1.0 SUMMARY

Denley Investments & Management (Client) retained Environmental Solutions (ES) to perform a Phase I Environmental Site Assessment (ESA) of the approximately 0.172-acre site (7,500-square feet) at 6362 Through 6366 Hollywood Boulevard, in the Hollywood community of the City of Los Angeles, in the County of Los Angeles, California, 90028 referred to herein as the "subject property."

ES has conducted this Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the subject property. Any exceptions to or deletions from this practice are described in Section 2.2 of this report. This report also meets the requirements of All Appropriate Inquiries as defined in CERCLA 42, U.S.C. 9601(35)(B). The enclosed report and opinion are based on the intent to finance the subject property. We understand that you will rely on this opinion in connection with such purposes.

This assessment has revealed no evidence of recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, or de minimis conditions in connection with the subject property. Based on our findings, no further assessment appears warranted at this time.

Findings, opinions, and recommendations for the following conditions are discussed in this report: possible asbestos containing materials are discussed in Section 6.1; and the possible presence of lead based paint is discussed in Section 6.2. Further investigation of these items does not appear to be necessary at this time.

2.0 INTRODUCTION

2.1 Definitions

To assist the reader with the interpretation of this report, ES would like to provide the following definitions of significant ESA terminology as defined by ASTM E1527-13.

Recognized environmental condition

A recognized environmental condition is defined as, "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a Property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Historical recognized environmental condition

A *historical recognized environmental condition* is defined as, "a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, Property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Controlled recognized environmental condition

A *controlled recognized environmental condition* is defined as, "a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances or petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*)."

De minimis condition

A *de minimis condition* is defined as, "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *recognized environmental conditions* nor *controlled recognized environmental conditions*."

Potential environmental concern

A *potential environmental concern* is defined in ASTM E1528-06 as "the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or the threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water or surface water of the property." According to ASTM E1528-06, this term includes hazardous substances or petroleum products that are also stored and used under conditions in compliance with environmental laws.

2.2 Purpose and Scope

A Phase I ESA is intended to provide a brief description of the subject property, its location and surroundings and to identify, to the extent feasible, associated *recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental condition, and de minimis conditions* associated with the subject property or surrounding land use and to create a list of the potential human and environmental receptors. The protocol followed for this assessment is in conformance with the requirements of All Appropriate Inquiries as defined in CERCLA 42, U.S.C. 9601(35)(B) and the American Society for Testing and Materials Standard Practice for Environmental Site Assessment for Commercial Real Estate Transactions, ASTM Standard E1527-13. Any exceptions are noted in Section 2.2 – Limiting Conditions and Methodology Used. ES understands that this ESA will be used by Denley Investments & Management to perform due diligence with respect to environmental conditions at the subject property.

2.3 Limitations, Exceptions and Methodology of Assessment

Due care was taken during the investigation process, but a Phase I ESA cannot eliminate uncertainty about a subject property's potential for Environmental Conditions. It should be noted that all Phase I ESAs are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. ES accepts no liability for hidden conditions, variations in composition of materials and identification of materials not normally found in construction use. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surface observations. ES has relied on one or more documents developed by other parties and is not liable for any conclusions drawn using these sources if their findings or procedures were erroneous. Additionally, the passage of time may result in a change in the environmental characteristics at this subject property and surrounding sites.

The scope of work for this report did not include testing of electrical equipment for the potential presence of polychlorinated biphenyls or the collection of other environmental samples. The scope of work did not include a detailed assessment of natural hazards such as naturally occurring asbestos, arsenic, radon gas or methane gas, an assessment of the potential presence of radionuclides, an assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, or the presence of endangered species or wildlife habitats. The scope of work for this report did not include an assessment of the environmental compliance status of the subject property, the businesses operating at the subject property, or a health-based risk assessment. The scope of work for this report did not include any wetland studies, indoor air quality assessment, or vapor intrusion assessment.

Our professional services have been performed, our findings obtained and our recommendations prepared in accordance with customary principles and practices in the field of environmental science and engineering. The subject property boundaries and other drawings have been compiled from the best available recorded information and have not been verified by a field survey and may therefore vary from actual conditions.

All of the public areas and mechanical spaces throughout the entire subject property were visually inspected along with representative tenant suites. ES attempted to access all tenant suites but was unable to due to privacy concerns. The suites not inspected were limited to general office uses. It is the opinion of ES that the ability to identify conditions indicative of releases or threatened releases has not been hampered by the lack of the visual inspection in these suites.

2.4 Data Gaps

In accordance with the ASTM standard, an attempt to confirm the history and use of the subject property was performed from the present back to when the subject property was first developed with any structures or was used for residential, agricultural, commercial, industrial or governmental purposes. Multiple historical sources were consulted to fill in any data gaps dating back to 1894, the first reasonably available information. Information from the subject property owner representative, Mr. Behzad Solhjoui, dated back approximately one-years to 2016. Sanborn Fire Insurance Maps were researched with coverage of the subject property found and reviewed from the years 1907, 1913, 1919, 1950, 1955, 1960, 1961, 1962, 1966, 1969, and 1970. Aerial photographs with coverage of the subject property were found and reviewed from the years 1928, 1938, 1948, 1952, 1954, 1964, 1977, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2010, 2012, and 2016. City Directories were reviewed in intervals of approximately five-years beginning in 1920. Historical USGS topographic maps of the subject property were reviewed from the years 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1948, 1953, 1966, 1972, 1981, 1991, and 2012.

ASTM E1527-13 does not require the environmental professional to undertake a review of recorded land title records or search for environmental liens. This responsibility is placed upon the user. It is ES's understanding that a lender will engage a title company or title professional to undertake a review of reasonably ascertainable recoded land title records and lien records relating to the subject property. Per the scope of work, ES did not obtain recorded land title records or conduct an environmental lien search.

ES requested records for the subject property from the Los Angeles Fire Department, UST Plan Check Division and the Los Angeles Regional Water Quality Control Board. As of the publication of this report, these agencies have not responded to our requests. Using various resources referenced in this report, ES formed an opinion on the subject property. ES does not anticipate that there are any significant records to be reviewed for the subject property at these agencies. If records are received that will alter the conclusions or recommendations of this report, ES will notify the client.

It is the professional opinion of ES that there were no significant data gaps with regards to the ability of ES to identify conditions indicative of releases and threatened releases.

