San Jose, California

## PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Ms. Gates:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Property), located in San Jose, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Property.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 and the American Standard Testing Method (ASTM) Practice E1527-13. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-13.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

Jennifer Knipper  
jk/sm/jf

Shawn Munger, CHG

## EXECUTIVE SUMMARY

ENGEO conducted a phase I environmental site assessment for the property located north of the intersection of Montague Expressway and Seely Avenue, in San Jose, California (Property). The Property is approximately 11.16 acres in area and is identified by Assessor's Parcel Number (APN) 097-15-034.

The Property currently consists of vacant land. Previous historical records indicate that the Property has been utilized for orchards since at least the late 1930s.

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of the Property was conducted to review site use and current conditions to check for the storage, use, production or disposal of hazardous or potentially hazardous materials, and to interview persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil, soil gas, or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs), no historical RECs, and no controlled RECs were identified for the Property.

Based on the review of regulatory databases and site reconnaissance, we present information on features of potential environmental concern that were either contained in the databases or observed on the Property. These features were not considered to be RECs. We briefly discuss each feature below.

- According to historical aerial photographs, the Property has been utilized as orchards since at last the late 1930s.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC.

Based on the findings of this assessment, ENGEO recommends the following.

- Soil sampling to identify potential pesticide impacts from the former orchards at the Property.

## **1.0 INTRODUCTION**

### **1.1 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT**

This assessment was performed at the request of Hanover R.S. Limited Partnership for the purpose of environmental due diligence during property acquisition. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Property. As defined in the ASTM Standard Practice E1527-13, an REC is “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”

### **1.2 DETAILED SCOPE OF SERVICES**

The scope of services performed included the following.

- A review of previous environmental reports prepared for the Property.
- A review of publicly available and practicably reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practicably reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of the Property to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Written/oral interviews with owners/occupants and public sector officials.
- Preparation of this report with our findings, opinions, and conclusions.

### **1.3 SITE LOCATION AND DESCRIPTION**

The Property is located north of the intersection of Montague Expressway and Seely Avenue in San Jose, California (Figures 1 and 2). The Property is approximately 11.16 acres in area and is identified by Assessor’s Parcel Number (APN) 097-15-034 (Figure 3).

### **1.4 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES**

The Property currently consists of vacant land. The Property is bounded by commercial and residential developments to the northwest, Coyote Creek Trail to the northeast, agricultural land to the southeast, and Seely Avenue to the southwest. Coyote Creek is located approximately 250 feet northeast of the site.

### **1.5 SITE AND VICINITY CHARACTERISTICS**

According to published topographic maps, the Property ranges in elevation from approximately 34 feet above mean sea level (msl) in the northwest to approximately 35 feet above msl to the southeast. Review of the Geologic Map of Milpitas quadrangle, Alameda, and Santa Clara Counties found that the Property is underlain by surficial sediments of alluvial gravel, sand, and clay (Qa).

Geocheck – Physical Setting Source Summary of the Environmental Data Resources, Inc. (EDR) report (Appendix A) indicated 2 Federal United States Geological Survey (USGS) and 174 State wells located within 1 mile of the Property. Groundwater measurements were not reported. The Physical Setting Source Summary did not provide hydrogeologic information for use as an indicator of groundwater flow direction in the immediate area.

We reviewed the Department of Water Resources On-line Water Data Library for depth to water in the vicinity of the Property. The website identified two wells within 1 mile of the Property. Well Number 06S01W13C009M is mapped approximately 0.2 mile northwest of the Property. Reported groundwater measurements for this well were between 21 and 26 feet below the ground surface. Well Number 06S01W24H015M is mapped approximately 0.9 mile southeast of the Property. Reported groundwater measurements for this well were between 1 and 183 feet below the ground surface.

We reviewed EnviroStor, a website maintained by the State of California Department of Toxic Substances Control, and GeoTracker, a website maintained by the State of California Water Resources Control Board, for nearby facilities with records that include depth to groundwater measurements. The following information was obtained regarding local groundwater conditions.

**TABLE 1.5-1: Local Groundwater Conditions**

PROXIMITY TO PROPERTY	REPORTED DEPTH TO GROUNDWATER	REPORTED GROUNDWATER FLOW DIRECTION
300 feet east-southeast	Between 6 and 13 below the ground surface	North
1,000 feet northeast	Between 14 and 18 feet below the ground surface	Northwest
1,500 feet east	15 to 16 feet below the ground surface	South-southwest

The site-specific depth to groundwater and direction of groundwater flow was not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation and other factors.

We reviewed the Department of Conservation, Geologic Energy Management (CalGEM), formerly the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), website and map database to determine if any historic oil and/or gas wells were located within the Property. No wells were mapped within 1 mile of the Property.

## 2.0 PREVIOUS ENVIRONMENTAL REPORTS

MFG, Inc., Soil and Groundwater Investigation Report, Sakauye Property, Montague Expressway at Seely Road, San Jose, California, Project Number 030197.1, June 26, 2013.

In June 2003, MFG, Inc. conducted a soil and groundwater investigation for the larger 22-acre Sakauye site, which included the Property and the adjacent parcel. The scope of work included the following activities: (1) to assess the potential for environmental impact in the immediate vicinity of the sheds, leach field, and underground storage tanks (USTs) located near the lot line that separates Parcels A and B; and (2) to assess the overall presence of pesticides on Parcel A using a statistically based sampling program.

Four soil borings were located near the proposed lot line, west of Parcel A, three of which were near the former locations of the metal sheds and septic tank. Select soil samples from Parcel A

were analyzed for total purgeable petroleum hydrocarbons (TPPH) (EPA Method 8015), herbicides and pesticides (EPA Method 8081A, 8141, and 8151), volatile organic compounds (VOCs) (EPA Method 8260) and Title 22, Method 17 Metals. TPPH as gasoline and volatile organic compounds were not detected in any of the soil borings. No pesticides or herbicides were detected in Borings B-1 through B-3. In B-4, 4,4 DDE and 4,4 DDT were detected at 1.5 feet bgs at concentrations of 0.56 and 0.16 mg/kg, respectively. Arsenic was detected in one sample (B-4 at 1.5 feet bgs) at a concentration of 14 mg/kg. Arsenic was not detected in any of the other soil samples. All other metals were below the US EPA Region IX Preliminary Remediation Goals for an industrial setting. No significant environmental impact from historical operations in the vicinity of the sheds, leach field, or former USTs on Parcel A was indicated based on the results of the soil and groundwater sampling. Concentrations of all constituents were below the US EPA preliminary remediation goal values for an industrial/commercial setting at the time of this report.

Neither the former UST locations and buildings noted above are within the subject Property boundaries. One of the leach fields may be located on the lot line that separates the two parcels.

Based on the findings of this assessment, there appeared to be no significant environmental impact from historical operations in the vicinity of the sheds, leach field, or former UST locations on Parcel A (Property).

## **3.0 RECORDS REVIEW**

### **3.1 PROPERTY RECORDS**

#### **3.1.1 Title Report/Ownership**

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources.

