of Financial Responsibility Statement shall be maintained on-site for review by governmental authorities.
8. A current Underground Storage Tank Owner/Operator Agreement shall be maintained on-site for review by governmental authorities.
9. All unauthorized releases must be recorded. Such records shall be maintained on-site at all times and be available for review by governmental authorities.

The Dealer Lease Agreement requires the Dealer to pay for all necessary permit fees, renewal fees and any surcharges. It is customary for Tosco Corporation to remit the appropriate fees and invoice the Dealer's account. However, Dealers are responsible for final payment of all fees.

The local UST regulatory agency may have more stringent monitoring procedures in place. The tank operator must take the necessary steps to ensure familiarity with the procedures and follow those regulatory guidelines as required.

2. **Site Address and phone number:** 4350 El Camino Real Los Altos, CA  
94022 Tele: 4159410244

6. **Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:**

Operator Name : Greg Galatolo Tele: 4159410244

Maintenance : Contractor - Performance West Petroleum - 1 (800) 244-6613

7. **Reporting Format:**

Annual monitoring system certification report; reporting of audible or visual alarm conditions to the local implementing agency, as well as the responsible party for maintenance, listed under item #6.

8. **State the preventive maintenance schedule for the monitoring equipment.**

Annual certification of the electronic monitoring system, as recommended by the manufacturer, and repairs are made when notified by station operator.

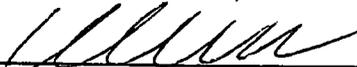

In the event of a test failure, tank is taken out of service and proper reporting procedures are followed.

9. **Describe the training needed for the operation of both the tank system and the monitoring equipment.**

The operator has been trained to check the system daily for proper operation and record the date checked on the "Monitoring System Check Log." All alarms are to be recorded on the "Monitoring System Alarm Log" and reported to the responsible party for Maintenance listed under item #6.

We have read, completed and understand the foregoing information regarding implementation of this monitoring program for the UST(s) located at this facility, and we will monitor the UST(s) accordingly.

# Spill Response Plan

## For Minor Releases:

If the release is less than one gallon and service station personnel can contain the release immediately (and the release does not leave the site or enter any waterway ), do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up released material with absorbent material.
4. Placed used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state and local regulations.

## For Major Releases or breach in secondary containment:

If the release is greater than 1 gallon, or threatens to leave the site or enter a waterway , or there is an injury to a person, do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 9 1 1
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify:  
Regional Environmental Compliance Specialist  
Maintenance : Contractor - Performance West Petroleum - 1 (800) 244-8613
9. Attempt to contain with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1 (800) 852-7550.
11. The secondary containment will be cleaned up within 30 days. Tosco Corporation's Environmental Remediation Group will investigate and arrange for proper waste disposal.

Monitoring Plans (current)

5. Locations where monitoring will be performed:

Tanks: Interstitial space of double wall tanks.

Lines: Mechanical line leak detection. Liquid sensor in sump.

**Underground Storage Tank Monitoring Program**

**Written Monitoring Procedure**

Unit : 6115

**6. Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:**

**Operator Name :** Greg Galatolo / El Camino Unocal 415/941-0244

**Maintenance :** Unocal Maintenance Department - 1 (800) 723-7600

**7. Reporting Format:**

Annual monitoring system certification report. Reporting of audible or visual alarm condition to local implementing agency and responsible party for maintenance listed in #6 above.

**8. State the preventive maintenance schedule for the monitoring equipment.**

Annual certification of the electronic monitoring system as recommended by the manufacturer and repairs as needed when notified by station operator.

In the event of a test failure, tank is taken out of service and proper reporting procedures are followed.

**9. Describe the training needed for the operation of both the tanksystem and the monitoring equipment.**

The operator has been trained to check the system for proper operation daily and record that it has been checked on the "Monitoring System Check Log." All alarms are to be recorded on the "Monitoring System Alarm Log" and reported to the responsible party for Maintenance listed in section 6 above. The operator has also been instructed to call Unocal's Leak Reporting Hotline (800) 955-LEAK and local agency. In addition, Unocal's Environmental Guidance Specialists will check these logs when they visit the station.

We have read, completed and understand the foregoing information regarding implementation of this monitoring program for the UST(s) located at this facility, and we will monitor the UST(s) accordingly.

## Spill Response Plan

### For Minor Releases:

If the release is small enough that the station personnel can contain the release immediately (and the release does not leave the site or enter any waterway), do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up released material with absorbent material.
4. Notify local agency:

Santa Clara Co. Env. Health

Phone: 408-984-3084

5. Placed used absorbent material into an approved container.
6. For proper disposal of used absorbent, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state and local regulations.
7. Call Unocal's leak reporting hotline at 1-(800)-955-LEAK.

### For Major Releases or breach in secondary containment:

If the release is greater than 25 gallons, or threatens to leave the site or enter a waterway, or there is an injury, do the following:

1. Turn off the source of the spill. (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 9 1 1 (if necessary)
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify:

Local Agency : Santa Clara Co. Env. Health Phone: 408-984-3084

Business Operations Manager

Maintenance : Unocal Maintenance Department - 1(800)723-7600

Unocal Leak Hotline: 1-(800)-955-LEAK

9. Attempt to contain with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1 (800) 852-7550.
11. The secondary containment will be cleaned up within 30 days. Unocal's Corporate Environmental Remediation Technology Group (CERT) will investigate and hire an independent contractor to conduct proper waste disposal.

RE: Unocal Station  
4350 El Camino Real  
Los Altos

Dear Ms. Baker:

Enclosed is the updated leak response plan and current underground storage tank monitoring procedures as requested in your June 1 letter to Mr. Dave Corder of Unocal.

It is my assumption that once this plan is submitted and in place, updating is only required when the monitoring or leak response procedures are changed. This plan does not need to be submitted annually with the HMMP. If my assumptions are incorrect, please notify me immediately.

If you have any questions, please feel free to contact me at the address and phone number above.

Sincerely,

**ROBERT H. LEE & ASSOCIATES, INC.**

Steven A. Skanderson

WASTE OIL	<u>1</u>	<u>520</u>	<u>COMP</u>	<u>DW</u>	<u>Y</u>	<u>Y</u>

PRODUCT LINES: MATERIAL: FG

CONSTRUCTION: Double Wall

LINE LEAK DETECTION METHOD:  ELECTRONIC  MECHANICAL

All product lines have line leak detectors capable of detecting a leak of 3 gallons or more per hour at 10 lbs. per square inch line pressure within 1 hour; see page one for a description of the equipment installed at this location.

All product lines are pressurized using a submerged pumping system and are tested annually to assure the leak detectors are functional. Impact valves are also inspected annually to assure closure.

Repair and/or replacement of all leak detectors and impact valves will be done annually at the time of inspection and retested to meet the above test conditions.

\* This document is to be kept current and at the site. Revision 1, 1993

MONITORING PROCEDURES FOR DOUBLE WALL TANKS

TANK MONITORING

The Underground storage tanks are monitored using an approved continuous electronic monitoring system (see below). This system is able to detect the presence of a leak in the primary as well as secondary containment through the use of an annular space and in- tank inventory gauge.

MONITORING SYSTEM

INTERSTITIAL MONITOR:

   VAPOR      X   LIQUID       NONE (FOLLOWS PROCEDURES FOR SINGLE WALL TANK MONITORING)

EQUIPMENT AT THIS FACILITY: LEAK ALERT LA-08

MAINTENANCE CONTRACTOR: Coordinated through UNOCAL Maintenance Dispatch

Visual monitoring of the tank monitor alarm box is performed daily by the dealer or a designated employee. Please see the attached site map for the location of all equipment and forms for keeping monitoring records at the site.

The electronic monitoring devices are maintained according to manufacturer's recommendations.

The dealer will also perform inventory reconciliation according to the procedure outlined in the Inventory reconciliation section of this plan.

Training will be given which includes information regarding: how to self test the electronic monitoring equipment, what the equipment monitors, how to tell when the alarm goes off, how to perform inventory reconciliation, record keeping requirements and procedures to follow in the event of alarm activation, leak, suspected leak, or other emergency.

RESPONSIBLE PERSONNEL

Primary Contact: Name: Greg Galatolo Title: Dealer

Address: 1521 Topar Dr. Los Altos Ca 94024

Bus #/Home #: 415 941-0244 / 415 948-8302

Secondary Contact: Name: Scott Kent Title: Manager

Address: 1411 Muender Ave. Sunnyvale 94086

Bus #/Home #: 415 941-0244 / 408 739-6964

Maintenance coordinated through Unocal Maintenance Dispatch 24 hour number 1-800-723-7600.

See also "Unocal Leak Response Plan"

MONITORING PROCEDURES  
DOUBLE CONTAINED PIPING-CONTINUOUS  
ELECTRONICALLY MONITORED SUMPS

DOUBLE CONTAINED PIPING

PIPING SUMP MONITOR FOR INTERSTITIAL SPACE:

VAPOR     LIQUID     NONE

EQUIPMENT AT THIS FACILITY IS: LEAK ALERT LA-08

All double contained piping is continuously monitored electronically by a system that can sense a leak anywhere along the piping. Pressurized pipes are also monitored by ~~either an electronic or mechanical~~ line leak detector capable of sensing a pressure loss in the system and activating a valve to restrict or shut off the flow of product through the lines.

Product lines are sloped towards the sump, and in the event of a line leak the leak detector is activated and any product in the annular space will flow backwards to the sump area where a liquid sensor is activated.

Any product which enters the piping annular space will flow into to the sump containment area. There is a sensor in the sump area which detects any product present there. The system has both visible and audible alarms that are activated when there is product in the sump or detected in anywhere in the secondary containment system.

If the system goes into the alarm mode, the dealer or his designate will check the alarm panel to verify that there is a leak condition and then silence the audible alarm. The dealer or his designee will immediately contact Unocal dispatch and advise them of the situation so that they can contact the appropriate responder who will follow the instructions outlined in the "Leak Response Plan", which is part of the Hazardous Material Management Plan.

The tank monitor alarm will be visually monitored daily. The dealer or an employee appointed by the dealer will follow the same procedures as outlined for monitoring the double contained product tanks.

INVENTORY RECONCILIATION

INVENTORY MEASUREMENT METHOD:  X MANUAL  ELECTRONIC

ELECTRONIC INVENTORY EQUIPMENT AT THIS FACILITY IS: \_\_\_\_\_

Daily product inventory reconciliation will be completed by the Unocal Dealer at the facility.

- 1) Approved meters for tank inputs and withdrawals in accordance with CCR Title 4, Chapter 9, Subchapter 1 Tolerance and Specifications for Commercial weighing and measuring devices.
- 2) Inventory reconciliation "exceeding a variation of 1.0 percent of the monthly tank delivery plus 130 gallons must be investigated in accordance with this section."
- 3) The inventory will be reconciled monthly by the dealer, and:

Should inventory reconciliation indicate a loss greater than specified, the investigative steps outlined in California Code of Regulations, Title 23 Waters, Subchapter 16 Underground Tank Regulations, Article 4, Section 2646(k), will be implemented.

- 4) Annually the dealer will submit an inventory certification form to the local agency.

# UNOCAL LEAK RESPONSE PLAN

All calls for maintenance from Unocal service stations (both Company owned/operated and Company owned/leased to Dealer) come into Maintenance Dispatch in Los Angeles, California via (800) 723-7600. This includes calls to report spills, leaks, dispensers damaged by cars, or alarms triggered by leak detection equipment except fuel delivery spills which are reported through the Supervisor for Safety and Environment.

1. Upon detection of an unauthorized release, spill or overfill of hazardous material from an underground storage tank, the Operator shall immediately notify Unocal Maintenance. Unocal will notify the local agency within 24 hours after detection.

**RESPONSIBLE UNOCAL PERSONNEL:** Those persons responsible for authorizing any work necessary under the leak response plan.

<u>NAME</u>	<u>TITLE</u>	<u>PHONE NUMBER</u>
Unocal Maintenance	Dispatch	1-800-723-7600 (24hrs)
Unocal Leak Response	Response Coordinator	1-800-955-LEAK
Kathy Crouse	Territory Manager	510-277-2457

If necessary, Unocal will contract with a licensed contractor to respond to the incident.

## **VARIATION IN INVENTORY RECONCILIATION**

If the dealer exceeds the allowable variation on his monthly inventory reconciliation, (variation equals .50% of fuel deliveries plus 100 gallons) he will immediately notify his Territory Manager listed above.

Unocal T.M. shall do the following:

T.M. will make an immediate inquiry regarding any losses during recent inventory reconciliation. If necessary, he will review the records at the site.

To verify inventory reconciliation records, the territory manager will take the following steps:

1. Within 24 hours of discovering the variation, the territory manager will review the inventory records for the preceding 30 days and determine if there is a calculation error. Within that same 24 hour period, if a variation is confirmed, the T.M. will notify Unocal Maintenance. Maintenance will notify the local agency.
2. Coordinate with Unocal maintenance to check the underground tank system for signs of a leak.
3. Coordinate for calibration of the dispenser meters within 24 hours of the system inspection.
4. The dealer or territory manager will continue to conduct inventory reconciliation as required.

If the review of the inventory reconciliation records indicates that no release has taken place, no further release detection steps need to be taken. Unocal will notify the local agency that the suspected release was not confirmed.

**OTHER SUSPECTED RELEASES INCLUDING:**

Tank Overfill  
Tank Monitor Alarm Activated  
Spills  
Drive Offs

The discovery of released hazardous substances at the site including the presence of free product or vapors in soils, basements, sewer lines, utility lines, surface waters, or drinking waters.

Unusual operating conditions such as: erratic behavior of dispensers, sudden loss of product from the product tanks, or the unexplained presence of water in the product tank. The exception is if the equipment is not functioning properly and the system has not leaked.

**IMMEDIATELY REPORT ANY OF THESE CONDITIONS TO UNOCAL MAINTENANCE AT 1-800-723-7600.**

1. Unocal will notify the local agency of any of the above mentioned conditions which are still under investigation after eight hours.
2. Unocal will authorize and order any contractors necessary to assist in the clean up effort.
3. If it is determined at any time during the process that there has been a release (as defined in Chapter 6.7 of Division 20 of the Health & Safety Code), a leak report will be prepared and provided to the local agency within 5 working days in accordance with Article 5, Section 2651(b), of the California Underground Storage Tank Regulations. This report will be filed by the Unocal maintenance engineer. On going remediation will be supervised by the Unocal Area Manager, Environmental Remediation.

## BATTERY STORAGE (NEW OR USED)

All automotive batteries, when stored at the service station, will have a plastic (polyethylene) pan underneath. The pan or pans must have a 1" lip on all four sides of the pan to contain any battery acid that may leak from the batteries stored.

## DISPOSAL PROCEDURE FOR ANTI-FREEZE

Used anti-freeze will be placed in a D.O.T. approved 55 gallon drum or similar container and the container labeled "Waste Anti-freeze / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call an "Anti-freeze Recycling Contractor" to remove the container of used anti-freeze. The dealer will not, under any circumstances, pour used or new anti-freeze or a mixture thereof on the floor or on the ground and hose it down to floor drains or storm drains.

## DISPOSAL PROCEDURE FOR USED OIL FILTERS

The dealer will put Used oil filters in a 55 gallon drum or similar container and the container labeled "Waste Oil Filters / Hazardous Material". The container will be placed on a metal or plastic pan with a 2" to 3" lip all the way around the pan to contain any spills or leaks from the container. When the container is full, the dealer will call a "Waste Oil Recycling Contractor" to remove the container of used oil filters.

The dealer will drain all used oil filters of free-flowing oil prior to placement into the above noted container. Free flowing oil is defined as a continuous stream of oil exiting the filter when the filter is inverted. Oil exiting drop by drop is not considered free flowing. If oil exiting the filter is restricted in any way, the filter shall be manipulated to allow used oil to exit the filter freely.

Used oil filters will not be placed in a refuse disposal container.

1) attach copies of all forms used to record inspection activities  
i.e., wheel monitoring

a) task of monitor done by  
b) record of alarm situation

DAILEY VISUAL MONITORING PROCEDURES  
FOR ABOVEGROUND HAZARDOUS MATERIALS

Hazardous Materials stored aboveground include:

- Motor Oil
- Transmission Oil
- Antifreeze
- Grease
- Gear Lubricant (80W/90)
- Solvent (including parts cleaners)
- Propane
- Battery Acid \*
- Car Wash Products
- Kerosene
- CO<sub>2</sub>
- Waste Oil (prior to dumping in underground tank)
- Spent Anti-freeze \*
- Used Oil Filters

The storage areas for these hazardous materials must be visually inspected every day for signs of leakage. Items designated with a (\*) require secondary containment with the contents of each container clearly labeled.

If there is a leak or spill of any of the hazardous materials, whether stored above- or underground, Dealer must follow the "Emergency Response Procedures," attached.

MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK

1. TURN OFF PUMPS using the Emergency Pump Shut-Off Switch.
2. EVACUATE: verbally ANNOUNCE to all persons on the site: "There is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. CALL 9-1-1 Give the following information:  

"THERE IS A FIRE / GASOLINE SPILL at the Unocal service station at 4350 El Camino Real" If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. LOOK AROUND to assure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist, or direct assistance to, anyone having difficulty leaving the station area, and anyone who may be injured.
5. REPORT to arriving emergency response personnel to provide them with any information or assistance they might need.
6. CONTACT the station dealer if s/he is not already at the station. Use the list below for emergency contacts:

Primary Contact: Name: Greg Galatolo Title: Dealer  
 Address: 1521 Topar Dr. Los Altos Ca 94024  
 Bus #/Home #: 415 941-0244 / 415 948-8302  
 Secondary Contact: Name: Scott Kent Title: Manager  
 Address: 1411 Muender Ave. Sunnyvale 94086  
 Bus #/Home #: 415 941-0244 / 408 739-6964

7. NOTIFY Unocal Maintenance Dispatch by phone IMMEDIATELY 1-800-723-7600  
NOTIFY your Territory Manager IMMEDIATELY  
 TERRITORY MANAGER: Kathy Crouse Phone Number: 510-277-2457

Unocal will notify the State and Local administering agencies within an appropriate time frame, unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:

1. LOCAL AGENCY: Santa Clara County, HD/Toxics Control  
 PHONE NUMBER: 408-299-6930
2. CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800) 852-7550 (24 HOURS)
3. LOCAL POLICE AND FIRE DEPARTMENTS, 911

MINOR INCIDENT:

FIRES: Extinguish with fire extinguisher. Recharge fire extinguisher, if necessary.

SPILLS: Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary.

MEDICAL: Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.

RECORD: Record the event in the daily monitoring log.

NOTIFY: the dealer of the event.

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign this document upon completion of training. Retain these records for a minimum of three years.

I. **FIRST THINGS TO KNOW:**

- A. **EMERGENCY PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.

LOCATION: NORTH EXTERIOR BLDG. WALL, STORAGE AREA

- B. **ELECTRICAL PANEL:** The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.

LOCATION: IN SERVICE BAY STORAGE AREA

- C. **TANK MONITORING ALARM:** Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.

LOCATION: SERVICE BAY STORAGE AREA

- D. **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.

LOCATION: IN SIDEWALK ALONG LOS ALTOS AVENUE

- E. **NATURAL GAS SHUT-OFF:** If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.

LOCATION: NONE

- F. **FIRE EXTINGUISHER:** Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.

LOCATION: 2-IN SERVICE BAY

- G. **ABSORBENT:** In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it; a vacuum truck should be used to clean up any large spill.

LOCATION: IN SERVICE BAY STORE AREA

- H. **EMERGENCY RESPONSE EQUIPMENT:** These items shall be used by employees to prevent direct skin contact with a hazardous material.

1. Broom: SERVICE BAY
2. Shovel: SERVICE BAY
3. Gloves: SERVICE BAY
4. Goggles: SERVICE BAY

- I. **FIRST AID KIT:**

LOCATION: IN SERVICE BAY STORE AREA

- J. **EMERGENCY ASSEMBLY AREA:** Location where all employees are to meet in the event of an emergency.

LOCATION: SOUTH SIDE OF SITE

- K. **HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) AND MATERIAL SAFETY DATA SHEET (MSDS):**

LOCATION: SALES OFFICE

II. NEAREST MEDICAL FACILITY: Employees should know what facilities are available in case customers or other employees need medical attention.

I. NAME: EL CAMINO HOSPITAL

ADDRESS: 2500 GRANT ROAD, LOS ALTOS

PHONE NUMBER: 415 940-7000

NEAREST DESIGNATED TRAUMA CENTER:

2. NAME: STANFORD MEDICAL CENTER

ADDRESS: 300 PASTEUR, STANFORD

PHONE NUMBER: 415 723-7570

III. All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

IV. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: Flush with water for 15 minutes while holding eyelids open. Get medical attention.

B. SKIN CONTACT: Flush with water while removing contaminated clothing and shoes. Follow by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.

C. INHALATION (Breathing): Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.

D. INGESTION (Swallowing):

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE! If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

E. NOTE TO PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

F. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

# FILE

June 1, 1994

Mr. David Corder  
Unocal Corporation  
P.O. Box 2390  
Brea, CA 92622-2390

Dear Mr. Corder:

Our office has received and reviewed the HMMP for the Unocal Station at 4350 El Camino Real in Los Altos. The leak response plan submitted as part of HMMP does not meet the requirements of Title 23, Division 3, Chapter 16 Section 2632(d)(2). The plan should be updated to include the following information:

- 1) A description of the proposed methods and equipment to be used for removing and properly disposing of any hazardous substances, including the location and availability of the required equipment if not permanently on-site, and an equipment maintenance schedule for the equipment located on site.
- 2) The name(s) and title(s) of the person(s) responsible for authorizing any work necessary under the response plan.

It should be noted that item 1) should be addressed even if contract work will be used as part of the leak response.

Please submit a copy of the updated leak response plan and the current monitoring procedure as defined in Section 2632(d)(1) by July 5, 1994.

Sincerely,

Mary Anne Baker  
Hazardous Materials Specialist

WASTE OIL	<u>1</u>	<u>520</u>	<u>FG/ST</u>	<u>DW</u>	<u>Y</u>	<u>Y</u>

PRODUCT LINES: MATERIAL: FG

CONSTRUCTION: Double Wall

LINE LEAK DETECTION METHOD:  ELECTRONIC  MECHANICAL

All product lines have line leak detectors capable of detecting a leak of 3 gallons or more per hour at 10 lbs. per square inch line pressure within 1 hour; see page one for a description of the equipment installed at this location.

All product lines are pressurized using a submerged pumping system and are tested annually to assure the leak detectors are functional. Impact valves are also inspected annually to assure closure.

Repair and/or replacement of all leak detectors and impact valves will be done annually at the time of inspection and retested to meet the above test conditions.

1993 business plan*

MONITORING PROCEDURES FOR DOUBLE WALL TANKS

TANK MONITORING

The Underground storage tanks are monitored using an approved continuous electronic monitoring system (see below). This system is able to detect the presence of a leak in the primary as well as secondary containment through the use of an annular space and in- tank inventory gauge.

MONITORING SYSTEM

INTERSTITIAL MONITOR:

\_VAPOR    X\_LIQUID     \_NONE (FOLLOWS PROCEDURES FOR SINGLE WALL TANK MONITORING)

EQUIPMENT AT THIS FACILITY:LEAK ALERT

MAINTENANCE CONTRACTOR: Coordinated through UNOCAL Maintenance Dispatch

Visual monitoring of the tank monitor alarm box is performed daily by the dealer or a designated employee. Please see the attached site map for the location of all equipment and forms for keeping monitoring records at the site.

The electronic monitoring devices are maintained according to manufacturer's recommendations.

The dealer will also perform inventory reconciliation according to the procedure outlined in the Inventory reconciliation section of this plan.

Training will be given which includes information regarding: how to self test the electronic monitoring equipment, what the equipment monitors, how to tell when the alarm goes off, how to perform inventory reconciliation, record keeping requirements and procedures to follow in the event of alarm activation, leak, suspected leak, or other emergency.

RESPONSIBLE PERSONNEL

Primary Contact: Name: Greg Galatolo Title: Dealer

Address: 1521 Topar Dr. Los Altos Ca 94024

Bus #/Home #: 415 941-0244 / 415 948-8302

Secondary Contact: Name: Scott Kent Title: Manager

Address: 1411 Muender Ave. Sunnyvale 94086

Bus #/Home #: 415 941-0244 / 408 739-6964

Maintenance coordinated through Unocal Maintenance Dispatch 24 hour number 1-800-723-7600.

See also "Unocal Leak Response Plan"

MONITORING PROCEDURES  
DOUBLE CONTAINED PIPING-CONTINUOUS  
ELECTRONICALLY MONITORED SUMPS

DOUBLE CONTAINED PIPING

PIPING SUMP MONITOR FOR INTERSTITIAL SPACE:

\_VAPOR    \_LIQUID    XNONE

EQUIPMENT AT THIS FACILITY IS: LEAK ALERT

---

All double contained piping is continuously monitored electronically by a system that can sense a leak anywhere along the piping. Pressurized pipes are also monitored by either an electronic or mechanical line leak detector capable of sensing a pressure loss in the system and activating a valve to restrict or shut off the flow of product through the lines.

Product lines are sloped towards the sump, and in the event of a line leak the leak detector is activated and any product in the annular space will flow backwards to the sump area where a liquid sensor is activated.

Any product which enters the piping annular space will flow into to the sump containment area. There is a sensor in the sump area which detects any product present there. The system has both visible and audible alarms that are activated when there is product in the sump or detected in anywhere in the secondary containment system.

If the system goes into the alarm mode, the dealer or his designate will check the alarm panel to verify that there is a leak condition and then silence the audible alarm. The dealer or his designee will immediately contact Unocal dispatch and advise them of the situation so that they can contact the appropriate responder who will follow the instructions outlined in the "Leak Response Plan", which is part of the Hazardous Material Management Plan.

The tank monitor alarm will be visually monitored daily. The dealer or an employee appointed by the dealer will follow the same procedures as outlined for monitoring the double contained product tanks.

INVENTORY RECONCILIATION

INVENTORY MEASUREMENT METHOD:  X MANUAL  ELECTRONIC

ELECTRONIC INVENTORY EQUIPMENT AT THIS FACILITY IS: \_\_\_\_\_

Daily product inventory reconciliation will be completed by the Unocal Dealer at the facility.

- 1) Approved meters for tank inputs and withdrawals in accordance with CCR Title 4, Chapter 9, Subchapter 1 Tolerance and Specifications for Commercial weighing and measuring devices.
- 2) Inventory reconciliation "exceeding a variation of 1.0 percent of the monthly tank delivery plus 130 gallons must be investigated in accordance with this section."
- 3) The inventory will be reconciled monthly by the dealer, and:

Should inventory reconciliation indicate a loss greater than specified, the investigative steps outlined in California Code of Regulations, Title 23 Waters, Subchapter 16 Underground Tank Regulations, Article 4, Section 2646(k), will be implemented.

- 4) Annually the dealer will submit the attached inventory certification form to the local agency.

## EMERGENCY RESPONSE PROCEDURE

In the event of a fire, spill, leak or suspected leak in the tanks and/or piping, the following steps are to be taken as applicable:

1. **TURN OFF PUMPS** using the Emergency Pump Shut-off Switch.
2. If there is an immediate danger, **ANNOUNCE** to all persons on the site: "THERE IS AN EMERGENCY. Please turn off your engines and leave the Station on foot immediately."
3. For more **SEVERE** emergencies **CALL FOR HELP** by dialing 9-1-1 and giving the following information:  
"THERE IS A FIRE/DANGEROUS GASOLINE SPILL at the UNOCAL Station at (give address.)" Report to the answering dispatcher, whether anyone is trapped or requires immediate medical attention. Stay on the phone and be prepared to answer any questions concerning the situation.
4. If **EVACUATION** is necessary direct everyone to meet at the emergency assembly area and account for everyone at that location. **LOOK AROUND** to assure that all have left, particularly those in vehicles who may not have heard the emergency announcement. Assist, or direct assistance to anyone having difficulty leaving the service station area, and anyone who may be injured.
5. **ATTEMPT TO EXTINGUISH** any fire if you can do so safely. Have the fire extinguisher ready to use in the event of any dangerous spill. Try to contain any large spill, or use absorbent on smaller spills.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need.
7. **CONTACT** the station dealer if s/he is not already at the station. Use the emergency contacts listed below:
  1. Name/Bus/Home: Greg Galatolo 415-941-0244/415-948-8302
  2. Name/Bus/Home: Scott Kent 415-941-0244/408-739-6964
8. **NOTIFY UNOCAL** and your Business Manager by phone **WITHIN 24 HOURS**.
  1. UNOCAL EMERGENCY PHONE: (800) 723-7600 (24 HOURS)
  2. UNOCAL BUS. MANAGER/PHONE NUMBER: Matt Fischer (510)277-2465You must mail a completed Unauthorized Release Report to the Business Manager within 24 hours. UNOCAL will notify the appropriate State and Local agencies unless the situation requires urgent immediate response by the agencies, in which case the DEALER should notify these agencies:
  1. LOCAL AGENCY: Santa Clara County, HD/Toxics Control  
PHONE NUMBER: 408-299-6930
  2. CALIFORNIA OFFICE OF EMERGENCY SERVICES: (800) 852-7550 (24 HOURS)
9. Dealer should attempt to isolate leak location by inspection.
10. UNOCAL Business Manager will coordinate with UNOCAL Environmental Compliance Dept. (UECD) whatever corrective actions need to be taken beyond the dealer's capabilities. UECD will file whatever reports need to be filed with local and state agencies, and send a copy to the station for the Dealer's file.

**A COPY OF THIS PAGE MUST BE FILLED OUT AND POSTED CONSPICUOUSLY ON SITE.**

## HOW TO USE THIS BOOKLET

The cover sheet of this booklet contains useful information about the underground facilities at your station. Depending on the information given, you must use different forms in this booklet:

1. If your station has any single wall product tanks, use Form C.
2. If your station has any double wall product tanks, use Form B.
3. If your station has a single wall waste oil tank, use Form D.
4. If your station has a double wall waste oil tank, use Form B.
5. If your station has any double wall piping, use Form B.
6. If your station has a piping trench liner, use Form B.
7. If your station has an electronic monitoring system for any double wall piping or trench liner, you need not use Form B for any double wall tanks or piping.
8. If your station has vadose or groundwater monitoring wells, you still need to use Forms C and/or D as applicable.
9. If your station has other hazardous materials (see Daily Visual Monitoring, below), you are responsible also for that portion of Form B.

Also, all stations must complete Form A and send it in every 3 months to the local agency shown on the cover sheet.

In case of a leak or spill, you must complete Form E to attach to Form A, and you must send a copy of Form F to your UNOCAL Representative within 24 hours. You must also notify your representative by phone (and/or call the UNOCAL Emergency Phone after hours).

You must post a copy of Page 3 at a conspicuous location in your cashiers area.

You must keep a copy of Form H to document the training received by your employees.

**KEEP COPIES OF ALL FORMS YOU MAIL OUT!**

### DAILY VISUAL MONITORING

Hazardous Materials stored underground include:

- Gasoline
- Diesel Fuel
- Waste Oil

These products are monitored for leaks in the underground tanks and piping.

Hazardous Materials stored aboveground include:

- Propane
- Waste Oil (prior to dumping in underground tanks)
- Motor Oil
- Transmission Oil
- Gear Lubricant (80W/90)
- Grease
- Solvent (including parts cleaners)
- Battery Acid
- Antifreeze

If your station stores any of these materials, the storage areas must be visually inspected every day for signs of leakage.

If there is a leak or spill of any of the hazardous materials, whether stored above or underground, you must follow the Emergency Response Procedures outlined on Page 3, as applicable.

**MONITORING FOR SINGLE-WALL TANKS  
INSPECTIONS TO BE CONDUCTED BY DEALER**

1. Daily reconciliation shall be made of the inventory control records.
2. Daily visual inspection for leaks shall be made in the areas of:
  - Submerged pump
  - Tank fill (also inspected after each delivery)
3. Dealer **MUST** be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential piping leak.

**PRODUCT TANK GAUGING PROCEDURE**

1. Use a gauge stick (dipstick) to measure the level of gasoline in each tank. Lower the stick slowly until it hits the bottom of the tank. The use of fuel-finding paste is recommended.
  2. Slowly pull the stick back out, and observe the point where the stick begins to be discolored by the liquid.
  3. Write this number down, and repeat the same procedure. If the two numbers are not close, repeat the procedure until the numbers agree.
  4. Enter the final number in your dealer books.
- If it is raining, water can spoil the readings, and should not be allowed to enter the tank. If it does not stop raining, care must be taken to ensure the stick readings are accurate.

**RECORD KEEPING FOR SINGLE-WALL TANKS**

1. Use your dealer books to keep track of your daily dipstick reading.
2. Record daily all dispenser meter readings in your dealer books.
3. Record all deliveries in your dealer books.
4. The dipstick, dispenser meter, and delivery recordings are to be used daily in filling out the "Inventory Reconciliation Sheet" (attached).

**WASTE OIL TANK GAUGING PROCEDURE**

1. To monitor the inventory level in the waste oil tank, be prepared to have the tank locked for at least 12 hours or longer if required by your local agency. This shall be done weekly. NO INPUTS OR WITHDRAWALS SHALL OCCUR DURING THESE PERIODS.
2. Stick gauge the tank immediately before closing access to the waste oil tank, and immediately after reopening the tank, and enter those numbers in columns C and D of the "Waste Oil Tank Gauging Sheet" (attached) in both inches and gallons.
3. The difference between those two columns is the actual variation (column E).
4. For allowable variation (column F), use 2.8 gallons if you have a 280 gallon capacity, or 5.0 gallons if you have a 520 or 550 gallon tank.

**WHAT TO DO IF YOU EXCEED THE ALLOWABLE VARIATION**

If you **EVER** exceed the allowable variation as indicated on the Inventory Reconciliation Sheet C, column 13, or on the Waste Oil Tank Gauging Sheet D, column 7, follow the **RESPONSE PROCEDURE** shown on Page 3. Notify your UNOCAL representative within 24 hours of discovery of a suspected leak. UNOCAL will be responsible for coordinating one or more of the following:

- Performing a metered vs. measured inventory reconciliation.
- Contacting the appropriate State and Local agencies.
- Visually inspecting for leaks.
- Calibrating the dispenser meters.
- Hiring a tank tester to determine if there is a leak.
- Having the tank(s) and/or piping repaired or replaced if necessary.

The "Unauthorized Release Report" must be sent to UNOCAL within 24 hours. The "Release Evaluation Checklist" must be attached to the "Inventory Reconciliation Sheet", or the "Waste Oil Tank Gauging Sheet" where the allowable variation was exceeded.

## MONITORING FOR DOUBLE-WALL TANKS

### INSPECTIONS TO BE CONDUCTED BY DEALER

1. Daily reconciliation shall be made of the Inventory Control Records.
2. Daily visual inspection for leaks shall be made in the areas of:
  - Submerged pump
  - Tank fill (also inspected after each delivery)
3. Dealer MUST be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential leak.

### SECONDARY CONTAINMENT MONITORING PROCEDURE

Tank or Piping Secondary Containment (annular space or Piping Trench Liner) shall be monitored daily by the dealer, unless a less frequent period is allowed. This is done to determine if product is leaking from the primary container or if water is entering from an outside source. This procedure is not necessary if an electronic monitoring system is installed to monitor these items. Contact your UNOCAL representative for monitoring port locations.

1. Use a gauge stick (dipstick) to detect any liquid in the tank annular space, double wall piping monitoring ports, or piping trench liner monitoring wells. Lower the stick slowly until it hits the bottom of the tank annular space.
2. Slowly pull the stick back out and observe whether the stick has been discolored by liquid. If product and/or water is detected, immediately contact your representative.
3. Write this number down, and repeat the same procedure. If the two numbers are not close, repeat the procedure until the numbers agree.
4. Enter the final number in the "Secondary Containment Recording Sheet (attached).

NOTE: Piping trench monitoring wells consist of slotted PVC pipe which allows liquid intrusion and a manhole for access. Wells are located at the lowest point of the fiberglass trench liner.

### RECORD KEEPING FOR DOUBLE-WALL TANKS & PIPING

1. Keep track daily of the liquid level on the "Secondary Containment Recording Sheet".
2. If ANY fuel and/or water is discovered in the trench liner, call your representative IMMEDIATELY, and explain the situation.
3. If the representative has been notified, but after 8 hours it has not been possible to remove all the liquid from the secondary containment, dealer must contact the local agency shown on the cover sheet.

### ELECTRONIC MONITORING SYSTEMS

If this station is equipped with an electronic monitoring system for underground tanks and piping, in the event of a leak in the primary containment, product will be contained in the annular space. The sensors for the electronic monitoring system are located at the low end of each tank, and at the low end of the piping where the product will drain back into the tank. There may be sensors at additional locations. Sensors will signal the presence of a leak.

If a leak is discovered, the "Unauthorized Release Report" must be sent to UNOCAL within 24 hours. The "Release Evaluation Checklist" must be attached to the "Quarterly Report".

## OVERFILL/SPILL PROTECTION & CLEANUP

### 1. DELIVERIES/GAUGING

Dealer is responsible to ensure that the delivery he or she requests is not in excess of the tank capacity, taking into consideration the amount currently in tank. Driver is to gauge tank to assure capacity is available for the entire load and must remain in attendance during the entire delivery to monitor the operation.

### 2. BALL VENT LINE FLOAT SYSTEM

(Only for double-wall tanks installed after July 1986.)

The ball float valve system installed with the tank substantially prevents the possibility of overfill occurring. If the tank is filled to the ball float level, the petroleum product delivery will be cut to 3 gallons per minute alerting the driver of a potential overfill condition. In the event that this occurs, the following actions will be taken:

1. The delivery truck driver shall turn off the petroleum product supply at the truck, leaving the hose fully connected to the tank fill pipe line and the truck.
2. The small amount of petroleum product remaining in the hose shall be slowly drained into the tank. Since the ball float valve is 2 to 3 inches below the top of the tank, there remains a 100 + gallon capacity within the tank at the moment when the ball float closes off delivery. The bleed hole in the ball float valve allows the remaining petroleum product in the hose to completely drain through the fill pipe into the tank.
3. The hose shall be disconnected from the fill pipe only when it has fully drained. In the event that spillage occurs upon hose disconnection, the remaining small amount of petroleum product will be properly contained.

### 3. WASTE OIL TANK

1. Station is equipped with waste oil buckets which hold a maximum capacity of 3 gallons (about 3 to 4 cars' worth of waste oil).
2. Prior to dumping any waste oil, dealer is to gauge the tank to assure that holding capacity is greater than that which will be put into the tank.
3. Waste oil is poured directly through fill/pump out pipe, using a funnel. Should any waste oil spill during this operation, it will be properly contained using absorbent material.

#### 4. CLEAN-UP/RECORDS

1. Small spills (less than 1 gallon and only requiring 15 minutes to clean up) shall be cleaned up using absorbent materials.
2. Larger spills occurring during product delivery shall be reported to the terminal by the dealer and/or by delivery truck driver. The terminal supervisor will notify a local petroleum maintenance contractor who is equipped with a N.F.P.A. approved type hand pump, vacuum and transport container. Large spills not caused by delivery shall be reported immediately to your rep.
3. Spills shall be cleaned up within 8 hours of detection, returned to local terminal and/or disposed of in a lawful manner.
4. Dealer shall record all spills whether or not it is due to delivery overfill or accidental spillage, which exceeds approximately one gallon, and action taken on the "Unauthorized Release Report" (attached), and send it to UNOCAL within 24 hours.
5. Large spills (more than 1 gallon) must be reported to the local agency indicated on the cover sheet within 24 hours. If the spill is large enough to pose a significant hazard, it must also be reported to the California Office of Emergency Services at 800-852-7550.

IN CASE OF EMERGENCY CALL 9-1-1

#### INSPECTIONS TO BE COORDINATED BY UNOCAL YEARLY INSPECTIONS AND TESTING

Yearly testing shall be made of the following:

1. Pressurized piping systems shall be monitored using in-line leak detectors. Leak detectors shall be tested annually for proper operation. Dealer MUST be aware that a reduction in product flow to 3 gallons per minute (gpm) indicates a potential piping leak.
2. Tanks and piping shall be tested annually for tightness, using a State-Certified test system. (For non-secondarily contained tanks and piping only.)
3. Electronic monitoring systems shall be tested annually for proper operation. (For secondarily contained tanks and piping only.)
4. Dispenser core holes, shear valves, and blending valves shall be annually inspected by UNOCAL for signs of leakage.
5. Dispenser meters (recording total sales in gallons) shall be calibrated once annually by UNOCAL. Any additional calibration will be the responsibility of the dealer. Use the "Dispenser Meter Calibration Form".

#### VADOSE/GROUNDWATER MONITORING WELLS

This section is not applicable unless "Monitoring Methods" line on cover sheet shows "Vadose Wells" or "Groundwater Wells".)

The monitoring of vadose wells and groundwater monitoring wells is contracted out to Applied Geo Systems. Monitoring is performed monthly for vapor analysis of the vadose wells and subjective analysis for traces of product in the groundwater monitoring wells. Monitoring is performed quarterly for laboratory analysis of groundwater samples. Monitoring records are maintained on-site in the dealer's office, and are available for inspection.

## EMPLOYEE TRAINING PLAN

New Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline:

### I. FIRST THINGS TO KNOW

- A. **EMERGENCY PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.

LOCATION: 1-North exterior corner of bldg., 1-At electrical panel

- B. **ELECTRICAL SHUT-OFF:** The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.

LOCATION: 1-Southeast corner of bldg., 1-At electrical panel

- C. **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.

LOCATION: 1-In sidewalk of Los Altos Ave., 1-Along El Camino Real

- D. **FIRST AID KIT:**

LOCATION: North Wall Of Storage Room

- E. **FIRE EXTINGUISHERS:** Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.

LOCATION: 2-Along the North wall of the lube bays

- F. **ABSORBENT:** In the form of crystals or cloth, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spills merely try to contain it; a vacuum truck should be used to clean up any large spills.

LOCATION: Storage Room

- G. **NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention:

NAME: Veterans Memorial Hospital

ADDRESS: 3801 Miranda Avenue

CITY: Palo Alto

PHONE NUMBER: 408-493-5000

**NEAREST DESIGNATED TRAUMA CENTER:**

NAME: Stanford Medical Center

ADDRESS: 300 Pasteur

CITY: Stanford, Ca. 94305

PHONE NUMBER: (415) 723-7570

II. All employees should review the Service Station Monitoring Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station.

III. FIRST AID PROCEDURES (For exposure to gasoline or diesel fuel):

A. EYE CONTACT: For direct contact, flush the affected eye(s) with clean water. If irritation or redness develops, seek medical attention.

B. SKIN CONTACT: Wipe product from skin and remove soaked clothing. Cleanse affected area(s) thoroughly by washing with soap and water. If irritation develops and persists, seek medical attention. Do not use solvents or thinners to remove product from skin.

C. INHALATION (Breathing): If symptoms of exposure develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek medical attention. Symptoms include: flushing, blurred vision, dizziness, nausea, headache, drowsiness, loss of coordination, and fatigue. If victim is not breathing or if breathing difficulties develop, artificial respiration or oxygen should be administered by qualified personnel. Seek immediate medical attention.

D. INGESTION (Swallowing):

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE!

If victim is conscious and alert, give 2 to 3 cups of milk or water to drink. Seek medical attention.

E. For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS: Consult the warning advice on container labels or refer to the MSDS for that product.

# QUARTERLY REPORT

Re: Financial Responsibility  
40 CFR Part 280, Subpart H

To Agencies Listed on the Attached Exhibit A:

I am enclosing information relating to Phillips Petroleum Company and its subsidiaries including Tosco Corporation requirement to provide financial responsibility for the ownership and operation of underground storage tanks by its operating entities pursuant to 40 CFR Part 280, Subpart H and similar state regulations. Phillips Petroleum Company meets the insurance coverage requirements set forth under 40 CFR § 280.97. It is intended that this financial responsibility likewise satisfy the requirements of authorized state programs.

Phillips provides this financial responsibility for all underground storage tanks at retail locations, terminals and bulk plants which are owned and/or operated by all Phillips entities including Tosco Corporation and Circle K Stores Inc.

The information enclosed consists of a Certificate of Insurance and a Certification of Financial Responsibility in the form prescribed by the federal regulations. Pursuant to EPA guidance, tank lists are not included. Information about where current tank lists are maintained is included as an exhibit to the Certification of Financial Responsibility.

Please forward this information to the appropriate person in your agency. You may direct any questions to me at (602) 728-4180.

Very truly yours,

## CERTIFICATION OF FINANCIAL RESPONSIBILITY

Tosco Corporation, a wholly owned subsidiary of Phillips Petroleum Company, hereby certifies that it is in compliance with the requirements of Subpart H of 40 CFR Part 280.

The financial assurance mechanism used to demonstrate financial responsibility under Subpart H of 40 CFR Part 280 is as follows:

**Mechanism:** Section 280.97 – Insurance Coverage

**Issuer:** Sooner Insurance Company  
Certificate of Insurance No. 2002-04

**Amount of Coverage:** \$1,000,000 per occurrence  
\$2,000,000 annual aggregate

**Effective Period of Coverage:** From April 1, 2002 until December 1, 2002, unless earlier revoked or replaced by written notice to the Implementing Agencies listed on the attached Exhibit A.

**Coverage:** Taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases.

## CERTIFICATE OF INSURANCE

Certificate No. 2002-24

Date: March 31, 2002

Policy No.: S-7116A-01/02

Certificate Holder: CA State Water Resources Control Board  
UST Program  
P. O. Box 944212  
Sacramento, CA 94244

Insured: Phillips Petroleum Company and its subsidiaries including Tosco Corporation

Address of The Insured: 4 B2 Phillips Building  
Bartlesville, Oklahoma 74006

Covered Locations: Per the attached list

Policy Term: December 1, 2000 – December 1, 2002

### CERTIFICATION

- (1) Sooner Insurance Company, the Insurer, as identified above, hereby certifies that it has issued liability insurance covering the following underground storage tanks:

[See attached list]

for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases in accordance with and subject to the limits of liability, exclusions, conditions, and other terms of the policy arising from operating the underground storage tanks identified above.

The limits of liability are \$1,000,000 each occurrence and \$2,000,000 annual aggregate, exclusive of legal defense costs, which are subject to a separate limit under the policy. The coverage is provided under policy S-7116A-01/02. The effective date of said policy is December 1, 2001.

- (2) The Insurer further certifies the following with respect to the insurance described in Paragraph 1:
- (a) Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy to which this certificate applies

**Management Offices**  
402 Phillips Building  
Bartlesville, Oklahoma 74004  
TEL: (918) 661-6181  
FAX: (918) 661-5780

**Administrative Offices**  
112 Lake Street  
Burlington, VT 05401  
TEL: (802) 658-9466  
FAX: (802) 658-5520

- (b) The Insurer is liable for payment of amounts within any deductible applicable to the policy to the provider of corrective action or a damaged third-party, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision shall not apply with respect to that amount of any deductible for which coverage is demonstrated under another mechanism or combination of mechanisms as specified in 40 CFR 280.95-280.102.
- (c) Wherever requested by a Director of an implementing agency, the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.
- (d) Cancellation or any other termination of insurance by the Insurer except, for non-payment of premium or misrepresentation by the insured, will be effective only upon written notice and only after expiration of 60 days after a copy of such written notice is received by the insured. Cancellation for non-payment of premium or misrepresentation by the insured will be effective only upon written notice and only after expiration of a minimum of 10 days after a copy of such written notice is received by the insured.
- (e) The insurance covers claims otherwise covered by the policy that are reported to the Insurer within six months of the effective date of cancellation or non-renewal of the policy except where the new or renewed policy has the same retroactive date or a retroactive date earlier than that of the prior policy, and which arise out of any covered occurrence that commenced after the policy retroactive date, if applicable, and prior to such policy renewal or termination date. Claims reported during such extended reporting period are subject to the terms, conditions limits, including limits of liability and exclusions of the policy.

I hereby certify that the wording of the instrument is identical to the wording in 40 CFR 280.97(b)(2) and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more states.

Re: Financial Responsibility  
40 CFR Part 280, Subpart H

To Agencies Listed on the Attached Exhibit A:

I am enclosing information relating to Tosco Corporation's requirement to provide financial responsibility for the ownership and operation of underground storage tanks by its operating entities pursuant to 40 CFR Part 280, Subpart H and similar state regulations. Tosco Corporation meets the financial test of self-insurance set forth under 40 CFR § 280.95. It is intended that this financial responsibility likewise satisfy the requirements of authorized state programs.

Tosco provides this financial responsibility for all underground storage tanks at retail locations, terminals and bulk plants which are owned and/or operated by all Tosco entities including Circle K Stores Inc., Tosco Operating Company, Inc., Tosco Refining L.P., Bayway Refining Company, Tosco Terminal Corporation and Tosco Corporation. For your information, Tosco's retail operations are collectively referred to as "Tosco Marketing Company".

The information enclosed consists of a Certification of Financial Responsibility, a letter from Tosco's Chief Financial Officer in the form prescribed by the federal regulations and a facility address list for your state or region.

Please forward this information to the appropriate person in your agency. You may direct any questions to me at (602) 728-7470.

Underground Storage Tank (UST) Financial Responsibility

Letter from Chief Financial Officer

I am the chief financial officer of Tosco Corporation, 1500 Putnam Avenue, Old Greenwich, CT 06870. This letter is in support of the use of the financial test of self-insurance to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1,000,000 per occurrence and \$2,000,000 annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator:

(See Attached Listings)

A financial test is also used by this owner or operator to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR parts 271 and 145:

	Amount
EPA Regulations:	
Closure (§§ 264.143 and 265.143)	\$ None
Post-Closure Care (§§ 264.145 and 265.145)	\$ None
Liability Coverage (§§ 264.147 and 265.147)	\$ None
Corrective Action (§§ 264.101(b))	\$ None
Plugging and Abandonment (§ 144.63)	\$ None
Authorized state programs:	
Closure	\$ 28,509,000
Post-Closure Care	\$ 17,138,000
Liability Coverage	\$ 49,000,000
Corrective Action	\$ 5,997,000
Plugging and Abandonment	\$ None
Total	\$ 100,644,000

This owner or operator has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statements for the latest completed fiscal year.

**Alternative II**

1.	Amount of annual UST aggregate coverage being assured by a financial test, and/or guarantee	\$	2,000,000	
2.	Amount of corrective action, closure and post-closure care costs, liability coverage, and plugging and abandonment costs covered by a financial test, and/or guarantee	\$	100,644,000	
3.	Sum of lines 1 and 2	\$	102,644,000	
4.	Total tangible assets	\$	8,407,200,000	
5.	Total liabilities	\$	6,394,100,000	
6.	Tangible net worth	\$	2,013,100,000	
				<b>Yes          No</b>
7.	Total assets in the U.S. (required only if less than 90 percent of assets are located in the U.S.)	\$	N/A	
8.	Is line 6 at least \$10 million?		<u>  X  </u>	<u>      </u>
9.	Is line 6 at least 6 times line 3?		<u>  X  </u>	<u>      </u>
10.	Are at least 90 percent of assets located in the U.S.?		<u>      </u>	<u>  X  </u>
11.	Is line 7 at least 6 times line 3?		<u>  N/A  </u>	<u>      </u>
16.	Current bond rating of most recent bond issue		Baa2	BBB
17.	Name of rating service		Moody's Investor Service	Standard & Poors
18.	Date of maturity of bond		January 1, 2047	

		Yes	No
19.	Have financial statements for the latest fiscal year been filed with the:		
	SEC	<u>  X  </u>	<u>      </u>
	Energy Information Administration	<u>      </u>	<u>  X  </u>
	Rural Electrification Administration	<u>      </u>	<u>  X  </u>

I hereby certify that the wording of this letter is identical to the wording specified in 40 CFR part 280.95(d) and/or WAC 173-380-470 as such regulations were constituted on the date shown immediately below.

To Agencies Listed on the Attached Exhibit A:

I am enclosing information relating to Tosco Corporation's requirement to provide financial responsibility for the ownership and operation of underground storage tanks by its operating entities pursuant to 40 CFR Part 280, Subpart H and similar state regulations. Tosco Corporation meets the financial test of self-insurance set forth under 40 CFR § 280.95. It is intended that this financial responsibility likewise satisfy the requirements of authorized state programs.

Tosco provides this financial responsibility for all underground storage tanks at retail locations, terminals and bulk plants which are owned and/or operated by all Tosco entities including Circle K Stores Inc., Tosco Operating Company, Inc., Tosco Refining, L.P., Bayway Refining Company, Tosco Terminal Corporation and Tosco Corporation. For your information, Tosco's retail operations are collectively referred to as "Tosco Marketing Company".

The information enclosed consists of a Certification of Financial Responsibility and a Letter from Tosco's Chief Financial Officer in the form prescribed by the federal regulations. Pursuant to EPA guidance, tank lists are not included. Information about where current tank lists are maintained is included as an exhibit to the CFO letter.

Please forward this information to the appropriate person in your agency. You may direct any questions to me at (602) 728-6919.

Very truly yours,

Underground Storage Tank (UST) Financial Responsibility

Letter from Chief Financial Officer

I am the Chief Financial Officer of Tosco Corporation, 72 Cummings Point Road, Stamford, Connecticut 06902. This letter is in support of the use of the financial test of self-insurance to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1,000,000 per occurrence and \$2,000,000 annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator:

(See Attached Listings)

A financial test is also used by this owner or operator to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR Parts 271 and 145:

	<u>Amount</u>
<b>EPA Regulations:</b>	
Closure (264.143 and 265.143)	\$ None
Post Closure Care (264.145 and 265.145)	\$ None
Liability Coverage (264.147 and 265.147)	\$ None
Corrective Action (264.101 (b))	\$ None
Plugging and Abandonment (144.83)	\$ None
<b>Authorized state programs:</b>	
Closure	\$ 21,652,000
Post Closure Care	\$ 9,654,000
Liability Coverage	\$ 40,000,000
Corrective Action	\$ 5,877,000
Plugging and Abandonment	\$ None

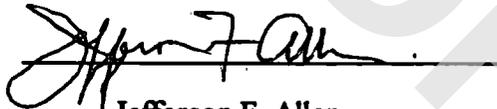

This owner or operator has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statement for the latest completed fiscal year.

**ALTERNATIVE II**

1. Amount of annual UST aggregate coverage being assured by a financial test and/or guarantee:			
			\$ 2,000,000
2. Amount of corrective actions closure and post-closure care costs, liability coverage, and plugging and abandonment costs covered by a financial test, and/or guarantee			\$ 77,183,000
3. Sum of lines 1 and 2			\$ 79,183,000
4. Total tangible assets			\$ 5,629,997,000
5. Total liabilities			\$ 4,103,952,000
6. Tangible net worth			\$ 1,526,045,000
		Yes / No	
7. Total assets in the United States (required only if less than 90 percent of firm's assets are located in the United States)			\$ N/A
8. Is line 6 at least \$10 million?		<u>X</u> _____	
9. Is line 6 at least 6 times line 3?		<u>X</u> _____	
10. Are at least 90% of the firms' assets located in the U.S.? If not, complete line 11		<u>X</u> _____	
11. Is line 7 at least 6 times line 1?			N/A
12. Current bond rating of most recent issuance of this firm and name of rating service.	Baa2 Moody's Investors Service	BBB Standard & Poors	
13. Date of issuance of bond	January 14, 1997		
14. Date of maturity of bond	January 1, 2047		

15. Have financial statements for the latest fiscal year been filed with the Securities and Exchange Commission? ..... Yes
16. Have financial statements for the latest fiscal year been filed with the Energy Information Administration? ..... No
17. Have financial statements for the latest fiscal year been filed with the Rural Electrification Administration? ..... No
18. Has financial information been provided to Dun and Bradstreet, and has Dun and Bradstreet provided a financial strength rating of 4A or 5A? ..... Yes

I hereby certify that the wording of this letter is identical to the wording specified in 40 CFR Part 280.95[d] and/or WAC 173-380-470 as such regulations were constituted on the date shown immediately below.

Underground Storage Tank (UST) Financial Responsibility

Letter from Chief Financial Officer

I am the Chief Financial Officer of Tosco Corporation, 72 Cummings Point Road, Stamford, Connecticut 06902. This letter is in support of the use of the financial test of self-insurance to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1,000,000 per occurrence and \$2,000,000 annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator:

(See Attached Listings)

A financial test is also used by this owner or operator to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR Parts 271 and 145:

	<u>Amount</u>
EPA Regulations:	
Closure (264.143 and 265.143)	\$ None
Post Closure Care (264.145 and 265.145)	\$ None
Liability Coverage (264.147 and 265.147)	\$ None
Corrective Action (264.101 (b))	\$ None
Plugging and Abandonment (144.83)	\$ None
Authorized state programs:	
Closure	\$ 23,463,000
Post Closure Care	\$ 9,473,000
Liability Coverage	\$ 48,000,000
Corrective Action	\$ 5,777,000
Plugging and Abandonment	\$ None

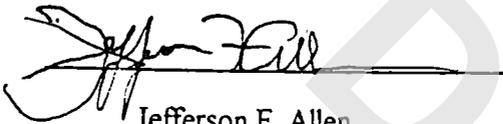

This owner or operator has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statement for the latest completed fiscal year.

RE: Annual Certification of Financial Responsibility

Dear Regulatory Agency:

In order to remain in compliance with State and Federal regulations, we hereby submit the following annual documents:

1. Letter from the Chief Financial Officer to Demonstrate Financial Responsibility for Owners and Operators of Underground Storage Tanks.
2. Corporate Guarantee Statement.
3. Certification of Financial Responsibility for the State of California, State Water Resources Control Board.

We have also enclosed a database printout of the UNOCAL facilities within your jurisdiction, for which these documents apply.

If you have any questions, or need additional information, please feel free to contact me at (714) 428-6558.

Sincerely,

Thomas J. DuMont

RE: LETTER FROM CHIEF  
FINANCIAL OFFICER TO  
DEMONSTRATE FEDERAL  
FINANCIAL RESPONSIBILITY  
FOR OWNERS AND OPERATORS  
OF UNDERGROUND STORAGE TANKS

Dear Regional Administrator:

I am the Chief Financial Officer of Unocal Corporation, 2141 Rosecrans Ave., Suite 4000, El Segundo, California 90245. This letter is in support of the use of the financial test of self-insurance and guarantee to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1 million per occurrence and \$2 million annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator and guarantor:

(See Attachment A)

A financial test and guarantee is also used by this owner or operator and guarantor to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR Parts 271 and 145:

Closure	\$	29,771,000
Post-Closure Care		4,077,000
Liability Coverage		8,000,000
Corrective Action		14,392,000
Plugging and Abandonment		14,660,000
Total	\$	<u>70,900,000</u>

This owner or operator and guarantor has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statements for the latest completed fiscal year.

Alternative II

1.	Amount of annual UST aggregate coverage being assured by a financial test, and/or guarantee	\$	2,000,000
2.	Amount of corrective action, closure and post-closure care costs, liability coverage, and plugging and abandonment costs covered by a financial test, and/or guarantee	\$	<u>70,900,000</u>
3.	Sum of lines 1 and 2	\$	72,900,000
4.	Total tangible assets	\$	9,872,000,000
5.	Total liabilities (if any of the amount reported on line 3 is included in total liabilities, you may deduct that amount from this line and add that amount to line 6)	\$	<u>6,961,000,000</u>
6.	Tangible net worth (subtract line 5 from line 4)	\$	2,911,000,000
7.	Total assets in the U.S. (required only if less than 90 percent of assets are located in the U.S.)	\$	7,963,000,000
8.	Is line 6 at least \$10 million?		YES
9.	Is line 6 at least 6 times line 3?		YES
10.	Are at least 90 percent of assets located in the U.S.? (If "No", complete line 11.)		NO
11.	Is line 7 at least 6 times line 3? (Fill in either lines 12-15 or lines 16-18)		YES
12.	Current assets	\$	
13.	Current liabilities	\$	
14.	Net working capital (subtract line 13 from line 12)	\$	
15.	Is line 14 at least 6 times line 3?		
16.	Current bond rating of most recent bond issuance		BBB
17.	Name of rating service		Standard & Poors
18.	Date of maturity of bond		February 1, 2004

19. Have financial statements for the latest fiscal year been filed with the SEC, the Energy Information Administration, or the Rural Electrification Administration?

YES

I hereby certify that the wording of this letter is identical to the wording specified in 40 CFR Part 280.95(d) as such regulations were constituted on the date shown immediately below.

RE: CORPORATE GUARANTEE STATEMENT

Dear Regional Administrator:

Guarantee made this April 30, 1996, by Unocal Corporation, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to Environmental Protection Agency and to any and all third parties, and obligees, on behalf of Union Oil Company of California, Molycorp, Inc., Poco Graphite, Inc., Automatic Heat Company, Pacific Coast Hemphill Oil Company, and Hemphill Oil Company of 2141 Rosecrans Ave., Suite 4000, El Segundo, California 90245 (herein referred to as "the Subsidiaries").

Recitals

- (1) Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95(b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
- (2) The Subsidiaries own or operate the following underground storage tank(s) covered by this guarantee:

(See Attachment A)

This guarantee satisfies 40 CFR Part 280, Subpart H requirements for assuring funding for taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tank(s) in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

- (3) On behalf of the Subsidiaries, guarantor guarantees to Environmental Protection Agency and to any and all third parties that:

In the event that the Subsidiaries fail to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the EPA Regional Administrator has determined or suspects that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the EPA Regional Administrator, shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the EPA Regional Administrator determines that the Subsidiaries have failed to perform corrective action for releases arising out of the operation of the above-identified tank(s) in accordance with 40 CFR Part 280, Subpart F, the guarantor upon written instructions from the EPA Regional Administrator shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If the Subsidiaries fail to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties caused by sudden and nonsudden accidental releases arising from the operation of the above-identified tank(s), or fail to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the EPA Regional Administrator, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

- (4) Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95(b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to the Subsidiaries. The guarantee will terminate 120 days from the date of receipt of the notice by the Subsidiaries, as evidenced by the return receipt.
- (5) Guarantor agrees to notify the Subsidiaries by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
- (6) Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of the Subsidiaries pursuant to 40 CFR Part 280.
- (7) Guarantor agrees to remain bound under this guarantee for so long as the Subsidiaries must comply with the applicable financial responsibility requirements of 40 CFR Part 280, Subpart H for the above-identified tank(s), except that guarantor may cancel this guarantee by sending notice by certified mail to the Subsidiaries, such cancellation to become effective no earlier than 120 days after receipt of such notice by the Subsidiaries, as evidenced by the return receipt.
- (8) The guarantor's obligation does not apply to any of the following:
  - (a) Any obligation of the Subsidiaries under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - (b) Bodily injury to an employee of the Subsidiaries arising from, and in the course of, employment by the Subsidiaries;
  - (c) Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft;

- (d) Property damage to any property owned, rented, loaded to, in the care, custody, or control of, or occupied by the Subsidiaries that is not the direct result of a release from a petroleum underground storage tank;
  - (e) Bodily damage or property damage for which the Subsidiaries are obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.
- (9) Guarantor expressly waives notice of acceptance of this guarantee by Environmental Protection Agency, by any or all third parties, or by the Subsidiaries.

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

RE: LETTER FROM CHIEF  
ACCOUNTING OFFICER TO  
DEMONSTRATE FEDERAL  
FINANCIAL RESPONSIBILITY  
FOR OWNERS AND OPERATORS  
OF UNDERGROUND STORAGE TANKS

Dear Regional Administrator:

I am the chief accounting officer of Unocal Corporation, 1201 West Fifth Street, P.O. Box 7600, Los Angeles, California 90051. This letter is in support of the use of the financial test of self-insurance and guarantee to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1 million per occurrence and \$2 million annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator and guarantor:

(See Attachment A)

A financial test and guarantee is also used by this owner or operator and guarantor to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR Parts 271 and 145:

Closure	<u>\$33,211,000</u>
Post-Closure Care	<u>\$7,704,000</u>
Liability Coverage	<u>\$8,000,000</u>
Corrective Action	<u>\$14,191,000</u>
Plugging and Abandonment	<u>\$10,850,000</u>
Total	<u>\$73,956,000</u>

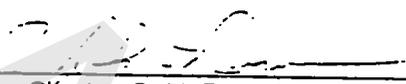

This owner or operator and guarantor has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statements for the latest completed fiscal year.

Alternative II

1.	Amount of annual UST aggregate coverage being assured by a financial test, and/or guarantee		<u>\$ 2,000,000</u>
2.	Amount of corrective action, closure and post-closure care costs, liability coverage, and plugging and abandonment costs covered by a financial test, and/or guarantee		<u>\$73,956,000</u>
3.	Sum of lines 1 and 2		<u>\$75,956,000</u>
4.	Total tangible assets		<u>\$ 9,335 million</u>
5.	Total liabilities (if any of the amount reported on line 3 is included in total liabilities, you may deduct that amount from this line and add that amount to line 6)		<u>\$ 6,522 million</u>
6.	Tangible net worth (subtract line 5 from line 4)		<u>\$ 2,813 million</u>
7.	Total assets in the U.S. (required only if less than 90 percent of assets are located in the U.S.)		<u>\$ 7,614 million</u>
		<u>YES</u>	<u>NO</u>
8.	Is line 6 at least \$1.3 million?	<u>X</u>	<u>      </u>
9.	Is line 6 at least 6 times line 3?	<u>X</u>	<u>      </u>
10.	Are at least 90 percent of assets located in the U.S. ? (If "No", complete line 11.)	<u>      </u>	<u>X</u>
11.	Is line 7 at least 6 times line 3? [Fill in either lines 12-15 or lines 16-18]	<u>X</u>	<u>      </u>
12.	Current assets		\$
13.	Current liabilities		\$
14.	Net working capital (subtract line 13 from line 12)		\$
		<u>YES</u>	<u>NO</u>
15.	Is line 14 at least 6 times line 3	<u>      </u>	<u>      </u>

16. Current bond rating of most recent bond issuance BBB

RE: CORPORATE GUARANTEE STATEMENT

Dear Regional Administrator:

Guarantee made this April 28, 1995, by Unocal Corporation, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to Environmental Protection Agency and to any and all third parties, and obligees, on behalf of Union Oil Company of California, Molycorp, Inc., Poco Graphite, Inc., Automatic Heat Company, Pacific Coast Hemphill Oil Company, and Hemphill Oil Company of 1201 West Fifth Street, P.O. Box 7600, Los Angeles, California 90051 (herein referred to as "the Subsidiaries").

Recitals

- (1) Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95(b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
- (2) The Subsidiaries own or operate the following underground storage tank(s) covered by this guarantee:

(See Attachment A)

This guarantee satisfies 40 CFR Part 280, Subpart H requirements for assuring funding for taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tank(s) in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

- (3) On behalf of the Subsidiaries, guarantor guarantees to Environmental Protection Agency and to any and all third parties that:

In the event that the Subsidiaries fail to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the EPA Regional Administrator has determined or suspects that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the EPA Regional Administrator, shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the EPA Regional Administrator determines that the Subsidiaries have failed to perform corrective action for releases arising out of the operation of the above-identified tank(s) in accordance with 40 CFR Part 280, Subpart F, the guarantor upon written instructions from the EPA Regional Administrator shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If the Subsidiaries fail to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties caused by sudden and nonsudden accidental releases arising from the operation of the above-identified tank(s), or fail to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the EPA Regional Administrator, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

- (4) Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95(b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to the Subsidiaries. The guarantee will terminate 120 days from the date of receipt of the notice by the Subsidiaries, as evidenced by the return receipt.
- (5) Guarantor agrees to notify the Subsidiaries by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
- (6) Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of the Subsidiaries pursuant to 40 CFR Part 280.
- (7) Guarantor agrees to remain bound under this guarantee for so long as the Subsidiaries must comply with the applicable financial responsibility requirements of 40 CFR Part 280, Subpart H for the above-identified tank(s), except that guarantor may cancel this guarantee by sending notice by certified mail to the Subsidiaries, such cancellation to become effective no earlier than 120 days after receipt of such notice by the Subsidiaries, as evidenced by the return receipt.
- (8) The guarantor's obligation does not apply to any of the following:
  - (a) Any obligation of the Subsidiaries under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - (b) Bodily injury to an employee of the Subsidiaries arising from, and in the course of, employment by the Subsidiaries;
  - (c) Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft;

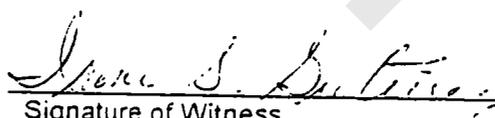

- (d) Property damage to any property owned, rented, loaded to, in the care, custody, or control of, or occupied by the Subsidiaries that is not the direct result of a release from a petroleum underground storage tank;
  - (e) Bodily damage or property damage for which the Subsidiaries are obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.
- (9) Guarantor expressly waives notice of acceptance of this guarantee by Environmental Protection Agency, by any or all third parties, or by the Subsidiaries

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

Effective date: April 28, 1995

RE: LETTER FROM CHIEF  
FINANCIAL OFFICER TO  
DEMONSTRATE FEDERAL  
FINANCIAL RESPONSIBILITY  
FOR OWNERS AND OPERATORS  
OF UNDERGROUND STORAGE TANKS

Dear Regional Administrator:

I am the chief financial officer of Unocal Corporation, 1201 West Fifth Street, P.O. Box 7600, Los Angeles, California 90051. This letter is in support of the use of the financial test of self-insurance and guarantee to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by sudden accidental releases and nonsudden accidental releases in the amount of at least \$1 million per occurrence and \$2 million annual aggregate arising from operating underground storage tanks.