2.5 Reliance

This report was prepared for the sole use and benefit of Denley Investments & Management and Bank of America. The information and opinions rendered in this report are for the exclusive use and reliance by Denley Investments & Management and Bank of America. ES will not distribute or publish this report without the consent of Denley Investments & Management or Bank of America except as required by law and court order. The information and opinions expressed in this report are given in response to a limited assignment by Denley Investments & Management and should be considered and implemented only in light of that assignment. The services provided by ES in completing this project have been provided in a manner consistent with normal standards of the profession. This report is not a legal opinion and does not offer warranties or guarantees expressed or implied.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The subject property is approximately 0.172-acres and the street addresses are 6362 through 6366 Hollywood Boulevard, in the Hollywood community of the city of Los Angeles, in the County of Los Angeles, California, 90028. The subject property is located on the southeast corner of the intersection of Hollywood Boulevard and Cosmo Street. Hollywood Boulevard delimits the subject property to the north, Cosmo Street delimits the subject property to the west, a paved alley delimits the subject property to the south, and the adjacent site delimits the subject property to the east.

The approximate latitude and longitude near the center of the subject property are 34°6'4.54" north and 118°19'43.24" west, respectively. The subject property is composed of one parcel. The APN number for the subject property is 5546-008-019. The subject property is rectangular with the dimensions of approximately 50-feet along the north and south borders and 150-feet along the east and west borders.

The subject property was occupied by a four story with full basement commercial building. The owners of the subject property were reported to be Palmer Building Associates. ES was not provided with a legal description of the subject property.

3.2 Site and Vicinity Characteristics

3.2.1 Surface Characteristics

The general topography of the subject property slopes to the south. According to the U.S. Geological Survey (USGS) topographic map, Hollywood California Quadrangle, the finished elevation of the subject property is approximately 380-feet above Mean Sea Level (MSL). There were no unpaved areas on the subject property.

3.2.2 Drainage Patterns/Basins

The subject property is located in an area designated as "Zone X" on the FEMA Q3 Flood Insurance Rate Map, subject Los Angeles County, map number 06037C1605F, panel number 1605, dated September 26, 2008. These areas have been determined to be outside the 0.2% annual chance floodplain. The nearest significant surface water is the Hollywood Reservoir located approximately 1.1-miles north of the subject property.

There was no industrial water discharge from the subject property into a sanitary sewer system. There were two sources of wastewater at the subject property including sanitary sewage and stormwater runoff. The sanitary sewage discharges into the municipal system. The stormwater runoff moves via sheet flow to the north and east draining onto the city streets. Stormwater from adjacent sites is not expected to enter the subject property under normal conditions. There were no drinking water wells, groundwater monitoring wells, clarifiers, sumps, septic system, or french drains noted on the subject property.

There were floor drains in bathrooms and one in the basement mechanical room on the south side of the subject property building. These drains were not conduits to the subsurface because there were no hazardous materials stored near these drains and no signs of spills or releases into these drains.

3.2.3 Geology

The subject property is located within the Peninsular and Transverse Ranges Geologic Province of California. These provinces are characterized by northwest trending mountains and faults (Peninsular Range), and east-west trending mountains and folds (Transverse Range). Rocks within the Peninsular Range Province were emplaced during Cretaceous orogenic events and uplifted into the present mountain ranges during the late Tertiary and Quaternary periods. Igneous, volcanic, metamorphic, and sedimentary rocks are all found within the Peninsular Ranges. The area is seismically active with several know active faults crossing the Province. Rocks within the Transverse Range include Precambrian metamorphic and igneous rocks that comprises the core of the San Gabriel and Santa Monica Mountains. These rocks are overlain by Miocene aged marine sediments of the Pico, Monterey, Repetto, and other formations.

The area consists of a large Quaternary age alluvial basin (Coastal Plain of the Los Angeles Basin). This basin is filled with sediments derived from the surrounding hills and mountains. The largest drainages in this basin are the Los Angeles-Rio Hondo and San Gabriel Rivers. The ground surface throughout this uplifted area is generally covered with a thin layer of fill and soil (0 to 5-feet thick).

The subject property is on the southern flank of the Santa Monica Mountains. As mapped by Thomas Dibblee (1991, Geologic map of the Hollywood Quadrangle and Southern Half of the Burbank Quadrangle) the subject property is located on Older Surficial Sediments. This material is described as unconsolidated to weakly consolidated, dissected and eroded where elevated. The formation is of late Pleistocene age.

According to the *Web Soil Survey* by the National Resources Conservation Service dated January 26, 2017, the primary soil type at the subject property is Urban Land-Palmview-Tujunga, Gravelly Complex. The landform setting for this soil is described as alluvial fans with a slope of 2 to 9 percent. This soil is well drained and the depth to the water table is more than 80-inches.

3.2.4 Hydrogeology

Per the Regional Water Quality Control Board Basin Plan for the Coastal Watershed of the Los Angeles and Ventura Counties (1995), the subject property is within the Hollywood hydrologic subarea of the Coastal Plain Hydrologic Area. Per the Basin Plan, water within the Hollywood subarea has the following beneficial use designations: municipal and domestic supply industrial process supply, industrial service supply, and agricultural supply.

ES reviewed subsurface data from investigations on a nearby site. Circle K Store at 5857 West Sunset Boulevard is located approximately 3,400-feet east southeast of the subject property. In a report dated January 10, 2017 by TRC entitled "*Groundwater Monitoring Report, July Through December, 2016*" groundwater was reported to be at a depth of approximately 57.2 to 65.6-feet below ground surface (bgs).

Shallow groundwater generally flows in directions subparallel to the ground surface slopes and under the influence of gravity toward points of discharge such as creeks, swamps, drainage swales, or pumped groundwater wells. Based upon review of the topographic map, the presumed groundwater flow direction in the uppermost water-bearing unit across the subject property would be to the south. South is only the presumed groundwater flow direction and only physical testing can accurately state the true groundwater flow direction.

3.2.5 Wetlands

ES screened the subject property for the presence of suspect wetlands during the site reconnaissance and by reviewing the U.S. Department of the Interior, Fish and Wildlife Service, *National Wetlands Inventory* online map researched on March 4, 2017 and the most recently available topographic map dated 1991. These sources indicated that the subject property is not in an area mapped as a potential wetlands area and there were no mapped bodies of water indicative of possible wetlands on the subject property. During ES's site reconnaissance, no suspect wetlands areas were observed on the subject property. The Environmental Professional who performed the subject property reconnaissance is not a specialist trained in wetlands delineation. A wetland delineation was beyond the scope of this assessment. ES notes that the Wetlands Inventory Map is prepared through the analysis of aerial photography and not by actual ground reconnaissance. It is normally used as a screening method to assess if potential wetland areas exist. No further assessment is recommended.

3.2.6 Earthquake Fault Lines, Epicenters, and Liquefaction

The Department of Commerce, National Oceanic and Atmospheric Administration (NOAA) publishes the locations of earthquake epicenters measuring five (5) or greater on the Richter scale. This information was researched and there were no such epicenters reported with one-mile of the subject property.

The Department of Conservation, California Geological Survey developed the Seismic Hazard Zone Report 026 for the Hollywood California 7.5 Minute Quadrangle map dated 1998. According to this map, the subject property is located just south of the Hollywood Earthquake Fault Zone and is not located in a designated Liquefaction Area or in an Earthquake Induced Landslide Area.