A Commitment for Title Insurance for the Property, prepared by First American Title Insurance Company and dated January 8, 2021, was provided for our review. The Property title is vested in:

*CMS Investments, LLC, a California limited liability company, an undivided fifty percent (50%) interest, and JDM Investments, LLC, a California limited liability company, an undivided fifty percent (50%) interest.*

No references to environmental liens, deed restrictions or other potential environmental issues were noted. This report is included in Appendix B.

### **3.2 HISTORICAL RECORD SOURCES**

The purpose of the historical record review is to develop a history of the previous uses or occupancies of the Property and surrounding area in order to identify those uses or occupancies that are likely to have led to RECs on the Property.

### 3.2.1 Historical Topographic Maps/Aerial Photographs/Sanborn Maps

Historical USGS topographic maps and aerial photographs were reviewed to determine if discernible changes pertaining to the Property had been recorded. EDR provided the following maps and photographs, presented in Appendices C and D. EDR did not report any Sanborn maps. The summary report is provided in Appendix E.

**TABLE 3.2.1-1: Historical Review Summary**

HISTORICAL MAP/PHOTOGRAPH	YEARS
Topographic Maps	1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, 2012
Aerial Photographs	1939, 1940, 1948, 1950, 1956, 1963, 1968, 1974, 1979, 1982, 1993, 1998, 2006, 2009, 2012, 2016
Sanborn Maps	N/A

In the 1889 topographic map, the Property appears to be undeveloped. Coyote Creek borders the Property to the north and trends northwest to southeast. A northeast-southwest-trending road is visible to the southeast of the Property. Railroad tracks are mapped east of the Property. In the 1939 aerial photograph, a residential structure and barn/storage sheds are located southeast of the Property boundary. Surrounding properties appear to be utilized for agricultural purposes. In the 1950 aerial photograph, a few additional residences and associated barn/storage sheds are located west of the Property. No significant changes are observed until the 1968 aerial photograph when a large rectangular structure has been developed on the parcel located southeast of the Property and across Montague Expressway. Large circular tanks are visible further east-southeast. In the 1974 aerial photograph, more development has occurred south-southeast of the Property. In the 1993 aerial photograph, a large industrial building is located west of the Property. Development has occurred west of the Property including both industrial and residential. No significant changes are observed on the Property until the 1998 aerial photograph. Orchards on the eastern and central portions of the Property have been removed. The southwestern portion of the Property has been developed with row crops. The Property appears to be in the current configuration in the 2006 aerial photograph.

### 3.2.2 City Directory

City Directories, published since the 18th century for major towns and cities, list the name of the resident or business associated with each address. A city directory search conducted by EDR is located in Appendix F. No addresses were identified for the Property. The Property is not listed on the city directory search report. Surrounding properties appear to be commercial/industrial.

## 3.3 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the Property and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

### 3.3.1 Environmental Records

#### 3.3.1.1 Subject Property

The Property is not listed on Environmental Record source databases.

### 3.3.1.2 Other Properties

The following databases include facilities listed within the appropriate ASTM search distances of the Property on Environmental Records sources. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided in Appendix A.

- SEMS-ARCHIVE (3)
- CORRACTS (3)
- RCRA-LQG (5)
- RCRA-SQG (14)
- ENVIROSTOR (41)
- LUST (14)
- CPS SLIC (10)
- HIST LUST (11)
- UST (3)
- AST (6)
- VCP (1)
- CERS HAZ WASTE (13)
- SWEEPS UST (3)
- HIST UST (3)
- FID UST (1)
- CERS TANKS (4)
- DEED (1)
- RCRA NONGEN / NLR (999921)
- ROD (1)
- CA BOND EXP. PLAN (2)
- CORTESE (13)
- CUPA LISTINGS (50)
- HIST CORTESE )(13)
- HWP (3)
- NY MANIFEST (1)
- NOTIFY 65 (2)
- HAZMAT (19)

The following summarizes information for nearby facilities.

#### HKN Partnership (T0608500971)

The facility is located at 691 Montague Expressway in San Jose. The facility is located adjacent to the Property approximately 22 feet southeast. The facility is listed as a Leaking Underground Storage Tank (LUST) Cleanup Site that received closure in December 1999. In 1990, three USTs and three ASTs were removed from the facility. At the time of removal, total petroleum hydrocarbons as gasoline (TPH-g) was detected in soil at a concentration of 1,200 milligrams per kilogram (mg/kg), TPH as diesel (TPH-d) at 650 mg/kg, benzene at 3.2 mg/kg, toluene at 40 mg/kg, ethylbenzene at 21 mg/kg, and total xylene(s) at 130 mg/kg. Following removal, five borings (B1, B2, B3, B5, and Barn 7) and 15 monitoring wells (LF-1 through LF-15) were installed to determine the extent of contamination. The maximum concentrations detected in soil were TPH-g at 4.2 mg/kg, TPH-d at 18 mg/kg, total oil and grease (TOG) at 490 mg/kg, benzene at 2.9 mg/kg, toluene at 1.9 mg/kg, ethylbenzene at 0.78 mg/kg, and total xylenes at 1.4 mg/kg. Maximum concentrations in groundwater were TPH-g at 21,000 micrograms per liter ( $\mu\text{g/L}$ ), TPH-d at 4,200  $\mu\text{g/L}$ , benzene at 2,100  $\mu\text{g/L}$ , toluene at 1,600  $\mu\text{g/L}$ , ethylbenzene at 850  $\mu\text{g/L}$ , and total xylenes at 2,900  $\mu\text{g/L}$ .

In November 1992, overexcavation around the former location of a 550-gallon UST was conducted with 2,400 cubic yards of contaminated soil removed and stockpiled. The stockpile was aerated and 2,100 of the 2,400 cubic yards was confirmed to not exhibit contaminants of concern (COCs) concentrations above respective detection limits. In June 1997, four cone penetration tests (CPTs) were advanced at the facility. Grab groundwater samples collected from the borings detected maximum concentrations of TPH-d at 480  $\mu\text{g/L}$  and benzene at 0.6  $\mu\text{g/L}$ . No other COCs were detected.

Residual concentrations of TPH-g (130 mg/kg), TPH-d (14 mg/kg), benzene (0.77 mg/kg), toluene (0.98 mg/kg), ethylbenzene (1.6 mg/kg), and total xylene(s) (5.7 mg/kg) remained in soil at the

facility, and TPH-g (1,600 µg/L), benzene (140 µg/L), toluene (0.54 µg/L), ethylbenzene (2.3 µg/L), and total xylene(s) (5.7 µg/L) remained in groundwater. The Santa Clara Valley Water District (SCVWD) and the San Francisco Bay Area Regional Water Quality Control Board (RWQCB) issued closure letters in 1999.