Underground storage tanks at the following facilities are assured by this financial test or a financial test under an authorized State program by this owner or operator and guarantor:

(See Attachment A)

A financial test and guarantee is also used by this owner or operator and guarantor to demonstrate evidence of financial responsibility in the following amounts under other EPA regulations or state programs authorized by EPA under 40 CFR Parts 271 and 145:

Closure	\$27,208,000
Post-Closure Care	\$ 6,963,000
Liability Coverage	\$ 8,000,000
Corrective Action	\$ 7,055,000
Plugging and Abandonment	\$15,264,000
Total	\$64,490,000

This owner or operator and guarantor has not received an adverse opinion, a disclaimer of opinion, or a "going concern" qualification from an independent auditor on his financial statements for the latest completed fiscal year.

Alternative II

9:00 AM. An UST construction inspection was performed. Line pressure test could not be performed because of leaks & will be rescheduled. The start of a hydrostatic test was observed on 7 dispensers, 2 turbine sumps, & 2 fill sumps. All containment areas were filled w/ & marked with paint. Tests to be completed on a follow-up inspection. Contact our office to re-schedule your next inspection.

Mike, 1/4/02  
 They couldn't TEST the piping on Friday because of leaks. I started the hydrostatic tests on Friday for 7 <sup>dispenser</sup> sumps, 2 turbine sumps, & 2 fill sumps. The dispenser sumps are marked orange & the other 4 are marked white. Sorry I couldn't have been more help.  
 This affect you on Monday. Rich

→ UST Upgrade Inspection

→ Tested primary product piping. Charged to 52 psi & held for 1 hr. while all joints/connections were soaped. Visually inspected all joints for leaks. None were observed. No drop in pressure.

→ Vapor recovery lines were charged to 5 psi & soaped. No leaks were observed. No drop in pressure.

→ Observed "bleed-off" of primary product lines at end of inspection.

→ All tests performed today passed.

-7 Note: Piping used is Ameron, not Smith Fiberglas Red Thread, as stated on the approved equipment list. I will contact Tait & Associates for certification & how to change the approved equipment list.

**Re: Plan Check Review – Union Station #256115 at 4350 El Camino Real, Los Altos.**

Ms. Weaver:

Upon review of your submittal regarding upgrading of the underground storage tank piping at the above facility, the Santa Clara County Hazardous Materials Compliance Division (HMCD) approves your plans with the following conditions:

1. Systems shall be configured as described in the enclosed approved plans and Hazardous Materials Storage Tank System Installation Equipment List.
2. Contact HMCD a minimum of 48 hours in advance to schedule the following inspections:
  - Pressure testing of tank primary containment;
  - Pressure testing of tank secondary containment;
  - Pressure testing of primary piping;
  - Pressure testing of secondary piping;
  - Lake testing of sump(s), spill containment, and dispenser containment (as applicable);
  - Complete functional test of monitoring equipment.
3. The following conditions shall also be met for final approval:
  - a) Plans shall be approved by the City of Los Altos and Santa Clara County Fire Department.
  - b) Our Department must be present to direct and witness the sampling activities for the removal of the current piping. Please give at least 48 hours notice to schedule the sampling. Please refer to the enclosed underground storage tank closure guidelines for additional information.

**Any substitution of equipment or reconfiguration of systems as described in approved plans requires prior approval from this Department.**

Be advised that plan approval by the Fire Marshal and/or Building Department may also be required prior to beginning work. One set of approved plans shall remain on the job site until final inspection.

Should you have any questions, contact the undersigned inspector at (408) 299-6930.

## HAZARDOUS MATERIALS STORAGE TANK SYSTEM INSTALLATION EQUIPMENT LIST

*For Use Within the Cities of Los Altos, Los Altos Hills, Monte Sereno, Saratoga, and in Unincorporated Areas of Santa Clara County*

### I. General Information

This document shall be completed and submitted to the Hazardous Materials Compliance Division along with the project plans, equipment cut sheets, and - in the case of UST installations/upgrades - completed Underground Storage Tank System Installation Supplement.

**II. Project Information** This document covers the:  Installation of  Aboveground Tank(s)  
 Upgrading  X Underground Tank(s)

Provide the following information:

Facility Name (Tank Site): TOSCO UNION STATION # 256115 Bldg. No.: 6115  
 Address: 4350 El Camino Blvd City: Los Altos Zip: 94022  
 Project Contact Name: Becky Weaver Phone No.: (916) 669-1817 ext. \_\_\_\_\_  
 Plan Check No.: SR 805861-2323 Date of Plan Submittal to HMCD: 10/12/01

### III. Equipment Information

In the table below, list the manufacturer name and specific model number for each type of equipment listed in the second column. If an item is not applicable to this project, check the "N/A" box in the "Name of Equipment Manufacturer" column. Brochures and/or manufacturers' cut sheets for all equipment listed shall be submitted as attachments to the plans.

*Note: Shaded areas are for agency use only.*

**RE: COMPLIANCE SOIL SAMPLING ASSOCIATED WITH FIBRE-TRENCH,  
PRODUCT LINE, AND DISPENSER REMOVAL AND REPLACEMENT ACTIVITIES,  
TOSCO SERVICE STATION NO. 6115, 4350 EL CAMINO REAL, LOS ALTOS,  
CALIFORNIA**

Reviewed By [Signature]

Date 03/20/02

Dear Mr. Balliet:

SECOR International Incorporated (SECOR) has prepared this letter on behalf of TOSCO Corporation (TOSCO), a subsidiary of Phillips Petroleum Company (Phillips) to document soil sampling activities during excavation and removal of the fibre-trench, product lines, and fuel dispensers at 4350 El Camino Real, Los Altos, California (the Site).

#### **SITE BACKGROUND**

The Site is currently an active TOSCO Service Station located on the southwest corner of El Camino Real and Los Altos Avenue in Los Altos, California (Figure 1, Site Location Map). Site facilities include the Station Building, underground storage tanks (USTs), and associated piping and fuel dispensers.

In October 1990, Kaprealian Engineers Incorporated (KEI) observed the removal of three USTs. Four soil samples (A1 through A4, approximately 13.5 to 15.5 feet below ground surface (bgs)) were collected from beneath the fuel USTs, and one sample (B2, approximately 20.5 feet bgs) from beneath a waste oil UST, following over-excavation of apparently impacted soils. Soil sample B2 contained 1,900 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPHg). Soil samples were also collected from product and vent piping trenches (P1 through P11 and V1). Soil sample P11 contained TPHg at 84 ppm. TPHg was not detected at or above the laboratory method detection limits (LMDLs) in any other analyzed soil sample. Benzene was detected in soil samples P8 and P11 at concentrations of 0.028 ppm and 0.021 ppm, respectively. Total lead was detected at a maximum concentration of 16 ppm.

In March 1991, KEI installed three two-inch diameter monitoring wells (MW-1, MW-2, and MW-3; See Figure 2). The wells were completed to total depths of between 47 and 53 feet bgs. Groundwater was encountered at between 37 and 45 feet bgs. Groundwater and selected soil samples collected from these wells were analyzed for TPHg and benzene, toluene, ethylbenzene and xylenes (collectively "BTEX compounds"). Soil samples collected from wellbore MW-1 were also analyzed for total petroleum hydrocarbons as diesel (TPHd), total oil and grease (TOG) and halogenated volatile organic compounds (HVOCs). None of the analytes in soil samples were detected at or above LMDLs in the analyzed soil samples, except for methylene chloride at 0.011 ppm in soil sample MW-1 (collected at 25 feet bgs). Analytical results from groundwater collected during this investigation revealed concentrations of TPHg at 66 parts per billion (ppb) and benzene at 0.37 ppb in the groundwater sample collected from well MW-1.

No petroleum hydrocarbons were detected at or above LMDLs in groundwater samples collected from wells MW-2 and MW-3.

In January 1992, KEI installed one additional two-inch monitoring well (MW-4) through a previously installed conductor casing within the UST cavity (Figure 2). The well was completed at a depth of 50 feet bgs, and groundwater was encountered at a depth of 40 feet bgs. TPHg was detected in soil samples collected from the wellbore at a maximum concentration of 290 ppm (33.5 foot sample) and xylenes were detected at a maximum concentration of 50 ppm, in the 33.5 foot sample. Analytical results from groundwater collected from well MW-4 indicated TPHg at 3,200 ppb and xylenes at 1,800 ppb.

From March 23 to April 1, 1992, K&B Environmental (K&B) operated a temporary soil vapor extraction (SVE) system at the Site using existing well MW-4. Influent air samples collected both before and after the SVE system's operation indicated that influent TPHg concentrations increased from an initial concentration of 2.3 milligrams per liter (mg/L) to 2.8 mg/L.

On April 21, 1992, KEI operated a temporary groundwater extraction (GWE) system in well MW-4. Approximately 2,200 gallons of groundwater were extracted over a period of 8.5 hours. The temporary GWE system was subsequently dismantled.

From August 12 to 21, 1992, K&B performed additional SVE using well MW-4. Influent TPHg concentrations decreased from 10.2 mg/L to 0.80 mg/L indicating a 98.7 % reduction in TPHg concentrations.

In September 1994, KEI prepared a closure summary for the Site. The report indicated that groundwater samples collected from wells MW-1 through MW-3 contained no reportable detections of TPHg or BTEX since the first quarter of 1993, at which time well MW-4 was destroyed. Subsequent to the SCVWD granting closure for the Site, the three remaining groundwater monitoring wells were destroyed in December 1996.

On April 26, 27, and 30, 2001, SECOR supervised the advancement of four soil borings (SB-1 to SB-4; See Figure 2) at the Site by Precision Sampling (Precision) to assess whether MtBE and other fuel oxygenates have impacted soil and/or groundwater in the vicinity of the USTs, product piping, or fuel dispensers. With the exception of trace concentrations of toluene and xylenes in boring SB-4, no petroleum hydrocarbons or fuel oxygenates were detected at or above LMDLs in any of the soil samples analyzed.

## **PRODUCT LINE AND DISPENSER REMOVAL ACTIVITIES**

In December 2001, the excavation and removal of the product lines and trench lines, and dispensers was performed by Paradiso Construction. Excavation and sampling activities were observed and approved by Mr. Michael Balliet of the County of Santa Clara Department of Environmental Health (CSCDEH). Water was not encountered within the excavations during SECOR's sampling and oversight activities, however, pooling of water from recent rainfall did occur but was not sampled.

### **Soil Sampling - Product Lines and Dispensers**

On December 17, 2001, SECOR personnel collected a total of 13 soil samples from the area around the product lines, dispensers, and USTs (Figure 2, Site Plan with Sample Locations).

Soil samples were collected from dispenser locations designated as D-1 through D-8. Soil samples were collected from product line locations designated as L-1 through L-5. Product line and dispenser samples were collected from depths of approximately 3 to 4 feet bgs. Soil samples were submitted to Sequoia Analytical Services (Sequoia) for analysis of TPHg using EPA Method 8015 Modified, BTEX and MtBE by EPA Method 8021B, and fuel oxygenates tertiary butyl alcohol (TBA), MtBE, diisopropyl ether (DIPE), ethyl tertiary butyl ether (EtBE), and tertiary amyl methyl ether (TAME) by EPA Method 8260.

### **Soil Sampling Analytical Results**

None of the analyzed soil samples yielded TPHg, BTEX compounds, MtBE, or 7 analyzed fuel oxygenates at or above their respective LMDLs.

Laboratory analytical results of soil samples are presented in Table 1 and soil sample locations are shown on Figure 2. Field and laboratory procedures are presented as Attachment A. Certified analytical reports and chain-of-custody documentation are presented as Attachment B.

### **SUMMARY OF FINDINGS**

- SECOR collected a total of 13 soil samples for analysis from selected locations at the product line fiber-trenches and dispenser locations as directed by Mr. Michael Balliet of the County of Santa Clara
- None of the analyzed soil samples yielded TPHg, BTEX compounds, MtBE, or 7 analyzed fuel oxygenates at or above their respective LMDLs.

### **CONCLUSION**

Data collected during this investigation indicates concentrations of petroleum hydrocarbons are below LMDLs in compliance soil samples collected from the area of fibre-trench, product lines and dispensers. Based on the low residual hydrocarbon concentrations in the soil, an additional investigation with respect to this phase of work is not warranted. SECOR recommends that no further action be required of TOSCO with respect to further Site assessment or remediation.

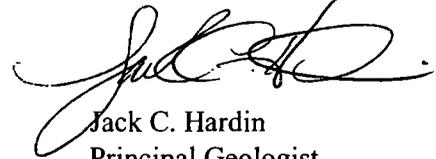

We greatly appreciate the opportunity to submit this report on behalf of TOSCO and trust that this document meets with your approval. Please do not hesitate to contact us at (650) 691-0131 with any questions or comments.

Sincerely,

**SECOR International Incorporated**

**Notes:**

(1) all concentrations are in parts per million (milligrams per kilogram)

**Abbreviations:**

ft bgs = feet below ground surface

TPHg = Total petroleum hydrocarbons as gasoline

MtBE = Methyl tertiary butyl ether

TAME = Tertiary amyl methyl ether

EtBE = Ethyl tertiary butyl ether

DIPE = Di-isopropyl ether

TBA = Tertiary butyl alcohol

1,2-DBA= 1,2-Dibromoethane

1,2-DCA=Dichloroethane

<1.00 defined as not detected above specified laboratory reporting limit

**ATTACHMENT A  
FIELD AND LABORATORY PROCEDURES**

**Soil Sampling**

Soil samples were collected by advancing 2-inch-diameter brass sample liners into undisturbed soil. Soil samples for chemical analysis were retained in the brass liners, labeled, and capped with Teflon sheets and plastic end caps. The samples were then sealed in zip-lock bags, placed on ice, and transported to the laboratory accompanied by the appropriate chain-of-custody documentation.

**Laboratory Analysis of Soil Samples**

Analysis for TPHg was performed by using Method 8015 Modified. BTEX compounds and MtBE were performed by EPA Method 8021B. Fuel oxygenates were performed by EPA Method 8260. Analysis for cadmium, chromium, nickel, lead, and zinc were done by EPA 6000/7000 Series Methods.

RE: Tosco DC  
Sequoia Report: L112109

Enclosed are the results of analyses for samples received by the laboratory on 12/17/01 16:45. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Samples 1-8

### Notes and Definitions

- QM-07 The spike recovery was outside control limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference

RE: Union 76 Station, 4350 El Camino Real, Los Altos, CA, SS#256115

Dear Mr. Balliet,

I am writing to address the issue, which was brought up by your agency for the above mentioned. The approved set of construction drawing site include the installation of "under dispenser sensors". At this time, Tosco Marketing Company would like to exclude said under dispenser sensors.

By this exclusion, Tosco is aware that annual testing will be required at this site. In the event that under dispenser sensors will be required at a later date, Tosco is prepared for the additional monitoring upgrade through installation of spare conduit runs to the dispensers.

If you have any question, feel free to contact me at 253.905.3734. Thank you for your time in this matter.

Sincerely,

Tom Noble  
Contract Project Engineer

Dear Mike:

Enclosed are plan check comment responses per your e-mail dated November 19, 2001.

1. The tanks are Modern Welding with 43" collars. Western Fiberglass will fiberglass the pipe sump to the collar.
2. Current Worker's Compensation for Paradiso Mechanical provided.
3. The fiber trench will be removed.
4. Dispenser shear valves are OPW # OP10BHMP-830, listed on sheet 3DWF6, line item 12. Specification sheets enclosed.
5. No flex connectors are used. Item re-labeled as secondary piping containment fittings.
6. The Bravo 8000 Series under pan dispenser is fiberglass material. Third party certification is enclosed.
7. Phil-Tite information to be faxed to your attention from Phil-Tite.

We would like to expedite this application, so please let me know if any further fees are incurred. Thank you for your assistance.

**Tosco Facility #6115  
4350 El Camino Road  
Los Altos, CA**

## DESCRIPTION OF WORK TO BE COMPLETED

- Replace the existing piping system. This includes updating the:
  - Primary Product Piping
  - Vapor Recovery Piping
  - Flex Boots
  - Piping Sump Leak Detection Sensors
  - Dispenser Pan Leak Detection Sensors
  - Dispenser Secondary Containment Pans/Sumps
- Compliance with Executive Order VR-101-A, including installation of
  - Phil-Tite Containment Boxes
  - Phil-Tite Vapor Recovery Adapters
  - OPW Ball Float Valve & Drop Tube
  - Overfill Alarm
  - Husky Vent Cap
- Existing dispensers to remain

RE: UNOCAL SERVICE STATION #6115  
4350 El Camino Real  
Los Altos, California

Dear Ms. Jacaby,

Gettler-Ryan Inc., on behalf of UNOCAL Corporation, requests approval to replace the existing dispensers at the above referenced site.

As noted on the enclosed plans, the existing single product dispensers are to be replaced with multi-product dispensers.

This is a "bolt on" type replacement and with the exception of a partial island removal involves no underground piping modifications.

If you have any questions or comments concerning this project, please call.

Sincerely,

A handwritten signature in black ink that reads 'Barry E. McCoy'. The signature is written in a cursive style with a large, sweeping 'B' and 'M'.

UNOCAL #6115, 4350 El Camino Real, Los Altos  
UNOCAL #6859, 12015 Saratoga-Sunnyvale Road, Los Altos

Plans for the above locations have been approved with the following conditions.

1. New piping runs will not exceed 10 feet, as specified in plans.
2. Upon completion of the piping installation, the system is to be tested to confirm tightness.
3. Contact the Toxics Control Unit 48 hours prior to system testing and for final inspection.
4. Any modifications to the plans must be made in writing to this department prior to beginning work.
5. Plans must be submitted to local building departments for their review.

If you have any questions or require further information, contact the undersigned at (408) 299-6930.

Sincerely,

Dear Sir,

Attached is the SB989 secondary testing results and summary report for:

Tosco S/S #25-6115  
4350 El Camino Real  
Los Altos, CA 94022

We have sent this report to you at the request of Tosco Marketing Company. Should you have any questions regarding the report you may reach me directly at (916) 373-1152.

Sincerely,

WALTON ENGINEERING, INC.

# SECONDARY PIPE TESTING

**Test Method By:**     Manufacturer     **Industry Standard**     Professional Engr.     Other (see below)

**Test Method Uses:**     **Pressure**     Vacuum     Hydrostatic     Other (see below)

**Measuring Equipment Used:** **Pressure Gauge** (range 0 to 10 psig)

Description	Piping Run #1	Piping Run #2
Pipe Manufacturer	Ameron	Ameron
Pipe Type	FRP	FRP
Primary Pipe Diameter (inches)	2"	2"
Secondary Pipe Diameter (inches)	3"	3"
Product Stored	Gasoline - 87	Gasoline - 91
Method of secondary pipe isolation	Termination Boot	Termination Boot
Location of secondary pipe isolation	Sump	Sump
Estimated length of piping run (feet) (include length of branch runs)	260'	260'
Wait time for pressure to stabilize (hr:min)	0:15	0:19
Test start time	10:13 AM	10:14 AM
Initial pressure (psig)	3	3
Test end time	11:13 AM	11:14 AM
Final pressure (psig)	3	3
Test duration (hours:minutes)	1:00	1:00
Change in pressure (psig)	0	0
Pass/Fail threshold (psig)	0	0
<b>TEST RESULT</b>	<b>PASS</b>	<b>PASS</b>

**Comments:**

Note: Tested both secondary lines at 3 psi on direction from owners representative.

# PIPING SUMP CONTAINMENT TESTING

**Test Method By:**  Manufacturer  **Industry Standard**  Professional Engr.  Other (see below)

**Test Method Uses:**  Pressure  Vacuum  **Hydrostatic**  Other (see below)

**Measuring Equipment Used:** Level Change Indicator (Caldwell System 2001 / Walton Engineering)

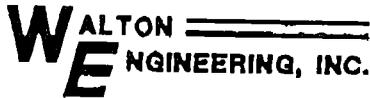

Description	Tank #1	Tank #2
Sump Material	FRP	FRP
Sump Diameter (inches)	42"	42"
Sump Depth (inches)	56"	60"
Product Stored	Gasoline - 87	Gasoline - 91
Height from tank top to highest piping penetration	15"	16"
Height from tank top to lowest electrical penetration	17"	20"
Condition of sump prior to testing	Dry	Wet
Portion of sump tested	Entire	Entire
Is system programed for fail-safe operation?	Yes	Yes
Was fail-safe verified to be operational?	No	No
Was sensor removed for testing?	Yes	Yes
Was sensor properly replaced after testing?	Yes	Yes
Wait time for water level to stabilize (hr:min)	0:09	0:13
Depth of water level from tank top (inches)	18"	19"
Test start time	10:20 AM	10:21 AM
Test end time	10:50 AM	10:51 AM
Test duration (hr:min)	0:30	0:30
Change in water level ( $\pm$ 0.000 inches)	0.000	0.000
Pass/Fail threshold (0.005 inches / ½ Hr.)	0.005	0.005
<b>TEST RESULT</b>	<b>PASS</b>	<b>PASS</b>

**Comments:**

Note: Tightened loose nuts on penetration fittings in sumps for both tanks.

**Certified By:**

**Technician:** Central Petroleum

**State Lic. #s:**

**Mfgr's #:**

**Comments:**

Manual entry Monitor Certification. Test conducted by Central Petroleum Maintenance technician Eric Schell.

This precision tank testing system has been third party evaluated according to the guidelines of the EPA procedures for annual leak detection systems and found to exceed the criteria of detecting a leak of 0.10 gph with a Pd >95% and Pfa <5% as required by Local, State and Federal EPA UST Technical Standards Part 280 for precision testing systems. This SB-989 secondary containment testing system exceeds the criteria for detection as required by state and local agencies.

Central Petroleum

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Monitoring System Certification

F. In-Tank Gauging / SIR Equipment:

- Check this box if tank gauging is used only for inventory control.
- Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system product level readings tested?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system water level readings tested?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. Line Leak Detectors (LLD):

- Check this box if LLDs are not installed.

Complete the following checklist:

<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input type="checkbox"/> 3 g.p.h.; <input type="checkbox"/> 0.1 g.p.h; <input type="checkbox"/> 0.2 g.p.h.
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**INSTALLATION AND INTRINSIC SAFETY CHECKLIST**

- TLS Monitor is installed indoors in an accessible location.
- TLS Monitor has 12 gauge wire from barrier to earth ground in the power panel.
- Power wires are installed in conduit.
- TLS Monitor has a chassis ground connected.
- Conduits enter TLS Monitor only through formed knock-outs.
- Monitor to probe wiring runs do not exceed 1000 ft.
- Monitor to sensor wiring runs do not exceed 1000 ft.
- Sensor and probe wiring is 14-18 gauge oil and gas resistant wire.
- Sensor and probe wiring is installed in rigid dedicated conduit.
- Sensor and probe wiring is installed in rigid metal conduit.
- Sealoffs are installed between building and tanks on probe and sensor conduits.
- Probe and sensor wiring connections in tank area are installed in suitable weatherproof junction boxes.
- All outdoor wiring connections for probes and sensors are sealed with epoxy sealing kits.

Monitor Software Version and Revision Level 15.01

# MONITORING SYSTEM CERTIFICATION

*For Use By All Jurisdictions Within the State of California*

*Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations*

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date. Instructions are printed on the back of this page.

Comments: \_\_\_\_\_

I certify that the equipment identified above was inspected/serviced in accordance with manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturer's checklists, etc.) necessary to verify that the above information is correct and to describe any repairs, replacement, or recalibration of equipment.

**State Lic. #s:**

**Comments:**

Compliance L/D & monitor certification

This precision tank testing system has been third party evaluated according to the guidelines of the EPA procedures for annual leak detection systems and found to exceed the criteria of detecting a leak of 0.10 gph with a Pd >95% and Pfa <5% as required by Local, State and Federal EPA UST Technical Standards Part 280 for precision testing systems. This SB-989 secondary containment testing system exceeds the criteria for detection as required by state and local agencies.

# MONITORING SYSTEM CERTIFICATION

*For Use By All Jurisdictions Within the State of California*

*Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations*

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date. Instructions are printed on the back of this page.

Model: _____ <input type="checkbox"/> Shear Valve(s). <input type="checkbox"/> Dispenser Containment Float(s) and Chain(s). <input type="checkbox"/> Other (specify equipment type and model in Section E on Page 2).

**C. Certification** - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (check all that apply):

- System set-up report;
- Alarm history report.

Technician Name (print): M. SWEATT Cert./Lic. No.: \_\_\_\_\_ Signature: Michael P. Sweatt  
 Testing Company Name: TEI Phone No.: (818) 840-7020

**Monitoring System Certification**

Site Address: # 31094

Date of Testing/Serviceing: 4/26/00

**F. In-Tank Gauging / SIR Equipment:**

- Check this box if tank gauging is used only for inventory control.
- Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system product level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system water level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**G. Line Leak Detectors (LLD):**

- Check this box if LLDs are not installed.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input checked="" type="checkbox"/> 3 g.p.h. <sup>1</sup> ; <input type="checkbox"/> 0.1 g.p.h. <sup>2</sup> ; <input type="checkbox"/> 0.2 g.p.h. <sup>2</sup> Notes: 1. Required for equipment start-up certification and annual certification. 2. Unless mandated by local agency, certification required only for electronic LLD start-up.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

# MONITORING SYSTEM EQUIPMENT CERTIFICATION

For Use By All Jurisdictions Within the County of Santa Clara  
Authority Cited: Title 23, Division 3, Chapter 16 California Code of Regulations;  
Hazardous Materials Storage Ordinance

State and local laws/regulations require that equipment which monitors tanks and/or piping systems containing hazardous materials be tested/serviced annually or on a schedule specified by the manufacturer, whichever is more frequent. This form, or a service report with equivalent information, must be used to document testing and servicing of monitoring equipment. If more than one monitoring system (e.g. Veeder-Root TLS-350, Ronan X76S, etc.) is installed at the facility, a separate certification or report must be prepared for each monitoring system by the technician who performs the work.

Date of Testing/Servicing: 03/14/99 Facility Name: CINCK

Site Address: 4350 EL CAMINO REAL City: LOS ALTOS Zip: \_\_\_\_\_

Facility Contact Person: KATHY STRICKLAND Contact Phone No.: (602) 728-7149

Make/Model of Monitoring System(s): VEEDER ROOT TLS 350 Location of Control Panel(s): 57015

Make/Model of Line Leak Detector (LLD): VAPORLESS LP-2000 LLD Leak Threshold: \_\_\_\_\_ g.p.m.

### Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Monitoring system is operable per manufacturer's specifications?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Audible alarm is operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Visual alarm is operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Monitoring system is secured from unauthorized tampering?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For pressurized piping systems, do the turbines automatically shut down if the monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which monitoring devices initiate positive shut-down? <u>TURBINE SUMP SENSORS</u>
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For monitoring systems which serve as tank overfill warning devices, does the overfill warning function operate properly? If so, at what percent of tank capacity does the alarm trigger? <u>51</u> %

\* In the comments section below, describe how and when these deficiencies will be corrected.

### Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID No.: <u>82</u>	Tank ID No.: <u>92</u>	Tank ID No.: <u>N/A</u>	Tank ID No.: <u>N/A</u>
<input checked="" type="checkbox"/> Annular Space Sensor	<input checked="" type="checkbox"/> Annular Space Sensor	<input type="checkbox"/> Annular Space Sensor	<input type="checkbox"/> Annular Space Sensor
<input type="checkbox"/> Piping Sump Sensor	<input checked="" type="checkbox"/> Piping Sump Sensor	<input type="checkbox"/> Piping Sump Sensor	<input type="checkbox"/> Piping Sump Sensor
<input checked="" type="checkbox"/> In-Tank Gauging Probe	<input checked="" type="checkbox"/> In-Tank Gauging Probe	<input type="checkbox"/> In-Tank Gauging Probe	<input type="checkbox"/> In-Tank Gauging Probe
<input type="checkbox"/> Dispenser Containment Sensor(s)	<input type="checkbox"/> Dispenser Containment Sensor(s)	<input type="checkbox"/> Dispenser Containment Sensor(s)	<input type="checkbox"/> Dispenser Containment Sensor(s)
<input type="checkbox"/> Mechanical Line Leak Detector	<input checked="" type="checkbox"/> Mechanical Line Leak Detector	<input type="checkbox"/> Mechanical Line Leak Detector	<input type="checkbox"/> Mechanical Line Leak Detector
<input type="checkbox"/> Electronic Line Leak Detector	<input type="checkbox"/> Electronic Line Leak Detector	<input checked="" type="checkbox"/> Electronic Line Leak Detector	<input type="checkbox"/> Electronic Line Leak Detector

Comments: \_\_\_\_\_

I certify that the equipment identified above was inspected/serviced in accordance with manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturer's checklists, etc.) necessary to verify that the above information is correct and to describe any repairs, replacement, or recalibration of equipment.

### COMMENTS

Fuel tanks are double wall, secondary containment and contained sump pits are electronically monitored by Universal sensors and devices, Inc. Model# LA-08 tank monitoring system. Waste oil tank is double wall, secondary containment is monitored by Universal sensors & devices, Inc. Model# LA-08 tank monitoring system. MONITORING SYSTEMS ARE CERTIFIED OPERATIONAL.

Monitor LEAK-ALERT LA-08

I. Verify Intrinsic Safety

- Proper field wire termination.
- Complete isolation of I.S. field wiring from any other wiring.

II. Proper Panel Installation

- Panel mounted in non-hazardous area and accessible to owner/operator.
- All field wiring is labelled at terminal strip.
- All wiring brought through appropriate punch outs.

III. Check for Proper Probe Installation

- Piping sump sensors suspended within one inch of sump bottom.
- Double walled FRP sensors installed properly in tank and where applicable, pull strings installed and accessible.

IV. Check System Operation

- X Verify proper functioning of alarm horn (if applicable).
- X Verify proper functioning of sump sensor (if applicable).
- N/A  
X Verify proper functioning of in-tank sensor (if applicable).
- Verify proper alarm light function for appropriate field sensor.

18. SPECIAL CONDITIONS AND PROCEDURES TO TEST THIS TANK

See manual sections applicable. Check below and record procedure in log (27).

Use maximum allowable test pressure for all tests. Four pound rule does not apply to doublewalled tanks.

Complete section below:

- Water in tank  Line(s) being tested with LVLLT
- High water table in tank excavation

1. Is four pound rule required? Yes  No
2. Height to 12" mark from bottom of tank 178 in.
3. Pressure at bottom of tank 4.63 P.S.I.
4. Pressure at top of tank 1.77 P.S.I.

19. TANK MEASUREMENTS FOR TSTT ASSEMBLY

Bottom of tank to grade\* 157 in.

Add 30" for "T" probe assy. 30 in.

Total tubing to assemble - approximate 187 in.

20. EXTENSION HOSE SETTING

Tank top to grade\* 47 in.

Extend hose on suction tube 6" or more below tank top 12 in.

\*If fill pipe extends above grade, use top of fill

## Underground Storage Tank Permit to Operate

Permit Number: 201602-308081  
Date Issued: March 1, 2008  
Expiration Date: February 28, 2013  
Facility ID Number: 43-000-201602

Facility Name: CONOCOPHILLIPS #256115  
Site Address: 4350 EL CAMINO REAL  
LOS ALTOS, CA 94022

COPY

Tank Owner Name: CONOCOPHILLIPS COMPANY  
Permit Contact: TIANA ANDRIAMANARIVO  
Owner Address: 1380 SAN PABLO AV.  
RODEO, CA 94572

The following underground storage tanks are covered by this permit:

<u>Tank Identification Number</u>	<u>Capacity (gal)</u>	<u>Tank Contents</u>	<u>Owner's Tank ID</u>
43-000-201602-100024	12,000	REGULAR UNLEADED GASOLINE	256115-1
43-000-201602-100023	12,000	PREMIUM UNLEADED GASOLINE	256115-2
43-000-201602-100022	500	WASTE OIL	256115-3

### Permit Conditions

- 1 In order to maintain this UST permit to operate, the permit holder shall comply with Health and Safety Code, Division 20, Chapters 6 7 and 6 75, and California Code of Regulations (CCR), Title 23, Division 3, Chapters 16 and 18
- 2 In the event of a spill, leak, or other unauthorized release, the permittee shall comply with the requirements of 23 CCR, Chapter 16, Article 5. Additionally, the permittee shall operate according to a UST Response Plan approved by the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division (HMCD)
- 3 The permittee shall comply with the monitoring procedures described in a UST Monitoring Plan and UST system Plot Plan approved by HMCD
- 4 The permittee shall notify, and received approval from, HMCD prior to making any changes in monitoring procedures and/or equipment. The permittee shall notify HMCD within 30 days of any change in the usage of any UST, including changes in hazardous substances stored or change of UST owner and/or operator
- 5 The permittee shall perform testing and preventive maintenance on all leak detection monitoring equipment annually, or more frequently if specified by the equipment manufacturer, and maintain documentation of such servicing on-site
- 6 The permittee shall obtain approval from HMCD and Fire and Building authorities prior to modifying any UST system
- 7 Written records of all monitoring performed shall be maintained on-site by the operator and be available for inspection for a period of at least three years from the date the monitoring was performed
- 8 The permittee shall submit annual permit fees and State UST surcharges. Penalties for late payment will be assessed at 25%
- 9 Copies of this permit and the approved UST monitoring, response, and plot plans shall be maintained at the tank site
- 10 Violation of any of the above conditions may be cause for revocation of this UST permit to operate

**Re: Permit No. 201602-308081, Underground Storage Tank Permit to Operate.**

Dear TIANA ANDRIAMANARIVO:

Santa Clara County Department of Environmental Health's Hazardous Materials Compliance Division (HMCD) is the local agency which regulates underground storage tanks (UST) at your facility, **CONOCOPHILLIPS #256115**, located at **4350 EL CAMINO REAL, LOS ALTOS, CA**. The UST operating permit for that facility is enclosed. This permit must be posted at the tank site.

Please note the following provisions of Santa Clara County Ordinance Code:

**Sec. B11-290(f)** Persons performing secondary containment testing of any underground storage tank system subject to section 2637(a)(4) of title 23 of the California Code of Regulations, as amended, must report test results using the State Water Resources Control Board's "Secondary Containment Testing Report Form" or an alternate format approved by the director.

**Sec. B11-290(g)** The owner or operator of any underground storage tank subject to section 2637(b) of title 23 of the California Code of Regulations, as amended, must coordinate annual certification of underground storage tank monitoring equipment to coincide with the department's annual compliance inspection. Notwithstanding section 2637(b)(5), the UST owner or operator must notify the director at least fourteen calendar days prior to annual certification testing unless the notification requirement is waived by the director.

Please carefully review the permit information and Permit Conditions. Although the permit term is five years, fees will be assessed annually. Should you have any questions, please do not hesitate to contact the undersigned at (408) 918-1978.

Sincerely,

A handwritten signature in black ink, appearing to read "Greg Breshears".

**Re: Permit No. 201602-308081, Underground Storage Tank Permit to Operate.**

Dear GREG GALATOLO:

Santa Clara County Department of Environmental Health's Hazardous Materials Compliance Division (HMCD) is the local agency which regulates underground storage tanks (UST) at the following facility:

**CONOCOPHILLIPS #256115, located at 4350 EL CAMINO REAL, LOS ALTOS, CA.**

A copy of the UST operating permit for that facility is enclosed. The original permit has been mailed to the tank owner as specified in the Unified Program Consolidated Form (UPCF) Underground Storage Tank Operating Permit Application – Facility Information page submitted for the facility.

Since the USTs at this facility are owned and operated by separate entities, please be sure that you have a current written agreement between the UST owner and UST operator as required by Health and Safety Code Section 25284(a)(3). Copies of the current written agreement and this permit must be maintained at the tank facility.

Should you have any questions, please do not hesitate to contact the undersigned at (408) 918-1978.

Sincerely,

Greg Breshears  
Senior Hazardous Materials Specialist  
Hazardous Materials Compliance Division

The following underground storage tanks are covered by this permit:

<u>Tank Identification Number</u>	<u>Capacity (gal)</u>	<u>Tank Contents</u>	<u>Owner's Tank ID</u>
43-000-201602-100024	12,000	REGULAR UNLEADED GASOLINE	256115-1
43-000-201602-100023	12,000	PREMIUM UNLEADED GASOLINE	256115-2
43-000-201602-100022	500	WASTE OIL	256115-3

**Permit Conditions**

- 1 In order to maintain this UST permit to operate, the permit holder shall comply with Health and Safety Code, Division 20, Chapters 6 7 and 6 75, and California Code of Regulations (CCR), Title 23, Division 3, Chapters 16 and 18
- 2 In the event of a spill, leak, or other unauthorized release, the permittee shall comply with the requirements of 23 CCR, Chapter 16, Article 5. Additionally, the permittee shall operate according to a release Response Plan approved by the County of Santa Clara, Department of Environmental Health, Division of Hazardous Materials Compliance and Solid Waste Enforcement (HMCD)
- 3 The permittee shall comply with the monitoring procedures described in a UST Monitoring Plan and UST system Plot Plan approved by HMCD
- 4 The permittee shall notify, and received approval from, HMCD prior to making any changes in monitoring procedures and/or equipment. The permittee shall notify HMCD within 30 days of any change in the usage of any UST, including changes in hazardous substances stored or change of UST owner and/or operator
- 5 The permittee shall perform testing and preventive maintenance on all leak detection monitoring equipment annually, or more frequently if specified by the equipment manufacturer, and maintain documentation of such servicing on-site
- 6 The permittee shall obtain approval from HMCD and Fire and Building authorities prior to modifying any UST system
- 7 Written records of all monitoring performed shall be maintained on-site by the operator and be available for inspection for a period of at least three years from the date the monitoring was performed
- 8 The permittee shall submit annual permit fees and State UST surcharges. Penalties for late payment will be assessed at 25%
- 9 Copies of this permit and the approved UST monitoring, response, and plot plans shall be maintained at the tank site
- 10 Violation of any of the above conditions may be cause for revocation of this UST permit to operate

**Re: Permit No. 201602-308081, Underground Storage Tank Permit to Operate.**

Dear JANETTE THOMPSON:

Santa Clara County Department of Environmental Health's Hazardous Materials Compliance Division (HMCD) is the local agency which regulates underground storage tanks (UST) at your facility, **CONOCOPHILLIPS #256115**, located at **4350 EL CAMINO REAL, LOS ALTOS, CA**. The new five year UST operating permit for that facility is enclosed. This permit must be posted at the tank site.

Please note the following recently adopted provisions of Santa Clara County Ordinance Code:

**Sec. B11-290(f)** Persons performing secondary containment testing of any underground storage tank system subject to section 2637(a)(4) of title 23 of the California Code of Regulations, as amended, must report test results using the State Water Resources Control Board's "Secondary Containment Testing Report Form" or an alternate format approved by the director

**Sec. B11-290(g)** The owner or operator of any underground storage tank subject to section 2637(b) of title 23 of the California Code of Regulations, as amended, must coordinate annual certification of underground storage tank monitoring equipment to coincide with the department's annual compliance inspection. Notwithstanding section 2637(b)(5), the UST owner or operator must notify the director at least fourteen calendar days prior to annual certification testing unless the notification requirement is waived by the director

Please carefully review the permit information and Permit Conditions. Although the permit term is five years, fees will be assessed annually. Should you have any questions, please do not hesitate to contact the undersigned at (408) 918-1978.

Sincerely,

Greg Breshears  
Lead Hazardous Materials Specialist  
Hazardous Materials Compliance Division

**RE: Correction to ConocoPhillips Company's communication dated August 19, 2008, regarding updates to Gasoline Dispensing Facilities Environmental Contact Information**

UST Group,

In a written communication dated August 19, 2008, ConocoPhillips Company submitted updated **Unified Program Consolidated Forms** (formerly Form A) for all ConocoPhillips Company and/or Convenience Retailers LLC gasoline dispensing facilities that fall within your jurisdiction. Due to a glitch in our database, the information submitted to your Agency might not have been correct.

Enclosed please find the corrected **Unified Program Consolidated Forms** (formerly Form A) for all of our locations that fall within your Agency's authority.

We regret this error and sincerely apologize for any inconvenience this may have caused.

Should you require additional information regarding this update or have any questions, please contact me at (714) 428-6572.

Sincerely,

Stephen Boyd

**RE: Designated Operator submittal for ConocoPhillips**

Dear Agency:

The purpose of this letter and enclosures is to comply with the State Water Resources Control Boards Designated Operator requirement. Attached, please find:

1. A list of the ConocoPhillips site(s) in your jurisdiction,
2. Designated UST Operator notification form(s) for the site(s) contained on this list, and
3. Copies of the examination test results, or the ICC certificates of the assigned Designated Operator.

This letter and its enclosures should bring all of the sites contained on the above mentioned list into compliance with the new Designated Operator requirement. Should you require any additional information regarding this location or have any questions, please contact me at (714) 428-6572.

Sincerely,

Stephen Boyd  
Sr. HSE Specialist

cc: File

LOS ALTOS

R04

**II. SPILL CONTROL AND CLEANUP METHODS**

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material may be reused until it becomes too saturated to be effective. It will then be managed properly. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container
- Facility personnel will determine whether or not any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  - 1 Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment,
  - 2 Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment,
  - 3 Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment

**III. SPILL CONTROL AND CLEAN-UP EQUIPMENT**

**PERIODIC MAINTENANCE:** Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, and supplies are replenished as needed. Defective equipment is repaired or replaced as necessary

**EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED:** (Complete only if applicable)

EQUIPMENT	LOCATION	AVAILABILITY
R10	R20	R30
R11	R21	R31
R12	R22	R32
R13	R23	R33
R14	R24	R34
R15	R25	R35

**IV. RESPONSIBLE PERSONS**

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME	TITLE
GREGORY P GALATOLO	Operator
Dan Pellegrino	Account Manager

**V. INDIRECT HAZARD DETERMINATION**

This information is required only when the presence of the hazardous substance can not be determined directly by the monitoring method used (e.g., where liquid level measurements in a tank annular space or secondary piping are used as the basis for leak determination)

THE FOLLOWING STEPS WILL BE TAKEN TO DETERMINE THE PRESENCE OR ABSENCE OF HAZARDOUS SUBSTANCE IN THE SECONDARY CONTAINMENT IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE

R60

## UNDERGROUND STORAGE TANK RESPONSE PLAN – PAGE 2

### VI. LEAK INTERCEPTION AND DETECTION SYSTEM

This information is required only for motor vehicle fuel UST systems constructed per the Alternate Construction Requirements of 23 CCR §2633, and only if the Leak Interception and Detection System (LIDS) does not meet the volumetric requirements of 23 CCR §2631(d)(1) through (5) (i.e., when accounting for rainfall and backfill material, the secondary containment volume is less than 100% of primary tank volume for a single UST, or in the case of multiple USTs in shared secondary containment, 150% of the largest primary tank volume or 10% of aggregate primary tank volume, whichever is greater)

ATTACH AN ADDITIONAL PAGE TO THIS PLAN CONTAINING THE FOLLOWING INFORMATION

- The volume of the LIDS in relation to the volume of the primary container,
- The amount of time the LIDS shall provide containment related to the time between detection of an unauthorized release and cleanup of the leaked substance,
- The depth from the bottom of the LIDS to the highest anticipated level of groundwater,
- The nature of the unsaturated soils under the LIDS and their ability to absorb contaminants or to allow movement of contaminants,
- The methods and scheduling for removal of all hazardous substances which may have been discharged from primary containment and are located in the unsaturated soils between the primary containment and groundwater, including the LIDS sump

### VII. REPORTING AND RECORD KEEPING

We will report/record any overflow, spill, or unauthorized release from a UST system as indicated in this plan

**Recordable Releases:** Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include

- The UST operator's name and telephone number,
- A list of the types, quantities, and concentrations of hazardous substances released,
- A description of the actions taken to control and clean up the release,
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used,
- A description of actions taken to repair the UST and to prevent future releases,
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment

**Reportable Releases:** Any overflow, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report

- The UST owner's or operator's name and telephone number,
- A list of the types, quantities, and concentrations of hazardous materials released,
- The approximate date of the release,
- The date on which the release was discovered,
- The date on which the release was stopped,
- A description of actions taken to control and/or stop the release,
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release,
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions,
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity,
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems,
- A description of additional actions taken to prevent future releases

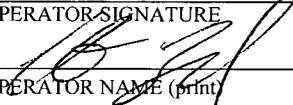

We will follow the reporting procedures described above if any of the following conditions occur

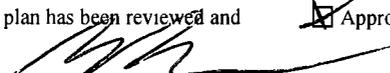

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection,
- Released hazardous substances are discovered at the UST site or in the surrounding area,
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred,
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results

**Record Retention** Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment

### VIII. OWNER/OPERATOR SIGNATURE

## UST Monitoring Plan – Page 2 Instructions

Complete a separate UST Monitoring Plan for each UST monitoring system at the facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. Please note that your local agency may require you to obtain approval prior to installing or modifying monitoring equipment. (Note: Numbering of these instructions follows the data element numbers on the form.)

- 490-54a MONITORING OF THE UNDER DISPENSER CONTAINMENT - Indicate the method used for UDC monitoring
- 490-54b SPECIFY-If 99 "Other" is checked, describe other method used
- If VI-1-1, VI-1-2 or VI-1-3 or VI-1-99 is checked, complete 490-55 to 490-64b
- 490-55 PANEL MANUFACTURER - Enter the name of the manufacturer of the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank
- 490-56 MODEL # - Enter the model number for the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank
- 490-57 LEAK SENSOR MANUFACTURER - Enter the name of the manufacturer of the sensor(s)
- 490-58 MODEL #(S) - Enter the model number of the sensor(s) installed. If additional space is needed, use Section X
- 490-59 DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No
- 490-60 UDC LEAK ALARM TRIGGERS PUMP SHUTDOWN - Indicate Yes or No
- 490-61 FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN - Indicate Yes or No
- 490-62 UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER - Indicate Yes or No
- 490-63 UDC CONSTRUCTION - Indicate if the construction of the UDC is single-walled, or double-walled
- 490-64a DOUBLE-WALLED INTERSTITIAL SPACE MONITORING - Indicate what is used to monitor the interstitial space
- 490-64b LEAK WITHIN THE SECONDARY CONTAINMENT OF UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No
- 490-65 VII-1 ELD TESTING - Check the box if you have been notified by the State Water Resources Control Board (SWRCB) that the UST(s) covered by this plan is/are subject to Enhanced Leak Detection Requirements (i.e., UST has any single-wall component and is located within 1,000 feet of a public drinking water well)
- 490-66 TESTING OF SECONDARY CONTAINMENT COMPONENTS EVERY 36 MONTHS - Check the box if you have secondary containment that requires testing
- 490-67 SPILL BUCKET TESTING - Check the box if you have spill buckets
- 490-68a-h VIII RECORDKEEPING - Indicate which monitoring and equipment maintenance records are maintained for this facility
- 490-69a IX TRAINING STATEMENT - Check the box to verify that the statement is true
- REFERENCE DOCUMENTS MAINTAINED AT FACILITY - Check the appropriate boxes to describe reference documents maintained at the facility. Note that the first two items on the list must be kept at the facility
- 490-69b MONITORING PLAN - Indicate that this plan is kept as a reference document
- 490-69c OPERATING MANUALS FOR ELECTRONIC EQUIPMENT - Indicate that this plan is kept as a reference document
- 490-69d CA UST REGULATIONS - Indicate that this is kept as a reference document
- 490-69e CA UST LAW - Indicate that this is kept as a reference document
- 490-69f STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION - "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION" - Indicate that this is kept as a reference document
- 490-69g SWRCB PUBLICATION "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" - Indicate that this is kept as a reference document
- 490-69h OTHER - Indicate that other reference documents are kept
- 490-69i SPECIFY-If "OTHER" is checked, enter a brief description of the other document(s) maintained at the facility. If additional space is needed, see Section X
- 490-70 DESIGNATED OPERATOR TRAINING - Check this box to verify that this statement is true
- 490-71 COMMENTS/ADDITIONAL INFORMATION - Make additional comments or you may attach and identify the number of additional pages of information to describe any additional UST system monitoring-related information (e.g., additional information required by your local agency). Attach any monitoring logs that you will be using for the monitoring of your tank system
- 490-72 NAME - Enter the name of the person who routinely conducts the monitoring and equipment maintenance under this plan
- 490-73 TITLE - Enter the title of the person
- 490-74 NAME - Enter the name of the second person, if applicable, who routinely conducts the monitoring and equipment maintenance under this plan
- 490-75 TITLE - Enter the title of the second person
- OWNER/OPERATOR SIGNATURE - The tank owner/operator, facility owner/operator, or an authorized representative of the owner shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete, and that the training program specified in Section IX has been implemented
- 490-76 REPRESENTING -- Check the appropriate box to indicate whether the signer is the UST owner/operator, the UST facility owner/operator, or an authorized representative of the owner
- 490-77 DATE - Enter the date the plan was signed
- 490-78 APPLICANT NAME - Print or type the name of the person signing the plan
- 490-79 APPLICANT TITLE - Enter the title of the person signing the plan

**UNIFIED PROGRAM CONSOLIDATED FORM  
UNDERGROUND STORAGE TANK  
MONITORING PLAN - (Page 1 of 2)**

FILED BY:  
SBA COUNTY  
ENV. HEALTH

TYPE OF ACTION  1 NEW PLAN  2 CHANGE OF INFORMATION 490-1

PLAN TYPE  1 MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY 490-2

(Check one item only)  2 THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S) 490-2

**I. FACILITY INFORMATION**  
FACILITY ID # (Agency Use Only) 43000201602 1

BUSINESS NAME (Same as FACILITY NAME) ConocoPhillips Site 256115 3

BUSINESS SITE ADDRESS 4350 EL CAMINO REAL 103 CITY LOS ALTOS 104

**II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE**

Testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) must be performed at the frequency specified by the equipment manufacturers' instructions, or annually, whichever is more frequent, and that such work must be performed by qualified personnel (23 CCR §2632, 2634, 2638, 2641)

MONITORING EQUIPMENT IS SERVICED  1 ANNUALLY  99 OTHER (Specify) 490-3a  
490-3b

**III. MONITORING LOCATIONS**

1 NEW SITE PLOT PLAN/MAP SUBMITTED WITH THIS PLAN.  2. SITE PLOT PLAN/MAP PREVIOUSLY SUBMITTED (23 CCR §2632, 2634) 490-4

**IV. TANK MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S):**

1 CONTINUOUS ELECTRONIC TANK MONITORING OF ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S) WITH AUDIBLE AND VISUAL ALARMS. (23 CCR §2632, 2634) 490-5

SECONDARY CONTAINMENT IS  a DRY  b LIQUID FILLED  c PRESSURIZED  d UNDER VACUUM 490-6

PANEL MANUFACTURER Veeder Root 490-7 MODEL # TLS350 490-8

LEAK SENSOR MANUFACTURER Veeder Root 490-9 MODEL #(S) 420 794890-420 490-10

2 AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S) (23 CCR §2643) 490-11

PANEL MANUFACTURER 490-12 MODEL # 490-13

IN-TANK PROBE MANUFACTURER 490-14 MODEL #(S) 490-15

LEAK TEST FREQUENCY  a CONTINUOUS  b DAILY/NIGHTLY  c WEEKLY 490-16

d MONTHLY  e OTHER (Specify) 490-17

PROGRAMMED TESTS  a 0.1 gph  b 0.2 gph  c OTHER (Specify) 490-18  
490-19

3 MONTHLY STATISTICAL INVENTORY RECONCILIATION (23 CCR §2646 1): 490-20

4 WEEKLY MANUAL TANK GAUGING (MTG) (23 CCR §2645). TESTING PERIOD  a 36 HOURS  b 60 HOURS 490-21  
490-22

5 TANK INTEGRITY TESTING (23 CCR §2643.1): 490-23

TEST FREQUENCY  a ANNUALLY  b BIENNIALLY  c OTHER (Specify) 490-24  
490-25

99 OTHER (Specify) 490-26  
490-27

**V. PIPE MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply)**

1 CONTINUOUS MONITORING OF PIPE/ PIPING SUMP(S) AND OTHER SECONDARY CONTAINMENT WITH AUDIBLE AND VISUAL ALARMS. (23 CCR §2636) 490-28

SECONDARY CONTAINMENT IS  a DRY  b LIQUID FILLED  c PRESSURIZED  d UNDER VACUUM 490-29

PANEL MANUFACTURER 490-30 MODEL # 490-31

LEAK SENSOR MANUFACTURER 490-32 MODEL #(S) 490-33

PIPING LEAK ALARM TRIGGERS AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN  a YES  b NO 490-34

FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN  a YES  b NO 490-35

2 MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED (23 CCR §2636) 490-36

MLLD MANUFACTURER(S) 490-37 MODEL #(S) 490-38

3 ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS (23 CCR §2636) 490-39

ELLD MANUFACTURER(S) 490-40 MODEL #(S) 490-41

PROGRAMMED IN LINE LEAK TEST  1 MINIMUM MONTHLY 0.2 g.p.h.  2 MINIMUM ANNUAL 0.1 g.p.h. 490-42

ELLD DETECTION OF A PIPING LEAK TRIGGERS AUTOMATIC PUMP SHUTDOWN  a YES  b NO 490-43

ELLD FAILURE/DISCONNECTION TRIGGERS AUTOMATIC PUMP SHUTDOWN  a YES  b NO 490-44

4 PIPE INTEGRITY TESTING 490-45  
TEST FREQUENCY  a ANNUALLY  b EVERY 3 YEARS  c OTHER (Specify) 490-46 490-47

5 VISUAL PIPE MONITORING. 490-48  
FREQUENCY  a DAILY  b WEEKLY  c MIN MONTHLY & EACH TIME SYSTEM OPERATED\* 490-49  
\* Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)

6 SUCTION PIPING MEETS EXEMPTION CRITERIA [23 CCR §2636(a)(3)]. 490-50

7 NO REGULATED PIPING PER HEALTH AND SAFETY CODE DIVISION 20, CHAPTER 6.7 IS CONNECTED TO THE TANK SYSTEM 490-51

 SWRCB PUBLICATION "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" 490-69g  
 OTHER (Specify) M69h, M69i

This facility has a "Designated UST Operator" who has passed the California UST System Operator Exam administered by the International Code Council (ICC) The "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems annually, and within 30 days of hire. This training will include, but is not limited to, the following

- > Operation of the UST systems in a manner consistent with the facility's best management practices
- > The facility employee's role with regard to the monitoring equipment as specified in this UST Monitoring Plan
- > The facility employee's role with regard to spills and overfills as specified in the UST Response Plan
- > Names of contact person(s) for emergencies and monitoring alarms 490-70

**X. COMMENTS/ADDITIONAL INFORMATION**

Provide additional comments here or indicate how many pages with additional information on specific monitoring procedures are attached to this plan 490-71

**XI. PERSONNEL RESPONSIBILITIES**

The UST Owner/Operator is responsible for ensuring that 1) the daily/routine UST monitoring activities and maintenance of UST leak detection equipment covered by this plan occurs, 2) all conditions that indicate a possible release are investigated, and 3) all monitoring records are maintained properly

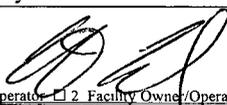

The following person(s) are responsible for performing the monitoring and equipment maintenance

NAME	GREGORY P GALATOLO	490-72	TITLE	Operator	490-73
NAME	Dan Pellegrino	490-74	TITLE	Account Manager	490-75

The Designated Operator shall perform a monthly visual inspection of the facility, provide a report to the owner/operator, and inform the owner/operator of any conditions that need follow-up action

**XII. OWNER/OPERATOR SIGNATURE**

**CERTIFICATION** I certify that the information provided herein is true and accurate to the best of my knowledge

APPLICANT SIGNATURE	490-76	DATE	490-77

## UST Monitoring Plan – Page 2 Instructions

Complete a separate UST Monitoring Plan for each UST monitoring system at the facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. Please note that your local agency may require you to obtain approval prior to installing or modifying monitoring equipment. (Note: Numbering of these instructions follows the data element numbers on the form.)

490-54a MONITORING OF THE UNDER DISPENSER CONTAINMENT - Indicate the method used for UDC monitoring

490-54b SPECIFY-If 99 "Other" is checked, describe other method used

If VI-1-1, VI-1-2 or VI-1-3 or VI-1-99 is checked, complete 490-55 to 490-64b

490-55 PANEL MANUFACTURER - Enter the name of the manufacturer of the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank.

490-56 MODEL # - Enter the model number for the monitoring system control panel (console). If there is no control panel (e.g., only an electrical relay box is installed) leave this space blank.

490-57 LEAK SENSOR MANUFACTURER - Enter the name of the manufacturer of the sensor(s)

490-58 MODEL #(S) - Enter the model number of the sensor(s) installed. If additional space is needed, use Section X.

490-59 DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No

490-60 UDC LEAK ALARM TRIGGERS PUMP SHUTDOWN - Indicate Yes or No

490-61 FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN - Indicate Yes or No

490-62 UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER - Indicate Yes or No

490-63 UDC CONSTRUCTION - Indicate if the construction of the UDC is single-walled, or double-walled

490-64a DOUBLE-WALLED INTERSTITIAL SPACE MONITORING - Indicate what is used to monitor the interstitial space

490-64b LEAK WITHIN THE SECONDARY CONTAINMENT OF UDC TRIGGERS AUDIBLE AND VISUAL ALARMS - Indicate Yes or No

490-65 VII-1 ELD TESTING - Check the box if you have been notified by the State Water Resources Control Board (SWRCB) that the UST(s) covered by this plan is/are subject to Enhanced Leak Detection Requirements (i.e., UST has any single-wall component and is located within 1,000 feet of a public drinking water well)

490-66 TESTING OF SECONDARY CONTAINMENT COMPONENTS EVERY 36 MONTHS - Check the box if you have secondary containment that requires testing

490-67 SPILL BUCKET TESTING - Check the box if you have spill buckets

490-68a-h VIII RECORDKEEPING - Indicate which monitoring and equipment maintenance records are maintained for this facility

490-69a IX TRAINING STATEMENT - Check the box to verify that the statement is true

REFERENCE DOCUMENTS MAINTAINED AT FACILITY - Check the appropriate boxes to describe reference documents maintained at the facility. Note that the first two items on the list must be kept at the facility.

490-69b MONITORING PLAN - Indicate that this plan is kept as a reference document

490-69c OPERATING MANUALS FOR ELECTRONIC EQUIPMENT - Indicate that this plan is kept as a reference document

490-69d CA UST REGULATIONS - Indicate that this is kept as a reference document

490-69e CA UST LAW - Indicate that this is kept as a reference document

490-69f STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION - "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION" - Indicate that this is kept as a reference document

490-69g SWRCB PUBLICATION "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" - Indicate that this is kept as a reference document

490-69h OTHER - Indicate that other reference documents are kept

490-69i SPECIFY-If "OTHER" is checked, enter a brief description of the other document(s) maintained at the facility. If additional space is needed, see Section X.

490-70 DESIGNATED OPERATOR TRAINING - Check this box to verify that this statement is true

490-71 COMMENTS/ADDITIONAL INFORMATION - Make additional comments or you may attach and identify the number of additional pages of information to describe any additional UST system monitoring-related information (e.g., additional information required by your local agency). Attach any monitoring logs that you will be using for the monitoring of your tank system.

490-72 NAME - Enter the name of the person who routinely conducts the monitoring and equipment maintenance under this plan

490-73 TITLE - Enter the title of the person

490-74 NAME - Enter the name of the second person, if applicable, who routinely conducts the monitoring and equipment maintenance under this plan

490-75 TITLE - Enter the title of the second person

OWNER/OPERATOR SIGNATURE - The tank owner/operator, facility owner/operator, or an authorized representative of the owner shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete, and that the training program specified in Section IX has been implemented.

490-76 REPRESENTING - Check the appropriate box to indicate whether the signer is the UST owner/operator, the UST facility owner/operator, or an authorized representative of the owner.

490-77 DATE - Enter the date the plan was signed

490-78 APPLICANT NAME - Print or type the name of the person signing the plan

490-79 APPLICANT TITLE - Enter the title of the person signing the plan

# Underground Storage Tank Monitoring Program

Site # 256115 RE# 31096

2. Site Address and Phone Number: 4350 EL CAMINO REAL LOS ALTOS, CA 94022 ph (650) 941-0244

**3. Method and equipment to be used for performing the monitoring (USTs only):**

<b>TANK DATA:</b>	Tank 01	Tank 02	Tank 03
<b>Product</b>	Unleaded	Premium Unleaded	Waste Oil
<b>Capacity (gallons)</b>	12032	12032	520
<b>Wall Type</b>	Double	Double	Double
<b>Material</b>	Steel, Fiberglass cladded on outside	Steel, Fiberglass cladded on outside	Steel, Fiberglass cladded on outside
<b>Install Date</b>	1/1/1990	1/1/1990	1/1/1990
<b>Overfill</b>	Overfill Alarm/Ball Float (at 90%)	Overfill Alarm/Ball Float	None
<b>Spill Containment</b>	Yes	Yes	Yes
<b>Monitoring Method**</b>	Interstitial (Dry)	Interstitial (Dry)	Interstitial (Dry)

<b>PIPING DATA:</b>	Pipe 01	Pipe 02
<b>Wall Type</b>	Double	Double
<b>Material</b>	Fiberglass	Fiberglass
<b>Install Date</b>	1/17/2002	1/17/2002
<b>Monitoring Method**</b>	Interstitial	Interstitial
<b>Sump Containment</b>	Yes	Yes
<b>Disp. Containment**</b>	Yes	Yes
<b>Monitor Probe Location**</b>	Turbine Sump	Turbine Sump
<b>Mechanical Leak Detector (manuf/model)</b>	FE Petro STP-MLD	FE Petro STP-MLD
<b>Electronic Leak Detector Present</b>	No	No

\*\* If applicable, leak sensor and under-dispenser shut off mechanism model numbers are included in the Monitoring System Certification

**ELECTRONIC MONITOR:**

**Make:** Veeder Root  
**Model:** TLS-350

**ADDITIONAL ELECTRONIC MONITOR**

**Make:** None  
**Model:**

**ALARMS AND SHUT DOWN MECHANISMS (if present):**

Piping equipped with audible/visual alarm, failsafe, and positive shutoff

# Underground Storage Tank Monitoring Program

1. **Owner/Operator/Site Number:** ConocoPhillips Co

Site # 256115 RE# 31096

2. **Site Address and Phone Number:** 4350 EL CAMINO REAL LOS ALTOS, CA 94022 ph (650) 941-0244

## 4. **Frequency of Monitoring Method and location Where Monitoring will be (for Waste Oil Tank):**

**Tanks:** Tank(s) 01 02 are monitored continuously using an electronic probe in the interstitial space of the tank

**Piping:** Pipe(s) 01 02 are monitored continuously by a liquid-detecting probe located in the turbine sump

**Dispenser:** Dispenser pans are equipped with continuous mechanical monitoring/mechanical shut-off device

## 5. **Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:**

**Operator Name and Number:** GREGORY P GALATOLO - (650) 941-0244

**Maintenance:** SolvOne - 1-866-215-0965

## 6. **Reporting Format:**

The monitor will be certified annually and a report generated and provided to the operator. The operator is to report all audible or visual alarm conditions that may indicate a potential release to the ConocoPhillips Field Representative, as well as the responsible party for maintenance listed under #5. In the event of a test failure, the specific piece(s) of equipment are taken out of service and proper reporting procedures followed. The operator is to report all suspected and confirmed releases to the ConocoPhillips Field Representative, as well as the responsible party for maintenance listed under #5.

## 7. **State the Preventative Maintenance Schedule for the Monitoring Equipment:**

The electronic monitoring system is certified annually to be functioning per manufacturer instructions by a properly trained and certified third-party contractor. Repairs are made by the responsible party listed under #5 upon notification by the station operator. The station operator is responsible for maintaining copies of testing results and repair records on site and available for agency inspectors. The 3rd-party testing requirements and frequencies for the tank system are summarized below.

### ***Contractor UST System Testing Requirements/Frequency***

Contractor testing of the primary tank is not required

The tank secondary containment is tested per manufacturer's specifications every 3 years in accordance with CCR Title 23 Section 2637

Fuel spill buckets require annual testing

Mechanical leak detector(s) tested annually

Contractor testing of the primary piping is performed annually

Secondary containment testing for piping, turbine sumps and dispenser pans is conducted every 3 years per manufacturer's specification under CCR Title 23

## 8. **Describe the Training Needed for the Operation of Both the Tank System and the Monitoring Equipment:**

The operator has been trained to check the tank system and/or monitor daily for proper operation. Training topics include performing daily/monthly inventory reconciliation, inspection of the monitoring system to ensure it is operating properly and not in alarm, periodic inspection of under-dispenser for leaks, inspection of fill and vapor spill buckets, inspection of hoses, nozzles, and other ancillary tank system equipment. If the tank system and/or monitor is not functioning correctly, the operator has been instructed to repair the equipment (if appropriate) or contact the responsible party for Maintenance listed under item #5 for repairs.

## 9. **Summary of Site Operator Requirements:**

For pipes monitored electronically, the site operator is to call the specified maintenance company to report monitoring alarms and maintain a record of all monitoring alarms and repairs. For double wall tanks monitored by interstitial probes, the monitoring equipment must be continuously operational with probes in place. Report all non-inventory monitoring alarms to the specified maintenance company and keep a record of alarms and repair work performed. For tanks monitored continuously via CSLD, operator is responsible for maintaining a monthly passing test result, reporting all non-inventory alarms to the specified Maintenance Company, and keeping a record of alarms and repair work performed. All sites are responsible for maintaining daily and monthly inventory reconciliation records and notifying the ConocoPhillips Field Representative and the Regional HSE for inventory variances greater than the regulatory limit.

## **Spill Response Plan**

### **For Minor Releases:**

If the release is less than 5 gallons and service station personnel can contain the release immediately (and the release does not go off-site, enter any waterway, or contact bare soils), do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up release material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent material, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state, and local regulations.

### **For Major Releases:**

If the release is greater than 5 gallons, threatens to leave the site, enter any waterway, or contact bare soils, or there is an injury to a person, do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 911
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify the following personnel:

Regional HSE Specialist – David Camille – (510) 245-5219  
SolvOne at 1-866-215-0965

9. Attempt to contain the spill with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1-800-852-7550.
11. In the case of an unauthorized release from the primary containment, ConocoPhillips Company will respond within 8 hours to address necessary repairs to the primary containment and cleanup of the secondary containment. Exceptions to this will be reported to the agency as required under California Health and Safety Code Section 25295.