3.2.7 Methane Zone

The City of Los Angeles, Department of Public Works, Engineering Department (LADPW) published a map dated March 31, 2004 showing areas where design standards related to construction in methane zones is required. The Los Angeles Fire Department have defined a Methane Zone as an area that has the potential to contain methane in the shallow subsurface. According to this map, the subject property is not located in a Methane Zone or in a Methane Buffer Zone. Additional oil field information and oil well data are described below in Section 5.8.

3.3 Structures, Roads and Other Improvements on the Site

The subject property was developed with a four story with basement and rooftop mechanical penthouse commercial building. The Los Angeles County Office of the Assessor indicated that the subject property building was constructed in 1930 and is approximately 28,614-square feet. The subject property building covers almost the entire property footprint. The subject property can be accessed from Hollywood Boulevard or Cosmo Street.

The interior of the four-story subject property building was subdivided into commercial space on the ground floor, small music studios and mechanical rooms in the basement, and office suites on the upper floors. There was a mechanical space penthouse on the roof. Finishing materials included: drywall, plaster, ceramic tile, terrazzo tile, hardwood flooring, and carpeting. The building consisted of wood and brick construction with a slab below-grade concrete foundation. The roof was composed of rolled asphalt composite roof sheeting. The building exterior walls were painted plaster and bricks. Gas and electrical central HVAC units provided heating and cooling to the building.

Electricity and potable water were supplied by the Department of Water and Power (DWP) and natural gas was supplied by Southern California Gas Company. In a report entitled, "*2015 Drinking Water Quality Report for the Period of January 1 through December 31, 2015*," dated 2017, it was stated, "The water we served surpassed all drinking water standards for health and safety set by the U.S. Environmental Protection Agency (US EPA) and the State of California, State Water Resources Control Board – Division of Drinking Water (SWRCB-DDW)." Sewer service was provided by the Sanitation Districts of Los Angeles County. Solid waste disposal services were performed by Athens Services and Patriot Services.

3.4 Current Uses of the Subject Property

At the time of the subject property reconnaissance on March 3, 2017, the subject property was being used as a commercial and office building. The basement was divided into small music studio spaces, restrooms, and mechanical spaces. The first floor was occupied by the IO West Theater. The tenants on floors two, three, and four used the subject property for general office purposes. A rent roll of the subject property tenants from January of 2017 is provided in Appendix H. There were no significant hazardous materials or petroleum products identified with these uses.

3.5 Tenant, User, and Owner Information

Tenant

Based on the tenant uses and their lack of the use of hazardous materials or petroleum products, the tenants were not interviewed.

Owner and User

During the subject property reconnaissance on March 3, 2017, ES interviewed Mr. Behzad Solhjou, Building Engineer for Denley Investments & Management, a parent company of the subject property owner LLC. Mr. Solhjou stated he had firsthand knowledge about the subject property since approximately 2016. Mr. Solhjou stated that to the best of his knowledge, the subject property has always been a commercial and office use building. Mr. Solhjou stated that he knew of no hazardous or petroleum products used on the subject property. He knew of no previous tenants that had used hazardous and/or petroleum products on the subject property.

Mr. Solhjou reported that he knew of no current or past environmental liens in association with the subject property. He stated that he was not aware of any Activity or Use Limitations (ALUs) such as engineering controls, land use restrictions or institutional controls in place or on file under federal, tribal, state or local law. He had no knowledge of any Underground Storage Tanks (USTs), Above Ground Storage Tanks (ASTs) or the storage of any hazardous materials or petroleum products on the subject property. Mr. Solhjou stated that to the best of his knowledge, there had never been any spills or violations on the subject property in association with hazardous materials or petroleum products. He reported that he was not aware of a reduction in the subject property value due to environmental issues. He was aware of no soil or groundwater contamination on the subject property or on adjacent sites. Other information obtained from this interview is presented in relevant sections of this report.

3.6 Historical Uses of the Subject Property

Historical information was obtained from Sanborn Fire Insurance Maps (1907, 1913, 1919, 1950, 1955, 1960, 1961, 1962, 1966, 1969, and 1970) presented in Appendix D, aerial photographs (1928, 1938, 1948, 1952, 1954, 1964, 1977, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2010, 2012, and 2016) presented in Appendix C, USGS Topographic maps (1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1948, 1953, 1966, 1972, 1981, 1991, and 2012) presented in Appendix E, and City Directories (intervals of five years or less, where available, beginning in 1920) presented in Appendix F. Information from the subject property owner representative, Mr. Behzad Solhjou, dated back approximately one-years to 2016.

The subject property was undeveloped in the first reasonably available historical documentation dated 1894. By 1907, a small freight house was developed on the subject property. This remained until the existing subject property building was constructed in approximately 1930. Based on referenced historical documents, uses on the subject property since 1929 have included: production offices, wig store, distributors, management services, , entertainment offices, maid services, casting agents, promotion services, design services, tours, music production, driving school, supply business, photographers, publicity agents, watch repair, law offices, real estate offices, architects, stationary store, building and loan, improv and other types of theaters, dress shop, publishers, and other various general office tenants. There were no past tenants that would be expected to have used significant quantities of hazardous materials or petroleum products and there were no records of such uses. There were no historical recognized environmental conditions or controlled recognized environmental conditions identified in the historical documents reviewed.

3.6.1 Sanborn Fire Insurance Maps

The following is a summary of the findings of the Sanborn Fire Insurance maps reviewed by ES. These maps were used for descriptions in other sections of this report relating to adjacent and surrounding sites. These maps can be found in Appendix D of this report.

1907

In the 1907 Sanborn map, the subject property was developed with a small freight house in the northwest corner and the remainder was part of a larger freight yard. Across Hollywood Boulevard the site to the northwest was vacant and to the northeast was a library. The east adjacent site was vacant with Saint Stephen's Church beyond. The south adjacent site was vacant with a dilapidated shed beyond. The southwest sites, across Cosmo Street, were occupied by a storage building and single-family residence. The west adjacent site, across Cosmo Street, was occupied by a restaurant. Hollywood Boulevard and Cosmo Street were graded as they currently exist. The alley to the south did not exist. The area surrounding the subject property was partially developed with mostly commercial and residential structures. There were no obvious signs of the storage or disposal of hazardous materials in this map.

1913

There were no significant differences on the subject property or surrounding sites in the 1913 map from the 1907 map. The south adjacent site was depicted as a freight yard. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in this map.

1919

In the 1919 Sanborn map, the subject property was developed with a small freight house in the northwest corner and the rest was part of a larger freight yard. Across Hollywood Boulevard the site to the northwest was developed with the existing commercial building which was Cyriacks Garage and to the northeast was a library. The east adjacent site was vacant with Saint Stephen's Church beyond. The south adjacent site was vacant. The southwest sites, across Cosmo Street, were occupied by a single-family residence and the existing apartment building. The west adjacent site, across Cosmo Street, was occupied by the existing commercial building. There were no obvious signs of the storage or disposal of hazardous materials in this map.

