

**INITIAL SITE ASSESSMENT  
ROUNABOUT CONCEPT AT INTERSECTION OF,  
COUNTY LINE ROAD,  
AND CALIMESA BOULEVARD  
CALIMESA, CALIFORNIA**

**PROJECT NO. 63263.2  
APRIL 12, 2016**

Prepared For:

City of Calimesa.  
908 Park Avenue  
Calimesa, California 92320

Attention: Mr. Michael Thornton

## Initial Site Assessment (ISA) Checklist

### Project Information

**District** 8\_County Riverside    **Route:** I-10 at County Line Road    **Post Mile**    **EA**

**Description:** Road Improvements and roundabout construction on County Line Road, east and west of Calimesa Boulevard,, Calimesa, CA

**Is the project on the HW Study Minimal-Risk Projects List (HW1)?** \_NO

**Project Manager:** Michael Thornton

**Phone #** (909) 795-9801 x225?

**Project Engineer:** TKE Engineering/Terry Renner

**Phone #** (951) 680-0440

### Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

- 1. Project Features:** New R/W? YES    Excavation? YES    Railroad Involvement? NO  
Structure demo/modification? YES    Subsurface utility relocation? YES
- 2. Project Setting:** Rural    or    Urban X
- 3. Current land uses** Commercial Development and Vacant Land  
**Adjacent land uses** North, and East,: Commercial/Retail and Residential, South and West Residential and Vacant Lnad
- 4. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.**

All or a portion of three properties will be obtained as part of the proposed construction of the roundabouts and street improvements. One property, Dinosaur Tires, 13715 Calimesa Boulevard on the NEC of Calimesa Boulevard and County Line Road, is a former gas station. It is unknown if the former gas station USTs are still in-place or have been removed and if contamination from these USTs is present. On the SWC of the Calimesa Boulevard and County Line Road intersection and is a former automotive machine shop, addressed 625 County Line Road. It is unknown if interior hoists or other potential sources of contamination are present on this property. Both of these properties are Recognized Environmental Conditions (RECs).

Potential RECs present along the proposed roadway improvements include: 1)Adjacent the proposed roadway improvements are former leaking UST properties which have been remediated and have closed cases, however two of these properties remain as gas stations with one property having USTs located within 20 feet of the proposed improvements. There is no evidence of current leaking USTs from these gas stations on or adjacent the proposed improvements; 2) Aerially deposited Lead (ADL) may be present on the undeveloped and vacant portion of the proposed roadway improvements, primarily west of I-10. .

5. **Conduct Field Inspection.** Date 3/16/16
6. **Use the attached map to show potential or known HW sites:** See Figure I

STORAGE STRUCTURES/PIPELINES:

**Underground tanks** YES \_\_\_\_\_ **Surface tanks** None \_\_\_\_\_ **Sumps** None \_\_\_\_\_ **Ponds** None \_\_\_\_\_

## Initial Site Assessment (ISA) Checklist

(continued)

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

**Surface staining:** None Observed \_\_\_\_\_ **Oil sheen :** None Observed \_\_\_\_\_

**Odors:** None Observed \_\_\_\_\_ **Vegetation damage:** None Observed \_\_\_\_\_

**Other:** None Observed \_\_\_\_\_

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

**Buildings:** Potential in NEC and SWC \_\_\_\_\_ **Spray-on fireproofing :** NA \_\_\_\_\_

**Pipe wrap:** NA \_\_\_\_\_ **Friable tile :** NA \_\_\_\_\_

**Acoustical plaster:** NA \_\_\_\_\_ **Serpentine:** NA \_\_\_\_\_

**Paint:** Unknown \_\_\_\_\_ **Other:** NA \_\_\_\_\_

7. **Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.** See Fig 1.
8. **Other comments and/or observations:** Lead oxide and lead chromate commonly were used in paints until 1978, when regulations limited the allowable lead content in paint. Lead is a suspected carcinogen, has potential to cause birth defects, and is a reproductive toxin. Any yellow traffic paint, yellow thermoplastic paint/tape, or markings placed prior to 1990 contain lead chromate as the pigment, which, when removed, might generate airborne heavy metal debris in excess of the threshold established by Title 22 California Code of Regulations. Exposure to airborne contaminants from lead-based paint that could be present in the roadway striping could affect safety and health if not properly handled and disposed during striping removal.

Aerially deposited lead (ADL) in soils near roadways, is attributed to the use of lead in gasoline, a practice that was phased out beginning in the mid 1970s. Typically, ADL exists in the top 6 inches of soil in unpaved shoulder and median areas. As there have been unpaved areas, prior to 1976, adjacent to County Line Road especially west of I-10, ADL although not expected may be encountered. The lead levels in exposed surface soils should be tested and if above concentrations in excess of the hazardous waste threshold should be disposed at a Class I landfill or other appropriate facility.

Gasoline, diesel fuel, oil, and lubricants for operation of construction equipment are typically used, handled, and stored by contractors on all roadway construction projects. In all construction projects, there is a potential for the accidental release of fuels or lubricants from construction equipment or vehicles. No specific risks related to such a release have been identified for the proposed project. Contractors are required to handle hazardous materials in accordance with applicable laws, including health and safety requirements. No acutely hazardous materials would be used or stored on-site during project construction. During construction, unknown hazardous materials could be encountered, or materials could be accidentally spilled. Best Management Practices would be required to minimize or avoid these risks.

### **ISA Determination**

Does the project have potential hazardous waste involvement? YES If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the investigation? YES If "YES," explain; then give an estimate of additional time required:

A full ISA should be conducted to evaluate the RECS and potential RECs associated with this project. This work will require 3-4 weeks to complete. The ISA may determine that field sampling and testing, such as soil gas survey, soil borings and/or sampling for ADL may be necessary which would increase the time frame and costs/

---

A complete ISA is being prepared to transmit the ISA checklist determination and conclusions to the Project Manager and Project Engineer.

**ISA Conducted:** \_\_\_\_\_

**Date** 3-18-16

Michael Kevin Osmun CE 55116

## 1.0 EXECUTIVE SUMMARY

The project area is a proposed roundabout concept with roadway expansion, at the intersection of County Line Road, and Calimesa Boulevard. The proposed project extends along County Line Road, 300 feet west of, and 600 feet east of Calimesa Boulevard and along Calimesa Boulevard approximately 250 feet north of, to 350 feet south of County Line Road. The proposed project is located in an area of mixed use, including vacant land, residential, and commercial.

The purpose of the project is to increase capacity, reduce congestion, and improve mobility and safety. This is to be accomplished by adding one eastbound lane on County Line Road, before I-10 and 600 feet east of Calimesa Boulevard, one southbound lane on Calimesa Boulevard from 150 feet south of County Line Road to County Line Road, and constructing a 90-foot diameter roundabout at the intersection of County Line Road and Calimesa Boulevard. The project will improve street drainage through the construction of new pavement, curb and gutter, and curb inlets, and other minor storm drain facilities, along with the required transitions to meet the new roundabout/street improvements. There are no bridge structures within the project limits, therefore, there is no bridge demolition/renovation with this project.

The proposed project would entail acquiring one property on the northeast corner and two properties on the southwest corner of the intersection of Calimesa Boulevard and County Line Road. These properties include a former gasoline station, current Dinosaur Tire, located at 13715 Calimesa Boulevard, and a former automotive machine shop with unknown previous use, located at 625 West County Line Road and the South Mesa Water Company, Well No. 11 water well site.

Potential environmental concerns within the proposed project area and surrounding properties were identified and/or researched through electronic database and public records reviews, site reconnaissance, and history of usage of the project area and nearby properties. The environmental assessment conducted during this ISA have resulted in the following conclusions:

- No stained soils or unusual odors were noted adjacent the project alignment.
- ADL is considered to be a concern within the proposed project area.

- This ISA has revealed the following evidence of HREC, indicative of releases or threatened releases of hazardous substances on, at, in, or to the project, including: Calimesa Smog and Tires (former Calimesa Sunshine gasoline station), 905 Calimesa Boulevard; Fastrip gasoline station, 13710 Calimesa Boulevard; Shell gasoline station (former SOCO gasoline station), 33928 County Line Road; and Baker's fast food restaurant (former Unocal gasoline station), 665 West County Line Road.
- This ISA has revealed the following evidence of RECs, indicative of releases or threatened releases of hazardous substances on, at, in, or to the project, including Dinosaur Tire (former gasoline station), 13715 Calimesa Boulevard, and former Troyce's Automotive Machine Shop, 625 West County Line Road.

ADL along County Line Road and Calimesa Boulevard is not considered to be significant due to the development of the properties adjacent to the roadways east of I-10. However, soil sampling should be conducted at vacant parcels to verify this assumption.

