Re: Phase I Environmental Site Assessment
Griswold Residential Project
APN 8435-006-900
Covina, California 91722
Los Angeles County

Environmental Assessment Specialists, Inc. (EAS) has completed a Phase I Environmental Site Assessment (ESA) for the above referenced site in accordance with the 2020 Master Services Agreement between EAS and FirstCarbon Solutions (Client), and in substantial compliance with the scope and limitations of the American Society of Testing Materials (ASTM), Standard Practices for ESAs: The Phase I ESA Process, Designation E1527-13. For the purpose of this report the entire land area associated with the address and/or APN is referred to as the Property, Subject Property, and/or Site.

According to the Los Angeles County Assessor's Office, the Property's Assessor Parcel Number (APN) is listed as 8435-006-900 and located on the north side of East San Bernardino Road in Covina, Los Angeles County, California. Per the Assessor's Office, no address is available for the Property. Signage at the Property indicate the address is 16209 East San Bernardino Road as confirmed by onsite listings in the government records/regulatory database report. The Property is accessible via paved access driveways located on the north side of East San Bernardino Road.

The approximately 9.5-acre Property is occupied by a former Covina-Valley Unified School District (CVUSD) school site and its environs consisting of eight one-story educational buildings including classrooms and administration offices, asphalt-paved parking areas and driveways, a small playground, a metal storage container used primarily to store extra tables and chairs, a large grass covered field, and landscaped areas. According to onsite CVUSD personnel, the Property was most recently utilized by the Tri-Community Adult Education Griswold Center but has been vacant for approximately 3 years. Except for a small parking lot located along East San Bernardino Road, the majority of the Property is fenced with a 24-hour security guard to discourage vagrant activity. The Property is located in an area comprised primarily of residential and commercial retail land uses. EAS walked the Property, visually observing all accessible features. At the time of the site visit, the Property appeared to be in fair condition and irregularly maintained.

Historically, the Property was occupied by orchard land from at least 1928 until at least 1952. By 1964, the Property has appeared similar to present-day land uses. The Property is proposed to be redeveloped into 48 new residential lots.

FINDINGS AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of the proposed Griswold Residential Project located at APN 8435-006-900, 16209 East San Bernardino Road in Covina, Los Angeles County, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report. **This assessment has revealed no evidence of recognized environmental conditions in connection with the Property.**

However, the following business environmental risks (BERs) were identified which warrant mention:

- Based on information obtained from the historical records review, the existing improvements were constructed at a time when asbestos-containing materials (ACMs) and lead-based paints (LBPs) were not yet phased out. Based on this information, there is a potential that ACMs and/or LBPs are present within the onsite buildings. **As the onsite buildings are to be demolished during redevelopment activities, EAS recommends that a comprehensive asbestos and lead paint survey be conducted prior to any disturbance/demolition activities; onsite building materials should be characterized for asbestos and lead by a reliable method. All activities involving ACMs and LBPs should be conducted in accordance with governmental regulations.**
- Historically, the Property and surrounding properties were occupied by orchard land from at least 1928 until at least 1952. A wide variety of pesticides, including those containing persistent compounds such as lead and arsenic, may have been used during this period. No information was obtained indicating evidence of improper storage, disposal or application of these materials and a review of available historical aerial photographs did not show improvements such as hangars, runways or large barns that would indicate significant storage, formulation and handling of these materials. However, given the planned extensive redevelopment and grading of the Property into residential land use, and the limited regulation of the potential storage and usage of agricultural chemicals during a significant period of the Property's historic agricultural land use, there is a potential for accumulation of elevated levels of the aforementioned constituents. **Based on the above information, onsite soils may contain pesticides/herbicides above action levels. Therefore, EAS believes it prudent that soil sampling and testing be performed at the Property prior to redevelopment activities. Once the analysis has been completed, the results would verify that contaminated soils above action levels are/are not present.**

In addition, the following items warrant mention:

- Although microbial growth may occur in a very short time span, an effort was made to identify conspicuous microbial growth in the common areas surveyed. In addition, EAS made an effort to observe water damaged building materials, which could indicate water intrusion into the structure. No significant areas of microbial growth or water intrusion was observed during the site visit. **If any areas of microbial growth are discovered during demolition activities, these materials should be characterized by a reliable method. All activities involving microbial growth should be conducted in accordance with governmental regulations.**

- Standard dust mitigation measures should be implemented during all redevelopment and soil handling activities. During any grading or excavation activities of the Property, redevelopment personnel must be made aware to look for unusual conditions suggesting buried debris or other potential adverse environmental conditions that may be discovered on the Property. In addition, **if any abnormal soils are discovered during redevelopment, such as stained soils, hydrocarbon odors, or any other unusual odors, all construction activities should be stopped immediately and EAS should be contacted for further assessment and monitoring.**
- **Onsite CVUSD maintenance personnel who opened the buildings for interior access during the Site visit warned EAS personnel to be careful of waste hypodermic needles from vagrant drug use. No hypodermic needles were observed during the Site visit, however, any onsite personnel performing future inspections or redevelopment activities should be made aware of the potential for encountering hypodermic needles and that appropriate measures are taken.**