1950

In the 1950 Sanborn map, the subject property was developed with the existing commercial building but no details on tenants or uses were depicted in this and subsequent Sanborn maps. The alley to the south of the subject property had been graded. Across Hollywood Boulevard the existing commercial buildings were depicted. The existing east adjacent commercial building was depicted and part of it was a store. The south adjacent site, across the alley, was developed with the existing commercial building. The southwest sites, across Cosmo Street, were occupied by a single-family residence and the existing apartments building. The west adjacent site, across Cosmo Street, was occupied by the existing commercial building. There were no obvious signs of the storage or disposal of hazardous materials in this map.

1955, 1960, 1961, 1962, 1966, 1969, and 1970

There were no significant differences on the subject property or surrounding sites in the 1955, 1960, 1961, 1962, 1966, 1969, and 1970 maps from the 1950 map. The single-family residence on one of the southwest adjacent sites, across Cosmo Street, was converted to the existing parking lot between 1955 and 1960. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in these maps.

3.6.2 Historical Aerial Photographs

The following are descriptions of the historical aerial photographs taken at the subject property and reviewed by ES. This review has been supplemented by geographic place names and other data obtained in other assessment activities of this ESA. These photographs can be found in Appendix C. These photographs were used for descriptions in other sections of this report.

1928

In the 1928 aerial photograph, the subject property was occupied by a small building in the northwest corner, described in Sanborn maps as a freight house. Hollywood Boulevard and Cosmo Street were graded as paved as they currently exist. Commercial buildings were depicted to the northwest, northeast, east, and west. The south adjacent site was vacant. The southwest adjacent sites, across Cosmo Street, were occupied by the existing apartment building and a single-family residence. The surrounding area was already almost fully developed. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in this photograph.

1938, 1948, 1952, 1954, and 1964

With some exceptions, there were no differences on the subject property or adjacent sites in the 1938, 1948, 1952, 1954, and 1964 aerial photographs from the 1928 photograph. The existing subject property commercial building and the south adjacent commercial building were first depicted in the 1938 and subsequent photographs. The two existing commercial buildings adjacent to the north, across Hollywood Boulevard, were first depicted in the 1948 photograph. In 1964, the single-family residence on one of the southwest adjacent sites, across Cosmo Street, had been converted to the existing parking lot. All the adjacent sites were depicted as they currently exist in the 1964 aerial photograph. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in these photographs.

1977, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2010, 2012, and 2016

With a few exceptions, there were no significant differences on the subject property or adjacent sites in the 1977, 1979, 1981, 1989, 1994, 2002, 2005, 2009, 2010, 2012, and 2016 aerial photographs from the 1964 photograph. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in these photographs.

3.6.3 Topographic Maps

Topographic maps from 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1948, 1953, 1966, 1972, 1981, 1991, and 2012 are presented in Appendix E. These maps depicted the subject property, adjacent sites, and surrounding areas as vacant, occupied by non-descript structures, or shaded as developed using house omission tint indicating dense urban development. There were no obvious signs of the storage or disposal of hazardous materials on the subject property in any of the topographic maps.

3.6.4 Environmental Liens

No environmental liens were found during this investigation. The subject property was not listed in the search of the Federal NPL Liens database. The subject property owner stated that there were no environmental liens on the subject property. In order for there to be an environmental lien against the subject property, it must be a suspected, or confirmed, contributor to subsurface contamination. Research conducted for this report did not find any uses that would have contributed to subsurface contamination on the subject property and no regulatory agencies identified it as such.

3.6.5 Title Report

It was not in the scope of work for ES to obtain a Title report for the subject property. The Client did not provide ES with a Title report for review.

3.6.6 Previous Subject Property Inspection Reports

The Client did not provide any previous inspection reports or Phase I Environmental Site Assessments for the subject property.

3.6.7 City Directories

ES retained Environmental Data Resources, Inc. (EDR) to perform historical city directory research of the subject property. ES reviewed the report, "*The EDR-City Directory Abstract*" by EDR dated February 28, 2017. The complete city directory search is presented in Appendix F.

The subject property was first listed in 1924. Since this time, the subject property had been occupied by a variety of commercial tenants. Uses on the subject property since 1924 have included: production offices, wig store, distributors, management services, , entertainment offices, maid services, casting agents, promotion services, design services, tours, music production, driving school, supply business, photographers, publicity agents, watch repair, law offices, real estate offices, architects, stationary store, building and loan, improv and other types of theaters, dress shop, publishers, and other various general office tenants. There were no tenants listed in the city directories that would be expected to have used significant quantities of hazardous materials or petroleum products.

3.7 Current Uses of Adjoining Sites

Current uses of the immediately adjacent sites and their addresses as noted on the buildings or researched on-line are as follows:

- Northwest – Retail stores; 6363 Hollywood Boulevard;
- Northeast - Offices and vacant commercial space; 6353 Hollywood Boulevard;
- East – Project Los Angeles; 6356 Hollywood Boulevard;
- South – A paved alley followed by AMDA College; 1636-1641 Ivar Avenue;
- Southwest - Cosmo Street followed by a parking lot and apartment building; 1641-1645 Cosmo Street;
- West – Cosmo Street followed by a commercial and office building occupied by Cosmo Smoke Shop and offices; 6368 Hollywood Boulevard.

Based on observations and research, there is a low likelihood that a recognized environmental condition exists at the subject property as a result of the current adjacent land use. ES did not detect obvious indications that these adjacent sites have Underground Storage Tanks (USTs) or have been identified as a business that would involve the use of significant quantities of hazardous materials.

3.8 Past Uses of Adjoining Sites

3.8.1 Northwest

Historical sources indicated that the site adjacent to and northwest of the subject property, across Hollywood Boulevard, was undeveloped in 1894. The existing commercial building was constructed between 1913 and 1919. Uses on this site have included: Cyriacks Garage (1919), galleries, retail stores, news services, and real estate offices.

There were no signs of the storage or disposal of hazardous materials on the northwest adjacent site in the historical information reviewed. It is presumed that Cyriacks Garage may have utilized hazardous materials and petroleum products but there were no records of such chemicals, USTs, spills, or releases from this site. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

3.8.2 Northeast

Historical sources indicated that the site adjacent to and northeast of the subject property, across Hollywood Boulevard, was undeveloped in 1894. By 1907, this site was developed with a public library. The library occupied this site through at least 1938. The existing commercial building as developed on this site between 1938 and 1942. Tenants and uses on this site have included: donut shop, shoe shop, hat store, radio business, education, and brokers.

There were no signs of the storage or disposal of hazardous materials on the northeast adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from these adjacent sites.