#### Quebecor Printing/San Jose Inc. (SL20252870)

The Quebecor Printing/San Jose Inc. facility is located approximately 845 feet south of the subject Property. The facility is listed as a Cleanup Program site and received case closure in 2012. Two source areas were identified during site investigation; southern area – leakage from an underground sump connected to a solvent storage tank used to store a petroleum-based solvent consisting of primarily of toluene, n-heptane, and methylcyclohexane, and releases of TPH-g and TPH-d; and the western area – leakage from a metals plating operation and associated wastewater pre-treatment system. Soil and groundwater contamination at the facility has been reduced via remediation activities (groundwater extraction and treatment, soil vapor extraction and treatment, and soil removal and disposal). However, due to the presence of low-permeability soil, these measures were not as effective as anticipated.

In 2000, the owner, Quebecor World Inc., ceased operations to undertake closure activities with the oversight of the San Jose Fire Department. During the closure, infrastructure such as USTs, ASTs, trenches, and the wastewater pre-treatment system were removed.

Contaminated soil was excavated and removed to the extent feasible in both source areas. Excavations of the USTs in the southern source area were advanced to 14 feet below the ground surface. Oxygen Release Compound (ORC) was injected into groundwater that seeped into the excavation to stimulate additional biodegradation of TPH compounds. Gravel stockpiled from a rail spur was placed into the excavation bottoms to the groundwater level, and stockpiled soil characterized below cleanup levels was then used to backfill the UST excavations. Groundwater was monitored as part of a monitored natural attenuation (MNA) program after excavation of source area soil. All groundwater monitoring wells were destroyed as part of planned redevelopment following the closure of the printing facility. Five new wells were installed as part of the MNA program. Levels of the petroleum solvent in groundwater declined steadily in these wells until they were below detection limits. Residual petroleum solvent is expected to still exist in the source area, declining concentrations are anticipated. A dissolved metals plume migrated approximately 100 feet west from the source area, but it was determined that the remaining dissolved metals were expected to adsorb to the soil matrix, ceasing migration.

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that the noted database sites pose an environmental risk to the Property. Properties that are on the “Orphan Summary” list appear to be located beyond the ASTM recommended radius search criteria.

### **3.4 REGULATORY AGENCY FILES AND RECORDS**

The following agencies were contacted pertaining to possible past development and/or activity at the Property.

**TABLE 3.4-1: Regulatory Agency Records**

NAME OF AGENCY	RECORDS REVIEWED
City of San Jose Building and Planning Departments	We reviewed the City of San Jose’s online permit database. There were no records for the Property.
Santa Clara County Department of Environmental Health	We contacted the Santa Clara County Department of Environmental Health for records relating to the Property. There were no records for the Property.
City of San Jose Fire Department	We contacted the City of San Jose Fire Department for records relating to the Property. There were no records for the Property.
Santa Clara County Assessor’s Office	We reviewed the website and confirmed the APN associated with the Property.
California State Water Resources Control Board	We reviewed the California State Water Resources Control Board’s GeoTracker database for information related to the Property and nearby properties. We did not identify records for the Property. Nearby properties are discussed in Section 2.3.1.2.
Department of Toxic Substances Control	We reviewed the Department of Toxic Substances Control’s EnviroStor database for information related to the Property and nearby properties. We did not identify records for the Property. Nearby properties are discussed in Section 2.3.1.2.

### 3.5 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Public Health has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 37 tests were conducted within the Property zip code, with no tests exceeding the current EPA action level of 4picocuries per liter {pCi/L}<sup>1</sup>).

In accordance with ASTM E2600-15 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); there are no potential petroleum hydrocarbon sources for vapor intrusion within 1/10 mile of the Property or volatile organic compound (VOCs) sources within 1/3 mile of the Property.

## 4.0 SITE RECONNAISSANCE

### 4.1 METHODOLOGY

ENGEO conducted a reconnaissance of the Property on June 18, 2021. The reconnaissance was performed by Wyatt Iwanaga, a Staff Engineer at ENGEO. The Property was viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The Property was also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Photographs taken during the site reconnaissance are presented in Figure 4.

<sup>1</sup> California Department of Public Health – Radon Program–  
(<https://www.cdph.ca.gov/Programs/CEH/DRSEM/CDPH%20Document%20Library/EMB/Radon/Radon%20Test%20Results.pdf>).

## 4.2 EXTERIOR OBSERVATIONS

The following table summarizes our observations during the reconnaissance:

**TABLE 4.2-1: Exterior Site Observations**

FEATURE TYPE	OBSERVATIONS
Structures	No structures were observed during the site reconnaissance.
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No hazardous substances or petroleum products were observed within the Property during the site reconnaissance.
Storage Tanks (underground and above-ground)	No above-ground storage tanks or evidence of existing underground storage tanks was observed during the site reconnaissance.
Odors	No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.
Pools of Potentially Hazardous Liquid	No pools of potentially hazardous liquid were observed within the Property at the time of our reconnaissance.
Drums	No drums were observed on the Property at the time of the reconnaissance.
Polychlorinated Biphenyls (PCBs) Containing Equipment	No potential PCB-containing equipment, including transformers, was observed within the Property during our site reconnaissance.
Hazardous Substances and Petroleum Product Containers	No hazardous substance or petroleum product containers were observed on the Property at the time of our reconnaissance.
Pits, Ponds, and Lagoons	No pits, ponds or lagoons were observed within the Property at the time of our reconnaissance.
Stained Soil/Pavement	No stained soil or pavement was observed within the Property at the time of our reconnaissance.
Stressed Vegetation	No signs of stressed vegetation were observed on the Property at the time of our reconnaissance.
Solid Waste/Debris	No disposal of solid waste was observed at the subject property.
Stockpiles/Fill Material	No stockpiles or fill material was observed on the Property during the reconnaissance.
Wastewater	No wastewater conveyance systems were observed at the Property during the reconnaissance.
Wells	No wells were found within the Property during our site reconnaissance. No indication of municipal water system service was observed during our site reconnaissance.
Septic Systems	No septic systems were found within the Property during our site reconnaissance. No indication of municipal sewer system service was observed during our site reconnaissance.

## 4.3 ASBESTOS, LEAD, AND PCB-CONTAINING MATERIALS

No structures are currently located on the Property.

## 5.0 INTERVIEWS

Ms. Kristen Gates, representing Hanover R.S. Limited Partnership, completed an environmental site questionnaire pertaining to user-related applicable environmental information regarding the Property. In the questionnaire, Ms. Gates did not identify potentially environmentally related

issues with the Property. The questionnaire is presented in its entirety in Appendix G. A summary is provided below.

Ms. Gates is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. She has indicated that the purchase price of the Property is reflective of fair market value of the Property.

Ms. Alice Karolewski, an authorized agent of the Property owner, completed a “Key Site Manager” environmental site questionnaire pertaining to applicable past and present uses and physical characteristics of the Property and surrounding properties. In the questionnaire, Ms. Karolewski did not identify potentially environmentally related issues with the Property.

Ms. Karolewski is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. Ms. Karolewski indicated that the Property was formerly used for farming. The questionnaire is presented in its entirety in Appendix G.

## 6.0 FINDINGS AND CONCLUSIONS

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil, soil gas, or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no RECs, no historical RECs, and no controlled RECs were identified for the Property.

Based on the review of regulatory databases and site reconnaissance, we present information on features of potential environmental concern that were either contained in the databases or observed on the Property. These features were not considered to be RECs. We briefly discuss each feature below.