All of the identified HREC sites have closed LUST cases, and are not anticipated to have a significant impact to the proposed project, as the proposed work will involve shallow excavation at/near the periphery of these sites.

The Dinosaur Tire site is a REC, as it is a former gasoline station, and had USTs, piping, hydraulic hoist(s), and/or clarifier(s) present at the property. There were no tests taken during the removal of the USTs. The piping, hydraulic hoist(s), and/or clarifier(s) may have leaked or otherwise impacted the property. The former Troyce's Automotive Machine Shop is a REC, as it has had machine shop activities from at least the early 1990s until 2013, with prior site uses unknown, dating back to the construction of the shop building in the 1950s.

Based on the planned acquisition of the two above REC sites, the Dinosaur Tire and Service, 13715 Calimesa Boulevard, and former Troyce's Automotive Machine Shop, 625 West County Line Road, we recommend that Phase II ESA be conducted to ascertain the presence of potential sources of contamination. At the Dinosaur Tire and Service, we recommend a geophysical survey to identify the location of the former USTs present on the site. A soil and soil gas survey should be conducted at the former USTs, piping, dispensers, in-ground hoist(s), clarifier(s), and assess potential

soil and/or soil vapor contamination. At the former Troyce's building/property a soil gas investigation should be conducted to determine if past machine shop activities have impacted the property. The recommended Phase II ESA activities should be completed during the PA & ED.

The presence of hazardous building materials (e.g., asbestos-containing materials and based paint) is a non-scope issues by Caltrans and ASTM, however, the following recommendations are provided for the planned acquisition properties: An asbestos and lead based paint survey of the existing structures should be conducted in accordance with applicable local, state, and federal guidelines and regulations. The recommendations of that report should be followed for any planned demolition or structural modifications.

## **2.0 INTRODUCTION**

This firm has conducted an Initial Site Assessment (ISA) for the Roundabout Concept, at County Line Road, and Calimesa Boulevard, located within and adjacent to the City of Calimesa, Riverside and San Bernardino Counties, California. The proposed project will consist of the construction of roadway improvements, including a roundabout at the intersection of Calimesa Boulevard, and County Line Road.

The proposed project would entail acquiring one property on the northeast corner and two properties on the southwest corner of the intersection of Calimesa Boulevard and County Line Road. These properties include a former gasoline station, current Dinosaur Tire, located at 13715 Calimesa Boulevard, and a former automotive machine shop with unknown previous use, located at 625 West County Line Road. And the South Mesa Water Company, Well No. 11, well site..

This ISA was conducted for City of Calimesa. in general accordance with Caltrans ISA guidelines. This document is in general conformance with the United States Environmental Protection Agency's "Standards and Practice for All Appropriate Inquires (AAI)" set forth in 40 CFR (Code of Federal Regulations) Part 312, and with the American Society of Testing and Materials (ASTM) Standard E 1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". Certain exceptions in this ISA to the AAI standard included: 1) no property appraisals were conducted for the properties to be acquired in conjunction with this project, and 2) no direct interviews of the owners of these properties.

The purpose of this ISA is to evaluate and identify recognized environmental conditions (REC), historical recognized environmental conditions (HREC), and/or controlled recognized environmental conditions (CREC) that may be associated with the proposed project:

“REC”           The presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

“HREC”           A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meets the unrestricted use criteria established by a regulatory authority without subjecting the property to any required controls (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

“CREC”           A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority and that is subject to required controls (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

REC, HREC, and CREC do not include de minimis conditions, that generally, do not present a threat to human health or the environment, and generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agency. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized environmental conditions.

## 2.1 Methodology

The following tasks were completed in order to conduct the ISA for the proposed project: public agency databases were reviewed in order to provide insight into the previous and current uses of the proposed project with respect to environmental impairments and conditions; Federal, state, local, tribal, and proprietary lists and

databases were reviewed to ascertain the presence of known environmentally impaired sites within the immediate area, and to determine their impact, if any, to the proposed project; historical aerial photographs, topographic maps, city directory, and Sanborn Fire Insurance Maps, as available, were examined to investigate the past use of the proposed project area; and site reconnaissance to assess current conditions of the proposed project and adjacent properties, and visibly identify areas of potential contamination that may impact the proposed project construction.

### **3.0 PROJECT DESCRIPTION**

The proposed roundabout concept will entail roadway expansion along County Line Road, 300 feet west of, and 600 feet east of Calimesa Boulevard and along Calimesa Boulevard approximately 250 feet north of, to 350 feet south of County Line Road. The proposed roundabout is located at the intersection of County Line Road and Calimesa Boulevard. The proposed project is located in an area of mixed use, including vacant land, residential, and commercial.

An Index Map and Conceptual Improvement Plan are presented on Figures 1 and 2, respectively.

#### **3.1 Current Land Uses**

The current land use is improved roadway, with some portions containing curb and gutter and sidewalk. Properties adjacent to the existing roadways consist of commercial businesses east of I-10. The commercial businesses consist of current and former gasoline stations, restaurants, and retail. The former gasoline stations are currently retail tire and/or smog centers and a fast food restaurant. The proposed project is located in an area of mixed use, including vacant land, residential, and commercial.

#### **3.2 Site Topography**

Regionally and locally, the topography is gently sloping to the west, towards San Timoteo Canyon.

#### **4.0 USER PROVIDED INFORMATION**

Under ASTM E 1527-05 and AAI, specific tasks are assigned to the User that will help identify potential RECs associated with the property. These tasks do not require the technical expertise of an environmental professional, and are generally not performed by environmental professionals performing an ISA. The User may provide the information gathered from these tasks, including the following:

- Review title and judicial records for environmental liens or activity and use limitations (AULs);
- Specialized knowledge or experience (that is material to RECs in connection with the property) of the User;
- Actual knowledge (of environmental liens or AULs) of the User;
- Reason for significantly lower purchase price;
- Commonly known or reasonably ascertainable information (that is material to RECs in connection with the property); and
- Other information, including the purpose for performing the ISA.

The only information provided by the User with regard to the above list, was the purpose for performing the ISA, which is to evaluate the project for RECs, HRECs, and CRECs prior to construction of the project, which will entail acquiring one property on the northeast corner and two properties on the southwest corner of the intersection at Calimesa Boulevard and County Line Road.

#### **5.0 GEOLOGIC AND HYDROLOGIC SETTING**

The project is located in the northern portion of the Peninsular Ranges Geomorphic Province of Southern California. Based on reports from the area, the upper soils are older alluvial deposits composed of fine grained silts, sandy silts, silty clays, with interbedded lenses of silty sands and sands. These deposits are typically underlain by the San Timoteo Formation.

## 5.1 Groundwater Hydrology

The site is located within the Calimesa Groundwater Basin and is underlain by water-bearing and semi water-bearing formations. The project and surrounding areas are serviced by the South Mesa Water Company (SMWC). The SMWC has a well site, Well No.11, located approximately 140 feet west of the intersection of Calimesa Boulevard and County Line Road, which is one of the properties to be acquired for the project. SMWC Well No. 11 has a depth to groundwater of approximately 300 feet. Groundwater flow direction, at the project, is to the west following the natural topography of the area.

## 6.0 HISTORY OF SITE USAGE

To obtain a history of previous site usage, this firm contacted Environmental Data Resources, Inc. (EDR) to perform a search for historical aerial photographs, city directory information, Sanborn Fire Insurance Maps, and topographic maps. No coverage for Sanborn Fire Insurance Maps was available. Historical aerial photographs were also reviewed online at [www.historicaerials.com](http://www.historicaerials.com).

A copy of the EDR historical aerial photographs, with the approximate project area and scale shown, are provided in Appendix B. The EDR City Directory is provided within Appendix C.

The following table provides a detailed review of historical aerial photographs, topographic (topo) maps, and city directory information for the project area:

DATE (S)	REFERENCE(S)	OBSERVATIONS
1899, 1901	USGS Topo Maps	The scale of these early maps, which show almost exactly the same details, are too large to indicate any site detail, and the lack of development makes it difficult to determine the location of the project area. However, the land sections, county boundary, and Mexican/Spanish Land Grant boundary lines are shown on the 1899 map, which aide in locating the site, which is shown as vacant land, surrounded by vacant land. Scattered residences are visible westerly of the site. The creek associated with Live Oak Canyon is shown flowing easterly to westerly over 0.5 mile north of the site. Around half a dozen roads are present in the areas shown.