1.0 INTRODUCTION

The purpose of this Phase I ESA was to identify recognized environmental conditions associated with the Property. To achieve this objective, the Phase I ESA included visual observations of the Property and observations of the surrounding properties, a visual survey for suspect asbestos-containing materials/debris piles/lead-based paint, limited historical land use review, review of regulatory database listings, and reviews of readily available geologic and hydrogeologic data. This report represents a summary of these findings. A parcel map, site plans, area map, site photographs, historical aerial photos and topographic maps, wetlands map, flood hazard map, fire insurance map report, city directory abstract, regulatory database report, questionnaires, and supporting documentation are included as attachments to this report.

EAS visually observed the Property on February 18, 2020, to identify potential sources or indications of chemical contamination such as USTs, aboveground storage tanks (ASTs), PCBs, chemicals and hazardous waste materials, areas with surficial staining or distressed vegetation, and visual evidence of ACMs and/or LBP. Lands immediately adjoining to the Property were visually inspected for possible sources of contamination or environmental impairment, which could migrate to the Site via surface water runoff, groundwater transport, and other pathways. EAS conducted a regulatory records review, reviewed historical aerial photographs, historical maps, building permits (upon availability), and contacted and interviewed property representatives and regulatory agencies as necessary.

2.0 SITE LOCATION and DESCRIPTION

According to the Los Angeles County Assessor's Office, the Property's Assessor Parcel Number (APN) is listed as 8435-006-900 and located on the north side of East San Bernardino Road in Covina, Los Angeles County, California. Per the Assessor's Office, no address is available for the Property. Signage at the Property indicate the address is 16209 East San Bernardino Road as confirmed by onsite listings in the government records/regulatory database report. The Property is accessible via paved access driveways located on the north side of East San Bernardino Road.

The approximately 9.5-acre Property is occupied by a former Covina-Valley Unified School District (CVUSD) school site and its environs consisting of eight one-story educational buildings including classrooms and administration offices, asphalt-paved parking areas and driveways, a small playground, a metal storage container used primarily to store extra tables and chairs, a large grass covered field, and landscaped areas. According to onsite CVUSD personnel, the Property was most recently utilized by the Tri-Community Adult Education Griswold Center but has been vacant for approximately 3 years. Except for a small parking lot located along East San Bernardino Road, the majority of the Property is fenced with a 24-hour security guard to discourage vagrant activity. The Property is located in an area comprised primarily of residential and commercial retail land uses. EAS walked the Property, visually observing all accessible features. At the time of the site visit, the Property appeared to be in fair condition and irregularly maintained.

Historically, the Property was occupied by orchard land from at least 1928 until at least 1952. By 1964, the Property has appeared similar to present-day land uses. The Property is proposed to be redeveloped into 48 new residential lots.

3.0 PHYSICAL SETTING

Based on the United States Geological Survey (USGS) *Baldwin Park, CA 7.5-Minute Quadrangle* (1:24,000), the Property has an average elevation of approximately 432 feet above mean sea level with slight gradients descending toward the southwest. Storm water runoff is expected to flow off the Property to the southwest.

According to the USGS, *Geologic Map of California* (2012), the Property appears to be underlain by Quaternary alluvial deposits consisting of unconsolidated and semi-consolidated clay, silt, sand, and gravel.

According to information obtained from the Los Angeles County Department of Public Works, groundwater in the vicinity of the Property is expected to be over 200 feet below the ground surface. Groundwater would generally be expected to follow local topography with a flow direction towards the southwest. Therefore, areas and properties located northeast of the proposed Site and subject Property are considered upgradient. However, actual groundwater flow direction is often locally influenced by factors such as rainfall, geologic structure, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the site can be accurately determined only by installing groundwater monitoring wells, which was beyond this scope of this project.

4.0 SITE RECONNAISSANCE and OBSERVATION

On February 18, 2020, EAS personnel conducted a site reconnaissance of the Property. The site reconnaissance is documented in the site photographs (Appendices). The EAS representative was granted access to the Property by onsite security personnel but was unaccompanied at the Property during the site visit. In addition, a walk along the perimeter of the Property and a drive around roads in the immediate area were conducted. At the time of the site visit, the weather was partly cloudy.

Of note, onsite CVUSD maintenance personnel who opened the onsite buildings for interior access during the Site visit warned EAS personnel to be careful of waste hypodermic needles from vagrant drug use. No hypodermic needles were observed during the Site visit, however, any onsite personnel performing future inspections or redevelopment activities should be made aware of the potential for encountering hypodermic needles and that appropriate measures are taken.

The purpose of the site reconnaissance was to visually and physically observe the site, site structures, and adjoining properties for conditions indicating an existing release, past release, or threatened release of any hazardous substances or petroleum products into structures of the site, or into soil and/or groundwater beneath the site. This would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon staining, waste drums, illegal dumping, or improper waste storage/handling.