3.8.3 East

Historical sources indicated that the site adjacent to and east of the subject property was undeveloped in 1894. By 1907, this site was vacant and likely part of Saint Stephen's Church located further to the east. The existing commercial building was developed on this site between 1938 and 1948. Tenants and uses on this site have included: lounge, restaurant, medical offices, lighting business, beauty school, baby sitter's agency, distributions, real estate offices, employment agencies, dance school, secretarial services, publishers, and airline agencies.

There were no signs of the storage or disposal of hazardous materials on the east adjacent sites in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from these adjacent sites.

3.8.4 South

Historical sources indicated that the site adjacent to and south of the subject property, across the alley, was undeveloped in 1894. This site was vacant or part of a freight yard until the existing commercial building was constructed between 1928 and 1948. Tenants and uses on this site have included: educational services, dental lab, casting services, production services, clubs, service organizations, and Southern California Gas offices.

There were no signs of the storage or disposal of hazardous materials on the south adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

3.8.5 Southwest

Historical sources indicated that the sites adjacent to and southwest of the subject property, across Cosmo Street, were undeveloped in 1894. By 1907, these sites were developed with a single-family residence and storage building. By 1913, the original single-family residence was demolished from one of these sites and it was vacant. By 1919, the existing apartment building was constructed and a single-family residence replaced the storage building. Between 1955 and 1960, the single-family residence was replaced by the existing parking lot.

There were no signs of the storage or disposal of hazardous materials on the southwest adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

3.8.6 West

Historical sources indicated that the site adjacent to and west of the subject property, across Cosmo Street, was undeveloped in 1894. By 1907, this site was developed with a restaurant. The restaurant occupied this site until the exiting commercial building was developed on this site between 1913 and 1919. Tenants and uses on this site have included: pharmacy, medical center, apparel retail stores, and a dry goods retail operation.

There were no signs of the storage or disposal of hazardous materials on the west adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources, Federal and State

A Federal, State and Local Radius Profile Report from Environmental Data Resources, Inc. dated February 28, 2017 was reviewed by ES. The radius report, found in Appendix G, contains records of registered sites in the vicinity of the subject property for the classifications and distances as required by ASTM Practice E1527-13. Descriptions of each database, their source, and publication dates are detailed in this appendix section.

4.1.1 Subject Property Environmental Database Summary

The subject property was not listed in any of the databases searched.

4.1.2 Adjacent Sites Environmental Database Summary

The adjacent sites were not listed in any of the databases searched.

4.1.3 Sites Within 0.125 Miles of the Subject Property

Bob Smith Volkswagen at 1750 and 1751 North Cahuenga Boulevard is located approximately 504- feet north, northwest and upgradient of the subject property. This site was listed in the RCRA-SQG, SLIC, SWEEPS UST, HIST UST, and CA FID UST databases. This site generates small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling. This site had a 250-gallon waste oil tank. This site had a release of a regulated substance that impacted the subsurface. Testing and/or remediation have been performed on this site and as of 2003 its status has been closed under the authority of the Los Angeles Regional Water Quality Control Board (LARWQCB). There is a low likelihood that a recognized environmental condition exists at the subject property as a result of this site for the following reasons: because of its distance from the subject property; only small quantities of wastes have been generated; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

There were two site listed in the RCRA-SQG database within 0.125-miles of the subject property. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of these site for the following reasons: because of their distances from the subject property (they are both located at least 230-feet from the subject property); they are both located downgradient from the subject property; there were no USTs on these sites; and there were no records of spills or releases on these sites. No further action is recommended regarding these sites.

There were 16 sites listed in the Historic Auto Stations database within 0.125-miles of the subject property. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of these site for the following reasons: because of their distances from the subject property (they are all located at least 165-feet from the subject property); there were no USTs on any of these sites; and there were no records of spills or releases on any of these sites. No further action is recommended regarding these sites.

There were 15 sites listed in the Historic Cleaners database within 0.125-miles of the subject property. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of these site for the following reasons: because of their distances from the subject property (they are all located at least 120-feet from the subject property); there were no records of spills or releases on any of these sites; and they were all located upgradient or crossgradient of the subject property. No further action is recommended regarding these sites.

4.1.4 Sites Between 0.125 Miles and 0.25 Miles of the Subject Property

Unocal #0823 at 1803 Chauenga Boulevard is located approximately 980-feet north, northwest and upgradient of the subject property. This site was listed in the LUST and HIST CORTESE databases. This site had a release of gasoline that impacted soil discovered in 1983. Testing and/or remediation have been performed on this site and its status as of 1997 has been closed. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of this site for the following reasons: because of its distance from the subject property; the release had been limited to the soil and is therefore not anticipated to migrate to the subject property; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

Former Texaco #0374 at 6409 Sunset Boulevard is located approximately 962-feet south and downgradient of the subject property. This site had a release of gasoline that impacted soil and groundwater discovered in 1985. Testing and/or remediation have been performed on this site and its status as of 1996 has been closed. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

There were 14 sites listed in the databases indicating that they have or had USTs including: *KFWV News* at 6230 Yucca Street, *Chan's Shell* at 6420 Franklin Avenue, *Mercedes* at 6353 and 6465 Sunset Boulevard, *James House Square* at 6541 Hollywood Boulevard, *Group Broadcasting* at 6230 Yucca Street, *In Joon Shu* at 6420 Franklin Avenue, *Church of Scientology* at 5930 Franklin Avenue, *Unk* at 1545 N. Wilcox Avenue, *Air Bourne Freight* at 1520 N. Wilcox Avenue, *Texaco* at 6407 West Sunset Boulevard, *Network Auto Body* at 6161 Hollywood Boulevard, *Prestige Auto Body* at 6567 Selma Avenue, *Hollywood Police Station* at 1538 N. Wilcox Avenue, and *Texaco* at 5407 West Sunset Boulevard. There is a low likelihood that a recognized environmental condition exists at the subject property as a result of these site because of their distances from the subject property (they are all located at least 735-feet from the subject property) and there were no records of spills or releases on any of these sites. No further action is recommended regarding these sites.

There were other sites on multiple databases that were located between 0.125 and 0.25 miles from the subject property that have a low likelihood of creating a recognized environmental condition at the subject property and no further action is recommended regarding any of these sites because of their distance from the subject property, they had no registered USTs, they were not drycleaners, and there are no reports of spills or releases on any of these sites.

4.1.5 Sites Located More than 0.25 miles from the Subject Property

There were several sites on multiple databases that were located more than 0.25-miles from the subject property that have a low likelihood of creating a recognized environmental condition at the subject property and no further action is recommended regarding any of these for the following reasons:

- Their distances from the subject property;
- There were no reports of spills or releases, and/or;
- The releases were not of a magnitude that would be expected to impact the subject property and/or;
- The site status had been closed with remedial action completed or deemed unnecessary.