- According to historical aerial photographs, the Property has been utilized as orchards since at last the late 1930s.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC.

This assessment has revealed evidence of RECs and environmental concerns in connection with the Property. Due to the identification of row crops and orchards; ENGEO recommends the following:

- Soil sampling to identify potential pesticide impacts from the former orchards at the Property.

## **7.0 LIMITATIONS**

### **7.1 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE**

There were no significant deviations from the ASTM standard.

### **7.2 OPINIONS AND DATA GAPS**

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The data gaps identified during this process do not affect the conclusions as to the presence or lack of presence of RECs at the Property. We did not identify any data gaps during preparation of this report.

### **7.3 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT**

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports, and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. ENGEO assumes no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after completion of the report. Updates of portions of the assessment may be necessary after a period of 180 days after completion.

This phase I environmental site assessment is not intended to represent a complete soil, soil gas, or groundwater characterization, nor define the depth or extent of soil, soil gas, or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. A more extensive assessment that would include a subsurface exploration with laboratory testing of soil, soil gas, and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment

activities are considered for the Property and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

#### **7.4 SPECIAL TERMS AND CONDITIONS**

ENGEO has prepared this report for the exclusive use of our client, Hanover R.S. Limited Partnership. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the Client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the Client.

Laboratory testing of soil, soil gas, or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), or a mold survey. A radon evaluation was not performed.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. ENGEO would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

CA RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### **Federal CERCLIS NFRAP site list**

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

## EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 41 CA ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 10 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 3 CA UST sites within approximately 0.25 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 50 CA CUPA Listings sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 10/10/1991  
Comments: Completed PEA. Sampling and analysis determined that the concrete pad area contained the highest concentration of pesticides and petroleum hydrocarbons. The following contaminants were found in the soil near the concrete pad: lead (2.5 to 1900 ppm), total petroleum hydrocarbons (29 to 280,000 ppm), DDT (0.016 to 3.34 ppm), diquat (0.044 ppm), paraquat (0.015 ppm), and toxaphene (0.2 to 0.063 ppm). No pesticides or petroleum hydrocarbons were found in the groundwater. Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 10/23/2001  
Comments: Confirmation samples detected low level contamination that pose no threat to public health. No further action is required.

Hazardous Waste Summary:

Waste Code: D000

Waste Description: Not Defined

Waste Code: D001

Waste Description: IGNITABLE WASTE

Waste Code: D002

Waste Description: CORROSIVE WASTE

Waste Code: D003

Waste Description: REACTIVE WASTE

Waste Code: D004

Waste Description: ARSENIC

Waste Code: D006

Waste Description: CADMIUM

Waste Code: D007

Waste Description: CHROMIUM

Waste Code: D008

Waste Description: LEAD

Waste Code: D009

Waste Description: MERCURY

Waste Code: D011

Waste Description: SILVER

Waste Code: D035

Waste Description: METHYL ETHYL KETONE

Waste Code: F001

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P012  
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: U188  
Waste Description: PHENOL

Waste Code: U213  
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Violations:**

Site ID: 433903  
Site Name: EUGENUS, INC  
Violation Date: 06-13-2018  
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)  
Violation Description: Failure of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site to accept, treat, store, or dispose of a hazardous waste at the facility, area, or site, without a hazardous waste facilities permit or other grant of authorization from the department, or a permit-by-rule, conditional authorization, or conditional exemption permit from the CUPA.  
Violation Notes: FACILITY APPEARS TO BE TREATING A HAZARDOUS WASTE BUT FAILED TO OBTAIN AN ON SITE TREATMENT PERMIT FROM HMCDC.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: PBR  
Violation Source: CERS

**Evaluation:**

Eval General Type: Other/Unknown  
Eval Date: 06-07-2018  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: On site with Ethan McDermott to conduct a hazardous waste permit investigation of Eugenus Inc. after they submitted an HMBP to CERS declaring hazardous waste generation. Facility is R&D for semiconductors equipment. Facility has been operating on site since September 2017. Facility walk through was conducted with Joel Custodio, EH&S Manager. Mr. Custodio stated that they have been accumulating hazardous waste since January 2018. Facility has had no hazardous waste pick-ups. The following hazardous waste streams were observed on site: IPA saturated wipes contaminated piping and valves - coming from chemical vapor deposition The facility will be permitted for hazardous waste generation based on these observations. Notes: EPA

ID is active on time of visit. Facility treats waste water coming from wet bench where new wafers are being cleaned, and is later discharged into POTW. Treatment unit receives ammonia- hydrogen peroxide- water mixture or HF-water Expired [Truncated]

Eval Division: Santa Clara County Environmental Health  
Eval Program: HW  
Eval Source: CERS

Eval General Type: Other/Unknown  
Eval Date: 06-13-2018  
Violations Found: Yes

Eval Type: Other, not routine, done by local agency  
Eval Notes: INSPECTION COMMENCED ON 6/11/2018 AND CONCLUDED TODAY. ON SITE WITH JOEL CUSTODIO TO CONDUCT A LIMITED WALK THROUGH OF THE FACILITY AND NEUTRALIZATION UNIT. THE FACILITY OPERATES ONE WET BENCH WHERE WAFERS ARE CLEANED IN BATH MIXES OF 200:1 AND 100:1 HYDROGEN FLUORIDE. ONCE BATHS BECOME SPENT A VALVE BELOW THE WET BENCH IS OPENED TO ALLOW FLOW TO A LIFT STATION, SUBSEQUENT RINSES AUTOMATICALLY FLOW THE LIFT STATION AS WELL. ONCE THE LIFT STATION REACHES A SPECIFIC LIQUID LEVEL, THE LIQUID IS PUMPED VIA PIPE TO THE NEUTRALIZATION TANK. WASTE NEUTRALIZATION OCCURS ONCE LIQUID WASTE ENTERS THE TANK.

Eval Division: Santa Clara County Environmental Health  
Eval Program: PBR  
Eval Source: CERS

Eval General Type: Other/Unknown  
Eval Date: 07-20-2018  
Violations Found: No

Eval Type: Other, not routine, done by local agency  
Eval Notes: SAMPLING WAS WITNESSED ON JULY 18, 2018. ON SITE WITH JOEL CUSTODIO A EUGENUS REPRESENTATIVE AND ELIA K. LIRA WITH DATA LAB TO OVERSEE WET BENCH SAMPLING OF THE 200:1 HF BATH, 100:1 HF BATH AND HYDROGEN/30% HYDROGEN PEROXIDE BATH. SAMPLE RESULTS: 200:1 BATH, 3.03 pH 100:1 BATH, 2.95 pH HYDROGEN AND 30% HYDROGEN BATH, 10.65 pH HYDROGEN FLUORIDE BATHS SAMPLES WERE TAKEN TO BE ANALYZED FOR FLUORIDE.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).