Underground Storage Tanks/Aboveground Storage Tanks (USTs/ASTs)

No visual evidence (e.g. pipes, vents, pumps, and stains) that would indicate the past or present use of petroleum hydrocarbon underground storage tanks (USTs) or leaking aboveground storage tanks (ASTs) on or immediately upgradient of the Property was readily apparent during the site visit. In addition, the Property was not listed in the underground or aboveground fuel storage tank databases within the government records/regulatory database report (FirstSearch Report).

Leaking Underground Storage Tanks (LUSTs)

No evidence for the presence of leaking underground storage tanks was observed on or adjacent to the Property was observed during the site reconnaissance.

Dry Cleaners

No dry-cleaning activity was observed on or adjacent to the Property during the site reconnaissance.

Solid Waste Disposal

No evidence of solid waste disposal was observed on or adjacent to the Property during the site reconnaissance.

Landfills

No evidence of landfills was observed on or adjacent to the Property during the site reconnaissance.

Polychlorinated Biphenyls (PCBs)

No leaking or stained equipment that would have the potential to contain PCBs (e.g., transformers, capacitors, light ballasts, hydraulic equipment) was observed at the Property during the site reconnaissance.

Waste Management and Chemical Handling

No significant quantities of hazardous materials were observed on or adjacent to the Property during the site reconnaissance.

Underground Oil or Gas Pipelines

No markers indicating the presence of underground pipelines were observed on or adjacent to the Property during the site reconnaissance.

Asbestos-Containing Material/Lead-Based Paint (ACMs/LBP)

Based on information obtained from the historical records review, the existing improvements were constructed at a time when asbestos-containing materials (ACMs) and lead-based paints (LBPs) were not yet phased out. Based on this information, there is a potential that ACMs and/or LBPs are present within the onsite buildings. **As the onsite buildings are to be demolished during redevelopment activities, EAS recommends that a comprehensive asbestos and lead paint survey be conducted prior to any disturbance/demolition activities; onsite building materials should be characterized for asbestos and lead by a reliable method. All activities involving ACMs and LBPs should be conducted in accordance with governmental regulations.**

Stained Soil or Asphalt Patches

No asphalt patches or stained soil were observed on or adjacent to the Property during the site reconnaissance.

Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on or adjacent to the Property during the site reconnaissance.

Radon

Radon gas is a naturally occurring radioactive gas that is invisible and odorless. Radon forms from the radioactive decay of small amounts of uranium and thorium naturally present in rocks and soils, so some radon exists in all rocks and soils. Because radon is a gas, it can easily move through soil and cracks in building slabs or basement walls and concentrate in a building's indoor air. According to the City-Data.com map of radon zones, five (5) radon tests have taken place in sites located within the Property's zip code of 91722, and zero (0) tests came back positive for radon levels of 4 picoCuries per liter (pCi/L) or above, which is the State of California's recommended action level. Los Angeles County is listed in Radon Zone 2 (Moderate Potential); counties that have a predicted average indoor radon screening level between 2 and 4 pCi/L. Based on this information, the presence of onsite radon levels above California's recommended action level is unlikely.

Clarifiers or Sumps

No clarifiers or sumps were observed on or adjacent to the Property during the site reconnaissance.

On-Site Wells

No on-site wells were observed on or adjacent to the Property during the site reconnaissance.

Septic Systems

Septic systems are important, as they can be a venue for mismanagement of hazardous or regulated wastes. No evidence of septic systems was observed on or adjacent to the Property during the site reconnaissance.

Air Emissions and Odors

No air emissions or odors were observed or noted to be emanating from the Property during the site reconnaissance.

Flood Zone

According to the Federal Emergency Management Agency (FEMA), National Flood Hazard Layer (NFHL) Viewer, Map Panel 06037C1700F (Effective Date 9/28/08), the Property is located within Zone X (flood hazard areas determined to be outside the 0.2% annual chance floodplain). Please see FEMA Flood Insurance Rate Map (FIRM) in the Appendices.

Wetlands Designation

According to a review of the U.S. fish and Wildlife Service National Wetlands Inventory Mapper as viewed on <http://www.fws.gov/wetlands/Data/Mapper.html>, no wetlands are located on or adjoining to the Property.

Pesticides/Herbicides

No pesticides or herbicides were observed being stored or used within the Property during the site reconnaissance.

Demolition Debris

No evidence of demolition debris was observed on or adjacent to the Property during the site reconnaissance.

Stressed Vegetation

No evidence of visibly stressed vegetation was observed on or adjacent to the Property during the site reconnaissance.

5.0 ADJOINING PROPERTIES

EAS conducted a reconnaissance of the adjoining properties to evaluate the potential for off-site impacts. These would include evidence of improper chemical storage or usage, surface staining or leakage, distressed vegetation, or evidence of dumping. A visual inspection from the public right-of-way did not reveal any issues of concern.