# Underground Storage Tank Monitoring Program

1. Operator/Site Number: GREGORY P GALATOLO Cost Center # 256115 RE# 31096  
2. Site Address and Phone Number: 4350 EL CAMINO REAL LOS ALTOS, CA 94022 ph (650) 941-0244

## 4. Frequency of Monitoring Method and location Where Monitoring will be Performed:

Tanks: Tank(s) 01 02 are monitored continuously using an electronic probe in the interstitial space of the tank

↑?  
SMA

Piping: Pipe(s) 01 02 are monitored continuously by a liquid-detecting probe located in the turbine sump

Dispenser: Dispenser pans are equipped with continuous mechanical monitoring/mechanical shut-off device

## 5. Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:

Operator Name and Number: GREGORY P GALATOLO - (650) 941-0244

Maintenance: ConocoPhillips Service Contact Center - 1-866-805-4357

## 6. Reporting Format:

The monitor will be certified annually and a report generated and provided to the operator. The operator is to report all audible or visual alarm conditions that may indicate a potential release to the ConocoPhillips Field Representative, as well as the responsible party for maintenance listed under #5. In the event of a test failure, the specific piece(s) of equipment are taken out of service and proper reporting procedures followed. The operator is to report all suspected and confirmed releases to the ConocoPhillips Field Representative, as well as the responsible party for maintenance listed under #5.

## 7. State the Preventative Maintenance Schedule for the Monitoring Equipment:

The electronic monitoring system is certified annually to be functioning per manufacturer instructions by a properly trained and certified third-party contractor. Repairs are made by the responsible party listed under #5 upon notification by the station operator. The station operator is responsible for maintaining copies of testing results and repair records on site and available for agency inspectors. The 3rd-party testing requirements and frequencies for the tank system are summarized below.

### Contractor Tank Tightness Testing Requirements/Frequency

Contractor testing of the primary tank is not required

The tank secondary containment is tested per manufacturer's specifications every 3 years in accordance with CCR Title 23 Section 2637

### Line and Other UST System Testing Requirements/Frequency

Mechanical leak detector(s) tested annually

Contractor testing of the primary piping is not required

Secondary containment testing for piping, turbine sumps and dispenser pans is conducted every 3 years per manufacturer's specification under CCR Title 23

## 8. Describe the Training Needed for the Operation of Both the Tank System and the Monitoring Equipment:

The operator has been trained to check the tank system and/or monitor daily for proper operation. Training topics include performing daily/monthly inventory reconciliation, inspection of the monitoring system to ensure it is operating properly and not in alarm, periodic inspection of under-dispenser for leaks, inspection of fill and vapor spill buckets, inspection of hoses, nozzles, and other ancillary tank system equipment. If the tank system and/or monitor is not functioning correctly, the operator has been instructed to repair the equipment (if appropriate) or contact the responsible party for Maintenance listed under item #5 for repairs.

## 9. Summary of Site Operator Requirements:

For pipes monitored electronically, the site operator is to call the specified maintenance company to report monitoring alarms and maintain a record of all monitoring alarms and repairs. For double wall tanks monitored by interstitial probes, the monitoring equipment must be continuously operational with probes in place. Report all non-inventory monitoring alarms to the specified maintenance company and keep a record of alarms and repair work performed. All sites are responsible for maintaining daily and monthly inventory reconciliation records and notifying the ConocoPhillips Field Representative and the Regional Environmental Compliance Specialist for inventory variances greater than the regulatory limit.

## Spill Response Plan

### For Minor Releases:

If the release is less than 5 gallons and service station personnel can contain the release immediately (and the release does not go off-site, enter any waterway, or contact bare soils), do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up release material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent material, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state, and local regulations

### For Major Releases:

If the release is greater than 5 gallons, threatens to leave the site, enter any waterway, or contact bare soils, or there is an injury to a person, do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 911
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify the following personnel:  
Service Contact Center at 1-866-805-4357  
Regional Compliance Specialist *NAME?*
9. Attempt to contain the spill with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1-800-852-7550
11. In the case of an unauthorized release from the primary containment, ConocoPhillips Company will respond within 8 hours to address necessary repairs to the primary containment and cleanup of the secondary containment. Exceptions to this will be reported to the agency as required under California Health and Safety Code Section 25295.

This summary page should be kept in the first folder of your Environmental Compliance Records Box and provides a brief overview of what records are required to be maintained in each of the folders. Each header number below corresponds to the file folder number.

**2. Environmental Contacts (Reference Guide)**

Maintain your environmental contact list in this folder

**3. Fuel Delivery Receipts**

Required at the station for 2 months

**4. Daily/Weekly Inspection Form/Maintenance Log** (Use Form 00950)

Stage I (Tank Fill Equipment) Required Daily

Stage II (Hoses and Nozzles) Required Daily

Vap Rec Maintenance Log Complete the maintenance log for any repairs made to vapor recovery equipment

**5. Maintenance Work Orders/receipts**

Maintain receipts/work orders left by service provider(s) for repair of gasoline equipment

**6. Hazardous Waste Manifests (or receipts for disposal of non-hazardous wastes)**

Receipts or waste manifests must be kept any time there are hazardous or non-hazardous wastes (or recycled materials) removed from the site (examples may include used absorbent, tank water pumpout, used antifreeze, etc). Hazardous wastes shall not be left on-site more than 90 days. If the waste is generated from a dealer activity (for example, waste oil), dealer is responsible for manifests and disposal. Contact your local agency if you have questions regarding hazardous waste requirements.

**7. Material Safety Data Sheets (MSDSs)**

MSDSs must be maintained for all chemicals that employees could be exposed to at your facility. Keep the ones related to gasoline in this folder, make a separate binder for all others (ex: cleaning, bay, car wash).

**8. Employee Training Records** (Use Form 00957 and 00959)

Where required, maintain copies of Stage II, HMMP, and other training records on site.

**9. California - Annual Hazardous Materials Management Plan (HMMP) Gas-Propane-Bulk CO2**

HMMP is required. If the HMMP is more than 1 year old, the site must have a signed certification stating plan is current and correct. For example, if the HMMP was done in November 2000, in November 2001 and November 2002, a one-page certification must be submitted stating that the 2000 plan is still accurate. Call Jennifer Carey at RHL (707-765-1660) if you need a copy of your HMMP or if you would like for RHL to prepare one for you. Dealers are required to pay for these and maintain them on site. If the plan requires changes, notify RHL.

**10. California - Tank Monitoring Plan/Spill Response Plan**

Each site must have a written UST monitoring plan and spill response plan. If you do not have a copy, please contact your Regional Compliance Specialist.

**11. Tank Testing/Monitor Certification**

Test results and monitor certifications are mailed to or left on site by the testing vendor and should be maintained on site.

**Third Party Testing Requirements:**

<b>Tank Testing:</b>	Not required	<b>Monitor Certification:</b>	Required Annually
<b>Line Testing:</b>	Not Required	<b>Leak Detector Testing:</b>	Required Annually

**12. Stage II Test Results**

**System Type** Balance

Stage II Test Results are to be maintained on site and will be provided by the contractor following testing. Below are the test types and frequency required at your station.

Test Type(s)	Frequency
Pressure Decay, Blockage and Liquid Removal	Annually

This summary page should be kept in the first folder of your Environmental Compliance Records Box and provides a brief overview of what records are required to be maintained in each of the folders. Each header number below corresponds to the file folder number.

**13. Monthly Gasoline Inventory** (Use Form 00955)

Keep your daily/monthly gasoline inventory records in this folder

**14. Monthly Monitor Printouts/Alarm Log**

Tank monitored by probe located between two tank walls (interstitial monitoring) Maintain documentation regarding all alarms (Alarm Log, Form 00954) Call the Service Contact Center for all non-inventory alarms

**15. Agency Inspections**

Fax copies of all environmental agency (tanks, vapor recovery, etc.) inspections, including Notices to Comply or Notices of Violation, to your Regional Compliance Specialist and maintain a copy on site

**16. Owner/Operator Agreement**

In CA, WA, OR, NV or AZ, maintain your UST Owner/Operator agreement in this folder. If your site is located in another State and you received an Owner/Operator agreement with your lease, keep it in this folder

**17. 5-Star Survey Results**

Maintain your 5-star audit results in this folder

**18. Monthly Safety/Environmental Meeting Minutes**

Maintain your Safety and Environmental Meeting minutes in this folder

**19. HazCom Program/Emergency Response Plan**

Maintain your Hazardous Communication and/or Emergency Response Plan in this folder

**20. OSHA Records**

If applicable, maintain your OSHA records in this folder

**21. Local Requirements**

**22. Local Requirements**

**23. Local Requirements**

**Regional Compliance Specialist**

Your Regional Compliance Specialist is Irene Jimenez, located in San Ramon at 925-277-2319 or Janette Thompson at 925-277-2404, fax 927-277-2361

Original permits should be posted on site on the bulletin board. If you need a copy of a particular permit, you will need to contact the Permits and Licenses Department at 602-728-6660

This listing of environmental record keeping requirements is intended to provide a summary of record keeping requirements for certain environmental issues related to gasoline storage facilities at the time of printing and does not cover all obligations or requirements at any particular marketing location. Your Station Lease requires compliance with all required local, state, and federal laws. If there are local requirements that are not listed above, fill in the requirement name in your Environmental Records Box and store any necessary documentation in that slot

## CERTIFICATION OF FINANCIAL RESPONSIBILITY FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in California Code of Regulations (CCR), Title 23, Division 3, Chapter 18, Section 2807,

500,000 dollars per occurrence

1 million dollars annual aggregate

1 million dollars per occurrence

AND

2 million dollars annual aggregate

B. ConocoPhillips hereby certifies that it is in compliance with the requirements of Section 2807,  
 (Name of Tank Owner or Operator)

California Code of Regulations, Title 23, Division 3, Chapter 18, Article 3, Section 2807.

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp
Chief Financial Officer Letter	600 N. Dairy Ashford, Houston, TX 77079	N/A for this mechanism	\$1,000,000 per occurrence & \$2,000,000 annual aggregate	April 30, 2009, to April 30, 2010	Yes	Yes

Note:

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance and shall maintain compliance with all conditions for participation in the Fund. See Instructions.

**CERTIFICATION OF FINANCIAL RESPONSIBILITY**

ConocoPhillips Company hereby certifies that it is in compliance with the requirements of Subpart H of section 2807, article 3, chapter 18, division 3, title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by section 2807 are as follows:

**Mechanism:** 40 CFR Section 280.96 – Guarantee (issued by corporate parent ConocoPhillips using 40 CFR Section 280.95 – Financial Test of Self Insurance) and 40 CFR 280.103 – Standby Trust Fund

**Amount of Coverage:** \$1,000,000 per occurrence  
\$2,000,000 annual aggregate

**Effective Period of Coverage:** From April 30, 2009 until April 30, 2010, unless earlier revoked or replaced by written notice.

**Coverage:** Taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases.

Re: **UST Financial Assurance**

Dear Ms. Lagomarsino:

The purpose of this letter is to provide demonstration of compliance with the requirements for financial assurance for corrective action and sudden and non-sudden occurrences liability for Underground Storage Tanks (USTs) as specified in Chapter 18, Division 3, Title 23 of the California Code of Regulations.

USTs in California under your jurisdiction are shown in Attachment A of Appendix I (CFO letter).

For purposes of financial assurance, ConocoPhillips is guarantor for ConocoPhillips Company, a wholly-owned subsidiary of ConocoPhillips.

The enclosed information includes:

**Appendix I**—A financial test letter from the Chief Financial Officer of ConocoPhillips.

**Appendix II**—Report of Ernst & Young LLP, independent auditors of ConocoPhillips' financial statements for the year ended December 31, 2008, which is contained in the ConocoPhillips 2008 Annual Report.

**Appendix III**—Corporate Guarantees from ConocoPhillips.

**LETTER FROM THE CHIEF FINANCIAL OFFICER**

California Environmental Protection Agency  
State Water Resources Control Board  
UST Cleanup Fund  
1001 I Street, 17<sup>th</sup> Floor  
Sacramento, CA 95814

Dear Sir or Madam:

I am the chief financial officer for ConocoPhillips, 600 North Dairy Ashford, Houston, TX 77079. This letter is in support of the use of the Underground Storage Tank Cleanup Fund to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least one million dollars (\$1,000,000.00) per occurrence and two million dollars (\$2,000,000.00) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

Refer to Attachment A

1. Amount of annual aggregate coverage being assured by this letter	\$2,000,000
2. Total tangible assets	\$138,240,836,000
3. Total liabilities	\$87,699,232,000
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1.)	\$50,541,604,000

California Environmental Protection Agency

April 3, 2009

Page 2

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at 600 North Dairy Ashford, Houston, Texas, on April 3, 2009.

Attachment A

Internal No	Address	City	State	Zip	County	RMR Status
-------------	---------	------	-------	-----	--------	------------

ConocoPhillips has or continues to undertake required corrective actions and meet third-party liability claim as a responsible party as either the owner or operator of a petroleum underground storage tank ("UST") system(s) at the time of the sudden or non-sudden release(s) or accidental release(s) and/or occurrence(s) of petroleum from UST system(s) that resulted in a need for corrective action and/or third-party liability claim. Financial responsibility for undertake such required corrective actions and meet third-party liability claim may be required under the following applicable state and federal financial responsibility requirements:

1. Title 40 Code of Federal Regulations, Part 280, Subpart H, commencing with Section 280.90;
2. Section 25292.2 of Chapter 6.75 of the California Health and Safety Code;
3. Article 3 of Chapter 6.75 of the California Health and Safety Code Commencing with Section 25299.30; and
4. California Code of Regulations, Title 23, Article 3, Chapter 18.

## GUARANTEE

Guarantee made this April 3, 2009, by ConocoPhillips, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to the California State Water Resources Control Board and Environmental Protection Agency Region 9 ("the Agencies") and to any and all third parties, and obligees, on behalf of ConocoPhillips Company of 600 North Dairy Ashford, Houston, Texas 77079.

### Recitals

1. Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95 (b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
2. ConocoPhillips Company owns or operates the following underground storage tanks covered by this guarantee:

See "Attachment A"

This guarantee satisfies 40 CFR part 280, subpart H requirements for assuring funding for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tanks in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

3. On behalf of our subsidiary ConocoPhillips Company, guarantor guarantees to the Agencies and to any and all third parties that:

In the event that ConocoPhillips Company fails to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the administrators of the Agencies have determined or suspect that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the Agencies shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the Agencies determine that ConocoPhillips Company has failed to perform corrective action for releases arising out of the operation of the above-identified tanks in accordance with 40 CFR part 280, subpart F, the guarantor upon written instructions from the Agencies shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If ConocoPhillips Company fails to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties

caused by sudden and/or nonsudden accidental releases arising from the operation of the above-identified tanks, or fails to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the Agencies, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

4. Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95 (b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to ConocoPhillips Company. The guarantee will terminate 120 days from the date of receipt of the notice by ConocoPhillips Company, as evidenced by the return receipt.
5. Guarantor agrees to notify ConocoPhillips Company by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
6. Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of ConocoPhillips Company pursuant to 40 CFR part 280.
7. Guarantor agrees to remain bound under this guarantee for so long as ConocoPhillips Company must comply with the applicable financial responsibility requirements of 40 CFR part 280, subpart H for the above-identified tanks, except that guarantor may cancel this guarantee by sending notice by certified mail to ConocoPhillips Company, such cancellation to become effective no earlier than 120 days after receipt of such notice by ConocoPhillips Company, as evidenced by the return receipt.
8. The guarantor's obligation does not apply to any of the following:
  - a. Any obligation of ConocoPhillips Company under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - b. Bodily injury to an employee of ConocoPhillips Company arising from, and in the course of, employment by ConocoPhillips Company;
  - c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
  - d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by ConocoPhillips Company that is not

the direct result of a release from a petroleum underground storage tank;  
and

- e. Bodily damage or property damage for which ConocoPhillips Company is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

- 9. Guarantor expressly waives notice of acceptance of this guarantee by the Agencies, by any or all third parties, or by ConocoPhillips Company.

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

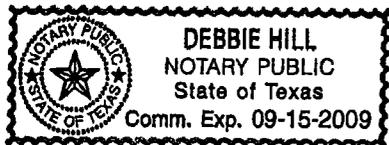

Effective: April 3, 2009

## GUARANTEE

For list of California UST's, please see Attachment A of Appendix I (CFO Letter).

## TRUST AGREEMENT

Trust agreement, the "Agreement," entered into as of April 3, 2009 by and between ConocoPhillips Company, a Delaware corporation, the "Grantor," and Arvest Trust Company, N.A., a national bank, the "Trustee."

Whereas, the United States Environmental Protection Agency, "EPA," an agency of the United States Government, has established certain regulations applicable to the Grantor, requiring that an owner or operator of an underground storage tank shall provide assurance that funds will be available when needed for corrective action and third-party compensation for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from the operation of the underground storage tank. The attached Schedule A lists the number of tanks at each facility and the names and addresses of the facilities where the tanks are located that are covered by the standby trust agreement.

Whereas, the Grantor has elected to establish a guarantee to provide all or part of such financial assurance for the underground storage tanks identified herein and is required to establish a standby trust fund able to accept payments from the instrument;

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this agreement, and the Trustee is willing to act as trustee;

Now, therefore, the Grantor and the Trustee agree as follows:

### Section 1. Definitions

As used in this Agreement:

- a. The term "Grantor" means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.
- b. The term "Trustee" means the Trustee who enters into this Agreement and any successor Trustee.

### Section 2. Identification of the Financial Assurance Mechanism

This Agreement pertains to the guarantee from which the standby trust fund is established to receive payments.

### **Section 3. Establishment of Fund**

The Grantor and the Trustee hereby establish a trust fund, the "Fund," for the benefit of the California State Water Resources Control Board and the Environmental Protection Agency Region 9 ("Agencies"). The Grantor and the Trustee intend that no third party have access to the Fund except as herein provided. The Fund is established initially as a standby to receive payments and shall not consist of any property. Payments made by the provider of financial assurance pursuant to the Agencies' instruction are transferred to the Trustee and are referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor as provider of financial assurance, any payments necessary to discharge any liability of the Grantor established by the Agencies.

### **Section 4. Payment for Corrective Action and/or Third-Party Liability Claims**

The Trustee shall make payments from the Fund as the Agencies shall direct, in writing, to provide for the payment of the costs of taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the tanks covered by the financial assurance mechanism identified in this Agreement.

The Fund may not be drawn upon to cover any of the following:

- a. Any obligation of Owner under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
- b. Bodily injury to an employee of Owner arising from, and in the course of employment by Owner;
- c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
- d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by Owner that is not the direct result of a release from a petroleum underground storage tank; and
- e. Bodily injury or property damage for which Owner is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

The Trustee shall reimburse the Grantor, or other persons as specified by the Agencies, from the Fund for corrective action expenditures and/or third-party liability claims in

such amounts as the Agencies shall direct in writing. In addition, the Trustee shall refund to the Grantor such amounts as the Agencies specify in writing. Upon refund, such funds shall no longer constitute part of the Fund as defined herein.

### **Section 5. Payments Comprising the Fund**

Payments made to the Trustee for the Fund shall consist of cash and securities acceptable to the Trustee.

### **Section 6. Trustee Management**

The Trustee shall invest and reinvest the principal and income of the Fund and keep the Fund invested as a single fund, without distinction between principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions of this Section. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

- (i) Securities or other obligations of the Grantor, or any other owner or operator of the tanks, or any of their affiliates as defined in the Investment Company Act of 1940, as amended, 15 U.S.C. 80a-2(a), shall not be acquired or held, unless they are securities or other obligations of the federal or a state government;
- (ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the federal or state government; and
- (iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

## **Section 7. Commingling and Investment**

The Trustee is expressly authorized in its discretion:

- a. To transfer from time to time any or all of the assets of the Fund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and
- b. To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

## **Section 8. Express Powers of Trustee**

Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

- a. To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;
- b. To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;
- c. To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depository even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depository with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

- d. To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the federal or state government; and
- e. To compromise or otherwise adjust all claims in favor of or against the Fund.

#### **Section 9. Taxes and Expenses**

All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements of the Trustee shall be paid from the Fund.

#### **Section 10. Advice of Counsel**

The Trustee may from time to time consult with counsel, who may be counsel to the Grantor, with respect to any questions arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

#### **Section 11. Trustee Compensation**

The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

#### **Section 12. Successor Trustee**

The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in writing sent to the Grantor and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Section 9.

### **Section 13. Instructions to the Trustee**

All orders, requests, and instructions by the Grantor to the Trustee shall be in writing, signed by such persons as are designated in the attached Schedule B or such other designees as the Grantor may designate by amendment to Schedule B. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the Agencies to the Trustee shall be in writing, signed by the Agencies, and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Agencies hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Agencies, except as provided for herein.

### **Section 14. Amendment of Agreement**

This Agreement may be amended by an instrument in writing executed by the Grantor and the Trustee, or by the Trustee and the Agencies if the Grantor ceases to exist.

### **Section 15. Irrevocability and Termination**

Subject to the right of the parties to amend this Agreement as provided in Section 14, this Trust shall be irrevocable and shall continue until terminated at the written direction of the Grantor and the Trustee, or by the Trustee and the Agencies, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be delivered to the Grantor.

### **Section 16. Immunity and Indemnification**

The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the Agencies issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

### **Section 17. Choice of Law**

This Agreement shall be administered, construed, and enforced according to the laws of the state of California, or the Comptroller of the Currency in the case of National Association banks.

**Section 18. Interpretation**

As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each section of this Agreement shall not affect the interpretation or the legal efficacy of this Agreement.

In Witness whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals (if applicable) to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in 40 CFR 280.103(b)(1) as such regulations were constituted on the date written above.

Re: **UST Financial Assurance**

Dear Mr. Tsuda:

The purpose of this letter is to provide demonstration of compliance with the requirements for financial assurance for corrective action and sudden and non-sudden occurrences liability for Underground Storage Tanks (USTs) as specified in Chapter 18, Division 3, Title 23 of the California Code of Regulations.

USTs in California under your jurisdiction are shown in Attachment A of Appendix I (CFO letter).

For purposes of financial assurance, ConocoPhillips is guarantor for ConocoPhillips Company, a wholly-owned subsidiary of ConocoPhillips.

The enclosed information includes:

**Appendix I**—A financial test letter from the Chief Financial Officer of ConocoPhillips.

**Appendix II**—Report of Ernst & Young LLP, independent auditors of ConocoPhillips' financial statements for the year ended December 31, 2007, which is contained in the ConocoPhillips 2007 Annual Report.

**Appendix III**—Corporate Guarantees from ConocoPhillips.

April 4, 2008

**LETTER FROM THE CHIEF FINANCIAL OFFICER**

California Environmental Protection Agency  
State Water Resources Control Board  
Division of Financial Assistance  
P. O. Box 944212  
Sacramento, CA 94244-2120

Dear Sir or Madam:

I am the chief financial officer for ConocoPhillips, 600 North Dairy Ashford, Houston, TX 77079. This letter is in support of the use of the Underground Storage Tank Cleanup Fund to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least one million dollars (\$1,000,000.00) per occurrence and two million dollars (\$2,000,000.00) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

Refer to Attachment A

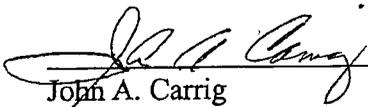

1. Amount of annual aggregate coverage being assured by this letter	\$2,000,000
2. Total tangible assets	\$147,524,996,000
3. Total liabilities	\$88,774,075,000
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1.)	\$58,750,921,000

April 4, 2008  
Page 2

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at 600 North Dairy Ashford, Houston, Texas, on April 4, 2008.

## CERTIFICATION OF FINANCIAL RESPONSIBILITY

### FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in California Code of Regulations (CCR), Title 23, Division 3, Chapter 18, Section 2807,

500,000 dollars per occurrence

1 million dollars annual aggregate

1 million dollars per occurrence

AND

2 million dollars annual aggregate

B. ConocoPhillips hereby certifies that it is in compliance with the requirements of Section 2807,

(Name of Tank Owner or Operator)

California Code of Regulations, Title 23, Division 3, Chapter 18, Article 3, Section 2807

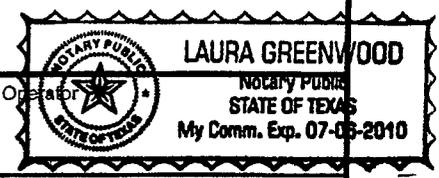

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows.

Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp.
Chief Financial Officer Letter	600 N Dairy Ashford Houston, TX 77079	N/A for this mechanism	\$1,000,000 per occurrence & \$2,000,000 annual aggregate	April 30, 2008 to April 30, 2009	Yes	Yes

**Note:** This is a sample certification of a petroleum UST owner or operator using the State Cleanup Fund as the Financial responsibility mechanism, in conjunction with the state alternative mechanism "Letter from Chief Financial Officer." For additional information and requirements refer to Title 23, Division 3, Chapter 18, of the California Code of Regulations and Division 20, Chapter 6.75 of the California Health and Safety Code.

**Note:** If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance and shall maintain compliance with all conditions for participation in the Fund. See instructions.

D. Facility Name See attached Schedule A	Facility Address See attached Schedule A
Facility Name	Facility Address
Facility Name	Facility Address
E. Signature of Tank Owner or Operator  Date 4/4/2008	Name and Title of Tank Owner or Operator C. Clayton Reasor
Signature of Witness or Notary  Date 4/4/08	Name of Witness or Notary Laura Greenwood

## GUARANTEE

Guarantee made this April 4, 2008, by ConocoPhillips, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to the California State Water Resources Control Board and Environmental Protection Agency Region 9 ("the Agencies") and to any and all third parties, and obligees, on behalf of ConocoPhillips Company of 600 North Dairy Ashford, Houston, Texas 77079.

### Recitals

1. Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95 (b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
2. ConocoPhillips Company owns or operates the following underground storage tanks covered by this guarantee:

See "Attachment A"

This guarantee satisfies 40 CFR part 280, subpart H requirements for assuring funding for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tanks in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

3. On behalf of our subsidiary ConocoPhillips Company, guarantor guarantees to the Agencies and to any and all third parties that:

In the event that ConocoPhillips Company fails to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the administrators of the Agencies have determined or suspect that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the Agencies shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the Agencies determine that ConocoPhillips Company has failed to perform corrective action for releases arising out of the operation of the above-identified tanks in accordance with 40 CFR part 280, subpart F, the guarantor upon written instructions from the Agencies shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If ConocoPhillips Company fails to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties

caused by sudden and/or nonsudden accidental releases arising from the operation of the above-identified tanks, or fails to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the Agencies, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

4. Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95 (b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to ConocoPhillips Company. The guarantee will terminate 120 days from the date of receipt of the notice by ConocoPhillips Company, as evidenced by the return receipt.
5. Guarantor agrees to notify ConocoPhillips Company by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
6. Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of ConocoPhillips Company pursuant to 40 CFR part 280.
7. Guarantor agrees to remain bound under this guarantee for so long as ConocoPhillips Company must comply with the applicable financial responsibility requirements of 40 CFR part 280, subpart H for the above-identified tanks, except that guarantor may cancel this guarantee by sending notice by certified mail to ConocoPhillips Company, such cancellation to become effective no earlier than 120 days after receipt of such notice by ConocoPhillips Company, as evidenced by the return receipt.
8. The guarantor's obligation does not apply to any of the following:
  - a. Any obligation of ConocoPhillips Company under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - b. Bodily injury to an employee of ConocoPhillips Company arising from, and in the course of, employment by ConocoPhillips Company;
  - c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
  - d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by ConocoPhillips Company that is not

the direct result of a release from a petroleum underground storage tank;  
and

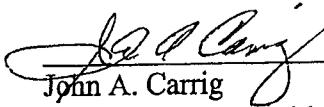

- e. Bodily damage or property damage for which ConocoPhillips Company is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

- 9. Guarantor expressly waives notice of acceptance of this guarantee by the Agencies, by any or all third parties, or by ConocoPhillips Company.

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

Effective: April 4, 2008

## TRUST AGREEMENT

Trust agreement, the "Agreement," entered into as of April 4, 2008 by and between ConocoPhillips Company, a Delaware corporation, the "Grantor," and Arvest Trust Company, N.A., a national bank, the "Trustee."

Whereas, the United States Environmental Protection Agency, "EPA," an agency of the United States Government, has established certain regulations applicable to the Grantor, requiring that an owner or operator of an underground storage tank shall provide assurance that funds will be available when needed for corrective action and third-party compensation for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from the operation of the underground storage tank. The attached Schedule A lists the number of tanks at each facility and the names and addresses of the facilities where the tanks are located that are covered by the standby trust agreement.

Whereas, the Grantor has elected to establish a guarantee to provide all or part of such financial assurance for the underground storage tanks identified herein and is required to establish a standby trust fund able to accept payments from the instrument;

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this agreement, and the Trustee is willing to act as trustee;

Now, therefore, the Grantor and the Trustee agree as follows:

### **Section 1. Definitions**

As used in this Agreement:

- a. The term "Grantor" means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.
- b. The term "Trustee" means the Trustee who enters into this Agreement and any successor Trustee.

### **Section 2. Identification of the Financial Assurance Mechanism**

This Agreement pertains to the guarantee from which the standby trust fund is established to receive payments.

### **Section 3. Establishment of Fund**

The Grantor and the Trustee hereby establish a trust fund, the "Fund," for the benefit of the California State Water Resources Control Board and the Environmental Protection Agency Region 9 ("Agencies"). The Grantor and the Trustee intend that no third party have access to the Fund except as herein provided. The Fund is established initially as a standby to receive payments and shall not consist of any property. Payments made by the provider of financial assurance pursuant to the Agencies' instruction are transferred to the Trustee and are referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor as provider of financial assurance, any payments necessary to discharge any liability of the Grantor established by the Agencies.

### **Section 4. Payment for Corrective Action and/or Third-Party Liability Claims**

The Trustee shall make payments from the Fund as the Agencies shall direct, in writing, to provide for the payment of the costs of taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the tanks covered by the financial assurance mechanism identified in this Agreement.

The Fund may not be drawn upon to cover any of the following:

- a. Any obligation of Owner under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
- b. Bodily injury to an employee of Owner arising from, and in the course of employment by Owner;
- c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
- d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by Owner that is not the direct result of a release from a petroleum underground storage tank; and
- e. Bodily injury or property damage for which Owner is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

The Trustee shall reimburse the Grantor, or other persons as specified by the Agencies, from the Fund for corrective action expenditures and/or third-party liability claims in

such amounts as the Agencies shall direct in writing. In addition, the Trustee shall refund to the Grantor such amounts as the Agencies specify in writing. Upon refund, such funds shall no longer constitute part of the Fund as defined herein.

#### **Section 5. Payments Comprising the Fund**

Payments made to the Trustee for the Fund shall consist of cash and securities acceptable to the Trustee.

#### **Section 6. Trustee Management**

The Trustee shall invest and reinvest the principal and income of the Fund and keep the Fund invested as a single fund, without distinction between principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions of this Section. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

- (i) Securities or other obligations of the Grantor, or any other owner or operator of the tanks, or any of their affiliates as defined in the Investment Company Act of 1940, as amended, 15 U.S.C. 80a-2(a), shall not be acquired or held, unless they are securities or other obligations of the federal or a state government;
- (ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the federal or state government; and
- (iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

## **Section 7. Commingling and Investment**

The Trustee is expressly authorized in its discretion:

- a. To transfer from time to time any or all of the assets of the Fund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and
- b. To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

## **Section 8. Express Powers of Trustee**

Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

- a. To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;
- b. To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;
- c. To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depository even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depository with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

- d. To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the federal or state government; and
- e. To compromise or otherwise adjust all claims in favor of or against the Fund.

### **Section 9. Taxes and Expenses**

All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements of the Trustee shall be paid from the Fund.

### **Section 10. Advice of Counsel**

The Trustee may from time to time consult with counsel, who may be counsel to the Grantor, with respect to any questions arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

### **Section 11. Trustee Compensation**

The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

### **Section 12. Successor Trustee**

The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in writing sent to the Grantor and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Section 9.

### **Section 13. Instructions to the Trustee**

All orders, requests, and instructions by the Grantor to the Trustee shall be in writing, signed by such persons as are designated in the attached Schedule B or such other designees as the Grantor may designate by amendment to Schedule B. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the Agencies to the Trustee shall be in writing, signed by the Agencies, and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Agencies hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Agencies, except as provided for herein.

### **Section 14. Amendment of Agreement**

This Agreement may be amended by an instrument in writing executed by the Grantor and the Trustee, or by the Trustee and the Agencies if the Grantor ceases to exist.

### **Section 15. Irrevocability and Termination**

Subject to the right of the parties to amend this Agreement as provided in Section 14, this Trust shall be irrevocable and shall continue until terminated at the written direction of the Grantor and the Trustee, or by the Trustee and the Agencies, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be delivered to the Grantor.

### **Section 16. Immunity and Indemnification**

The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the Agencies issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

### **Section 17. Choice of Law**

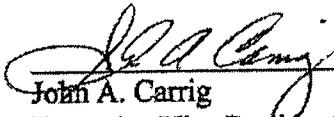

This Agreement shall be administered, construed, and enforced according to the laws of the state of California, or the Comptroller of the Currency in the case of National Association banks.

**Section 18. Interpretation**

As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each section of this Agreement shall not affect the interpretation or the legal efficacy of this Agreement.

In Witness whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals (if applicable) to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in 40 CFR 280.103(b)(1) as such regulations were constituted on the date written above.

Re: **UST Financial Assurance**

Dear Ms. Nash:

The purpose of this letter is to provide demonstration of compliance with the requirements for financial assurance for corrective action and sudden and non-sudden occurrences liability for Underground Storage Tanks (USTs) as specified in Chapter 18, Division 3, Title 23 of the California Code of Regulations.

USTs in California under your jurisdiction are shown in Attachment A of Appendix I (CFO letter).

For purposes of financial assurance, ConocoPhillips is guarantor for ConocoPhillips Company, a wholly-owned subsidiary of ConocoPhillips.

The enclosed information includes:

**Appendix I**—A financial test letter from the Chief Financial Officer of ConocoPhillips.

**Appendix II**—Report of Ernst & Young LLP, independent auditors of ConocoPhillips' financial statements for the year ended December 31, 2006, which is contained in the ConocoPhillips 2006 Annual Report.

**Appendix III**—Corporate Guarantees from ConocoPhillips.

**CERTIFICATION OF FINANCIAL RESPONSIBILITY**

ConocoPhillips Company hereby certifies that it is in compliance with the requirements of Subpart H of section 2807, article 3, chapter 18, division 3, title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by section 2807 are as follows:

**Mechanism:** 40 CFR Section 280.96 – Guarantee (issued by corporate parent ConocoPhillips using 40 CFR Section 280.95 – Financial Test of Self Insurance) and 40 CFR 280.103 – Standby Trust Fund

**Amount of Coverage:** \$1,000,000 per occurrence  
\$2,000,000 annual aggregate

**Effective Period of Coverage:** From April 30, 2007 until April 30, 2008, unless earlier revoked or replaced by written notice.

**Coverage:** Taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases.

**LETTER FROM THE CHIEF FINANCIAL OFFICER**

California Environmental Protection Agency  
State Water Resources Control Board  
Division of Financial Assistance  
P. O. Box 944212  
Sacramento, CA 94244-2120

Dear Sir or Madam:

I am the chief financial officer for ConocoPhillips, 600 North Dairy Ashford, Houston, TX 77079. This letter is in support of the use of the Underground Storage Tank Cleanup Fund to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least one million dollars (\$1,000,000.00) per occurrence and two million dollars (\$2,000,000.00) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

Refer to Attachment A

1. Amount of annual aggregate coverage being assured by this letter	\$2,000,000
2. Total tangible assets	\$132,342,159,000
3. Total liabilities	\$82,135,059,000
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1.)	\$50,207,100,000

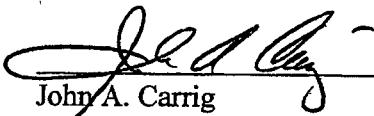

April 5, 2007

Page 2

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at 600 North Dairy Ashford, Houston, Texas, on April 7, 2006.

## GUARANTEE

Guarantee made this April 5, 2007 by ConocoPhillips, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to the California State Water Resources Control Board and Environmental Protection Agency Region 9 ("the Agencies") and to any and all third parties, and obligees, on behalf of ConocoPhillips Company of 600 North Dairy Ashford, Houston, Texas 77079.

### Recitals

1. Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95 (b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
2. ConocoPhillips Company owns or operates the following underground storage tanks covered by this guarantee:

See "Attachment A"

This guarantee satisfies 40 CFR part 280, subpart H requirements for assuring funding for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tanks in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

3. On behalf of our subsidiary ConocoPhillips Company, guarantor guarantees to the Agencies and to any and all third parties that:

In the event that ConocoPhillips Company fails to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the administrators of the Agencies have determined or suspect that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the Agencies shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the Agencies determine that ConocoPhillips Company has failed to perform corrective action for releases arising out of the operation of the above-identified tanks in accordance with 40 CFR part 280, subpart F, the guarantor upon written instructions from the Agencies shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If ConocoPhillips Company fails to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties

caused by sudden and/or nonsudden accidental releases arising from the operation of the above-identified tanks, or fails to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the Agencies, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

4. Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95 (b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to ConocoPhillips Company. The guarantee will terminate 120 days from the date of receipt of the notice by ConocoPhillips Company, as evidenced by the return receipt.
5. Guarantor agrees to notify ConocoPhillips Company by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
6. Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of ConocoPhillips Company pursuant to 40 CFR part 280.
7. Guarantor agrees to remain bound under this guarantee for so long as ConocoPhillips Company must comply with the applicable financial responsibility requirements of 40 CFR part 280, subpart H for the above-identified tanks, except that guarantor may cancel this guarantee by sending notice by certified mail to ConocoPhillips Company, such cancellation to become effective no earlier than 120 days after receipt of such notice by ConocoPhillips Company, as evidenced by the return receipt.
8. The guarantor's obligation does not apply to any of the following:
  - a. Any obligation of ConocoPhillips Company under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - b. Bodily injury to an employee of ConocoPhillips Company arising from, and in the course of, employment by ConocoPhillips Company;
  - c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
  - d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by ConocoPhillips Company that is not

the direct result of a release from a petroleum underground storage tank;  
and

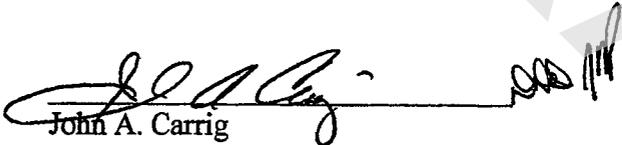

e. Bodily damage or property damage for which ConocoPhillips Company is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

9. Guarantor expressly waives notice of acceptance of this guarantee by the Agencies, by any or all third parties, or by ConocoPhillips Company.

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

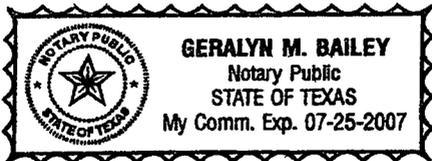

Effective: April 5, 2007

## TRUST AGREEMENT

Trust agreement, the "Agreement," entered into as of April 5, 2007 by and between ConocoPhillips Company, a Delaware corporation, the "Grantor," and Arvest Trust Company, N.A., a national bank, the "Trustee."

Whereas, the United States Environmental Protection Agency, "EPA," an agency of the United States Government, has established certain regulations applicable to the Grantor, requiring that an owner or operator of an underground storage tank shall provide assurance that funds will be available when needed for corrective action and third-party compensation for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from the operation of the underground storage tank. The attached Schedule A lists the number of tanks at each facility and the names and addresses of the facilities where the tanks are located that are covered by the standby trust agreement.

Whereas, the Grantor has elected to establish a guarantee to provide all or part of such financial assurance for the underground storage tanks identified herein and is required to establish a standby trust fund able to accept payments from the instrument;

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this agreement, and the Trustee is willing to act as trustee;

Now, therefore, the Grantor and the Trustee agree as follows:

### Section 1. Definitions

As used in this Agreement:

- a. The term "Grantor" means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.
- b. The term "Trustee" means the Trustee who enters into this Agreement and any successor Trustee.

### Section 2. Identification of the Financial Assurance Mechanism

This Agreement pertains to the guarantee from which the standby trust fund is established to receive payments.

### **Section 3. Establishment of Fund**

The Grantor and the Trustee hereby establish a trust fund, the "Fund," for the benefit of the California State Water Resources Control Board and the Environmental Protection Agency Region 9 ("Agencies"). The Grantor and the Trustee intend that no third party have access to the Fund except as herein provided. The Fund is established initially as a standby to receive payments and shall not consist of any property. Payments made by the provider of financial assurance pursuant to the Agencies' instruction are transferred to the Trustee and are referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor as provider of financial assurance, any payments necessary to discharge any liability of the Grantor established by the Agencies.

### **Section 4. Payment for Corrective Action and/or Third-Party Liability Claims**

The Trustee shall make payments from the Fund as the Agencies shall direct, in writing, to provide for the payment of the costs of taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the tanks covered by the financial assurance mechanism identified in this Agreement.

The Fund may not be drawn upon to cover any of the following:

- a. Any obligation of Owner under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
- b. Bodily injury to an employee of Owner arising from, and in the course of employment by Owner;
- c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
- d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by Owner that is not the direct result of a release from a petroleum underground storage tank; and
- e. Bodily injury or property damage for which Owner is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

The Trustee shall reimburse the Grantor, or other persons as specified by the Agencies, from the Fund for corrective action expenditures and/or third-party liability claims in

such amounts as the Agencies shall direct in writing. In addition, the Trustee shall refund to the Grantor such amounts as the Agencies specify in writing. Upon refund, such funds shall no longer constitute part of the Fund as defined herein.

### **Section 5. Payments Comprising the Fund**

Payments made to the Trustee for the Fund shall consist of cash and securities acceptable to the Trustee.

### **Section 6. Trustee Management**

The Trustee shall invest and reinvest the principal and income of the Fund and keep the Fund invested as a single fund, without distinction between principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions of this Section. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

- (i) Securities or other obligations of the Grantor, or any other owner or operator of the tanks, or any of their affiliates as defined in the Investment Company Act of 1940, as amended, 15 U.S.C. 80a-2(a), shall not be acquired or held, unless they are securities or other obligations of the federal or a state government;
- (ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the federal or state government; and
- (iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

## **Section 7. Commingling and Investment**

The Trustee is expressly authorized in its discretion:

- a. To transfer from time to time any or all of the assets of the Fund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and
- b. To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

## **Section 8. Express Powers of Trustee**

Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

- a. To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;
- b. To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;
- c. To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depository even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depository with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

- d. To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the federal or state government; and
- e. To compromise or otherwise adjust all claims in favor of or against the Fund.

#### **Section 9. Taxes and Expenses**

All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements of the Trustee shall be paid from the Fund.

#### **Section 10. Advice of Counsel**

The Trustee may from time to time consult with counsel, who may be counsel to the Grantor, with respect to any questions arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

#### **Section 11. Trustee Compensation**

The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

#### **Section 12. Successor Trustee**

The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in writing sent to the Grantor and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Section 9.

### **Section 13. Instructions to the Trustee**

All orders, requests, and instructions by the Grantor to the Trustee shall be in writing, signed by such persons as are designated in the attached Schedule B or such other designees as the Grantor may designate by amendment to Schedule B. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the Agencies to the Trustee shall be in writing, signed by the Agencies, and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Agencies hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Agencies, except as provided for herein.

### **Section 14. Amendment of Agreement**

This Agreement may be amended by an instrument in writing executed by the Grantor and the Trustee, or by the Trustee and the Agencies if the Grantor ceases to exist.

### **Section 15. Irrevocability and Termination**

Subject to the right of the parties to amend this Agreement as provided in Section 14, this Trust shall be irrevocable and shall continue until terminated at the written direction of the Grantor and the Trustee, or by the Trustee and the Agencies, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be delivered to the Grantor.

### **Section 16. Immunity and Indemnification**

The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the Agencies issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

### **Section 17. Choice of Law**

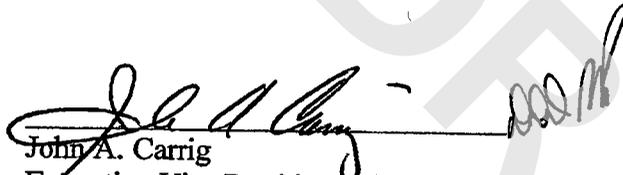

This Agreement shall be administered, construed, and enforced according to the laws of the state of California, or the Comptroller of the Currency in the case of National Association banks.

**Section 18. Interpretation**

As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each section of this Agreement shall not affect the interpretation or the legal efficacy of this Agreement.

In Witness whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals (if applicable) to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in 40 CFR 280.103(b)(1) as such regulations were constituted on the date written above.

Dear Sir or Madam:

I am enclosing information relating to ConocoPhillips and its subsidiaries, including Kayo Oil, requirement to provide financial responsibility for the ownership and operation of underground storage tanks by its operating entities. This filing likewise satisfies the requirements of authorized state programs.

Among other documents, I am attaching site list for your jurisdiction, according to our database. Please let me know if there are discrepancies between this list and your records.

Please forward this information to the appropriate person in your agency. You may direct any questions to me at 281/293-4335.

Very truly yours,

Marina Tishkova  
Sr. HSE Analyst

**CERTIFICATION OF FINANCIAL RESPONSIBILITY**

ConocoPhillips Company hereby certifies that it is in compliance with the requirements of Subpart H of section 2807, article 3, chapter 18, division 3, title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by section 2807 are as follows:

**Mechanism:** 40 CFR Section 280.96 – Guarantee (issued by corporate parent ConocoPhillips using 40 CFR Section 280.95 – Financial Test of Self Insurance) and 40 CFR 280.103 – Standby Trust Fund

**Amount of Coverage:** \$1,000,000 per occurrence  
\$2,000,000 annual aggregate

**Effective Period of Coverage:** From April 30, 2006 until April 30, 2007, unless earlier revoked or replaced by written notice.

**Coverage:** Taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases.

**ConocoPhillips Company**

Attention: Judi Nash

Re: **UST Financial Assurance**

Dear Ms. Nash:

The purpose of this letter is to provide demonstration of compliance with the requirements for financial assurance for corrective action and sudden and non-sudden occurrences liability for Underground Storage Tanks (USTs) as specified in Chapter 18, Division 3, Title 23 of the California Code of Regulations.

USTs in California under your jurisdiction are shown in Attachment A of Appendix I (CFO letter).

For purposes of financial assurance, ConocoPhillips is guarantor for ConocoPhillips Company, a wholly-owned subsidiary of ConocoPhillips.

The enclosed information includes:

**Appendix I**—A financial test letter from the Chief Financial Officer of ConocoPhillips.

*DISCussed* → **Appendix II**—Report of Ernst & Young LLP, independent auditors of ConocoPhillips' financial statements for the year ended December 31, 2005, which is contained in the ConocoPhillips 2005 Annual Report.

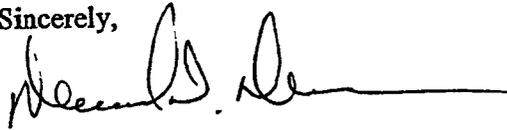

**Appendix III**—Corporate Guarantees from ConocoPhillips.

April 7, 2006

**LETTER FROM THE CHIEF FINANCIAL OFFICER**

California Environmental Protection Agency  
State Water Resources Control Board  
Division of Financial Assistance  
P. O. Box 944212  
Sacramento, CA 94244-2120

Dear Sir or Madam:

I am the chief financial officer for ConocoPhillips, 600 North Dairy Ashford, Houston, TX 77079. This letter is in support of the use of the Underground Storage Tank Cleanup Fund to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least one million dollars (\$1,000,000.00) per occurrence and two million dollars (\$2,000,000.00) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

Refer to Attachment A

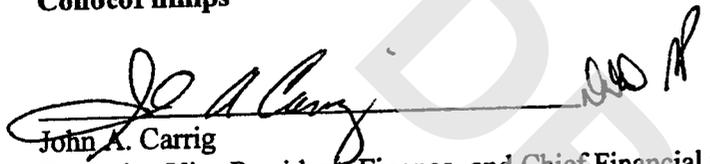

1. Amount of annual aggregate coverage being assured by this letter	\$2,000,000
2. Total tangible assets	\$90,560,104,000
3. Total liabilities	\$54,268,000,000
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1.)	\$36,292,104,000

April 7, 2006  
Page 2

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at 600 North Dairy Ashford, Houston, Texas, on April 7, 2006.

# APPENDIX III

## GUARANTEE

Guarantee made this April 7, 2006 by ConocoPhillips, a business entity organized under the laws of the state of Delaware, herein referred to as guarantor, to the California State Water Resources Control Board and Environmental Protection Agency Region 9 ("the Agencies") and to any and all third parties, and obligees, on behalf of ConocoPhillips Company of 600 North Dairy Ashford, Houston, Texas 77079.

### Recitals

1. Guarantor meets or exceeds the financial test criteria of 40 CFR 280.95 (b) or (c) and (d) and agrees to comply with the requirements for guarantors as specified in 40 CFR 280.96(b).
2. ConocoPhillips Company owns or operates the following underground storage tanks covered by this guarantee:

See "Attachment A"

This guarantee satisfies 40 CFR part 280, subpart H requirements for assuring funding for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the above-identified underground storage tanks in the amount of \$1,000,000 per occurrence and \$2,000,000 annual aggregate.

3. On behalf of our subsidiary ConocoPhillips Company, guarantor guarantees to the Agencies and to any and all third parties that:

In the event that ConocoPhillips Company fails to provide alternative coverage within 60 days after receipt of a notice of cancellation of this guarantee and the administrators of the Agencies have determined or suspect that a release has occurred at an underground storage tank covered by this guarantee, the guarantor, upon instructions from the Agencies shall fund a standby trust fund in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

In the event that the Agencies determine that ConocoPhillips Company has failed to perform corrective action for releases arising out of the operation of the above-identified tanks in accordance with 40 CFR part 280, subpart F, the guarantor upon written instructions from the Agencies shall fund a standby trust in accordance with the provisions of 40 CFR 280.108, in an amount not to exceed the coverage limits specified above.

If ConocoPhillips Company fails to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties

caused by sudden and/or nonsudden accidental releases arising from the operation of the above-identified tanks, or fails to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor, upon written instructions from the Agencies, shall fund a standby trust in accordance with the provisions of 40 CFR 280.108 to satisfy such judgment(s), award(s), or settlement agreement(s) up to the limits of coverage specified above.

4. Guarantor agrees that if, at the end of any fiscal year before cancellation of this guarantee, the guarantor fails to meet the financial test criteria of 40 CFR 280.95 (b) or (c) and (d), guarantor shall send within 120 days of such failure, by certified mail, notice to ConocoPhillips Company. The guarantee will terminate 120 days from the date of receipt of the notice by ConocoPhillips Company, as evidenced by the return receipt.
5. Guarantor agrees to notify ConocoPhillips Company by certified mail of a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code naming guarantor as debtor, within 10 days after commencement of the proceeding.
6. Guarantor agrees to remain bound under this guarantee notwithstanding any modification or alteration of any obligation of ConocoPhillips Company pursuant to 40 CFR part 280.
7. Guarantor agrees to remain bound under this guarantee for so long as ConocoPhillips Company must comply with the applicable financial responsibility requirements of 40 CFR part 280, subpart H for the above-identified tanks, except that guarantor may cancel this guarantee by sending notice by certified mail to ConocoPhillips Company, such cancellation to become effective no earlier than 120 days after receipt of such notice by ConocoPhillips Company, as evidenced by the return receipt.
8. The guarantor's obligation does not apply to any of the following:
  - a. Any obligation of ConocoPhillips Company under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
  - b. Bodily injury to an employee of ConocoPhillips Company arising from, and in the course of, employment by ConocoPhillips Company;
  - c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
  - d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by ConocoPhillips Company that is not

the direct result of a release from a petroleum underground storage tank;  
and

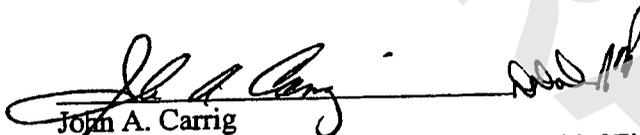

- e. Bodily damage or property damage for which ConocoPhillips Company is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

- 9. Guarantor expressly waives notice of acceptance of this guarantee by the Agencies, by any or all third parties, or by ConocoPhillips Company.

I hereby certify that the wording of this guarantee is identical to the wording specified in 40 CFR 280.96(c) as such regulations were constituted on the effective date shown immediately below.

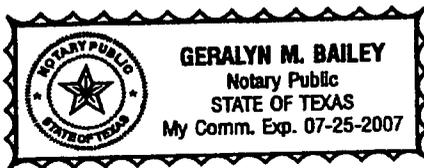

Effective: April 7, 2006

## Appendix IV

### TRUST AGREEMENT

Trust agreement, the "Agreement," entered into as of April 7, 2006 by and between ConocoPhillips Company, a Delaware corporation, the "Grantor," and Arvest Trust Company, N.A., a national bank, the "Trustee."

Whereas, the United States Environmental Protection Agency, "EPA," an agency of the United States Government, has established certain regulations applicable to the Grantor, requiring that an owner or operator of an underground storage tank shall provide assurance that funds will be available when needed for corrective action and third-party compensation for bodily injury and property damage caused by sudden and nonsudden accidental releases arising from the operation of the underground storage tank. The attached Schedule A lists the number of tanks at each facility and the names and addresses of the facilities where the tanks are located that are covered by the standby trust agreement.

Whereas, the Grantor has elected to establish a guarantee to provide all or part of such financial assurance for the underground storage tanks identified herein and is required to establish a standby trust fund able to accept payments from the instrument;

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this agreement, and the Trustee is willing to act as trustee;

Now, therefore, the Grantor and the Trustee agree as follows:

#### Section 1. Definitions

As used in this Agreement:

- a. The term "Grantor" means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.
- b. The term "Trustee" means the Trustee who enters into this Agreement and any successor Trustee.

#### Section 2. Identification of the Financial Assurance Mechanism

This Agreement pertains to the guarantee from which the standby trust fund is established to receive payments.

### **Section 3. Establishment of Fund**

The Grantor and the Trustee hereby establish a trust fund, the "Fund," for the benefit of the California State Water Resources Control Board and the Environmental Protection Agency Region 9 ("Agencies"). The Grantor and the Trustee intend that no third party have access to the Fund except as herein provided. The Fund is established initially as a standby to receive payments and shall not consist of any property. Payments made by the provider of financial assurance pursuant to the Agencies' instruction are transferred to the Trustee and are referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor as provider of financial assurance, any payments necessary to discharge any liability of the Grantor established by the Agencies.

### **Section 4. Payment for Corrective Action and/or Third-Party Liability Claims**

The Trustee shall make payments from the Fund as the Agencies shall direct, in writing, to provide for the payment of the costs of taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases arising from operating the tanks covered by the financial assurance mechanism identified in this Agreement.

The Fund may not be drawn upon to cover any of the following:

- a. Any obligation of Owner under a workers' compensation, disability benefits, or unemployment compensation law or other similar law;
- b. Bodily injury to an employee of Owner arising from, and in the course of employment by Owner;
- c. Bodily injury or property damage arising from the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle, or watercraft;
- d. Property damage to any property owned, rented, loaned to, in the care, custody, or control of, or occupied by Owner that is not the direct result of a release from a petroleum underground storage tank; and
- e. Bodily injury or property damage for which Owner is obligated to pay damages by reason of the assumption of liability in a contract or agreement other than a contract or agreement entered into to meet the requirements of 40 CFR 280.93.

The Trustee shall reimburse the Grantor, or other persons as specified by the Agencies, from the Fund for corrective action expenditures and/or third-party liability claims in

such amounts as the Agencies shall direct in writing. In addition, the Trustee shall refund to the Grantor such amounts as the Agencies specify in writing. Upon refund, such funds shall no longer constitute part of the Fund as defined herein.

#### **Section 5. Payments Comprising the Fund**

Payments made to the Trustee for the Fund shall consist of cash and securities acceptable to the Trustee.

#### **Section 6. Trustee Management**

The Trustee shall invest and reinvest the principal and income of the Fund and keep the Fund invested as a single fund, without distinction between principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions of this Section. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

- (i) Securities or other obligations of the Grantor, or any other owner or operator of the tanks, or any of their affiliates as defined in the Investment Company Act of 1940, as amended, 15 U.S.C. 80a-2(a), shall not be acquired or held, unless they are securities or other obligations of the federal or a state government;
- (ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the federal or state government; and
- (iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

## **Section 7. Commingling and Investment**

The Trustee is expressly authorized in its discretion:

- a. To transfer from time to time any or all of the assets of the Fund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and
- b. To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

## **Section 8. Express Powers of Trustee**

Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

- a. To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;
- b. To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;
- c. To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depository even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depository with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

- d. To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the federal or state government; and
- e. To compromise or otherwise adjust all claims in favor of or against the Fund.

#### **Section 9. Taxes and Expenses**

All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements of the Trustee shall be paid from the Fund.

#### **Section 10. Advice of Counsel**

The Trustee may from time to time consult with counsel, who may be counsel to the Grantor, with respect to any questions arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

#### **Section 11. Trustee Compensation**

The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

#### **Section 12. Successor Trustee**

The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in writing sent to the Grantor and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Section 9.

### **Section 13. Instructions to the Trustee**

All orders, requests, and instructions by the Grantor to the Trustee shall be in writing, signed by such persons as are designated in the attached Schedule B or such other designees as the Grantor may designate by amendment to Schedule B. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the Agencies to the Trustee shall be in writing, signed by the Agencies, and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Agencies hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Agencies, except as provided for herein.

### **Section 14. Amendment of Agreement**

This Agreement may be amended by an instrument in writing executed by the Grantor and the Trustee, or by the Trustee and the Agencies if the Grantor ceases to exist.

### **Section 15. Irrevocability and Termination**

Subject to the right of the parties to amend this Agreement as provided in Section 14, this Trust shall be irrevocable and shall continue until terminated at the written direction of the Grantor and the Trustee, or by the Trustee and the Agencies, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be delivered to the Grantor.

### **Section 16. Immunity and Indemnification**

The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the Agencies issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

### **Section 17. Choice of Law**

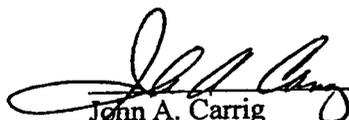

This Agreement shall be administered, construed, and enforced according to the laws of the state of California, or the Comptroller of the Currency in the case of National Association banks.

**Section 18. Interpretation**

As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each section of this Agreement shall not affect the interpretation or the legal efficacy of this Agreement.

In Witness whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals (if applicable) to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in 40 CFR 280.103(b)(1) as such regulations were constituted on the date written above.

## CERTIFICATE OF INSURANCE

Certificate No. 2003-16

Date: December 20, 2002  
Policy No.: S-7501A-03/04

Certificate Holder: CA State Water Resources Control Board  
UST Program  
P. O. Box 944212  
Sacramento, CA 94244

Insured: ConocoPhillips Company and its subsidiaries including Circle K Stores Inc.

Address of The Insured: 600 North Dairy Ashford – ML3136  
Houston, TX 77079

Covered Locations: Per the attached list

Policy Term: December 1, 2002 – December 1, 2004

### CERTIFICATION

- (1) Sooner Insurance Company, the Insurer, as identified above, hereby certifies that it has issued liability insurance covering the following underground storage tanks:

[See attached list]

for taking corrective action and/or compensating third parties for bodily injury and property damage caused by accidental releases in accordance with and subject to the limits of liability, exclusions, conditions, and other terms of the policy arising from operating the underground storage tanks identified above.

The limits of liability are \$1,000,000 each occurrence and \$2,000,000 annual aggregate, exclusive of legal defense costs, which are subject to a separate limit under the policy. The coverage is provided under policy S-7501A-03/04. The effective date of said policy is December 1, 2002.

- (2) The Insurer further certifies the following with respect to the insurance described in Paragraph 1:

- (a) Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy to which this certificate applies

**Management Offices**  
600 North Dairy Ashford – ML 3136  
Houston, TX 77079  
TEL: (281) 293-6680  
FAX: (281) 293-2941

**Administrative Offices**  
112 Lake Street  
Burlington, VT 05401  
TEL: (802) 658-9466  
FAX: (802) 658-5520

- (b) The Insurer is liable for payment of amounts within any deductible applicable to the policy to the provider of corrective action or a damaged third-party, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision shall not apply with respect to that amount of any deductible for which coverage is demonstrated under another mechanism or combination of mechanisms as specified in 40 CFR 280.95-280.102.
- (c) Wherever requested by a Director of an implementing agency, the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.
- (d) Cancellation or any other termination of insurance by the Insurer except, for non-payment of premium or misrepresentation by the insured, will be effective only upon written notice and only after expiration of 60 days after a copy of such written notice is received by the insured. Cancellation for non-payment of premium or misrepresentation by the insured will be effective only upon written notice and only after expiration of a minimum of 10 days after a copy of such written notice is received by the insured.
- (e) The insurance covers claims otherwise covered by the policy that are reported to the Insurer within six months of the effective date of cancellation or non-renewal of the policy except where the new or renewed policy has the same retroactive date or a retroactive date earlier than that of the prior policy, and which arise out of any covered occurrence that commenced after the policy retroactive date, if applicable, and prior to such policy renewal or termination date. Claims reported during such extended reporting period are subject to the terms, conditions limits, including limits of liability and exclusions of the policy.

I hereby certify that the wording of the instrument is identical to the wording in 40 CFR 280.97(b)(2) and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more states.

Re: Financial Responsibility –  
40 CFR Part 280, Subpart H  
Revised for: Name Change to ConocoPhillips and Coverage Period

I am enclosing information relating to ConocoPhillips and its subsidiaries including Circle K Stores Inc. requirement to provide financial responsibility for the ownership and operation of underground storage tanks by its operating entities pursuant to 40 CFR Part 280, Subpart H and similar state regulations. ConocoPhillips Company meets the insurance coverage requirements set forth under 40 CFR § 280.97. It is intended that this financial responsibility likewise satisfy the requirements of authorized state programs.

ConocoPhillips provides this financial responsibility for all underground storage tanks at retail locations, terminals and bulk plants which are owned and/or operated by all ConocoPhillips entities including Circle K Stores Inc.

The information enclosed consists of a Certificate of Insurance and a Certification of Financial Responsibility in the form prescribed by the federal regulations. I am attaching site list for your jurisdiction, according to our database. Please let me know if there are discrepancies between this list and your records.

Please forward this information to the appropriate person in your agency. You may direct any questions to me at (602) 728-7149.

Very truly yours,

Kathy Strickland

**Comments/Observations**

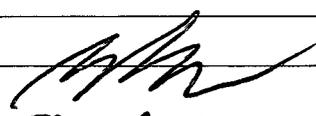

WITNESSED SPILL BUCKET HYDROSTATIC TESTING.

REPLACEMENT OPW SPILL BUCKET FOR WASTE OIL UST WAS TESTED FOR 1 HOUR AND PASSED. UPGRADE REPAIR COMPLETE.

EXISTING SPILL BUCKET FOR 87 OCTANE UST THAT FAILED ANNUAL TEST ON 11-25-2008 WAS TESTED TODAY FOR 1 HOUR AND PASSED.

NOTE TO GREG GALATTO: REPLACE HAZARDOUS WASTE, USED OIL, AND ACCUMULATION START DATE MARKINGS ON WASTE OIL TANK FILL. ALSO REPLACE BURNT OUT GREEN POWER INDICATOR BULB ON VEEDEER-ROOT MONITORING PANEL.

**Comments/Observations**

*Used Oil Tank - Spill Bucker Installation Inspection*

*The new spill bucker was tested hydrostatically using an Incon accelerated test. The tests were performed by James A. Moore of Able Maintenance Inc. One test failed, likely as a result of gusty winds. The second test was passed. Within 30 days, submit to our office a copy of the test report and printout. The new bucker is now approved for use.*

**Re: Plan Check Review SR0830536 – ConocoPhillips Company #256115 at 4350 El Camino Real, Los Altos.**

Dear Mr. Weithman:

Upon review of your submittal regarding replacement of the waste oil UST fill spill bucket at the above facility, the Santa Clara County Hazardous Materials Compliance Division (HMCD) approves the plans with the following conditions:

1. Equipment shall be configured as described in the approved plans.
2. Spill bucket shall be installed high enough and new concrete sufficiently crowned to prevent the accumulation of rainwater above the lid.
3. Contact the undersigned a minimum of 2 working days in advance to schedule an inspection to witness post-installation testing of the bucket.
4. Plan approval may also be required by the City of Los Altos.

**Any substitution of equipment or reconfiguration of systems as described in the approved plans requires prior approval from this Department.**

Should you have any questions, please contact the undersigned inspector at (408) 918-1978.

Greg Breshears  
Senior Hazardous Materials Specialist

December 15, 2008

**To: Inspector Greg Breshears, County of Santa Clara DEH, Haz Mat Division**  
**Fr: Marty Weithman, Service Station Systems/ Able Maintenance, Inc.**

As a follow-up to our email exchange, I am enclosing the permit application, check and other documents for the anticipated direct bury bucket replacements at the Unocal, 4350 El Camino Real, in Los Altos Hills. The scope of work is limited to the installation of one OPW 1C2100 series bucket on the waste oil tank.

Please send, fax or email a copy of the permit to me at the address below.

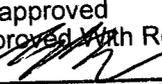

Thank you for your help. Your prompt consideration of this matter is greatly appreciated.

Sincerely,

**Marty Weithman**

# MONITORING SYSTEM CERTIFICATION

Enacted by All Jurisdictions Within the State of California  
 Authority Cited Chapter 6.7, Health and Safety Code, Chapter 16, Division 3 Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

# MONITORING SYSTEM CERTIFICATION

Authority Cited Chapter 6 7, Health and Safety Code, Chapter 16, Division 3 Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## D. Results of Testing/Serviceing

Software Version Installed 15 01

Complete the following checklist

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No *	<input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes which sensors initiate positive shut-down? (check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors, <input type="checkbox"/> Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overflow warning device (i.e. no mechanical overflow prevention valve is installed), is the overflow warning alarm visible and audible at the tank fill points(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was liquid found inside any secondary containment systems designed as dry systems? (check all that apply) <input type="checkbox"/> Product, <input type="checkbox"/> Water If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No *		Is all monitoring equipment operational per manufacturers' specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected

## E. Comments:

Per the inspectors request and office approval I programmed the out put relays for the 91 and 87 for L1 and L2 for short alarm. The printer on TLS is not working right, and the power light and the warning light are burnt out

# Monitoring System Certification

Site Address 4350 EL CAMINO REAL

Date of Testing/Service 11/25/2008

## F. In-Tank Gauging / SIR Equipment

- Check this box if tank gauging is used only for inventory control  
 Check this box if no tank gauging or SIR equipment is installed

Check this box if no tank gauging or SIR equipment is installed

**This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.**

Complete the following checklist.