Violation Notes: Returned to compliance on 10/29/2018. The UDC sump for the master dispenser is significantly under-sized for the dispenser (much of the piping in the dispenser is above the area outside the UDC footprint, and diesel residue from fuel releases was observed outside the UDC). Apply for a UST minor retrofit permit from HMCD to have a qualified contractor retrofit this dispenser with an appropriately-sized dispenser conversion frame.

Violation Date: 06-15-2017  
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)  
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.  
Violation Notes: Returned to compliance on 05/17/2018. Leaked diesel was observed pooled at the bottom of the under dispenser containment (UDC) sump for the master dispenser. Diesel from current leaks and grimy residue from past leaks was observed on the dispenser housings and on and near the fueling islands. This is particularly evident beneath the fuel filter mounted outside the master dispenser between the dispenser and the hanging hardware. Tighten or replace any leaking fittings as soon as they are discovered. [Note: No repair permit from HMCD is required for replacement or repairs of equipment located above the shear valves.]

Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).

Violation Notes: Returned to compliance on 10/29/2018. DESIGNATED OPERATOR FAILED TO RECORD AND PROVIDE FOLLOW UP TO THE DIESEL FILL SUMP ALARMS DATED 7/6/2017 AND 7/5/2017.

Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.  
Violation Notes: Returned to compliance on 10/29/2018. The installed "snap taps" indicate that annual testing of the Vaporless Manufacturing model 2000 mechanical line leak detector (MLLD) installed on the Red Jacket turbine has been done by simulating a 3.0 gallon-per-hour leak at the master GasBoy dispenser. Testing the lines at this point is not in conformance with the testing procedure specified by the MLLD's manufacturer, Vaporless Manufacturing, which requires that testing be done at the dispenser located farthest from the MLLD location. Furthermore, since the fuel dispensers at this facility consist of a central master dispenser with two satellite dispensers which appear to be supplied by the master dispenser, testing at the master dispenser does not demonstrate that the MLLD is also capable of monitoring the piping running between the master dispenser and the satellite dispensers. Ensure that your testing contractor performs 3.0 g.p.h. leak tests at both satellite dispensers this year to confirm that the master [Truncated]

Violation Notes: method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion. Returned to compliance on 05/17/2018. The spill bucket failed hydrostatic testing today, Have it repaired to restore it to a liquid-tight condition. [Note: The leak is into the tank fill pipe, not the fill sump, so this is likely a drain valve issue. Provided that the repairs are limited to the drain valve and the bucket itself does not need to be replaced, no permit from HMCD is required for this work.]

Violation Date: 06-18-2019  
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)  
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.  
Violation Notes: Returned to compliance on 07/17/2019. DUSTO FAILED TO NOTE IN SECTION IX THAT THE FACILITY WAS OVERDUE FOR THE OVERFILL INSPECTION FOR THE MONTHS OF NOVEMBER 29, 2018 AND DECEMBER 21, 2018 REPORTS. MARCH 2019 REPORT WAS UNAVAILABLE FOR REVIEW.

Evaluation:  
Eval General Type: Other/Unknown  
Eval Date: 02-23-2015  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: Onsite to witness secondary containment testing (SB989) for a Underground Storage Tank system. Testing conducted by Balch Petroleum Inc. System is single tank with fill and STP sumps. Single product line feeds three dispensers. Vent line also present. STP and fill sumps will filled with water to above highest product piping penetration and tested using the Caldwell accelerated test method. Both technicians (E Mortera and R Henninger) had valid Caldwell certifications. -- Sumps passed, showing no loss over 30 minutes. Product piping containment was pressurized to 3.8 psi for one hour without loss Vent piping containment was pressurized to 3.0 psi for one hour without loss. --Noted that prior secondary testing was conducted at 3 psi, so pressures are within range of last test. Did not witness testing of the under dispenser containment units during the inspection.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-22-2017  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility performs value added services to third party companies such as testing, reworking, and assembly of integrated circuits. Most customer services are for military application. Facility generates the following hazardous waste: IPA/flux solvent waste from product cleaning. Approximately 10 gallons per year is generated. Facility has 1 re-work station and uses mostly silver/copper/tin solder. Observed some solder splatter on the floor. Ensure a routine cleanup of hand soldering waste. Waste larger than 100 microns may be recycled as scrap metal. 100 microns or smaller must be managed as hazardous waste. Any metals that exceed hazardous waste limits must be managed as hazardous waste if not recycled as scrap metal. Tinning area has 1 active solder dip operation that is rarely used. Observed 2 additional solder dip units that are in storage with hardened solder. Observed solder splatter on the floor. Wipes contaminated with only Isopropyl alcohol and that [Truncated]

these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**1000819491**

City: MILPITAS  
Facility ID: San Francisco Bay 43I018867  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 2  
Facility Telephone: 4089541100  
Facility Contact: Ron Heitz  
Agency Name: HONEYWELL  
Agency Address: 1804 Mccarthy Blvd  
Agency City,St,Zip: Milpitas 95035  
Agency Contact: Ron Heitz  
Agency Telephone: 4089541100  
Agency Type: Private  
SIC Code: 3674  
SIC Code 2: Not reported  
Primary Waste Type: Not reported  
Primary Waste: Not reported  
Waste Type2: Not reported  
Waste2: Not reported  
Primary Waste Type: Not reported  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number: Not reported  
Local Agency: SANTA CLARA COUNTY LOP  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S1E19E02f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History:

In 2003, the Santa Clara Valley Water District and Regional Water Quality Control Board requested a subsurface investigation of MTBE at the subject property due to the fact it has operating underground storage tanks located within 2000-feet of a water supply well. Three monitoring wells were installed to monitor the MTBE concentration in the groundwater on a quarterly basis. MTBE was detected in groundwater and subsequent investigations defined the extent of contamination both on and off-site. In 2013, based results of periodid monitoring, the levels on contamination have been reduced enough to qualify for closure under the State Water Resources Control Board Low-Threat Underground Storage Tank Case Closure Policy. The subject property is located in a commercial I retail/ industrial part of City of San Jose in the County of Santa Clara, California. It is located on the southwest corner of Montague Expressway and 0' Toole Avenue in the City of San Jose, California. For additional information related to the case, please visit the County of Santa Clara's DEH website for the case here:

Violation Description: 16, Section(s) 2715(c)  
Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).

Violation Notes: Returned to compliance on 05/15/2018.

Violation Description: Chapter 16, Section(s) 2636(f)(2)  
Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitor at least hourly. Be capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g. Restrict or shut off the flow of product through the piping when a leak is detected.