4.1.6 Orphan (Unmapped) Sites

Orphan (unmapped) sites indicated in the radius report were reviewed to determine their locations relative to the subject property. These sites were not found to be in close proximity to the subject property or their location could not be determined. Based upon ES's area reconnaissance, types of regulatory listings identified for the orphan facilities, and conditions typical of the identified facilities activities, the orphan facilities were not considered suspect *recognized environmental conditions* to the subject property.

4.1.7 Los Angeles County Department of Public Works, Agency Records

The Los Angeles County Department of Public Works (LACDPW) maintains records of industrial waste and underground storage tank sites. These sites are not necessarily those that have had releases or spills. The search in their online database records was limited to the subject property. The subject property was not listed in the search of these records.

4.1.8 Los Angeles County Department of Public Health

ES requested information for hazardous materials, petroleum product spills and USTs on the subject property from the Los Angeles County Department of Public Health. In a letter dated March 2, 2017 from Mr. Fabiola Chavez, Deputy Health Officer, it was stated that there were no records related to the subject property.

4.1.9 Los Angeles Fire Department

ES requested records for the subject property from the Los Angeles Fire Department, UST Plan Check Division. As of the publication of this report, this agency had not responded to our request. Using various resources referenced in this report, ES was able to form an opinion on the subject property. ES does not anticipate that there are any significant records to be reviewed for the subject property at this agency. If records are received that will alter the conclusions or recommendations of this report, ES will notify the client.

4.1.10 Los Angeles Regional Water Quality Control Board

ES requested information for hazardous materials, petroleum product spills and USTs on the subject property from the Los Angeles Regional Water Quality Control Board. As of the publication of this report, this agency has not responded to our request. Using various resources referenced in this report, ES was able to form an opinion on the subject property. ES does not anticipate that there are any significant records to be reviewed for the subject property at this agency. If records are received that will alter the conclusions or recommendations of this report, ES will notify the client.

4.1.11 Department of Toxic Substances Control (DTSC)

DTSC Files

ES requested information on file for the subject property from the Department of Toxic Substances Control (DTSC). Ms. Jan Papararo, Regional Records Coordinator, wrote in a letter dated March 1, 2017 that after a thorough review of their files, they have found no records that exist pertaining to the subject property.

Generator Information Services Section

The letter from Ms. Papararo did not indicate that their Generator Information Services Section had any manifests that were generated from the subject property.

EnviroStor

ES searched for the subject property and adjacent sites on the EnviroStor website published by the DTSC. This website contains listings of Federal Superfund sites, State Response sites, Voluntary Cleanup sites, School Cleanup sites, Evaluation sites, School Evaluation sites, Military Evaluation sites, Tiered Permit sites, Corrective Action sites, Operating Permit sites, Post Closure Permit sites, and Non-Operating Permit sites. The subject property and adjacent sites were not listed on the EnviroStor website.

4.1.12 State Water Resources Control Board (GeoTracker)

ES searched for the subject property and adjacent sites on the GeoTracker website published by the State Water Resources Control Board. This site contains listing of DTSC cleanup sites, other cleanup sites, LUST sites, UST sites, land disposal sites, military sites, and DTSC Disposal Permit sites. The subject property and adjacent sites were not listed on the GeoTracker website.

4.1.13 South Coast Air Quality Management District (SCAQMD)

ES performed a search of the SCAQMD Facility Information Detail database for records pertaining to the subject property. These records include air pollution permits, applications, and violations. Regularly scheduled updates are made to this database by the SCAQMD at least once per week. There were no records found pertaining to the subject property.

5.0 INFORMATION FROM SITE RECONNAISSANCE

5.1 Hazardous Substances in Connection with Identified Uses

The site reconnaissance was performed on March 3, 2017 by Mr. Michael Rezvani, Senior Environmental Consultant and Mr. Doug Kochanowski, Biologist and Project Manager that included a walk of the subject property to determine the presence of hazardous materials and environmental conditions. Mr. Kochanowski and Mr. Rezvani are Environmental Professionals as defined by ASTM E1527-13 and 40 CFR §312.10(b). All areas of the subject property were inspected as part of this investigation. The subject property owner representative, Mr. Behzad Solhjoui, escorted ES during the site reconnaissance.

Except for standard maintenance and janitorial chemicals, there were no signs of hazardous materials being used or stored on the subject property.

5.2 Unidentified Substance Containers

There were no unidentified substance containers observed on the subject property.

5.3 Storage Tanks

No USTs, ASTs, or clarifiers were noted on the subject property at the time of the subject property reconnaissance.

5.4 Hydraulic Equipment

There were no above or below-grade hydraulic lift systems observed on the subject property. The elevator in the building utilizes an overhead traction system and does not contain hydraulic fluids in its operation.

5.5 Indications of PCBs

There were no pad-mounted transformers, pole-mounted transformers, or hydraulic lift systems located on the subject property.

The subject property building was constructed in approximately 1930, therefore, the florescent light ballasts may contain PCBs. There was no evidence of leaks from the ballasts and they are not an obvious threat to the environmental integrity of the subject property.

5.6 Indications of Solid Waste Disposal

There was no evidence observed of buried drums, buried containers, free liquids, odors, unusual depressions, or excavations that would indicate solid waste disposal activity on the subject property. There was no evidence of fill material from an unknown source on the subject property. A designated solid waste disposal area exists in the alley located north of the subject property. There was no surface evidence of spills, releases, or illegal disposal noted in this area during the subject property reconnaissance.

5.7 Surface Staining

There was no evidence noted of discolored soils, odors or surface staining on the subject property during the site reconnaissance. There was no evidence of sparse, stressed, or dead vegetation (from other than insufficient water). There was no visual evidence of improper handling or disposal of hazardous chemicals or materials on the grounds or in the subject property building.

5.8 Physical Setting Analysis

The subject property is located in an area surrounded by commercial and residential developments. The area around the subject property began to significantly develop in the early 1900s.

There were no indications that the subject property or any of the sites adjacent to the subject property have been affected by the presence of oil or natural gas deposits. According to the California Department of Conservation Field and Wells Map from 2001, the subject property is not located in the proximity of an oil or gas field.

State of California, Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) on-line, digital database, *Oil Well Finder* map was reviewed which contains the most current information on oil well locations. According to this map there were no oil wells located on the subject property or adjacent sites.

5.9 Pipelines

ES reviewed the online National Pipeline Mapping System published by the Pipeline and Hazardous Materials Safety Administration, a division of the Department of Transportation. According to this agency, there were no pipelines mapped on the subject property.

6.0 NON SCOPE ASTM CONSIDERATIONS

6.1 Asbestos

Physical sampling of suspect Asbestos Containing Materials (ACMs) was not part of the scope of this project and only a very limited and cursory visual inspection was performed. Materials suspected of containing asbestos were noted in and on the subject property building. These materials included, but may not be limited to, the following: drywall, drywall joint compound, floor tile and mastic, drop ceiling tile, stucco, linoleum flooring, plaster, covebase mastic, window putty, and roofing materials. These materials were found to be in good condition with limited or no damage. When in good condition and if they are not disturbed, the suspect ACMs are not a concern to the health of the building occupants or workers and do not represent a recognized environmental condition for the subject property.