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Were all tank gauging probes visually inspected for damage and residue buildup?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Was accuracy of system product level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Was accuracy of system water level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Were all probes reinstalled properly?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	Were all items on the equipment manufacturers' maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected

## G. Line Leak Detectors (LLD) :

- Check this box if LLDs are not installed

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate <input checked="" type="checkbox"/> 3 g p h <input type="checkbox"/> 0 1 g p h <input type="checkbox"/> 0 2 g p h
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all items on the equipment manufacturers' maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected

## H. Comments:

The 91 relay/contact is not working properly, needs to be checked out by maintenance

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### Emergency Shut Off (ESO) Testing Results

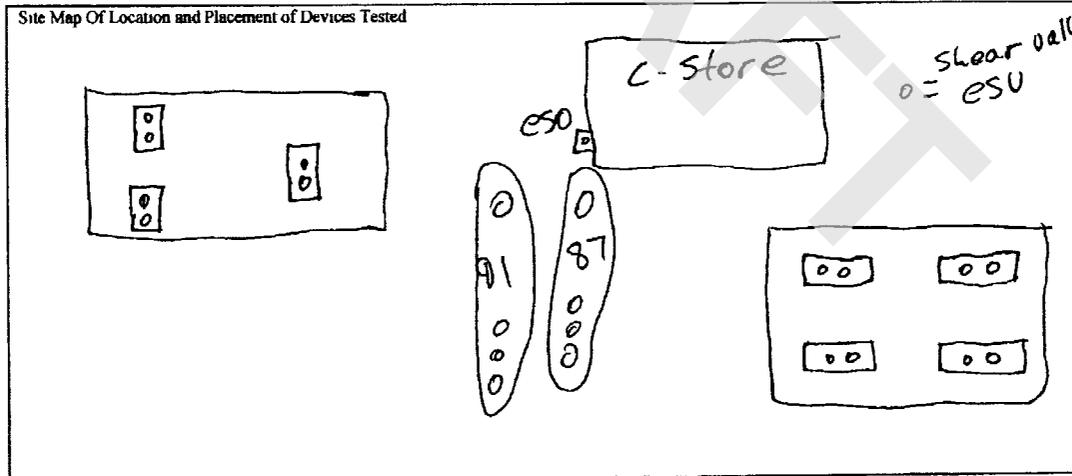

On 11-25-08 in accordance with "ESO Vendor Letter (3-21-05) doc", from Retail Compliance Department, as a part of annual compliance testing, this representative tested the Emergency Shut Off (ESO) switches indicated on this sketch. Findings listed below:

Emergency Shut Off (ESO) Operational?		If No, Provide Maintenance Log #	Date Called	
[X]				

### Dispenser Emergency Shutoff Valve (ESV) Testing Results

On 11-25-08 in accordance with NFPA 30A this representative tested the automatic-closing feature of the Dispenser Emergency Shutoff VALVE(S) (ESV) located in the supply lines at the base of each individual island type dispenser indicated on the diagram below. Each device (#) 14 in all, would automatically close. Findings listed below:

Disp. Emergency Shut Off Valve (ESV) Operational?		If No, Provide Maintenance Log #	Date Called	
[X]

# MONITORING SYSTEM CERTIFICATION

Authorized by All Jurisdictions Within the State of California  
 Authority Cited Chapter 67, Title 23, and Safety Code, Chapter 16, Division 3 Title 23, via Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

### A. General Information

Facility Name CONOCO PHILLIPS 256115 City LOS ALTOS CA Zip 94022  
 Site Address 4350 EL CAMINO REAL Contact Phone No 941-0244  
 Date of Testing/Service 11/29/2007  
 Facility Contact Person MANAGER  
 Make/Model of Monitoring System TLS 350 Work Order Number 2253218

### B. Inventory of Equipment Tested/Certified

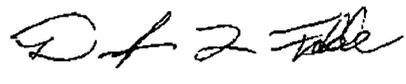

Check the appropriate boxes to indicate specific equipment inspected/serviced

\* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

### C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply)  System set-up  Alarm history report

Technician Name (print) DOUG FALDE Signature   
 Certification No B34906 License No \_\_\_\_\_  
 Testing Company Name Tanknology Phone No (800) 800-4633  
 Site Address 8501 N MoPac Expressway, suite 400, Austin, TX 78759 Date of Testing/Servicing 11/29/2007

# Monitoring System Certification

Site Address 4350 EL CAMINO REAL

Date of Testing/Service 11/29/2007

## D. Results of Testing/Servicing

Software Version Installed 15 01

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? (check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors, <input type="checkbox"/> Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was liquid found inside any secondary containment systems designed as dry systems? (check all that apply) <input type="checkbox"/> Product, <input type="checkbox"/> Water If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is all monitoring equipment operational per manufacturers' specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected

## E. Comments:

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

Dear Regulator,

Enclosed are the results of recent testing performed at the following facility:

CONOCO PHILLIPS 256115  
4350 EL CAMINO REAL

LOS ALTOS, CA. 94022

Testing performed:

- Dynamic Pressure Source
- EVR-Stage I Pressure Integrity Drop Tube
- EVR-Stage I Static Torque tests
- Impact Valve
- Leak detector tests
- Liquid Removal tests
- Monitor Certification
- Secondary Containment-Spill Container
- Stage II pressure decay tests

Sincerely,

A handwritten signature in black ink that reads 'Dawn Kohlmeier'.

# MONITORING SYSTEM CERTIFICATION

Authority Cited Chapter 67, F, *By All Jurisdictions Within the State of California*  
and Safety Code, Chapter 16, Division 3 Title 23, *via Code of Regulations*

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply)  System set-up  Alarm history report

Technician Name (print) BRYAN KEYS Signature   
 Certification No 006053152 License No \_\_\_\_\_  
 Testing Company Name Tanknology Phone No (800) 800-4633  
 Site Address 8501 N MoPac Expressway, suite 400, Austin, TX 78759 Date of Testing/Servicing 12/20/2006

# MONITORING SYSTEM CERTIFICATION

Authority Cited Chapter 6 7, f By All Jurisdictions Within the State of California and Safety Code, Chapter 16, Division 3 Title 23, c mia Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Facility Name CONOCO PHILLIPS 256115 City LOS ALTOS CA Zip 94022  
Site Address 4350 EL CAMINO REAL Contact Phone No 941-0244  
Date of Testing/Service 12/20/2006  
Facility Contact Person MANAGER  
Make/Model of Monitoring System \_\_\_\_\_ Work Order Number 2246418

## B. Inventory of Equipment Tested/Certified

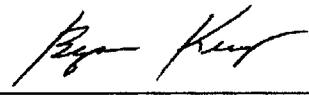

Check the appropriate boxes to indicate specific equipment inspected/serviced

\* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

## C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply)  System set-up  Alarm history report

Technician Name (print) BRYAN KEYS Signature   
Certification No \_\_\_\_\_ License No \_\_\_\_\_  
Testing Company Name Tanknology Phone No (800) 800-4633  
Site Address 8501 N MoPac Expressway, suite 400, Austin, TX 78759 Date of Testing/Servicing 12/20/2006

# Monitoring System Certification

Site Address 4350 EL CAMINO REAL

Date of Testing/Service 12/20/2006

## D. Results of Testing/Service

Software Version Installed 15 01

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? (check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors, <input type="checkbox"/> Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill points(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
<input checked="" type="checkbox"/> Yes*	<input type="checkbox"/> No		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was liquid found inside any secondary containment systems designed as dry systems? (check all that apply) <input type="checkbox"/> Product, <input type="checkbox"/> Water If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is all monitoring equipment operational per manufacturers' specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected

## E. Comments:

CHANGED 420 ANNULAR FOR WO TANK

# MONITORING SYSTEM CERTIFICATION

Use By All Jurisdictions Within the State of California

Authority Cited Chapter 6 7, and Safety Code, Chapter 16, Division 3 Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

### A. General Information

\* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

### C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply)  System set-up  Alarm history report

Technician Name (print) JOEY MESA Signature   
 Certification No 006-05-1532 License No \_\_\_\_\_  
 Testing Company Name Tanknology Phone No (800) 800-4633  
 Site Address 8501 N MoPac Expressway, suite 400, Austin, TX 78759 Date of Testing/Servicing 12/28/2005

## Monitoring System Certification

Site Address 4350 EL CAMINO REAL

Date of Testing/Service 12/28/2005

### D. Results of Testing/Service

Software Version Installed 15 01

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input type="checkbox"/> Yes	<input type="checkbox"/> No *	<input checked="" type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? (check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors, <input type="checkbox"/> Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill points(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was liquid found inside any secondary containment systems designed as dry systems? (check all that apply) <input type="checkbox"/> Product, <input type="checkbox"/> Water If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is all monitoring equipment operational per manufacturers' specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected

Dear Regulator,

Enclosed are the results of recent testing performed at the following facility:

CONOCO PHILLIPS 256115  
4350 EL CAMINO REAL

LOS ALTOS, CA. 94022

Testing performed:

- Dynamic Pressure Source
- Impact Valve
- Leak detector tests
- Monitor Certification
- Secondary Containment-Spill Container
- Stage II pressure decay tests

Sincerely,

A handwritten signature in black ink that reads 'Dawn Kohlmeier'.

# MONITORING SYSTEM CERTIFICATION

By All Jurisdictions Within the State of California

Authority Cited Chapter 6 7, Health and Safety Code, Chapter 16, Division 3 Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

**A. General Information**

Facility Name CONOCO PHILLIPS 256115 City LOS ALTOS CA Zip 94022  
 Site Address 4350 EL CAMINO REAL Contact Phone No 941-0244  
 Date of Testing/Service 01/12/2005  
 Facility Contact Person MANAGER  
 Make/Model of Monitoring System VR TLS-350 Work Order Number 2233857

**B. Inventory of Equipment Tested/Certified**

Check the appropriate boxes to indicate specific equipment inspected/serviced

\* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

**C. Certification**

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply)  System set-up  Alarm history report

Technician Name (print) KELVIN CRUZ Signature   
 Certification No \_\_\_\_\_ License No \_\_\_\_\_  
 Testing Company Name Tanknology Phone No (800) 800-4633  
 Site Address 8900 Shoal Creek, Bldg 200 Austin, TX 78757 Date of Testing/Servicing 01/12/2005

## M. Monitoring System Certification

Site Address 4350 EL CAMINO REAL

Date of Testing/Service 01/12/2005

### D. Results of Testing/Service

Software Version Installed 15.01

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes, which sensors initiate positive shut-down? (check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors, <input type="checkbox"/> Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *	<input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill points(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No		Was liquid found inside any secondary containment systems designed as dry systems? (check all that apply) <input type="checkbox"/> Product, <input type="checkbox"/> Water If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Was monitoring system set-up reviewed to ensure proper settings? Attach set-up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No *		Is all monitoring equipment operational per manufacturers' specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected

**Comments:**

SB-989 Secondary containment tests Test conducted by Nick Harvey

This precision tank testing system has been third party evaluated according to the guidelines of the EPA procedures for annual leak detection systems and found to exceed the criteria of detecting a leak of 0.10 gph with a Pd >95% and Pfa <5% as required by Local, State and Federal EPA UST Technical Standards Part 280 for precision testing systems. This SB-989 secondary containment testing system exceeds the criteria for detection as required by state and local agencies.

## Secondary Containment Testing Report Form

This form is to be used for use by contractors performing periodic testing of UST secondary containment systems. Use this form to report results for all testing conducted. The completed form, written test procedures and printouts of results (if applicable) should be provided to the facility owner/operator for submittal to the local regulatory agency.

## RESULT SUBMITTAL COVER SHEET

FAX # (408) 280-6479  
PHONE # (408) 918-3400

To Greg Breshears  
Of City of LOS ALTOS in SANTA CLARA County  
From Jeff Funk  
Client/Matter **SB-989 Secondary Containment Test Results**  
Date December 13, 2004

Dear Greg Breshears,

Here are the results for the testing completed on December 6, 2004 at the Conoco Phillips station located at 4350 EL CAMINO REAL in LOS ALTOS, CA 94022

These results include dispenser pans, fiberglass tanks sumps, tank annular space, and secondary product piping

Sincerely,

Jeff Funk  
Project Manager  
Wayne Perry Inc  
Phone 916-646-9680  
Fax 916-646-9683

## Secondary Containment Testing Report Form

This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable) **Conoco Phillips - #256115** operator for submittal to the local regulatory agency

Dear Greg,

Test Date: **December 6, 2004**  
Test Location: **4350 EL CAMINO REAL, LOS ALTOS CA**  
Test Time: **7:00 A.M.**

This test will consist of dispenser pans; tank sumps, tank annular space, and secondary product piping.

Sincerely,

Jeff Funk  
Project Manager

**Comments:**

Stage II pressure decay failed, monitor certification, LD, FI, Product line test

This precision tank testing system has been third party evaluated according to the guidelines of the EPA procedures for annual leak detection systems and found to exceed the criteria of detecting a leak of 0.10 gph with a Pd >95% and Pfa <5% as required by Local, State and Federal EPA UST Technical Standards Part 280 for precision testing systems. This SB-989 secondary containment testing system exceeds the criteria for detection as required by state and local agencies.

**Comments:**

This certifies that the monitor and sensors, as listed above, are operational and calibrated per the manufacturer's specification.

**Inspected By:**

Tom Corcoran

# MONITORING SYSTEM CERTIFICATION

Authority Cited: Chapter 6 7, Health and Safety Code; Chapter 16, Division 3, Title 22, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

\*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

**C. Certification** - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply):  System set-up  Alarm history report

Technician Name (print): Tom Corcoran Signature: [Signature]

Certification No.: 007539 License No.: 02-1626

Testing Company Name: Triangle Environmental, Inc. Phone No.: (818)840 7020

Site Address: \_\_\_\_\_ Date of Testing/Servicing: 1/13/04

**D. Results of Testing/Serviceing**

Software Version Installed: \_\_\_\_\_

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
	<input checked="" type="checkbox"/> N/A	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? (Check all that apply) <input checked="" type="checkbox"/> Sump/Trench Sensors; <input type="checkbox"/> Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes; <input type="checkbox"/> No.
	<input type="checkbox"/> N/A	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? <u>90</u> %
	<input type="checkbox"/> N/A	
<input checked="" type="checkbox"/> Yes*	<input type="checkbox"/> No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No	Was liquid found inside any secondary containment systems designed as dry systems? (Check all that apply) <input type="checkbox"/> Product; <input type="checkbox"/> Water. If yes, describe causes in Section E, below
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is all monitoring equipment operational per manufacturer's specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected.

**E. Comments:**

TCS 350

**F. Tank Gauging / SIF Equipment:**

Check this box if tank gauging is used only for inventory control  
 Check this box if tank gauging equipment is used for leak detection monitoring

... is completed if in tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all inlet wiring been inspected for proper size, and termination, including testing for ground faults?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system probe level readings tested?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**G. Line Leak Detectors (LLD):**  Check this box if LLDs are not installed.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	For equipment start-up or annual equipment verification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input checked="" type="checkbox"/> 5 g.p.m., <input type="checkbox"/> 10 g.p.m., <input type="checkbox"/> 50 g.p.m.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No*	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No*	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No*	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No*	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

## SPECIFICATIONS AND REQUIREMENTS

### UNDERGRAND STORAGE TANK SPILL CONTAINMENT TESTING PROCEDURE

---

Reference: California Fire Code, 2001 Edition  
California Health and Safety Code, Chapter 6.7  
California Code of Regulations, Title 23, Division 3, Chapter 16

#### REQUIREMENT

Under the authority of California Health and Safety Code, Chapter 6.7 Section 25284.2, spill containment must be tested annually to demonstrate that the structure is capable of containing a hazardous substance until it is detected and cleaned up. This test procedure applies to all spill containers, whether directly buried in the ground or located within a secondary containment system. This testing is to be performed as part of the required annual inspection.

#### PROCEDURE

1. Remove any liquid and debris from the spill container.
2. Visually evaluate the container's integrity, including: bottom, sides, and connection to the fill pipe, all threaded joints and drain valve. If all appear intact then proceed to item #3. If not, stop here and fail the spill container based on visual inspection.
3. Verify the drain valve is fully closed and fill container with the appropriate product to below the top of the fill adaptors. **Note: For Direct Bury System water must be used for testing.**
4. Direct bury fill spill containers: remove the fill cap, and look for an immediate drop of the level of the water, check if the water is entering the tank through the drain valve, mark a line on the fill riser for the start of the test and test the container for 30 minutes. If the water level has dropped over this period, the container has failed.
5. For spill containers located within a secondary containment system (Sump): remove the fill cap, and look for an immediate drop of the level of the product, check if this water is entering the tank through the fill riser and observe whether it is dropping into the secondary containment. If the product does not remain in the spill container, then it has failed.
3. The disposal of the test water will be left on site to be picked up and disposed of. The product will be drained back into the tank.

**Comments:**

Spill Bucket testing

This precision tank testing system has been third party evaluated according to the guidelines of the EPA procedures for annual leak detection systems and found to exceed the criteria of detecting a leak of 0.10 gph with a Pd >95% and Pfa <5% as required by Local, State and Federal EPA UST Technical Standards Part 280 for precision testing systems. This SB-989 secondary containment testing system exceeds the criteria for detection as required by state and local agencies.

**Comments:**

All 87 chains were too loose to trip shear valves. Adjusted correctly

**Compliance Detail: (List items that need immediate attention.)**

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Facility Name: Perco # 31096 256115 Bldg. No.: -  
 Site Address: 4350 El Camino Real City: LOS ALTOS Zip: -  
 Facility Contact Person: John Contact Phone No.: (415) 941-0244  
 Make/Model of Monitoring System: TLS 350 Date of Testing/Serviceing: 1/15/03

## B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: <u>87</u> <input checked="" type="checkbox"/> In-Tank Gauging Probe. Model: <u>MAG 1</u> <input checked="" type="checkbox"/> Annular Space or Vault Sensor. \*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the reports (check all that apply):  
 System set-up  Alarm history report

Technician Name (print): T. CORCORAN Signature: [Signature]

Certification No.: 007539 License No.: 02-1626

Testing Company Name: Triangle Environmental Phone No.: (818) 840-7020

Site Address: 2525 W. Burbank Blvd., Burbank CA 91505 Date of Testing/Serviceing: 1/15/03

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

*Authority Cited. Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations*

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

**F. In-Tank Gauging / SIR Equipment:**

- Check this box if tank gauging is used only for inventory control.  
 Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system product level readings tested?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system water level readings tested?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**G. Line Leak Detectors (LLD):**

- Check this box if LLDs are not installed.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input checked="" type="checkbox"/> 3 g.p.h.; <input type="checkbox"/> 0.1 g.p.h.; <input type="checkbox"/> 0.2 g.p.h.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

(650) 941-0244

The following underground storage tanks are covered by this permit:

<u>Tank Identification Number</u>	<u>Capacity (gal.)</u>	<u>Tank Contents</u>	<u>Owner's Tank ID</u>
43-000-251391-100024	12,000	REGULAR UNLEADED GASOLINE	TANK 1
43-000-251391-100023	12,000	PREMIUM UNLEADED GASOLINE	TANK 2
43-000-251391-100022	500	WASTE OIL	TANK 3

### Permit Conditions

- In order to maintain this UST permit to operate, the permit holder shall comply with Health and Safety Code, Division 20, Chapters 6.7 and 6.75; and California Code of Regulations (CCR), Title 23, Division 3, Chapters 16 and 18.
- In the event of a spill, leak, or other unauthorized release, the permittee shall comply with the requirements of 23 CCR, Chapter 16, Article 5. Additionally, the permittee shall operate according to a UST Response Plan approved by the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division (HMCD).
- The permittee shall comply with the monitoring procedures described in a UST Monitoring Plan and UST system Plot Plan approved by HMCD.
- The permittee shall notify, and received approval from, HMCD prior to making any changes in monitoring procedures and/or equipment. The permittee shall notify HMCD within 30 days of any change in the usage of any UST, including changes in hazardous substances stored or change of UST owner and/or operator.
- The permittee shall perform testing and preventive maintenance on all leak detection monitoring equipment annually, or more frequently if specified by the equipment manufacturer, and maintain documentation of such servicing on-site.
- The permittee shall obtain approval from HMCD and Fire and Building authorities prior to modifying any UST system.
- Written records of all monitoring performed shall be maintained on-site by the operator and be available for inspection for a period of at least three years from the date the monitoring was performed.
- The permittee shall submit annual permit fees and State UST surcharges. Penalties for late payment will be assessed at 25%.
- Copies of this permit and the approved UST monitoring, response, and plot plans shall be maintained at the tank site.
- Violation of any of the above conditions may be cause for revocation of this UST permit to operate.

**Re: Permit No. 251391-308081, Underground Storage Tank Permit to Operate.**

Dear GREG GALATOLO:

Santa Clara County Department of Environmental Health's Hazardous Materials Compliance Division (HMCD) is the local agency which regulates underground storage tanks (UST) at your facility, **EL CAMINO UNOCAL**, located at **4350 EL CAMINO REAL, LOS ALTOS, CA**. The UST operating permit for that facility is enclosed. This permit must be posted at the tank site.

Please note the following provisions of Santa Clara County Ordinance Code:

**Sec. B11-290(f)** Persons performing secondary containment testing of any underground storage tank system subject to section 2637(a)(4) of title 23 of the California Code of Regulations, as amended, must report test results using the State Water Resources Control Board's "Secondary Containment Testing Report Form" or an alternate format approved by the director.

**Sec. B11-290(g)** The owner or operator of any underground storage tank subject to section 2637(b) of title 23 of the California Code of Regulations, as amended, must coordinate annual certification of underground storage tank monitoring equipment to coincide with the department's annual compliance inspection. Notwithstanding section 2637(b)(5), the UST owner or operator must notify the director at least fourteen calendar days prior to annual certification testing unless the notification requirement is waived by the director.

Please carefully review the permit information and Permit Conditions. Although the permit term is five years, fees will be assessed annually. Should you have any questions, please do not hesitate to contact the undersigned at (408) 918-1978.

Sincerely,

Greg Breshears  
Senior Hazardous Materials Specialist  
Hazardous Materials Compliance Division

Form Letter 20 - 02/24/10

**Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss**  
**County Executive: Jeffrey V. Smith**

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction  
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

To: Agency Name: SANTA CLARA HMCID  
Agency Mailing Address: 1555 BERGEX DR. # 300  
SAN JOSE, CA 95112-2766

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: EL CAMINO 76  
Facility Street Address: 4350 EL CAMINO REAL City: LOS ALTOS  
Date of Current HMBP: 1-5-10

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

<sup>or</sup> Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator (Print): GREG GALATINO Title: OWNER  
Phone: 408-941-0244 Signature: [Signature] Date: 1-5-10

- By checking the upper box on this form, you are certifying that:
- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
  - There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
  - The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
  - The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
  - There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

# UNDERGROUND STORAGE TANK RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION     1. NEW PLAN                       2. CHANGE OF INFORMATION

R01.

## I. FACILITY INFORMATION

FACILITY ID # (Agency Use Only) 1.

BUSINESS NAME (Same as FACILITY NAME) 3.

El CAMINO T6

BUSINESS SITE ADDRESS 103. BUSINESS SITE CITY 104.

4350 El CAMINO REAL

LOS ANGELES

## II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

## III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

**PERIODIC MAINTENANCE:** Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

**EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED:** (Complete only if applicable)

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

## IV. RESPONSIBLE PERSONS

**THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:**

NAME	R40.	TITLE	R50.
Greg GALATOTO		OWNER	
NAME	R41.	TITLE	R51.
NAME	R42.	TITLE	R52.
NAME	R43.	TITLE	R53.

## V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION   
  2. INSPECTION BY QUALIFIED PERSONS   
  3. RECALIBRATION OF EQUIPMENT   
 R60.
99. OTHER (Specify): \_\_\_\_\_   
 R61.

## UNDERGROUND STORAGE TANK RESPONSE PLAN – PAGE 2

### VI. REPORTING AND RECORD KEEPING

We will report/record any overflow, spill, or unauthorized release from a UST system as indicated in this plan.

**Recordable Releases:** Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

**Reportable Releases:** Any overflow, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the California Emergency Management Agency at (800) 852-7550.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

**Record Retention:** Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

### VII. OWNER/OPERATOR SIGNATURE

**CERTIFICATION:** I certify that the information provided herein is true and accurate to the best of my knowledge.

OWNER/OPERATOR SIGNATURE	DATE
	2-28-11
OWNER/OPERATOR NAME (print)	OWNER/TITLE
Greg Galatow	OWNER

(Agency Use Only) This plan has been reviewed and:  Approved  Approved With Conditions  Disapproved

Local Agency Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## UST Response Plan – Instructions

Complete one UST Response Plan for each UST facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. It supplements the Emergency Response Plans and Procedures in the facility's Hazardous Materials Business Plan (HMBP). (Note: Numbering of these instructions follows the data element numbers on the form.)

R01. TYPE OF ACTION – Check the appropriate box to indicate why this plan is being submitted.

1. FACILITY ID NUMBER – This space is for agency use only.
3. BUSINESS NAME – Enter the complete Facility Name.
103. BUSINESS SITE ADDRESS – Enter the street address where the facility is located, including building number, if applicable. Post office box numbers are not acceptable. This information must provide a means to locate the facility geographically.
104. BUSINESS SITE CITY – Enter the city or unincorporated area in which the facility is located.
- R10. EQUIPMENT – If you have spill control or clean-up equipment kept off-site, list that equipment in sections R10 through R15. If no equipment is kept off-site, leave this section blank.
- R20. LOCATION – If you have spill control or clean-up equipment kept off-site, list the equipment location(s) sections R20 through R25. If no equipment is kept off-site, leave this section blank.
- R30. AVAILABILITY – If you have spill control or clean-up equipment kept off-site, list the equipment availability in sections R30 through R35. If no equipment is kept off-site, leave this section blank.
- R40. NAME – At least one person responsible for authorizing any work necessary under this UST Response Plan must be identified. Use sections R40 through R43 to list the name(s) of the responsible person(s).
- R50. TITLE – At least one person responsible for authorizing any work necessary under this UST Response Plan must be identified. Use sections R50 through R53 to list the job title(s) of the responsible person(s).
- R60. MONITORING INDICATORS – Briefly describe the steps that will be taken to verify the presence or absence of a release if the monitoring system indicates the possibility of a release.
- R61. SPECIFY – If Box R60-99 is checked, provide additional details regarding the additional steps that will be taken.

OWNER/OPERATOR SIGNATURE – The owner/operator shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete.

R70. DATE – Enter the date the plan was signed.

R71. OWNER/OPERATOR NAME – Print or type the name of the person signing the plan.

R72. OWNER/OPERATOR TITLE – Enter the title of the person signing the plan.

**UNIFIED PROGRAM CONSOLIDATED FORM  
UNDERGROUND STORAGE TANK  
MONITORING PLAN - (Page 1 of 2)**

RECEIVED BY:  
SANTA CLARA COUNTY  
DEPT. OF ENV. HEALTH

TYPE OF ACTION  1. NEW PLAN  2. CHANGE OF INFORMATION 490-1.  
 PLAN TYPE  1. MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY. 490-2.  
 (Check one item only)  2. THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S): 2011 MAY 18 PM 12:49

**I. FACILITY INFORMATION**

FACILITY ID # (Agency Use Only) \_\_\_\_\_ 1.  
 BUSINESS NAME (Same as Facility Name or DBA) El CAMINO TO 3.  
 BUSINESS SITE ADDRESS 4350 EICAMINO REAL 103. CITY Los Altos 104.

**II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE**

Testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) must be performed at the frequency specified by the equipment manufacturers' instructions, or annually, whichever is more frequent. Such work must be performed by qualified personnel. [23 CCR §2632, 2634, 2638, 2641]  
 MONITORING EQUIPMENT IS SERVICED  1. ANNUALLY  99. OTHER (Specify): 490-3a.  
 490-3b.

**III. MONITORING LOCATIONS**

1. NEW SITE PLOT PLAN/MAP SUBMITTED WITH THIS PLAN  2. SITE PLOT PLAN/MAP PREVIOUSLY SUBMITTED [23 CCR §2632, 2634] 490-4.

**IV. TANK MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S)** (Check all that apply)

1. CONTINUOUS ELECTRONIC TANK MONITORING OF ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S) WITH AUDIBLE AND VISUAL ALARMS. [23 CCR §2632, 2634] 490-5.  
 SECONDARY CONTAINMENT IS:  a. DRY  b. LIQUID FILLED  c. PRESSURIZED  d. UNDER VACUUM 490-6.  
 PANEL MANUFACTURER: VEEPEL ROOT 490-7. MODEL #: 7LS 350 490-8.  
 LEAK SENSOR MANUFACTURER: FE PETRO MLD 490-9. MODEL #(S): \_\_\_\_\_ 490-10.  
 2. AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S). [23 CCR §2643] 490-11.  
 PANEL MANUFACTURER: \_\_\_\_\_ 490-12. MODEL #: \_\_\_\_\_ 490-13.  
 IN-TANK PROBE MANUFACTURER: \_\_\_\_\_ 490-14. MODEL #(S): \_\_\_\_\_ 490-15.  
 LEAK TEST FREQUENCY:  a. CONTINUOUS  b. DAILY/NIGHTLY  c. WEEKLY 490-16.  
 d. MONTHLY  e. OTHER (Specify): \_\_\_\_\_ 490-17.  
 PROGRAMMED TESTS:  a. 0.1 g.p.h.  b. 0.2 g.p.h.  c. OTHER (Specify): \_\_\_\_\_ 490-18.  
 3. MONTHLY STATISTICAL INVENTORY RECONCILIATION [23 CCR §2646.1] 490-20.  
 4. WEEKLY MANUAL TANK GAUGING (MTG) [23 CCR §2645] TESTING PERIOD:  a. 36 HOURS  b. 60 HOURS 490-21.  
 5. TANK INTEGRITY TESTING PER [23 CCR §2643.1] 490-22.  
 TEST FREQUENCY:  a. ANNUALLY  b. BIENNIALY  c. OTHER (Specify): \_\_\_\_\_ 490-24.  
 99. OTHER (Specify): \_\_\_\_\_ 490-25.  
 490-26.  
 490-27.

**V. PIPE MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S)** (Check all that apply)

1. CONTINUOUS MONITORING OF PIPE/PIPING SUMP(S) AND OTHER SECONDARY CONTAINMENT WITH AUDIBLE & VISUAL ALARMS. [23 CCR §2636] 490-28.  
 SECONDARY CONTAINMENT IS:  a. DRY  b. LIQUID FILLED  c. PRESSURIZED  d. UNDER VACUUM 490-29.  
 PANEL MANUFACTURER: VEEPEL ROOT 490-30. MODEL #: 7LS 350 490-31.  
 LEAK SENSOR MANUFACTURER: FE PETRO MLD 490-32. MODEL #(S): 794380-208 490-33.  
 PIPING LEAK ALARM TRIGGERS AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN.  a. YES  b. NO 490-34.  
 FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN.  a. YES  b. NO 490-35.  
 2. MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED. [23 CCR §2636] 490-36.  
 MLLD MANUFACTURER(S): \_\_\_\_\_ 490-37. MODEL #(S): \_\_\_\_\_ 490-38.  
 3. ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS. [23 CCR §2636] 490-39.  
 ELLD MANUFACTURER(S): \_\_\_\_\_ 490-40. MODEL #(S): \_\_\_\_\_ 490-41.  
 PROGRAMMED IN LINE LEAK TEST:  a. MINIMUM MONTHLY 0.2 g.p.h.  b. MINIMUM ANNUAL 0.1 g.p.h. 490-42.  
 ELLD DETECTION OF A PIPING LEAK TRIGGERS AUTOMATIC PUMP SHUTDOWN.  a. YES  b. NO 490-43.  
 ELLD FAILURE/DISCONNECTION TRIGGERS AUTOMATIC PUMP SHUTDOWN.  a. YES  b. NO 490-44.  
 4. PIPE INTEGRITY TESTING. 490-45.  
 TEST FREQUENCY:  a. ANNUALLY  b. EVERY 3 YEARS  c. OTHER (Specify) \_\_\_\_\_ 490-46.  
 5. VISUAL PIPE MONITORING. 490-48.  
 FREQUENCY:  a. DAILY  b. WEEKLY  c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED\* 490-49.  
 \* Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)  
 6. SUCTION PIPING MEETS EXEMPTION CRITERIA. [23 CCR §2636(a)(3)] 490-50.  
 7. NO REGULATED PIPING PER HEALTH AND SAFETY CODE, DIVISION 20, CHAPTER 6.7 IS CONNECTED TO THE TANK SYSTEM. 490-51.  
 99. OTHER (Specify) \_\_\_\_\_ 490-52.  
 490-53.

# UPCF UST Monitoring Plan – Page 1 Instructions

Complete a separate UST Monitoring Plan for each UST monitoring system at the facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. Your local agency may require you to obtain approval prior to installing or modifying monitoring equipment. (Note: Numbering of these instructions follows the data element numbers on the form.)

- 490-1. TYPE OF ACTION – Check the appropriate box to indicate why this plan is being submitted.
- 490-2. PLAN TYPE – Check the appropriate box to indicate whether this plan covers all, or merely some, of the USTs at the facility. If the plan covers only some of the tanks, identify those tanks in the space provided [e.g., by using the Tank ID #(s) in item 432 of the UST Operating Permit Application – Tank Information Form(s)].
1. FACILITY ID NUMBER – This space is for agency use only.
3. BUSINESS NAME – Enter the complete Facility Name.
103. BUSINESS SITE ADDRESS – Enter the street address where the facility is located, including building number, if applicable. Post office box numbers are not acceptable. This information must provide a means to locate the facility geographically.
104. CITY – Enter the city or unincorporated area in which the facility is located.
- 490-3a. MONITORING EQUIPMENT IS SERVICED – Check the appropriate box to specify the frequency of monitoring equipment testing/certification.
- 490-3b. Specify Other frequency for monitoring equipment servicing.
- 490-4. SITE PLAN – Indicate if a site plan/map is submitted with this monitoring plan or if it was submitted previously and is current for the facility. Monitoring plans must include a Site Plot Plan/Map showing the tank and piping layouts and the locations where monitoring is performed (i.e., location of sensors, probes, line leak detectors, monitoring system control panel, etc.).
- 490-5. IV-1 CONTINUOUS ELECTRONIC MONITORING – Indicate if this monitoring method is being used to monitor the tanks.
- 490-6. SECONDARY CONTAINMENT – If IV-1 is checked, check the appropriate box to describe the environment inside the tank secondary containment.
- 490-7. PANEL MANUFACTURER – If IV-1 is checked, enter the name of the manufacturer of the monitoring system control panel (console).
- 490-8. MODEL # – If IV-1 is checked, enter the model number for the monitoring system control panel.
- 490-9. LEAK SENSOR MANUFACTURER – If IV-1 is checked, enter the name of the manufacturer of the sensor(s). If additional space is needed, use Section X.
- 490-10. MODEL #(S) – If IV-1 is checked, enter the model number for each type of sensor installed. If additional space is needed, use Section X.
- 490-11. IV-2 AUTOMATIC TANK GAUGING-Indicate if this method is used for monitoring the UST's.
- 490-12. PANEL MANUFACTURER – If IV-2 is checked, enter the name of the manufacturer of the monitoring system control panel (console).
- 490-13. MODEL # – If IV-2 is checked, enter the model number for the monitoring system control panel.
- 490-14. IN-TANK PROBE MANUFACTURER – If IV-2 is checked, enter the name of the manufacturer of the probe(s).
- 490-15. MODEL #(S) – If IV-2 is checked, enter the model number for each type of in-tank probe installed. If additional space is needed, use Section X.
- 490-16. LEAK TEST FREQUENCY – If IV-2 is checked, check the appropriate box to describe the in-tank leak test frequency.
- 490-17. SPECIFY – If 490-16e is checked, enter the frequency of programmed leak tests.
- 490-18. PROGRAMMED TESTS – If IV-2 is checked, check the appropriate box to describe the tests programmed into the ATG system.
- 490-19. SPECIFY – If 490-18c is checked, enter the frequency of in-tank leak testing.
- 490-20. IV-3 INVENTORY RECONCILIATION – Check the box if statistical inventory reconciliation is performed.
- 490-21. IV-4 WEEKLY MANUAL TANK GAUGING. Indicate if this method is used to monitor the tanks.
- 490-22. TESTING PERIOD – If IV-4 is checked, check the appropriate box to describe the MTG testing period.
- 490-23. IV-5 TANK INTEGRITY TESTING: Indicate if this method is used to monitor the tanks.
- 490-24. TEST FREQUENCY – If IV-5 is checked, check the appropriate box to describe the frequency of tank integrity testing.
- 490-25. OTHER: If 490-24c is checked, specify other test frequency.
- 490-26. IV-99 OTHER: Indicate if monitoring of the tanks occurs that is not indicated in any other category.
- 490-27. If IV-99 is checked, enter a brief description of the other tank monitoring method(s) used (e.g., vadose zone monitoring per 23 CCR §2647, groundwater monitoring per 23CCR §2648). Include the monitoring frequency (e.g., Continuous, Weekly). If additional space is needed, use Section X.
- 490-28. V-1 CONTINUOUS MONITORING OF PIPE/PIPING SUMP(S) AND OTHER SECONDARY CONTAINMENT WITH AUDIBLE AND VISUAL ALARMS: Indicate if this is the monitoring method used for the piping.
- 490-29. SECONDARY CONTAINMENT: If V-1 is checked, Check the appropriate box to describe the environment inside piping secondary containment.
- 490-30. PANEL MANUFACTURER – If V-1 is checked, enter the name of the manufacturer of the monitoring system control panel (console).
- 490-31. MODEL # – If V-1 is checked, enter the model number for the monitoring system control panel.
- 490-32. LEAK SENSOR MANUFACTURER – If V-1 is checked, enter the name of the manufacturer of the sensor(s).
- 490-33. MODEL #(S) – If V-1 is checked, enter the model number for each type of sensor installed. If additional space is needed, use Section X.
- 490-34. PIPING LEAK ALARM TRIGGERS AUTOMATIC PUMP SHUTDOWN – If V-1 is checked, check Yes or No.
- 490-35. FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN – If V-1 is checked, check Yes or No.
- 490-36. V-2 PIPE MECHANICAL LINE LEAK DETECTORS PERFORM 3 GPH LEAK TESTS: Indicate if this monitoring method is used to monitor the pipelines.
- 490-37. MLLD MANUFACTURER(S) – If V-2 is checked, enter the name(s) of the manufacturer(s) of the mechanical line leak detector(s). If additional space is needed, use Section X.
- 490-38. MODEL #(s) – If V-2 is checked, Enter the model number for each type of mechanical line leak detector installed. If additional space is needed, use Section X.
- 490-39. V-3 PIPE ELECTRONIC LINE LEAK DETECTORS: Indicate if this monitoring method is used to monitor the pipelines.
- 490-40. ELLD MANUFACTURER – If V-3 is checked, Enter the name of the manufacturer of the electronic line leak detector(s).
- 490-41. MODEL #(S) – If V-3 is checked, enter the model number for each type of electronic line leak detector installed. If additional space is needed, use Section X.
- 490-42. PROGRAMMED LINE INTEGRITY TESTS – If V-3 is checked, check the appropriate box to describe the type of tests programmed into the monitoring system.
- 490-43. ELLD DETECTION OF A PIPING LEAK ALARM TRIGGERS PUMP SHUTDOWN – If V-1 is checked, check Yes or No.
- 490-44. ELLD DETECTION OF A PIPING LEAK FAILURE/DISCONNECTION TRIGGERS PUMP SHUTDOWN – If V-1 is checked, check Yes or No.
- 490-45. V-4 PIPE INTEGRITY TESTING – Indicate if this monitoring method is used to monitor the pipelines.
- 490-46. TEST FREQUENCY – If V-4 is checked, check the appropriate box to describe the frequency of pipe integrity testing.
- 490-47. SPECIFY – If 490-46-99 is checked, enter the frequency of pipe integrity testing.
- 490-48. V-5 VISUAL PIPE MONITORING – Indicate if this monitoring method is used to monitor the pipelines.
- 490-49. If V-5 is checked, check the appropriate box to describe the frequency of visual monitoring.
- 490-50. SUCTION PIPING MEETS EXEMPTION CRITERIA - Indicate if this monitoring method is used to monitor the pipelines.
- 490-51. NO REGULATED PIPING PER HEALTH AND SAFETY CODE, DIVISION 20, CHAPTER 6.7 IS CONNECTED TO THE TANK SYSTEM - Check this box if no piping in the tank system is regulated under the UST law, or there is no piping.
- 490-52. V-99 OTHER – Indicate if another method is used for pipeline monitoring.
- 490-53. SPECIFY – Enter a brief description of the other line monitoring method(s) used. If additional space is needed, see Section X. Be sure to clearly describe monitoring method(s) and frequency.

This monitoring plan must include a Site Plan showing the general tank and piping layouts and the locations where monitoring is performed (i.e., location of each sensor, line leak detector, monitoring system control panel, etc.). If you already have a diagram (e.g., current UST Monitoring Site Plan from a Monitoring System Certification form, Hazardous Materials Business Plan map, etc.) that shows all required information, include it with this plan.

**UNIFIED PROGRAM CONSOLIDATED FORM  
UNDERGROUND STORAGE TANK  
MONITORING PLAN – (Page 2 of 2)**

**VI. UNDER DISPENSER CONTAINMENT (UDC) MONITORING**

*(Check all that apply)*

UDC MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S)

1. CONTINUOUS ELECTRONIC MONITORING  2. FLOAT AND CHAIN ASSEMBLY <sup>1</sup>  3. ELECTRONIC STAND-ALONE 490-54a.  
 4. NO DISPENSERS  99. OTHER (Specify) 490-54b.

LEAK MONITOR MANUFACTURER: VEEDER ROOT 490-55. MODEL #: \_\_\_\_\_ 490-56.

LEAK SENSOR MANUFACTURER: FE PETRO 490-57. MODEL #(S): \_\_\_\_\_ 490-58.

DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS.  a. YES  b. NO 490-59.

UDC LEAK ALARM TRIGGERS AUTOMATIC PUMP SHUTDOWN.  a. YES  b. NO 490-60.

FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN.  a. YES  b. NO 490-61.

UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER.  a. YES  b. NO 490-62.

UDC CONSTRUCTION IS:  1. SINGLE WALL  2. DOUBLE WALL 490-63.

IF DOUBLE WALL: \_\_\_\_\_ 490-64a.

UDC INTERSTITIAL SPACE IS MONITORED BY:  a. LIQUID  b. PRESSURE  c. VACUUM 490-64b.

A LEAK WITHIN THE SECONDARY CONTAINMENT OF THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS.  a. YES  b. NO 490-64b.

**VII. PERIODIC SYSTEM TESTING**

1. ELD TESTING: THIS FACILITY HAS BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT ENHANCED LEAK DETECTION (ELD) MUST BE PERFORMED. PERIODIC ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED. [23 CCR §2644.1] 490-65.

2. SECONDARY CONTAINMENT COMPONENTS ARE TESTED EVERY 36 MONTHS. 490-66.

3. SPILL BUCKETS ARE TESTED ANNUALLY. 490-67.

**VIII. RECORD KEEPING**

The following monitoring/maintenance records are kept for this facility: 490-68.

- a. ALARM LOGS  b. VISUAL INSPECTION RECORDS  c. TANK INTEGRITY TESTING RESULTS  
 d. SIR TESTING RESULTS (and supporting documentation records)  e. TANK GAUGING RESULTS (and supporting documentation records)  
 f. ATG TESTING RESULTS (and supporting documentation records)  g. CORROSION PROTECTION 60-DAY LOGS  
 h. EQUIPMENT MAINTENANCE AND CALIBRATION RECORDS

**IX. TRAINING**

Personnel with UST monitoring responsibilities are familiar with all of the following documents relevant to their job duties: 490-69a.

REFERENCE DOCUMENTS MAINTAINED AT FACILITY *(Check all that apply)*

THIS UNDERGROUND STORAGE TANK MONITORING PLAN (Required) 490-69b.

OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT (Required) 490-69c.

CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS 490-69d.

CALIFORNIA UNDERGROUND STORAGE TANK LAW 490-69e.

STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION" 490-69f.

SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" 490-69g.

OTHER (Specify): \_\_\_\_\_ 490-69h.

This facility has a "Designated UST Operator" who has passed the California UST System Operator Exam administered by the International Code Council (ICC). The "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems annually, and within 30 days of hire. This training will include, but is not limited to, the following: 490-70.

- > Operation of the UST systems in a manner consistent with the facility's best management practices.
- > The facility employee's role with regard to the monitoring equipment as specified in this UST Monitoring Plan.
- > The facility employee's role with regard to spills and overfills as specified in the facility's UST Response Plan.
- > Name(s) of contact person(s) for emergencies and monitoring alarms.

**X. COMMENTS/ADDITIONAL INFORMATION**

Provide additional comments here or indicate how many pages with additional information on specific monitoring procedures are attached to this plan. 490-71.

**XI. PERSONNEL RESPONSIBILITIES**

The UST Owner/Operator is responsible for ensuring that: 1.) the daily/routine UST monitoring activities and maintenance of UST leak detection equipment covered by this plan occurs; 2.) all conditions that indicate a possible release are investigated; and 3.) all monitoring records are maintained properly.

THE FOLLOWING PERSON(S) ARE RESPONSIBLE FOR PERFORMING THE MONITORING AND EQUIPMENT MAINTENANCE:

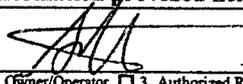

NAME: GREG GALATOLO 490-72. TITLE: OWNER 490-73.

NAME: \_\_\_\_\_ 490-74. TITLE: \_\_\_\_\_ 490-75.

The Designated UST Operator shall perform a monthly visual inspection of the facility, provide a report to the owner/operator, and inform the owner/operator of any conditions that need follow-up action.

**XII. OWNER/OPERATOR SIGNATURE**

**CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.**

APPLICANT SIGNATURE  DATE: \_\_\_\_\_ 490-77.

REPRESENTING:  1. Tank Owner/Operator  2. Facility Owner/Operator  3. Authorized Representative of Owner 490-76.

APPLICANT NAME (print): GREG GALATOLO 490-78. APPLICANT TITLE: OWNER 490-79.

## Underground Storage Tank Monitoring Program

1. Owner/Operator/Site: GREGORY P GALATOLO Site # 256115  
2. Site Address and Phone: 4350 EL CAMINO REAL LOS ALTOS CA 94022

### 4. Frequency of Monitoring Method and location Where Monitoring will be Performed:

#### Tanks:

Tank(s) 01 02 are monitored continuously using an electronic probe in the interstitial space of the tank.

Tank(s) 03 are monitored monthly using an in-tank gauge equipped with leak detection capable detecting a 0.2 gallon per hour leak.

#### Piping:

Pipe(s) 01 02 are monitored continuously by a liquid detecting probe located in the turbine sump.

#### Dispenser:

Dispenser pans are continuously monitored and equipped with automatic shut-off devices.

---

### 5. Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:

Operator Name and Number: GREGORY P GALATOLO - (650) 941-0244

Maintenance: Service station systems 408-971-2445

---

### 6. Reporting Format:

The monitor will be certified annually and a report generated and provided to the operator. The operator is to report all audible or visual alarm conditions that may indicate a potential release to the responsible party for maintenance listed under #5. In the event of a test failure, the specific piece(s) of equipment are taken out of service and proper reporting procedures followed.

---

### 7. State the Preventative Maintenance Schedule for the Monitoring Equipment

The electronic monitoring system is certified annually to be functioning per manufacturer instructions by a properly trained and certified third-party contractor. Repairs are made by the responsible party listed under #5 upon notification by the station operator. The station operator is responsible for maintaining copies of testing results and repair records on site and available for agency inspectors. The 3rd-party testing requirements and frequencies for the tank system are summarized below.

#### **Contractor UST System Testing Requirements/Frequency**

Contractor testing of the primary tank(s) is not required.

Line leak detector(s) tested annually.

All secondary containment components are tested every 3 years.

Contractor testing of the primary piping is not required.

Fuel spill buckets require annual testing.

---

### 8. Describe the Training Needed for the Operation of Both the Tank System and the Monitoring Equipment

The operator has been trained to check the tank system and/or monitor daily for proper operation. Training topics include performing daily/monthly inventory reconciliation, inspection of the monitoring system to ensure it is operating properly and not in alarm, periodic inspection of under-dispenser for leaks, inspection of fill and vapor spill buckets, inspection of hoses, nozzles, and other ancillary tank system equipment. If the tank system and/or monitor is not functioning correctly, the operator has been instructed to repair the equipment (if appropriate) or contact the responsible party for Maintenance listed under Item #5 for repairs.

## Spill Response Plan

2011 MAY 18 PM 12:49

### For Minor Releases:

If the release is less than 5 gallons and service station personnel can contain the release immediately (and the release does not go off-site, enter any waterway, or contact bare soils), do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up release material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent material, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state, and local regulations.

### For Major Releases:

If the release is greater than 5 gallons, threatens to leave the site, enter any waterway, or contact bare soils, or there is an injury to a person, do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 911
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify the following personnel: SolvOne at 1-866-215-0965 Regional HSE Specialist
9. Attempt to contain the spill with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1-800-852-7550.
11. In the case of an unauthorized release from the primary containment, Greg Galatolo will be the party to notify a license and qualified contractor to respond to the spill within 8 hours, and address all required repairs. Exceptions to this will be reported to the agency as required under California health and safety code section 25295.

# Underground Storage Tank Monitoring Program

1. Owner/Operator/Site: GREGORY P GALATOLO Site # 256115  
2. Site Address and Phone: 4350 EL CAMINO REAL LOS ALTOS CA 94022

## 4. Frequency of Monitoring Method and location Where Monitoring will be Performed:

**Tanke:** Tank(s) 01 02 are monitored continuously using an electronic probe in the interstitial space of the tank.  
Tank(s) 03 are monitored monthly using an in-tank gauge equipped with leak detection capable detecting a 0.2 gallon per hour leak.

**Piping:** Pipe(s) 01 02 are monitored continuously by a liquid detecting probe located in the turbine sump.

**Dispenser:** Dispenser pans are continuously monitored and equipped with automatic shut-off devices.

## 5. Name(s) and title(s) of the person(s) responsible for performing the monitoring and/or maintaining the equipment:

Operator Name and Number: GREGORY P GALATOLO - (650) 941-0244  
Maintenance: SolvOne - 1-866-215-0986

## 6. Reporting Format:

The monitor will be certified annually and a report generated and provided to the operator. The operator is to report all audible or visual alarm conditions that may indicate a potential release to the responsible party for maintenance listed under #5. In the event of a test failure, the specific piece(s) of equipment are taken out of service and proper reporting procedures followed. The operator is to report all suspected and confirmed releases to the ConocoPhillips Field Representative, as well as the responsible party for maintenance listed under #5.

## 7. State the Preventative Maintenance Schedule for the Monitoring Equipment

The electronic monitoring system is certified annually to be functioning per manufacturer instructions by a properly trained and certified third-party contractor. Repairs are made by the responsible party listed under #5 upon notification by the station operator. The station operator is responsible for maintaining copies of testing results and repair records on site and available for agency inspectors. The 3rd-party testing requirements and frequencies for the tank system are summarized below.

### Contractor UST System Testing Requirements/Frequency

Contractor testing of the primary tank(s) is not required.

Line leak detector(s) tested annually.

All secondary containment components are tested every 3 years.

Contractor testing of the primary piping is not required.

Fuel spill buckets require annual testing.

## 8. Describe the Training Needed for the Operation of Both the Tank System and the Monitoring Equipment

The operator has been trained to check the tank system and/or monitor daily for proper operation. Training topics include performing daily/monthly inventory reconciliation, inspection of the monitoring system to ensure it is operating properly and not in alarm, periodic inspection of under-dispenser for leaks, inspection of fill and vapor spill buckets, inspection of hoses, nozzles, and other ancillary tank system equipment. If the tank system and/or monitor is not functioning correctly, the operator has been instructed to repair the equipment (if appropriate) or contact the responsible party for Maintenance listed under Item #5 for repairs.

**Record Keeping**  
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (\*) are required.]*:

<input checked="" type="checkbox"/>	Current employees' training records <i>(to be retained until closure of the facility)</i> *
<input checked="" type="checkbox"/>	Former employees' training records <i>(to be retained at least three years after termination of employment)</i> *
<input checked="" type="checkbox"/>	Training Program(s) <i>(i.e., written description of introductory and continuing training)</i> *
<input checked="" type="checkbox"/>	Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/>	Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/>	Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/>	Record of hazardous waste tank daily inspections *
<input type="checkbox"/>	Description and documentation of facility emergency response drills

*Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.*

**Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:**

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at [www.unidocs.org](http://www.unidocs.org)), you do not need to attach a copy.]*

Check the appropriate box:

<input checked="" type="checkbox"/>	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
<input type="checkbox"/>	We will use our own documents to record inspections. <i>(A blank copy of each document used must be attached to this HMBP.)</i>

EMPLOYEE TRAINING PLAN (con't)

MEDICAL FACILITIES:

PRIMARY FACILITY:

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

ALTERNATE FACILITY:

STANFORD HOSPITAL  
300 PASTEUR DR PALO ALTO  
650-723-5111

FIRST AID PROCEDURES (for gasoline and/or diesel fuel): For further information, refer to the MSDS sheets.

EYE CONTACT:

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

SKIN CONTACT:

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

INHALATION (Breathing):

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

INGESTION (Swallowing):

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS:

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product.

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

All employees should review the Hazardous Material Plan, (this document). Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor the site for leaks of hazardous materials. As a supplement to this package, employees should also review and have access to the the Emergency Response Plan and the Materials Safety Data Sheets. Each employee must be drilled in all emergency response procedures contained herein.

### UTILITY SHUT-OFFS

- \* **PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks. Shut-off pumps in case of a leak to help prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- \* **TANK MONITORING ALARM:** This is used to monitor the Underground Storage Tanks. This panel may indicate when a potential leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- \* **ELECTRICAL PANEL:** The panel allows you to selectively cut power to lights, signs, and pumps. The main switch allows you to cut-off all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- \* **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- \* **NATURAL GAS SHUT-OFF:** If your facility has natural gas, it may be necessary to shut-off the flow in case of an emergency.  
Location: NONE
- \* **PROPANE/LPG SHUT-OFF:**  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* **FIRE EXTINGUISHER:** Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* **SPILL/CLEAN UP KIT:**  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* **RESPONSE EQUIPMENT:** These items are to be used to prevent skin contact with hazardous materials  
Broom: SERVICE BAY  
Shovel: SERVICE BAY  
Gloves: SERVICE BAY  
Goggles: SERVICE BAY
- \* **FIRST AID KIT:** Use for minor incidents and treatment.  
Location: 1-IN SERVICE BAY STORE AREA
- \* **EVACUATION ASSEMBLY AREA:** All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* **ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:**  
Location: SALES OFFICE

# UNDERGROUND STORAGE TANK RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION     1. NEW PLAN     2. CHANGE OF INFORMATION

R01.

## I. FACILITY INFORMATION

FACILITY ID # (Agency Use Only)    1.

BUSINESS NAME (Same as FACILITY NAME)    3

BUSINESS SITE ADDRESS    103. BUSINESS SITE CITY    104.

4350 EL CAMINO REAL    LOS ALTOS

## II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

## III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

**PERIODIC MAINTENANCE:** Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

**EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED:** (Complete only if applicable)

EQUIPMENT	LOCATION	AVAILABILITY

Corey Galatolo		OWNER	
NAME	R41.	TITLE	R51.
NAME	R42.	TITLE	R52.
NAME	R43.	TITLE	R53.

## V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION   
  2. INSPECTION BY QUALIFIED PERSONS   
  3. RECALIBRATION OF EQUIPMENT    R60  
 99. OTHER (Specify):    R61.

**UNDERGROUND STORAGE TANK  
RESPONSE PLAN – PAGE 2**

**VI. REPORTING AND RECORD KEEPING**

We will report/record any overflow, spill, or unauthorized release from a UST system as indicated in this plan.

**Recordable Releases:** Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

**Reportable Releases:** Any overflow, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water;
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

**Record Retention:** Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

**VII. OWNER/OPERATOR SIGNATURE**

<b>E.</b> Signature of Tank Owner or Operator 	Date 2-27-11	Name and Title of Tank Owner or Operator Greg Galatolo
Signature of Witness or Notary	Date	Name of Witness or Notary

**Submit original to local UST regulatory agency. Keep a copy at each UST facility.**

(Instructions on Next Page)

**Comment [GB1]:** Effective July 1, 1995, California Small Businesses and California Businesses with 500 or fewer employees must demonstrate at least \$5,000 of underground storage tank financial responsibility, exclusive of the State UST Cleanup Fund; businesses with more than 500 employees must demonstrate at least \$10,000 exclusive of the UST Cleanup Fund. [H&SC §25299.32]

The Chief Financial Officer or the owner or operator must sign, under penalty of perjury, a letter worded EXACTLY as shown in this template (please refer to the "Help Text" in the lower left corner of your monitor screen):

### LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for el, camino, 76,

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least \$ \$5,000.00 per occurrence and \$ \$5,000.00 annual aggregate coverage.

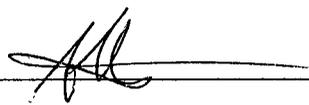

Underground storage tanks at the following facilities are assured by this letter:

el camino 76  
4350 el camino real  
los altos, ca 94022

1. Amount of annual aggregate coverage being assured by this letter	\$ <u>\$5,00</u> <u>0.00</u>
2. Total tangible assets	\$ <u>\$10,2</u> <u>45,000.00</u>
3. Total liabilities	\$ <u>\$4,25</u> <u>0,000.00</u>
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	\$ <u>\$5,99</u> <u>5,000.00</u>

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at los altos ca on February 27, 2011.

## LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for el, camino, 76.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least \$5,000.00 per occurrence and \$5,000.00 annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

el camino 76  
4350 el camino real  
los altos, ca 94022

1. Amount of annual aggregate coverage being assured by this letter	\$5,000.00
2. Total tangible assets	\$8,645,000.0
	0
3. Total liabilities	\$4,320,000.0
	0
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	\$4,325,000.0
	0

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at los altos,ca

On November 17, 2009.

**Re: State Fire Marshal/California Air Resources Board Alert Regarding Vapor Systems Technologies (VST) Fuel Dispensing Nozzles.**

Dear GREG GALATOLO:

Attached is an alert bulletin from the California State Fire Marshal regarding safety issues associated with **Model VST-EVR-NB gasoline dispensing nozzles**. If your facilities operate fuel dispensers equipped with this type of nozzle, please carefully review the bulletin and immediately begin performing and documenting the daily checks specified in California Air Resources Board (CARB) Special Advisory Number 418.

Should you have any questions, please contact CARB at (916) 327-0900.

Sincerely,

Jim Blamey

**Comments/Observations**

- On site with Asa Cosby a representative from A&J Environmental.  
 - Verified Mr. Cosby's credentials from VeederRoot. ICC certificates for technician and installer.  
 - Verified the following components to verify operability of the system after the EVR phase II/cold start:  
 • Liquid sensors (annulars & sump) - functional  
 • Overfill alarms - functional.  
 - Obtained set up & alarm history prior to and after cold start.

**Re: Plan Check Review: SR0833826; County Plan Check Number: NA**  
**Facility Name: El Camino Unocal**  
**Project Location: 4350 El Camino Real, Los Altos**  
**Project Description: Install ISD/Cold Start UST Monitoring System**

Santa Clara County Hazardous Materials Program has reviewed the submittal for the project referenced above and **approves the plans with the following conditions:**

1. Systems shall be configured as described in the enclosed approved Hazardous Materials Construction Permit Application and plans.
2. Contact HMCD a minimum of 2 working days in advance to schedule the following inspection(s):
  - a. UST Monitoring System Certification / Final Inspection
3. The following conditions shall also be met for final approval: N/A

**Any substitution of equipment or reconfiguration of systems as described in approved plans requires prior approval from this Department. New equipment shall not be placed in service until inspection sign-off is received from HMCD. Be advised that plan check review and approval by the Fire Marshal and/or City Building Department may also be required prior to beginning work. A copy of this letter and one set of approved plans shall remain on the job site until final inspection.**

Should you have any questions, contact the undersigned inspector at (408) 918-4795.

PLZ mail the permit to George Zounalan.

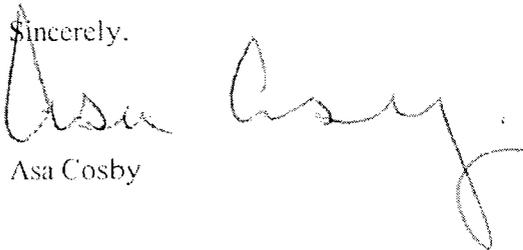

To who it may concern

I, Asa Cosby, the principal and owner of A & J ENVIRONMENTAL, having state license contractor # 653381 with HAZ license have hired Mr. Sarkiss Zoumalan, to act as my agent and I authorize him to pull permits such as fire department, building and safety, and CUPA for facilities that have been filed with any local agency of your organization for phase II EVR upgrade installation at multiple site locations.

If you should have any further questions or may require any further information please do not hesitate to contact me at 909-597-9702

Sincerely,

Asa Cosby

# MONITORING SYSTEM CERTIFICATION

*For Use By All Jurisdictions Within the State of California*

*Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations*

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of this date.

## Spill Bucket Testing Report Form

*This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### 1. FACILITY INFORMATION

Facility Name: El Camino 76	Date of Testing: 11/29/2011
Facility Address: 4350 El Camino Real, Los Altos, CA 94022	
Facility Contact: Greg Galato	Phone: 650-941-0244
Date Local Agency Was Notified of Testing: 10/21/2011	
Name of Local Agency Inspector (if present during testing): Andrew Dyer/Rich Owens	

### 2. TESTING CONTRACTOR INFORMATION

Company Name: Confidence UST Services, Inc.	
Technician Conducting Test: Bryan A Self	
Credentials <sup>1</sup> : <input checked="" type="checkbox"/> CSLB Contractor <input checked="" type="checkbox"/> ICC Service Tech. <input checked="" type="checkbox"/> SWRCB Tank Tester <input type="checkbox"/> Other (Specify)	
License Number(s): CSLB# 804904 ICC# 8022804-UT TT# 11-1756	

### 3. SPILL BUCKET TESTING INFORMATION

Test Method Used: <input checked="" type="checkbox"/> Hydrostatic <input type="checkbox"/> Vacuum <input type="checkbox"/> Other				
Test Equipment Used: Lake Test	Equipment Resolution: 0.0625"

**Comments** – (include information on repairs made prior to testing, and recommended follow-up for failed tests)

#### CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING

*I hereby certify that all the information contained in this report is true, accurate, and in full compliance with legal requirements.*

Technician's Signature: \_\_\_\_\_

Date: 11/29/2011

<sup>1</sup> State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirements may be more stringent.

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

RECEIVED BY:  
SANTA CRUZ COUNTY  
DEPT. OF ENV. HEALTH

2011 FEB 17 PM 1:05

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of this date.

## A. General Information

Facility Name: El Camino 76 Bldg. No.: \_\_\_\_\_  
 Site Address: 4350 El Camino Real City: Los Altos Zip: 94022  
 Facility Contact Person: Greg Galato Contact Phone No.: 650-941-0244  
 Make/Model of Monitoring System: Gilbarco EMC Date of Testing/Servicing: 01/04/2011

## B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

<p><b>Tank ID: 12000 gal. Regular</b></p> <p><input checked="" type="checkbox"/> In-Tank Gauging Probe. \*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

**C. Certification** - I certify that the equipment identified in this document was inspected/services in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklist) necessary to verify that this information is correct and a plot plan showing the layout of monitoring equipment. For equipment capable of generating such reports, I have attached a copy of the report; (check all that apply)  System Set-up  Alarm history report

## Spill Bucket Testing Report Form

*This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### 1. FACILITY INFORMATION

Facility Name: El Camino 76	Date of Testing: 01/04/2011
Facility Address: 4350 El Camino Real, Los Altos, CA 94022	
Facility Contact: Greg Galato	Phone: 650-941-0244
Date Local Agency Was Notified of Testing: 12/21/2010	
Name of Local Agency Inspector (if present during testing): Socorro Carillo	

### 2. TESTING CONTRACTOR INFORMATION

Company Name: Confidence UST Services, Inc.	
Technician Conducting Test: Kristopher Karns	
Credentials <sup>1</sup> : <input checked="" type="checkbox"/> CSLB Contractor <input checked="" type="checkbox"/> ICC Service Tech. <input checked="" type="checkbox"/> SWRCB Tank Tester <input type="checkbox"/> Other (Specify)	
License Number(s): CSLB# 804904 ICC# 5264406-UT TT# 09-1743	

### 3. SPILL BUCKET TESTING INFORMATION

Test Method Used: <input checked="" type="checkbox"/> Hydrostatic <input type="checkbox"/> Vacuum <input type="checkbox"/> Other				
Test Equipment Used: Lake Test			Equipment Resolution: 0.0625"	
Identify Spill Bucket (By Tank Number, Stored Product, etc.)	<b>1 Regular</b>	<b>2 Super</b>	<b>3 Waste Oil</b>	<b>4</b>
Bucket Installation Type:	<input type="checkbox"/> Direct Bury <input checked="" type="checkbox"/> Contained in Sump	<input type="checkbox"/> Direct Bury <input checked="" type="checkbox"/> Contained in Sump	<input checked="" type="checkbox"/> Direct Bury <input type="checkbox"/> Contained in Sump	<input type="checkbox"/> Direct Bury <input type="checkbox"/> Contained in Sump
Bucket Diameter:	12.00"	12.00"	12.00"	
Bucket Depth:	10.75"	10.50"	12.5"	
Wait time between applying vacuum/water and start of test:	5 min.	5 min.	5 min.	
Test Start Time (T <sub>I</sub> ):	9:15am	9:15am	9:15am	
Initial Reading (R <sub>I</sub> ):	7.50"	7.50"	9.00"	
Test End Time (T <sub>F</sub> ):	10:15am	10:15am	10:15am	
Final Reading (R <sub>F</sub> ):	7.50"	7.50"	9.00"	
Test Duration (T <sub>F</sub> - T <sub>I</sub> ):	1 hour	1 hour	1 hour	
Change in Reading (R <sub>F</sub> - R <sub>I</sub> ):	0.00"	0.00"	0.00"	
Pass/Fail Threshold or Criteria:	0.0625"	0.0625"	0.0625"	
<b>Test Result:</b>	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail	<input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail	<input type="checkbox"/> Pass <input type="checkbox"/> Fail

**Comments** – (include information on repairs made prior to testing, and recommended follow-up for failed tests)

#### CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING

*I hereby certify that all the information contained in this report is true, accurate, and in full compliance with legal requirements.*

Technician's Signature: 

Date: 01/04/2011

<sup>1</sup> State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirements may be more stringent.

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### 1. FACILITY INFORMATION

# MONITORING SYSTEM CERTIFICATION

Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3 Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Facility Name: CONOCO PHILLIPS 256115 City: LOS ALTOS CA Zip: 94022  
Site Address: 4350 EL CAMINO REAL Contact Phone No: 941-0244  
Date of Testing/Service: 11/03/2009  
Facility Contact Person: MANAGER Work Order Number: 2270221  
Make/Model of Monitoring System: TLS-350

## B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced

\* If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

## C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this certification is information (e.g manufacturers' checklists) necessary to verify that this information is correct. and a Site Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the (Check all that apply):  System set-up  Alarm history report

Technician Name (print): KRISTOPHER BELL Signature:   
Certification No.: B33709 License No.: 743160 (Class 'A' General Engineering Contractor License)  
Testing Company Name: Tanknology Phone No.: (800) 800-4633  
Site Address: 11000 N. MoPac Expressway, suite 500, Austin, TX 78759 Date of Testing/Servicing: 11/03/2009

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

## Emergency Shut Off (ESO) & Dispenser Emergency Shutoff Valve (ESV) ANNUAL TEST RECORD LOCATIONS AND TEST DATA

Testing Company:	TANKNOLOGY	Date:	11-3-09		
Location Name:	CONOCO PHILLIPS	Store #:	256115	State ID #:	74360
Address:	4350 El Camino Real	City:	Los Altos	State:	CA

### Emergency Shut Off (ESO) Testing Results

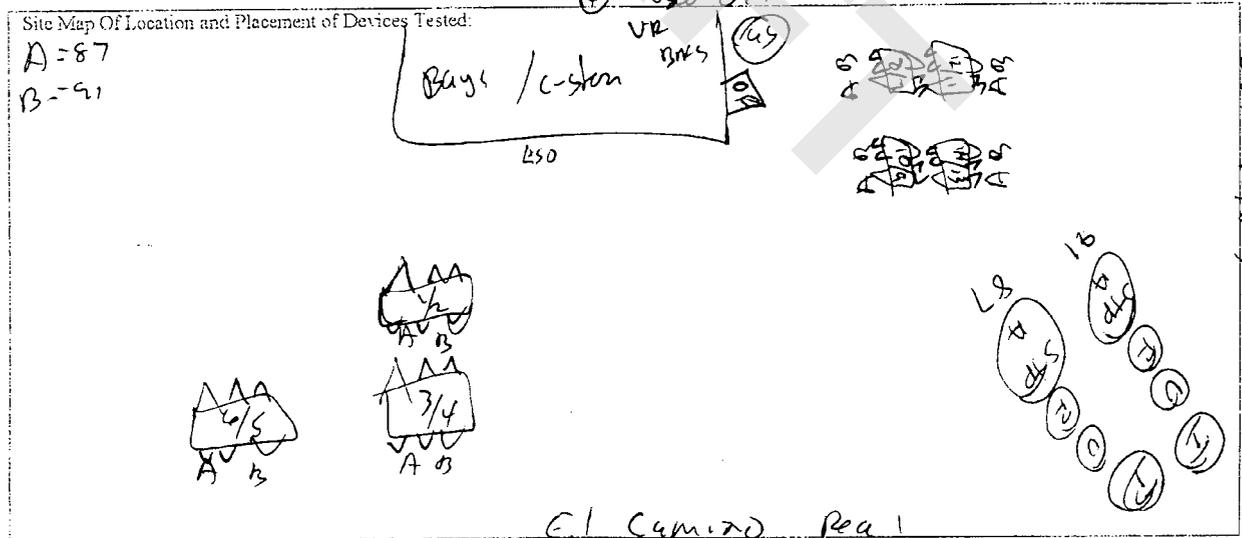

On 11-3-09 in accordance with "ESO Vendor Letter (3-21-05).doc", from Retail Compliance Department, as a part of annual compliance testing, this representative tested the Emergency Shut Off (ESO) switches as indicated on this sketch. Findings listed below:

Emergency Shut Off (ESO) Operational?	(Y) N	If No, Provide Maintenance Log #	Date Called :
---------------------------------------	-------	----------------------------------	---------------

### Dispenser Emergency Shutoff Valve (ESV) Testing Results

On 11-3-09 in accordance with NFPA 30A this representative tested the automatic-closing feature of the Dispenser Emergency Shutoff VALVE(S) (ESV) located in the supply lines at the base of each individual island type dispenser indicated on the diagram below. Each device (#) 14 in all, would automatically close. Findings listed below:

Disp. Emergency Shut Off Valve (ESV) Operational?	(Y) N	If No, Provide Maintenance Log #	Date Called :
---	-------	----------------------------------	---------------

List any other permits you have for the storage, treatment, or disposal of hazardous waste: UNDERGROUND STORAGE TANK PERMITS FOR WASTE OIL TANK; HAZARDOUS MATERIALS STORAGE PERMITS.