DATE (S)	REFERENCE(S)	OBSERVATIONS
1938	USGS & Online Aerial Photographs	Most of the project area encroaches into or crosses agricultural land, including groves, dry farm land, and possibly a small amount of irrigated farm land. Calimesa Boulevard is a 2-lane, asphalt paved road, and is the main thoroughfare for the local area. County Line Road is a dirt road west of Calimesa Boulevard, and a small asphalt-paved road to the east. At the southwest corner of the intersection at Calimesa Boulevard and County Line Road, within the present day/proposed intersection, is a rectangular building, likely commercial. At the northwest corner of this same intersection, within the present day/proposed County Line Road and near/at the present day/proposed intersection, are two structures, which may include a single-family residence, but one or both are likely related to a commercial activity of some kind. At the northeast corner of this same intersection, immediately northeast of the present day/proposed intersection, is what appears to be a single-family residence and nearby concrete slab which may have formerly supported a structure. Nearby rural and/or agricultural residences with associated outbuildings are present.
1949	USGS Aerial Photograph	The project area and surrounding areas are somewhat the same as previously shown. The local area remains largely rural and agricultural, but increased development, including commercial and industrial, has occurred. County Line Road may be asphalt paved west of Calimesa Boulevard. At the north end of the present day/proposed southbound off-ramp for the I-10 Freeway are smaller structures and/or buildings, which may be residential and/or agriculture related. The present day/proposed southeast corner of the intersection at County Line Road and Calimesa Boulevard cuts through a square building, likely commercial, which is nearly oriented coincident with the south-southeast to north-northwest orientation of Calimesa Boulevard. The increased development in the local area includes residential and commercial buildings or structures near the project area, particularly along Calimesa Boulevard.
1953, 1954	USGS Aerial Photograph and USGS Topo Maps	The project area and surrounding areas are somewhat the same as previously shown. However, the I-10 Freeway, a divided, 2-lane freeway, has been constructed.
1959, 1961	USGS & Online Aerial Photographs	At the southwest corner of the intersection at Calimesa Boulevard and County Line Road, within the present day/proposed intersection, the previously shown rectangular commercial building is absent, replaced by another rectangular

DATE (S)	REFERENCE(S)	OBSERVATIONS
		<p>building, which is larger and immediately south of the previous building. This newer rectangular building is extant at the present day, addressed 625 County Line Road. At the northeast corner of this same intersection, immediately northeast of the present day/proposed intersection, is an "L"-shaped commercial building, which is extant at the present day, addressed 13715 Calimesa Boulevard, which looks like a gasoline station. Increased residential and commercial development is evident in the local area, with fewer groves present. The roads along Calimesa Boulevard and County Line Road appear to have been widened, perhaps by as much as 50 percent.</p>
<p>1966,                      1967,                      1968,                      1969</p>	<p>USGS &amp; Online                      Aerial                      Photographs and                      USGS Topo Map</p>	<p>The infrastructure at the project area at County Line Road, and Calimesa Boulevard are largely the same as they are at the present day. Several gasoline stations are now present along County Line Road, at the intersection with Calimesa Boulevard and near the I-10 Freeway. These gasoline stations include one at the southeast corner of the intersection of County Line Road and Calimesa Boulevard, addressed 905 Calimesa Boulevard, replacing the previously shown building, one at the northwest corner of the intersection of County Line Road and Calimesa Boulevard, addressed 13710 Calimesa Boulevard, one on the north side of County Line Road, just east of the northbound on-ramp for the I-10 Freeway, addressed 33928 County Line Road, and just east of the northbound off-ramp for the I-10 Freeway, addressed 665 County Line Road. Increased development has occurred near the site, including commercial and industrial. The present day shopping center northeast of the intersection at County Line Road and Calimesa Boulevard, northeast of the gasoline station (present day Dinosaur Tire), has been built. Just south-southeast of the gasoline station at 665 County Line Road, and just east of the northbound off-ramp for the I-10 Freeway, are around half a dozen commercial and/or industrial buildings. Just west of the commercial building at the southwest corner of County Line Road and Calimesa Boulevard, along the south side of County Line Road, a groundwater well is indicated on the 1967 USGS topographic map.</p>
<p>1972,                      1973,                      1975</p>	<p>USGS &amp; Online                      Aerial                      Photographs and                      USGS Topo Map</p>	<p>The project area and surrounding areas are largely the same as previously shown. However, the present day Del Taco restaurant building has been built between the gasoline stations on the north side of County Line Road, situated between Calimesa Boulevard and the northbound on-ramp for the I-10 Freeway.</p>

DATE (S)	REFERENCE(S)	OBSERVATIONS
		Beyond these gasoline stations and restaurant building is what appears to be a commercial site, possibly a storage facility.
1978, 1979, 1980	Online Aerial Photographs and USGS Topo Map	The gasoline station at the northeast corner of County Line Road and Calimesa Boulevard is being operated under Dinosaur Tire (since 1977). The gasoline station at the northwest corner of this same intersection was removed for development. Otherwise, the project area and surrounding areas are largely the same as previously shown.
1985	USGS Aerial Photograph	The gasoline station at the northwest corner of County Line Road and Calimesa Boulevard has been reconstructed. A large building, industrial and/or commercial, has been built amongst the handful of buildings south-southeast of the gasoline station at 665 County Line Road and just east of the northbound off-ramp for the I-10 Freeway. Otherwise, the project area and surrounding areas are largely the same as previously shown.
1988, 1989, 1990	USGS Aerial Photographs USGS Topo Map, and City Directory	Another building has been added to the half dozen south-southeast of the gasoline station at 665 County Line Road. There appears to be a storage yard, possibly gravel-covered, adjacent to the west of the gasoline station at 33928 County Line Road. This yard appears to include, vehicles, trucks, and/or trailers. Otherwise, the project area and surrounding areas are essentially the same as previously shown.
1992	City Directory	The city directory information includes Accurate Auto Repair at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard. Troyce's Automotive Machine Shop is listed at 625 West County Line Road. Dave's Unocal Service is listed at 665 West County Line Road.

DATE (S)	REFERENCE(S)	OBSERVATIONS
1995, 1996	USGS/DOQQ & Online Aerial Photographs, USGS Topo Map, and City Directory	The gasoline station on the south side of the road at 665 County Line Road has been removed. The apparent storage facility north of the two gasoline stations and restaurant building along the north side of County Line Road is now the present day church. A canopy structure near County Line Road, associated with the gasoline station at the southeast corner of County Line Road and Calimesa Boulevard, has been removed, suggesting the gasoline station is no longer operating. Otherwise, the project area and surrounding areas are largely the same as previously shown. At the gasoline station, addressed 33928 County Line Road, Stacey Transmission and Repair is operating. Troyce's Automotive Machine Shop is listed at 625 West County Line Road. Accurate Auto Repair is listed at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard.
1999	City Directory	The city directory information includes Accurate Auto Repair at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard. Troyce's Automotive Machine Shop is listed at 625 West County Line Road. Smog & Tune is listed at 905 Calimesa Boulevard.
2002, 2003	Online Aerial Photograph and City Directory	On the south side of County Line Road, just east of the present day/proposed northbound off-ramp for the I-10 Freeway, at the former gasoline station, is now the present day Baker's restaurant building. Just east of the Baker's restaurant building, along the south side of County Line Road, an area that includes the present day groundwater production well (South Mesa Water Company Well #11) has been cleared and/or graded. Otherwise, the project area and surrounding areas are largely the same as previously shown. Troyce's Automotive Machine Shop is listed at 625 West County Line Road. Accurate Auto Repair is listed at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard.
2005, 2006	USDA/NAIP & Online Aerial Photographs	The project area and surrounding areas are essentially the same as previously shown.
2008, 2009, 2010	USDA/NAIP & Online Aerial Photographs and City Directory	The project area and surrounding areas are essentially the same as previously shown. However, the northbound and southbound sides of the I-10 Freeway have been expanded and bridged together/merged over County Line Road. Shell is listed at 33928 County Line Road. Troyce's Automotive Machine Shop is listed

DATE (S)	REFERENCE(S)	OBSERVATIONS
		at 625 West County Line Road. Calimesa Smog Test Only is listed at 905 Calimesa Boulevard. Accurate Auto Repair is listed at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard.
2012, 2013	USDA/NAIP & Online Aerial Photographs, USGS Topo Map, and City Directory	The project area and surrounding areas are essentially the same as previously shown. SOCO is listed at 33928 County Line Road. Troyce's Automotive Machine Shop is listed at 625 West County Line Road. Accurate Auto Repair is listed at 941 Calimesa Boulevard, just offsite to the southeast at the south end of the present day/proposed Calimesa Boulevard.

### 6.1 Sanborn Fire Insurance Maps

No Sanborn Fire Insurance Map coverage was available for the proposed project area and adjacent properties.

A copy of the EDR Sanborn Map report is provided in Appendix D.