The California Health and Safety Code requires owners of structures with ACM to notify tenants and employees that buildings have ACMs. ES recommends that if not already issued, this notice be sent to tenants and employees at the subject property.

Cal OSHA regulations require employees who may potentially disturb ACM (typically janitorial staff and building engineers) complete an annual two-hour awareness-training course. If the janitorial staff and building engineers are employed by the subject property owner, ES recommends they be required to take this two-hour awareness-training course. If the janitorial staff and building engineers are employed by a third party, ES recommends the third party company be notified to comply with this requirement.

The South Coast Air Quality Management District (SCAQMD) maintains specific regulations concerning demolition and renovation activities involving ACMs. If renovation or demolition will disturb any suspect ACMs, a licensed California Certified Asbestos Consultant must first survey the materials for asbestos. If asbestos is found, an asbestos abatement contractor must remove these items prior to the renovation or demolition.

6.2 Lead Based Paint

Surveying and inspecting for lead based paint was not included in the scope of this project and only a very limited and cursory visual inspection was performed by a non-licensed professional. Any building constructed prior to 1978, such as the subject property building, should be suspected of containing lead based paint. ES did not note the presence of any significant quantities of delaminating, chipping, peeling or chalking coatings at the subject property. The possible presence of lead based paint on the subject property is not considered a recognized environmental condition. It should be noted that this assessment is provided to the Client from a professional who is NOT a licensed lead based paint inspector/risk assessor.

6.3 Lead Contamination of Drinking Water

The condition of the drinking water at the subject property is unknown. There were no lead welds or lead pipes noted on the potable water piping system. Physical sampling of drinking water for lead was not part of the scope of this project.

6.4 Radon

Based on the results of the State of California Department of Health Services' 1990 California Statewide Radon Survey, the U.S. Environmental Protection Agency (U.S. EPA) lists subject Los Angeles County as being in Radon Zone 2. Zone 2 areas have a predicated average indoor radon screening potential of between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L. The level at which the U.S. EPA considers radon levels to be unhealthful is 4.0 pCi/L in residential structures.

There can be extreme variations of indoor radon levels within a local area based upon geologic, soil structure and building characteristics. The EPA recommends testing as the definitive method in determining the radon level within a specific structure. Radon testing was not part of this project's scope of work.

6.5 Urea-Formaldehyde

The sale and installation of Urea Formaldehyde Foam Insulation (UFFI) as thermal insulation began in approximately 1970. In December of 1980, its installation was banned under the federal *Hazardous Products Act*. UFFI was installed in new buildings during this period and may also have been added to existing buildings. UFFI was not commonly used in industrial or commercial buildings. Although a UFFI survey was not included in the scope of services for this project, there was no evidence noted of UFFI in the subject property building during the subject property reconnaissance.

6.6 Mold

Surveying or physical sampling for mold was not part of the scope of this project. Only a limited and cursory visual inspection for signs of water intrusion or visible mold growth was performed by ES. There were no obvious signs of water intrusion or mold growth noted in the subject property building during the site reconnaissance on March 3, 2017.

6.7 Fluorescent Light Tubes

The presence of fluorescent light tubes in the subject property is not a threat to the health of the tenants or the environmental integrity of the subject property. Their disposal, however, is regulated.

In California, the California Environmental Protection Agency Department of Toxic Substances Control (DTSC) regulates the management of spent fluorescent light tubes and spent mercury vapor lamps. These are hazardous wastes because mercury is listed as a hazardous waste under Title 22, California Code of Regulations, Section 66261.126. The spent tubes and lamps typically contain enough mercury to qualify as toxic hazardous wastes under Title 22, CCR, Section 66699 when disposed of in quantity. Questions regarding this policy should be direct to: the DTSC, Hazardous Waste Management Program. Although their disposal is regulated, this is not a Recognized Environmental Condition.

6.8 Mercury

The subject property was inspected for the presence of mercury containing building components. Some of the high voltage lighting systems, such as the exterior lighting, may contain mercury vapor but these are not a threat to the environmental integrity of the subject property.

6.9 Vapor Intrusion

Based on a review of agency records, historical documents, and current site uses, there were no onsite sources identified that had the potential to have created a vapor intrusion issue on the subject property. There were no offsite properties identified in the database research that had an open release of petroleum hydrocarbons within 528 feet (one-tenth of a mile (0.1-miles)) upgradient, 165-foot crossgradient, or 100 feet downgradient of the subject property. There were no offsite properties identified in the database research that had a documented release of other chemicals, such as VOCs, identified within 1,760-feet (one-third of a mile (1/3-mile)) upgradient, 365-foot crossgradient, or 100 feet downgradient of the subject property. It should be noted that ES was not contracted to perform an assessment of the subject property in accordance with ASTM Standard E2600 nor does this assessment meet the requirements of said standard.

7.0 FINDINGS, OPINIONS, AND RECOMMENDATIONS

This assessment has revealed no evidence of recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, or de minimis conditions in connection with the subject property. Based on our findings, no further assessment appears warranted at this time.

Findings, opinions, and recommendations for the following conditions are discussed in this report: possible asbestos containing materials are discussed in Section 6.1; and the possible presence of lead based paint is discussed in Section 6.2. Further investigation of these items does not appear to be necessary at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

The undersigned certifies that the professional services have been performed, our findings obtained and our recommendations have been prepared in accordance with customary principles and practices in the field of environmental science and engineering. ES has acted in good faith and has no relationship with sellers, buyers or agents of the subject property. There have been no conflicts of interest involved in the drawing of conclusions, which have been based solely on materials reviewed and visual inspections performed by ES. The undersigned declares that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312 Section 312.10. We have the specific qualifications based on education, training, and experience to assess a subject property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 with any exceptions noted in Section 2.2 - Limitations, Exceptions and Methodology of Assessment.

Prepared and reviewed by:

Douglas B. Kochanowski
Biologist and Project Manager
CHMM (#9970), CAC (#99-2699)

Prepared and reviewed by:

Michael Rezvani, PE, REPA #554617, CAC#93-1225
Senior Environmental Consultant

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS PARTICIPATING IN THE PHASE I ESA

Michael Rezvani PE, REPA, CAC (Senior Environmental Consultant)

Professional Experience:

Michael Rezvani has been directly involved with various aspects of the environmental engineering and consulting industry for over 33 years (since 1982). As the principal officer of The Environmental Solutions, he actively continues to develop and execute new environmental projects and sustains his lasting relationships with his older clients. He is knowledgeable in understanding the intent and the importance of environmental site assessments (phase I and phase II), subsurface soils-testing and soil-gas surveys, asbestos consulting services, physical risk assessments, indoor air quality testing, emission testing, lead surveys and hazard mitigation monitoring. He involves himself personally in the daily activities and correspondences of his projects. He is uniquely qualified when it comes to making sense out of an overwhelming amount of technical data and simplifying the results into an understandable form for his clients. He has performed hundreds of "phase I and phase II" environmental site assessments since 1988 and specifically prior to the issuance of the current ASTM standards.