The annual permit fee is determined by the quantity of hazardous waste generated per year. Check the one line below that best describes the amount and kind of waste generated by your business over the past year.

Hazardous Waste Generated

- Dry cleaner generating less than 200 gals/month
- Generate and recycle **waste oil/solvents only** less than 100 gals/month
- Generate less than 2400 lbs/year
- Generate 2401 lbs to 5 tons/year
- Generate 6 to 50 tons/year
- Generate 51 to 250 tons/year
- Generate 251 to 2,500 tons/year
- Generate greater than 2,500 tons/year

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara and agrees to comply with all applicable hazardous waste regulations and with inspectional procedures needed to ensure compliance.

# Emergency Response/Contingency Plan (Hazardous Materials Business Plan Module)

Authority Cited HSC§ 25504(b), 19 CCR §2731, 22 CCR §66262 34(a)(4)

Page \_\_\_ of \_\_\_

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below)

### 1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply)

Bells,  Horns/Sirens,  Verbal (i.e., shouting),  Other (specify) \_\_\_\_\_

b.  Evacuation map is prominently displayed throughout the facility

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors

### 2. a. Emergency Contacts:\*

Fire/Police/Ambulance \_\_\_\_\_ Phone No **911**  
California Emergency Management Agency \_\_\_\_\_ Phone No **(800) 852-7550**

### b. Post-Incident Contacts:\*

Address 2500 Grant Rd City MT. VIEW

### 3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below

---

---

---

---

---

4. Emergency Procedures:

Emergency Coordinator Responsibilities

- a Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall
  - i Identify the character, exact source, amount, and areal extent of any released hazardous materials
  - ii Assess possible hazards to human health or the environment that may result from the explosion, fire, or release This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc*)
  - iii Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel
  - iv Notify appropriate local authorities (*i.e., call 911*)
  - v Notify the California Emergency Management Agency at (800) 852-7550
  - vi Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident
  - vii Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility
- b Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall
  - i Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility
  - ii Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed
  - iii Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use
  - iv Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above

Responsibilities of Other Personnel

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above Next to each function, list the job title or name of each person responsible for performing the function Number the page(s) appropriately

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program The report shall include

- a Name, address, and telephone number of the facility's owner/operator,
- b Name, address, and telephone number of the facility,
- c Date, time, and type of incident (*e.g., fire, explosion, etc*),
- d Name and quantity of material(s) involved,
- e The extent of injuries, if any,
- f An assessment of actual or potential hazards to human health or the environment, where this is applicable,
- g Estimated quantity and disposition of recovered material that resulted from the incident,
- h Cause(es) of the incident,
- i Actions taken in response to the incident,
- j Administrative or engineering controls designed to prevent such incidents in the future

6 + ?  
7

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations

**Record Keeping**  
(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (\*) are required].

<input checked="" type="checkbox"/>	Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/>	Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/>	Training Program(s) (i.e., written description of introductory and continuing training) *
<input checked="" type="checkbox"/>	Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/>	Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/>	Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/>	Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/>	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

**Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:**

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. [Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at [www.unidocs.org](http://www.unidocs.org)), you do not need to attach a copy.]

Check the appropriate box

<input checked="" type="checkbox"/>	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections
<input type="checkbox"/>	We will use our own documents to record inspections (A blank copy of each document used must be attached to this HMBP.)

8. Emergency Equipment:

22 CCR §66265 52(e) [as referenced by 22 CCR §66262 34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

**EMERGENCY EQUIPMENT INVENTORY TABLE**

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	<input type="checkbox"/> Cartridge Respirators		
	<input type="checkbox"/> Chemical Monitoring Equipment (describe)		
	<input type="checkbox"/> Chemical Protective Aprons/Coats		
	<input type="checkbox"/> Chemical Protective Boots		
	<input checked="" type="checkbox"/> Chemical Protective Gloves		MAIN OFFICE
	<input type="checkbox"/> Chemical Protective Suits (describe)		
	<input type="checkbox"/> Face Shields		
	<input checked="" type="checkbox"/> First Aid Kits/Stations (describe)		OVER SINK
	<input type="checkbox"/> Hard Hats		
	<input type="checkbox"/> Plumbed Eye Wash Stations		
	<input checked="" type="checkbox"/> Portable Eye Wash Kits (i.e., bottle type)		OVER SINK
	<input type="checkbox"/> Respirator Cartridges (describe)		
	<input checked="" type="checkbox"/> Safety Glasses/Splash Goggles		TOOL BOXES
Fire Extinguishing Systems	<input type="checkbox"/> Self-Contained Breathing Apparatuses (SCBA)		
	<input type="checkbox"/> Other (describe)		
	<input type="checkbox"/> Automatic Fire Sprinkler Systems		
	<input type="checkbox"/> Fire Alarm Boxes/Stations		
	<input checked="" type="checkbox"/> Fire Extinguishers (describe)		SHOP
Spill Control Equipment and Decontamination Equipment	<input type="checkbox"/> Other (describe)		
	<input checked="" type="checkbox"/> Absorbents (describe)		3RD FLOOR HAZ-STORE
	<input type="checkbox"/> Berms/Dikes (describe)		
	<input type="checkbox"/> Decontamination Equipment (describe)		
	<input type="checkbox"/> Emergency Tanks (describe)		
	<input type="checkbox"/> Exhaust Hoods		
	<input type="checkbox"/> Gas Cylinder Leak Repair Kits (describe)		
	<input type="checkbox"/> Neutralizers (describe)		
	<input type="checkbox"/> Overpack Drums		
	<input type="checkbox"/> Sumps (describe)		
Communications and Alarm Systems	<input type="checkbox"/> Other (describe)		
	<input type="checkbox"/> Chemical Alarms (describe)		
	<input type="checkbox"/> Intercoms/ PA Systems		
	<input type="checkbox"/> Portable Radios		
	<input type="checkbox"/> Telephones		
Additional Equipment (Use Additional Pages if Needed)	<input type="checkbox"/> Tank Leak Detection Systems		
	<input type="checkbox"/>		

\* Use the map and grid numbers from the Storage Map prepared earlier for your HMBP

\*\* Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

# Employee Training Plan

## (Hazardous Materials Business Plan Module)

Authority Cited HSC, Section 25504(c), 22 CCR §66262 34(a)(4)

Page \_\_\_\_ of \_\_\_\_

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note Items marked with an asterisk (\*) are required ]:

### 1. Personnel are trained in the following procedures:

<input checked="" type="checkbox"/>	Internal alarm/notification *
<input checked="" type="checkbox"/>	Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/>	Emergency incident reporting
<input type="checkbox"/>	External emergency response organization notification
<input type="checkbox"/>	Location(s) and contents of Emergency Response/Contingency Plan
<input type="checkbox"/>	Facility evacuation drills, that are conducted at least (specify) <span style="float: right;">(e.g., Quarterly etc)</span>

### 2. Chemical Handlers are additionally trained in the following:

<input checked="" type="checkbox"/>	Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/>	Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/>	Spill procedures/emergency procedures
<input checked="" type="checkbox"/>	Proper use of personal protective equipment *
<input type="checkbox"/>	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e., inhalation, ingestion, absorption) *
<input checked="" type="checkbox"/>	<b>Hazardous Waste Handlers/Managers</b> are trained in all aspects of hazardous waste management specific to their job duties (e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc) *

### 3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

<input type="checkbox"/>	Personnel rescue procedures
<input checked="" type="checkbox"/>	Shutdown of operations
<input type="checkbox"/>	Liaison with responding agencies
<input type="checkbox"/>	Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/>	Refresher training, which is provided at least annually *
<input type="checkbox"/>	Emergency response drills, which are conducted at least (specify) <span style="float: right;">(e.g., "Quarterly", etc)</span>

**EMPLOYEE TRAINING PLAN (con't)**

**MEDICAL FACILITIES:**

**PRIMARY FACILITY:**

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

**ALTERNATE FACILITY:**

STANFORD HOSPITAL  
300 PASTEUR DR PALO ALTO  
650-723-5111

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel): For further information, refer to the MSDS sheets.

**EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

**SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

**INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

**INGESTION (Swallowing):**

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product.

## EMPLOYEE TRAINING PLAN

Employees must be ~~given training before starting work~~ and refresher courses must be provided annually. Records must be ~~maintained until each employee has been given his/her safety training~~. Use the following outline ~~to ensure that all employees are trained~~. Have employee date and sign the attached training log upon completion of training. ~~Keep these records for a minimum of three years.~~

All employees ~~should review the Emergency Material Plan~~, (this document). Specifically, each employee should understand ~~the procedures to be used in responding~~ to various kinds of emergencies, and know how to monitor the site for leaks ~~of hazardous materials~~. As a supplement to this package, employees should also review and have access to ~~the Emergency Response Plan~~ and the Materials Safety Data Sheets. Each employee must be drilled in all emergency ~~response procedures~~ contained herein.

### UTILITY SHUT-OFFS

- \* PUMP SHUT-OFF: ~~The turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks~~. Shut-off pumps in case of a leak to help prevent spills.  
Location: NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- \* TANK MONITORING ALARM: This is used to monitor the Underground Storage Tanks. This panel may ~~indicate when a potential leak is detected by a visual and audible alarm~~.  
Location: SERVICE BAY STORAGE AREA
- \* ELECTRICAL PANEL: The panel allows you to selectively cut power to lights, signs, and pumps. ~~The main switch allows you to cut-off all power at the site.~~  
Location: IN SERVICE BAY STORAGE AREA
- \* WATER SHUT-OFF: The water shut-off may be necessary in some cases.  
Location: N SIDEWALK ALONG LOS ALTOS AVENUE
- \* NATURAL GAS SHUT-OFF: If your facility has natural gas, it may be necessary to shut-off the flow ~~in case of an emergency.~~  
Location: NONE
- \* PROPANE/LPG SHUT-OFF:  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* FIRE EXTINGUISHER: Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* SPILL/ CLEAN UP KIT:  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* RESPONSE EQUIPMENT: These items are to be used to prevent skin contact with hazardous materials
  - Broom: SERVICE BAY
  - Shovel: SERVICE BAY
  - Gloves: SERVICE BAY
  - Goggles: SERVICE BAY
- \* FIRST AID KIT: Use for minor incidents and treatment.  
Location: 1-IN SERVICE BAY STORE AREA
- \* EVACUATION ASSEMBLY AREA: All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:  
Location: SALES OFFICE

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction  
Authority Cited Health and Safety Code §25503 3(c), 19 CCR §2729 5(c)

To: Agency Name: Santa Clara Co. Dept. of Env. Health  
Agency Mailing Address: 1555 Berger Dr., Ste 300  
San Jose CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: El Camino 76 #256115  
Facility Street Address: 4350 El Camino Real City: Los Altos  
Date of Current HMBP: 2/6/07

I certify that: (Check the appropriate box.)

I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification along with a signed Unified Program Consolidated Form (UPCF) Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

**OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.**

Name of Owner/Operator (Print): X Greg Galatolo Title: X DEALER  
Signature of Owner/Operator: X [Signature] Date: February 14, 2008

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP

# CONOCOPHILLIPS EMERGENCY RESPONSE PROCEDURES

256115

## MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK

### MINOR INCIDENT: (less than 5 gallons)

1. **FIRES:** Extinguish with fire extinguisher. Recharge fire extinguisher, if used
2. **SPILLS:** Clean up with absorbent materials on site and dispose of according to all regulations. Use personal protective equipment (i.e. gloves, goggles) as necessary. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See the Emergency Equipment Section for additional information.
3. **MEDICAL:** Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD:** Record the event in the Daily Systems Inspection Form.
5. **NOTIFY:** The ConocoPhillips SolvOne Help Desk if the spill flows off site, enters a storm drain or contacts bare soil or groundwater.

### MAJOR INCIDENT: (more than 5 gallons)

Any incident that can not be contained and cleaned up as part of the routine operations, should be considered a major release and use the following procedures.

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch.
2. **EVACUATE:** Verbally **ANNOUNCE** to all persons on the site: "This is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. **Call 9-1-1:** Give the following information:  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/76 service station at: 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station are and anyone who may be injured.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need. Immediately notify the SolveOne Help Desk.

---

## EMERGENCY PHONE NUMBERS

### EMERGENCY RESPONSE CONTRACTOR

ConocoPhillips SolveOne Help Desk, located in Portland, OR: 1-866-215-0965

### CONOCOPHILLIPS STORE PERSONNEL

District Manager: Dan Pelligrino 831-297-3463  
Marketing HSE Specialist: Tiana Andriamanarivo 510-245-5176

### FACILITY CONTACTS

Primary: Greg Galatolo Dealer Day: 650-941-0244  
24-hour: 650-948-8302  
Secondary: John Hollerbach Manager Day: 650-941-0244  
24-hour: 408-605-5984

---

ConocoPhillips will notify the State and Local administering agencies within an appropriate time frame unless the situation requires urgent immediate response by the agencies, in which case the **Operator** should notify these agencies.

- a) **LOCAL AGENCY:** Santa Clara Co. Dept. of Env. Health  
**PHONE NUMBER:** 408-918-3400
- b) **CALIFORNIA OFFICE OF EMERGENCY SERVICES:** (800) 852-7550 or (916) 845-8911
- c) **LOCAL POLICE AND FIRE DEPARTMENTS:** 9-1-1
- d) **NATIONAL RESPONSE CENTER:** (800) 424-8802 (24-Hours)

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. **Retain these records for a minimum of three years.**

All employees should review the Hazardous Material Plan, (this document). Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor the site for leaks of hazardous materials. As a supplement to this package, employees should also review and have access to the the Emergency Response Plan and the Materials Safety Data Sheets. Each employee must be drilled in all emergency response procedures contained herein.

### UTILITY SHUT-OFFS

- \* **PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks. Shut-off pumps in case of a leak to help prevent spills.  
Location: 1-NORTH EXT BLDG. WALL, 1-STORAGE AREA
- \* **TANK MONITORING ALARM:** This is used to monitor the Underground Storage Tanks. This panel may indicate when a potential leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- \* **ELECTRICAL PANEL:** The panel allows you to selectively cut power to lights, signs, and pumps. The main switch allows you to cut-off all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- \* **WATER SHUT-OFF:** The water shut-off may be necessary in some cases  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- \* **NATURAL GAS SHUT-OFF:** If your facility has natural gas, it may be necessary to shut-off the flow in case of an emergency.  
Location: NONE
- \* **PROPANE/LPG SHUT-OFF:**  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* **FIRE EXTINGUISHER:** Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* **SPILL/ CLEAN UP KIT:**  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* **RESPONSE EQUIPMENT:** These items are to be used to prevent skin contact with hazardous materials  
Broom: SERVICE BAY  
Shovel: SERVICE BAY  
Gloves: SERVICE BAY  
Goggles: SERVICE BAY
- \* **FIRST AID KIT:** Use for minor incidents and treatment.  
Location: 1-IN SERVICE BAY STORE AREA
- \* **EVACUATION ASSEMBLY AREA:** All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* **ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:**  
Location: SALES OFFICE

**EMPLOYEE TRAINING PLAN (con't)**

**MEDICAL FACILITIES:**

**PRIMARY FACILITY:**

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

**ALTERNATE FACILITY:**

STANFORD HOSPITAL  
300 PASTEUR DR PALO ALTO  
650-723-5111

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel): For further information, refer to the MSDS sheets

**EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

**SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

**INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

**INGESTION (Swallowing):**

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product.

# Hazardous Materials Training Requirements

As the owner/operator of a business that handles hazardous materials, you must have the following:

- \* A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- \* The Hazardous Materials Management Plan (Chemical Inventory, also known as the CA Business Emergency Plan)
- \* An Emergency Response Plan
- \* An Underground Storage Tank Monitoring and Response Plan
- \* A Release Reporting Plan

**Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only need to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.**

- \* Training for the Hazard Communication Plan must include the following elements.
- \* An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
- \* Locations of any operations in the work area where hazardous substances are present
- \* Location where a copy of the written Hazard Communication programs is made available to them
- \* How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place
- \* How to detect the presence of or the release of hazardous substances in the work place
- \* How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
- \* Emergency and first aid procedures to follow if employees are exposed to hazardous substances

## Spill Response Plan

### For Minor Releases:

If the release is less than 5 gallons and service station personnel can contain the release immediately (and the release does not go off-site, enter any waterway, or contact bare soils), do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Contain with absorbent material, making sure that the release does not leave the site or enter any drains.
3. Clean up release material with absorbent material.
4. Place used absorbent material into an approved container for such materials.
5. For proper disposal of used absorbent material, the dealer or designated employee will contact a licensed waste hauler to dispose of the material in accordance with all applicable federal, state, and local regulations.

### For Major Releases:

If the release is greater than 5 gallons, threatens to leave the site, enter any waterway, or contact bare soils, or there is an injury to a person, do the following:

1. Turn off the source of the spill (i.e. turn off dispensers, pump, etc.)
2. Evacuate customers, asking them to leave by foot.
3. Call the Fire Department: 911
4. All employees evacuate the premises.
5. Employees are to meet at a designated emergency assembly area.
6. Station dealer or manager to account for employees and any known customers at meeting place.
7. Dealer or manager should remain in the vicinity to provide information to the fire department, etc.
8. Notify the following personnel: SolvOne at 1-866-215-0965 Regional HSE Specialist
9. Attempt to contain the spill with absorbent material, attempting to prevent the release from leaving the site or entering any drains.
10. In California, call the Office of Emergency Services at 1-800-852-7550.
11. In the case of an unauthorized release from the primary containment, ConocoPhillips Company will respond within 8 hours to address necessary repairs to the primary containment and cleanup of the secondary containment. Exceptions to this will be reported to the agency as required under California Health and Safety Code Section 25295.

**OFFICIAL NOTICE OF INSPECTION**  
 (Continuation Page)

12-15-09

Facility Name: El Camino Unical

Inspection Date: 12-15-09

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	-Line leak detectors (passed)	
	-Hydrostatic test of product-fill spill buckets (passed)	
	-All dispenser containments and shear valves (passed)	
	-Automatic tank gauge (ATG) overfill alarm (passed)	
	-Waste oil tank's annular space liquid sensor (passed)	
	Notes: Observed fail safe, sensor out and the emergency shut-off button functions were operable.	
2350	Facility failed to submit a permit application to reflect the Mr. Galatolo's recent acquisition/ownership of the 3-USTs. <b>Required Action:</b> Submit permit application for the 2-12,000 gallon gasoline tanks and 1-500 gallon waste oil tank.	APPLICATION SENT
2357	The printer on the TLS-350 monitoring console is malfunctioning. <b>Required Action:</b> Repair or replace the console printer.	PRINTER REPAIRED
2358	Facility failed to submit a revised UST Monitoring Plan to reflect the Mr. Galatolo's recent acquisition/ownership of the 3-USTs. <b>Required Action:</b> Submit a revised UST Monitoring Plan for the 2-12,000 gallon gasoline tanks and 1-500 gallon waste oil tank.	SUBMITTED NEW PLAN
2361	Facility failed to submit a revised UST Response Plan to reflect the Mr. Galatolo's recent acquisition/ownership of the 3-USTs. <b>Required Action:</b> Submit a revised UST Response Plan for the 2-12,000 gallon gasoline tanks and 1-500 gallon waste oil tank.	SUBMITTED NEW PLAN
2364	2364: Facility failed to submit a "Certification of Financial Responsibility" form to reflect the Mr. Galatolo's recent	Received during follow-up inspection on 12-15-09

# Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC § 25504(b); 19 CCR § 2731; 22 CCR § 66262.34(a)(4)

Page \_\_\_\_\_ of \_\_\_\_\_

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

## 1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

Bells;  Horns/Sirens;  Verbal (i.e., shouting);  Other (specify \_\_\_\_\_)

b.  Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors

## 2. a. Emergency Contacts\*:

Fire/Police/Ambulance ..... Phone No.: 911

State Office of Emergency Services ..... Phone No.: (800) 852-7550

## b. Post-Incident Contacts\*:

Certified Unified Program Agency (CUPA) ..... Phone No.: ( )

Local Hazardous Materials Program ..... Phone No.: (408) 280-6479

California EPA Department of Toxic Substances Control ..... Phone No.: (916) 223-2514

Cal-OSHA Division of Occupational Safety and Health ..... Phone No.: ( )

Air Quality Management District ..... Phone No.: (415) 749-4920

Regional Water Quality Control Board ..... Phone No.: (408) 265-2600

\* Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at [www.unidocs.org](http://www.unidocs.org).

## c. Emergency Resources:

Poison Control Center\* ..... Phone No.: ( )

Nearest Hospital: Name: El CAMINO HOSPITAL Phone No.: (415) 940-7055

Address: 2500 GRANT RD. City: MT. VIEW

## 3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

### Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page \_\_\_\_ of \_\_\_\_

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. [Note: Items marked with an asterisk (\*) are required.]:

#### 1. Personnel are trained in the following procedures:

<input checked="" type="checkbox"/>	Internal alarm/notification *
<input checked="" type="checkbox"/>	Evacuation/re-entry procedures & assembly point locations*
<input type="checkbox"/>	Emergency incident reporting
<input type="checkbox"/>	External emergency response organization notification
<input checked="" type="checkbox"/>	Location(s) and contents of Emergency Response/Contingency Plan
<input type="checkbox"/>	Facility evacuation drills, that are conducted at least (specify): <span style="float: right;">(e.g., "Quarterly", etc.)</span>

#### 2. Chemical Handlers are additionally trained in the following:

<input checked="" type="checkbox"/>	Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/>	Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/>	Spill procedures/emergency procedures
<input checked="" type="checkbox"/>	Proper use of personal protective equipment *
<input type="checkbox"/>	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e., inhalation, ingestion, absorption) *
<input type="checkbox"/>	Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *

#### 3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

<input type="checkbox"/>	Personnel rescue procedures
<input checked="" type="checkbox"/>	Shutdown of operations
<input type="checkbox"/>	Liaison with responding agencies
<input type="checkbox"/>	Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/>	Refresher training, which is provided at least annually *
<input type="checkbox"/>	Emergency response drills, which are conducted at least (specify): <span style="float: right;">(e.g., "Quarterly", etc.)</span>

# Emergency Response/Contingency Plan (Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(b), Title 22, Div 4 5, Ch 12, Art 3 CCR

Page \_\_\_\_ of \_\_\_\_

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below)

### 1. Evacuation Plan:

- a The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply)
  - Bells,  Horns/Sirens;  Verbal (i.e. shouting),  Other (specify) \_\_\_\_\_
- b  Evacuation map is prominently displayed throughout the facility

*Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.*

### 2. a. Emergency Contacts\*:

Fire/Police/Ambulance . . . . . Phone No **911**  
 State Office of Emergency Services . . . . . Phone No **(800) 852-7550**

### b. Post-Incident Contacts\*:

Fire Department Hazardous Materials Program . . . . . Phone No **408-918-3400**  
 Santa Clara County Hazardous Materials Compliance Division . . . . . Phone No **(408) 918-3400**

 Cal-OSHA Division of Occupational Safety and Health . . . . . Phone No **(408) 452-7288**  
 Bay Area Air Quality Management District . . . . . Phone No **(415) 771-6000**  
 Regional Water Quality Control Board . . . . . Phone No **(510) 622-2300**

*\* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified*

### c. Emergency Resources:

Poison Control Center . . . . . Phone No **(800) 876-4766**

Nearest Hospital: Name EL CAMINO HOSPITAL Phone No 650-940-7055

Address 2500 GRANT ROAD City MOUNTAIN VIEW

### 3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below

None

**4. Emergency Procedures:**

Emergency Coordinator Responsibilities.

- a Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall
  - i Identify the character, exact source, amount, and a real extent of any released hazardous materials
  - ii Assess possible hazards to human health or the environment that may result from the explosion, fire, or release This assessment must consider both direct and indirect effects (*e g the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc*)
  - iii Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel
  - iv Notify appropriate local authorities (*i e call 911*)
  - v Notify the State Office of Emergency Services at 1-800-852-7550
  - vi Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident
  - vii Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility
  
- b Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall
  - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility
  - ii Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed
  - iii Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use
  - iv Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above

Responsibilities of Other Personnel.

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function Number the page(s) appropriately

**5. Post-Incident Reporting/Recording:**

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program The report shall include.

- a Name, address, and telephone number of the facility's owner/operator,
- b Name, address, and telephone number of the facility,
- c. Date, time, and type of incident (*e g fire, explosion, etc*);
- d Name and quantity of material(s) involved,
- e The extent of injuries, if any,
- f An assessment of actual or potential hazards to human health or the environment, where this is applicable,
- g Estimated quantity and disposition of recovered material that resulted from the incident,
- h Cause(es) of the incident,
- i Actions taken in response to the incident,
- j Administrative or engineering controls designed to prevent such incidents in the future

**6. Earthquake Vulnerability:** [19 CCR §2731(e)]

Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion

---

Tank Monitor Alarm, Pump Islands and Dispensers: Any Above Ground Storage containment or Hazardous Materials on site

---

7. Emergency Equipment:

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

Additional Equipment (Use Additional Pages if Needed)			

\* Use the Location Codes (LC) from the Storage Map(s) prepared earlier for your HMBP

\*\* Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

# CONOCOPHILLIPS EMERGENCY RESPONSE PROCEDURES

256115

## MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK

### MINOR INCIDENT: (less than 5 gallons)

1. **FIRES:** Extinguish with fire extinguisher Recharge fire extinguisher, if used
2. **SPILLS:** Clean up with absorbent materials on site and dispose of according to all regulations Use personal protective equipment (i.e. gloves, goggles) as necessary Have a fire extinguisher ready for spills of flammable materials Restock absorbent as necessary. See the Emergency Equipment Section for additional information
3. **MEDICAL:** Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD:** Record the event in the Daily Systems Inspection Form.
5. **NOTIFY:** The ConocoPhillips SolvOne Help Desk if the spill flows off site, enters a storm drain or contacts bare soil or groundwater

### MAJOR INCIDENT: (more than 5 gallons)

Any incident that can not be contained and cleaned up as part of the routine operations, should be considered a major release and use the following procedures.

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch
2. **EVACUATE:** Verbally **ANNOUNCE** to all persons on the site "This is an emergency Please turn off your engines and leave the station on foot immediately All employees meet at the emergency assembly area."
3. **Call 9-1-1:** Give the following information:  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/76 service station at: 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher Stay on the phone and be prepared to answer any questions concerning the situation
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station are and anyone who may be injured
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need. Immediately notify the SolveOne Help Desk

---

24-hour 408-605-5984

---

ConocoPhillips will notify the State and Local administering agencies within an appropriate time frame unless the situation requires urgent immediate response by the agencies, in which case the **Operator** should notify these agencies

a) **LOCAL AGENCY:** Santa Clara Co Dept. of Env Health  
**PHONE-NUMBER:** 408-918-3400

b) **CALIFORNIA OFFICE OF EMERGENCY SERVICES:** (800) 852-7550 or (916) 845-8911

c) **LOCAL POLICE AND FIRE DEPARTMENTS:** 9-1-1

d) **NATIONAL RESPONSE CENTER:** (800) 424-8802 (24-Hours)

## **Spill/Release Response Procedures for Propane**

The Propane used can be hazardous in the event of a spill or release, or if there is a fire at the facility. Propane is flammable, in the event of a fire; the container could explode violently due to the high heat of the fire.

Propane is an odorless, colorless, flammable gas. Often an odorant is added for fuel purposes. A release in a confined area may cause rapid breathing, diminished mental alertness, impaired muscular coordination, faulty judgement, depression of all sensations, emotional instability and fatigue. As asphyxiation progresses, nausea, vomiting and loss of consciousness may result.

### **Spill or Release:**

In the event of a release from the propane tank/cylinder, do the following:

1. Evacuate all personnel from the affected area.
2. Stay upwind of the release and out of low-lying areas.
3. Avoid breathing gases.
4. If the leak is in a container or valve, contact the propane supplier for assistance.
5. Ventilate the area before attempting to re-enter the area.
6. Do not enter the building until emergency personnel have notified you that it is safe.
7. Contact management using the emergency phone list procedure.

### **Fire:**

1. Follow the Fire and Explosion evacuation procedures.
2. Notify emergency personnel of the tank location.

### **Prevention Procedures:**

1. Store tank and/or cylinders with valve protection caps installed.
2. Tank and cylinders should be stored upright and firmly secured to prevent falling or being knocked over.
3. Containers should be stored in a cool, dry, well ventilated area away from sources of heat or ignition and direct sun light.
4. If you suspect any problems with the tank notify the supplier immediately to have the system inspected.

# Employee Training Plan

## (Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(c), Title 22, Div 4 5, Ch 12, Art 3 CCR

Page \_\_\_\_\_ of \_\_\_\_\_

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP) A blank plan has been provided below for you to complete and submit if you do not already have such a plan **If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

Check all boxes that apply. [Note Items marked with an asterisk (\*) are required ]:

### 1. Personnel are trained in the following procedures:

<input checked="" type="checkbox"/> Internal alarm/notification *
<input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/> Emergency incident reporting
<input checked="" type="checkbox"/> External emergency response organization notification
<input checked="" type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan
<input checked="" type="checkbox"/> Facility evacuation drills, which are conducted at least (specify) _____ Annual _____ (e g "Quarterly", etc )

### 2. Chemical Handlers are additionally trained in the following:

<input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/> Spill procedures/emergency procedures
<input checked="" type="checkbox"/> Proper use of personal protective equipment *
<input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i e inhalation, ingestion, absorption) *
<input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e g container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc ) *

### 3. Emergency Response Team Members are capable of and engaged in the following

<input checked="" type="checkbox"/> Personnel rescue procedures
<input checked="" type="checkbox"/> Shutdown of operations
<input checked="" type="checkbox"/> Liaison with responding agencies
<input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/> Refresher training, which is provided at least annually *
<input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify) _____ Annual _____ (e g "Quarterly", etc )

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. **Retain these records for a minimum of three years.**

All employees should review the Hazardous Material Plan, (this document). Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor the site for leaks of hazardous materials. As a supplement to this package, employees should also review and have access to the the Emergency Response Plan and the Materials Safety Data Sheets. Each employee must be drilled in all emergency response procedures contained herein.

### UTILITY SHUT-OFFS

- \* **PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks. Shut-off pumps in case of a leak to help prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- \* **TANK MONITORING ALARM:** This is used to monitor the Underground Storage Tanks. This panel may indicate when a potential leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- \* **ELECTRICAL PANEL:** The panel allows you to selectively cut power to lights, signs, and pumps. The main switch allows you to cut-off all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- \* **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- \* **NATURAL GAS SHUT-OFF:** If your facility has natural gas, it may be necessary to shut-off the flow in case of an emergency.  
Location: NONE
- \* **PROPANE/LPG SHUT-OFF:**  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* **FIRE EXTINGUISHER:** Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own, call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* **SPILL/ CLEAN UP KIT:**  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* **RESPONSE EQUIPMENT:** These items are to be used to prevent skin contact with hazardous materials.
  - Broom SERVICE BAY
  - Shovel: SERVICE BAY
  - Gloves. SERVICE BAY
  - Goggles SERVICE BAY
- \* **FIRST AID KIT:** Use for minor incidents and treatment.  
Location 1-IN SERVICE BAY STORE AREA
- \* **EVACUATION ASSEMBLY AREA:** All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* **ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:**  
Location: SALES OFFICE

**EMPLOYEE TRAINING PLAN (con't)**

**MEDICAL FACILITIES:**

**PRIMARY FACILITY:**

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

**ALTERNATE FACILITY:**

STANFORD HOSPITAL  
300 PASTEUR DR PALO ALTO  
650-723-5111

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel). For further information, refer to the MSDS sheets

**EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

**SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

**INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

**INGESTION (Swallowing):**

Aspiration Hazard. **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product

# Hazardous Materials Training Requirements

As the owner/operator of a business that handles hazardous materials, you must have the following

- \* A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- \* The Hazardous Materials Management Plan Chemical Inventory, also known as the CA Business Emergency Plan)
- \* An Emergency Response Plan
- \* An Underground Storage Tank Monitoring and Response Plan
- \* A Release Reporting Plan

**Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only need to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.**

- \* Training for the Hazard Communication Plan must include the following elements
- \* An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation
- \* Locations of any operations in the work area where hazardous substances are present
- \* Location where a copy of the written Hazard Communication programs is made available to them
- \* How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place
- \* How to detect the presence of or the release of hazardous substances in the work place
- \* How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc)
- \* Emergency and first aid procedures to follow if employees are exposed to hazardous substances

**Record keeping**  
(Hazardous Materials Business Plan Module)

Page \_\_\_\_ of \_\_\_\_

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note Items marked with an asterisk (\*) are required ]:

<input checked="" type="checkbox"/> Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/> Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/> Training Program(s) (i.e. written description of introductory and continuing training) *
<input checked="" type="checkbox"/> Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/> Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/> Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/> Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/> Description and documentation of facility emergency response drills

Note The above list of records does not necessarily identify every type of record required to be maintained by the facility

**A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP.** (Exception Available from you local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form If you use the example provided, you do not need to attach a copy )

Check the appropriate box

<input checked="" type="checkbox"/> We will use the "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections
<input type="checkbox"/> We will use our own documents to record inspections (A blank copy of each document used must be attached to this HMBP.)

# Aboveground Separation, Containment, and Monitoring Plan

(Appendix to Hazardous Materials Business Plan)

Complete one column for each aboveground storage area shown on the Hazardous Materials Business Plan Storage Map(s) Write the appropriate location code in the box provided at the top of each column, then moving down the column, check all boxes which apply to that location Make additional copies of this page if needed

Location Code	B	C	E		
<b>Storage Type</b>	<input checked="" type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input checked="" type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input checked="" type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use By All Jurisdictions Within the County of Santa Clara  
Authority Cited H&SC, 25503 3(c)

2006 MAR -6 AM 8:48

To: Agency Name: Santa Clara Co. Dept. of Env. Health  
Agency Mailing Address: 1555 Berger Dr., Ste 300  
San Jose, CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (H&SC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: El Camino 76 #256115  
Facility Street Address: 4350 El Camino Real City: Los Altos  
Date of Current HMBP: 2/15/2004.

I certify that: (Check the appropriate box.)

- I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) or
- Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): x Greg GALATOLD Title: x DEALER  
Signature of Owner/Operator: [Signature] Date: x 2/29/06

By checking the upper box on this form, you are certifying that.

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date, and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms, and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; and
- The HMBP most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code, and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP

*To ICCFA 4-10-06*

**CONOCOPHILLIPS EMERGENCY RESPONSE PROCEDURES**

256115

**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

**MINOR INCIDENT: (less than 5 gallons)**

1. **FIRES:** Extinguish with fire extinguisher. Recharge fire extinguisher, if used
2. **SPILLS:** Clean up with absorbent materials on site and dispose of according to all regulations. Use personal protective equipment (i.e. gloves, goggles) as necessary. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See the Emergency Equipment Section for additional information.
3. **MEDICAL:** Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD:** Record the event in the Daily Systems Inspection Form.
5. **NOTIFY:** The ConocoPhillips SolvOne Help Desk if the spill flows off site, enters a storm drain or contacts bare soil or groundwater.

**MAJOR INCIDENT: (more than 5 gallons)**

Any incident that can not be contained and cleaned up as part of the routine operations, should be considered a major release and use the following procedures.

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch.
2. **EVACUATE:** Verbally **ANNOUNCE** to all persons on the site: "This is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. **Call 9-1-1:** Give the following information:  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/76 service station at: 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station and anyone who may be injured.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need. Immediately notify the SolveOne Help Desk.

---

24-hour: 408-736-0204

---

ConocoPhillips will notify the State and Local administering agencies within an appropriate time frame unless the situation requires urgent immediate response by the agencies, in which case the **Operator** should notify these agencies.

- a) **LOCAL AGENCY:** Santa Clara Co. Dept. of Env. Health  
**PHONE NUMBER:** 408-918-3400
- b) **CALIFORNIA OFFICE OF EMERGENCY SERVICES:** (800) 852-7550 or (916) 845-8911
- c) **LOCAL POLICE AND FIRE DEPARTMENTS:** 9-1-1
- d) **NATIONAL RESPONSE CENTER:** (800) 424-8802 (24-Hours)

## **Spill/Release Response Procedures for Propane**

The Propane used can be hazardous in the event of a spill or release, or if there is a fire at the facility. Propane is flammable, in the event of a fire; the container could explode violently due to the high heat of the fire.

Propane is an odorless, colorless, flammable gas. Often an odorant is added for fuel purposes. A release in a confined area may cause rapid breathing, diminished mental alertness, impaired muscular coordination, faulty judgement, depression of all sensations, emotional instability and fatigue. As asphyxiation progresses, nausea, vomiting and loss of consciousness may result.

### **Spill or Release:**

In the event of a release from the propane tank/cylinder, do the following:

1. Evacuate all personnel from the affected area.
2. Stay upwind of the release and out of low-lying areas.
3. Avoid breathing gases.
4. If the leak is in a container or valve, contact the propane supplier for assistance.
5. Ventilate the area before attempting to re-enter the area.
6. Do not enter the building until emergency personnel have notified you that it is safe.
7. Contact management using the emergency phone list procedure.

### **Fire:**

1. Follow the Fire and Explosion evacuation procedures.
2. Notify emergency personnel of the tank location.

### **Prevention Procedures:**

1. Store tank and/or cylinders with valve protection caps installed.
2. Tank and cylinders should be stored upright and firmly secured to prevent falling or being knocked over.
3. Containers should be stored in a cool, dry, well ventilated area away from sources of heat or ignition and direct sun light.
4. If you suspect any problems with the tank notify the supplier immediately to have the system inspected.

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. **Retain these records for a minimum of three years.**

All employees should review the Hazardous Material Plan, (this document). Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor the site for leaks of hazardous materials. As a supplement to this package, employees should also review and have access to the the Emergency Response Plan and the Materials Safety Data Sheets. Each employee must be drilled in all emergency response procedures contained herein.

### UTILITY SHUT-OFFS

- \* **PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks. Shut-off pumps in case of a leak to help prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- \* **TANK MONITORING ALARM:** This is used to monitor the Underground Storage Tanks. This panel may indicate when a potential leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- \* **ELECTRICAL PANEL:** The panel allows you to selectively cut power to lights, signs, and pumps. The main switch allows you to cut-off all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- \* **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- \* **NATURAL GAS SHUT-OFF:** If your facility has natural gas, it may be necessary to shut-off the flow in case of an emergency  
Location: NONE
- \* **PROPANE/LPG SHUT-OFF:**  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* **FIRE EXTINGUISHER:** Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* **SPILL/ CLEAN UP KIT:**  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* **RESPONSE EQUIPMENT:** These items are to be used to prevent skin contact with hazardous materials  
Broom: SERVICE BAY  
Shovel. SERVICE BAY  
Gloves: SERVICE BAY  
Goggles: SERVICE BAY
- \* **FIRST AID KIT:** Use for minor incidents and treatment.  
Location: 1-IN SERVICE BAY STORE AREA
- \* **EVACUATION ASSEMBLY AREA:** All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* **ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:**  
Location: SALES OFFICE

## EMPLOYEE TRAINING PLAN (con't)

### MEDICAL FACILITIES:

#### PRIMARY FACILITY:

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

#### ALTERNATE FACILITY:

STANFORD HOSPITAL  
300 PASTEUR DR STANFORD  
650-723-5111

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel) For further information, refer to the MSDS sheets.

#### **EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately

#### **SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

#### **INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately

#### **INGESTION (Swallowing):**

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

#### **FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product.

# Hazardous Materials Training Requirements

As the owner/operator of a business that handles hazardous materials, you must have the following.

- \* A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- \* The Hazardous Materials Management Plan (Chemical Inventory, also known as the CA Business Emergency Plan)
- \* An Emergency Response Plan
- \* An Underground Storage Tank Monitoring and Response Plan
- \* A Release Reporting Plan

**Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only need to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.**

- \* Training for the Hazard Communication Plan must include the following elements:
  - \* An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
  - \* Locations of any operations in the work area where hazardous substances are present.
  - \* Location where a copy of the written Hazard Communication programs is made available to them.
  - \* How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
  - \* How to detect the presence of or the release of hazardous substances in the work place.
  - \* How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
  - \* Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

# HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use By All Jurisdictions Within the County of Santa Clara  
Authority Cited H&SC, 25503 3(c)

To: Agency Name: Santa Clara Co. Dept. of Env. Health  
Agency Mailing Address: 1555 Berger Dr., Ste 300  
San Jose, CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (H&SC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: El Camino 76 #256115

Facility Street Address: 4350 El Camino Real City: Los Altos

Date of Current HMBP: 2/24/04

I certify that: (Check the appropriate box.)

- I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) or
- Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification.

**OWNER/OPERATOR CERTIFICATION:** I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials which would require updating of the HMBP.

Name of Owner/Operator (Print): X Greg GALATOS Title: X OWNER  
Signature of Owner/Operator: [Signature] Date: X 02/17/05

By checking the upper box on this form, you are certifying that

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date, and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory, and
- The HMBP most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code, and
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

# CONOCOPHILLIPS EMERGENCY RESPONSE PROCEDURES

256115

## MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK

### MINOR INCIDENT: (less than 5 gallons)

1. **FIRES:** Extinguish with fire extinguisher. Recharge fire extinguisher, if used
2. **SPILLS:** Clean up with absorbent materials on site and dispose of according to all regulations. Use personal protective equipment (i.e. gloves, goggles) as necessary. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See the Emergency Equipment Section for additional information
3. **MEDICAL:** Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD:** Record the event in the Daily Systems Inspection Form.
5. **NOTIFY:** The ConocoPhillips SolvOne Help Desk if the spill flows off site, enters a storm drain or contacts bare soil or groundwater

### MAJOR INCIDENT: (more than 5 gallons)

Any incident that can not be contained and cleaned up as part of the routine operations, should be considered a major release and use the following procedures.

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch.
2. **EVACUATE:** Verbally **ANNOUNCE** to all persons on the site: "This is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area."
3. **Call 9-1-1:** Give the following information:  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/76 service station at: 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station and anyone who may be injured.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need. Immediately notify the SolveOne Help Desk.

---

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel): For further information, refer to the MSDS sheets.

**EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

**SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

**INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

**INGESTION (Swallowing):**

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product.

# Hazardous Materials Training Requirements

As the owner/operator of a business that handles hazardous materials, you must have the following:

- \* A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- \* The Hazardous Materials Management Plan (Chemical Inventory, also known as the CA Business Emergency Plan)
- \* An Emergency Response Plan
- \* An Underground Storage Tank Monitoring and Response Plan
- \* A Release Reporting Plan

**Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only need to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.**

- \* Training for the Hazard Communication Plan must include the following elements:
  - \* An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
  - \* Locations of any operations in the work area where hazardous substances are present.
  - \* Location where a copy of the written Hazard Communication program is made available to them.
  - \* How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
  - \* How to detect the presence of or the release of hazardous substances in the work place.
  - \* How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
  - \* Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

RE HAZARDOUS MATERIALS MANAGEMENT PLANS  
County. Santa Clara

Dear Greg Galatolo

Attached is the new Hazardous Materials Inventory and Business Plan Certification for your station. This Certification is intended to **amend** the current HMMP. The "SITE COPY" should be kept in your Environmental Record Box, Tab 9, and available to all employees and agency personnel at all times.

**DO NOT DISCARD YOUR CURRENT HMMP.**

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP AS SOON AS POSSIBLE. FAILURE TO RETURN THIS PLAN WITHIN 30 DAYS WILL RESULT IN A \$25.00 LATE FEE CHARGED TO YOUR ACCOUNT.**

**FAILURE TO RETURN THIS PLAN MAY ALSO RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

- 1 Please sign all 3 copies of the CERTIFICATION where flagged and indicated with a "X".
- 2 Please return the 2 copies marked "AGENCY" and "RHL FILE" to RHL Design in the pre-stamped envelope provided **AS SOON AS POSSIBLE.**
- 3 Keep the "SITE COPY" of the HMMP in your Environmental Record Box, and available for inspection. Use your Site Copy for employee training and have employees sign the training log. Keep training records at your station.

A copy of this HMMP Certification will be sent to: Santa Clara Co Dept of Env Health within 30 days

If you have any questions regarding the content of this document, please contact RHL Design Group, Ms. Jennifer Carey or Mr. Steve Skanderson at (707) 765-1660. If you have any additional questions, including invoicing questions, please contact your local Marketing HSE Specialist.

Sincerely,

ConocoPhillips

# Emergency Response/Contingency Plan (Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(b), Title 22, Div 4 5, Ch 12, Art 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below)

### 1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply)

Bells;  Horns/Sirens;  Verbal (i.e. shouting);  Other (specify) \_\_\_\_\_

b.  Evacuation map is prominently displayed throughout the facility.

*Note. A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors*

### 2. a. Emergency Contacts\*:

Fire/Police/Ambulance ..... Phone No. **911**  
State Office of Emergency Services ..... Phone No. **(800) 852-7550**

### b. Post-Incident Contacts\*:

Fire Department Hazardous Materials Program ..... Phone No. : **408-918-3400**  
Santa Clara County Hazardous Materials Compliance Division ... Phone No. **(408) 918-3400**  
California EPA Department of Toxic Substances Control ..... Phone No. **(510) 540-3739**  
Cal-OSHA Division of Occupational Safety and Health . . . . . Phone No. **(408) 452-7288**  
Bay Area Air Quality Management District . . . . . Phone No. **(415) 771-6000**  
Regional Water Quality Control Board . . . . . Phone No. **(510) 622-2300**

\* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.

### c. Emergency Resources:

Poison Control Center ..... Phone No. **(800) 876-4766**

Nearest Hospital: Name: EL CAMINO HOSPITAL Phone No.: 650-940-7055

Address: 2500 GRANT ROAD City: MOUNTAIN VIEW

### 3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

None

**4. Emergency Procedures:**Emergency Coordinator Responsibilities

- a Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall.
- i Identify the character, exact source, amount, and a real extent of any released hazardous materials
  - ii Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
  - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel
  - iv Notify appropriate local authorities (*i.e. call 911*)
  - v. Notify the State Office of Emergency Services at 1-800-852-7550
  - vi Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
  - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall.
- i Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
  - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
  - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
  - iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above

Responsibilities of Other Personnel

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

**5. Post-Incident Reporting/Recording:**

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g. fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future

**6. Earthquake Vulnerability:** [19 CCR §2731(e)]

Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion:

---

**Tank Monitor Alarm; Pump Islands and Dispensers; Any Above Ground Storage containment or Hazardous Materials on site**

---

7. Emergency Equipment:

22 CCR, Section 66265.52(e) [as referenced by Section 66262 34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective, Equipment, Safety Equipment, and First Aid Equipment	<input type="checkbox"/> Cartridge Respirators		
	<input type="checkbox"/> Chemical Monitoring Equipment (describe)		
	<input type="checkbox"/> Chemical Protective Aprons/Coats		
	<input type="checkbox"/> Chemical Protective Boots

<input type="checkbox"/> Other (describe)			
Additional Equipment (Use Additional Pages if Needed)			

\* Use the Location Codes (LC) from the Storage Map(s) prepared earlier for your HMBP

\*\* Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

## Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(c), Title 22, Div 4 5, Ch 12, Art 3 CCR

Page 15 of 17

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (\*) are required.]:

1. **Personnel** are trained in the following procedures:

<input checked="" type="checkbox"/> Internal alarm/notification *
<input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/> Emergency incident reporting
<input checked="" type="checkbox"/> External emergency response organization notification
<input checked="" type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan
<input checked="" type="checkbox"/> Facility evacuation drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

2. **Chemical Handlers** are additionally trained in the following:

<input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/> Spill procedures/emergency procedures
<input checked="" type="checkbox"/> Proper use of personal protective equipment *
<input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e. inhalation, ingestion, absorption) *
<input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *

3. **Emergency Response Team Members** are capable of and engaged in the following:

<input checked="" type="checkbox"/> Personnel rescue procedures
<input checked="" type="checkbox"/> Shutdown of operations
<input checked="" type="checkbox"/> Liaison with responding agencies
<input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/> Refresher training, which is provided at least annually *
<input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

**Record keeping**  
(Hazardous Materials Business Plan Module)

Page 16 of 17

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (\*) are required.]:

<input checked="" type="checkbox"/> Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/> Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/> Training Program(s) (i.e. written description of introductory and continuing training) *
<input checked="" type="checkbox"/> Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/> Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/> Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/> Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/> Description and documentation of facility emergency response drills

Note The above list of records does not necessarily identify every type of record required to be maintained by the facility

**A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. (Exception: Available from you local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)**

Check the appropriate box:

<input checked="" type="checkbox"/> We will use the "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
<input type="checkbox"/> We will use our own documents to record inspections (A blank copy of each document used must be attached to this HMBP.)

**EMERGENCY RESPONSE PROCEDURES**  
**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

256115

**MINOR INCIDENT: (less than 5 gallons)**

1. **FIRES:** Extinguish with fire extinguisher. Recharge fire extinguisher, if used
2. **SPILLS:** Clean up with absorbent materials on site and dispose of according to all regulations. Have a fire extinguisher ready for spills of flammable materials. Restock absorbent as necessary. See the Emergency Equipment Section for additional information.
3. **MEDICAL:** Treat with on site first aid kit or take to nearest hospital. Employee training plan lists the nearest hospital.
4. **RECORD:** Record the event in the Daily Systems Inspection Form.
5. **NOTIFY:** The SolvOne Help Desk if the spill flows off site, enters a storm drain or contacts bare soil or groundwater.

**MAJOR INCIDENT: (more than 5 gallons)**

Any incident that can not be contained and cleaned up as part of the routine operations, should be considered a major release and use the following procedures.

1. **TURN OFF PUMPS** using the Emergency Pump Shut-Off Switch.
2. **EVACUATE:** Verbally **ANNOUNCE** to all persons on the site: "This is an emergency. Please turn off your engines and leave the station on foot immediately. All employees meet at the emergency assembly area "
3. **Call 9-1-1:** Give the following information:  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/76 service station at: 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher. Stay on the phone and be prepared to answer any questions concerning the situation.
4. **ATTEMPT** to contain the spill if you can do it safely.
5. **LOOK AROUND** to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement. Assist or direct assistance to anyone having difficulty leaving the station and anyone who may be injured.
6. **REPORT** to arriving emergency response personnel to provide them with any information or assistance they might need. Immediately notify the SolveOne Help Desk.

ConocoPhillips will notify the State and Local administering agencies within an appropriate time frame unless the situation requires urgent immediate response by the agencies, in which case the **Operator** should notify these agencies.

a) **LOCAL AGENCY:** Santa Clara Co. Dept. of Env. Health

**PHONE NUMBER:** 408-918-3400

b) **CALIFORNIA OFFICE OF EMERGENCY SERVICES:** (800) 852-7550 or (916) 845-8911

c) **LOCAL POLICE AND FIRE DEPARTMENTS:** 9-1-1

d) **NATIONAL RESPONSE CENTER:** (800) 424-8802 (24-Hours)

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. **Retain these records for a minimum of three years.**

All employees should review the Hazardous Material Plan, (this document). Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor the site for leaks of hazardous materials. As a supplement to this package, employees should also review and have access to the the Emergency Response Plan and the Materials Safety Data Sheets. Each employee must be drilled in all emergency response procedures contained herein.

### UTILITY SHUT-OFFS

- \* **PUMP SHUT-OFF:** This turns off the turbine pumps that provide flow to the dispensers from the underground storage tanks. Shut-off pumps in case of a leak to help prevent spills.  
Location: 1-NORTH EXT. BLDG. WALL, 1-STORAGE AREA
- \* **TANK MONITORING ALARM:** This is used to monitor the Underground Storage Tanks. This panel may indicate when a potential leak is detected by a visual and audible alarm.  
Location: SERVICE BAY STORAGE AREA
- \* **ELECTRICAL PANEL:** The panel allows you to selectively cut power to lights, signs, and pumps. The main switch allows you to cut-off all power at the site.  
Location: IN SERVICE BAY STORAGE AREA
- \* **WATER SHUT-OFF:** The water shut-off may be necessary in some cases.  
Location: IN SIDEWALK ALONG LOS ALTOS AVENUE
- \* **NATURAL GAS SHUT-OFF:** If your facility has natural gas, it may be necessary to shut-off the flow in case of an emergency.  
Location: NONE
- \* **PROPANE/LPG SHUT-OFF:**  
If your facility has propane or liquefied petroleum gas, be sure to turn off the manual valves and shut off the power to the dispensing pumps in case of a release or fire. Call your supplier or dial 9-1-1 as necessary.

### EMERGENCY EQUIPMENT

- \* **FIRE EXTINGUISHER:** Use only on small fires that you can contain. Do not attempt to extinguish large fires on your own; call 9-1-1 for help.  
Location: 2-IN SERVICE BAY
- \* **SPILL/ CLEAN UP KIT:**  
This can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, see the "Major Incident" section on the previous page.  
Location: IN SERVICE BAY STORE AREA
- \* **RESPONSE EQUIPMENT:** These items are to be used to prevent skin contact with hazardous materials.
  - Broom: SERVICE BAY
  - Shovel: SERVICE BAY
  - Gloves: SERVICE BAY
  - Goggles: SERVICE BAY
- \* **FIRST AID KIT:** Use for minor incidents and treatment.  
Location: 1-IN SERVICE BAY STORE AREA
- \* **EVACUATION ASSEMBLY AREA:** All employees must know where to meet in the event of an emergency.  
Location: SOUTH SIDE OF SITE
- \* **ENVIRONMENTAL DOCUMENTS / HMMP MSDS SHEETS:**  
Location: SALES OFFICE

**EMPLOYEE TRAINING PLAN (con't)**

**MEDICAL FACILITIES:**

**PRIMARY FACILITY:**

EL CAMINO HOSPITAL  
2500 GRANT ROAD MOUNTAIN VIEW  
650-940-7055

**ALTERNATE FACILITY:**

STANFORD HOSPITAL  
300 PASTEUR DR STANFORD  
650-723-5111

**FIRST AID PROCEDURES** (for gasoline and/or diesel fuel): For further information, refer to the MSDS sheets

**EYE CONTACT:**

If irritation or redness develops, move victim away from exposure and into fresh air. Flush eyes with water clean water. If symptoms persist, seek medical attention immediately.

**SKIN CONTACT:**

Removing contaminated clothing and shoes, flush affected area(s) with large amounts of water. If skin is not damaged, proceed to cleanse the affected area with mild soap and water. If symptoms become worse, seek medical attention immediately.

**INHALATION (Breathing):**

Remove victim from source of exposure and into fresh air. If victim is not breathing, give artificial respiration and seek medical attention immediately.

**INGESTION (Swallowing):**

Aspiration Hazard: **DO NOT INDUCE VOMITING.**

do not give anything by mouth because it can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. Seek medical attention immediately.

**FIRST AID FOR EXPOSURE TO OTHER MATERIALS:**

Consult the warning advice on container labels or refer to the Material Safety Data Sheet (MSDS) for that product

# Hazardous Materials Training Requirements

As the owner/operator of a business that handles hazardous materials, you must have the following:

- \* A Hazard Communication Plan (also known as an Employee Right-to-Know Plan)
- \* The Hazardous Materials Management Plan (Chemical Inventory, also known as the CA Business Emergency Plan)
- \* An Emergency Response Plan
- \* An Underground Storage Tank Monitoring and Response Plan
- \* A Release Reporting Plan

**Each of these plans requires employee training. Training must be documented by a written description of the topics covered and by a dated signature of the employees receiving the training. Annual refresher training is required. The introduction of new hazardous materials or changes in procedures requires immediate retraining. Training requirements that are common to more than one of these plans only need to be given once to satisfy all of the plans containing that requirement as long as the training addresses the concerns of each plan.**

- \* Training for the Hazard Communication Plan must include the following elements:
  - \* An overview of the requirements contained in the Hazard Communication Regulation and the worker's rights under the Regulation.
  - \* Locations of any operations in the work area where hazardous substances are present.
  - \* Location where a copy of the written Hazard Communication programs is made available to them
  - \* How to read labels and Material Safety Data Sheets (MSDS) to obtain appropriate hazard information, including physical and health effects of hazardous substances in the work place.
  - \* How to detect the presence of or the release of hazardous substances in the work place
  - \* How to minimize their exposure to these hazardous substances by proper use of engineering controls, work practices, and/or personal protective equipment (gloves, etc).
  - \* Emergency and first aid procedures to follow if employees are exposed to hazardous substances.

# Aboveground Separation, Containment, and Monitoring Plan

(Appendix to Hazardous Materials Business Plan)

Complete one column for each aboveground storage area shown on the Hazardous Materials Business Plan Storage Map(s). Write the appropriate location code in the box provided at the top of each column, then moving down the column, check all boxes which apply to that location. Make additional copies of this page if needed.

Los Altos, CA 94022

RE: HAZARDOUS MATERIALS MANAGEMENT PLANS

Dear Greg Galatolo.

Attached is the new Hazardous Materials Inventory and Business Plan for your station. This new HMMP is intended to **replace** the current HMMP. The "**SITE COPY**" should be kept in your Environmental Record Box, Tab 9 and available to all employees and agency personnel at all times.

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP AS SOON AS POSSIBLE. FAILURE TO RETURN THIS PLAN WITHIN 30 DAYS WILL RESULT IN A \$25.00 LATE FEE CHARGED TO YOUR ACCOUNT.**

**FAILURE TO RETURN THIS PLAN MAY ALSO RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet:

1. Please sign all 3 copies of the HMMP where flagged and indicated with a "X".
2. Please return the 2 copies marked "AGENCY" and "RHL FILE" to RHL Design in the pre-stamped envelope provided AS SOON AS POSSIBLE.
3. Keep the "**SITE COPY**" of the HMMP in your Environmental Record Box, and available for inspection  
Use your Site Copy for employee training and have employees sign the training log  
Keep training records at your station

A copy of the HMMP will be sent to Santa Clara Co Dept. of Env Health

If you have any questions regarding the content of this HMMP, please contact RHL Design Group, Ms. Jennifer Carey or Mr. Steve Skanderson at (707) 765-1660. If you have any additional questions, including invoicing questions, please contact your local Marketing HSE Specialist.

Sincerely,

ConocoPhillips

# Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(b), Title 22, Div 4 5, Ch 12, Art 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below).

### 1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply)

- Bells,  Horns/Sirens,  Verbal (i.e. shouting),  Other (specify) \_\_\_\_\_

b.  Evacuation map is prominently displayed throughout the facility

*Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.*

### 2. a. Emergency Contacts\*:

Fire/Police/Ambulance

Phone No 911

State Office of Emergency Services

Phone No (800) 852-7550

### b. Post-Incident Contacts\*:

Fire Department Hazardous Materials Program

Phone No 408-918-3400

Santa Clara County Hazardous Materials Compliance Division

Phone No (408) 918-3400

California EPA Department of Toxic Substances Control

Phone No (510) 540-3739

Cal-OSHA Division of Occupational Safety and Health

Phone No (408) 452-7288

Bay Area Air Quality Management District

Phone No (415) 771-6000

Regional Water Quality Control Board

Phone No (510) 622-2300

\* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified

### c. Emergency Resources:

Poison Control Center

Phone No (800) 876-4766

Nearest Hospital: Name EL CAMINO HOSPITAL Phone No 650-940-7055

Address 2500 GRANT ROAD City MOUNTAIN VIEW

### 3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below.

None

**4. Emergency Procedures:**Emergency Coordinator Responsibilities

- a Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall
- i Identify the character, exact source, amount, and a real extent of any released hazardous materials
  - ii Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*)
  - iii Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel
  - iv Notify appropriate local authorities (*i.e. call 911*)
  - v Notify the State Office of Emergency Services at 1-800-852-7550
  - vi Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident
  - vii Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility
- b Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall
- i Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility
  - ii Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed
  - iii Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use
  - iv Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above

Responsibilities of Other Personnel

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

**5. Post-Incident Reporting/Recording:**

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

- a Name, address, and telephone number of the facility's owner/operator,
- b Name, address, and telephone number of the facility,
- c Date, time, and type of incident (*e.g. fire, explosion, etc.*),
- d Name and quantity of material(s) involved,
- e The extent of injuries, if any,
- f An assessment of actual or potential hazards to human health or the environment, where this is applicable,
- g Estimated quantity and disposition of recovered material that resulted from the incident,
- h Cause(s) of the incident,
- i Actions taken in response to the incident,
- j Administrative or engineering controls designed to prevent such incidents in the future.

**6. Earthquake Vulnerability:** [19 CCR §2731(e)]

Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

---

Tank Monitor Alarm, Pump Islands and Dispensers, Any Above Ground Storage Containment or Hazardous Materials on Site

---

6. Emergency Equipment:

22 CCR, Section 66265 52(e) [as referenced by Section 66262 34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective, Equipment, Safety Equipment, and First Aid Equipment	<input type="checkbox"/> Cartridge Respirators		
	<input type="checkbox"/> Chemical Monitoring Equipment (describe)		
	<input type="checkbox"/> Chemical Protective Aprons/Coats		
	<input type="checkbox"/> Chemical Protective Boots		
	<input checked="" type="checkbox"/> Chemical Protective Gloves	service bay	Rubber Gloves
	<input type="checkbox"/> Chemical Protective Suits (describe)		
	<input type="checkbox"/> Face Shields		
	<input checked="" type="checkbox"/> First Aid Kits/Stations (describe)	1-in service bay store area	Standard first aid kit
	<input type="checkbox"/> Hard Hats		
	<input type="checkbox"/> Plumbed Eye Wash Stations		
	<input type="checkbox"/> Portable Eye Wash Kits (i.e. bottle type)		
	<input type="checkbox"/> Respirator Cartridges (describe)		
	<input checked="" type="checkbox"/> Safety Glasses/Splash Goggles	service bay	Goggles
	<input type="checkbox"/> Safety Showers		
<input type="checkbox"/> Self-Contained Breathing Apparatuses (SCBA)

	<input checked="" type="checkbox"/> Underground Tank Leak Detection Monitors	service bay storage area	Veeder Root
<input type="checkbox"/> Other (describe)			
Additional Equipment (Use Additional Pages if Needed)			

\* Use the Location Codes (LC) from the Storage Map(s) prepared earlier for your HMBP

\*\* Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.

**EMERGENCY RESPONSE PROCEDURES**  
**MAJOR INCIDENT: FIRE, SPILL OR SUSPECTED LEAK**

256115

- 1 TURN OFF PUMPS using the Emergency Pump Shut-Off Switch
- 2 EVACUATE Verbally ANNOUNCE to all persons on the site "This is an emergency Please turn off your engines and leave the station on foot immediately All employees meet at the emergency assembly area "
- 3 CALL 9-1-1: Give the following information  
"THERE IS A FIRE/GASOLINE SPILL at the ConocoPhillips/Circle K service station at 4350 El Camino Real  
If anyone is trapped or needs medical attention, tell the answering dispatcher Stay on the phone and be prepared to answer any questions concerning the situation
- 4 ATTEMPT to contain the spill if you can do it safely
- 5 LOOK AROUND to ensure that everyone has left the station, particularly those in vehicles who may need assistance or may not have heard the emergency announcement Assist or direct assistance to anyone having difficulty leaving the station are and anyone who may be injured
- 6 REPORT to arriving emergency response personnel to provide them with any information or assistance they might need
- 7 CONTACT the station operator if he/she is not already at the station Use the list below for emergency contacts

Emergency Coordinator Greg Galatolo Title Dealer  
Address 1531 Arbor Dr. Los Altos Ca 94024  
Bus#/Home#/Alt# 650-941-0244 / 650-948-8302 / 650-948-4771  
Alternate Emergency Coordinator Tom Segovia Title Manager  
Address 817 San Verone Ave. Mountain View, Ca 94043  
Bus#/Home#/Alt# 650-941-0244 / 650-969-2378 /

- 8 NOTIFY the following IMMEDIATELY to assist in the emergency and agency notification process  
Service Contact Center 1-866-805-4357  
Wholesale Territory Supervisor or Retail Territory Supervisor  
Environmental Compliance Coordinator North: Janette Thompson (925)277-2404  
South: Stephen Boyd (714)428-6572 or (714)454-8334

ConocoPhillips/Circle K Stores, Inc will notify the State and Local administering agencies within an appropriate time frame unless the situation requires urgent immediate response by the agencies, in which case the Operator should notify these agencies

- a) LOCAL AGENCY Santa Clara Co. Dept. of Env. Health  
PHONE NUMBER 408-918-3400
- b) CALIFORNIA OFFICE OF EMERGENCY SERVICES, (800)852-7550(24 HOURS)
- c) LOCAL POLICE AND FIRE DEPARTMENTS, **911**
- d) NATIONAL RESPONSE CENTER 1-800-424-8802 (24 HOURS)

**MINOR INCIDENT:** Any incident that can be contained and cleaned up as part of the routine operations Whenever in doubt, consider the incident a major release and use the above procedures

- 1 FIRES: Extinguish with fire extinguisher Recharge fire extinguisher, if used
- 2 SPILLS Clean up with absorbent materials on site and dispose of according to all regulations Have a fire extinguisher ready for spills of flammable materials Restock absorbent as necessary See Training Plan item #H for additional direction.
- 3 MEDICAL Treat with on site first aid kit or take to nearest hospital Employee training plan lists the nearest hospital
- 4 RECORD Record the event in the daily monitoring log
5. NOTIFY the dealer of the event

## EMPLOYEE TRAINING PLAN

Employees must be given this training before starting work, and refresher courses must be provided annually. Records must be kept to show when each station employee has been given his/her safety training. Use the following outline and make copies as needed. Have employee date and sign the attached training log upon completion of training. Retain these records for a minimum of three years.

### **I. FIRST THINGS TO KNOW:**

- A EMERGENCY PUMP SHUT-OFF This turns off the turbine pumps that provide flow to the dispensers from the underground tanks. In case of a leak, shutting off the pumps will help to prevent spills.  
Location 1-NORTH EXT BLDG WALL, 1-STORAGE AREA
- 
- B ELECTRICAL PANEL The panel allows you to selectively cut off power to lights, signs, pumps, etc. The main switch kills all power at the site.  
Location IN SERVICE BAY STORAGE AREA
- 
- C TANK MONITORING ALARM Monitoring panel for the Underground Storage Tanks. This panel will indicate when a leak is detected by a visual and audible alarm.  
Location SERVICE BAY STORAGE AREA
- 
- D WATER SHUT-OFF The water shut-off may be necessary in some cases.  
Location IN SIDEWALK ALONG LOS ALTOS AVENUE
- 
- E NATURAL GAS SHUT-OFF If your station has natural gas, it may be necessary to shut-off the natural gas flow in an emergency.  
Location NONE
- 
- F PROPANE/LPG If your station has propane or liquefied petroleum gas tank - In the event of a release or fire, turn off the manual valves and shut off the power to the dispensing pumps. Call your supplier or dial 9-1-1 as appropriate.
- 
- G FIRE EXTINGUISHER Use only on small fires that you can handle. Do not attempt to extinguish large fires on your own, call 9-1-1 for help.  
Location 2-IN SERVICE BAY
- 
- H ABSORBENT In the form of kitty litter, absorbent can soak up small spills of gasoline, diesel fuel, or other petroleum products. Absorbent should be used rather than washing spills down a drain. In case of large spill, merely try to contain it, a vacuum truck should be used to clean up any large spill.  
Location IN SERVICE BAY STORE AREA
- 
- I PERSONAL PROTECTIVE EQUIPMENT These items shall be used by employees to prevent direct skin contact with a hazardous material.
- 1 Broom SERVICE BAY
  - 2 Shovel SERVICE BAY
  - 3 Gloves SERVICE BAY
  - 4 Goggles SERVICE BAY
- 
- J FIRST AID KIT  
Location 1-IN SERVICE BAY STORE AREA
- 
- K EMERGENCY ASSEMBLY AREA Location where all employees are to meet in the event of an emergency.  
Location SOUTH SIDE OF SITE
- 
- HAZARDOUS MATERIAL MANAGEMENT PLAN (HMMP) MATERIAL SAFETY DATA SHEET (MSDS)  
Location SALES OFFICE
-

**II. NEAREST MEDICAL FACILITY:** Employees should know what facilities are available in case customers or other employees need medical attention

1 NAME EL CAMINO HOSPITAL

ADDRESS 2500 GRANT ROAD MOUNTAIN VIEW

PHONE NUMBER 650-940-7055

NEAREST DESIGNATED TRAUMA CENTER

2 NAME. STANFORD HOSPITAL

ADDRESS 300 PASTEUR DR STANFORD

PHONE NUMBER 650-723-5111

**III.** All employees should review the Hazardous Material Plan, of which this training plan is a part. Specifically, each employee should understand the procedures to be used in responding to various kinds of emergencies, and know how to monitor for leaks of hazardous materials. As a supplement to this package, employees should also review the Emergency Response Plan filed by your business to the appropriate local agency. Thirdly, employees should review and have access to the Materials Safety Data Sheets you have on file for each of the hazardous materials stored at the station and must be drilled in all emergency response procedures contained herein.

