

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Cache Creek Mobile Home Estates Consolidation Project

Lead Agency: Konocti County Water District

Contact Name: Frank Costner

Email: kcwd@mchsi.com

Phone Number: (707) 994-2561

Project Location: Clearlake

Lake

City

County

Project Description (Proposed actions, location, and/or consequences).

The project would provide safe drinking water distribution by Konocti County Water District to the Cache Creek Mobile Home Estates in Clearlake. The project is the installation of an 8-inch PVC underground water pipeline for approximately 3,420 feet under Dam Road to connect the Cache Creek Mobile Home Estates to the KCWD water distribution system. The new pipeline would be installed in Dam Road from the Cache Creek Mobile Home Estates entrance west to the Dam Road/Konocti Avenue intersection. Continuing west beyond Lake Street, the project would replace an existing 4-inch diameter pipe in Dam Road with a new 8-inch diameter pipe. The pipeline would be installed by open-trenching aligned through the existing asphalt surface in Dam Road. The water pipeline would be placed 10 feet horizontally away from an existing sewer pipeline, which is also located within the Dam Road alignment. The trench depth would be approximately 46 inches and the width approximately 20 inches. Excavation and other construction activities would be limited to the existing roadway corridor.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Because special-status species occur in the vicinity, a pre-construction survey for special-status species will be performed by a qualified biologist to ensure that special-status species are not present. If construction activities would occur during the nesting season, a pre-construction survey for the presence of special-status bird species or any nesting bird species will be conducted by a qualified biologist within 500 feet of proposed construction areas.

Because cultural resources exist in the vicinity, the following mitigation measures will be implemented: worker awareness training; archaeological monitoring plan, plan for inadvertent discovery or historical and archaeological resources and of human remains.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No major controversy identified. No issues raised by agencies or public to date.

Provide a list of the responsible or trustee agencies for the project.

California Dept. of Water Resources
Central Valley Regional Water Quality Board
