Appendix E

Attachment 1

Description of Nature, Purpose and Beneficiaries of Project:

This critical "Gap Closure" project on South 99W (formerly Old SR 99) from Tehama-Glenn County border and extends north to Corning City limits; a total of 7.2 miles of improvements within the R/W. Pavement rehabilitation includes Cold-in-Place Recycling and a Hot Mix overlay to existing grade. The project also updates pavement delineation and reflective markers. 99W (Historic SR 99) parallels I-5, is the adopted I-5 alternate detour route and has an ADT of 4000 with 22% trucks. The 99W corridor is paramount to the local and State network as it facilitates travel, goods movement, and emergency services. This section of the corridor relieves I-5 congestion funneling commercial traffic from I-5 to South Avenue Truck Plaza, the midpoint between the Ports of LA/Long Beach and Portland, Oregon. This critical facility is used for oversize permitted loads due to low overcrossings on I-5. The roadway is structurally deficient with a PCI of 39 for half the project and a 66 PCI (at risk) for the remainder of the roadway.