**IV. FIRST AID PROCEDURES** (For exposure to gasoline or diesel fuel)

- A EYE CONTACT Flush with water for 15 minutes while holding eyelids open. Get medical attention.
- B SKIN CONTACT Flush with water while removing contaminated clothing and shoes. Followed by washing with soap and water. Do not reuse clothing or shoes until cleaned. If irritation persists, get medical attention.
- C INHALATION (Breathing) Remove victim to fresh air and provide oxygen if breathing is difficult. If not breathing, give artificial respiration. Get medical attention.
- D INGESTION (Swallowing)

DO NOT INDUCE VOMITING BECAUSE GASOLINE CAN ENTER LUNGS AND CAUSE SEVERE LUNG DAMAGE! If vomiting occurs spontaneously keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

- F NOTE TO PHYSICIAN If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with medical supervision. Keep victim's head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions, or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

For further information, consult the Materials Safety Data Sheets for these products and for other hazardous materials.

FIRST AID FOR EXPOSURE TO OTHER MATERIALS Consult the warning advice on container labels or refer to the MSDS for that product.

This hazardous material management plan meets the requirements of a hazardous waste contingency plan.

*Document prepared by Environmental Staff, RHL Design Group, Inc., 800-765-1025 Last updated Dec 3, 2002*

# Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited H&SC, Section 25504(c), Title 22, Div 4 5, Ch 12, Art 3 CCR

Page 15 of 17

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

Check all boxes that apply [Note Items marked with an asterisk (\*) are required]

## 1 Personnel are trained in the following procedures

<input checked="" type="checkbox"/> Internal alarm/notification *
<input checked="" type="checkbox"/> Evacuation/re-entry procedures & assembly point locations*
<input checked="" type="checkbox"/> Emergency incident reporting
<input checked="" type="checkbox"/> External emergency response organization notification
<input checked="" type="checkbox"/> Location(s) and contents of Emergency Response/Contingency Plan
<input checked="" type="checkbox"/> Facility evacuation drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

## 2 Chemical Handlers are additionally trained in the following

<input checked="" type="checkbox"/> Safe methods for handling and storage of hazardous materials *
<input checked="" type="checkbox"/> Location(s) and proper use of fire and spill control equipment
<input checked="" type="checkbox"/> Spill procedures/emergency procedures
<input checked="" type="checkbox"/> Proper use of personal protective equipment *
<input checked="" type="checkbox"/> Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e. inhalation, ingestion, absorption) *
<input type="checkbox"/> Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *

## 3. Emergency Response Team Members are capable of and engaged in the following

<input checked="" type="checkbox"/> Personnel rescue procedures
<input checked="" type="checkbox"/> Shutdown of operations
<input checked="" type="checkbox"/> Liaison with responding agencies
<input checked="" type="checkbox"/> Use, maintenance, and replacement of emergency response equipment
<input checked="" type="checkbox"/> Refresher training, which is provided at least annually *
<input checked="" type="checkbox"/> Emergency response drills, which are conducted at least (specify) <u>Annual</u> (e.g. "Quarterly", etc.)

**Record keeping**  
(Hazardous Materials Business Plan Module)

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. [Note: Items marked with an asterisk (\*) are required.]

<input checked="" type="checkbox"/> Current employees' training records (to be retained until closure of the facility) *
<input checked="" type="checkbox"/> Former employees' training records (to be retained at least three years after termination of employment) *
<input checked="" type="checkbox"/> Training Program(s) (i.e. written description of introductory and continuing training) *
<input checked="" type="checkbox"/> Current copy of this Emergency Response/Contingency Plan *
<input checked="" type="checkbox"/> Record of recordable/reportable hazardous material/waste releases *
<input checked="" type="checkbox"/> Record of hazardous material/waste storage area inspections *
<input checked="" type="checkbox"/> Record of hazardous waste tank daily inspections *
<input checked="" type="checkbox"/> Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

**A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP.** (Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)

Check the appropriate box.

<input checked="" type="checkbox"/> We will use the "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
<input type="checkbox"/> We will use our own documents to record inspections. (A blank copy of each document used must be attached to this HMBP.)

# Aboveground Separation, Containment, and Monitoring Plan

(Appendix to Hazardous Materials Business Plan)

Complete one column for each aboveground storage area shown on the Hazardous Materials Business Plan Storage Map(s) Write the appropriate location code in the box provided at the top of each column, then moving down the column, check all boxes which apply to that location Make additional copies of this page if needed

Location Code	B	C	E		
<b>Storage Type</b>	<input checked="" type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input checked="" type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input checked="" type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors	<input type="checkbox"/> Inside building <input type="checkbox"/> Outside storage shed <input type="checkbox"/> Outdoors

AGENCY

RE HAZARDOUS MATERIALS MANAGEMENT PLANS

Dear Greg Galatolo

Attached is the new Hazardous Materials Inventory and Business Plan for your station. This new HMMP is intended to replace the current HMMP. The "SITE COPY" should be kept in your "Success at the Pump" binder and available to all employees and agency personnel at all times.

**THESE FORMS MUST BE RETURNED TO RHL DESIGN GROUP AS SOON AS POSSIBLE. FAILURE TO RETURN THIS PLAN WITHIN 30 DAYS WILL RESULT IN A \$25.00 LATE FEE CHARGED TO YOUR ACCOUNT.**

**FAILURE TO RETURN THIS PLAN MAY ALSO RESULT IN FINES AND/OR CIVIL PENALTIES BY GOVERNMENT ENFORCEMENT AGENCIES.**

Instructions for signing and returning the packet

- 1 Please sign all 3 copies of the HMMP where flagged and indicated with a "X"
- 2 Please return the 2 copies marked "AGENCY" and "RHL FILE" to RHL Design in the pre-stamped envelope provided **AS SOON AS POSSIBLE.**
- 3 Keep the "SITE COPY" of the HMMP in your Success at the Pump binder, and available for inspection. Use your Site Copy for employee training and have employees sign the training log. Keep training records at your station.

A copy of the HMMP will be sent to Santa Clara Co Dept of Env Health

If you have any questions regarding the content of this HMMP, please contact RHL Design Group, Ms Jennifer Carey or Mr Roger Beach at (707) 765-1660. If you have any additional questions, including invoicing questions, please contact Pam Ruesga, ConocoPhillips, Hazardous Materials Coordinator at (602) 728-4970.

Sincerely,

ConocoPhillips

## OFFICIAL NOTICE OF INSPECTION

Facility ID	FA0251391	Inspection Date: 11/19/2013
Facility Name	EL CAMINO 76	
Site Address	4350 EL CAMINO REAL, LOS ALTOS, CA 94022	
HW Generator Type	<1000 KG/MO	<input type="checkbox"/> RCRA LQG
Consent to Inspect Granted By	GREG GALOTOLO, OWNER	<input type="checkbox"/> Pictures Taken
		<input type="checkbox"/> Samples Taken

**Summary of Violations & Notice to Comply**  
 Program PR0312958 - HAZARDOUS WASTE GENERATOR - 2205  
 Inspection Type ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G001	M	<p><b>EPA ID NUMBER</b></p> <p>Facility failed to obtain or maintain a valid EPA ID number [Note Federal EPA IDs are site-specific California IDs are both site-specific and owner-specific ]</p> <p><b><i>Your EPA ID #CAL000025915 is "inactive". Complete the form 1358 provided to you and submit it to DTSC in Sacramento to re-activate your number.</i></b></p> <p>If your facility generates more than 100 kg of a RCRA (i.e., federally regulated) hazardous waste or accumulates 5,000 kilograms or more of federally-regulated Universal Waste, obtain a federal EPA ID by submitting EPA FORM 8700-12 to the U.S. Environmental Protection Agency. Otherwise, obtain or reactivate a California ID by submitting DTSC FORM 1358 to DTSC. Forms are available at <a href="http://www.dtsc.ca.gov">www.dtsc.ca.gov</a> [CCR 66262.12, 66273.32(a)(1), 66273.32(b)]</p>	
G020	M	<p><b>MARKING OF HAZARDOUS WASTE</b></p> <p>Facility failed to properly mark a hazardous waste tank and/or container</p> <p><b><i>The following tank and containers were not properly labeled: 1) The red mobile waste oil drain was unlabeled 2) The 16 gallon used oil container next to the front door and fire extinguisher has a label with faded information on it. 3) The waste coolant container in the rear outside storage area does not have the generator name and address marked on the container label. 4) Provide the words "hazardous waste" and the accumulation start date in the spill box of the used oil tank</i></b></p> <p>Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE," the accumulation start date, the name and address of the generator, and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]</p>	
G110	M	<p><b>MAINTENANCE AND OPERATION OF FACILITY</b></p> <p>Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment</p> <p><b><i>Clean the releases from the top and sides of the waste coolant container in the outside rear storage area.</i></b></p> <p>Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases [CCR 66265.31, CFR 265.31]</p>	

# OFFICIAL NOTICE OF INSPECTION

**Facility ID:** FA0251391  
**Facility Name:** EL CAMINO 76  
**Site Address:** 4350 EL CAMINO REAL, LOS ALTOS, CA 94022

**Inspection Date:** 11/19/2013

## Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G211	M	<b>EMERGENCY INFORMATION POSTED: SQG</b> Facility failed to post emergency response information next to the telephone, as required <b>Add the locations of your fire extinguishers and spill control equipment to your posted emergency procedures.</b> Post the following information 1) the name and phone number of all emergency coordinators, 2) the location of fire extinguishers, spill control materials, and any fire alarms, and 3) the phone number for the fire department A sample poster (UN-051) is available at www.unidocs.org [CFR 262.34(d)(5)(ii)]	
G413	M	<b>CONTAINER REQUIREMENTS. USED OIL/FUEL FILTERS</b> A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters <b>Observed 2 x 55-gallon used filter drums in the outside rear storage area that have rusted lids and the lids were not properly sealed to the containers. Replace the lids with ones that are in good condition and use the drum rings to seal the lids to the containers.</b> Ensure that drained use oil/fuel filter containers are closed and meet the above requirements Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides [CCR 66266.130(c)(3), HSC 25250.22]	
G900	II	<b>RESPONSE TO NOTICE OF VIOLATION</b> Facility failed to submit a written response within 35 days of receiving an Official Notice of Inspection from HMCD citing violations of hazardous waste law or regulations <b>Return to Compliance from your last 11/29/2011 inspection was not submitted to our office within 35 days of that inspection date.</b> Submit to HMCD a written description of the actions taken to correct each violation listed in the Official Notice of Inspection If any violation has not been corrected, describe the corrective actions that will be taken and provide a specific date by which those actions will be completed [HSC 25185(c)(3), 25187.8(b)]	

**Comments:** A routine hazardous waste generator inspection was performed on this date. A physical walkthrough was performed along with a review of paperwork since the last inspection.

**Fire extinguishers were properly charged and available for use Spill control absorbent was present. Emergency procedures were posted. First Aid kit was available for use. The trash dumpster was inspected and contained appropriate waste.**

**Program:** PR0376905 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02

 Site Address: 4350 EL CAMINO REAL, LOS ALTOS, CA 94022

Inspection Date: 11/19/2013

## Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
U015	M	<p><b>UST MONITORING PLAN</b></p> <p>The facility failed to submit or keep current a UST Monitoring Plan</p> <p><i>Your monitoring plan is incomplete. Information pertaining to manufacturer name and model numbers for your tank leak sensors, your piping sensors, your mechanical line leak detectors, and your UDC float-and-chain assemblies are incorrect. Re-submit your UST monitoring plan information electronically via CERS with correct required information</i></p> <p><b>DISREGARD CORRECTIVE ACTION TEXT, BELOW REGARDING SUBMITTAL OF HARD COPY FORMS. SEE <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> FOR DETAILS REGARDING ELECTRONIC REPORTING REQUIREMENTS. A FACILITY RECORD FOR THIS SITE HAS ALREADY BEEN CREATED ON THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WEBSITE AT <a href="http://cers.calepa.ca.gov">http://cers.calepa.ca.gov</a>. REQUEST ACCESS TO THAT CERS RECORD AND SUBMIT UST MONITORING PLAN(S) FOR APPROVAL.</b></p> <p><i>Your CERS ID # is 10352914. Access your account and submit your required information electronically.</i></p> <p>Submit to HMCD a UPCF UST Monitoring Plan form (UST-D), available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a>. In addition to the information on the UPCF form, the monitoring plan must include a plot plan that accurately indicates the location of the UST(s), piping, dispensers, monitoring consoles, leak detection sensors, line leak detectors, and (for single-wall tanks) automatic tank gauging probes. Keep a copy of the current monitoring plan on-site. [23 CCR 2632(d)(1), 2641(h)]</p>	
U030	M	<p><b>DUSTO ID + STATEMENT OF COMPLIANCE</b></p> <p>UST owner failed to submit to HMCD the required signed statement indicating that the owner understands and is in compliance with all applicable UST requirements and identifying all Designated UST Operators (DUSTO) for this facility</p> <p><i>Dusto Notificaiton Form not found. Complete and submit this document to our office for review. Keep a copy of this record in your compliance file</i></p> <p>Within 30 days, submit to HMCD a UST System Owner Statement of Designated UST Operator and Understanding of and Compliance With UST Requirements form. The form (UN-062) is available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a>. Notify HMCD within 30 days of future DUSTO changes. Each DUSTO must be certified by the International Code Council (ICC) as a California UST System Operator and renew their certification every 24 months. To confirm ICC certification information, go to <a href="http://www.iccsafe.org/CertSearch">www.iccsafe.org/CertSearch</a>. [23 CCR 2715(a)]</p>	
U036	M	<p><b>DUSTO TRAINING FOR FACILITY EMPLOYEES</b></p> <p>UST owner/operator failed to have a qualified Designated UST Operator (DUSTO) perform and document required training of facility employees</p> <p><i>2013 DUSTO employee training not performed and documented.</i></p> <p>Within 30 days, have a qualified DUSTO perform and document training of all facility employees with UST responsibilities. The training must cover the following topics, as applicable: 1) Operation of the UST(s) in a manner consistent with the facility's best management practices, 2) The employee's role with regard to required UST monitoring equipment, 3) The employee's role with regard to UST spills and overfills, and 4) The name(s) of the contact person(s) for emergencies and UST leak alarms. Have the DUSTO train new employees within 30 days of the date of hire and refresh training for all facility employees annually. Maintain a current list of trained facility employees on-site. A UST System Designated Operator Facility Employee Training Record form is available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a>. The DUSTO must be certified by the International Code Council (ICC) as a California UST System Operator and renew their certification every 24 months. To confirm ICC certification information, go to <a href="http://www.iccsafe.org/CertSearch">www.iccsafe.org/CertSearch</a>. [23 CCR 2715(f)]</p>

## Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
U100	C	<p><b>MONITORING. DETECTION AT EARLIEST OPPORTUNITY</b></p> <p>UST monitoring equipment/procedures are not capable of detecting a leak from all portions of the UST system at the earliest possible opportunity</p> <p><b>Float-and-chain assemblies at dispenser 1/2 were both water-tested and failed. Adjustments were made to the assemblies, re-tested and then passed. Violation corrected during the inspection. Nor further action is required.</b></p> <p>Upgrade monitoring equipment and/or procedures to be capable of detecting a leak from all portions of the UST systems at the earliest possible opportunity All monitoring system consoles, leak sensors, and probes must be listed in the current edition of the State Water Resources Control Board's Local Guidance (LG) Letter LG-113, available at <a href="http://www.swrcb.ca.gov/water_issues/programs/ust/">www.swrcb.ca.gov/water_issues/programs/ust/</a> A permit is required prior to installing new monitoring equipment See the handout entitled Plan Submittal Requirements for Hazardous Materials Systems (HMCD-004) for details The handout is available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> [23 CCR 2630(d), 2641(a)]</p>	
U900	II	<p><b>RESPONSE TO NOTICE OF VIOLATION</b></p> <p>UST permit holder failed to implement corrective actions within 30 calendar days of receiving an Official Notice of Inspection from HMCD citing violations of UST law or regulations</p> <p><b>Return-to-Compliance documents were not submitted for your 11/29/2011 and 11/19/2012 inspections.</b></p> <p>Correct all outstanding violations Submit to HMCD the previous Official Notice(s) of Inspection with the Corrective Actions Taken and Certification of Compliance sections completed If any violation has not been corrected, describe the corrective actions that will be taken and provide a specific date by which those actions will be completed [23 CCR 2712(f)]</p>	

**Comments: Annual underground storage tank inspection was performed on this date. The annual monitoring certification was performed by Chris Bishop All of his required certifications are current. The VMI LDT-890 2-year calibration date = 6/21/2012.**

**"All Functions Normal" was displayed at the TLS-350 control panel at the beginning and end of the inspection. Indicator lights at the alarm panel were not working and were replaced by the service technician. The system set-up and alarm history reports were obtained from the service technician and were reviewed.**

**The 87 and 91 turbine sumps plus the 7 UDC sumps were inspected and were dry The 2 turbine sump sensors were positioned at their low points plus the product piping test boots were separated to allow communication to occur between the product piping and the sump sensors.**

**The following sensors were tested and provided audible and visual alarms: 3 tank annular space sensors (87, 91, used oil), 2 turbine sump sensors (87 and 91), and 2 overfill alarms set at 90% tank capacity (87 and 91).**

**The 2 turbine sump sensors also provided positive shut-down when tested. The 87 and 91 turbines also provided positive shut-down under conditions of sensor-out and failsafe.**

**3 spill buckets passed their one-hour lake test (87, 91, used oil).**

**2 FE-Petro mechanical line leak detectors functioned properly when tested at a leak rate of 3 gph and 10 psi.**

**The emergency shut-off switch properly shut down the 2 turbines when tested.**

**14 float-and-chain assemblies in the 7 UDC sumps were successfully water tested.**

**Send a copy of the monitoring certification to our office within 30 days.**

**Monthly Designated Operator Reports over the last 12 months were reviewed and were proper**

**Certification of Financial Responsibility, CFO letter, and UST Response plan were current.**

**EFFECTIVE JANUARY 1, 2013, STATE LAW REQUIRES THAT HAZARDOUS MATERIALS BUSINESS PLAN (HMBP), HAZARDOUS**

		No violations were observed during this inspection	

**Comments:** *The Business Activities Page needs to be amended to reflect that the facility is NOT a Cal ARP Facility.*  
*Re-certification of the HMBP will be due on or before 2/15/2012.*  
*Facility has 6 reportable chemicals,*  
*Type/Quantity*  
*Gasoline / 24000 gallons*  
*Propane 105 gallons*  
*Waste Oil / 520 gallons*  
*Waste Coolant/Antifreeze / 110 gallons*  
*Motor Oil / 300 gallons*  
*Coolant Antifreeze / 110 gallons*

Program PR0312958 - HAZARDOUS WASTE GENERATOR - 2205  
 Inspection Type ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G020	M	<b>MARKING OF HAZARDOUS WASTE</b> Facility failed to properly mark a hazardous waste tank and/or container <i>The Underground Waste Oil Tank Hazardous Waste Label shall include the identifier "Used Oil" and the accumulation start date.</i>  <i>The mobile used oil carousel had a blank Hazardous Waste label.</i>  <i>The used coolant container did not have a generator name and address marking.</i> Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE," the accumulation start date, the name and address of the generator, and the composition, physical state, and hazardous properties of the waste. Additionally mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL" [CCR 66262 34(f), 66279 21(b)]	
G021	M	<b>CONTAINER CONDITION</b> Facility held hazardous waste in a container that was not in good condition <i>Observed one dented 16 gallon used filter container storing used filters in the service bay. Discontinue use of this drum, transfer the drained filters to a proper storage drum and recycle the damaged drum.</i> Immediately transfer the hazardous waste to a container that is in good condition [CCR 66265 171, CFR 265 171]	

# OFFICIAL NOTICE OF INSPECTION

**Facility ID.** FA0251391  
**Facility Name:** EL CAMINO 76  
**Site Address.** 4350 EL CAMINO REAL  
 LOS ALTOS, CA 94022

**Inspection Date:** 11/29/2011

VC	Class	Violation	Corrective Actions Taken
G023	M	<b>CONTAINER OPEN</b>  Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste <b>Observed one partially filled waste oil drip pan. Transfer drip pan oil into a closed container. Do not leave partially-filled open containers unattended.</b> Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265 173(a), CFR 265 173(a)]	
G051	M	<b>CONSOLIDATED MANIFESTING - INCOMPLETE RECEIPT</b>  Facility allowed an eligible hazardous waste to be shipped using a consolidated manifest without receiving a properly completed receipt <b>Consolidated Manifest for waste shipment on March 1, 2011 did not include the quantity of waste shipped. Ensure that all Consolidated Manifests include the correct quantity marked on the document.</b> Do not allow eligible hazardous wastes to be removed from the facility without obtaining a proper receipt from your hauler. The receipt must contain: 1) the name, address, EPA ID, contact person, telephone number, and signature of the generator, 2) the date of shipment, 3) the manifest number, 4) the type of waste, DOT proper shipping name, California and RCRA waste codes, and quantity shipped for each waste stream, 5) the name, address, and EPA ID of the receiving facility, 6) the name, address, and EPA ID of the transporter, 7) the driver's signature, and 8) a statement signed by the generator, certifying that the generator has established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree, as determined by the generator, to be economically practicable. [HSC 25160 2(b)(4)]	
G110	M	<b>MAINTENANCE AND OPERATION OF FACILITY</b>  Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment <b>The outside storage area "Area C" with 110 gallon antifreeze and used fuel and oil filter drums has accumulation of oily debris on sides and at the base of containers and throughout the space. Clean all debris, place used fuel filter in used filter drum and manage debris properly.</b> Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265 31, CFR 265 31]	
G112	M	<b>EMERGENCY EQUIPMENT TESTING AND MAINTENANCE</b>  Facility failed to maintain required emergency response equipment <b>Observed one undercharged fire extinguisher in the service bay. Recharge the fire extinguisher.</b> <b>NOTE: All other fire extinguishers will need recharging by December 2011.</b> Test and maintain all required facility communications and alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation. [CCR 66265 33, CFR 265 33]	
G412	M	<b>CONTAINER MARKING USED OIL/FUEL FILTERS</b>  Facility failed to properly mark a container of drained used oil/fuel filters <b>Observed one 16 gallon used filter steel drum that had a Hazardous Waste "Coolant" label. Use label provided to you to properly mark used oil filter container.</b> Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266 130(c)(3), HSC 25250 22]

# OFFICIAL NOTICE OF INSPECTION – SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations

## What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed
- Certify that the facility has returned to compliance by signing the certification statement at the end of the report
- Make a photocopy of the NOI and any attachments for your records
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716

## What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

## What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

## What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

## Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification I = class I violation, II = class II violation, M = minor violation, C = corrected minor violation [HSC 25110 8 5, HSC 25117 6, CCR 66260 10]
DTSC	California Department of Toxic Substances Control
EPA	U S Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

## Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance. [HSC 25404 1 2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)]
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than \$500 or more than \$5,000 [HSC 25299(a)(8), 25299(b)(7)]
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC 25187 8(i)]

**Inspection Date:** 1/18/2011

VC	Class	Violation	Corrective Actions Taken
U034	M	<b>DUSTO MONTHLY INSPECTIONS</b> UST owner/operator failed to ensure that a qualified Designated UST Operator (DUSTO) has been performing and documenting monthly inspections of the UST system(s) as required and/or failed to maintain copies of DUSTO inspection records <b>THE FOLLOWING ARE DEFICIENCIES FOUND IN THE MONTHLY INSPECTION:</b> =INCORRECT TESTING DATES FOR EXAMPLE SB989 WAS NOTED AS COMPLETED NOV 09 BUT ACTUALLY CONDUCTED 12-06-07. =INCORRECT ALARM HISTORY REPORT FOR SENSORS Ensure that a qualified DUSTO performs and documents inspections of the UST system(s) every month. Inspections can be documented by properly completing all items on the Underground Storage Tank System Designated UST Operator Monthly Inspection Report form. The form (UN-057) is available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> . Keep on-site a copy of DUSTO inspection records and required attachments for the previous 12 months. Each DUSTO must be certified by the International Code Council (ICC) as a California UST System Operator and renew their certification every 24 months. To confirm ICC certification information, go to <a href="http://www.iccsafe.org/CertSearch">www.iccsafe.org/CertSearch</a> [23 CCR 2715(c)&(e)]	INSPECTIONS WILL BE CONDUCTED EVERY MOS. BY A QUALIFIED D.U.S.T.O.
U210	II	<b>TESTING OF MONITORING EQUIPMENT</b> UST owner/operator did not have UST monitoring equipment tested and certified by a qualified UST Service Technician every 12 months for operability, proper operating condition, and proper calibration <b>TESTING ANNIVERSARY FOR THIS GAS STATION IS NOVEMBER. ENSURE TO TEST THE SYSTEM EVERY NOVEMBER OF EVERY YEAR.</b> Ensure that all UST system leak detection equipment (i.e., monitoring consoles, leak sensors, line leak detectors, etc.) is tested and certified every 12 months. Testing must be done by an International Code Council certified UST Service Technician with current training from the monitoring equipment manufacturer(s) as required by 23 CCR 2715(i). Ensure that future testing is scheduled to reestablish the original testing schedule for this facility. [23 CCR 2638(a)]	EQUIP. WILL BE TESTED EVERY NOV.
U230	II	<b>TESTING OF SECONDARY CONTAINMENT</b> The facility failed to perform UST secondary containment testing as required <b>THE SB989 TESTING SHOULD HAVE BEEN CONDUCTED DECEMBER OF 2010 BUT WAS NOT TESTED. HAVE THE SYSTEM TESTED WITHIN THE NEXT 30 DAYS. THE NEXT TESTING DATE SHOULD BE DECEMBER OF 2013.</b> If proper testing has not yet been completed, make arrangements to have the testing performed or redone within 30 days. Notify HMCD at least two working days prior to testing. Testing must be performed within 6 months of installation and every 36 months thereafter by a licensed tank tester or a UST Service Technician meeting the requirements of 23 CCR 2715(i). See Guidelines for Testing of UST Secondary Containment Systems, available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> , for further information. [23 CCR 2637]	<div style="border: 1px solid black; border-radius: 50%; padding: 10px; display: inline-block;">           SCHEDULED X            W/ CONFIDENCE            UST SERVICES         </div>

**Comments:**

ON SITE WITH CHRIS KARNS FROM CONFIDENCE UST SERVICES, INC. FOR THE ANNUAL MONITORING CERTIFICATION AND SPILL BUCKET TESTING.

**THE FOLLOWING UST SYSTEM COMPONENTS WERE TESTED AND FOUND TO BE OPERABLE:**

- =5 LIQUID SENSORS
- =SHEAR VALVES ADJUSTED TO IDENTIFY A LEAK AT THE EARLIEST POSSIBLE MOMENT
- =1 HOUR HYDROSTATIC SPILL BUCKET TEST
- =MECHANICAL LINE LEAK DETECTOR
- =FAIL SAFE
- =SENSOR OUT
- =POSITIVE SHUT DOWN

THE TRAINING RECORDS WERE NOT AVAILABLE DURING THE INSPECTION. FORWARD A COPY TO HMCD WITHIN 30 DAYS AND ENSURE TO KEEP A COPY OF THE MOST RECENT TRAINING ON SITE.

**Inspection Date:** 1/18/2011

VC	Class	Violation	Corrective Actions Taken
U034	M	<b>DUSTO MONTHLY INSPECTIONS</b>  UST owner/operator failed to ensure that a qualified Designated UST Operator (DUSTO) has been performing and documenting monthly inspections of the UST system(s) as required and/or failed to maintain copies of DUSTO inspection records <b>THE FOLLOWING ARE DEFICIENCIES FOUND IN THE MONTHLY INSPECTION:</b> <b>=INCORRECT TESTING DATES FOR EXAMPLE SB989 WAS NOTED AS COMPLETED NOV 09 BUT ACTUALLY CONDUCTED 12-06-07.</b> <b>=INCORRECT ALARM HISTORY REPORT FOR SENSORS</b>  Ensure that a qualified DUSTO performs and documents inspections of the UST system(s) every month. Inspections can be documented by properly completing all items on the Underground Storage Tank System Designated UST Operator Monthly Inspection Report form. The form (UN-057) is available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> . Keep on-site a copy of DUSTO inspection records and required attachments for the previous 12 months. Each DUSTO must be certified by the International Code Council (ICC) as a California UST System Operator and renew their certification every 24 months. To confirm ICC certification information, go to <a href="http://www.iccsafe.org/CertSearch">www.iccsafe.org/CertSearch</a> [23 CCR 2715(c)&(e)]	
U210	II	<b>TESTING OF MONITORING EQUIPMENT</b>  UST owner/operator did not have UST monitoring equipment tested and certified by a qualified UST Service Technician every 12 months for operability, proper operating condition, and proper calibration <b>TESTING ANNIVERSARY FOR THIS GAS STATION IS NOVEMBER. ENSURE TO TEST THE SYSTEM EVERY NOVEMBER OF EVERY YEAR.</b>  Ensure that all UST system leak detection equipment (i.e., monitoring consoles, leak sensors, line leak detectors, etc.) is tested and certified every 12 months. Testing must be done by an International Code Council certified UST Service Technician with current training from the monitoring equipment manufacturer(s) as required by 23 CCR 2715(i). Ensure that future testing is scheduled to reestablish the original testing schedule for this facility [23 CCR 2638(a)]	
U230	II	<b>TESTING OF SECONDARY CONTAINMENT</b>  The facility failed to perform UST secondary containment testing as required <b>THE SB989 TESTING SHOULD HAVE BEEN CONDUCTED DECEMBER OF 2010 BUT WAS NOT TESTED. HAVE THE SYSTEM TESTED WITHIN THE NEXT 30 DAYS. THE NEXT TESTING DATE SHOULD BE DECEMBER OF 2013.</b>  If proper testing has not yet been completed, make arrangements to have the testing performed or redone within 30 days. Notify HMCD at least two working days prior to testing. Testing must be performed within 6 months of installation and every 36 months thereafter by a licensed tank tester or a UST Service Technician meeting the requirements of 23 CCR 2715(i). See Guidelines for Testing of UST Secondary Containment Systems, available at <a href="http://www.EHinfo.org/hazmat">www.EHinfo.org/hazmat</a> , for further information [23 CCR 2637]	

**Comments:**

**ON SITE WITH CHRIS KARNS FROM CONFIDENCE UST SERVICES, INC. FOR THE ANNUAL MONITORING CERTIFICATION AND SPILL BUCKET TESTING.**

**THE FOLLOWING UST SYSTEM COMPONENTS WERE TESTED AND FOUND TO BE OPERABLE:**

- =5 LIQUID SENSORS**
- =SHEAR VALVES ADJUSTED TO IDENTIFY A LEAK AT THE EARLIEST POSSIBLE MOMENT**
- =1 HOUR HYDROSTATIC SPILL BUCKET TEST**
- =MECHANICAL LINE LEAK DETECTOR**
- =FAIL SAFE**
- =SENSOR OUT**
- =POSITIVE SHUT DOWN**

**THE TRAINING RECORDS WERE NOT AVAILABLE DURING THE INSPECTION. FORWARD A COPY TO HMCD WITHIN 30 DAYS AND ENSURE TO KEEP A COPY OF THE MOST RECENT TRAINING ON SITE.**

2044 REV 8/06

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

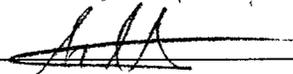

\*\*\*\*\*

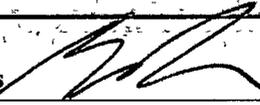

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

	days. This is a repeat violation. Class II	
G412	Observed drained used oil filters inside the shop in a drum labeled as containing Hazardous Waste Ethylene Glycol. Drums holding drained oil and fuel filters must be marked with the words, "USED OIL AND GASOLINE FILTERS" and an accumulation start date. This is a repeat violation. Class II	
2357	Green and yellow indicator bulbs on TLS-350 monitoring panel are burnt out. Replace bulbs.	
2390	Designated UST Operator monthly inspection report for January of this year is missing name of Designated UST Operator. Alarm history reports for leak sensor alarms (i.e., sensors L1 through L5) are not attached to monthly inspection reports as required. Print out and attach reports each month as required. This is a repeat violation. (Note: The "System Alarm" and "In-Tank Alarm" reports you have been attaching are the wrong printouts. Also, periodic tank and line tightness testing is not required for the UST systems at this station, so lines 12 and 13 of your monthly inspection reports should not incorrectly state that such testing is being done.)	
2393	No current list of facility employees trained by the Designated UST Operator was available for inspection at the facility as required. Keep a current list of trained employees on site and available for review with your other UST records. Submit a copy. Note: Ensure that you renew your ICC Designated UST Operator certification before it expires on 7/31/2009.

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

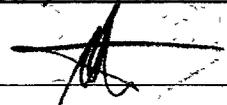

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

## Hazardous Waste Violations

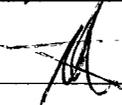

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

### Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

	is emptied at the end of each day. Open top drain pans must be emptied into waste accumulation drums as soon as draining is done. Fill point for the waste oil underground storage tank (UST) is not marked with the words, "Hazardous Waste" or an accumulation start date. Label, stencil, or tag the tank fill with this information as required. These are repeat violations.	UST TANK WILL BE LABELED.
2212M	On 6/12/02 & 12/17/02, observed that the waste oil UST spill container held spilled oil. This container must be kept free of spilled oil. If oil spills or drips while draining containers into the tank, you must use the built-in drain fitting to empty the contents of the spill container into the tank. This is a repeat violation.	UST spill box is emptied and cleaned
2219	The blue copy of manifest #20877293 (2/5/2001 shipment to Romic) was observed in your files on 6/17/2002. Blue copies of all manifests must be mailed to DTSC within 30 days of the date of waste shipment.	Mailed during inspection.
2275	No Safety Kleen manifest copies are available at the facility. Copies of all hazardous waste disposal records must be kept for a minimum of three years from the date of shipment and made available to this Department during inspections.	IN THE PAST ALL HAZ. WASTE RECEIPTS WERE FILED WITH ALL OTHER DAILY RECEIPTS. ALL
2223	You have not submitted a written response to the 7/13/2000 hazardous waste generator Notice of Violation. Submit the completed yellow pages along with the completed yellow pages of this Notice of Violation within 35 days. You must note corrective actions taken and sign and date the certification sections at the bottom of page 1. Include any required document submittals.	HAZ. WASTE RECEIPTS WILL NOW GO INTO SEPARATE FILE

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

### Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

	is emptied at the end of each day. Open top drain pans must be emptied into waste accumulation drums as soon as draining is done. Fill point for the waste oil underground storage tank (UST) is not marked with the words, "Hazardous Waste" or an accumulation start date. Label, stencil, or tag the tank fill with this information as required. These are repeat violations.	
2212M	On 6/12/02 & 12/17/02, observed that the waste oil UST spill container held spilled oil. This container must be kept free of spilled oil. If oil spills or drips while draining containers into the tank, you must use the built-in drain fitting to empty the contents of the spill container into the tank. This is a repeat violation.	
2219	The blue copy of manifest #20877293 (2/5/2001 shipment to Romic) was observed in your files on 6/17/2002. Blue copies of all manifests must be mailed to DTSC within 30 days of the date of waste shipment.	Mailed during inspection.
2275	No Safety Kleen manifest copies are available at the facility. Copies of all hazardous waste disposal records must be kept for a minimum of three years from the date of shipment and made available to this Department during inspections.	
2223	You have not submitted a written response to the 7/13/2000 hazardous waste generator Notice of Violation. Submit the completed yellow pages along with the completed yellow pages of this Notice of Violation within 35 days. You must note corrective actions taken and sign and date the certification sections at the bottom of page 1. Include any required document submittals.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s)

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

2200 Moorpark Avenue, East Wing, Room 204  
San Jose, CA 95128-2690

Dear Ms. Pullman,

Per our conversation, this correspondence should clarify the ownership and responsibility for lube bay operations at Tosco gasoline facilities. The owner and operator of the lube bay operations at each facility is identified in the UST Operator/ Lube Bay Owner column of the attached spreadsheet. **All hazardous waste permits pertaining to the lube bay operations should be issued and billed to the actual operator at each facility.**

Although Tosco is the owner of the facility itself, **Tosco does not own or operate the lube bay operations.** 30

Should you have any questions, please feel free to telephone me at (925) 277-2319.

Sincerely,

A handwritten signature in black ink, appearing to read 'T. DuMont'.

**HAZARDOUS WASTE GENERATOR OFFICIAL NOTICE OF INSPECTION**

Facility Name: UNION #6115

Date: 9/26/96

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations.

All violations of State Law and/or local Ordinance must be corrected within 30 days of the inspection date unless noted otherwise, above. Per California Health and Safety Code (H&SC), Section 25185(c)(3) you are required to submit a written description of the corrective actions you have taken or - for those violations which you are unable to correct within 30 days - propose to take in order to bring your facility into compliance. You must submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. Your written response must be mailed to Santa Clara County HMCD, P.O. Box 28070, San Jose, CA 95159-8070.

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain why the violation does not exist.

Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld if necessary to a criminal investigation or other ongoing investigation.

Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

\*\*\*\*\*

- Per H&SC, Section 25187.8(g)(1), failure to comply with this NOI is a violation of State law punishable by a fine of up to \$25,000 per day for each day past the specified deadlines for correction of violations and submittal of your written response.
- Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC, Section 25187.8(i), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

Re: Inspection Report Follow up  
Los Altos, CA 94022  
Unocal Service Station # 6115  
4350 El Camino Real

Dear Mary.

In response to your inspection report dated August 3, 1995, regarding the above referenced Unocal service station, please find the following response to your concerns:

**Hazardous Materials Storage Inspection:**

1 UST financial responsibility statement

The financial responsibility statement has been made available to the operator . A copy of this UST financial statement which applies to all Unocal controlled facilities in your jurisdiction is also being mailed to your attention

2. UST system monitoring and test records have been made available on site

3 UST system monitoring plan and a leak response plan are being mailed to the dealer's attention for his file.

4. UST electronic monitoring system certification and line integrity test report

The UST electronic monitoring system certification and the annual product line integrity test will be performed and results will be mailed to your attention.

**Hazardous Waste Generator Inspection:**

1. Hazardous waste accumulated greater than 90 days

Spoke to dealer and verified that hazardous waste of any type is no longer being stored at the facility for more than 90 days.

2929 East Imperial Highway  
P O Box 2390

FAX (714) 572-7116  
A U n o c a l C o m p a n y

Reviewed By M. Brey

Date 6/18/96

2 Hazardous waste containers are not clearly marked or labeled

Spoke to dealer and verified that hazardous waste containers are clearly marked and labeled according to your instruction.

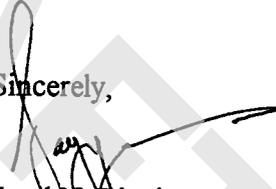

3 Waste manifest receipts were not available or incomplete

Spoke to dealer and verified that all waste manifest receipts have been properly completed and kept on site for your future inspection.

Additionally, the Certification of Compliance form is also being mailed to our dealer to verify in writing that all violation observed during your inspection were properly address and corrected.

Thank you for your assistance regarding this matter. If you require any additional information, please call me at (714) 572-7655.

Sincerely,

Syed N. Rizvi  
Compliance Coordinator

DEC 2 11 05 AM '92

Date November 18, 1992

To S C C Environmental Health Services  
Attn Mary Anne J Baker

From El Camino Unocal  
4350 El Camino Real  
Los Altos, CA 94022

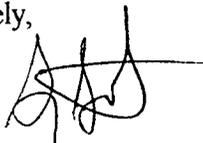

Dear Ms Baker,

These deficiencies have been corrected as of the month of October

- (1) Training of personnel on emergency responses to any spills and proper handling and disposing of hazardous waste
- (2) Started a file of all hazardous waste manifest for easy access.
- (3) Notified Unocal of need to remove six 55 gallon drums known to contain hazardous waste
- (4) All other violations are currently being addressed

It has always been my concern of keeping our Service Station environmentally safe and under current regulations

Sincerely,

Greg Galatolo  
Owner

M. Baker

Re: Hazardous Waste Removal  
Unocal service Station # 6115  
4350 El Camino Real  
Los Altos, CA 94022

Dear Ms. Baker:

I received your letter dated October 14, 1992, addressed to Mr. Jim Scott of Unocal. The letter indicated that six drums containing a mixture of fuel/water with the accumulation date of over 90 days were identified at the above referenced Unocal service station during your recent inspection.

The Unocal dealer at this location stated that these drums were generated as a result of a tank replacement project completed by the Unocal Construction Department. According to a Unocal Construction Engineer, at the completion of each project, the Unocal contractors under agreement must properly dispose of waste generated due to tank cleaning operation. The Unocal contractor involved in the tank replacement project denied of accepting that he was responsible for generating and placing these six drums on site containing the fuel/water mixture.

Since these drums are currently stored at the Unocal property, it is my intention to properly dispose them of as soon as possible. With this letter, please grant me additional time to handle this matter.

Thank you for your cooperation. If you have any questions, please call me at (213) 977-7063.

Sincerely yours,

Syed N. Rizvi

Mr. Jim Scott  
Environmental Compliance Coordinator  
UNOCAL  
911 Wilshire Blvd., Ste. 1010  
Los Angeles, CA 90017

Dear Mr. Scott:

Our office conducted a hazardous waste generator inspection of a Unocal service station at 4350 El Camino Real in Los Altos. During the walk-through of the facility, six 55-gallon drums were observed stored outside. The drums had hazardous waste labels with accumulation start dates of August 31, 1991. The labels also indicated that the drums contained fuel/water mixtures.

State hazardous waste regulations require that hazardous waste can be accumulated on a generator site for not greater than 90 days unless an extension or permit is granted by the DTSC.

Mr. Greg Galatolo, facility, owner stated that the drums belonged to Unocal because the contents were derived from tank closure. A copy of the inspection report is therefore enclosed with this letter. Please note the violations marked on the Official Notice of Inspection and the time frame by which these violations should be addressed.

If you have any questions or concerns, please call me at (408) 299-6930.

Thank you for your attention.

Sincerely,

Mary Anne J. Baker

Comments: (See marked violations on page 1)

- (4) - § 66262.34 & § 66265.173 - The following hazardous waste container management violations were observed:
- 2 drain pans with antipege - open; no label
  - 1 x 100 gallon waste antipege container - incomplete label (no generator name & address).
- Keep all containers closed at all times except when in use.  
Complete all labels to include the following information immediately: words "HAZARDOUS WASTE", generator name and address, accumulation start date, chemical composition, physical state, hazardous properties of waste.
- (6) - § 66265.16 - Provide training program for all personnel involved in hazardous waste management.
- (9) - § 66263.42 & Safety Klean & its receipts available at time § 25250.8 of inspection are those dated 7/1/92 & 6/24/92 only.  
Keep copies of receipts available for 3 years.
- § 66262.23 - DWS copies of the following manifests are still on file: # 89897677 - waste antipege shipped 1/18/91  
# 90576309 - waste antipege shipped 9/27/91.
- Send copies to DWS immediately.  
Submit a letter to above agency (Attn: Mr. Baker) within 30 days indicating how above violations were addressed.

<b>G020</b>	<b>Observed 3 x 55 gallon drums of ConocoPhillips Co. hazardous waste "hanging hardware from dispensers" marked with labels that are not compliant with California HazWaste marking requirements (i.e., they are missing the physical state and hazardous properties of the waste). Properly label these drums and ensure that they are manifested for proper offsite management within 180 days of their marked 10/29/2008 accumulation start date. Prior to offering them for transportation, ensure that they are labeled with the California-required wording modifications to the requirements of 49 CFR §172.304 as specified in 22 CCR §66262.32(b)(2). Ensure that these containers are inspected weekly while on-site.</b>	<i>See Attached Letter</i>  2009 FEB -9 PM 3:17 COUNTY OF SANTA CLARA DEPT. OF ENVIRONMENTAL HEALTH

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

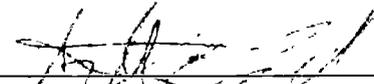

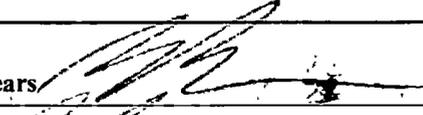

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

**OFFICIAL NOTICE OF INSPECTION**

Facility Name: ConocoPhillips Company #256115 Inspection Date: 12/18/2008

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2324	<p><b>Testing of underground storage tank (UST) leak detection equipment and UST fill spill buckets was done on 11/25/2008 by UST Service Technician Brian McPheely of Tanknology. The Monitoring System Certification form submitted incorrectly states that turbine sump leak alarms initiate positive shut-down. Shut-down did occur for the 87 turbine, but not for the 91 turbine, as stated in Section H of the form. Have the malfunctioning relay replaced or make other required repairs to restore fail-safe shut-down functionality. TLS-350 console's printer is malfunctioning. Repair or replace printer. Tank fill spill buckets for 87 Octane and waste oil USTs failed testing on 11/25/2008. Repair or replace buckets. If bucket replacement is necessary, submit plans and obtain a permit from HMCD prior installing new buckets. Submit a copy of repair order(s) or other documentation confirming that these repairs have been done.</b></p>	<p><i>See Attached Letter</i></p>
2355	<p><b>HMCD was not notified in advance of UST secondary containment testing done in December of last year. Ensure that we are notified at least 2 working days in advance of future testing. Testing of tank annular spaces was not performed properly by Tanknology. Test technician noted in report that tank manufacturer is unknown (it is Modern Welding Co.). Testing of tank annular spaces was done at 7" Hg for 1 hour. Industry standard is 10" Hg for 1 hour, and that is the standard to which the tanks at this station have previously been tested. Report also indicates that ±1.7" Hg is Pass/Fail criterion. Any drop during the 1 hour test period shall be reported as a failed test (zero drop was reported). Have Tanknology retest annular spaces using the correct amount of vacuum and submit a properly completed test</b></p>	<p><i>See Attached Letter</i></p>

**Inspection Report**

Greg,

The intent of this letter is to respond to the items indicated on the Inspection Reports issued to the location referenced above dated 12/18/08, 11/29/07, and 12/20/06.

**Issue #1: Codes – 2358, 2361, and 2370 (Noted on 12/18/08, 11/29/07, 12/20/06)**

- The site monitoring and response plans are not up to date and contain deficiencies.

**Response #1:**

- Enclosed you should find new monitoring and response plans, on the current UPC Forms, for your approval.

**Issue #2: Code – G020 – 12/18/08 inspection report**

- You observed 3 55 gallon drums on site with labels that were incomplete.

**Response #2:**

- The labels were replaced and the drums were removed from the site. Enclosed you will find photos of the labels and a copy of the 1/7/09 pick-up manifest showing the drums were removed from the location.

**Issue #3: Code – 2324 – 12/18/08 inspection report**

- You noted items that needed to be repaired. Those were:

1. There was a malfunctioning relay that needed to be replaced to restore the positive shutdown feature on the monitoring system,
2. The printer on the TLS 350 needed to be replaced,
3. The fill spill buckets on the 87 and waste oil needed to be repaired or replaced, and tested.

**Response #3:**

- All of the necessary repairs and re-tests have been completed for the electrical relay and monitoring system printer. Also, the 87 spill bucket passed testing on 11/25/08. Enclosed you should find all of the necessary work orders, test documents and monitor printouts to show that the system is operating properly.
- As for the waste oil spill bucket, ConocoPhillips intends on replacing this piece of equipment. ConocoPhillips' contractor has the final inspection for this work scheduled with you for Monday February 9<sup>th</sup>.

**Issue #4: Code – 2355 – 12/18/08 inspection report**

- You noted that your agency was not notified of the December 2007 secondary containment testing and that the tank secondary's needed to be re-tested due to incorrect pressure readings and pass/fail criteria.

**Response #4:**

- In an effort to ensure your agency is properly notified for all future testing, ConocoPhillips has counseled the testing contractor on the requirements of agency notification and ConocoPhillips expectations.
- Enclosed you will find a copy of the re-test for the tank secondary's.

**Issue #5: Code – 2357 – 12/20/06 inspection report**

- You noted that the green power light on the monitoring system was burned out.

**Response #5:**

- This issue is closed. As confirmation, I offer your 11/29/07 inspection report that notes the monitoring system certification was tested on that day and that "All equipment functioned properly".

**Issue #6: Code – 2390 – 12/20/06 inspection report**

- During your inspection, the March designated operator inspection was not available for review and the May inspection was not dated.

**Response #6:**

- ConocoPhillips has worked with the operator at this location and we have been able to locate a copy of the March 2006 inspection which is enclosed. A copy of the May 2006 inspection could not be located. We have counseled the operator

at this location on the importance of completing these inspections and have been assured that this type of issue will not re-occur.

**Issue #7: Code – 2393 – 12/20/06 inspection report**

- You noted that that the designated operator training was not covering the required issues and you recommended the use of the State Boards' training form which is contained on Unidocs.org. Specifically, the training records did not include the topics covered.

**Response #7:**

- Enclosed you will find the 2008 training records for this facility. These training records do list the topics covered.

This letter and the documents received should address the issue(s) indicated on the Inspection Reports. ConocoPhillips assumes that all issues regarding these reports have been resolved and are closed. Should you require any additional information regarding this location or have any questions, please contact me at (714) 428-6572.

Sincerely,

Stephen Boyd

Sometimes one service call does not resolve all specific problems due to defective equipment or intermittent problems not present or which cannot be duplicated when our Service Technician is at your premises. Some equipment requires removal on one trip, in-house repair, and another trip for reinstallation. Charges will be made for each service call at rates in effect at time of service. We, therefore, cannot warrant solutions to all problems on one service call. Time "Arrived" and time "Departed" recorded by our Service Technician will be the guideline used in recordation of repair time and charges.

It is the customer's responsibility to audit and verify times recorded on the invoice by our Service Technician while he/she is on your premises. We cannot and will not alter any time charges billed after our Service Technician has left your premises.

### Comments:

Here are the copies of the December 20, 2006 and November 29, 2007 Notices of Inspection (NOI) you requested for the following station:

ConocoPhillips Company #256115

Please submit written response within 35 days of the date of inspection. I instructed the dealer(s) to forward the original NOI(s) to your attention. The preferred method of response is for you to return the yellow copies of the NOI(s) with corrective actions noted in the column provided and certification signatures at the bottom.

Thank you,

Greg Breshears  
Senior Hazardous Materials Specialist

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

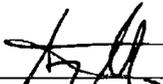

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

**OFFICIAL NOTICE OF INSPECTION**  
 (Continuation Page)

Facility Name: ConocoPhillips Company #256115 Inspection Date: 12/18/2008

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2324	<p><b>Testing of underground storage tank (UST) leak detection equipment and UST fill spill buckets was done on 11/25/2008 by UST Service Technician Brian McPheely of Tanknology. The Monitoring System Certification form submitted incorrectly states that turbine sump leak alarms initiate positive shut-down. Shut-down did occur for the 87 turbine, but not for the 91 turbine, as stated in Section H of the form. Have the malfunctioning relay replaced or make other required repairs to restore fail-safe shut-down functionality. TLS-350 console's printer is malfunctioning. Repair or replace printer. Tank fill spill buckets for 87 Octane and waste oil USTs failed testing on 11/25/2008. Repair or replace buckets. If bucket replacement is necessary, submit plans and obtain a permit from HMCD prior installing new buckets. Submit a copy of repair order(s) or other documentation confirming that these repairs have been done.</b></p>	
2355	<p><b>HMCD was not notified in advance of UST secondary containment testing done in December of last year. Ensure that we are notified at least 2 working days in advance of future testing. Testing of tank annular spaces was not performed properly by Tanknology. Test technician noted in report that tank manufacturer is unknown (it is Modern Welding Co.). Testing of tank annular spaces was done at 7" Hg for 1 hour. Industry standard is 10" Hg for 1 hour, and that is the standard to which the tanks at this station have previously been tested. Report also indicates that ±1.7" Hg is Pass/Fail criterion. Any drop during the 1 hour test period shall be reported as a failed test (zero drop was reported). Have Tanknology retest annular spaces using the correct amount of vacuum and submit a properly completed test</b></p>

 Signature of Owner/Operator: \_\_\_\_\_ Title: \_\_\_\_\_ Date: \_\_\_/\_\_\_/\_\_\_

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

- Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.
- Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.
- Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than \$500 or more than \$5,000.
- Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

### Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

April 22, 2005

**LETTER FROM THE CHIEF FINANCIAL OFFICER**

California Environmental Protection Agency  
State Water Resources Control Board  
Division of Clean Water Programs  
P. O. Box 44212  
Sacramento, CA 94244-2120

Dear Sir or Madam:

I am the chief financial officer for ConocoPhillips, 600 North Dairy Ashford, Houston, TX 77079. This letter is in support of the use of the Underground Storage Tank Cleanup Fund to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least one million dollars (\$1,000,000.00) per occurrence and two million dollars (\$2,000,000.00) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

Refer to Attachment A

1. Amount of annual aggregate coverage being assured by this letter	\$2,000,000
2. Total tangible assets	\$76,774,656,000
3. Total liabilities	\$50,137,938,000
4. Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1.)	\$26,636,718,000

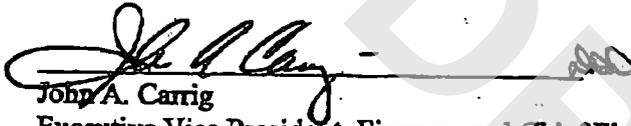

April 22, 2005

Page 2

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed at 600 North Dairy Ashford, Houston, Texas, on April 22, 2005.

**ConocoPhillips**

A handwritten signature in black ink, appearing to read "John A. Carrig", is written over a horizontal line. The signature is cursive and somewhat stylized.

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	<u>ALL VLT MONITORING EQUIPMENT WAS TESTED TODAY BY <del>TESTING</del> TECHNICIAN JOEY MEHA OF TECHNOLOGY (ICC CERT. # 525948 - VT EXP. 6-11-2007 &amp; VAPOR-ROOF LEVEL 3 CERT. EXP. 7-1-2006). ALL EQUIPMENT FUNCTIONED PROPERLY. HAVE TECHNOLOGY FAX A COPY OF MR. MEHA'S TRAINING CERTIFICATE FROM VAPORISEN TECHNOLOGIES TO SERVE AS EQUIPMENT TRAINING TO TEST THE FE PETS MECHANICAL LINE LEAK DETECTORS. (FE PETS OFFERS NO TRAINING ITSELF.)</u>

<u>2357</u>	<u>MONITORING SYSTEM CERTIFICATION FORM FOR 1-12-2005 EQUIPMENT TESTING WAS NOT SUBMITTED WITHIN 30 DAYS OF TEST DATE AS REQUIRED. ENSURE THAT FORMS ARE SUBMITTED ON TIME.</u>	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. (Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)

 Signature of Owner/Operator: \_\_\_\_\_ Title: \_\_\_\_\_ Date: \_\_\_/\_\_\_/\_\_\_

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

Subject: Corrective Action for ConocoPhillips Site # 256115  
Pleasanton 76  
4350 El Camino Real  
Los Altos, CA 94022

Dear Mr. Breshears,

This letter serves as a corrective action for the inspection on 12/23/04.

You will find the following corrective actions:

- Violation Code #2369
  - All of the Shear Valves for the site have been adjusted including Dispenser 5/6 91 grade.
  - Maintenance copy is included.
  - UPCF UST Facility form is attached.
  
- Violation # 2206
  - The drum from secondary containment testing (SB989) testing is taken care of by one of our vendors and all of required document will be filed properly.

Note that this station is operated by an independent Dealer under a Lease and Motor Fuel Supply Agreement. Pursuant to that Agreement, the Dealer agreed to be responsible for compliance with all laws and regulations in the day to day operation of the service station, maintenance and repair of the equipment that is required to comply with environmental regulations, as well as the Violation # 2369 – Dispenser #1 change.

ConocoPhillips has notified the Dealer that it is his responsibility to resolve the outstanding issues with respect to this Notice. Please direct all questions and correspondences regarding those issues directly to the Dealer.

In the event that the Dealer is non-responsive, fails to correct these violations, or does not bring this matter to closure, please notify us directly, and we will assist you with resolution of this matter with our Dealer.

Please let me know immediately if you believe there are any unresolved issues. Feel free to contact me at (510) 245-5218.

Sincerely,

Julie Lee  
HSE Specialist

## Comments:

Here is a copy of the December 23, 2004 Notice of Inspection (NOI) for the following station:

ConocoPhillips Company #256115

Please submit written responses within 35 days of the date of inspection. I instructed the dealer(s) to forward the original NOI(s) to your attention. The preferred method of response is for you to return the yellow copies of the NOI(s) with corrective actions noted in the column provided and certification signatures at the bottom.

Thank you,

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

Subject: 1/13/04 Notice of Inspection for ConocoPhillips Site # 256115  
4350 El Camino Real  
Los Altos, CA

Dear Mr. Breshears:

This letter serves as a response to the subject notice. Per my voice message, I apologize for the delay.

The attached notice of inspection has the written response for each deficiency noted. With regards to the deficiencies related to the Hazardous Materials Business Plan, please note that the Dealer is completely responsible for these items. The Dealer has been notified of his responsibilities and their contractor who prepares the plan (RHL) has also been notified. If the Dealer fails to correct the HMBP deficiencies, please let me know immediately and I will help encourage compliance.

At this time, ConocoPhillips has addressed all the issues identified in your report and considers the matter closed. Please let me know immediately if you believe there are any unresolved issues.

Thank you.

David Camille  
Regional Environmental Compliance Director

# THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

## What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

## Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

## What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

## What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

## Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

Re: ConocoPhillips Change of Address  
Environmental Compliance Documentation  
Environmental Compliance Contacts

Dear Greg Breshears,

As you may already know, August 30, 2002 marked an important day for our company. Phillips Petroleum Company and Conoco Inc. became wholly owned subsidiaries of newly formed ConocoPhillips. Through mergers and acquisitions, many entities fall under ConocoPhillips. These entities can include Tosco, Circle K, Union 76, and maybe even Unocal.

Given the nature of the merger between the two companies, our regional office will be moving. Our new address, effective immediately, is shown on the top of this page. Additionally, our phone and fax numbers have also changed. New contact information can be found on the attached map. It is important to note that our regional office relocation does not effect the Phoenix, AZ location where invoices or operating permits should be sent. *← Phoenix Records Location*

Environmental performance has always been a core value at ConocoPhillips. We continue to develop and implement new best practices to help protect our environment. In achieving this objective, we want to inform you of our consistent and accessible record-keeping program. This program should meet all your documentation guidelines and is designed to be easy and accessible to all our employees and any agency inspectors. Please use this letter and the enclosed documentation as a tool to educate your agency inspectors on our environmental documentation collection process.

All site-specific environmental and safety documentation is kept in a blue or black pendoflex file folder (see attached photographs). These document holders are called the "SafeZone Records Box", for corporate owned sites, or the "Environmental Records Box", for dealer locations. The pendoflex folder should be located in an accessible location at every facility. A new pendoflex is prepared for each site annually and it is designed to hold that year's current information.

Finally, in an effort to improve our environmental performance, ConocoPhillips is asking each agency to take a few moments to answer the attached questionnaire. Our long-term goal is to be the top performer when compared to other major oil companies. Your valuable input will assist us in improving compliance at our 76 branded facilities throughout the West. Thank you in advance for filling out this questionnaire and returning it in the self-addressed, stamped envelop.

ConocoPhillips knows that it is our responsibility to do our very best to protect the environment and insure recordkeeping is maintained at the highest standards. We look forward to a mutually rewarding and environmentally conscious relationship. If you have any questions, comments or concerns, please feel free to contact me or your local Environmental Compliance Specialist.

Sincerely,

*David J. Camille*

## THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

### What Does the Information in Each Column Mean?

**Violation Code:** Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

**Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions:** Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

**Corrective Actions Taken:** This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

### Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

### What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

### What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

\*\*\*\*\*

### Hazardous Waste Violations

- Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.
- Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than \$2,000 or more than \$25,000 and/or imprisonment in the county jail for up to one year.
- Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.

Dear Regulatory Agency:

RE: Environmental Permit Name changes

As you have been notified by previous correspondence, ConocoPhillips, Inc. is dissolving the wholly owned subsidiary company Tosco Corporation effective December 31, 2002. In doing this, all environmental permits currently held in the name of Tosco Corporation will need to be changed to ConocoPhillips Company. Please make this change effective January 1, 2003.

Attached, please find a list of the sites in your jurisdiction affected by this name change and any requested documents. Not included with this submission is the financial responsibility certification that was sent separately to arrive before January 1<sup>st</sup>. Since this is a name change and does not involve UST modifications, the UST information on the existing Form B's remains the same. As you make this change, please understand your current company contacts, phone numbers, addresses for correspondence and permit renewals will remain unchanged.

If any additional information is needed for this name change, please contact Don Esperson of Western States Contracting and Engineering LLC at 480-924-2150 or 480-239-3995 cell. Western States is the outside contractor for ConocoPhillips performing document preparation for this name change.

Thank you for your assistance in helping ConocoPhillips complete this change.

Sincerely yours,

William C. Bunch  
National Director, Environmental Compliance

## APPLICATION FOR COPIES OF PUBLIC RECORDS

Read Instructions For Review Carefully

### COMPANY OR SITE FOR WHICH RECORDS ARE REQUESTED

Please Type or Print Legibly

BUSINESS NAME: \_\_\_\_\_

STREET ADDRESS: 4350 El Camino Real

CITY/ZIP : Los Altos, CA 94022

### INFORMATION REQUESTED BY:

NAME: Megan Nolet

BUSINESS NAME: AEI Consultants

STREET: 3880 S. Bascom Ave, Suite 109

CITY/ZIP: San Jose, CA 95124

PHONE: (408) 559-7600 FAX: (408) 559 - 7601

### INFORMATION REQUESTED

Any records pertaining to aboveground or underground storage tanks,

hazardous materials storage/disposal and/or industrial waste discharges.

\_\_\_\_\_

\_\_\_\_\_

Organized as the Santa Clara County Central Fire Protection District

*Serving Santa Clara County and the communities of Campbell, Cupertino, Los Altos,  
Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga*

**INSTRUCTIONS FOR REVIEW OF FIRE DEPARTMENT RECORDS**

1. Applications for review of public records must be submitted on Santa Clara County Fire Department's standard application form.
2. The specific street address must be provided for the site. Additional sites must be submitted on separate application forms.
3. You will be contacted by telephone when files are available and a time will be scheduled for the files to be reviewed. Please allow 10 working days for files to be made available.
4. If the files are not reviewed on the date scheduled, and no contact is made to reschedule, the records will be returned to the files and a new application must be submitted.
5. Files must be reviewed in the designated area of the Bureau of Fire Prevention office.
6. No documents may be removed from the files. Contents of files may not be reorganized.
7. File reviews must be completed no later than 5:00 pm. You will be allowed to return at 8:00am the next work day to complete your review if necessary.
8. If extended time is required to review files, notify our office and the files will be kept available for your review for up to five working days.
9. Copying of documents is allowable with the exception of maps and drawings. A \$5.00 fee is charged for copying plus 5 cents per page printed. Fees must be paid by check or exact change only.

I have read and understand the above instructions.

Megan Nolet

This document does not permit the holder to violate any BAAQMD regulation or any other law.

PERMIT EXPIRATION DATE  
**September 01, 2019**

**Owner Mailing Contact:**

Unocal #256115  
4350 EL CAMINO REAL  
LOS ALTOS , CA 94022-1001  
Attn: Galatolo, Greg

**Facility ID:** 109042

Unocal #256115  
4350 El Camino Real  
Los Altos , CA 94022-1001

**Owning Entity:**

Galatolo, Greg

**DEVICES**

This document serves as your Permit to Operate the following:

**S1 Permitted**

Gasoline Dispensing Operation

Tank Information:

12000 Gallon Underground Tank w/ Gasoline - unleaded

Phase I Vapor Recovery Type: Phil-Tite (VR-101)

Phase II Vapor Recovery Type: VST EVR Phase II with FFS Clean Air Separator and Veeder-Root ISD (VR-204)

12000 Gallon Underground Tank w/ Gasoline - unleaded

Phase I Vapor Recovery Type: Phil-Tite (VR-101)

Phase II Vapor Recovery Type: VST EVR Phase II with FFS Clean Air Separator and Veeder-Root ISD (VR-204)

Nozzle Information:

12 Gasoline - Triple Product

The operating parameters described above are based on information supplied by the permit holder and may differ from the limits set forth in the attached conditions of this Permit To Operate. The limits of operation in the permit conditions are not to be exceeded. Exceeding these limits is considered a violation of BAAQMD and is subject to enforcement action.

**PERMIT CONDITIONS**

The devices described in this document are subject to the following permit conditions:

**S1** Subject to Condition #: **100013, 100014, 100015, 100016, 100036, 100037, 100050, 100051**

**Condition #: 100013 S1**

The owner/operator shall not allow the total fuel dispensed at this source to exceed the following limits during any consecutive 12-month period:

- 2500000 Gallons of Gasoline - Unleaded

**Condition #: 100014 S1**

This document does not permit the holder to violate any BAAQMD regulation or any other law.

PERMIT EXPIRATION DATE

September 01, 2019

The owner/operator of the source shall complete source testing per the applicable Executive Order. The owner/operator shall notify BAAQMD Source Test Division and submit source test results.

**Condition #: 100015 S1**

The owner/operator shall ensure the Phase I Phil-Tite EVR is installed, operated, and maintained in accordance with the most recent revision of the California Air Resources Board (CARB) Executive Order (EO) VR-101.

**Condition #: 100016 S1**

The owner/operator shall ensure the Phase II Balance EVR with HCAS with ISD is installed, operated, and maintained in accordance with the most recent revision of the California Air Resources Board (CARB) Executive Order (EO) VR-204.

**Condition #: 100036 S1**

The owner/operator shall:

1. Notify Source Test by email (gdfnotice@baaqmd.gov) or Fax (510-758-3087), at least 48 hours prior to any required testing.
2. Submit test results in a District-approved format within thirty (30) days of testing.
  - For start-up tests results, cover sheet shall include the facility number (Facility ID) and application number of the Authority to Construct permit.
  - For annual test results, cover sheet shall include the facility number (Facility ID) and identified as 'Annual' in lieu of the application number.
  - Test results shall be emailed (gdfresults@baaqmd.gov) or mailed to the District's main office.

**Condition #: 100037 S1**

The owner/operator shall conduct and pass the following tests at the indicated intervals:

1. A Static Pressure Performance Test, in accordance with CARB procedure TP-201.3 at least once in each 12-month period.
2. Phase I Adaptor Static Torque Test on all rotatable Phase I adaptors in accordance with CARB TP-201.1B at least once in each 36-month period.
3. One of the following tests in each 36-month period. The measured leak rate for each component shall be within the limits set in the applicable CARB Executive Order:
  - Stations equipped with drop tube overflow prevention devices ("flapper valves"): a Drop Tube Overflow Prevention Device and Spill Container Drain Valve Leak Test in accordance with CARB Test Procedure TP-201.1D and the applicable CARB Executive Order.
  - All other stations: a Drop Tube/Drain Valve Assembly Leak Test in accordance with CARB Test Procedure TP-201.1C and the applicable CARB Executive Order.