<u>Direction</u>	<u>Description</u>
North	Cinder block wall followed by a Southern Pacific Railroad track easement then single-family residential development
East	Chain-link fence followed by single-family residential development located along North Hartley Avenue
South	East San Bernardino Road then a paved utility line easement followed by Morada Avenue and single-family residential development
West	Chain-link fence followed by single-family residential Development located along North Walnuthaven Drive
Surrounding Vicinity	Primarily residential and commercial retail land uses

None of the adjoining properties were identified on any regulatory databases indicative of a pending/open case release, spill, or contamination condition. Based on information obtained during the Site inspection and historical records review, the adjoining properties do not appear to have any recognized environmental conditions that may impact the Property.

6.0 REGULATORY RECORDS REVIEW

EAS reviewed available databases from federal and state regulatory agencies to identify use, generation, storage, treatment and/or disposal of hazardous materials and chemicals or release incidents of such materials, which may have impacted the Property. The regulatory databases were provided to EAS from Environmental Data Resources Inc. (EDR). The Environmental FirstSearch™ Report (FirstSearch Report) is attached in the appendices of this report. The environmental and regulatory databases that were included in this review follow the ASTM standard E1527-13 guidelines.

- Federal National Priorities Listing (NPL) Sites
- Federal Delisted NPL Sites
- Comprehensive Environmental Response Compensation And Liability Information System List (CERCLIS)
- Federal CERCLIS: No Further Remedial Action Planned (NFRAP) Site List
- Federal Resource Conservation And Recovery Act (RCRA) Generator's List
- Federal RCRA Non-CORRACTS TSD Facilities List
- Federal RCRA CORRACTS Facilities List
- Federal RCRA Treatment, Storage And Disposal Facilities (TSDF's) List
- Federal Institutional Control/Engineering Control (IC/EC) Registries
- Federal Emergency Response Notification System (ERNS) List
- State And Tribal Lists Of *Hazardous Waste Sites* Identified For Investigation Or Remediation:
 - State-And Tribal-Equivalent NPL
 - State-And Tribal-Equivalent CERCLIS
 - State-And Tribal-*Landfill* And/or *Solid* Waste Disposal Site Lists
 - State-And Tribal-Leaking Storage Tanks Lists
 - State And Tribal Registered Storage Tank Lists
 - State And Tribal *Institutional Control/Engineering Control* Registries
 - State And Tribal Voluntary Cleanup Sites
 - State And Tribal Brownfield Sites

The Property was identified in the FirstSearch Report on the HAZNET, FINDS, and RCRA-NonGen/NLR databases.

The date of the most recent database update and a plotted map of the aforementioned listings, if any, depicting their location relative to the Property is included in the Appendices of this report.

Information obtained from the FirstSearch Report indicated that the Property has not been included on any institutional/engineering control databases that track activity and use limitations on properties.

Subject Property

HAZNET

This data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

The HAZNET database only contains information about types and quantities of wastes that are generated and not information pertaining to release events.

- The Property is identified on the HAZNET database as Covina Valley USD - Griswold Ctr at 16209 East San Bernardino Road (ID/Status: CAC002617428) regarding the disposal of twelve (12) tons of asbestos containing waste in 2007. No violations were listed in the database and no additional pertinent information was identified. This former tenant was not cross-referenced on any regulatory databases indicative of releases, spills, or contamination conditions. Based on the above information, this listing is not considered to have had a significant negative environmental impact on the Property and no further investigation is recommended at this time.

RCRA NonGen/NLR: RCRA – Non-Generators / No Longer Regulated

The EPA's Resource Conservation and Recovery Act (RCRA) facilities database identifies properties which report generation, storage, transportation, treatment, or disposal of hazardous waste. Non-Generators do not presently generate hazardous waste.

The Property is identified on the RCRA NonGen/NLR database as Covina-Valley Unified School District at 16209 East San Bernardino Road (ID/Status: CAC002973473). This facility is classified as a Non-Generator and described as a Handler: Non-Generators do not presently generate hazardous waste. No violations were listed in the database and no additional pertinent information was identified. This former tenant was not cross-referenced on any regulatory databases indicative of releases, spills, or contamination conditions. Based on the above information, this listing is not considered to have had a significant negative environmental impact on the Property and no further investigation is recommended at this time.

FINDS

The Facilities Index System (FINDS) contains both facility information and 'pointers' to other sources that contain more detail. FINDS includes the following databases: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement DOCKET used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

- The Property is identified on the FINDS database as Covina-Valley Unified School District at 16209 East San Bernardino Road (Registry ID: 110055802564). No violations were listed in the database and no additional pertinent information was identified. As per the database's Facility URL, no information was available through the Environmental Protection Agency's Facility Registry Service (FRS) Facility Detail Report. No violations or additional pertinent information was listed. This former tenant was not cross-referenced on any regulatory databases indicative of releases, spills, or contamination conditions. Based on the above information, this listing is not considered to have had a significant negative environmental impact on the Property and no further investigation is recommended at this time.

