City County

Project Description (Proposed actions, location, and/or consequences).

The County of Los Angeles Department of Public Works is proposing the formation and operation of four new Garbage Disposal Districts (GDDs) and/or Residential Franchises (RFs) for the unincorporated County communities within Acton, Agua Dulce, and Antelope Valley. Under the GDD/RF contracts, selected solid waste hauler(s) would provide source-separated collection of refuse, recyclables, and organic waste. Manure collection, bulky items pickup, and illegal dumping pickups would also be provided. The proposed project supports the County’s compliance with statewide targets set forth in Senate Bill 1383 pertaining to diversion of organic waste from landfills.

Identify the project’s significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would not result in any significant or potentially significant effects and no mitigation measures are required.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Increased collection trucks in the Project area leading to dust generation and erosion, particularly on unpaved/dirt roads.  
Potential for additional collection trucks to lead to increased roadway safety hazards.  
Potential for impacts to occur from new/expanded solid waste related facilities that may be needed to serve the Project area.

Provide a list of the responsible or trustee agencies for the project.