**Condition #: 100050 S1**

This document does not permit the holder to violate any BAAQMD regulation or any other law.

PERMIT EXPIRATION DATE  
**September 01, 2019**

The owner/operator shall ensure that the Phase II Balance EVR system with the Healy Clean Air Separator (HCAS) and ISD can demonstrate on-going compliance with the vapor integrity requirements of CARB Executive Order E.O. VR-204 by conducting and passing the following tests at least once in each consecutive 12-month period following successful completion of start-up testing. The owner/operator shall ensure tests are conducted and evaluated using the referenced test methods and standards from the latest version of the applicable executive order and/or test procedure.

1. Dynamic Back Pressure Test using CARB Test Procedure TP-201.4
2. Liquid Removal Test
3. Vapor Pressure Sensor Verification Test
4. HCAS Static Pressure Test
5. ISD Vapor Flow Meter Operability Test

**Condition #: 100051 S1**

The owner/operator of the facility shall maintain the following records. Records shall be maintained on site and made available for inspection for a period of 24 months from the date the record is made.

1. Monthly totals of throughput (sales) of gasoline (all-grades) and other fuels pumped and summarized on an annual basis for each type of fuel (excluding diesel).
2. All scheduled testing and maintenance activities, including:
  - the date of maintenance, inspection, failure and, if applicable, ISD alarm history;
  - the date and time of maintenance call;
  - the maintenance performed;
  - Certified Technician ID number or name of individual conducting maintenance and their phone number.
3. Weekly, quarterly and annual inspection sheets.

**END OF CONDITIONS**

**IMPLIED CONDITIONS**

Unless your specific permit conditions state otherwise, the throughputs, fuel and material consumptions, capacities and hours of operation described in your permit application will be considered maximum allowable limits.

A new permit will be required before any increase in parameters, such as throughputs, fuel and material consumption, capacities, and hours of operation, or change in materials, equipment or permit conditions may be made.

**RIGHT OF ACCESS**

In accordance with Regulation 1-440, BAAQMD shall be granted the right of access to any premises on which an air pollution source is located for the purposes of:

- a) The inspection of the source,
- b) The sampling of materials used at the source,
- c) The conduct of an emission source test, and
- d) The inspection of any records required by BAAQMD rule or permit condition

**REGULATORY COMPLIANCE**

This Permit To Operate does not authorize violations of the rules and regulations of BAAQMD (may be viewed at [www.baaqmd.gov](http://www.baaqmd.gov)), California or Federal law. Compliance with conditions in this permit does not mean that the permit holder is currently in compliance with BAAQMD Rules and Regulations. It is the responsibility of the permit holder to have knowledge of and be in compliance with all BAAQMD rules and regulations.

This document does not permit the holder to violate any BAAQMD regulation or any other law.

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### 1. FACILITY INFORMATION

Facility Name: Unocal #256115		Date of Testing: 06/21/17	
Facility Address: 4350 El Camino Real, Los Altos CA 94022			
Facility Contact:	Phone (650)- 941-0244	<input type="checkbox"/> Initial	<input type="checkbox"/> Repair Test
Date Local Agency Was Notified of Testing: 06/09/17		<input type="checkbox"/> 6 Month	<input type="checkbox"/> Other

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Facility Name: El Camino Unocal 76 Bldg. No.: \_\_\_\_\_  
 Site Address: 4350 El Camino Real City: Los Altos Zip: 94022  
 Facility Contact Person: Greg Galatolo Contact Phone No.: (650) 941-0244  
 Make/Model of Monitoring System: Gilbarco EMC Date of Testing/Servicing: 11/09/2017

## B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

<b>Tank ID: 12,000 gal. \*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility

**C. Certification** - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply):  System set-up  Alarm history report

Technician Name (print): Chris Bishop Signature:   
 Certification No.: B36744 License No.: 804904  
 Testing Company Name: Confidence UST Services, Inc. Phone No.: (800) 339-9930  
 Site Address: 4350 El Camino Real Los Altos, CA 94022 Date of Testing/Servicing: 11/09/2017

**Monitoring System Certification**

**F. In-Tank Gauging / SIR Equipment:**  Check this box if tank gauging is used only for inventory control.  
 Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system product level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system water level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**G. Line Leak Detectors (LLD):**  Check this box if LLDs are not installed.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input checked="" type="checkbox"/> 3 g.p.h.; <input type="checkbox"/> 0.1 g.p.h.; <input type="checkbox"/> 0.2 g.p.h.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

## Leak Rate of Drop Tube/Drain Valve Assembly and Leak Rate of Drop Tube Overflow Protection Devices and Spill Container Drain Valves Report Form

Permit Number:	Confidence UST Services, Inc.		
Confirmation:	Technician: Auslin Sterling	Certification Number	Expiration Date
Site Name: El Camino Unocal 76	BAAQMD		NA
Site Address: 4350 El Camino Real	7611483707		10/24/2019
City/Zip: Los Altos, CA 94022	Franklin (Healy):		10/16/2019
Date/Time of Test: 12/28/2017 at 9:00 am	Veeder-Root: B45438		

**DROP TUBE DRAIN VALVE AND OVERFILL PROTECTION DEVICE PRESSURE INTEGRITY TEST**

Pressure measuring device:  Straight Drop Tube<sup>1</sup>     Drop Tube with an Overflow Protection Device<sup>2</sup>

digital manometer     mechanical gauge

Calibration date for pressure measuring device (must be within 180 days of the test)    10/29/2017

Ending value for digital manometer drift test if applicable (must be 0.01 in. w.c. or less)    0.00"

Drop Tube Drain Valve Pressure Test: Flow rate 80 ml/min		Drop Tube Overflow Device Pressure Test Flow rate 200 ml/min		"Corrected" Overflow Device Leak Rate						
Tank	Grade	Time to reach 2 in. w.c. at 80 ml/min. sec.	Drain valve leak rate <sup>3</sup> ml/min	Final Pressure in. w.c.	Time to reach 2 in. w.c. at 200 ml/min. mins.	Overflow leak rate <sup>3</sup> ml/min.	Final pressure in. w.c.	Overfill Device Leak Rate ml/min.	Drain Valve Leak Rate ml/min.	Corrected Leak Rate ml/min.
1	Regular	7.6 sec	20 ml	2.04"						
2	Super	8.2 sec	20 ml	2.12"						
3										
4										

NOTES:

<sup>1</sup> A straight drop tube must be tested with a bladder in place and using a flow rate of 80 ml/min.

<sup>2</sup> The bladder section of TP-201.1D may be skipped if the entire drop tube passes with a leak rate below 80 ml/min.

<sup>3</sup> Leak Rate = nitrogen flow rate needed to maintain a constant pressure (at least 2 in. w.c.) for 30 seconds.

I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.

Healy Clean Air Separator Static Pressure Performance Test Report Form

Permit Number:	Test Company:	Confidence UST Services, Inc.	
Confirmation:	Technician:	Autin Sterling	
Site Name: El Camino Unocal 76	Certification Number	Expiration Date	
Site Address: 4350 El Camino Real	District: BAAQMD	NA	
City/Zip: Los Altos, CA 94055	Franklin (Healy) 7611483707	10/24/2019	
Date/Time of Test: 12/28/2017 at 7:00 am	Veeder-Root: B45438	10/16/2019	

TEST INFORMATION	
Calibration date for digital manometer (must be within 180 days of the test)	10/29/2017
Ending value for digital manometer drift test (must be 0.01 in w.c. or less)	0.00"

VACUUM TEST							
Vacuum at start of test, inches of water column (in w.c.)							
Vacuum at one minute, in w.c.							
Vacuum at two minutes, in w.c.							
Vacuum at three minutes, in w.c.							
Vacuum at four minutes, in w.c.							
Final vacuum at five minutes, in w.c.							
Allowable minimum vacuum, in w.c. (from shaded area below)							
Allowable 5-Minute Vacuum Decay for Clean Air Separator							
Vacuum at start of test, in w.c.	8.0	7.0	6.0	5.0	4.0	3.0	2.0
Minimum vacuum after five min., in w.c.	5.5	4.7	3.8	3	2.2	1.5	0.8

POSITIVE PRESSURE TEST	
Nitrogen introduction flow rate (must be between 2 and 4 CFM)	3 CFM
Pressure at start of test, in w.c.	2.00"
Pressure at one minute, in w.c.	2.06"
Pressure at two minutes, in w.c.	2.11"
Pressure at three minutes, in w.c.	2.16"
Pressure at four minutes, in w.c.	2.21"
Final pressure at five minutes, in w.c.	2.25"
Allowable minimum pressure, in w.c.	1.77

I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.

Exhibit 14

Required Items for Conducting TP-201.4

Reference # :	Test Company:	Confidence UST Services, Inc.	
AQMD # :	Technician:	Austin Sterling	
Site Name: El Camino Unocal 76	Certification Number	Expiration Date	
Site Address: 4350 El Camino Real	District: BAAQMD	NA	
City/Zip: Los Altos, CA 94022	VST: 7611483707	10/24/2019	
Date/Time of Test: 12/28/2017 at 9:00 am	Veeder-Root: B45438	10/16/2019	

1. The dispenser shall not be activated. If the dispenser is activated, gasoline in the fuel hose may be pressurized when engaging the fuel lever.
2. Prior to inserting the VST EVR nozzle into the fillpipe of the Dynamic Back Pressure Test Unit in step 7.1 of TP-201.4, completely drain any gasoline in the nozzle and vapor path of the hose. The dispenser must be deactivated and the nozzle lever and bellows shall be fully engaged.
3. When flowing nitrogen per step 7.1.2, fully engage the nozzle lever to allow vapor flow from the nozzle to the UST.

Required Steps For Each Nozzle Tested	Y/N
1. Is dispenser deactivated?	Yes
2. Is nozzle and hose completely drained of gasoline prior to inserting nozzle into Dynamic Back Pressure Unit?	Yes
3. Is nozzle lever fully engaged when conducting flow test?	Yes

*I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.*

Attached please find our PHASE I ENVIRONMENTAL SITE ASSESSMENT, ("the Report") for the above-mentioned Subject Property. This report has been prepared by ENCON for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither ENCON, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, and has no personal bias with respect to the parties involved.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by ENCON.

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. ENCON is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

By signing below, ENCON declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. ENCON has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,

Hyung Kim

Principal Consultant, P.E.,

## EXECUTIVE SUMMARY

Encon Solutions, Inc. (ENCON) performed a Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E1527-05. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this Report.

REPORT COMPONENT	SUMMARY OF FINDINGS
<p><b>Subject Property Characteristics</b></p> <p><b>(Current Tenant and Site Description)</b></p>	<p>The subject property is addressed 4350 El Camino Real, Los Altos, Santa Clara County, CA 94022. It consists of an approximately 28,557 square foot, square-shaped parcel of land occupied by an approximately 1,610 square-foot, one-story gasoline and automobile service station building. The property is currently a 76 gas station franchise called El Camino 76. The property building occupies the approximate central portion of the property. The building features a convenience store/cashier booth to the west, and three service garage bays to the east. The three service bays are equipped with in-ground hydraulic lifts and are used for all forms of automobile maintenance and repairs. Fuel island canopies are located directly to the northeast and northwest of the building. The gasoline underground storage tanks (USTs) are located between the two canopies, directly north of the building. Asphalt-paved parking surrounds the building on all sides, and access to the site is from the northwest along Los Altos Avenue and northeast along El Camino Real.</p>
<p><b>Summary of Property Reconnaissance</b></p>	<p>The subject property is occupied by a gasoline and automobile service station. There are currently two, 12,000-gallon gasoline underground storage tanks (UST's) located onsite. The system is equipped with a Healy clean air separator located at the southwest corner of the building. A 500-gallon waste oil UST is located adjacent to and south of the western-most service bay. There are three service garage bays located within the eastern portion of the building. Each bay is equipped with an in-ground, hydraulic hoist which is utilized for all forms of automotive maintenance and repairs. Waste oil filters and waste coolant are stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property. Automotive tires and waste oil drain pans are stored outside the southeast corner of the building. Some permits on file have expired, and the required secondary containment testing records were not available and it is not known when testing was last performed.</p>

REPORT COMPONENT	SUMMARY OF FINDINGS
<p><b>Historical Use of Subject Property and Vicinity</b></p>	<p><u>Summary of Historical Property Use:</u></p> <p>The site was developed with what appears to be three small buildings from at least 1946 to 1958. It appears from aerial photographs reviewed that the buildings may have been residential. The current building and automobile service station was constructed in 1969, and has operated similarly ever since.</p> <p>In 1990, two 10,000-gallon gasoline underground storage tanks and one 550-gallon waste oil tank were removed from the property. During the removal process, holes were observed in the waste oil tank and visible contamination was observed in one of the gasoline tank excavations. Four groundwater monitoring wells were installed onsite, and approximately 250 cubic yards of contaminated soil was excavated from the tank areas and disposed of offsite. Periodic groundwater monitoring occurred, and a vapor extraction system and groundwater extraction system were installed and operated for remediation efforts (duration and dates of operation were not contained in the letter). The remediation efforts resulted in reduced hydrocarbon concentrations overtime. Case closure was granted to the subject property in 1996 by Santa Clara County Water District when it was deemed that remedial efforts were effective in reducing contamination at the site to acceptable and non-harmful levels.</p> <p>In July of 2007, ATC advanced six soil borings (B1-B6) near the existing fuel and waste oil USTs, as well as the fuel dispensers, using a Geoprobe drilling rig. The borings were advanced to depths of 30 feet below ground surface (bgs). Soil samples were collected at approximate five-foot intervals and analyzed with a PID. Shallow groundwater was encountered at 27 feet deep, and groundwater samples were collected from all borings. The soil samples were analyzed for metals, fuel oxygenates and halogenated volatile organic compounds (HVOCs) including benzene, toluene, ethylbenzene and total xylenes (BTEX), total petroleum hydrocarbons (TPH) in the gasoline and diesel ranges (TPH-GRO and TPH-DRO), and lead. Groundwater samples were analyzed for fuel oxygenates, HVOCs, TPH-GRO, TPH-DRO, and metals. Findings indicated that soil at the site consists of clay, silt, sand and gravel to the maximum depth of exploration. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentration of 1.1 mg/L in the sample collected from boring B-3. Chromium, Nickel and Zinc were detected in groundwater (at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively).</p> <p><u>Summary of Vicinity Use:</u></p> <p>The site vicinity was first developed similarly to today beginning around 1980 or prior. Before to that, the surrounding area was sparsely developed residential land with scattered orchards.</p>

REPORT COMPONENT	SUMMARY OF FINDINGS
<b>Federal, State and Local Agency Concerns</b>	The subject property was identified on the following governmental/regulatory environmental databases as per the EDR Radius Report utilized in conjunction with this report: RCRA-LQG, HAZNET, CA FID UST, HIST UST, SWEEPS UST, LUST, HIST LUST, UST, and HIST Cortese. These listings pertain to the operation of the site as a gas station and auto repair facility, as well as a closed Leaking Underground Storage Tank (LUST) case associated with the site. See Sections 4.2 for details.
<b>Potential Off-site Sources</b>	No researched properties within the specified search radii were identified which are assessed to pose an environmental concern for the subject property.  No RECs (Recognized Environmental Conditions) were identified.
<b>Non-CERCLA Items</b>	No concerns were identified for non-CERCLA items. However, unless <i>Client</i> contracted ENCON to investigate specific non-CERCLA items, these items were generally not included in the scope of services for this Phase I Environmental Site Assessment.
<b>Inaccessible or Un-surveyed Portions of Subject Property</b>	Full access to the entire property was provided to ENCON, and there were no notable portions of the subject property excluded from the survey and field inspection.
<b>Data Gap</b>	No significant data gaps were identified during the course of this Phase I Environmental Site Assessment.

Refer to Section 7.0, Recommendations and Opinions.

## 1.0 SCOPE OF WORK & LIMITATIONS

The primary purpose of this *Phase I Environmental Site Assessment Report* (the *Report*) is to assist *Client*, in its underwriting of a proposed mortgage loan on the subject property, and to identify *Recognized Environmental Conditions (RECs)* in connection with the subject property described in this *Report*. The investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client*, its successors, and assignees and the U.S. Small Business Administration (U.S. SBA) if financing is to be authorized by U.S. SBA. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the *Client*. Neither this report, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the *Client*.

This report has been prepared by Encon Solutions, Inc. (ENCON) for the *Client* under the professional supervision of the principal and/or senior staff whose seal(s) and signature(s) appear hereon. Neither ENCON, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

The purpose of this practice is to define good commercial and customary practice for conducting an *environmental site assessment* of a parcel(s) of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a user (*Client, Purchaser, Lender, Owner*) to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

Controlled substances are not included within the scope of this standard. Persons conducting an *environmental site assessment* as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of *business environmental risk* associated with a parcel of *commercial real estate* may necessitate investigation beyond that identified in this practice.

In defining a standard of good commercial and customary practice for conducting an *environmental site assessment* of a parcel of *property*, the goal of the processes established by this practice is to identify *recognized environmental conditions (RECs)*. The term *recognized environmental conditions (RECs)* means the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, groundwater, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *RECs*.

ENCON has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-05.

SCOPE OF WORK

This Report was prepared for the exclusive use of Client. This Report has been prepared in accordance with our Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Client, and with the limitations described below, all of which are integral parts of this Report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the Encon Solutions, Inc., Los Angeles, California office.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Practice E1527-05; a visual site survey of areas readily observable, easily accessible or made accessible by the property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the subject property. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the property. Findings, conclusions and recommendations included in the Report are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents.

ENCON renders no opinion as to the property condition at un-surveyed and/or inaccessible portions of the subject property, which are described below. ENCON relies completely on the information, whether written, graphic or verbal, provided by the property contact or as shown on any documents reviewed or received from the property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this Report are valid on the date of the survey. Where access to portions of the subject property or to structures on the subject property was unavailable or limited, ENCON renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the subject property or structure. In addition, ENCON renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The conclusions provided by ENCON are based on the information obtained by visual survey of the subject property, and information provided by agents representing the subject property, or agents of the owner. In addition, ENCON has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ENCON at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ENCON did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these Environmental Services.

CERCLA Requirements Other Than All Appropriate Inquiry (ASTM E1527-05 1.1.3) - This practice does not address whether requirements in addition to All Appropriate Inquiries have been met in order to qualify for the LLPs (specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of Activity and Use Limitations), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

It is acknowledged that ENCON's judgments shall not be based on scientific or technical tests or procedures beyond the Scope of Services or beyond the time and budgetary constraints imposed by the Client. It is acknowledged further that ENCON's conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to such Services, are not guaranteed to be a representation of actual conditions on the subject property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, ENCON shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

The ASTM E1527-05 Practice does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information regarding non-ASTM Practice E1527-05 issues may be provided merely for the User's convenience, and cannot be used to bind this report as a whole to the compliance and conformance with ASTM guidelines. No disassembly of systems or building components or physical or invasive testing is to be performed unless Contract Engagement specifically calls for such testing as an additional scope of work. ENCON has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-05. This *Report* may not include all environmental conditions which can materially impact the subject property other than those defined as RECs in ASTM E1527-05.

As our standard procedure and scope of work defined by ASTM Practice E1527-05, ENCON is not contracted to perform *Environmental Liens and Activity and Use Limitations (AULs)* searches via title records, and such is beyond the scope of services included in this report.

This *Phase I Environmental Site Assessment* did not necessarily comply with the ASTM E2600-10 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM E1527-05 is required.

Business Environmental Risk is defined as a risk, which can have material environmental impact, or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to the issues requiring investigation. Activity and Use Restrictions arising from Business Environmental Risk or Compliance Violation are defined as restrictions on the use of, or access to, a site/facility to (1) reduce or eliminate exposure to hazardous substance onsite, or (2) prevent activities that could interfere with a response action either as Engineering Controls or Institutional Controls. Evaluation of Business Environmental Risks was not within the scope of services included in this report.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by ENCON.

Additional information that becomes available after our survey and report submission concerning the subject property should be provided to ENCON so that our conclusions may be revised and modified if necessary, at additional cost. This *Report* has been prepared in accordance with our *Standard Conditions for Engagement*, which is an integral part of this *Report*.

Adjoining sites, neighboring sites or surrounding properties mentioned in this *Report* are defined only up to one parcel immediately next to the subject property, and ENCON will only check immediately adjoining properties to identify historical use of the surrounding areas via historical sources or data on such adjoining properties, and/or walk-through visual inspection along subject property's perimeters to identify obvious signs of environmental concerns.

It is often not possible (under the "reasonably ascertainable" clause of the ASTM guideline) to identify every single historical business tenants or occupants of the subject property. ENCON cannot be liable for not identifying all such past tenants or occupants of the project site.

#### INDEPENDENT CONTRACTOR STATUS / PROFESSIONAL RESPONSIBILITY

In performing Services under the mutually agreed contractual agreement and verbal engagement, ENCON operates as, and has the status of, an independent contractor. Subject to any limitations established by the *Client* as to the degree of care and amount of time and expenses to be incurred and any other limitations contained in the mutually agreed contractual agreement and verbal engagement, ENCON performs the Services consistent with that level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. *Client* hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to *Client* or property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and verbal engagement.

#### QUALIFICATION STATEMENT OF ENVIRONMENTAL PROFESSIONAL

ENCON states that this *Phase I Environmental Site Assessment* was performed under *Environmental Professional (EP)*'s direct supervision, that he/she has prepared and/or reviewed and approved the report, and that the methods and procedures utilized in the development of this report conform to minimum industry standards using both the ASTM International, formerly known as the American Society for Testing and Materials (ASTM), Standard E1527-05 and the United States – Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as guidelines. ENCON certifies that ENCON's *Environmental Professionals* and Subcontractors are properly licensed and/or certified to conduct *Phase I Environmental Site Assessments*.

ENCON's EP declares that, to the best of his/her professional knowledge and belief, he/she meets the definition of *Environmental Professional* as defined in 40 CFR Part 312. ENCON's EP who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the subject Property. ENCON has developed and performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

#### ABBREVIATIONS:

ENCON may use various abbreviations to describe various site, building, or system components or legal descriptions. Not all abbreviations may be applicable to all reports. Abbreviations most often used are defined below.

AAI	All Appropriate Inquiries	MCL	Maximum Contaminant Level
ACM	Asbestos-Containing Material	MDP	Main Distribution Panel
ACT	Acoustic Ceiling Tile	Mg/Kg	Milligrams per Kilogram
ADA	Americans with Disabilities Act	mg/L	Milligrams per Liter
AHERA	Asbestos Hazard Emergency Response Act	MSDS	Material Safety Data Sheet
AHU	Air Handling Unit	MSL	Mean Sea Level
AMSL	Above Mean Sea Level	MSSL	Maximum Soil Concentration Limit
APA	American Plywood Association	MTBE	Methyl Tertiary Butyl Ether
APCD	Air Pollution Control District	ND	None Detected
AQMD	Air Quality Management District	NFA	No Further Action (letter)
AS	Air Sparging	NPDES	National Pollutant Discharge Elimination System
AST	Aboveground Storage Tank	NPL	National Priorities List
ASTM	American Society for Testing and Materials	O&M	Operations and Maintenance
		OVA	Organic Vapor Analyzer

AUL	Activity and Use Limitation	PCB	Polychlorinated Biphenyl
bgs	Below Ground Surface	PCE	Perchloroethylene
BOD	Biochemical (or Biological) Oxygen Demand	PEC	Potential Environmental Concern
BTEX	Benzene-Toluene-Ethylbenzene-Xylene	PEL	Permissible airborne Exposure Level
BTU	British Thermal Unit (a measurement of heat)	PERC	Perchloroethylene
BTUH	British Thermal Units per Hour	PID	Photoionization Detector
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	POTW	Publicly Owned Treatment Works
CESQG	Conditionally Exempt Small Quantity Generator	Ppb	Parts per Billion
CFR	Code of Federal Regulations	Ppm	Parts per Million
CMU	Concrete Masonry Unit	PRG	Preliminary Remedial Goal
COCs	Chemicals of Concern	PRP	Potentially Responsible Parties
DEP	Department for Environmental Protection	PTAC	Packaged Through-wall Air Conditioning (Unit)
DEQ	Department of Environmental Quality	QAQC	Quality Assurance Quality Control
DOE	Department of Ecology (WA)	RAP	Remedial Action Plan
DOT	Department of Transportation	RCRA	Resource Conservation and Recovery Act
DTSC	Department of Toxic Substances Control (California EPA)	REC	Recognized Environmental Condition
EIFS	Exterior Insulating Finishing System	RI/FS	Remedial Investigation & Feasibility Study
EP	Environmental Professional	RQ	Reportable Quantity
EPA	Environmental Protection Agency	RTU	Roof Top Unit
EPDM	Ethylene Propylene Diene Monomer (rubber membrane roof)	RWQCB	Regional Water Quality Control Board (California)
ESA	Environmental Site Assessment	SBA	Small Business Association
EUL	Expected Useful Life, Effective Useful Life	SPCC	Spill Prevention Control and Countermeasure Plan
FCU	Fan Coil Unit	SQG	Small Quantity Generator (of hazardous wastes)
FEMA	Federal Emergency Management Agency	SVE	Soil Vapor Extraction
FHA	Forced Hot Air	SVOC	Semi-Volatile Organic Compound
FHW	Forced Hot Water	SWPPP	Storm Water Pollution Prevention Plan
FID	Flame ionization detector	SWRCB	State Water Resource Control Board (CA)
FIRM	Flood Insurance Rate Map	TCE	Trichloroethylene
FOIA	Freedom Of Information Act	TCEQ	Texas Commission of Environmental Quality (TX)
FRT	Fire Retardant Treated plywood	TCLP	Toxicity Characteristic Leaching Procedure (used for metals analysis)
GC/MS	Gas Chromatography/Mass Spectrometry	TOC	Total Organic Carbon
GFI	Ground Fault Interrupter (circuit)	TPH	Total Petroleum Hydrocarbons Note: TPHg = TPH as gasoline. TPHd = TPH as diesel fuel TPHog = TPH as oil/grease
GPR	Ground-Penetrating Radar	TSA	Transaction Screen Assessment
GWB	Gypsum Wall Board	UBC	Uniform Building Code
HCP	Handicapped Person	UEL	Upper Explosive Limit
HID	High Intensity Discharge (lighting)	ug/L	Micrograms per Liter
HMTA	Hazardous Materials Transportation Act	USGS	United States Geological Survey
HVAC	Heating, Ventilating and Air Conditioning	UST	Underground Storage Tank
HWH	Hot Water Heater	VAV	Variable Air Volume box
LBP	Lead-Based Paint	VOC	Volatile Organic Compound
LDL	Laboratory Detection Limit	VWC	Vinyl Wall Covering
LEL	Lower Explosive Limit		
LLP	Landowner Liability Protection		
LQG	Large Quantity Generator (of hazardous wastes)		
LUST	Leaking Underground Storage Tank		

## 2.0 SUBJECT PROPERTY CHARACTERISTICS

### 2.1 PROJECT INFORMATION & PROPERTY LOCATION

Project Information	
ITEM	
ENCON Project Number	1212119ESAI
Client Project Number	Not applicable
Subject Property Address	4350 El Camino Real, Los Altos, Santa Clara County, CA 94022
Subject Property Name	El Camino 76
Property Inspection Date	January 11, 2013
Weather Condition	Sunny, approximately 50 degrees Fahrenheit
ENCON's Field Assessor	Marc Hachey, Environmental Consultant, P.G.
ENCON's QA/QC Environmental Professional	Hyung Kim, Principal Consultant
Property Location	The subject property is located at the south corner of the intersection between Los Altos Avenue and El Camino Real
General Setting	The general setting is mixed commercial/residential.
Property Type	Automobile service station

### 2.2 PROPERTY IMPROVEMENT & BUILDING/LAND DESCRIPTION

Property Improvements & Building / Land Description	
ITEM	
Subject Property Description	<p>The subject property is addressed 4350 El Camino Real, Los Altos, Santa Clara County, CA 94022. It consists of an approximately 28,557 square foot, square-shaped parcel of land occupied by an approximately 1,610 square-foot, one-story gasoline and automobile service station building. The property is currently a 76 gas station franchise called El Camino 76. The property building occupies the approximate central portion of the property. The building features a convenience store/cashier booth to the west, and three service garage bays to the east. The three service bays are equipped with in-ground hydraulic lifts, and are used for all forms of automobile maintenance and repair. Fuel island canopies are located directly to the northeast and northwest of the building. The gasoline underground storage tanks (USTs) are located between to the two canopies, directly north of the building. Asphalt-paved parking surrounds the building on all sides, and access to the site is from the northwest along Los Altos Avenue and northeast along El Camino Real.</p> <p>Data Source(s) for Parcel Size: North America Title Company property profile</p> <p>Data Source(s) for Building Size(s): North America Title Company property profile</p>
Estimated year of Construction	1969
	Data Source(s): North America Title Company property profile

Improvement Description	The subject building is wood-framed building with concrete floors. The western part of the building features a typical convenience store layout with a cashier booth and restrooms. The eastern part of the building features three service garage bays. Each bay has an in-ground hydraulic lift.
Other Improvements & Features (including description of unimproved areas)	None observed

### 2.3 CURRENT OCCUPANTS & USE OF THE PROPERTY

Current Occupants & Use of the Property	
ITEM	
Present Occupant(s)	El Camino 76
Business Operation(s)	Automobile service and gasoline station

### 2.4 MUNICIPAL SERVICES & UTILITIES

Municipal Services & Utilities	
ITEM	
Potable Water	Santa Clara County
Gas/Oil Source for Heating	PG&E
Electrical	PG&E
Sewage Disposal System	San Clara County
Solid Waste Disposal	Recology

### 3.0 SUBJECT PROPERTY RECONNAISSANCE

#### 3.1 LIMITING CONDITIONS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the subject property.

No disassembly of systems or building components or physical or invasive testing was performed. ENCON renders no opinion as to the property condition at un-surveyed and/or inaccessible portions of the subject property. ENCON relies completely on the information, whether written, graphic or verbal, provided by the property contact or as shown on any documents reviewed or received from the property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this Report are valid on the date of the survey. Note: Typically lenders have environmental policies where due diligence reports are valid for one year from the report date. However, such policies and standards can vary from each lender or user. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM Practice E1527-05, Section 4.6.

#### 3.2 SUBJECT PROPERTY RECONNAISSANCE

Subject Property Reconnaissance	
ITEM	
Processes that generate or handle Petroleum Products or Hazardous Substances	Gas station and automobile service station that operates fuel dispensers and performs vehicle maintenance.
Underground Storage Tanks (USTs)	<p>Three USTs are present:</p> <ul style="list-style-type: none"> <li>• Two 12,000-gallon gasoline UST</li> <li>• One 500-gallon waste oil UST</li> </ul> <p>The gasoline USTs are located to the north of the building, and the waste oil UST is located south of the western-most service bay. The tanks are constructed of double-walled steel and were installed in 1990.</p>
Aboveground Storage Tanks (ASTs)	None observed
Fuel Islands / Dispensers	Fuel island canopies are located to the northwest and northeast of the building. Each canopy features four, dual-sided dispensers with 24 nozzles, for a total of 48 nozzles at the facility. The dispensers are equipped with an Enhanced Vapor Recovery (EVR) system.
Any type of Fueling Systems	Yes, as described above
Containers of Hazardous Materials and/or Petroleum Products related to subject property's operations/processes	In association with the automobile service garage, there is one, approximately 100-gallon plastic container of automotive coolant stored within the building, as well as multiple, retail –sized containers of motor oil. Waste oil filters and waste coolant are stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property.

<b>Subject Property Reconnaissance</b>	
ITEM	
Other containers of suspect hazardous materials in drums, barrels, or other storage, or unlabeled/unidentified containers on site	None observed
Containers not attributed to current use of the subject property	None observed
Significant surface staining either on unpaved or paved land	None observed
Unusual areas of asphalt/cement patch or surface depressions	None observed
Stockpiled soils with visual contamination	None observed
Fill material of questionable origin / Piles	None observed
Stressed Vegetation	None observed
Any type of heavy equipment or machinery of environmental concern on site	None observed
Hydraulic equipment or machinery of environmental concern (PCB-oil / hydraulic oil) such as hydraulic lifts, compactors, etc.	The three bays of the service garage have in-ground hydraulic hoists.
Drains for machinery/equipment cleaning or flushing	None observed
Wastewater treatment units & clarifiers	None observed
Evidence of onsite surface water impoundment, pits, dry wells or illegal dumping, stormwater removal and sensitive surface water features such as lagoons, ponds, and other water bodies	None observed
Drains and Sumps	None observed
Any regulated surface wastewater discharges	None observed
Storm water or surface-water drainage system having any abnormal accumulation of petroleum or chemical run-off or foreign materials, any unusual blockage of the storm-water control system	None observed
Any stained catch basins, drip pads, or sumps	None observed
Herbicide and/or & pesticide use which poses environmental concern	None observed
Septic systems or cesspools	None observed
Wells (any irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, vapor recovery wells or other-monitoring wells)	One groundwater monitoring well was observed adjacent to the clean air separator
Railroad tracks or spurs	None observed
Visual evidence of improper handling/disposal or solid wastes	None observed
Other visual evidence of spills, leakage, staining, corrosion, soil/groundwater contamination	None observed
Dry-cleaning operation on site	None observed

### 3.3 DETAILED DESCRIPTION OF SITE RECONNAISSANCE AND ENVIRONMENTAL CONDITIONS

The subject property is occupied by a gasoline and automobile service station. There are currently two, 12,000-gallon gasoline underground storage tanks (UST's) located onsite. The system is equipped with a clean air separator located at the southwest corner of the building. A 500-gallon waste oil UST is located adjacent to and south of the western-most service bay. There are three service garage bays located at the eastern building half. Each bay is equipped with an in-ground hydraulic hoist which is utilized for all forms of automotive maintenance and repairs. Waste oil filters and waste coolant are stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property. Automotive tires and waste oil drain pans are stored outside the southeast corner of the building. Some permits on file have expired and required secondary containment testing records were not available, and it is not known when testing was last performed.

<b>Fueling System Summary</b>	
<b>Item</b>	<b>Description</b>
USTs:	<p>Three USTs are present:</p> <ul style="list-style-type: none"> <li>• Two 12,000-gallon gasoline UST</li> <li>• One 500-gallon waste oil UST</li> </ul> <p>The gasoline USTs are located to the north of the building, and the waste oil UST is located south of the western-most service bay. The tanks are constructed of double-walled steel and were installed in 1990.</p>
Piping	Double-walled fiberglass, pressurized, with dry annular space and interstitial monitoring
Dispensers	Fuel island canopies are located to the northwest and northeast of the building. Each features four, dual-sided dispensers with 24 nozzles, or a total of 48 nozzles for the whole facility. The dispensers are equipped with an Enhanced Vapor Recovery (EVR) system.
Enhanced Vapor Recovery (EVR) compliant?	Yes – Healy System
SB 989 Compliance	Based on reviewed documentation, the facility does not appear to be in compliance with SB 989 as the latest secondary containment testing was not filed onsite and the property owner was unaware when testing was last performed.
Monitoring System	Gilbarco EMC, with continuous interstitial monitoring of annular spaces in tanks and piping.
Most recent Monitoring System Certification (full system integrity and functioning inspection)	The most recent Monitoring System Certification, dated November 19, 2012 and performed by Confidence UST Services, Inc., was reviewed in onsite files during ENCON's site reconnaissance. All systems received passing test results.
Permits	<p>Santa Clara County Environmental Health, Certified Unified Program Agency, expires 2/28/2013</p> <p>Bay Area Air Quality Management District, Permit to Operate, valid through 9/1/2012</p>
Designated Operator	Mr. Greg Galatolo
Most recent Designated Operator site inspection	December 29, 2012
Other documents observed onsite	Operating Permit Application, dated December 29, 2012
Other hazardous materials observed:	None observed

### 3.4 NON-CERCLA ITEMS

The following table summarizes non-CERCLA issues for which the survey of interior areas of the subject property focused, if requested by the Client as an addition to ENCON's standard Scope of Services. No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive.

NON-CERCLA ITEMS	
ITEM	LOCATION AND DESCRIPTION
Suspect asbestos-containing building materials (ACBM) in damaged condition if the structure is built prior to 1978	Based on the construction date, asbestos-containing building materials could be present. An asbestos survey was not included in the current scope of services.
Suspect lead-based paint (LBP) in damaged condition if the structure is residential and was built prior to 1978	Based on the construction date, lead-based paints could be present. A lead survey was not included in the current scope of services.
Lead in drinking water	A lead in drinking water survey was not included in the current scope of services.
Radon gas concern	<p>A review of the EPA's Map of Radon Zones indicates that Santa Clara County falls within Zone 2, a zone of moderate radon potential. Counties located within Zone 2 have a predicted average indoor radon screening level of 2 to 4 picocuries per liter (pCi/L), generally below EPA's radon action level of 4 pCi/L for residential structures. A radon survey was not included in the current scope of services.</p> <p>Source: <a href="http://www.epa.gov/radon/zonemap.html">http://www.epa.gov/radon/zonemap.html</a></p> <p>Based on EPA data from a national study, 49 locations within the zip code of the subject property (94022). Three of the tested locations exceeded the action level of 4 pCi/L.</p> <p>Source: <a href="http://www.city-data.com/radon-zones/California/California.html">http://www.city-data.com/radon-zones/California/California.html</a></p>
Visual evidence of Urea Formaldehyde	The sale and installation of Urea Formaldehyde Foam Insulation (UFFI) as thermal insulation began in approximately 1970, and continued until December 1980 when it was banned under the federal <i>Hazardous Products Act</i> . UFFI was installed in both new and existing buildings during this period. UFFI was not commonly used in industrial or commercial buildings. A UFFI survey was not included in the current scope of services.
Suspect PCB-oil concern with hydraulic equipment, ballasts, transformers, etc.	A PCB survey was not included in the current scope of services.
Wetland, creeks, swale, pits, ponds, lagoons, or any other water bodies	Not applicable. However, based on a review of the EDR Radius Report, the site is not within a mapped National Wetland Inventory location. A wetlands survey was not included in the current scope of services.

NON-CERCLA ITEMS	
ITEM	LOCATION AND DESCRIPTION
Visual evidence of mold problems from wet areas, roof leaks, moisture around air conditioning or plumbing units	A microbial matter survey was not included in the current scope of services.
Air quality problems (unusual smells, noxious odors, or visual emissions, air emission stacks)	None observed.
Is the property within a flood zone (Federal Emergency Management Agency Flood Insurance Rate Map)	Not applicable. However, based on a review of a flood zone map contained in an EDR Radius Map Report, the subject property is located in a 500-year flood zone. A flood zone determination was not included in the current scope of work.
Regulatory compliance, Cultural and historical resources, Industrial hygiene, Health and safety, Ecological resources, Endangered species, Business Environmental Risk	These items were not included in the current scope of services.

### 3.5 ADJACENT PROPERTIES

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the subject property. An adjoining property is any real estate property whose border is contiguous or partially contiguous with the subject property, or that would be if the property was not separated by a roadway, street, public thoroughfare, river, or stream.

Adjacent Properties	
ITEM	
Northeast	El Camino Real followed by 4345 El Camino Real – Country Inn Motel
Southeast	4388 El Camino Real – Peninsula Real (residential)
Southwest	4388 El Camino Real – Peninsula Real (residential)
Northwest	Los Altos Avenue followed by 4320 El Camino Real – Courtyard Marriot

### 3.6 PHYSICAL SETTING

#### TOPOGRAPHY

The subject property's physical location was researched employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and may show physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. The elevation of the property is approximately 68 feet above mean sea level. There is a regional downslope to the north.

#### GEOLOGY

The site is located within the Coast Ranges geomorphic province of Northern California. The Coast Ranges are characterized as parallel mountain ranges and valleys displaced by strike-slip earthquake faults. Locally, the site is underlain by Pleistocene-aged alluvium consisting of mixed sand, silt and clay.

#### **HYDROGEOLOGY**

Hydrogeologic information was obtained from the report titled Underground Storage Tank Closure – Unocal No. 6115, prepared by Santa Clara Valley Water District and dated November 7, 1996. The measured groundwater depth at the site is approximately 25 feet deep. Groundwater flows to the northeast.

It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

Other Historical Records	None

##### 4.2 PREVIOUS ENVIRONMENTAL REPORTS

###### Underground Storage Tank Closure – Unocal No. 6115, prepared by Santa Clara Valley Water District and dated November 7, 1996

In 1990, two 10,000-gallon gasoline underground storage tanks and one 550-gallon waste oil tank were removed from the property. During the removal process, holes were observed in the waste oil tank and visible contamination was observed in one of the gasoline tanks. Four groundwater monitoring wells were installed onsite, and approximately 250 cubic yards of contaminated soil was excavated from the tank areas and disposed of offsite. Periodic groundwater monitoring occurred, and a vapor extraction system and groundwater extraction system were installed and operated for remediation (duration and dates of operation were not contained in the letter). The remediation efforts resulted in reduced hydrocarbon concentrations overtime. Below is an excerpt from the closure letter comparing the initial testing results during tank removal with the final testing results:

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS—BEFORE AND AFTER CLEANUP									
Contaminant	Soil (ppm)		Water (ppb)		Contaminant	Soil (ppm)		Water (ppb)	
	Before	After	High	Last 4 Quarters		Before	After	High	Last 4 Quarters
TPH (Gas)	31	1,900	4,600	ND	Xylene	0.14	33	1,800	ND
TPH (Diesel)	2.1	6.4	NA	NA	Ethylbenzene	1.5	220	110	ND
Benzene	0.076	1.7	430	ND	Oil & Grease	190	ND	ND	NA
Toluene	0.14	68	700	ND	Heavy Metals	<100	<200	NA	NA
Other (8010/8270)	ND	ND	NA	NA	MTBE	NA	NA	480	60

Case closure was granted for the subject property when it was deemed that remedial efforts were effective in reducing contamination at the site to acceptable and non-harmful levels.

**Due Diligence Site Assessment Report, prepared by ATC Associates (ATC) and dated November 6, 2007**

In July of 2007, ATC advanced six soil borings (B1-B6) near the existing fuel and waste oil USTs, as well as the fuel dispensers, using a Geoprobe. The borings were advanced to depths of 30 feet deep. Soil samples were collected at approximate five-foot intervals and analyzed with a PID. Shallow groundwater was encountered at 27 feet deep, and groundwater samples were collected from all borings. The soil samples were analyzed for metals, fuel oxygenates and halogenated volatile organic compounds (HVOCs) including benzene, toluene, ethylbenzene and total xylenes (BTEX), total petroleum hydrocarbons (TPH) in the gasoline and diesel ranges (TPH-GRO and TPH-DRO), and lead. Groundwater samples were analyzed for fuel oxygenates, HVOCs, TPH-GRO, TPH-DRO, and metals. Findings indicated that soil at the site consists of clay, silt, sand and gravel to the maximum depth of exploration. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentration of 1.1 mg/L in the sample collected from boring B-3. Chromium, Nickel and Zinc were detected in groundwater (at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively).

#### 4.3 SANBORN MAP COMPANY FIRE INSURANCE MAPS

Sanborn Map Company maps were created for insurance underwriters from 1867 to present, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. In 1996, the entire Sanborn Map Company collection was acquired by Environmental Data Resources, Inc. (EDR). ENCON subcontracted with EDR to provide copies of Sanborn Map Company maps, if available, for the subject property and vicinity.

EDR responded that Sanborn Map Company fire insurance maps were not drawn for the subject property or surrounding vicinity.

#### 4.4 HISTORICAL AERIAL PHOTOGRAPHS

ENCON reviewed aerial photographs via [www.historicaerials.com](http://www.historicaerials.com). A summary of findings is provided below:

Aerial photographs of the property and vicinity were reviewed via <http://www.historicaerials.com> for the following years: 1948, 1956, 1968, 1980, 1987, 1991, 1993, 1998, 2002, 2004 and 2005. In the 1948 and 1956 photographs, the subject property is developed with what appears to be three small building structures and a large, circular driveway off El Camino Real. The site appears vacant in 1968, and beginning in the 1980 photograph the current building and fuel island canopies are visible. The site appears unchanged from its current configuration in all subsequent photographs.

The site vicinity is first developed similarly to today beginning in the 1980 photograph. Prior to that, the surrounding area is sparsely developed residential land with scattered orchards.

#### 4.5 CITY DIRECTORIES

ENCON reviewed an EDR City Directory Abstract for the years spanning 1970 through 2010. These years are not necessarily inclusive. A summary of the information obtained is provided below.

Subject Property	
YEAR	LISTING
1975 – 1980	Felix's Union Service Station
1986 – 2005	El Camino Unocal
2010	El Camino 76

#### 4.6 PROPERTY PROFILE

##### Property Profile:

The following property information was obtained based upon a review of a North American Title Company property profile:

- Current Property Owner(s): Gregory and Angela Galatolo
- Lot Size: 28,557 square feet
- Building Size: 1,610 square feet
- Construction Date: 1969
- Site Use / Use Code: Service Station

#### 4.7 USER PROVIDED INFORMATION

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E1527-05 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property.

Per ASTM Practice E1527-05, the "user" is defined as follows:

*User*—the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

USER/CUSTOMER QUESTIONNAIRE	
QUESTION	CUSTOMER TO ANSWER
<p><b>(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).</b> Are you aware of any environmental cleanup liens against the <i>property</i> that are filed or recorded under federal, tribal, state or local law?</p>	The User has not informed ENCON of any knowledge of cleanup liens filed or recorded against the property.
<p><b>(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).</b> Are you aware of any AULs, such as <i>engineering controls</i>, land use restrictions or <i>institutional controls</i> that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?</p>	The User has not informed ENCON of any knowledge of activity or land use limitations associated with the property.
<p><b>(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</b> As the <i>user</i> of this <i>ESA</i> do you have any specialized knowledge or experience related to the <i>property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>property</i> or an adjoining <i>property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	The User has not informed ENCON of any specialized knowledge or experience related to the property or nearby properties.
<p><b>(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</b> Does the purchase price being paid for this <i>property</i> reasonably reflect the fair market value of the <i>property</i>? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the <i>property</i>?</p>	The User has not informed ENCON of any information pertaining to the purchase price with respect to the fair market value of the property.
<p><b>(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</b> Are you aware of commonly known or <i>reasonably ascertainable</i> information about the <i>property</i> that would help the <i>Environmental Professional(EP)</i> to identify conditions indicative of releases or threatened releases? For example, as <i>user</i>,</p> <p>(a.) Do you know the past uses of the <i>property</i>?</p> <p>(b.) Do you know of specific chemicals that are present or once were present at the <i>property</i>?</p> <p>(c.) Do you know of spills or other chemical releases that have taken place at the <i>property</i>?</p> <p>(d.) Do you know of any environmental cleanups that have taken place at the <i>property</i>?</p>	The User has not informed ENCON of any commonly known or reasonably ascertainable information about the property that would identify conditions indicative of releases or threatened releases, other than as described in Section 4.10 (Interviews), if applicable.

**(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the User of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

The User has not informed ENCON of any obvious indicators that point to the presence or likely presence of contamination at the property, other than as described in Section 4.10 (Interviews), if applicable.

The User has not informed ENCON of any specific prior knowledge of cleanup liens, activity or land use limitations, specialized user knowledge, information about the fair market value, site history, or current site activities. Valuation and environmental information is being collected as part of due diligence measures for the associated transaction. An environmental cleanup lien/AUL search is not required from the environmental consultant as part of this investigation. Title searches shall be conducted by the User, concurrently with environmental due diligence work.

**4.8 HISTORICAL TOPOGRAPHIC MAPS**

ENCON reviewed historical USGS 7.5 Topographic Maps. No features of environmental concern were noted.

**4.9 OIL & GAS MAPS**

ENCON did not review oil and gas maps during the course of this site assessment. Other records were obtained which are considered sufficient to meet ASTM Practice E1527-05 standard guidelines. Sufficient information was available from alternate sources to adequately assess the property.

**4.10 Interviews**

Interview	
INTERVIEW DETAILS	
Name	Mr. Greg Galatolo
Business Title	Owner
Firm	N/A
Telephone	(650) 941-0244
Role/Relationship	Owner/manager
Summary	Mr. Galatolo provided site access and provided the onsite binder containing all underground storage tank documentation and testing certificates. Mr. Galatolo indicated that he has owned the property and business for the last 24 years. Mr. Galatolo was unaware of the former LUST case associated with the site, although it appears he was property owner during that time. Mr. Galatolo stated there have been no recent environmental investigations or reports prepared for the site, and when asked about the most recent secondary containment testing he was unaware of when the last testing was performed.

**4.11 SUMMARY OF HISTORICAL PROPERTY AND VICINITY USE**

Summary of Historical Property Use:

The site was developed with what appears to be three small buildings from at least 1946 to 1958. It appears from aerial photographs reviewed that the buildings may have been residential homes. The current building and automobile service station was constructed in 1969, and has operated similarly ever since.

In 1990, two 10,000-gallon gasoline underground storage tanks and one 550-gallon waste oil tank were removed from the property. During the removal process, holes were observed in the waste oil tank and visible contamination was observed in one of the gasoline tanks. Four groundwater monitoring wells were installed onsite, and approximately 250 cubic yards of contaminated soil was excavated from the tank areas and disposed of offsite. Periodic groundwater monitoring occurred, and a vapor extraction system and groundwater extraction system were installed and operated for remediation (duration and dates of operation were not contained in the letter). The remediation efforts resulted in reduced hydrocarbon concentrations overtime. Case closure was granted for the subject property in 1996 when it was deemed that remedial efforts were effective in reducing contamination at the site to acceptable and non-harmful levels.

In July of 2007, ATC advanced six soil borings (B1-B6) near the existing fuel and waste oil USTs, as well as the fuel dispensers, using a Geoprobe drilling rig. The borings were advanced to depths of 30 feet below ground surface (bgs). Soil samples were collected at approximate five-foot intervals and analyzed with a PID. Shallow groundwater was encountered at 27 feet deep, and groundwater samples were collected from all borings. The soil samples were analyzed for metals, fuel oxygenates and halogenated volatile organic compounds (HVOCs) including benzene, toluene, ethylbenzene and total xylenes (BTEX), total petroleum hydrocarbons (TPH) in the gasoline and diesel ranges (TPH-GRO and TPH-DRO), and lead. Groundwater samples were analyzed for fuel oxygenates, HVOCs, TPH-GRO, TPH-DRO, and metals. Findings indicated that soil at the site consists of clay, silt, sand and gravel to the maximum depth of exploration. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentration of 1.1 mg/L in the sample collected from boring B-3. Chromium, Nickel and Zinc were detected in groundwater (at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively).

#### Summary of Vicinity Use:

The site vicinity was first developed similarly to today beginning around 1980 or prior. Before to that, the surrounding area was sparsely developed residential land with scattered orchards.

#### **4.13 DATA GAPS**

ASTM Practice E1527-05 and the US-EPA AAls require that the report identify and comment on significant data gaps that affect the ability of the *environmental professional* to identify *Recognized Environmental Conditions*.

No significant data gaps were identified during the course of this Phase I Environmental Site Assessment.

## 5.0 REGULATORY RECORDS SEARCH

### 5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were provided by governmental record search database suppliers. Such databases were searched for properties with reported environmental issues within radii specified by ASTM Practice E1527-05, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is included as an appendix to this *Report*. The database report may identify a certain "orphan sites" which are those facilities that could not be mapped or geocoded due to inadequate address information. We attempted to locate the facilities via various mapping programs, but cannot be held liable for not correctly locating these orphan sites to determine their impact to the subject property.

The subject property was identified on the following environmental regulatory agency databases RCRA-LQG, HAZNET, CA FID UST, HIST UST, SWEEPS UST, LUST, HIST LUST, UST, and HIST Cortese:

#### Database Listings for Subject Property:

Site	Database(s)	EPA ID
UNOCAL SERVICE STATION #6115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	RCRA-LQG	CAD982059628
UNION OI SS# 6115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	HIST CORTESE LUST HIST LUST HIST UST HAZNET	N/A
CONOCOPHILLIPS CO. #256115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	UST	N/A

UNOCAL SERVICE STATION #6115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	HAZNET	N/A
CONOCO PHILLIPS # 256115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	HAZNET	N/A
EL CAMINO UNOCAL (#6115) 4350 EL CAMINO REAL LOS ALTOS, CA 94022	HAZNET	N/A
UNION OIL SS #6115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	CA FID UST SWEEPS UST	N/A
UNION OIL SS #6115 4350 EL CAMINO REAL LOS ALTOS, CA 94022	LUST Status: Completed - Case Closed HIST UST	N/A

The subject property was identified on the above-listed environmental databases. Many environmental databases have overlapping information. For clarity, each of the listings pertaining to the subject property are summarized below:

**HAZNET** (Hazardous Waste Information System): The California Environmental Protection Agency maintains a list of facilities that generate hazardous waste manifests. Because of the large volume of manifests, it is not uncommon for manifests to contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). This database is a supplemental listing to the current ASTM standards.

The subject property appears in the HAZNET database in association with hazardous wastes generated at the site and disposed of under hazardous waste manifest. In 2006, 2007 and 2009 the following hazardous waste products were generated and removed from the site: 0.1625 tons of organic solids; 0.59 tons of organic liquid mixtures; and 0.04 tons of aqueous solution.

**RCRA-LQG:** RCRA hazardous waste generators are identified as Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQGs). RCRA LQGs are identified as those facilities, which generate at least 1,000 kilograms (2,200 pounds) of non-acutely hazardous waste (or 1 kilogram of acutely hazardous waste) in any calendar month. RCRA SQGs are identified as those facilities that generate less than 1,000 kilograms of non-acutely hazardous waste in any calendar month. A CESQG is a business that is exempt from most state and federal hazardous waste disposal regulations, as long as it generates very small quantities of hazardous waste and ensures delivery of its waste to a facility that is permitted to receive it. Specifically, a CESQG: 1) Generates no more than 100 kilograms (about 220 pounds or 25 gallons) of hazardous waste in any calendar month; 2) Generates no more than 1 kilogram (about 2.2 pounds) of acutely hazardous waste in any calendar month; and 3) Never accumulates more than 1000 kilograms of hazardous waste on-site

The subject property appears on the RCRA-LQG database in association with hazardous waste generated at the site from onsite auto repair and gas station services. No violations were reported. This listing is not assessed to represent a current environmental concern.

**HIST UST** (Historical Underground Storage Tank): This is a listing of underground storage tanks that have been registered, but have been removed or are no longer in service. Data on the HIST UST list was supplied by the State Water Resources Control Board.

The subject property appears on the HIST UST database in association with former USTs removed from the property in 1990. See Section 4.2 for additional information.

**UST** (Underground Storage Tanks): This is a list of state-registered underground storage tank sites. Sites appearing on the UST database have not necessarily released hazardous substances into the environment nor do they necessarily pose environmental threat to surrounding properties.

The subject property appears on the UST database in association with the onsite USTs. See Section 3.2 for additional information.

**SWEEPS UST** (Statewide Environmental Evaluation and Planning System): This is an inactive underground storage tank database. It identifies underground storage tanks and was maintained by a contractor for the State Water Resources Control Board in the early 1980s. The database is no longer updated or maintained.

The subject property appears on the SWEEPS UST database in association with former USTs removed from the property in 1990. See Section 4.2 for additional information.

**LUST** (Leaking Underground Storage Tank): This is a list of state sites that have reported leaking underground storage tanks.

The subject property appears on the LUST database in association with the closed LUST case. See section 4.2 for additional information.

**CORTESE/HIST CORTESE**: Sites on this database list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTES]. This database is no longer updated.

The subject property appears on the HIST CORTESE database in association with closed LUST case. See section 4.2 for additional information.

## 5.2 FEDERAL AGENCY RECORDS

FEDERAL AGENCY RECORDS		
SOURCE	CRITERIA FOR MINIMUM SEARCH DISTANCE (MILES)	NO. OF PROPERTIES WITHIN SEARCH DISTANCE
NPL	1.0	0
De-listed NPL	0.5	0
CERCLIS	0.5	0
CERCLIS-NFRAP	0.5	0

FEDERAL AGENCY RECORDS		
SOURCE	CRITERIA FOR MINIMUM SEARCH DISTANCE (MILES)	NO. OF PROPERTIES WITHIN SEARCH DISTANCE
RCRA-CORRACTS	1.0	0
RCRA-TSDF	0.5	0
RCRA-Generator	Subject Property and Adjoining Properties	0
ERNS	Subject Property Only	0
Federal IC/EC Registries	Subject Property Only	0
Other Federal List	Subject Property Only	0

Note: For clarity, regulatory agency database listings pertaining to the subject property, if present, are discussed separately from database listings for other properties within the search radius. See Section 5.1.

There were no sites identified in Federal Agency database records within the minimum specified search distances of the subject property.

### 5.3 STATE AGENCY RECORDS

STATE AGENCY RECORDS		
SOURCE	CRITERIA FOR MINIMUM SEARCH DISTANCE (MILES)	NO. OF PROPERTIES WITHIN SEARCH DISTANCE
State/Tribal Equivalent NPL	1.0	6
State/Tribal Equivalent CERCLIS	0.5	0
State/Tribal SWLF	0.5	0
State/Tribal LUST	0.5	21 LUST sites and 2 SLIC sites
State/Tribal UST	Subject Property and Adjoining Properties	0
State/Tribal IC/EC Registries	Subject Property Only	0
State/Tribal Voluntary Cleanup Sites	0.5	0
State/Tribal Brownfield Sites	0.5	0
Other State List	Subject Property Only	The subject property was identified on the following State environmental databases: RCRA-LQG, HAZNET, CA FID UST, HIST UST, SWEEPS UST, LUST, HIST LUST, UST, and HIST Cortese

Note: For clarity, regulatory agency database listings pertaining to the subject property, if present, are discussed separately from database listings for other properties within the search radius. See Section 5.1.

#### State/Tribal Equivalent NPLs:

California AW (Annual Work Plan previously known as Bond Expenditure Plan): The California Health & Safety code requires the California EPA to develop a site-specific expenditure plan as the basis for an

appropriation of California Hazardous Substance Cleanup Bond Act of 1984 funds. The Agency is also required to update annually and report any significant adjustments to the Legislature on an ongoing basis. The plan identifies California hazardous waste sites targeted for cleanup by responsible parties, the California and the Federal Environmental Protection Agency over the next coming years.

**California Bond Expenditure Plan:** Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

**RESPONSE:** Identifies confirmed release sites where the California Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Six RESPONSE sites were identified within the specified search radius:

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SYMTRON #2	111 ORTEGA AVENUE	E 1/2 - 1 (0.839 mi.)	45	85
TRW/VIDAR	77 ORTEGA AVENUE	E 1/2 - 1 (0.850 mi.)	46	88
PHOTO GRAPHICS PRINTING INC	2274 MORA DR	E 1/2 - 1 (0.878 mi.)	M49	112
PLESSEY #3	2256 MORA DRIVE	E 1/2 - 1 (0.903 mi.)	N50	140
PLESSEY #2	2251, 2257, 2283 AND 22	E 1/2 - 1 (0.906 mi.)	N51	143
SYMTRON CORPORATION	2235 MORA DR.	E 1/2 - 1 (0.934 mi.)	52	145

The sites listed above are not assessed to pose a risk of adverse environmental impact to the subject property based on one or more of the following rationale: a) horizontal distance from the subject property; b) down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., contamination confined only within soil media, absence of groundwater impact, lack of transporting media such as groundwater); and/or d) regulatory status (e.g., case closed, remediation action underway).

#### **State/Tribal LUST:**

**LUST:** State/Tribal Leaking Underground Storage Tanks: This is a list of state sites that have reported leaking underground storage tanks. A site may be placed on a LUST list by reporting that the tank system(s) failed tank testing, that routine monitoring of tank's system(s) showed evidence of leakage, or that verification sampling during tank removal showed subsurface contamination.

**SLIC:** Spills, Leaks, Investigations, and Cleanups: - The Spills, Leaks, Investigations, and Cleanups (SLIC) database is maintained by the California Regional California Water Quality Control Board (RWQCB) to track sites where releases have been reported. SLIC sites include miscellaneous releases, not necessarily related to underground storage tanks. Often there is overlap between sites appearing on LUST and SLIC databases.

Generally, only such sites located within less than a one-eighth of one mile radius from the target property represent a potential environmental concern.

21 LUST sites and two SLIC sites were identified within the specified search radius (many LUST/SLIC sites have multiple/duplicate listings), including the following nearby properties:

LUST Sites:

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LOZANO INC. Status: Completed - Case Closed	2690 W EL CAMINO REAL	SE 0 - 1/8 (0.110 mi.)	C13	23
LOZANO CAR WASH	2690 W EL CAMINO REAL	SE 0 - 1/8 (0.110 mi.)	C14	25

## SLIC Sites:

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SEARS ROEBUCK COMPANY Facility Status: Completed - Case Closed	455 SAN ANTONIO RD	ESE 1/4 - 1/2 (0.372 mi.)	26	44
HYATT RICKEYS Facility Status: Open - Inactive	4201 4219 EL CAMINO REA	NNW 1/4 - 1/2 (0.463 mi.)	43	83

ENCON researched all LUST/SLIC cases within a 1/8 mile radius of the subject property via the Regional Water Quality Control Board's Geotracker online database. None of the identified LUST/SLIC sites appear to have impacted the subject property.

The sites listed above are not assessed to pose a risk of adverse environmental impact to the subject property based on one or more of the following rationale: a) horizontal distance from the subject property; b) down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., contamination confined only within soil media, absence of groundwater impact, lack of transporting media such as groundwater); and/or d) regulatory status (e.g., case closed, remediation action underway, no reported violations).

If sites are listed on the LUST/SLIC databases with a "case closed" (no further remedial action required) status, it shall be interpreted as "the identified contamination at such sites was mitigated to a degree that the governing agency believes that these sites do not pose apparent concern/threat to the subsurface environment of the neighboring area".

#### 5.4 LOCAL AGENCY RECORDS

##### Regional Water Quality Control Board:

The California Regional Water Quality Control Board (RWQCB) is the regulatory agency responsible for protection of the waters of the State of California, and has oversight authority for assessments and remediation of unauthorized releases of hazardous substances to the soil and groundwater, and Leaking USTs (LUST sites).

ENCON researched the subject property via the RWQCB's online Geotracker database. Records were reviewed within the database for the closed LUST case. The records reviewed for the two closure cases are discussed in Section 4.1.

[http://geotracker.waterboards.ca.gov/profile\\_report.asp?global\\_id=T0608501527](http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501527)

## 6.0 SUMMARY OF FINDINGS

ENCON performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 of the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this Report. A summary of findings is provided below:

REPORT COMPONENT	SUMMARY OF FINDINGS
<p><b>Subject Property Characteristics</b>  (Current Tenant and Site Description)</p>	<p>The subject property is addressed 4350 El Camino Real, Los Altos, Santa Clara County, CA 94022. It consists of an approximately 28,557 square foot, square-shaped parcel of land occupied by an approximately 1,610 square-foot, one-story gasoline and automobile service station building. The property is currently a 76 gas station franchise called El Camino 76. The property building occupies the approximate central portion of the property. The building features a convenience store/cashier booth to the west, and three service garage bays to the east. The three service bays are equipped with in-ground hydraulic lifts and are used for all forms of automobile maintenance and repairs. Fuel island canopies are located directly to the northeast and northwest of the building. The gasoline underground storage tanks (USTs) are located between the two canopies, directly north of the building. Asphalt-paved parking surrounds the building on all sides, and access to the site is from the northwest along Los Altos Avenue and northeast along El Camino Real.</p>
<p><b>Summary of Property Reconnaissance</b></p>	<p>The subject property is occupied by a gasoline and automobile service station. There are currently two, 12,000-gallon gasoline underground storage tanks (UST's) located onsite. The system is equipped with a Healy clean air separator located at the southwest corner of the building. A 500-gallon waste oil UST is located adjacent to and south of the western-most service bay. There are three service garage bays located within the eastern portion of the building. Each bay is equipped with an in-ground, hydraulic hoist which is utilized for all forms of automotive maintenance and repairs. Waste oil filters and waste coolant are stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property. Automotive tires and waste oil drain pans are stored outside the southeast corner of the building. Some permits on file have expired, and the required secondary containment testing records were not available and it is not known when testing was last performed.</p>

REPORT COMPONENT	SUMMARY OF FINDINGS
<p><b>Historical Use of Subject Property and Vicinity</b></p>	<p><u>Summary of Historical Property Use:</u></p> <p>The site was developed with what appears to be three small buildings from at least 1946 to 1958. It appears from aerial photographs reviewed that the buildings may have been residential. The current building and automobile service station was constructed in 1969, and has operated similarly ever since.</p> <p>In 1990, two 10,000-gallon gasoline underground storage tanks and one 550-gallon waste oil tank were removed from the property. During the removal process, holes were observed in the waste oil tank and visible contamination was observed in one of the gasoline tank excavations. Four groundwater monitoring wells were installed onsite, and approximately 250 cubic yards of contaminated soil was excavated from the tank areas and disposed of offsite. Periodic groundwater monitoring occurred, and a vapor extraction system and groundwater extraction system were installed and operated for remediation efforts (duration and dates of operation were not contained in the letter). The remediation efforts resulted in reduced hydrocarbon concentrations overtime. Case closure was granted to the subject property in 1996 by Santa Clara County Water District when it was deemed that remedial efforts were effective in reducing contamination at the site to acceptable and non-harmful levels.</p> <p>In July of 2007, ATC advanced six soil borings (B1-B6) near the existing fuel and waste oil USTs, as well as the fuel dispensers, using a Geoprobe drilling rig. The borings were advanced to depths of 30 feet below ground surface (bgs). Soil samples were collected at approximate five-foot intervals and analyzed with a PID. Shallow groundwater was encountered at 27 feet deep, and groundwater samples were collected from all borings. The soil samples were analyzed for metals, fuel oxygenates and halogenated volatile organic compounds (HVOCs) including benzene, toluene, ethylbenzene and total xylenes (BTEX), total petroleum hydrocarbons (TPH) in the gasoline and diesel ranges (TPH-GRO and TPH-DRO), and lead. Groundwater samples were analyzed for fuel oxygenates, HVOCs, TPH-GRO, TPH-DRO, and metals. Findings indicated that soil at the site consists of clay, silt, sand and gravel to the maximum depth of exploration. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentration of 1.1 mg/L in the sample collected from boring B-3. Chromium, Nickel and Zinc were detected in groundwater (at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively).</p> <p><u>Summary of Vicinity Use:</u></p> <p>The site vicinity was first developed similarly to today beginning around 1980 or prior. Before to that, the surrounding area was sparsely developed residential land with scattered orchards.</p>

REPORT COMPONENT	SUMMARY OF FINDINGS
<b>Federal, State and Local Agency Concerns</b>	The subject property was identified on the following governmental/regulatory environmental databases as per the EDR Radius Report utilized in conjunction with this report: RCRA-LQG, HAZNET, CA FID UST, HIST UST, SWEEPS UST, LUST, HIST LUST, UST, and HIST Cortese. These listings pertain to the operation of the site as a gas station and auto repair facility, as well as a closed Leaking Underground Storage Tank (LUST) case associated with the site. See Sections 4.2 for details.
<b>Potential Off-site Sources</b>	No researched properties within the specified search radii were identified which are assessed to pose an environmental concern for the subject property.  No RECs (Recognized Environmental Conditions) were identified.
<b>Non-CERCLA Items</b>	No concerns were identified for non-CERCLA items. However, unless <i>Client</i> contracted ENCON to investigate specific non-CERCLA items, these items were generally not included in the scope of services for this Phase I Environmental Site Assessment.
<b>Inaccessible or Un-surveyed Portions of Subject Property</b>	Full access to the entire property was provided to ENCON, and there were no notable portions of the subject property excluded from the survey and field inspection.
<b>Data Gap</b>	No significant data gaps were identified during the course of this Phase I Environmental Site Assessment.

## 7.0 RECOMMENDATIONS AND OPINIONS

ENCON Solutions, Inc. (ENCON) performed a Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E1527-05. The ASTM Practice E1527-05 standard defines a Recognized Environmental Condition (REC) as "...the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*."