Adjoining and Surrounding Area Properties

Due to the Property's location in a dense urban area, numerous sites were identified within various databases in the regulatory agency report. No facilities listed in a database indicative of spills, releases, or contamination conditions are located immediately adjoining to the Property. No pending/open case facilities listed in a database indicative of spills, releases, or contamination conditions are located within 0.35-mile of the Property. Based on the depth to groundwater, regulatory status, distance, and/or hydraulic gradient, no facilities identified in the FirstSearch Report are suspected of having had a negative impact on the Property.

Orphan Sites

Two (2) additional facilities were listed as unmapped sites in the FirstSearch report. These facilities cannot be plotted due to errors or missing information in the regulatory records. EAS reviewed the unmapped sites in the database report and determined the facilities are not considered to represent a concern to the Property.

The regulatory records review has revealed no evidence of recognized environmental conditions in connection with the Property.

7.0 INFORMATION AND INTERVIEWS

City of Covina Building and Safety Division

EAS contacted the City of Covina Building and Safety Division for information regarding potential environmental concerns and recognized environmental conditions for the Property. According to Covina Building and Safety Division counter personnel, no records are on-file for the Property address and EAS was referred to the Los Angeles County Department of Public Works, Building and Safety Division, San Gabriel Valley Office, the agency with building permit jurisdiction for the Property.

Los Angeles County Department of Public Works, Building and Safety Division

EAS contacted the Los Angeles County Department of Public Works, Building and Safety Division, San Gabriel Valley Office for information regarding potential environmental concerns and recognized environmental conditions for the Property. According to Building and Safety Division counter personnel, no records are on-file for the Property.

Los Angeles County Department of Public Works, Environmental Programs Division

EAS contacted the Los Angeles County Department of Public Works, Environmental Programs Division, for files related to possible recognized environmental conditions for the Property. According to the Environmental Programs Division, no industrial waste, underground storage tank, or stormwater records are on file for the Property.

Los Angeles County Fire Department, Health Hazardous Materials Division (HHMD)/Los Angeles County Certified Unified Program Agency (CUPA)

EAS contacted the Los Angeles County Fire Department, Health Hazardous Materials Division (HHMD)/Los Angeles County Certified Unified Program Agency (CUPA) for files related to possible recognized environmental conditions for the Property. According to a response from the County Fire Department, Health Hazardous Materials Division, no hazardous materials records are on file for the Property.

South Coast Air Quality Management District (AQMD), Facility Information Detail (FINDS) database

EAS reviewed the South Coast Air Quality Management District (AQMD), Facility Information Detail (FINDS) database for files related to possible recognized environmental conditions for the Property. According to the AQMD FINDS database, no records are on file for the Property or any adjoining properties.

California Environmental Protection Agency, State Water Resources Control Board, GeoTracker regulated facilities database

EAS reviewed the California Environmental Protection Agency, State Water Resources Control Board, GeoTracker regulated facilities database for files related to possible recognized environmental conditions for the Property. According to the State GeoTracker database, no records are on file for the Property or any adjoining properties.

State of California, Department of Toxic Substances Control EnviroStor database

EAS reviewed the Department of Toxic Substances Control EnviroStor database for files related to possible recognized environmental conditions for the Property. According to the EnviroStor database, no records are on file for the Property or any adjoining properties.

Site Contact Interview

EAS received a Property Representative Questionnaire dated February 14, 2020 and completed by Mr. Z. Rich Rebenstorff, Director of Maintenance, Operations, Facilities & Transportation with the Covina-Valley Unified School District. Regarding Question #16, "Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contaminations of, the property or recommended further assessment of the property?, in a telephone interview, Mr. Rebenstorff clarified by stating that asbestos had been removed from the Property in the past and that he was aware of the current environmental site assessment (this report) being performed at the Property. Mr. Rebenstorff was unaware of any current or prior contamination conditions associated with the Property. No evidence of recognized environmental conditions was discovered by reviewing this questionnaire (See Appendices).

In addition, EAS received a User Questionnaire dated February 13, 2020 and completed by Mr. Mr. Steven Cook, Forward Planning Manager with MLC Holdings, Inc. No evidence of recognized environmental conditions was discovered by reviewing this questionnaire (See Appendices).

Former Site Contact Interview

No former property representative contact information was provided to EAS during the course of preparation of this report.

Specialized Knowledge

There is no specialized knowledge about the Subject Property as provided by the User (MLC Holdings, Inc.) of this Environmental Site Assessment. Therefore, no specialized knowledge was supplied to the environmental professional.

8.0 HISTORICAL USE INFORMATION REVIEW

Vapor Intrusion Condition (VIC)

As the Property and the adjacent properties are not identified in any Leaking UST, CERCLIS, or Institutional/Engineering Controls databases, and no evidence for the presence of leaking USTs or hazardous materials usage, storage, or disposal was observed within a 100-foot radius of the lease Site during the site visit, a potential vapor intrusion condition (VIC) does not appear to exist in connection with the Property.