### 7.0 SITE RECONNAISSANCE

A site reconnaissance was conducted on March 17, 2016 by Mr. M. Kevin Osmun of this firm. The purpose of the site reconnaissance was to ascertain, through visual observation, the use, storage, generation, release, and disposal of hazardous materials on and adjacent to the project area. A color aerial photograph was used during our site reconnaissance, and is provided as Figures 3. Business that currently or have handled or generated hazardous materials are labeled on this figure.

The project area is a proposed roundabout concept with roadway expansion along County Line Road, 300 feet west of, and 600 feet east of Calimesa Boulevard and along Calimesa Boulevard approximately 250 feet north of, to 350 feet south of County Line Road. The proposed roundabout is located at the intersection of County Line Road and Calimesa Boulevard. The proposed project is located in an area of mixed use, including vacant land, residential, and commercial.

Currently, County Line Road and Calimesa Boulevard are improved 3-lane roadways with a signalized intersection at Calimesa Boulevard and County Line Road, east of I-10 and a 2-lane road west of I-10. Utilities are underground. Pad mounted

transformers are present east of I-10. No sign of leakage from these transformers were noted.

Businesses east of I-10, adjacent to County Line Road and Calimesa Boulevard, include fast food restaurants, gas stations, retail businesses, water well site, former auto machine shop, tire shops, and a dry cleaners. One property, located on the northeast corner and two properties located on the southwest corner of the intersection of Calimesa Boulevard and County Line Road are to be acquired for the proposed project. The property on the northeast corner of the intersection of Calimesa Boulevard and County Line Road is Dinosaur Tire and Service, Inc., addressed 13715 Calimesa Boulevard. Dinosaur Tire and Service is a former gas station as evidenced by the existing dispenser islands and canopy present at the site. The location of the USTs was not readily visible through cuts in the asphalt or other visual clues, and there former location and whether they were removed or are still in-place is unknown. The other two properties to be acquires, located on the southwest corner of the intersection of County Line Road and Calimesa Boulevard are the former Troyce's Automotive Machine Shop, addressed 625 County Line Road and the SMWC Well No. 11 well site located 140 feet west of Calimesa Boulevard on County Line Road.

Other current or former gas stations located adjacent the project include Calimesa Tire and Smog (former Sunshine Gas Station) on the southeast corner of County Line Road and Calimesa Boulevard, addressed 605 County Line Road, Fastrip, addressed 13710 Calimesa Boulevard, Shell Gas Station, (former Texaco Gas Station) addressed 33928 County Line Road, and Baker's Restaurant (former Unocal Gas Station) addressed 665 County Line Road.

No significant trash and debris, was noted in the project area. No indications of stained soil, distressed vegetation, or unusual odors were noted. No drums, barrels, or other containers were noted.

Color photographs of the project and adjacent properties, documenting the site reconnaissance, are presented in Appendix A.

## **8.0 AERIALY DEPOSITED LEAD**

Throughout California, lead is regularly detected in soils adjacent to roadways, associated with the past combustion of leaded fuel. The lead can be present at

concentrations exceeding background levels. This aerially deposited lead (ADL) tends to decrease with distance from the roadway, and with depth in the soil profile. ADL is considered to be a concern within the project area at the on- and off-ramps for the I-10 Freeway. ADL along County Line Road and Calimesa Boulevard is not considered to be significant due to the development of the properties adjacent to the roadways east of I-10 and the limited use of the roadway (County Line Road) west of I-10. However, some soil sampling should be conducted at vacant parcels to verify this assumption.

## **9.0 REGULATORY AGENCY RECORDS REVIEW**

As the project lies within both the County of Riverside and the County of San Bernardino, records relating to environmental compliance and hazardous materials/waste within both counties was requested. The County of San Bernardino, the County of San Bernardino, Fire Department, Hazardous Materials Division (CSBFD-HMD) and the Riverside County, Department of Environmental Health (RCDEH) are generally the lead agency. The Regional Water Quality Control Board, Santa Ana Region or the County may be the lead agency for soil and groundwater investigations and remediation.

### **9.1 Water Quality Control Board**

The State Water Quality Control Board's online Geotracker database lists sites that have permitted underground storage tanks (USTs), leaking USTs, waste discharge requirements, land disposal, military sites, Department of Toxic Substances Control (DTSC) cleanup and hazardous waste sites, and other cleanup sites. A review of the Geotracker database showed three listed sites adjacent the project. The listed sites were Unocal #5636, 665 County Line Road, Fastrup Food Store, 13710 Calimesa Boulevard, and Calimesa SOCO, 33928 County Line Road. All three of these sites have closed leaking underground storage tank (LUST) cases. The Fastrup Food Store and Calimesa SOCO (currently Shell Gas Station) have permitted USTs.

Information from the RWQCB regarding the former Sunshine Service Station, 905 Calimesa Boulevard, indicated the property was closed after eight borings drilled to 90 feet in 1994, 1995, and 1997 showed a retardant layer at about 57 feet deep and no groundwater had been affected by the release. A closure letter was issued in 1998 for the property.

## 9.2 CSBFD-HMD/RCDEH

The CSBFD-HMD and RCDEH were contacted to search their files for any records they may have on file for selected properties adjacent the project. The CSBFD-HMD was contacted for any records for the Dinosaur Tire and Service property. The RCDEH was contacted to search their files for Troyce's Automotive Machine Shop and Sunshine Gas Station.

The RCDEH had records for the former Sunshine Industries of America Service Station, 905 Calimesa Boulevard beginning in 1993 when the USTs at the site were first permitted by the County. Five USTs were present on the property, three gasoline, one diesel and one waste oil tank. The USTs were reportedly installed in 1980. A 1994 Preliminary Environmental Assessment for the property indicated petroleum hydrocarbon contamination was present at the site. The borings drilled to a depth of 55 feet deep showed a maximum gasoline concentration of 16,875 mg/kg and benzene at a maximum concentration of 31.2 mg/kg. The report recommended further assessment prior to formulating a clean-up plan. The USTs were removed in February of 1995 and hydrocarbon contamination was detected beneath the USTs. There is no record of any clean-up of the hydrocarbon contamination at this property in the County records.

The CSBFD-HMD had two files for Dinosaur Tire and Service, one relating to the former USTs at the site and one for their handling and generating of hazardous waste due to the automotive related work conducted. According to the file for the former USTs, they were removed in April of 1986 under County supervision, three gasoline and one waste oil tank were removed. At the time of removal of the USTs no soil samples were taken as the inspector determined that only the sand backfill around the USTs had hydrocarbon contamination. A closure letter was issued in 2003 for the USTs. No location, except for near the north property line was provided for the USTs.

The other file related to the handling storage and disposal of waste oil, virgin oil, lube oil, waste anti-freeze, and a parts washer. The records indicated the business was closed for a short period of time from 2013 to 2014, and at that time were not doing oil changes. Pictures in the file showed drains and former hoists present in the building.

**10.0 ENVIRONMENTAL DATABASE REVIEW**

LOR Geotechnical Group, Inc. contracted with EDR to provide an environmental database search for the proposed project area. The database search provides information regarding landfills, USTs, hazardous waste generators, etc., on the Project area and surrounding properties in accordance with ASTM Standards and AAI set forth in 40 CFR part 312. A copy of the EDR Radius Map™ Report with GeoCheck® is provided within Appendix E.

### 10.1 RCRA-SQG

Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQG) include sites that generate between 100 and 1,000 kg of hazardous waste per month. Four sites are listed in the RCRA-SQG database within 0.25 mile of the project area. Two of the four sites, Smog and Tune, addressed 905 Calimesa (Boulevard), and Dinosaur Tires and Road Service, addressed 13715 Calimesa Boulevard, are located within/along the proposed project area. All four RCRA-SQG sites have no reported

violations. The four RCRA-SQG sites should have no adverse environmental impact to the project area, based on the lack of reported violations and/or distance(s) away.

## 10.2 LUST

The California State Water Resources Control Board (SWRCB) maintains a list of all leaking underground storage tanks (LUST) within the state. According to the SWRCB LUST database, there are four sites listed (two sites are listed twice) within 0.5 mile of the project area. All four sites are located within/along the proposed project. These LUST sites include Unocal #5636, addressed 665 West County Line Road, Calimesa SOCO, addressed 33928 County Line Road, Calimesa Sunshine S.S., addressed 905 (Calimesa Boulevard), and Fastrip Food Store (17), addressed 13710 Calimesa Boulevard. All four sites have closed LUST cases. No adverse environmental impact to the proposed project area is anticipated from these LUST sites, based on the closed LUST cases.

## 10.3 UST

The Underground Storage Tank database is maintained by the SWRCB and lists all registered USTs. This database lists one site, Verizon - Calimesa, addressed 1010 Calimesa Boulevard, over 0.1 mile southeast of the project area. No pertinent UST information is reported for this site, other than the fact that only one UST is indicated to be present. According to the SWEEPS UST database, this UST is a 2,000-gallon diesel tank. This UST is likely used to store diesel fuel for backup emergency power generation. This UST site should have no adverse environmental impact to the project area due to the distance away.