The site was developed with what appears to be three small buildings from at least 1946 to 1958. It appears from historical aerial photographs reviewed that the buildings may have been residential dwellings. The current building and automobile service station was constructed in 1969, and has operated similarly ever since.

In 1990, two 10,000-gallon gasoline underground storage tanks and one 550-gallon waste oil tank were removed from the property. During the removal process, holes were observed in the waste oil tank and visible contamination was observed in one of the gasoline tanks. Four groundwater monitoring wells were installed onsite, and approximately 250 cubic yards of contaminated soil was excavated from the tank areas and disposed of offsite. Periodic groundwater monitoring occurred, and a vapor extraction system and groundwater extraction system were installed and operated for remediation (duration and dates of operation were not contained in the letter). The remediation efforts resulted in reduced hydrocarbon concentrations overtime. Case closure was granted for the subject property in 1996 when it was deemed that remedial efforts were effective in reducing contamination at the site to acceptable and non-harmful levels.

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS—BEFORE AND AFTER CLEANUP									
Contaminant	Soil (ppm)		Water (ppb)		Contaminant	Soil (ppm)		Water (ppb)	
	Before	After	High	Last 4 Quarters		Before	After	High	Last 4 Quarters
TPH (Gas)	31	1,900	4,600	ND	Xylene	0.14	33	1,800	ND
TPH (Diesel)	2.1	6.4	NA	NA	Ethylbenzene	1.5	220	110	ND
Benzene	0.076	1.7	430	ND	Oil & Grease	190	ND	ND	NA
Toluene	0.14	68	700	ND	Heavy Metals	<100	<200	NA	NA
Other (8010/8270)	ND	ND	NA	NA	MTBE	NA	NA	480	60

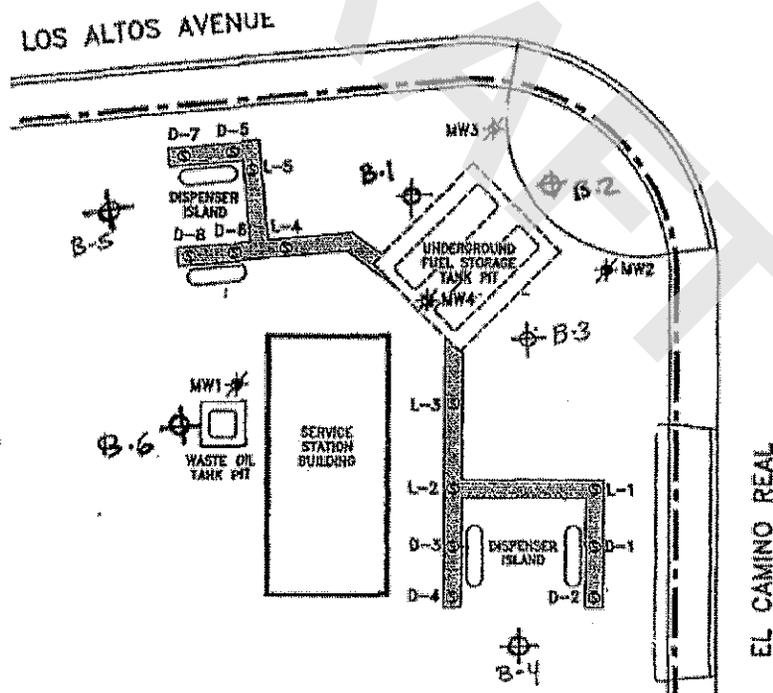

In July of 2007, ATC advanced six soil borings (B1-B6) near the existing fuel and waste oil USTs, as well as the fuel dispensers, using a Geoprobe. The borings were advanced to depths of 30 feet deep. Soil samples were collected at approximate five-foot intervals and analyzed with a PID. Shallow groundwater was encountered at 27 feet deep, and groundwater samples were collected from all borings. The soil samples were analyzed for metals, fuel oxygenates and halogenated volatile organic compounds (HVOCs) including benzene, toluene, ethylbenzene and total xylenes (BTEX), total petroleum

hydrocarbons (TPH) in the gasoline and diesel ranges (TPH-GRO and TPH-DRO), and lead. Groundwater samples were analyzed for fuel oxygenates, HVOCs, TPH-GRO, TPH-DRO, and metals.

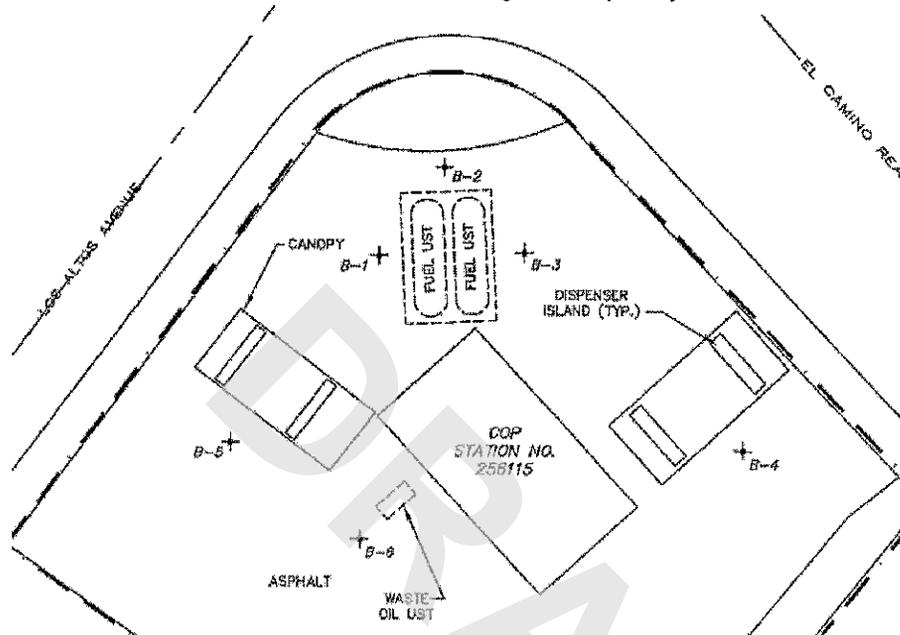

Findings indicated that soil at the site consists of clay, silt, sand and gravel to the maximum depth of exploration. No TPH-GRO, TPH-DRO, MTBE or BTEX was detected in any of the soil samples collected. Soil samples did contain concentrations of Methyl Chloride, Chromium, Lead, Nickel and Zinc (max concentrations of 0.010 mg/kg, 188 mg/kg, 7.4 mg/kg, 18 mg/kg and 58 mg/kg, respectively). No TPH-GRO, MTBE or BTEX was detected in any of the groundwater samples collected. TPH-DRO was detected in groundwater at a concentration of 1.1 mg/L in the sample collected from boring B-3. Chromium, Nickel and Zinc were detected in groundwater (at maximum concentrations of 119 ug/L, 148 ug/L and 84.6 ug/L, respectively). TPH, BTEX and MTBE were not detected in soils at the site during the baseline site assessment in 2007. However, TPH-Diesel Range Organics was discovered in groundwater at 1.1 mg/L. Soil samples above the location of contaminated groundwater measured non-detect for BTEX, TPH-DRO, TPH-GRO and MTBE.

Based on absence of VOCs and fuel oxygenates above laboratory detection limits both in soil and groundwater samples collected, low concentration of diesel range hydrocarbon in groundwater is not likely to pose a significant environmental concern.

2002 Baseline Phase II ESA by Secor

## 2007 Environmental Due Diligence Report by ATC

ENCON identified the following RECs in connection with the Property.

The subject property is occupied by a gasoline and automobile service station. There are currently two, 12,000-gallon gasoline underground storage tanks (UST's) located onsite. The system is equipped with a Healy clean air separator located at the southwest corner of the building. A 500-gallon waste oil UST is located adjacent to and south of the western-most service bay. There are three service garage bays located within the eastern portion of the building. Each bay is equipped with an in-ground, hydraulic hoist which is utilized for all forms of automotive maintenance and repairs. Waste oil filters and waste coolant are stored in 55-gallon steel drums and an approximately 100-gallon plastic drum located within an enclosed storage area at the south end of the property. Automotive tires and waste oil drain pans are stored outside the southeast corner of the building. Some permits on file have expired, and the required secondary containment testing records were not available and it is not known when testing was last performed.

Three USTs are present:

- Two 12,000-gallon gasoline UST
- One 500-gallon waste oil UST

The gasoline USTs are located to the north of the building, and the waste oil UST is located south of the western-most service bay. The tanks are constructed of double-walled steel and were installed in 1990.

ENCON could not obtain valid operating CUPA permits on file, and the required secondary containment testing records were not available and it is not known when testing was last performed. ENCON cannot determine if the USTs and associated fueling systems are currently in regulatory compliance, however, the owner/operator should continue to maintain compliance with all permits, monitoring, and financial assurance requirements for the UST system, as required by the State and administered through the local oversight program.

It is unknown how and when spill containment, leak detection, overfill prevention and monitoring system were installed, but considering Federal UST Upgrade Requirement, such features may have been installed prior to 1998. Therefore, an inherent risk of environmental concern associated with fueling system particularly during the earlier years of fueling operation still exists, and the subject gas station may have been vulnerable to unauthorized product release or site contamination during such period. Due to age of current fueling system (since 1990) and absence of compliance testing records for the earlier years of fueling operation, inherent environmental risk exists, and such risk is expected to increase as the fueling system ages. However, based on results of subsurface investigation conducted in 2007 by ATC, a significant environmental risk associated with the current fueling system is not expected.

It should be noted that typical automotive shops are known to generate used oil, parts cleaning solvents, brake fluids, automotive coolant, and leaded car batteries. In the absence of more detailed information about the final disposition of the waste stream generated by the historical auto shop operation, ENCON cannot rule out a potential environmental risk from the historical use of the Property, and inherent risk of environmental concern may still exist due to identified data gap and longtime automotive service operation since 1969, which could pose an unknown environmental risk under certain site development activities such as site grading, excavation, extraction of groundwater or an installation of water wells. Subsurface investigation under the hazardous materials storage areas, abandoned clarifier, hoists and vehicle service/repair would be the sole measure to obtain higher level of comfort in ascertaining subsurface environmental conditions at the Property, and to assess the Property for evidence of hazardous materials releases associated with more than 40 years of automobile service operation.

There is no outstanding violation, reported unauthorized release of hazardous substances or corrective action against the subject property or business operation, per regulatory record search database. There was no reported and observed significant staining or spillage of such substances to pose a significant environmental concern.

ENCON identified drums and containers of chemical/petroleum products without secondary containment and proper BMPs. The owner and operator of the Property should continue to implement better housekeeping and container management to avoid unauthorized release of petroleum/chemical products and hazardous wastes.

Since waste oil is not highly mobile in soil, release of these fluids in small quantities is not likely to result in impact to the subsurface that requires remediation. However, there is a potential that waste oil may contain volatile organic compound (VOC) residues which are known to readily migrate through soil. Containers of chemical substances and hazardous wastes shall be placed on containment pans and always covered when outdoors. Absorbent must be swept and disposed of once used and not left exposed to rain, thus defeating the purpose of spill containment. Failure to comply with BMP requirements typically result in regulatory action.

Hazardous materials use appears limited to automotive fluids, filters, waste oil, motor oil products stored in containers of various sizes. No evidence of significant staining or material release was observed in the storage and use areas.

In general, auto shops may operate to a low satisfaction of Best Management Practices (BMP) recommended for such businesses. Depending on local agency requirements, hazardous/chemical substances should be placed on secondary containment system and always covered when outdoors. Absorbent must be swept and disposed of once used and not left exposed to rain, thus defeating the purpose of spill containment. Failure to comply with BMP requirements typically result in regulatory action, however such corrective action can be implemented easily.

Owner/operation shall be aware that the environmental risk associated with handling automotive wastes, chemical and hydrocarbon products increases over time, thus continue to be in regulatory compliance for proper handling and implementation of Best Management Practices. An unknown environmental risk may

exist under certain site development activities such as site grading, excavation, extraction of groundwater or an installation of water wells. In the event that the site is redeveloped and/or soil/groundwater is disturbed from the potential areas of concern, a soil management plan should be prepared and implemented to address the handling of soil that may contain low residual concentrations of petroleum hydrocarbons. Additional subsurface investigation and special disposal considerations may be required if the impacted soil is excavated from the site as part of redevelopment or maintenance of the site.

Degradation processes of petroleum hydrocarbons and VOCs that may have been released into the subsurface environmental have likely occurred through natural attenuation, and will likely continue to occur; though this cannot be verified or quantified without any data from the site. In addition, potential exposure of onsite occupants to residues in soil, should they exist, may have been substantially reduced by the presence of building structure, concrete slab and paved hardscape surfaces at the Subject Property.

ENCON observed in-ground hydraulic lifts in the automotive repair area. The physical conditions and integrity of these in-ground hydraulic hoists could not be verified at the time of field inspection, but due to their inherent environmental concern and possible age of the system, the level of environmental risk cannot be ascertained without soil testing and lab analysis. No significant leaks or stains were observed at the time of field reconnaissance, however in-ground lifts have most of their components below grade, as opposed to surface-mount lift systems. Lifts operate by transferring hydraulic fluid, under pressure, among the components. There is a reservoir of hydraulic fluid within the system. Hydraulic fluids are a very large class of materials that are used in machines and equipment to transfer pressure from one point to another. Typically, the fluid is within a piston chamber, which is within a steel housing. Therefore, the basic design provides secondary spill containment. The fluid reservoirs are not regulated as USTs. Vehicle lifts, unlike underground storage tanks (USTs), sumps and oil-water separators are not regulated by federal, state or local agencies.

ENCON observed an groundwater monitoring well near the clean air separator at the property from the former LUST case investigations. As the former LUST case received regulatory closure in 1996, any monitoring well shall related to the former LUST case should be removed in accordance with all regulatory requirements. Since the wells, if compromised, can act as a conduit to the subsurface in the future, it should be decommissioned by removing the casing and infilling the hole with bentonite grout per applicable rules and regulations.

The owner and operator of the Property should be aware of the foregoing environmental risk associated with the subject property as noted above. Other than the foregoing, ENCON recommends no further action at this time, as the commercial use of the Property continues and the current site configuration remains unchanged, provided that sound housekeeping and adequate BMPs for hazardous waste management are implemented. ENCON is unaware of any plans for subsurface development or disturbance to underlying subsurface.

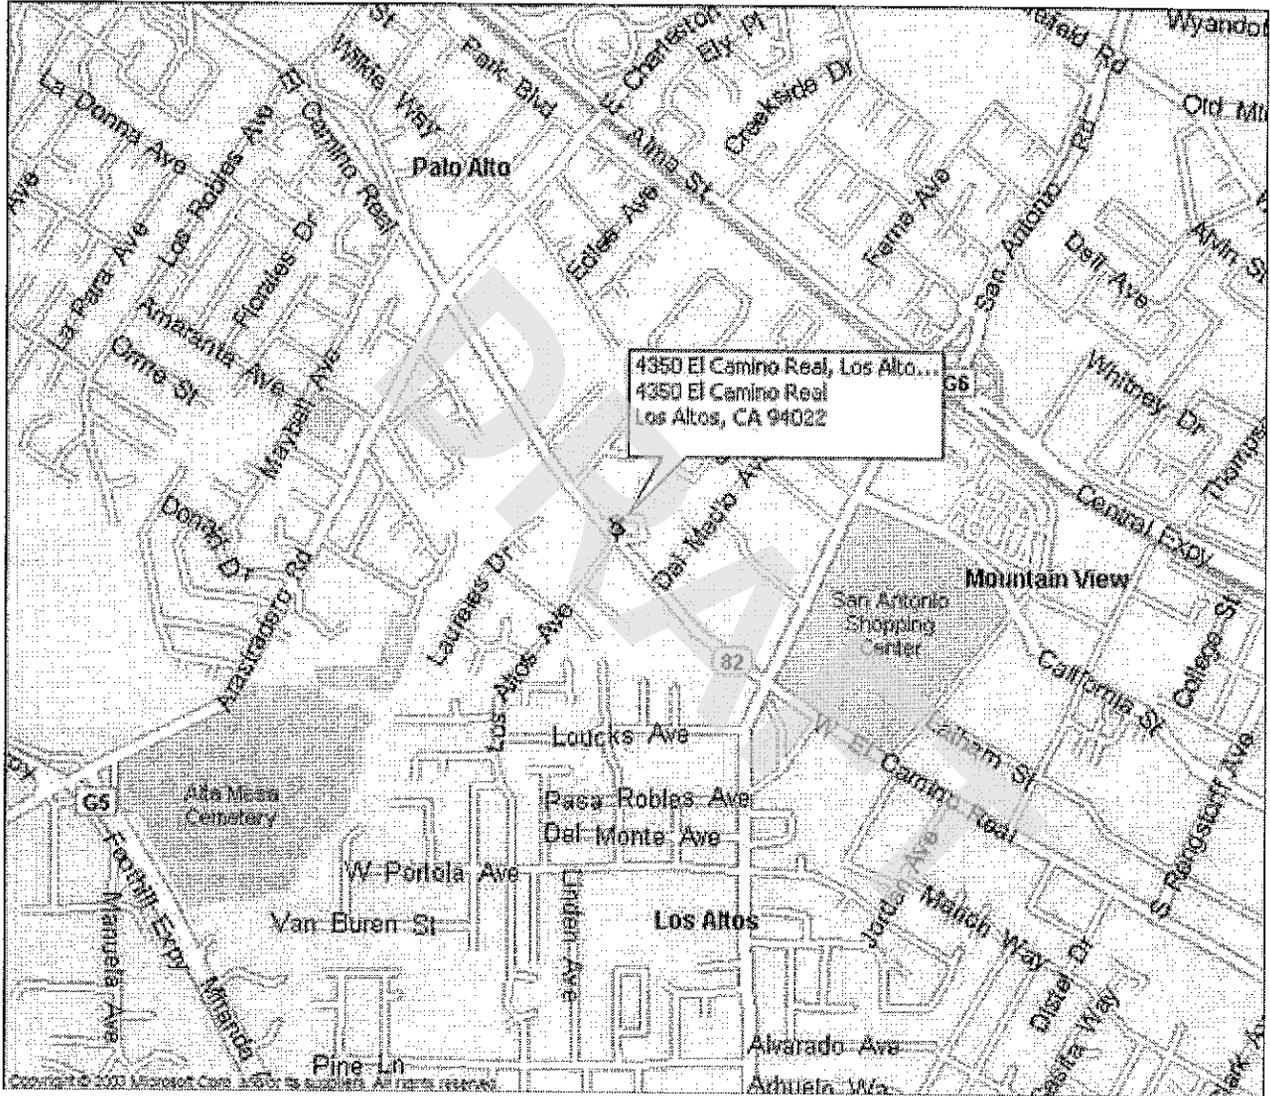

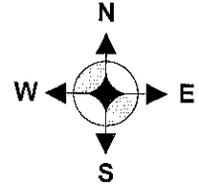

## 8.0 REFERENCES

During the preparation of this Report, a number of sources were contacted, individuals were interviewed, and various federal, state, county or local municipal agencies were consulted. Documentation applicable to the subject property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM Practice E1527-05. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydrogeologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this Report in corresponding sections. Any additional reference sources not cited in the preceding sections in this report, if applicable, are disclosed in this section.

### EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E-1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites or close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators /list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRPFs) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/05/2012 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

TC9460172.2s EXECUTIVE SUMMARY 6

**EXECUTIVE SUMMARY**

*State and tribal leaking storage tank lists*  
 LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 10/17/2012 has revealed that there are 19 LUST sites within approximately 0.5 miles of the target property.

**EXECUTIVE SUMMARY**

SLIC: SLIC Region comes from the California Regional Water Quality Control Board.

A review of the SLIC list, as provided by EDR, and dated 10/17/2012, has revealed that there are 2 SLIC sites within approximately 0.5 miles of the target property.

*State and tribal registered storage tank lists*

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 10/17/2012 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

**EXECUTIVE SUMMARY**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### EDR HIGH RISK HISTORICAL RECORDS

#### EDR Exclusive Records

EDR US Hist Auto Stat. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories or sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
Not reported	415 DEL MEDIO AVE	ENE 1/8 - 1/4 (0.240 mi.)	21	29

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected: Not reported  
Other Groundwater (uses other than drinking water), Soil Waste Oil / Motor / Hydraulic / Lubricating  
Site History: April 2011, employees noted that the freight elevator did not rise up to the floor level of the 2nd floor. Elevator maintenance company came out and added oil to the system and did not note a leak at that time. The release was reported to OES on 4/18/11. In May, the elevator jack was removed. Groundwater entered the elevator sump and is normally pumped out with a sump pump to the sanitary sewer. This sump pump was shut off. The cylinder has been capped with a concrete slurry to stop the flow of groundwater into the elevator pit.

Hazardous Waste Summary:  
Waste code:  
Waste name:

D001  
HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUEZ THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Potential Media Affected: Stored electronically as an E-file  
Other Groundwater (less other than drinking water) located at the northeast corner at the intersection of North San Antonio Road and Sherwood Avenue in Los Altos, California. Original (first generation) site features included a station building, two 10,000-gallon gasoline underground storage tanks (USTs) located near the northwest corner of the Site, and two product dispenser islands. In 1985, the two 10,000-gallon gasoline USTs (second generation) were installed in the southwest corner of the Site. The station building, USTs (second generation), and dispenser islands were removed in 1992, and the Site remains a vacant lot except for a consists primarily of commercial and residential properties. In the Third Quarter 2010 Groundwater Monitoring Report, Sarnatic recommended that the sampling frequency at wells MW-1, MW-2, MW-6, and MW-9 reduced to annually (during Second Quarter groundwater monitoring and sampling events). This was approved by the County of Santa Clara Department of Environmental Health (SCODEH) in a letter dated November 12, 2010.

EDR Inquiry # 3490172.3

Contact: Rigo Iglesias

The complete Sanborn Library collection has been searched by EDR, and fire insurance maps covering the target property location provided by Encon Solutions were identified for the years listed below. The certified Sanborn Library search results in this report can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn) and entering the certification number. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by Sanborn Library LLC, the copyright holder for the collection.

## UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

## Limited Permission To Make Copies

Encon Solutions (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

**RE: Due Diligence Site Assessment Report  
ConocoPhillips Site No. 256115  
4350 El Camino Real  
Los Altos, California  
ATC Project No. 34.75118.3147**

Dear Mr. Boone:

ATC Associates Inc. (ATC) on behalf of ConocoPhillips Company (ConocoPhillips) presents the results of a Due Diligence Site Assessment conducted at the above-referenced site. The purpose of the investigation was to generate a baseline assessment of property conditions at the time of property transfer. The data reported herein were collected on behalf of ConocoPhillips, in general accordance with the Site-Specific Scope of Work (SOW) prepared by Shaw Environmental & Infrastructure, Inc. (Shaw), dated June 27, 2007. The data reported herein were not requested or required by a regulatory agency.

Activities included in the SOW performed are outlined below:

- Preparation of a site specific Health and Safety Plan (HASP);
- Securing permits, if applicable, from the local permitting agency to advance the borings;
- Marking soil boring locations, notification to California's Underground Service Alert and contracting a private utility locating service to locate any identifiable underground utilities in the vicinity of the proposed boring locations;
- Air-knifing borings to five feet below ground surface (bgs) to a diameter at least one inch greater than that of the drilling device;
- Advancement of six exploratory soil borings to total depths of 30 feet bgs utilizing geoprobe drilling equipment;
- Collection of soil samples at approximate five-foot intervals for purposes of logging subsurface conditions, field detection of organic vapors using a photoionization detector (PID), and potential laboratory analysis;
- Collection of groundwater samples for laboratory analysis from borings B-1, B-2, B-3, B-4, B-5 and B-6;
- Waste profiling and disposal coordination (still underway); and
- Preparation of a report summarizing due diligence assessment activities.

## **SITE DESCRIPTION**

The site is an active service station located at 4350 El Camino Real in Los Altos, California. The site's current underground storage tank (UST) system configuration includes two fuel USTs, four dispenser islands and one waste oil UST. Limited background information is included in the SOW prepared by Shaw (Appendix A, attached).

## **BASELINE SITE ASSESSMENT**

### **Field Activities**

On July 17, 18 and 19, 2007, ATC personnel observed the advancement of six soil borings (B-1, B-2, B-3, B-4, B-5 and B-6) in the vicinity of the existing fuel and waste oil USTs and dispensers using geoprobe drilling equipment. Approximate boring locations are shown on attached Figure 1, Site Plan. The borings were advanced to depths of 30 feet bgs. Soil samples were collected at approximate five-foot intervals for lithological description, field screening using a PID, and for possible laboratory analysis. Groundwater was encountered at 28 feet bgs in boring B-1, 29 feet bgs in boring B-2, 28 feet bgs in boring B-4 and 27 feet bgs in borings B-3, B-5 and B-6 during drilling activities. Groundwater samples were collected from borings B-1, B-2, B-3, B-4, B-5 and B-6 after each boring was advanced one to three feet into groundwater.

Upon collecting a soil sample at each depth interval, the soil was visually examined and classified in accordance with the Unified Soil Classification System (USCS). Field PID readings were also used to monitor the soils for volatile organic compound (VOC) vapors. A description of the lithology encountered and PID readings obtained are presented on the boring logs included as Appendix B, attached.

Upon completion of drilling, the borings were backfilled to approximately one foot bgs with bentonite grout. Once the level of the sealing mixture had reached a level of one foot bgs, concrete was emplaced in the borehole, finished flush with the existing surface grade and dyed, if necessary, to match surrounding conditions.

### **Laboratory Analytical Procedures**

Soil and groundwater samples collected during field activities were shipped under chain-of-custody (COC) protocol to Lancaster Laboratories, Inc. (Lancaster) in Lancaster, Pennsylvania. Lancaster is certified through the State of California Department of Health Services Environmental Laboratory Accreditation Program. Soil samples from borings B-1, B-2, B-3, B-4 and B-5 were analyzed for: fuel oxygenates and halogenated volatile organic compounds (HVOC; including benzene, toluene, ethylbenzene and total xylenes [BTEX]) using Environmental Protection Agency (EPA) Method 8260B; total petroleum hydrocarbons (TPH) in the gasoline and diesel range (TPH-GRO and TPH-DRO, respectively) using EPA Method 8015B Modified; and, lead using EPA Method 6010B. The soil sample selected for analysis from boring B-6 was analyzed for: fuel oxygenates and HVOC using EPA Method 8260B; Total TPH, TPH-GRO,

TPH-DRO and TPH-oil range organics (ORO) using EPA Method 8015 Modified; semi-volatile organic compounds (SVOC) using EPA Method 8270C; and cadmium, chromium, lead, nickel and zinc using EPA Method 6010B. Groundwater samples collected from borings B-1, B-2 and B-3 were analyzed for fuel oxygenates and HVOC using EPA Method 8260B and TPH-GRO and TPH-DRO using EPA Method 8015B Modified. Groundwater samples collected from borings B-4 and B-5 were analyzed for fuel oxygenates and HVOC using EPA Method 8260B and TPH-GRO using EPA Method 8015B Modified. The groundwater sample collected for analysis from boring B-6 was analyzed for: fuel oxygenates and HVOC using EPA Method 8260B; Total TPH, TPH-GRO, TPH-DRO and TPH- ORO using EPA Method 8015 Modified; SVOC using EPA Method 8270C; and, cadmium, chromium, lead, nickel and zinc using EPA Method 6010B. Laboratory analytical data for soil and groundwater samples analyzed as part of this assessment are summarized in attached Table 1, Summary of Soil Analytical Data and Table 2, Summary of Groundwater Analytical Data, respectively. The laboratory analytical reports and COC documents are provided as Appendix C, attached.

#### **Waste Disposal**

Investigation derived waste (IDW) generated during the field operations has been temporarily stored onsite pending characterization and disposal. A copy of the waste manifest(s) will be provided under separate cover once the IDW has been profiled and transported to an appropriate disposal facility.

#### **FINDINGS**

The lithology underlying the site generally consists of clay with sand and silt; silt with sand, gravel and clay; and, sand with gravel and silt from the ground surface to approximately 30 feet bgs, the maximum extent of exploration. PID readings ranged from 0.7 to 5 parts per million (ppm). Refer to the edited boring logs in Appendix B for a summary of field observations noted during drilling activities.

As shown in Table 1, laboratory analytical results for the soil samples selected for analysis indicate the following:

- Methylene chloride was detected at a concentration of 0.010 milligrams per kilogram (mg/kg) in the soil sample collected at approximately 25 feet bgs from boring B-6 (B-6d25.0).
- Chromium was detected at a concentration of 188 mg/kg in the soil sample collected at approximately 25 feet bgs from boring B-6 (B-6d25.0).
- Lead was detected at concentrations of 7.40 mg/kg, 6.76 mg/kg, 6.49 mg/kg, 6.09 mg/kg and 2.24 mg/kg in the soil samples collected at approximately 10 feet bgs from boring B-

5 (B-5d10.0) and 25 feet bgs from borings B-3, B-4, B-5 and B-6 (B-3d25.0, B-4d25.0, B-5 and B-6d25.0), respectively.

- Nickel was detected at a concentration of 128 mg/kg in the soil sample collected at approximately 25 feet bgs from boring B-6 (B-6d25.0).
- Zinc was detected at a concentration of 58.0 mg/kg in the soil sample collected at approximately 25 feet bgs from boring B-6 (B-6d25.0).
- No other analytes were detected in excess of their respective laboratory method Limit of Quantitation (LOQ) in any of the soil samples submitted for analysis.

As shown in Table 2, laboratory analytical results for the groundwater samples collected from borings B-1, B-2, B-3, B-4, B-5 and B-6 indicate the following:

- TPH-DRO was detected at a concentration of 1,100 micrograms per liter ( $\mu\text{g/L}$ ) in the groundwater sample collected from boring B-3.
- Chromium was detected at a concentration of 119  $\mu\text{g/L}$  in the groundwater sample collected from boring B-6.
- Nickel was detected at a concentration of 148  $\mu\text{g/L}$  in the groundwater sample collected from boring B-6.
- Zinc was detected at a concentration of 84.6  $\mu\text{g/L}$  in the groundwater sample collected from boring B-6.
- No other analytes were detected in excess of their respective laboratory method LOQ in the groundwater samples submitted for analysis.

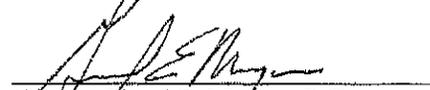

#### **LIMITATIONS**

This report was prepared in general accordance with the Shaw SOW, dated June 27, 2007 and with generally accepted professional environmental consulting practices existing at the time this report was prepared and applicable to the location of the site. It was prepared for the exclusive use of ConocoPhillips for the express purpose of generating a baseline assessment of property conditions. Any re-use of this report for a different purpose shall be at the user's sole risk without liability to ATC. To the extent that this report is based on information provided to ATC by third parties, ATC may have made efforts to verify this third party information, however, ATC cannot guarantee the completeness or accuracy of this information. The data collected during this investigation and summarized in this report represent site conditions at the time field activities were conducted. No other warranties, expressed or implied are made by ATC.

**APPENDIX F**  
**QUALIFICATION OF ENVIRONMENTAL PROFESSIONAL/ LIABILITY INSURANCE**

DRAFT

**Mr. Hyung Kim, PE - Principal Consultant**  
**REA, CEM, CHMM, M.S., LEED-AP**

Mr. Kim oversaw the entire aspects of environmental assessment and consulting/engineering operations, playing a pivotal role in client services, representing the company to potential financial & real estate institutes as a technical marketing director, and took charge of in-house QA/QC management in remedial action design, contamination assessment, hazardous material management and real estate due diligence assessment. With strong educational and professional background in hazardous waste management, environmental regulatory compliance and engineering/assessment planning, he plays a pivotal role in the overall operation of client marketing and environmental project management. He oversees and trains most of the in-house technical staff and directs environmental planning, abatement, engineering, assessment, and remediation projects with assistance from R.G, REA, I.H., CAC, P.E. and other environmental certified professionals.

**Environmental Site Assessment Phase I / Transaction Screen Due Diligence**

He has managed nearly 8,000 ESA projects performed nationwide since 1999, with full responsibility as the Chief Signatory Assessor over QA/QC on subcontractors, in-house staff assessors, engineers and consultants. Projects include mainly industrial and commercial properties, facility compliance audit, NPDES permitting, Clean Air Act and Clean Water Act, RCRA and CERCLA regulatory compliance assessments, Fannie Mae & HUD project due diligence, and many more high-caliber commercial portfolio assessment.

**Phase II Subsurface Investigation & Pollution Characterization**

Co-managed over 150 subsurface investigation in CA, NJ, NY, TX, WA, MD, CO, AZ, with PE, RG and RHG, involving various types of drilling such as geo-probe / direct-push, hollow-stem (limited access to high torque) or solid-stem auger, bucket auger, air rotary or percussion hammer, hydro-punch, limited access drilling, hand-auger, soil vapor probing, etc. Extensively trained in hydrogeology by RHG and RG for southern California region, handled groundwater contour estimation, recharge rate monitoring, surveying, monitoring and extraction wells, including water table wells, upper and lower aquifer characterization wells, vertical profile cluster wells, multiport vapor piezometer wells, multipurpose groundwater and vapor piezometer wells, constructed using PVC, stainless steel.

**Phase III Environmental Site Remediation & Cleanup**

Dodge World, Torrance (2002-2004) – SVE/Carbon Adsorption, Cost \$130K  
Shin Brother Body, L.A. (1997-2005 projecting) – SVE/Air Sparging, Cost \$175K  
Mira Loma Gas Station, Mira Loma, (2002) – SVE, Cost \$75K  
San Pedro Car Wash, San Pedro (2002-2005 projecting) – SVE/Air Sparging/Dual Phase  
Dr. J Cleaner, Sherman Oaks (2001-2004) – DPVE (pilot), Cost \$220K  
Ducanmon Facility in Monrovia – Continuing Soil Vapor Extraction Operation & Maintenance  
San Gabriel Water Quality Authority, representing Baldwin Park Operable Unit as one of responsible parties for San Gabriel Valley NPL Superfund Program Groundwater Well Investigation  
17700 Roscoe, Northridge, CA – Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance

Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.

**Underground Storage Tank/Clarifier Abandonment & Regulatory Closure**

Managed over 50 site abandonment including gas service station, private fueling station, industrial clarifier, from permitting, regulatory compliance, sampling & reporting, degassing/drying/certificate, contract management, AQMD Rule 1166 excavation monitoring via PID and FID.

Closed over 50 UST sites in various cities in Kern, Los Angeles, Riverside, San Bernardino and Orange Counties. Managed four sites (Huntington Park, Gardena, City of Industry, Vernon) of UST abandon in place and subsurface investigation projects upon regulatory preapproval due to structural complication with abandonment via removal. Conducted over 10 industrial pretreatment clarifier closure under County of Los Angeles Department of Public Works jurisdiction entailing plan check, permitting, closure, soil sampling and reporting according to CLDPW enforcement regulation.

#### Asbestos/Lead/IAQ/Mold Assessment & Abatement

1996-2000 managed over 120 public & private abatement projects with CACs, CIH and DHS Inspectors. With hands-on experience from identification of hazardous material thru inspection and survey to actual abatement and disposal management of such wastes including recycling of mercury vapor and PCB ballasts, Mr. Kim has been the key technical and managerial representative in more than 100 public works involving public projects. Prepared IIPP, H&S, Respiratory Protection Plan, QAQC abatement procedures and regulatory compliance. Mold abatement, IAQ inspection with CIH, AQMD permitting of Negative Air Machines, HEPA Vacuum, preparation of abatement work plan, Procedure 5 emergency abatement plan with CAC

#### Architectural/Engineering Due Diligence

Has managed more than 75 ASTM E2018 Property Condition Assessment projects and Probable Maximum Loss (Seismic Evaluation Assessment) calculations in accordance with ASTM E-2026 Estimation of Building Damageability procedures for mainly institutional investors and conduit lenders. Projects include pre-securitization due diligence for Conduit Portfolio, in accordance with Fannie Mae Guidelines and other institutional investment due diligence guidelines.

#### Professional Affiliation / Certification

California Professional Civil Engineer - 75083

General Engineering Contractor "A"

Member of AIChE (American Institute of Chemical Engineers)

Member of EAA (Environmental Assessment Association), Certified Environmental Manager #73547

California Registered Environmental Assessor #07252

Institute of Hazardous Material Management, CHMM Master Level #012554

Cal OSHA Hazwoper Training Certificate

Uniform Fire Code Training for CUPA Inspectors

CUPA Hazardous Waste Inspector Training 8 Hours

UST Inspector Training, CUPA, 8 Hours

---

**John P. Winkler, P.G., REA – Senior Geologist**  
**California Professional Geologist**  
**California Registered Environmental Assessor**

Mr. Winkler has over 18 years of professional experience in the environmental field. He is experienced in the areas of hazardous materials management, Phase I environmental site assessments, underground storage tank closures, Phase II subsurface site assessments, groundwater monitoring, subsurface site assessments, and remedial action projects. He has been responsible for the coordination, scheduling, field work, and management of site assessments and remediation projects.

Mr. Winkler has worked with a diverse group of clientele, including small government agencies, transportation companies, financial institutions, large oil companies, property management companies, industrial companies, and independent business owners.

**Relevant Experience** Mr. Winkler maintains extensive experience in hazardous materials management and geology. At various stages in his career, Mr. Winkler has been involved directly in work plan development, permitting, field work, report writing, project management, and site closure requests and negotiations with regulatory agencies. This experience has given Mr. Winkler effective skills and knowledge in many aspects of the environmental profession. His experience is summarized as follows:

**Hazardous Materials Management**

Prepared emergency response plans for transportation and industrial facilities.  
Scheduled and coordinated hazardous materials handling, storage, and recycling for numerous types of facilities. Developed hazardous waste management plans.  
Completed certification training in hazardous materials management for storage, transportation and disposal practices, emergency response, and fire control.

**Phase I Environmental Assessments**

Conducted Phase I assessments for numerous industrial sites including former and existing dry cleaners, machine shops, automotive repair shops, gasoline stations, and large industrial facilities in California, Nevada, Arizona, Washington, and Oregon. Has reviewed and provided opinions to clients on numerous Phase I ESA's conducted in other states.

**Phase II Subsurface Investigations**

Involved with numerous sites where soil gas surveys were conducted to evaluate volatile organic compounds in soil at shallow depths. Conducted field work, prepared reports, and prepared recommendations for further assessment if warranted.  
Involved with numerous site assessments where drilling, excavation, and trenching were conducted to evaluate contaminants in soil and groundwater. Conducted field work, prepared reports, and prepared recommendations for further assessment or remediation if warranted.  
Involved with groundwater monitoring programs at numerous sites where groundwater contamination was being monitored. Conducted well purging and sampling and prepared reports. Conducted aquifer testing under the direction of Hydrogeologists.

**Remediation Projects**

- Involved with field work, report writing, and project management of in-situ vapor extraction systems of volatile organic compounds in soil. Installed vapor extraction wells; arranged disposal of hazardous materials; and, prepared system monitoring reports.
- Involved with field work, report writing, and project management of free-phase product recovery and groundwater treatment for water treatment systems. Installed groundwater recovery wells; arranged disposal of hazardous materials; and, prepared monitoring reports.
- Involved with field work, report writing, and project management of above ground bioremediation projects with petroleum-contaminated soil. Supervised construction activities; conducted verification sampling; and, prepared closure reports.
- Involved with field pilot testing, report writing, and project management of sites undergoing natural attenuation monitoring. Prepared workplans; supervised monitoring programs; and, prepared reports.

### Industry Experience

- Mr. Winkler has extensive experience in assessment and remediation of oil industry facilities including oil well sumps and oil field sumps, tank farms, bulk terminals, marine terminals, and refineries.
- Mr. Winkler has also developed his expertise in assessment and remediation activities in the transportation industry including bus terminals, air fields, aeronautic manufacturing, historic rail yards, and light rail transportation corridors.
- Mr. Winkler brings additional experience in working with developers, city planning departments, and municipal business redevelopment programs to develop assessment and cleanup plans that promote redevelopment and protect human safety and the environment.

### Education

B.S. Geology, State University of New York at Cortland, 1983

Certificate in Hazardous Materials Management, University of California at Santa Barbara Extension, 1994

### Registrations

California Professional Geologist, No. 7456

California Registered Environmental Assessor, No. 5599

### Professional Training

OSHA CFR 1910.10 Hazardous Waste Operations and annual update training, 1989- 2009

California Certified Volunteer Fire Fighter No. 503540, 1998

Hazardous Materials First Responder Operational CCR Sect. 8574.20, 1998

DOT Hazardous Materials Handling, company-sponsored training, April 1994

Los Angeles Refinery Safety Training, 2001, 2003

First Aid and CPR for the Professional Rescuer, 1997

Standard First Aid and CPR 1989, 1992, 2000, 2002, 2003, 2004

Mike Miller -- REA

**Senior Environmental Assessor**

Mr. Miller has over 15 years of environmental consulting and risk assessment experience, and, in the past, has provided diverse loss environmental consulting services to American International Group (AIG), one of the 10 largest companies in the U.S. His other experiences include evaluating environmental liability, general liability, product liability and fleet liability loss exposures. He also oversaw account portfolios comprised of a broad spectrum of manufacturing facilities, HUDMAP, land developers, pharmaceuticals firms, property management firms, and contractors. In his career as an environmental consultant, Mr. Miller prepared and reviewed Phase I and Phase II reports, generated recommendations regarding liability risk management and risk reduction, provided mold/water intrusion management consulting services, and developed and implement presentations and training programs.

Education and Professional Credentials

M.S. (Biology) University of Southern California, Los Angeles, CA – 1982 -1985.

B.S. (Biology- *Cum Laude*) State University of New York, Buffalo, NY – 1978 - 1982.

California Secondary Education Teaching Credential, 1987.

Certificate: Environmental Auditing, University of California -Irvine, 1989.

Certificate: Toxic & Hazardous Materials Management, UCLA, 1990.

Certificate: OSHA 40-Hr Hazardous Waste Operations & Emergency Response, 1991.

Certificate: AHERA Asbestos Building Inspector / Management Planner, 1988.

Certificate: AHERA Asbestos Contractor Supervisor, 1995.

Certificate: Indoor Air Quality Manager, American Indoor Air Quality Council, 2002.

Certificate: Microbial Remediation Supervisor, American Indoor Air Quality Council, 2002.

Registered Environmental Assessor, REA No. 02651

Registered Environmental Professional, REP No. 2797

Member: American Indoor Air Quality Council

**Mary Osbourne, REA, CEM**  
**Senior Consultant**

Ms. Osbourne has seventeen years of environmental consulting experience, and five years of government agency experience, within the following discipline areas:

- Phase I Environmental Assessments (United States, Mexico, and Europe), in accordance with applicable ASTM standards for Environmental Site Assessments, applicable client standards, or international standards.
- RCRA and non-RCRA Treatment, Storage, and Disposal Facility (TSDF) auditing.
- Multi-media (hazardous waste, hazardous materials, wastewater, stormwater, etc.) compliance audits and regulatory compliance assessments.

**Registrations and Certifications**

- California Registered Environmental Assessor (REA), #02466
- OSHA 40-Hour Health and Safety Training
- Asbestos Hazards Emergency Response Act (AHERA) Building Inspector (inactive at present)

**Experience**

- 2007: Dominion Environmental Consultants, Inc., Phoenix, Arizona.
- 2005-2006: JMK Environmental Solutions, Inc., San Fernando, California; Environmental Manager and Quality Assurance. Responsible for maintaining consistent report quality for 12 junior level staff, proposals, and client management.
- December 2003: Part-time environmental work for OSS (computer recycling company). Tujunga, California, 16 hours per week.
- Sept. 2000 - Nov. 2003: ENVIRON International Corporation, Los Angeles, California.
- Aug. 1989 - Aug. 2000: McLaren Hart, Burbank and Irvine, California.
- Jan. 1984 - Aug. 1989: California Department of Health Services, Toxic Substances Control Division (TSCD).

## Secondary Containment Testing Report Form

*This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.*

### 1. FACILITY INFORMATION

Facility Name: Unocal #256115		Date of Testing: 06/21/17	
Facility Address: 4350 El Camino Real, Los Altos CA 94022			
Facility Contact:	Phone (650)- 941-0244	<input type="checkbox"/> Initial	<input type="checkbox"/> Repair Test
Date Local Agency Was Notified of Testing: 06/09/17		<input type="checkbox"/> 6 Month	<input type="checkbox"/> Other
Name of Local Agency Inspector (if present during testing):		<input checked="" type="checkbox"/> Triennial

# MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

## A. General Information

Facility Name: El Camino Unocal 76 Bldg. No.: \_\_\_\_\_  
 Site Address: 4350 El Camino Real City: Los Altos Zip: 94022  
 Facility Contact Person: Greg Galatolo Contact Phone No.: (650) 941-0244  
 Make/Model of Monitoring System: Gilbarco EMC Date of Testing/Servicing: 11/09/2017

## B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

<b>Tank ID: 12,000 gal. Regular</b> <input checked="" type="checkbox"/> In-Tank Gauging Probe Model: <u>847390-107</u> <input checked="" type="checkbox"/> Annular Space or Vault Sensor Model: <u>794390-420</u> <input checked="" type="checkbox"/> Piping Sump / Trench Sensor(s) Model: <u>794380-208</u> <input type="checkbox"/> Fill Sump Sensor(s) Model: _____ <input checked="" type="checkbox"/> Mechanical Line Leak Detector Model: <u>FE Petro</u> <input type="checkbox"/> Electronic Line Leak Detector Model: _____ <input checked="" type="checkbox"/> Tank Overfill / High-Level Sensor Model: <u>847390-107</u> <input type="checkbox"/> Other (specify equipment type and model in Section E on Page 2)	<b>Tank ID: 12,000 gal. \*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility

**C. Certification** - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; (check all that apply):  System set-up  Alarm history report

Technician Name (print): Chris Bishop Signature:   
 Certification No.: B36744 License No.: 804904  
 Testing Company Name: Confidence UST Services, Inc. Phone No.: (800) 339-9930  
 Site Address: 4350 El Camino Real Los Altos, CA 94022 Date of Testing/Servicing: 11/09/2017

Monitoring System Certification

D. Results of Testing/Serviceing

Software Version Installed: 329.02

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is the audible alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is the visual alarm operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? <i>(Check all that apply)</i> <input checked="" type="checkbox"/> Sump/Trench Sensors; <input type="checkbox"/> Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? <input checked="" type="checkbox"/> Yes; <input type="checkbox"/> No.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? 90 %
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
<input type="checkbox"/> Yes*	<input checked="" type="checkbox"/> No	Was liquid found inside any secondary containment systems designed as dry systems? <i>(Check all that apply)</i> <input type="checkbox"/> Product; <input type="checkbox"/> Water. If yes, describe causes in Section E, below.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Is all monitoring equipment operational per manufacturer's specifications?

\* In Section E below, describe how and when these deficiencies were or will be corrected.

**Monitoring System Certification**

**F. In-Tank Gauging / SIR Equipment:**  Check this box if tank gauging is used only for inventory control.  
 Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all tank gauging probes visually inspected for damage and residue buildup?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system product level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was accuracy of system water level readings tested?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all probes reinstalled properly?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

**G. Line Leak Detectors (LLD):**  Check this box if LLDs are not installed.

Complete the following checklist:

<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? (Check all that apply) Simulated leak rate: <input checked="" type="checkbox"/> 3 g.p.h.; <input type="checkbox"/> 0.1 g.p.h.; <input type="checkbox"/> 0.2 g.p.h.
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Was the testing apparatus properly calibrated?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No* <input type="checkbox"/> N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
<input type="checkbox"/> Yes	<input type="checkbox"/> No* <input checked="" type="checkbox"/> N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No*	Were all items on the equipment manufacturer's maintenance checklist completed?

\* In the Section H, below, describe how and when these deficiencies were or will be corrected.

### UST Static Pressure Performance Test Report Form

Permit Number:	Test Company:	Confidence UST Services, Inc.	
Confirmation:	Technician:	Austin Sterling	
Site Name: El Camino Unocal 76	Certification Number	Expiration Date	
Site Address: 4350 El Camino Real	District: BAAQMD	NA	
City/Zip: Los Altos, CA 94022	Franklin (Healy): 7611483707	10/24/2019	
Date/Time of Test: 12/28/2017 at 9:00 am	Veeder-Root: B45438	10/16/2019	

TEST INFORMATION	
Number of nozzles: 14	Are the tanks manifolded? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Phase I vapor recovery system executive order (as referenced on Permit to Operate)	VR-102
Phase II vapor recovery system executive order (as referenced on Permit to Operate)	VR-204
Nitrogen introduction point	<input checked="" type="checkbox"/> Phase I vapor coupler <input type="checkbox"/> Phase II vapor riser
Pressure measuring device	<input type="checkbox"/> incline manometer <input checked="" type="checkbox"/> digital manometer <input type="checkbox"/> mechanical gauge
Calibration date for pressure measuring device (must be within 90 days of the test)	10/29/2017
Ending value for digital manometer drift test if applicable (must be 0.01 in. w.c. or less)	0.00"
Initial tank ullage pressure (vent if over 0.5 in. w.c.)	0.00"
Nitrogen introduction flow rate, F (must be between 1 and 5 CFM)	1.6 CFM
Calculated ullage fill-time, $t_2$ ( $t_2 = V / 1522 \times F$ )	4.09 min
Actual fill-time	3.04 min
Number of hoses with over 100 ml (balance hoses must be drained prior to testing)	12

TANK INFORMATION					
Tank No.	1	2	3	4	All
Product Grade	Regular	Super			All
Actual tank capacity (gallons)	12,000	12,000			24,000
Gasoline volume (gallons)	7,148	6,990			14,138
Ullage, V (gallons)	4,905	5,063			9,968
If tanks not manifolded, # of nozzles					

2 IN. W.C. STATIC PRESSURE TEST					
Test No.	1	2	3	4	5
Start time	8:10 am				
Initial Pressure, inches of water column	2.00"				
Pressure at one minute, in. w.c.	2.00"				
Pressure at two minutes, in. w.c.	1.99"				
Pressure at three minutes, in. w.c.	1.99"				
Pressure at four minutes, in. w.c.	1.98"				
Pressure at five minutes, in. w.c.	1.97"				
Allowable minimum pressure, in. w.c.	1.82"				
Pass / Fail (enter "GF" for gross failure)	Pass				

I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.

## Leak Rate of Drop Tube/Drain Valve Assembly and Leak Rate of Drop Tube Overflow Protection Devices and Spill Container Drain Valves Report Form

Permit Number:	Confidence UST Services, Inc.	Technician:	Austin Sterling
Confirmation:	Site Name: El Camino Unocal 76	Certification Number	BAAQMD
Site Address: 4350 El Camino Real	City/Zip: Los Altos, CA 94022	District:	Franklin (Healy): 7611483707
Date/Time of Test:	12/28/2017 at 9:00 am	Expiration Date	10/24/2019
			10/16/2019

**DROP TUBE DRAIN VALVE AND OVERFILL PROTECTION DEVICE PRESSURE INTEGRITY TEST**

Pressure measuring device:  Straight Drop Tube<sup>1</sup>  digital manometer

Calibration date for pressure measuring device (must be within 180 days of the test)  Drop Tube with an Overflow Protection Device<sup>2</sup>

Ending value for digital manometer drift test if applicable (must be 0.01 in. w.c. or less)  mechanical gauge

Drop Tube Drain Valve Pressure Test:		Drop Tube Overflow Device Pressure Test		"Corrected" Overflow Device Leak Rate	
Flow rate 80 ml/min		Flow rate 200 ml/min		Minus	Equals
Tank	Grade	Time to reach 2 in. w.c. at 80 ml/min.	Drain valve leak rate <sup>3</sup>	Final Pressure	Final pressure
1	Regular	7.6 sec	20 ml	in. w.c.	in. w.c.
2	Super	8.2 sec	20 ml	2.04"	ml/min.
3				2.12"	ml/min.
4					ml/min.

**NOTES:**

<sup>1</sup> A straight drop tube must be tested with a bladder in place and using a flow rate of 80 ml/min.

<sup>2</sup> The bladder section of TP-201.1D may be skipped if the entire drop tube passes with a leak rate below 80 ml/min.

<sup>3</sup> Leak Rate = nitrogen flow rate needed to maintain a constant pressure (at least 2 in. w.c.) for 30 seconds.

I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.

Required Items for Conducting TP-201.4

Reference # :		Test Company:	Confidence UST Services, Inc.	
AQMD # :		Technician:	Austin Sterling	
Site Name: El Camino Unocal 76		Certification Number	Expiration Date	
Site Address: 4350 El Camino Real		District:	BAAQMD	NA
City/Zip: Los Altos, CA 94022		VST:	7611483707	10/24/2019
Date/Time of Test: 12/28/2017 at 9:00 am		Veeder-Root:	B45438	10/16/2019

1. The dispenser shall not be activated. If the dispenser is activated, gasoline in the fuel hose may be pressurized when engaging the fuel lever.
2. Prior to inserting the VST EVR nozzle into the fillpipe of the Dynamic Back Pressure Test Unit in step 7.1 of TP-201.4, completely drain any gasoline in the nozzle and vapor path of the hose. The dispenser must be deactivated and the nozzle lever and bellows shall be fully engaged.
3. When flowing nitrogen per step 7.1.2, fully engage the nozzle lever to allow vapor flow from the nozzle to the UST.

Required Steps For Each Nozzle Tested	Y/N
1. Is dispenser deactivated?	Yes
2. Is nozzle and hose completely drained of gasoline prior to inserting nozzle into Dynamic Back Pressure Unit?	Yes
3. Is nozzle lever fully engaged when conducting flow test?	Yes

*I declare, under penalty of perjury under the laws of the state of California that based on information and belief formed after reasonable inquiry, the statements and information provided in this document are true, accurate, and complete.*

# **APPENDIX H**

## **QUALIFICATIONS**

DRAFT

## **Megan Nolet – Project Manager, Due Diligence**

---

BA- Environmental Studies, Brown University, Providence, RI

Ms. Nolet provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Assessments, Environmental Transaction Screens, Regulatory Database Review, and Historical Records Review.

Project experience for Ms. Nolet includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Environmental Transaction Screens (ETS)
- Regulatory Database Review
- Historical Records Review

In addition, prior to joining the environmental consulting industry, Ms. Nolet spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

## **Katie Hindt – Client Manager**

---

B.A. – Environmental Studies, University of California, Santa Cruz

Registered Environmental Property Assessor (REPA) #528528

Ms. Hindt has over 10 years of experience in the environmental service industry and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase 1 Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Records Research with Risk Assessments, Regulatory Database Reviews and Historical Records Reviews. She has completed assessments on a variety of residential, agricultural, commercial and industrial sites. Ms. Hindt is familiar with all aspects of Due Diligence Property Assessments and the requirements of many reporting standards including, ASTM, AAI, HUD and client-specific formats.

Project experience for Ms. Hindt includes:

- Phase 1 Environmental Site Assessments (Phase 1 ESA)
- Environmental Transaction Screens (ETS)
- Environmental Transaction Analyses (ETA)
- Records Search with Risk Assessment (RSRA)
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup

As a Client Manager, Ms. Hindt provides senior author services and client management. Additional responsibilities include managing projects and staff mentorship.

In addition, prior to joining the environmental service industry, Ms. Hindt spent four years studying a broad range of environmental disciplines including: National environmental law, policy and economics, restoration ecology, California environmental history and California freshwater policy/issues.

Project No.: 118-106-1

Prepared For: Mr. Mike Campbell  
**DAVID J. POWERS & ASSOCIATES**  
1871 The Alameda, Suite 200  
San Jose, California 95126

Re: 4350 El Camino Real  
Los Altos, California

Dear Mr. Campbell:

Per your request, Cornerstone Earth Group (Cornerstone) is pleased to present this letter summarizing our review of the previously prepared Phase I Environmental Site Assessment report for 4350 El Camino Real in Los Altos, California (Site). This letter was prepared for David J. Powers & Associates in accordance with our March 19, 2019 agreement.

We understand that David J. Powers & Associates is preparing an Initial Study pursuant to the California Environmental Quality Act (CEQA) and City of Los Altos requirements for the proposed project that includes demolition of an existing gasoline station and construction of a five-story residential building above two levels of below-grade parking. In total, the project includes 45 residences. A driveway onto El Camino Real would provide vehicular access to the parking garage.

## Documents Reviewed

This letter briefly summarizes selected information obtained from the following report:

- AEI Consultants. October 31, 2018. *Phase I Environmental Site Assessment, 4350 El Camino Real, Los Altos, California (Draft)*.

This letter additionally summarizes recommended mitigation measures that are based on the findings of the Phase I ESA. Please refer to the Phase I ESA report for additional details pertaining to the Site.

## Site History

The Site reportedly was historically used for agricultural purposes. A portion of a residence also was historically located on-Site. The existing gasoline station with vehicle service bays was constructed in 1968.

## Potential Concerns Identified by AEI

Based on the past agricultural use of the Site, AEI indicated that there is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on-Site, and that the Site has been impacted by the use of such agricultural chemicals.

Two 12,000 gallon gasoline underground storage tanks (USTs) and a 550 gallon waste oil UST currently are present on-Site, which were installed in 1990. The USTs are double-walled, fiberglass-reinforced plastic and equipped with leak-detection systems. The product piping for the fuel USTs is double-walled, fiberglass-reinforced plastic and equipped with a leak-detection system. AEI stated that the storage of petroleum products in USTs at the Site is considered a Recognized Environmental Condition (REC)<sup>1</sup>

Three below-ground hydraulic lifts, presumably installed in 1968, also were identified to be present at the Site. Based on their age, AEI noted that a potential exists that the hydraulic fluid within the lift systems previously contained polychlorinated biphenyls (PCBs). The hydraulic lifts were identified as a REC.

During AEI's on-Site reconnaissance, evidence of significant staining associated with leakage from the containers was observed within the auto repair bays and the exterior hazardous waste storage area. No storm drains or other subsurface conduits were located in the immediate vicinity of the stains. Based on the presence of the staining, the length of time hazardous materials have been used on the Site, and the lack of secondary containment, AEI noted that that a release to the subsurface may have occurred in these areas.

An oil-water separator reportedly was formerly present on-Site. AEI stated that there is a potential that oils or other petroleum-based materials present in the waste water stream could impact the subsurface of the Site if the separator or drain system was compromised. The size, age and location of the former separator were not identified in documents reviewed by AEI.

### **Former USTs**

In October 1990, two 10,000 gallon gasoline steel USTs and a 550 gallon waste oil steel UST (installed in 1969) were removed from the Site. The current USTs were later installed at the same locations as the former USTs. Analyses of soil samples collected during the UST removal activities identified elevated concentrations of total petroleum hydrocarbons as gasoline (TPHg) below the USTs and additional soil excavation subsequently was performed. In March 1991, three groundwater monitoring wells were installed. A fourth monitoring well (MW4) was installed near the former USTs in 1992. In groundwater from MW-4, TPHg and BTEX<sup>2</sup> compounds were detected at up to 4,600 µg/L, 430 µg/L, 700 µg/L, 110 µg/L and 1,800 µg/L, respectively.

A temporary soil vapor extraction system was operated for a few weeks in 1992, and a groundwater extraction system was operated for 8.5 hours in 1992. Residual contaminant concentrations in soil were noted as follows: 1,900 mg/kg TPHg, 6.4 mg/kg TPH as diesel (TPHd), 1.7 mg/kg benzene, 68 mg/kg toluene, 220 mg/kg ethylbenzene and 33 mg/kg xylenes.

---

<sup>1</sup> As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

<sup>2</sup> Benzene, toluene, ethylbenzene and xylenes

The Water Board's Tier 1 Environmental Screening Levels (ESLs)<sup>3</sup> for TPHg, TPHd and BTEX compounds are 100 mg/kg, 260 mg/kg, 0.025 mg/kg, 3.2 mg/kg, 0.43 mg/kg and 2.1 mg/kg respectively. Thus, some of the detected analyte concentrations exceed the ESLs.

During the most recent four sampling events (in 1993 and 1994), TPHg and BTEX compounds were not detected in groundwater from wells MW1, MW2 or MW3. Methyl tertiary-butyl ether (MTBE) was detected at up to 60 µg/L. Groundwater from well MW4 was last sampled in October 1992; TPHg and BTEX compounds were detected at 58 µg/L, 1.1 µg/L, 3.8 µg/L, 1.4 µg/L and 11 µg/L, respectively. For comparison, the Water Board's Tier 1 ESLs for these constituents in groundwater are 100 µg/L, 0.42 µg/L, 40 µg/L, 3.5 µg/L and 20 µg/L, respectively. The ESL for MTBE in groundwater is 5 µg/L.

In 1996, the Santa Clara Valley Water District (SCVWD<sup>4</sup>) issued a case closure letter stating that based on the available information, including the current land use, that no further action related to the UST release was required. AEI identified the closed leaking underground storage tank (LUST) case as a Controlled Recognized Environmental Condition (CREC)<sup>5</sup>.

### **Soil and Groundwater Sampling in 2007**

In 2007, ATC reportedly advanced six soil borings near the existing gasoline and waste oil USTs, as well as the fuel dispensers. No TPHg, TPHd, MTBE or BTEX were detected in any of the soil samples collected. Similarly, these analytes also were not detected in the collected groundwater samples, with the exception of TPHd at 1.1 mg/L.

---

### **Recommended Mitigation Measures**

Based on our review of the provided Phase I Environmental Site Assessment report by AEI (2018), Cornerstone recommends the following mitigation measures:

#### **Agricultural Use:**

The Site historically was used for agricultural purposes. Pesticides may have been applied to crops in the normal course of farming operations. Residual pesticide concentrations may remain in on-Site soil. If elevated concentrations of agricultural chemicals are present, mitigation or soil management measures may be required during construction/earthwork activities.

- Prior to conducting earthwork activities at the Site, soil sampling shall be performed to evaluate if agricultural chemicals (*i.e.*, organochlorine pesticides and associated metals including lead and arsenic) are present.

---

<sup>3</sup> Environmental Screening Levels (San Francisco Bay, Regional Water Quality Control Board, January 2019) are used to screen sites for potential human health concerns where releases of hazardous chemicals have occurred. ESLs are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical in soil at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

<sup>4</sup> Oversight responsibility for investigations and clean-up of releases from USTs was transferred from the SCVWD to the County Department of Environmental Health (DEH) in 2004.

<sup>5</sup> A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls or restrictions.

## **Underground Storage Tanks**

Two gasoline USTs and one waste oil UST are present at the Site, along with fuel dispensers and below ground piping.

- Prior to redevelopment of the Site, the USTs and associated piping and dispensers shall be removed. The removal activities shall be coordinated with the Santa Clara County DEH and Fire Department. In accordance with the requirements of these agencies, soil quality below the USTs, piping and dispensers shall be evaluated via the collection of soil samples and laboratory analyses.

## **Hydraulic Lifts**

Several below ground hydraulic lifts are present within vehicle service bays.

- Prior to redevelopment of the Site, each of the below ground lift casings and any associated hydraulic fluid piping and reservoirs shall be removed and properly disposed. An Environmental Professional shall be retained to observe the removal activities and, if evidence of leakage is identified, soil sampling and laboratory analyses shall be conducted.

## **Facility Closure**

As part of the facility closure process for occupants that use and/or store hazardous materials, the DEH and/or Fire Department typically require that a closure plan be submitted by the occupant that describes required closure activities, such as removal of remaining hazardous materials, cleaning of hazardous material handling equipment, decontamination of building surfaces, and waste disposal practices, among others.

- Facility closure shall be coordinated with the Fire Department and DEH to ensure that required closure activities are completed prior to redevelopment of the Site.

## **Asbestos and other Hazardous Building Materials**

Due to the age of the on-Site structures, building materials may contain asbestos. Because demolition of the buildings is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable asbestos containing building materials prior to building demolition or renovation that may disturb these materials.

- Prior to issuance of a demolition permit, an asbestos survey shall be conducted and identified ACMF shall be managed and/or removed in accordance with Bay Area Air Quality Management District (BAAQMD) and NESHAP guidelines. Pursuant to BAAQMD regulations, a BAAQMD job number "J#" shall be applied for and obtained prior to demolition.

Some components encountered as part of a building demolition waste stream may contain hazardous materials. Materials that may result in possible risk to human health and the environment when improperly managed include lamps, thermostats, and light switches containing mercury; batteries from exit signs, emergency lights, and smoke alarms; lighting

ballasts which contain PCBs; and lead pipes and roof vent flashings. Demolition waste such as fluorescent lamps, PCB ballasts, lead acid batteries, mercury thermostats, and lead flashings have special case-by-case requirements for generation, storage, transportation, and disposal.

- Universal wastes, lubrication fluids, refrigerants and other potentially hazardous building materials shall be removed before structural demolition begins. Before disposing of any demolition waste, the demolition contractor shall determine if the waste is hazardous and ensure proper disposal of waste materials.

### **Lead-Based Paint and Termite Control Pesticides**

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the building, lead-based paint may be present.

- The removal of lead-based paint is not required prior to building demolition if the paint is bonded to the building materials. However, if the lead-based paint is flaking, peeling, or blistering, it shall be removed prior to demolition. In either case, applicable OSHA regulations shall be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris containing lead shall be disposed appropriately.

Soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. Lead and/or pesticides often are identified in soil near old residence, such as those historically located on a portion of the Site.

- Prior to redevelopment of the Site, shallow soil at the former residence location shall be evaluated for the possible presence of lead and organochlorine pesticides via the collection of soil samples and laboratory analyses.

### **Site Management Plan and Regulatory Agency Oversight**

Based on the Site history and data obtained to date, remedial measures may be required to manage impacted soil and groundwater, and to limit potential health risks to future Site occupants and/or construction workers. The need for remedial measures is typically determined based on an evaluation of potential human health risks, which can vary based on the type of planned development and the potential for exposure to identified contaminants. The sampling recommended above will assist in further evaluating Site conditions.

- A Site Management Plan (SMP) and Health and Safety Plan (HSP) for the proposed demolition and redevelopment activities shall be prepared by an Environmental Professional. The purpose of these documents will be to establish appropriate management practices for handling impacted soil, soil vapor and groundwater or other materials (such as the reported former oil-water separator) that may potentially be encountered during construction activities. The SMP also shall provide the protocols for accepting imported fill materials<sup>6</sup> and protocols for sampling of in-place soil to facilitate profiling of the soil for appropriate off-Site disposal or reuse.

---

<sup>6</sup> The DTSC's October 2001 Clean Fill Advisory provides useful guidance on evaluating imported fill.

- If the sampling recommended in the above sections identifies contaminants at concentrations exceeding applicable published residential screening levels<sup>7</sup>, appropriate mitigation measures shall be implemented under oversight from an appropriate regulatory agency (e.g., DEH, Water Board or California Department of Toxic Substances Control [DTSC]). All sampling shall be performed by an Environmental Professional following commonly accepted sampling protocols.

Based on prior sampling data, residual petroleum hydrocarbon concentrations resulting from the prior USTs (removed in 1990) may remain in on-Site soil and/or groundwater at concentrations exceeding published screening levels.

- Because residential use of the Site is proposed, the DEH shall be contacted to evaluate if any further mitigation measure will be required to facilitate residential development of the Site. Any required mitigation measures shall be described in the SMP or appropriate corrective action/risk management plan (e.g., remedial action plan [RAP], removal action workplan [RAW], etc.).

### Limitations

Cornerstone performed this investigation to support David J. Powers & Associates in the evaluation of the referenced Site. Findings presented in this letter are based on selected, readily available information. This study is inherently limited because findings are developed based on information obtained from others. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from information published by others. Cornerstone reviewed and relied on the information presented in the provided report and cannot be responsible for its accuracy. This letter, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

We thank you for this opportunity to work with you on this important project. Should you have any questions, please contact us at your convenience.

Sincerely,

**Cornerstone Earth Group, Inc.**

Stason I. Foster, P.E.  
Senior Project Engineer

Kurt M. Soenen, P.E.  
Principal Engineer

<sup>7</sup> For example, those published by the Water Board, DTSC and US EPA. Note that naturally occurring background concentrations of some metals, such as arsenic, amongst others, in soil may exceed their respective screening levels. Regulatory agencies generally do not require cleanup of soil to below background concentrations. Thus, concentrations of metals also should be compared to regional published background concentrations to establish if mitigation is warranted.