Aerial Photographs

Aerial photographs were reviewed to identify historical land development and any uses, which may have impacted the Property. Photographs and maps provided by EDR were reviewed at approximately 5 to 10-year intervals dating back to 1928 (See Appendices). Historically, the Property was occupied by orchard land from at least 1928 until at least 1952. By 1964, the Property has appeared similar to present-day land uses.

Topographic Maps

Topographic maps were reviewed to identify historical land development and any uses, which may have impacted the Property. Maps provided by EDR and the USGS were reviewed at approximately 5 to 10-year intervals dating back to 1894 (See Appendices). Historically, the Property was depicted as vacant land from at least 1894 until at least 1927. The surrounding area was depicted as mostly vacant land with scattered residential structures. The 1894 topographic map depicts railroad tracks bordering the Property to the north with an improved road (East San Bernardino Road, formerly Covina Boulevard) bordering the Property to the south. By 1953, the Property was depicted as a vacant lot with adjoining properties depicted as orchard land use. By 1966, the Property was depicted as occupied by Griswold School with buildings located in their present-day configuration. All adjoining properties and the surrounding area were depicted as built-up areas by 1966.

Sanborn Fire Maps

EAS contacted EDR to obtain Sanborn fire insurance maps for the Property and surrounding areas. According to the Certified Sanborn Map Report, the Property is listed as Unmapped. The lack of Sanborn mapping suggests that the Property and surrounding area was not an historically urbanized area (See Appendices).

Oil and Gas Fields

Based on the California Geologic Energy Management Division (CalGEM), formerly the California Division of Oil, Gas and Geothermal Resources (DOGGR), online mapping application Well Finder, no production wells are shown on, adjoining, or within one mile of the Property.

City Directories

EAS reviewed historical city directory information provided by EDR for information pertaining to possible environmental concerns for the Property and surrounding properties. The City Directory Abstract (See Appendices) dated back to 1957 with listings for the Property dating back to 1980. All adjoining properties were identified as residential with none listed as environmentally significant. The following listings for the Property identified:

- 16209 East San Bernardino Road: 2014 Covina Unified School District Facility; 2010 Covina School District; 2003 Griswold Center/Tri-Community Adult School; 1995 Griswold Adult Center; 1985 Tri-Community Adult School; 1980 Tri-Community Adult School.
- 16209 San Bernardino Road: 2003 Griswold Center/Tri-Community Adult School; 1995 Griswold Adult Center; 1985 Tri-Community Adult School; 1980 Tri-Community Adult School.

No Property tenants were listed as environmentally significant.

Summary of Previous Environmental Site Assessments

EAS was not provided with any environmental reports including Phase I Environmental Site Assessments that were prepared previously by others.

Title Report

No Title Report was provided to EAS during the course of preparation of this report.

Historical Data Gaps

During the historical research process of the preparation of this report, there were no gaps exceeding five years in which EAS was unable to ascertain the probable onsite land use.

9.0 FINDINGS AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of the proposed Griswold Residential Project located at APN 8435-006-900, 16209 East San Bernardino Road in Covina, Los Angeles County, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report. **This assessment has revealed no evidence of recognized environmental conditions in connection with the Property.**

However, the following business environmental risks (BERs) were identified which warrant mention:

- Based on information obtained from the historical records review, the existing improvements were constructed at a time when asbestos-containing materials (ACMs) and lead-based paints (LBPs) were not yet phased out. Based on this information, there is a potential that ACMs and/or LBPs are present within the onsite buildings. **As the onsite buildings are to be demolished during redevelopment activities, EAS recommends that a comprehensive asbestos and lead paint survey be conducted prior to any disturbance/demolition activities; onsite building materials should be characterized for asbestos and lead by a reliable method. All activities involving ACMs and LBPs should be conducted in accordance with governmental regulations.**
- Historically, the Property and surrounding properties were occupied by orchard land from at least 1928 until at least 1952. A wide variety of pesticides, including those containing persistent compounds such as lead and arsenic, may have been used during this period. No information was obtained indicating evidence of improper storage, disposal or application of these materials and a review of available historical aerial photographs did not show improvements such as hangars, runways or large barns that would indicate significant storage, formulation and handling of these materials. However, given the planned extensive redevelopment and grading of the Property into residential land use, and the limited regulation of the potential storage and usage of agricultural chemicals during a significant period of the Property's historic agricultural land use, there is a potential for accumulation of elevated levels of the aforementioned constituents. **Based on the above information, onsite soils may contain pesticides/herbicides above action levels. Therefore, EAS believes it prudent that soil sampling and testing be performed at the Property prior to redevelopment activities. Once the analysis has been completed, the results would verify that contaminated soils above action levels are/are not present.**

In addition, the following items warrant mention:

- Although microbial growth may occur in a very short time span, an effort was made to identify conspicuous microbial growth in the common areas surveyed. In addition, EAS made an effort to observe water damaged building materials, which could indicate water intrusion into the structure. No significant areas of microbial growth or water intrusion was observed during the site visit. **If any areas of microbial growth are discovered during demolition activities, these materials should be characterized by a reliable method. All activities involving microbial growth should be conducted in accordance with governmental regulations.**

- Standard dust mitigation measures should be implemented during all redevelopment and soil handling activities. During any grading or excavation activities of the Property, redevelopment personnel must be made aware to look for unusual conditions suggesting buried debris or other potential adverse environmental conditions that may be discovered on the Property. In addition, **if any abnormal soils are discovered during redevelopment, such as stained soils, hydrocarbon odors, or any other unusual odors, all construction activities should be stopped immediately and EAS should be contacted for further assessment and monitoring.**
- **Onsite CVUSD maintenance personnel who opened the buildings for interior access during the Site visit warned EAS personnel to be careful of waste hypodermic needles from vagrant drug use. No hypodermic needles were observed during the Site visit, however, any onsite personnel performing future inspections or redevelopment activities should be made aware of the potential for encountering hypodermic needles and that appropriate measures are taken.**

10.0 LIMITATIONS

This Phase I Environmental Site Assessment has been modified to focus on the construction of a proposed wireless telecommunications facility and its relationship to any onsite Recognized Environmental Conditions, if any. It is up to the Client, based on their risk tolerance and applicable law, to determine the extent of further inquiry. The professional opinions contained in this report are based solely on the laws, regulations, and technical data known to EAS at the time of report preparation. The conclusions of this assessment rely on reasonably obtainable information from site reconnaissance, interviews with onsite personnel and public officials, and public records. No warranty is made regarding the accuracy of the publicly documented information or the opinions of officials or personnel consulted for the study. All known information has been disclosed and a good-faith effort has been made to consult pertinent sources.

It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed, from information obtained from limited research and site evaluation. Subsurface conditions were not investigated as part of this study and may differ from the conditions implied by visual observations. Additionally, the passage of time may result in a change in environmental characteristics at this site and on surrounding properties. This report does not warrant against future operations, activities, or conditions that may occur. This report is not a regulatory compliance audit. A regulatory compliance audit of the tenant operation would analyze compliance of the operation with regulatory requirements and accepted industry practices. The scope of the Phase I ESA focused on the likelihood or potential presence of recognized environmental conditions at the subject property, according to ASTM standards.

This study is not intended to assess or otherwise determine if any soil contamination, waste emplacement, or groundwater contamination exists on the subject property. This investigation has been based only upon prior site history, previous documentation, and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods. If the results of this study suggest that it is possible that hazardous materials contamination exists at the subject property, then further investigation (regulatory file review, subsurface testing) may be necessary to make a definite assessment. Our conclusions regarding the potential environmental impact from offsite facilities near the subject property are based on readily available information from the environmental databases and the assumed groundwater flow direction. A detailed file review of each facility was beyond the scope of work.

We appreciate your selection of EAS for this project and look forward to assisting you further on this and other projects. If you have any questions, comments, or concerns regarding the information within this report, or if further assistance is required, please contact us by e-mail at jr1996@easenv.com and gjl1999@easenv.com.

Sincerely,

ENVIRONMENTAL ASSESSMENT SPECIALISTS, INC

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in Section 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/4/2020 at 2:14:25 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Assessment Specialists were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Env. Assessment Specialists (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/26/1991
Comments: RWQCB conducted a site inspection of Baxter Pharmaseal in December 1989. As a result of the investigation, a subsurface investigation was conducted to determine the extent of contamination in the dioctyl phthalate (DOP) tank/precipitate collection and clarifier areas. Phase I and Phase II investigations were completed on 06/22/90 and 01/14/91 respectively. Phase I and Phase II investigations indicate that hazardous substances (PCE), toluene, freon-TF, Bis (2-ethyl hexyl phthalate (BEHP) have contaminated the soil. EPA recommends for a high priority SSI, DHS recommends high priority PEA.

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROL - Sites with Institutional Controls.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: NAPA CO. LUST SAN DIEGO CO. SAM - Environmental Case Listing. VENTURA CO. LUST - Listing of Underground Tank Cleanup Sites. ORANGE CO. SLIC REG 8 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 9 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. Sacramento Co. CS - Toxic Site Clean-Up List.

State/Tribal Tanks: UST CLOSURE MILITARY UST SITES - Military UST Sites (GEOTRACKER). UST - Active UST Facilities. UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders. UST - Proposed Closure of Underground Storage Tank (UST) Cases AST - Aboveground Petroleum Storage Tank Facilities. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land.