Violation Notes: Returned to compliance on 05/15/2018. THE ELECTRONIC LINE LEAK DETECTOR FOR THE DIESEL TANK FAILED TO SIMULATE A LEAK AT 10 PSI. THIS WAS AN ISSUE LAST YEAR AS WELL. TECHNICIAN SEEMS TO THINK DUE THE LENGHT OF THE PIPING, THE LINE BUILDS UP A LOT AIR AND DIESEL HAS TO BE PUMPED OUT BEFORE THEY TEST LINE LEAK DETECTOR AGAIN. NOTIFY OUR AGENCY IN WRITING HOW THIS ISSUE WAS RESOLVED.

visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 01/09/2020. DO Report on 7-1-2019 has an incorrect "date last performed" for the secondary containment testing and provides an inaccurate date of 1-11-2018 instead of 1-17-2018. Additionally, owner failed to sign DO report dated 1-18-2019 indicating that section III and V were reviewed/completed. When compliance issues are identified on DO report, a owner/operator signature is required. Lastly, DO failed to acknowledge and describe resolution for the following sensor alarms: 06-10-2019 L2 87 STP - Fuel alarm. No acknowledgment on DO inspection report dated 7-1-2019. 06-10-2019 L5 91 STP - Sensor out alarm. No acknowledgment on DO inspection report dated 7-1-2019. 08-11-2019 L6 91 Fill - Fuel alarm. No acknowledgment on DO inspection report dated 8-21-2019. 11-19-2019 L12 (UDC 5/6) - Fuel alarm. No acknowledgment on DO inspection report dated 12-13-2019.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 12/04/2018. OVERFILL WAS NOT INSPECTED AT LEAST ONCE BEFORE OCTOBER 13, 2018.

Violation Notes: automatic sprinklers, or water spray systems.  
Returned to compliance on 12/20/2017. The facility does not have adequate amounts of spill control equipment (e.g. absorbent) on-site in the event of a spill or release of hazardous waste, as evidenced by the insufficient amount of absorbent on-site to prevent the diesel spill from entering the storm drain on 8/17/2017. Only approximately 5 gallons of absorbent could be located during the spill and the facility had to rely on the spill control equipment of a neighboring business to prevent additional diesel from entering the storm drain. Acquire sufficient quantities of spill control equipment to prepare for and respond to emergencies.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).

Violation Notes: Returned to compliance on 09/21/2017. 1) UDC PAN: Upon arrival, the UDC annular space sensor (L11) was in alarm and approximately 2 cups of Bravo monitoring fluid were observed in the UDC pan. Per the available DUSTO reports, alarm history reports, and maintenance records, the UDC annular space sensor (L11) has also alarmed on at least the following dates: 2017: 7/18, 6/28, 5/10, 5/9, 5/8, 4/3, 4/2, 3/29, 3/26, 3/25, 11/25, 11/24, 11/2, 11/1 2016: G Multiple alarms in December, G 10/10, 8/1, 7/8, 1/16 2015: 8/8, 4/26, 3/20 2014: 5/28 2013: 11/18 Each time a service technician responded to a UDC annular space alarm, the monitoring fluid level was noted to be very low and 8 ounces G 1 quart of monitoring fluid was added each time by a Propel service technician/Propel personnel. Numerous records indicate that monitoring fluid was observed in the UDC pan. During this inspection, the service technician investigated the cause of the leak and determined that at least one leak is located at the bottom of [Truncated]

Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)  
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.  
Violation Notes: Returned to compliance on 09/21/2017. Four smart sensors vacuum monitor the following interstitial spaces and are programmed with the following vacuum volumes: S1: Diesel HPR Product Line: 150 gallons S2: Diesel HPR and E-85 vent lines: 150 gallons S3: E-85 Product Line: 50 gallons S4: G Future Vapor RecoveryG Line: 50 gallons The Diesel HPR product line, E-85 product line, and G future vapor recoveryG line are approximately equal in length and travel a very short distance (approximately 25 feet per visual inspection). The vent lines travel to the back of the building and are significantly greater in length. The Diesel HPR product line vacuum volume equaling the vent linesG vacuum volume and being much greater than the E-85 product line vacuum volume is not consistent with the UST system layout. The 50 gallon vacuum volume for the E-85 product line and future vapor recovery line is also inconsistent with the very short distance between the UST

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.

Violation Notes: Returned to compliance on 09/21/2017. 1) The hard, pressurized product piping in the dispenser is leaking Diesel HPR. Liquid and old diesel residue was noted both on the piping and at the bottom of the dispenser. 2) Such a significant fuel odor emanated from the diesel HPR STP sump that the immediate vicinity of the sump had to be evacuated when the sump was opened, in order to allow the sump to ventilate. After 2 hours of ventilation, the sump was determined by the service technician to still be unsafe for entry and the sumps' communication could not be tested during inspection. NOTE: For VPH systems, G product tight means impervious to the liquid and vapor of the substance that is contained, or is to be contained, so as to prevent the seepage of the substance from the containment. G Evaluate the source of the leaks and submit a work plan to HMCD for review. Depending on the scope of work, a retrofit/repair permit from our office may be needed.

Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.  
Violation Notes: Returned to compliance on 12/20/2017. As noted in the comments section of the UST systems inspection report, Propel FuelsG contact, Will Faulker, was instructed to and confirmed that Propel would identify the waste diesel that was cleaned up by Fremouw Environmental Services by its proper DOT description and applicable waste code (e.g. 343) on the manifest used for transport and not make a waste determination based on the commingled waste stream (i.e. water, diesel, sediment), but the waste diesel was shipped on manifest # 017607642JJK (Ship Date: 8/18/2017) as G non-RCRA hazardous waste, liquid (oily water)G and identified by waste code 223 (unspecified oil-containing waste). Per the dieselG s SDS, the DOT proper shipping name for the diesel is G UN 1202 DIESEL FUELG and the proper state waste code would be either 343 or 331, depending on the specific waste stream. (Note that per the SDS, renewable diesel has a flash point higher than 140 degrees fahrenheit and does not meet the ignitability characteristic).

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.  
Violation Notes: Returned to compliance on 09/21/2017. Diesel HPR Fill Sump: Approximately two cups of brine and a plastic trash bag were observed in the sump during inspection. Significant staining on the outside of the sensor reservoir, from brine spilling from the reservoir, was also observed. During the inspection, free-flowing quantities of brine continued to flow from the sensor reservoir and into the bottom of the sump. The service technician could not remove the sensor from the reservoir without brine continuously spilling out of the reservoir. The plastic trash bag was located just below the sensor reservoir where the brine was spilling. Pools of brine were noted both on the bag and in the low points of the sump. Containment Solutions sump installation manual states that the proper monitoring fluid level in the reservoir is 1.5 inches from the inside bottom of the reservoir. Any additional brine volume would not allow for a leak to be detected at the earliest opportunity. Remove the excess brine from the sumpG s [Truncated]

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 10/10/2016. The Diesel UST fill spill spill bucket failed, apparently due to a leaking drain valve (no leakage into the fill sump was observed). Disregard the comment below regarding cessation of filling of the tank, but repair the bucket as soon as possible. No permit is required to replace drain valve or fittings, but a repair permit is required prior to replacing the bucket itself if that is necessary.

Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Violation Notes: Returned to compliance on 12/20/2017. During the diesel release on 8/17/2017, it was observed that employees are not appropriately trained on proper waste handling, the location of all required emergency response equipment, how to properly complete a hazardous waste label, and the quantity of hazardous waste containers on-site. Propel employees relied on HMCD inspectors and the neighboring business to instruct them on how to appropriately respond and manage the hazardous waste. Provide additional hazardous waste training to all employees who handle hazardous waste to ensure that hazardous waste is properly handled and managed.

