Project Title: LandSmart Grazing Program for Community Resilience at Ya-Ka-Ama

Project Applicant: Gold Ridge RCD

Project Location - Specific:

7465 Steve Olson Lane

Project Location - City: Forestville

Project Location - County: Sonoma

Description of Nature, Purpose and Beneficiaries of Project:

The proposed project will utilize contracted prescribed herbivory crews to reduce vegetation fuels on the Ya-Ka-Ama property. The Project site includes a total of approximately 10 acres of non-native shrub and California Annual and Perennial Grassland landscape. A mixture of prescribed herbivory, hand work, brush management through mechanical treatment with mastication, and adaptive management will be employed in the project area.

Name of Public Agency Approving Project: _____

Name of Person or Agency Carrying Out Project: _____

Exempt Status: **(check one):**

- Ministerial (Sec. 21080(b)(1); 15268);
- Declared Emergency (Sec. 21080(b)(3); 15269(a));
- Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- Categorical Exemption. State type and section number: 15304 Minor Alterations to Land
- Statutory Exemptions. State code number: _____

Reasons why project is exempt:

Fuel management activities within 30 feet of structures to reduce the volume of flammable vegetation, provided that the activities will not result in the taking of endangered, rare, or threatened plant or animal species or significant erosion and sedimentation of surface waters. This exemption shall apply to fuel management activities within 100 feet of a structure if the public agency having fire protection responsibility for the area has determined that 100 feet of fuel clearance is required due to extra hazardous fire conditions..

Project Title: LandSmart Grazing Program for Community Resilience at Ya-Ka-Ama

Project Applicant: Gold Ridge Resource Conservation District

Project Location: 7465 Steve Olson Lane

Project Location – City: Forestville

Project Location – County: Sonoma

Description of the Nature, Purpose and Beneficiaries of Project: The proposed project will utilize contracted prescribed herbivory crews to reduce vegetation fuels on the Ya-Ka-Ama property. The Project site includes a total of approximately 10 acres of non-native shrub and California Annual and Perennial Grassland landscape.

A mixture of prescribed herbivory, hand work, brush management through mechanical treatment with mastication, and adaptive management will be employed in the project area. The removal of this woody vegetation is necessary to improve overall health and vigor of the project area. Shrubs and vines are that are considered invasive, or undesirable will be removed. Target nonnative shrubs shall be cut flush with the ground surface, resulting in a stump that is no more than two inches in height. No grubbing of root systems or any other type of soil disturbance shall occur as part of these activities. Miscellaneous debris can be left on the ground as long as it does not impact the growth of native vegetation and/or does not impact land management.

- Prescribed herbivory (also known as “targeted grazing” [ASI 2006, Macon 2019]) is the use of domestic livestock to accomplish specific and measurable vegetation management objectives. Those would include things like removing biomass (fine fuel loads), reducing populations of specific plant species, slowing the re-establishment of shrubs on burned or mechanically thinned sites, and improving plant community structure for wildlife habitat values.
- Mastication involves the use of a large, mechanized device for chopping and is used in areas with shrubs and trees to break up the fuel pattern and decrease combustibility by placing fuels on the ground.
- Hand work is defined as the physical act of felling and removing targeted trees, by hand and on foot only, i.e., without the aid of any type of vehicle.
- Adaptive management means effectiveness or validation monitoring after application of a treatment performed to the extent feasible, recognizing fiscal constraints, the need for ongoing access to property, and staff availability.