## 10.4 CDL

The CDL (Clandestine Drug Lab) database is a listing of drug lab locations. Listing of a location does not indicate that any illegal drug lab materials were or were not present, and does not constitute a determination that the location either requires or does not require additional cleanup work. One site, addressed 611 County Line Road, is listed in this database. This site is located along the south side of County Line Road, approximately 220 feet east of Calimesa Boulevard, within/along the proposed project area. The date for the incident is listed on April 21, 1998, and is indicated to be a illegal drug lab location. No other information is provided. Based on the distance from

the nearest structure at this property to the sidewalk, roughly 10 feet, and the clean-up of this former drug lab operation, this CDL site is not anticipated to have a significant impact to the project area.

#### 10.5 SWEEPS UST

The Statewide Environmental Evaluation and Planning System (SWEEPS) database is an UST listing that was updated and maintained by a company contracted by the SWRCB. This database lists five sites within 0.25 mile of the project area. Three of the five sites, Calimesa SOCO, Calimesa Sunshine S.S., and Fastrip Food Store 17, are discussed in the LUST section (10.2) of this report. The two other sites include Calimesa Fire Station, addressed 906 Park Avenue, and General Telephone CO, (Verizon) addressed 1010 Calimesa Boulevard. Both of these sites are listed with diesel USTs, and are over 0.1 mile from the project area. None of the SWEEPS UST sites are anticipated to have an adverse environmental impact to the project area due to lack of reported UST release(s), distance, and closed case status.

#### 10.6 HIST UST

The SWRCB maintains the Historical UST (HIST UST) list which contains active and inactive underground storage tank locations. This database lists five sites (one site is listed twice) within 0.25 mile of the project area. Three of the five sites, Ok Service, Unocal Service Station #5636, and Fastrip Food Store 17, are discussed in the LUST section (10.2) of this report. The two other sites include Calimesa Fire Station, addressed 906 Park Avenue, and Dinosaur Tire Center, addressed 13715 Calimesa Boulevard. The Calimesa Fire Station, located over 0.1 mile from the project area, is listed with four 1,000-gallon diesel USTs installed in 1978. Dinosaur Tire Center is listed with three gasoline USTs, with no indication of tank size or when the tanks were installed. In general, the listed HIST UST sites are not anticipated to have an adverse environmental impact, based on the lack of reported UST release(s), closed LUST case, and/or distance(s) from the project area. However, the Dinosaur Tire Center, which is planned to be acquired under the proposed project, has had no regulatory involvement, and the presence or absence of USTs and/or soil and soil vapor contamination is unknown.

### 10.7 CHMIRS

The California Hazardous Materials Incident Report System (CHMIRS) database, maintained by the California Office of Emergency Services, contains information on reported hazardous materials incidents, i.e., accidental releases or spills. One site is listed in this database within/along the proposed project area. This site is located at 33928 County Line Road, the location of the present day Shell gasoline station. The listed incident was reported to the RCDEH by the SoCo Group in October of 2008, and involved the release of 9 gallons of gasoline onto asphalt, as the result of a hose disconnecting during fueling by a customer. This release was reportedly contained. The LUST case for this site was closed by the RCDEH in December of 2009. Based on the spill containment, regulatory oversight, and closure of the LUST case, the listed release is not anticipated to have an adverse environmental impact to the project area.

### 10.8 RCRA NonGen/NLR

RCRAInfo is EPA's comprehensive information system that includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. One site, Ag Commodities Express at 13600 Calimesa Boulevard, is listed in this database approximately 0.2 mile north of the project area. This site has no violations listed, and based on this and the distance away, should have no adverse environmental impact to the project area.

### 10.9 FINDS

The Facility Index System (FINDS) database contains both facility information and "pointers" to other sources of information that contain more detail. Two sites are listed in this database, T-Mobile West Corporation and Smog and Tune. T-Mobile West Corporation is listed at 613 East County Line Road, which does not appear to be a valid address. The EDR database report indicates this site is located within/along the proposed project, however, the address is east County Line Road which is over one mile to the east of the project area. The information provided suggests this site is registered in an environmental interest/information system, with no other pertinent information. The Smog and Tune, at 905 Calimesa (Boulevard), points to RCRA, likely because this site is a RCRA SQG. Based on the information provided, or lack thereof, these FINDS sites are not anticipated to have an adverse environmental impact to the

project area.

#### 10.10 Cortese

The Cortese database list sites designated by the SWRCB (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). One site, Henry N. Wochholz WWRF, is listed with no address. An online search indicates this site is a waste water recycling facility located at 880 West County Line Road, located 0.5 mile west of the project area. The information provided in the Cortese database indicates a waste discharge order was effective in February of 2007. Based on the nature of this site and distance away, no adverse environmental impact to the project area is anticipated.

#### 10.11 DRYCLEANERS

This database is a list of drycleaner-related facilities that have EPA identification numbers. These are facilities with certain Standard Industrial Classification (SIC) codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; and laundry and garment services. Plaza Cleaners at 34088 County Line Road, was the only cleaners listed in this database. However, County Line Cleaners at 34112 County Line Road is also located in this area. Both these sites are located over 100 feet north of the east end of the project area. Based on the distance away and lack of reported release(s), these drycleaner sites should have no adverse environmental impact to the project area.

#### 10.12 HAZNET

This database is kept by the California EPA (Environmental Protection Agency), and includes facility and manifest data from the copies of hazardous waste manifests received each year by the DTSC (Department of Toxic Substances Control). Four sites (two sites are listed three times) are listed in this database, three of which are gasoline stations located within/along the proposed project area for the project area. The fourth site, Henry N Wochholz Wastewater Treatment Plant, is located 0.5 mile west of the project area. The hazardous waste manifests for the three gasoline station sites, include waste and mixed oil, tank bottom waste, organic solids, unspecified organic liquid mixture, and contaminated soil associated with site cleanup. Based on

the closed LUST cases, lack of reported release(s), and/or distance away, no adverse environmental impact to the project area is anticipated from these HAZNET sites.

#### 10.13 HIST CORTESE

The historical Cortese (HIST CORTESE) list is a historical listing from the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (CALSTES). Four sites are listed in this database, three of which are gasoline stations located within/along the proposed project area for the project area. The gasoline station sites have closed LUST cases. The fourth site is Henry N. Wochholz Wastewater T F, for which the database listing provides no pertinent information. Based on the closed LUST cases and/or distance away, the HIST CORTESE sites are not anticipated to have an adverse environmental impact to the project area.

#### 10.14 San Bernardino County Permit

This listing maintained by CSBFD-HMD includes underground storage tanks, medical waste handlers/generators, hazardous materials handlers, hazardous waste generators, and waste oil generators/handlers. Nine sites are listed in this database, with six under 0.125 mile of the project area. Three of the four of the six closest sites are current or former gasoline station sites located within/along the proposed project area for the project area. Two of the sites are drycleaners located over 100 feet from the east end of the project area. No adverse environmental impact to the project area is anticipated from these CSBFD-HMD permitted sites, based on their distance away and/or the oversight provided by the CSBFD-HMD.

#### 10.15 Notify 65

The Notify 65 database, no longer updated, is a listing of all Proposition 65 incidents reported to counties by the SWRCB and the Regional Water Quality Control Board. One site, Calimesa ARCO #1958 at 1216 Calimesa Boulevard, over 0.6 mile from the project area, is listed in this database. The Notify 65 database listing provides no information, however, there is a closed LUST case from 2008 for this site. Based on the distance away and closed LUST case, the Notify 65 listed site should have no significant environmental impact to the project area.

#### 10.16 ECHO

The ECHO database provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. Two sites, T-Mobile West Corporation and Smog and Tune, are listed in the ECHO database. These two sites are discussed in detail in the above FINDS database section of this report.

#### 10.17 EDR Hist Auto

This EDR proprietary United States Historical Auto Station (US Hist Auto Stat) database includes records based on EDR's search of selected national collections of business directories, and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records. Three sites are listed in this proprietary EDR database. Two of the three sites, addressed 625 West County Line Road and 13715 Calimesa Boulevard, are located within/along the proposed project area for the project area. Listings for 625 West County Line Road are for Troyce's Automotive Machine Shop, periodically from 2001 to 2012. Listings for 13715 Calimesa Boulevard are for Dinosaur Tire Service, periodically from 2005 to 2012. The third site, addressed 941 Calimesa Boulevard, is located just offsite to the southeast, and has listings for Accurate Auto Repair, periodically from 1999 to 2012. The Accurate Auto Repair site is not anticipated to have an adverse environmental impact to the project area. Based on the planned acquisition of the properties that include the sites at 625 West County Line Road and 13715 Calimesa Boulevard, and the past uses (including gasoline station and machine shop) with no known assessment, cleanup, and/or regulatory involvement, the environmental impact to the project area is unknown.