Eval Notes: All underground storage tank (UST) system leak detection equipment was tested today by UST Service Technician Joey Mesa of Gettler-Ryan, Inc. and functioned properly except as noted above. Mr. Mesa has current ICC UST Service Technician certification (2/4/2017), Veeder-Root Level 4 certification (4/9/2017), and Vaporless Manufacturing (VMI) LDT-890 line leak detector tester certification (5/10/2017). UST systems are equipped with VPH monitoring. The Veeder-Root model 794380-303 hydrostatic tank annular sensor was tested by raising it out of the tank interstitial fluid, then inverting it to obtain both low-liquid and high-liquid audible and visual alarms on the Veeder-Root TLS-350 console. (Tanks are a compartmented unit sharing a common annular space.) Two submersible turbine pump (STP) sumps, 2 fill sumps, 1 under dispenser containment (UDC) sump, and 1 vent line transition sump model 794380-208 liquid sensors were tested using water to obtain fuel alarms. Six model [Truncated]

Eval Division: Santa Clara County Environmental Health  
Eval Program: UST  
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection

Eval Date: 08-21-2017

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: The following minor violations were observed, but corrected at the time of inspection: G020C: Three 55 gallon drums of hazardous waste were not marked with the initial accumulation date and the proper physical state (marked as solid when containing liquids) G110C: Equipment and debris blocked access to the hazardous waste accumulation area and spill control equipment. On-site to conduct a routine hazardous waste inspection. The facility is an un-staffed motor vehicle fueling station with two underground storage tanks (USTs) that dispense diesel HPR and E-85 flex fuel from one dispenser. Hazardous wastes are generated from customer spills and drive-offs, as well as maintenance and repairs on the UST system. Waste streams include but are not limited to spilled fuel, used fuel filters,

Eval General Type: Other/Unknown  
Eval Date: 08-21-2017  
Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: On-site on Thursday 8/17/2017, to complete the Annual Monitoring System Certification (AMC) that began on 8/11/2017, with Tank-Tek service technician, Robert Slunaker. Mr. Slunaker has a current ICC service technician certification, Veeder-Root certification, and VMI LDT-890 certification. Today's follow-up inspection was to test the hydrostatic interstitial communication for all four sumps and the diesel HPR line leak detector that could not be tested during the original 8/11/2017 AMC, as noted in the previous inspection report. Propel District Operations Manager of Northern California, Mike Karaer, was on-site at the beginning of inspection and remained nearby during the inspection. The Veeder Root 848480-001 line leak detector (PLLD) was tested with a simulated leak right at 3.0 gallons per hour at 10 psi three times, but failed to detect a leak and shut off the flow of product through the piping when a leak is detected. To investigate the cause of the failure, the [Truncated]

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site ID: 402214  
Site Name: SILICON MICROSTRUCTURES, INC  
Violation Date: 03-25-2014  
Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)  
Violation Description: Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.

Violation Notes: Returned to compliance on 09/24/2014. A PHASE I ENVIRONMENTAL ASSESSMENT WAS UNAVAILABLE DURING THE INSPECTION.

Violation Division: Santa Clara County Environmental Health  
Violation Program: PBR  
Violation Source: CERS

Site ID: 402214  
Site Name: SILICON MICROSTRUCTURES, INC  
Violation Date: 03-25-2014  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/07/2014. THE FOLLOWING CONTAINERS WERE NOT MARKED AS REQUIRED: -SEVERAL SATELLITE CONTAINERS THROUGH THE FACILITY WERE MISSING THE ACCUMULATION START DATE OR WAS DATED LONGER THAN THE 90 DAYS BUT THE CONTAINERS ARE EMPTIED DAILY. CHEM LAB -OBSERVED 2 X 5 GALLON CONTAINERS MISSING THE START DATE AND HAZARD PROPERTY FACILITIES PAD -1000 GALLON SOLVENT TANK AND A 600 GALLON HF TANK NOT MARKED WITH THE WORD "HAZARDOUS WASTE" AND THE ACCUMULATION DATE. RECOMMEND MARKING THE CONTENTS OF THE TANK. -OBSERVED A 5 GALLON CONTAINER FOR THE PHOTO RESIST MISSING THE START DATE.

Violation Date: 03-11-2020  
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)  
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 04/09/2020. Most recent tank system assessment dated 11-13-2019 had the following issues: 1) System age identified as 23 years old which makes this tank a "new tank"; however, facility failed to ensure the system was assessed as a new tank (66265.192(k)(1)-(11)) 2) Assessment inaccurately describes the system was modified as follows: "Two additional holding tanks, one (1) for wastes with high acid concentrations, low pH, and one (1) for wastes with high base concentrations, high pH, were added to the system to help prevent system slugging and to reduce the use of neutralizing chemicals." These two holding tanks have been acquired, but have not been used or incorporated into the system in any way. 3) Report misidentifies Ammonium Hydroxide (NH4OH) as Ammonium Nitrate and indicates it is one of the waste waters received by the treatment system.

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: 1 acid waste neutralization system on-site. Corrosive waste (concentrated and dilute forms) from the fab and scrubber system is sent to the waste treatment system for pH adjustment. Concentrated corrosive baths, rinses including metal and hydrofluoric acid, and corrosives from container rinsing are sent via gravity to the 1st of 3 tanks in an below grade tank. pH adjustment occurs in 3 tanks. All three tanks and final sample point have independent pH probes that are calibrated and cleaned monthly (log reviewed). pH that is out of specification (outside pH 6.5-11.5 parameters) in tank 3 triggers a text to the facility and maintenance team's phones. Further deviations from this pH results in an audible alarm. pH that doesn't meet POTW discharge allowance is detected via the tank 3 probe and will activate a rejection mode, closing off flow to the POTW and collecting in multiple 100+ gallon sized backup tanks which are piped to return waste to tank 1. Facility appears [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-11-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	EPA ID # CAD982501066. Facility is a RCRA large quantity generator (LQG) in at least some months of the year. Facility primarily manufactures sensors for pressure sensing. Waste solvent tank is single walled but in an appropriately sized secondary containment. Secondary containment has a sensor that provides a alarm should liquid be detected. A high level alarm is triggered once reaching approximately 3/4 capacity full. Reviewed documentation including: Uniform Hazardous Waste Manifests Land Disposal Restrictions (LDRs) Bills of Lading Hazardous Waste Tank Assessments (dated 11-13-2019) Biennial Report (2019 reporting year) Waste Minimization Plan (SB14) (August 2019) Documented Tank Inspections Training & Training Records

Violations:

Site ID: 378038  
Site Name: Kamet Precision Machining & Assembly  
Violation Date: 08-02-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 08/22/2019. The following containers of hazardous waste were unmarked or insufficiently marked: 1x250 gal tote of used oil/coolant - no current accumulation start date, accurate generator address, physical state, or statement of hazard. 1x250 gal tote of used oil/coolant - no marking.  
Violation Division: Santa Clara County Environmental Health