He has uniquely designed and personally managed major construction and/or demolition projects involving asbestos and lead abatement. He has been conducting asbestos and lead awareness classes since 1990. He is unique in his ability to educate his clients about a given environmental or geotechnical problem and involving them in the step by step process of mitigation. He creates a sense of personal trust and transparency in his execution of a given environmental project. His litigation experience as an expert witness which stems from many years in the consulting industry is further exemplified by his personal participation as a key part of several defense teams for his clients in environmental related law suits. He has testified as an expert witness at the Superior Court of Los Angeles and in out-of-court settlements for environmental mitigation cases. His knowledge, common sense and uniquely simple approach to interpret the intent of the environmental regulations have assisted legal teams to succeed in several significant cases.

In the late 1980's he performed over 10 million square feet of EPA/AHERA asbestos surveys and provided the documentation for the associated EPA management plans for the schools (K-12) throughout the central and western parts of the United States. In the mid 1980's, he performed the original volumetric testing and damage assessment of the underground storage tanks (USTs) in Southern and Central California following the US EPA issuance of the Subtitle I & II of RCRA. He later managed the subsequent phase II assessment and the removal of the USTs.

In the early 1980's, and on behalf of Halliburton's subsidiary, Analytical Inspection Inc., he utilized his radiography and radiation training to coordinate and performed the radiographic inspections of the Louisiana and Texas off-shore production platforms for determination of internal erosion throughout the Gulf of Mexico. He worked under direct supervision of the Louisiana Chief Radiation Safety Officer (RSO), Lloyd Anderson.

Education:

Bachelor of Science Industrial Technology, University of Louisiana, 1982

Bachelor of Science Civil Engineering, University of Louisiana, 1982

EPA-NIOSH Microscopy, University of Southern California, 1989

Registrations and Certifications:

Registered Environmental Property Assessor

Certified Asbestos Consultant

Certified UST Assessor

Certified EPA/NIOSH 582

Certified EPA Hazardous Waste Operations

Certified Level II Radiographer

Doug Kochanowski

CHMM, CAC (Biologist and Project Manager)

Professional Experience:

Mr. Kochanowski has been performing Phase I Environmental Site Assessments (ESAs) for over 27 years and is considered an industry expert. The environmental consulting profession was in its infancy when he performed his first ESA. Over the past two decades, Mr. Kochanowski has performed ESAs on almost every type of real property in over ten different states and in Europe. This includes military bases, medical facilities, high-rise office buildings, learning institutions, factories, shopping malls and plazas, gasoline stations, industrial parks, vacant land, agricultural land, housing tracks, multifamily developments, and government facilities. His wide array of experience has made him a key component of complex ESAs and his expertise is sought after by a wide variety of clients and other consulting firms. His practical approach and comprehensive knowledge of the ASTM standards result in ESAs that are accurate, comprehensive, and address environmental issues with a common sense approach.

Some ESAs must make recommendations for subsurface testing, also referred to as Phase II's. Mr. Kochanowski's extensive ESA portfolio has lead him to a perform Phase II's at a variety of locations and property types for as long as he has been in the industry. His Phase II experience includes soil testing, groundwater testing and modeling, landfill leachate testing, and soil vapor studies. Where contamination has been identified in a Phase II, Mr. Kochanowski has worked with clients to remedy the situation. He has implemented remedial systems for contaminated soil and groundwater. He has also assisted clients in obtaining regulatory closures of releases without the need for remediation.

DENLEY INVESTMENTS & MANAGEMENT

Palmer Building Phase I ESA

March 7, 2017

Page 33

For as long as Mr. Kochanowski has been writing ESAs and performing Phase II's, he has been performing asbestos testing and consulting. Mr. Kochanowski performs asbestos surveys, develops removal specifications and drawings, writes Operations and Management (O&M) Plans, and performs contractor observation and air monitoring during abatement projects. His asbestos experience includes schools, nuclear facilities, universities, airports, hospitals, military bases, shopping malls, high-rise office buildings, industrial complexes, port facilities, apartments and single-family homes. Mr. Kochanowski was the Manager and Facility Security Officer (FSO) for a high profile asbestos survey, air monitoring and abatement project of the White House, Washington D.C. His AHERA survey experience includes inspecting over eight million square feet of building space for school districts in California, Kansas, New Mexico and Tennessee.

Mr. Kochanowski has teaching experience including OSHA 1910.120 HAZWOPR, Confined Space Entry, and asbestos awareness classes. He has served as Secretary on the Board of Directors and is a founding father for the SoCal ACHMM chapter. In the past, he has served on the technical committee for a Local Emergency Planning Commission (LEPC) and was elected Secretary on the Board of Directors for the Rhine-Main Post of the Society of American Military Engineers (SAME). He has managed several large IDT contracts for the European District Corps of Engineers, working at over twenty bases in Germany and Spain. Projects included remediation design, soil and groundwater sampling, landfill leachate testing, asbestos surveys, air monitoring, and radon testing.

Education:

Bachelor of Science, Biology, San Diego State University, 1987.

Continuing Education; Strategies for Conducting Meaningful Microbial IAQ Investigations/American Indoor Air Quality Council

Registrations and Certifications:

CHMM, Master Level; Secretary of the SoCal ACHMM Chapter

California Certified Asbestos Consultant (#09-2699)

Registered Environmental Assessor-I (#07411)

NIOSH 582 Accredited Sampling and Evaluation Airborne Asbestos

Certified, OSHA 40Hr Trained 1910.120/Site Supervisor

Certified TRGS 519 Under German Hazardous Materials Regulations

AHERA Certified Asbestos Inspector, Management Planner, Designer, and Abatement Supervisor

Certified Radiation Worker

Confined Space Entry Certified

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PALMER BUILDING ESA
6360-6366 HOLLYWOOD BOULEVARD
LOS ANGELES, CA 90028

TARGET PROPERTY COORDINATES

Latitude (North):	34.101266 - 34° 6' 4.56"
Longitude (West):	118.328678 - 118° 19' 43.24"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	377438.4
UTM Y (Meters):	3773986.2
Elevation:	381 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1605F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1610F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/2 - 1 Mile SSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene
Code: Tm (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Surficial Soil Types: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sand
 silty clay

Deeper Soil Types: stratified
 clay loam
 silty clay loam
 gravelly - sandy loam
 coarse sand
 sand
 weathered bedrock
 very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