#### 10.18 EDR Hist Cleaners

This EDR proprietary United States Historical Cleaners (US Hist Cleaners) database includes records based on EDR's search of selected national collections of business directories, and has collected listings of potential dry cleaner sites that were available

to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches. Three sites, over 100 feet from the east end of the project area, are listed in the EDR US Hist Cleaners database. The first listed site, at 34088 County Line Road, has listings for A1 Cleaners, Plaza Cleaners, or A1 Plaza Cleaners, periodically from 2001 to 2012. The second listed site, at 34092 County Line Road, has listings for Laundromat, periodically from 1999 to 2012. The last listed site, at 34112 County Line Road, has listings for County Line Cleaners, periodically from 2001 to 2012. Based on the distance away and no reported environmental release, these EDR US Hist Cleaners sites should have no adverse environmental impact to the project area.

#### 10.19 RGA LUST

The EDR RGA (Recovered Government Archive) LUST database provides a list of LUST incidents derived from historical databases, and includes many records that no longer appear in current government lists. This database is compiled from records formerly available from the SWRCB. Two sites (both listed multiple times) are listed in this database, both of which are located within/along the proposed project area for the project area. Unocal Service Station #5636 is listed at 655 County Line Road and 665 West County Line Road, periodically from 1994 to 2012. Calimesa Gas Station or Calimesa Sunshine S.S. is listed at 905 Calimesa Boulevard, periodically from 1994 to 2012. Based on the closed LUST cases for these RGA LUST sites, no adverse environmental impact to the project area is anticipated.

#### 10.20 Orphan Summary

The orphan summary is a list of all sites whose location is not readily identified and/or mapped. One site, Calimesa SO CO at 33928 County Line Road, is listed in the orphan summary, due to the city being listed as Yucaipa instead of Calimesa. This site is shown with the LUST and HIST CORTESE databases. This site has a closed LUST case, and is not anticipated to have an adverse environmental impact to the project

area. No other sites at or adjacent to the project area are listed in the orphan summary.

## **11.0 DATA GAPS**

Under AAI, data gaps that remain after the conduct of all required activities must be identified. The source of information consulted to address the data gaps should be identified, and the significance of the data gaps with respect to our ability to identify conditions indicative of releases or threatened release of hazardous substances on, at, in, or to the property should be addressed.

There are no significant data gaps remaining after our conduct of the AAI.

## **12.0 VAPOR INTRUSION STUDY**

The purpose of a Tier 1 Vapor Intrusion Study (VIS) is to determine if a vapor intrusion or encroachment condition exists based on the information determined during the ISA (Phase I ESA).

### **12.1 Tier 1 Screening**

A VIS, comprised of Tier 1 Screening, was conducted by this firm for the Project. The VIS was conducted in general accordance with the Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, American Society for Testing and Materials E2600-10. ASTM E2600-10 was chosen as a methodology to evaluate potential contaminant vapor concerns at or adjoining the Project.

Based on the results of the Tier 1 Screening, utilizing the EDR Radius Map with Geotek Report, and research of the history of the project area and adjoining properties, there are potential sites with current or former leaking USTs that would provide a source (fuel-contaminated soil) of vapor for intrusion under or into the project. If there were no properties to be acquired for this project then a vapor intrusion issue would not be considered for a roadway project. However, two of the three properties to be acquired, the Dinosaur Tire property and the former Troyce's Automotive Machine Shop, have the potential for soil gas at these properties. This potential for soil gas should be addressed unless these properties will not be developed

with any inhabitable structures.

### **13.0 CONCLUSIONS AND RECOMMENDATIONS**

The project area is a proposed roundabout concept with roadway expansion along County Line Road, 300 feet west of, and 600 feet east of Calimesa Boulevard and along Calimesa Boulevard approximately 250 feet north of, to 350 feet south of County Line Road. The proposed roundabout is located at the intersection of County Line Road and Calimesa Boulevard. The proposed project is located in an area of mixed use, including vacant land, residential, and commercial.

The proposed project would entail acquiring one property on the northeast corner and two properties on the southwest corner of the intersection of Calimesa Boulevard and County Line Road. These properties include a former gasoline station, current Dinosaur Tire, located at 13715 Calimesa Boulevard, and a former automotive machine shop with unknown previous use, located at 625 West County Line Road and the South Mesa Water Company, Well No. 11 water well site.

Potential environmental concerns within the proposed project area and surrounding properties were identified and/or researched through electronic database and public records reviews, site reconnaissance, and history of usage of the project area and nearby properties. The environmental assessment conducted during this ISA have resulted in the following conclusions:

- No stained soils or unusual odors were noted adjacent the project alignment.
- ADL is considered to be a minor concern within the proposed project area.
- This ISA has revealed the following evidence of HREC, indicative of releases or threatened releases of hazardous substances on, at, in, or to the project, including: Calimesa Smog and Tires (former Calimesa Sunshine gasoline station), 905 Calimesa Boulevard; Fastrip gasoline station, 13710 Calimesa Boulevard; Shell gasoline station (former SOCO gasoline station), 33928 County Line Road; and Baker's fast food restaurant (former Unocal gasoline station), 665 West County Line Road.
- This ISA has revealed the following evidence of REC, indicative of releases or

threatened releases of hazardous substances on, at, in, or to the project, including Dinosaur Tire and Service (former gasoline station), 13715 Calimesa Boulevard, and former Troyce's Automotive Machine Shop, 625 West County Line Road.

ADL along County Line Road and Calimesa Boulevard is not considered to be significant due to the development of the properties adjacent to the roadways east of I-10. However, soil sampling should be conducted at vacant parcels to verify this assumption.

All of the identified HREC sites have closed LUST cases, and are not anticipated to have a significant impact to the proposed project, as the proposed work will involve shallow excavation at/near the periphery of these sites.

The Dinosaur Tire and Service site is a REC, as it is a former gasoline station, and had USTs, piping, dispensers, hydraulic hoist(s), and/or clarifier(s) present at the property. The USTs were removed under County oversight but no soil samples were taken. It is unknown whether the USTs, piping, dispensers, hydraulic hoist(s), and/or clarifier(s) may have significantly leaked or otherwise impacted the property. The former Troyce's Automotive Machine Shop is a REC, as it has former machine shop activities from at least the early 1990s until at least 2013, with prior uses unknown, dating back to the construction of the shop building in the 1950s.

Based on the planned acquisition of the two above REC sites at Dinosaur Tire and Service, 13715 Calimesa Boulevard, and former Troyce's Automotive Machine Shop, 625 West County Line Road, we recommend that Phase II ESA be conducted to ascertain the presence of potential sources of contamination. At the Dinosaur Tire and Service, we recommend a geophysical survey to identify the location of the former USTs and associated piping present on the site. A soil and soil gas survey should be conducted at the former USTs, in-ground hoist(s), dispensers, piping, clarifier(s), etc., and assess potential soil and/or soil vapor contamination. At the former Troyce's building/property a soil gas investigation should be conducted to determine if past machine shop activities have impacted the property. The recommended Phase II ESA activities should be completed during the Project Approval & Environmental Document (PA & ED).

The presence of hazardous building materials (e.g., asbestos-containing materials and

based paint) is a non-scope issues by Caltrans and ASTM, however, the following recommendations are provided for the planned acquisition properties: An asbestos and lead based paint survey of the existing structures should be conducted in accordance with applicable local, state, and federal guidelines and regulations. The recommendations of that report should be followed for any planned demolition or structural modifications.

#### **14.0 STATEMENT OF QUALIFICATIONS**

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. M. Kevin Osmun has over 20 years experience in the environmental field. Mr. Osmun directs LOR Geotechnical Group's environmental operations and has conducted over 1,000 Phase I Environmental Site Assessments for the private and public sectors. The properties have ranged from agricultural to commercial/industrial. In addition to his experience with environmental assessments for property transfers, he has managed projects that require mitigation prior to and during development. Mr. Osmun is well versed in hazardous waste sampling and characterization methodologies in soil and groundwater regimes and risk assessments. Projects have ranged from leaking USTs, solid waste landfills, TSD facility closures to single spill response. LOR Geotechnical Group, Inc. is one of three firms that previously provided report review for underground storage tank closure for the County of San Bernardino, Fire Department Hazardous Materials Division.

Mr. Osmun has a B.S. in geology from Wayne State University, Detroit, Michigan. He is a Registered Professional Civil Engineer in the State of California.