Database Descriptions

State/Tribal VCP: VCP Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. VCP - Voluntary Cleanup Program Properties

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Other SWF: LOS ANGELES CO. LF VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites. SAN DIEGO CO. LF - Solid Waste Facilities. CA LA LF - City of Los Angeles Landfills. WMUDS/SWAT - Waste Management Unit Database. Landfills owned and maintained by the City of Los Angeles. WMUDS/SWAT - City of Los Angeles Landfills

Other Haz Sites: SCH This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose. SCH - School Property Evaluation Program SAN DIEGO CO. HMMD - Hazardous Materials Management Division Database. CERS HAZ WASTE - CERS HAZ WASTE. US CDL - Clandestine Drug Labs. PFAS - PFAS Contamination Site Location Listing.

Other Tanks: SWEEPS UST Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. SWEEPS UST - SWEEPS UST Listing ALAMEDA CO. UST - Underground Tanks. KERN CO. Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

Appendix I: Questionnaires and Supporting Documents

PHASE I ENVIRONMENTAL SITE ASSESSMENT PROCESS

USER QUESTIONNAIRE

Proposed Griswold Residential Project, APN 8435-006-900, Covina, Los Angeles County, CA 91722

INTRODUCTION: In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site.

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes _____ No X

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes _____ No X

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP.

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes _____ No X

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated.

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? Yes X No _____
If you conclude the purchase price being paid for this property DOES NOT reasonably reflect the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

(5.) Commonly known or reasonably ascertainable information about the property.

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property? Yes X No _____

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes _____ No X

(c.) Do you know of spills or other chemical releases that have taken place at the property? Yes _____ No X

(d.) Do you know of any environmental cleanups that have taken place at the property? Yes _____ No X

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? Yes _____ No X

Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA’s Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability (“Common Elements” Guide) issued on March 6, 2003.

PHASE I ENVIRONMENTAL SITE ASSESSMENT PROPERTY REPRESENTATIVE QUESTIONNAIRE

Proposed Griswold Residential Project
APN 8435-006-900
Covina, Los Angeles County, CA 91722

<u>Question</u>	<u>Response</u>	<u>If yes, provide description</u>
1a. Is the <i>property</i> used for an industrial use?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
1b. Is any <i>adjoining property</i> used for an industrial use?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
2a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used for an industrial use in the past?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
2b. Did you observe evidence or do you have any prior knowledge that any <i>adjoining property</i> has been used for an industrial use in the past?	Yes <input type="checkbox"/> No <input type="checkbox"/> <input checked="" type="checkbox"/> Unk <input type="checkbox"/>	
3a. Is the <i>property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
3b. Is any <i>adjoining property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
4a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	
4b. Did you observe evidence or do you have any prior knowledge that any <i>adjoining property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>	

<u>Question</u>	<u>Response</u>	<u>If yes, provide description</u>
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
6a. Are there currently any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
7a. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that originated from a contaminated site?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
7b. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that is of an unknown origin?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
8a. Are there currently any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	
9a. Is there currently any stained soil on the <i>property</i> ?	Yes <input type="radio"/> No <input type="radio"/> Unk <input checked="" type="radio"/>	

<u>Question</u>	<u>Response</u>	<u>If yes, provide description</u>
9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the <i>property</i> ?	Yes No <input checked="" type="radio"/> Unk	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes No <input checked="" type="radio"/> Unk	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
13a. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes <input checked="" type="radio"/> No Unk	
13b. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes <input checked="" type="radio"/> No Unk	

<u>Question</u>	<u>Response</u>	<u>If yes, provide description</u>
14. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of <i>environmental liens</i> or governmental notification relating to past or recurrent violations of environmental laws with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
15a. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of hazardous substances of <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
15b. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of hazardous substances of <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
15c. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
15d. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
16. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of any <i>environmental site assessment</i> of the <i>property</i> or facility that indicated the presence of <i>hazardous substances</i> or <i>petroleum products</i> on, or contaminations of, the <i>property</i> or recommended further assessment of the <i>property</i> ?	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Unk	In a telephone interview, Mr. Rebenstorff clarified by stating that asbestos had been removed from the Property in the past and that he was aware of the current environmental site assessment (this report) being performed at the Property. Mr. Rebenstorff was unaware of any current or prior contamination conditions associated with the Property.
17. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any <i>hazardous substance</i> or <i>petroleum products</i> involving the <i>property</i> by any <i>owner</i> or <i>occupant</i> of the <i>property</i> ?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	
18a. Does the <i>property</i> discharge <i>wastewater</i> (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a storm water system?	Yes <input type="radio"/> <input checked="" type="radio"/> No <input type="radio"/> Unk	

<u>Question</u>	<u>Response</u>	<u>If yes, provide description</u>
18b. Does the <i>property</i> discharge waste water (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a sanitary sewer system?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk	
19. Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the <i>property</i> ?	Yes <input checked="" type="radio"/> No <input type="radio"/> Unk	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk

Industrial Waste / Underground Storage Tanks / Stormwater

[Back](#)

You searched the following address:

Street Number: 16209 Street Name: San Bernardino

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

RE: PRA of February 12, 2020, Reference # H020545-021220.

Dear Jeff Randle,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 16209 East San Bernardino Road
Covina CA 91722**

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction [click here](#).