#### **15.0 LIMITATIONS**

This report was prepared solely for the use and benefit of LOR's client, the City of Calimesa, and their designates. They may release this information to third parties, who may use and rely upon this information at their discretion. However, any use of or reliance upon this information by a party other than the City of Calimesa and their designates, shall be solely at the risk of such third party and without legal recourse

against LOR Geotechnical Group, Inc.; its subsidiaries and affiliates; or their respective employees, officers, or directors; regardless of whether the action in which recovery of damages is sought is based upon contract, statute, or otherwise. This information shall not be used or relied upon by a party which does not agree to be bound by the above statement.

The content and conclusions provided by LOR in this ISA are based on information collected during our investigation, which may include, but is not limited to, visual site inspections, interviews with the site owner, regulatory agencies and other pertinent individuals, review of available public documents, subsurface exploration and laboratory testing of soil samples, and our professional judgement based on said information at the time of preparation of this document. Any subsurface samples results and observations presented herein are considered to be representative of the area of investigation; however, soil conditions may vary between sample locations and may not necessarily apply to the general site as a whole. If future subsurface or other conditions are revealed which may vary from these findings, the newly-revealed conditions must be evaluated and may invalidate the conclusions of this report.

This report has been prepared in accordance with generally accepted practices using standards of care and diligence normally practiced by recognized consulting firms performing services of a similar nature. LOR Geotechnical Group, Inc. (LOR) is not responsible for the accuracy of information provided by other individuals or entities which is used in this report. This report presents our professional judgement based upon data and findings identified in this report, and the interpretation of such data based upon our experience and background, and no warranty, either expressed or implied, is made. The conclusions presented are based upon the current regulatory climate and may require revision if future regulatory changes occur.

## **16.0 TIME LIMITATIONS**

The findings of this report are valid as of this date. Changes in the condition of a property can, however, occur with the passage of time, whether they be due to natural processes or the work of man on this or adjacent properties. In addition, changes in the Standards-of-Practice and/or Governmental Codes may occur. Due to such changes, the findings of this report may be invalidated wholly or in part by changes beyond our control. Therefore, this report should not be relied upon after a significant amount of time without a review by LOR Geotechnical Group, Inc., verifying the suitability of the conclusions and recommendations.

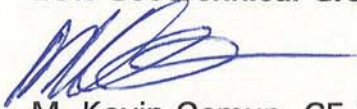

City of Calimesa.  
April 29, 2016

Project No. 63263.2

**17.0 CLOSURE**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR part 312.

Respectfully submitted,  
**LOR Geotechnical Group, Inc.**

M. Kevin Osmun, CE 55116

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RESEARCH SUMMARY

Contact: Kevin Osmun

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by LOR Geotechnical Group, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** 34D1-4F23-977A

**PO #** NA

**Project** NA

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 34D1-4F23-977A

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

## Limited Permission To Make Copies

LOR Geotechnical Group, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## EXECUTIVE SUMMARY

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Federal Delisted NPL site list***

Delisted NPL..... National Priority List Deletions

#### ***Federal CERCLIS list***

FEDERAL FACILITY..... Federal Facility Site Information listing  
CERCLIS..... Comprehensive Environmental Response, Compensation, and Liability Information System

#### ***Federal CERCLIS NFRAP site list***

CERCLIS-NFRAP..... CERCLIS No Further Remedial Action Planned

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS..... Corrective Action Report

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

## EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 12/14/2015 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Lists of Hazardous waste / Contaminated Sites***

CDL: A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

A review of the CDL list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 CDL site within approximately 0.001 miles of the target property.

### ***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>AG COMMODITIES EXPRE</i>	<i>13600 CALIMESA BLVD</i>	<i>N 1/8 - 1/4 (0.216 mi.)</i>	<i>F46</i>	<i>70</i>

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/20/2015 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

EPA Id: CAL000146986

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2014 has revealed that there are 8 HAZNET sites within approximately 0.001 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	625 W COUNTY LINE RD	0 - 1/8 (0.000 mi.)	B7	12

Not reported	13715 CALIMESA BLVD	NE 0 - 1/8 (0.091 mi.)	D37	56

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

# EXECUTIVE SUMMARY

## EDR RECOVERED GOVERNMENT ARCHIVES

### ***Exclusive Recovered Govt. Archives***

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 9 RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

**FINDS:**

Registry ID: 110002774276

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).  
  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 5  
Baseline Flow: 3  
Reclamation: Producer-User: Reclamation requirements that have been issued to a producer of reclaimed water who also uses the product.  
POTW: POTW has a local pretreatment program that has been approved by the U.S. EPA (or the regional board if the state is delegated the Federal Pretreatment Program) as being in conformance with federal prtreatment regulations [40CFR Part 403].  
Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.  
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Case Worker: LS  
Local Agency: RIVERSIDE COUNTY LOP  
RB Case Number: Not reported  
LOC Case Number: 201032797  
File Location: Local Agency  
Potential Media Affect: Soil  
Potential Contaminants of Concern: Gasoline  
Site History: Soil samples were taken December 22, 2009 during tank and piping removal activities. Up to 29 ppm TPHg, 990 ppb 1,2,4-TMB, 280 ppb 1,3,5-TMB, 770 ppb benzene, 410 ppb ethylbenzene, 2640 ppb total xylenes, 2200 ppb toluene, and 86000 ppb ethanol was detected under the piping. A total of 10.65 tons of impacted soil was removed from the site on March 11, 2010 in the vicinity of PD2-2. Soil samples taken at the bottom of the excavation at 7 had 1930 ppm TPHg, 29.2 ppm benzene, 503 ppm toluene, 721 ppm xylenes, 2.89 ppm MTBE, 19.1 ppm naphthalene, 260 ppm 1,2,4-TMB, 84.6 ppm 1,3,5-TMB, 22.4 ppm n-butylbenzene, 13.6 ppm isopropylbenzene, 5.2 ppm sec-butylbenzene and 6.3 ppm 4-isopropyltoluene. The pit was excavated deeper and soil samples were taken from the bottom at 10.5. Sample results showed 0.134 ppm TPHg, 0.075 ppm benzene, 0.659 ppm toluene, 9.06 ppm xylenes, 0.336 ppm MTBE, 3.69 ppm naphthalene, 11.1 ppm 1,2,4-TMB, 3.2 ppm 1,3,5-TMB, 1.89 ppm n-butylbenzene, 0.232 ppm isopropylbenzene, 0.23 ppm sec-butylbenzene and 0.32 ppm 4-isopropyltoluene

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/30/2015	Source: EPA
Date Data Arrived at EDR: 11/07/2015	Telephone: N/A
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 01/26/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/30/2015	Source: EPA
Date Data Arrived at EDR: 11/07/2015	Telephone: N/A
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 01/26/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/30/2015	Source: EPA
Date Data Arrived at EDR: 11/07/2015	Telephone: N/A
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 01/26/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 01/06/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/19/2016
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/19/2016
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 06/09/2015

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/09/2015  
Date Data Arrived at EDR: 06/26/2015

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015  
Date Data Arrived at EDR: 06/26/2015  
Date Made Active in Reports: 09/16/2015

Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### **LUCIS: Land Use Control Information System**

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 02/16/2016
Number of Days to Update: 13	Next Scheduled EDR Contact: 05/30/2016
	Data Release Frequency: Varies

### **US ENG CONTROLS: Engineering Controls Sites List**

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 02/29/2016
Number of Days to Update: 53	Next Scheduled EDR Contact: 06/13/2016
	Data Release Frequency: Varies

### **US INST CONTROL: Sites with Institutional Controls**

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695

## ***Federal ERNS list***

### **ERNS: Emergency Response Notification System**

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/22/2015	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 06/26/2015	Telephone: 202-267-2180
Date Made Active in Reports: 09/16/2015	Last EDR Contact: 12/29/2015
Number of Days to Update: 82	Next Scheduled EDR Contact: 04/11/2016
	Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

### **RESPONSE: State Response Sites**

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/07/2015	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/07/2015	Telephone: 916-323-3400
Date Made Active in Reports: 12/17/2015	Last EDR Contact: 02/03/2016
Number of Days to Update: 40	Next Scheduled EDR Contact: 05/16/2016
	Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/07/2015	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/07/2015	Telephone: 916-323-3400
Date Made Active in Reports: 12/17/2015	Last EDR Contact: 02/03/2016

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### **Local Lists of Hazardous waste / Contaminated Sites**

#### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/17/2015	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/04/2015	Telephone: 202-307-1000
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 03/01/2016
Number of Days to Update: 76	Next Scheduled EDR Contact: 06/13/2016
	Data Release Frequency: No Update Planned

#### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400

### **DEED: Deed Restriction Listing**

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

### **Other Ascertainable Records**

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/09/2015

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Number of Days to Update: 61	Next Scheduled EDR Contact: 05/30/2016
	Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/03/2015	Telephone: 703-308-4044
Date Made Active in Reports: 03/09/2015	Last EDR Contact: 02/12/2016
Number of Days to Update: 6	Next Scheduled EDR Contact: 05/23/2016

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2012	Source: EPA
Date Data Arrived at EDR: 01/15/2015	Telephone: 202-260-5521
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 12/23/2015
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/04/2016
	Data Release Frequency: Every 4 Years

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2013	Source: EPA
Date Data Arrived at EDR: 02/12/2015	Telephone: 202-566-0250
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 02/24/2016
Number of Days to Update: 110	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Annually

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203

	Data Release Frequency: Annually

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/25/2013	Source: EPA
Date Data Arrived at EDR: 12/12/2013	Telephone: 703-416-0223
Date Made Active in Reports: 02/24/2014	Last EDR Contact: 03/08/2016
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/20/2016
	Data Release Frequency: Annually

## RMP: Risk Management Plans

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/26/2015	Telephone: 202-564-8600
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 01/25/2016

	Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 10/17/2014	Telephone: 202-564-6023
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/12/2016
Number of Days to Update: 3	Next Scheduled EDR Contact: 05/23/2016
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 07/01/2014	Source: EPA
Date Data Arrived at EDR: 10/15/2014	Telephone: 202-566-0500

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

	Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 11/18/2015	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 11/23/2015	Telephone: 916-341-6066
Date Made Active in Reports: 01/21/2016	Last EDR Contact: 02/16/2016
Number of Days to Update: 59	Next Scheduled EDR Contact: 05/30/2016
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2014	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 10/14/2015	Telephone: 916-255-1136
Date Made Active in Reports: 12/11/2015	Last EDR Contact: 01/11/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/25/2016
	Data Release Frequency: Annually

## HIST CORTESE: Hazardous Waste & Substance Site List

The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

Date of Government Version: 04/01/2001	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/22/2009	Telephone: 916-323-3400
Date Made Active in Reports: 04/08/2009	Last EDR Contact: 01/22/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 11/23/2015	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/24/2015	Telephone: 916-323-3400

## NOTIFY 65: Proposition 65 Records

Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

Date of Government Version: 09/10/2015	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/05/2016	Telephone: 916-445-3846
Date Made Active in Reports: 02/12/2016	Last EDR Contact: 12/17/2015
Number of Days to Update: 38	Next Scheduled EDR Contact: 04/04/2016
	Data Release Frequency: No Update Planned

## UIC: UIC Listing

A listing of wells identified as underground injection wells, in the California Oil and Gas Wells database.

Date of Government Version: 07/23/2015	Source: Department of Conservation
Date Data Arrived at EDR: 09/15/2015	Telephone: 916-445-2408
Date Made Active in Reports: 10/13/2015	Last EDR Contact: 12/18/2015
Number of Days to Update: 28	Next Scheduled EDR Contact: 03/28/2016
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 04/15/2015	Source: RWQCB, Central Valley Region

	Data Release Frequency: Quarterly

## FUELS PROGRAM: EPA Fuels Program Registered Listing

This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 11/23/2015	Source: EPA
Date Data Arrived at EDR: 11/24/2015	Telephone: 800-385-6164
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 02/24/2016
Number of Days to Update: 86	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Quarterly

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 02/18/2016
Number of Days to Update: 45	Next Scheduled EDR Contact: 05/30/2016
	Data Release Frequency: No Update Planned

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

COUNTY LINE ROAD/CALIMESA BOULEVARD ROUNDABOUT IM  
COUNTY LINE/CALIMESA BOULEVARD  
CALIMESA, CA 92320

### TARGET PROPERTY COORDINATES

Latitude (North): 34.003672 - 34° 0' 13.22"  
Longitude (West): 117.064549 - 117° 3' 52.38"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 494039.2  
UTM Y (Meters): 3762370.5  
Elevation: 2374 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 5630639 YUCAIPA, CA  
Version Date: 2012  
  
South Map: 5640934 EL CASCO, CA  
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

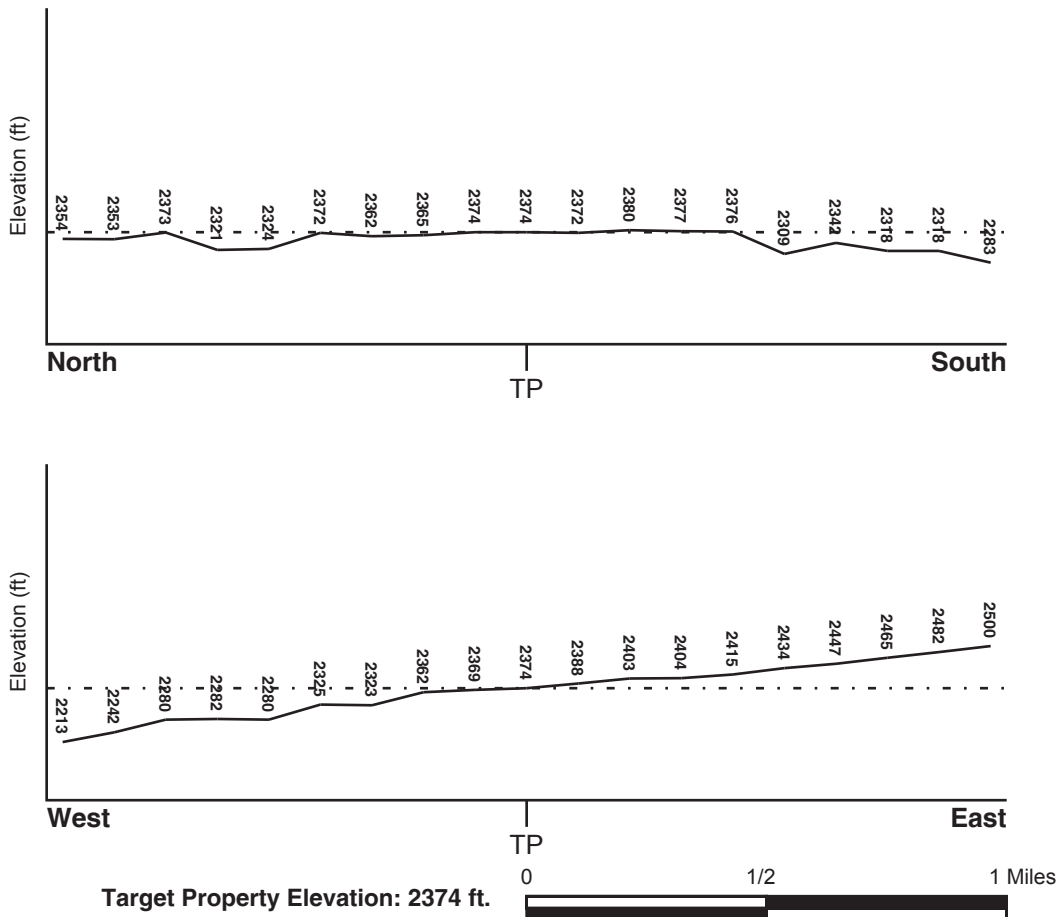

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
RIVERSIDE, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06065C - FEMA DFIRM Flood data

Additional Panels in search area: 06071C - FEMA DFIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
NOT AVAILABLE	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>
A3	1/8 - 1/4 Mile ENE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 5.6
2	14 inches	22 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
3	22 inches	68 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
4	68 inches	74 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

### Soil Map ID: 2

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.3 Min: 5.6
2	22 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
3	31 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.8 Min: 6.6
4	53 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

### Soil Map ID: 3

Soil Component Name: SAN TIMOTEO

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	9 inches	22 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	22 inches	27 inches	weathered bedrock	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:

### Soil Map ID: 4

Soil Component Name: RAMONA

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

1	0 inches	14 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 5.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	14 inches	22 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
3	22 inches	68 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
4	68 inches	74 inches	gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

### Soil Map ID: 5

Soil Component Name: PLACENTIA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.8 Min: 5.6
2	18 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
3	38 inches	57 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.4
4	57 inches	59 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

### Soil Map ID: 6

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

## AREA RADON INFORMATION

State Database: CA Radon

### Radon Test Results

Zipcode	Num Tests	> 4 pCi/L
92320	4	0

Federal EPA Radon Zone for RIVERSIDE County: 2

- Note: Zone 1 indoor average level > 4 pCi/L.  
 : Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.  
 : Zone 3 indoor average level < 2 pCi/L.

---

### Federal Area Radon Information for RIVERSIDE COUNTY, CA

Number of sites tested: 12

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	0.117 pCi/L	100%	0%	0%
Living Area - 2nd Floor	0.450 pCi/L	100%	0%	0%
Basement	1.700 pCi/L	100%	0%	0%

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities  
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater  
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