Site ID: 378038  
Site Name: Kamet Precision Machining & Assembly  
Violation Date: 08-02-2019  
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9  
Violation Description: Failure to manage a recyclable material pursuant to HSC 6.5 25143.2(b), (c), or (d).  
Violation Notes: Returned to compliance on 08/22/2019. Observed 2x55 gal unmarked containers of used coolant that is awaiting phase separation of the oil from the coolant prior to potentially returning the coolant back to a machine.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 378038  
Site Name: Kamet Precision Machining & Assembly  
Violation Date: 08-02-2019  
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.  
Violation Notes: Returned to compliance on 08/22/2019. Perform hazardous waste determinations on the following: Metals from the fine filters located in some of the larger CNC machines, and from the coolant recycling influent filter. Filters currently are emptied into the scrap metal stream. Determine if particles less than 100 microns are in these filters; if so, determine if they meet hazardous waste criteria. 13x5 gal containers of oil, some marked "good", and some marked "used". Spent filters from the downdraft/vacuum sanding deburring tables. Used generator knowledge (eg mill spec sheets) or perform analytical testing on the spent filters. If testing, perform a totals CAM 17 TTLC

metals from the coolant that is being recirculated. Deburring is performed manually over a downdraft table. No tumbling or media blasting occurs on-site. Facility reclaims coolant used on site via a tank that provides for particle filtration and phase separating of oil from coolant. Separated oil is skimmed and disposed of as hazardous waste while the coolant is returned to the process. Sometimes new coolant is mixed with the phase separated coolant if a higher percentage of coolant is called for in a certain machine. The only coolant placed through this recycling process is coolant extracted from CNC machine reservoirs. Reviewed [Truncated]

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Secondary Waste Type: Not reported  
 Design Flow: 0  
 Baseline Flow: 0  
 Reclamation: Not reported  
 POTW: Not reported  
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 11/02/1994  
Comments: Completed Site Screening. On December 13, 1989, the SF Regional Water Quality Control Board (RWQCB) issued Order No. 89-182 addressing site investigation cleanup of the soil and groundwater pollution. From 1993 to 1999, a combined soil vapor and groundwater extraction operated on the site. The cleanup plan did not meet expectations. Removal efficiency was low and there were a number of operational difficulties due to site soil conditions. The RWQCB issued an amended order, requiring excavation of vadose zone soil that exceeds the risk based cleanup goals; and monitored natural attenuation for impacted groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 01/29/1990  
Comments: Completed Site Screening. During the investigation of groundwater, free product containing toluene and hexane was discovered in one monitoring well. The free product is believed to be the result of an overflow from an underground sump connected to the solvent recovery system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 12/18/2001  
Comments: The Regional Water Quality Board is actively overseeing the cleanup of the site.

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: IGNITABLE WASTE

Waste Code: D002  
Waste Description: CORROSIVE WASTE

Waste Code: D007  
Waste Description: CHROMIUM

Waste Code: D008  
Waste Description: LEAD

Waste Code: D010  
Waste Description: SELENIUM

Waste Code: F003  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

**GASOLINE AND DIESEL PRODUCERS**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

**HAZARDOUS AIR POLLUTANT MAJOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Benzene, Other Chlorinated Hydrocarbons, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History: The Equilon site (formerly Shell Oil) is an operating petroleum product distribution terminal, which is used to store gasoline, diesel fuel, and fuel additives. The 9.6-acre site is located on the northeast side of Coyote Creek in a commercial area of San Jose. The site began operation in the mid 1960s, as it was constructed from 1964 to 1965. The site includes four (4) aboveground fuel tanks, three (3) aboveground fuel additive tanks, a (1) below-grade 4,000-gallon transmix tank, a four-lane fuel loading rack, three (3) aboveground wastewater tanks, and several buildings. The plant stores and distributes three (3) grades of gasoline from the truck loading rack.

Title:	13267 Requirement for Technical Reports/Information for Shell San Jose Terminal
Description:	13267 letter requires 5 report submittals aimed at achieving and demonstrating full delineation of TPH, BTEX, and MTBE impacts to groundwater, source identification and evaluation, and a comprehensive remedial action plan for all impacts. The letter also requires a report documenting storm water sampling to better evaluate storm water discharge threats and BMP appropriateness. Submittal due dates range from January 15, 2007 through August 15, 2007.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 03/04/1993  
Comments: PCE and gasoline spills in June '84 and December '85 recently triggered countyt involvement. Preliminary assessment of 1987 recommended DTSC (then DHS) and city of San Jose review permit to upgrade spill containment. But also says No Further Action (NFA). No further action per EPA preliminary assessment for the site only determined that the hazard ranking score (HRS) would not admit it into National Priority List (NPL). DTSC's recommendation on re-evaluation of the site reflects the departments own criteria. Recommendation is County Lead. Limited DTSC involvement anticipated.

POTW: Not reported  
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Name:	KINDER MORGAN (SFPP) SAN JOSE TERMINAL
Address:	2150 KRUSE DR
City,State,Zip:	SAN JOSE, CA 95131
Region:	STATE
<b>Facility Status:</b>	<b>Open - Verification Monitoring</b>
Status Date:	06/19/2019
Global Id:	SL0002020074
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.392088
Longitude:	-121.9124639
Case Type:	Cleanup Program Site
Case Worker:	AJK
Local Agency:	Not reported
RB Case Number:	2189.8397
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Surface water
Potential Contaminants of Concern:	Aviation, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	SFPP owns and operates a bulk petroleum storage and distribution terminal at the site. This facility was originally constructed in the 1950s and has since been expanded several times. The current facility consists of 33 aboveground storage tanks used to store diesel, gasoline, and aviation fuels. Seven loading rack facilities where transport trucks are filled with petroleum product are also present at the site. SFPP has conducted numerous subsurface assessments to evaluate soil and groundwater conditions at the site since the late 1980s, including the installation of 33 groundwater monitoring wells and the advancement of 88 soil borings; and semi-annual groundwater monitoring currently takes place.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

**HAZARDOUS AIR POLLUTANT MAJOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**AIR MAJOR**

**STATE MASTER**

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 401965  
Site Name: SFPP LP  
Violation Date: 03-22-2018  
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)

Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 04/20/2018. The periodic tank assessment conducted in December, 2015 does not address the seismic bracing of the tanks, not does is specifically demonstrate that the containment for the tanks is adequately sized.

Violation Division: Santa Clara County Environmental Health  
Violation Program: CA  
Violation Source: CERS

Site ID: 401965  
Site Name: SFPP LP  
Violation Date: 03-22-2018  
Citation: HSC 6.5 25200.3(c)(6),25200.3(c)(7) - California Health and Safety Code, Chapter 6.5, Section(s) 25200.3(c)(6),25200.3(c)(7)

Violation Description: Failure of the generator to prepare and maintain onsite, for a period of five years, adequate records to demonstrate that requirements and conditions of the grant of conditional authorization are met.

Violation Notes: Returned to compliance on 03/22/2018. Facility does not have analytical data to demonstrate that the influent to the holding tanks does not exceed 750 ppm total of potentially regulated organic constituents (mainly benzene). IGNORE THE CORRECTIVE ACTION BELOW AND IMMEDIATELY COLLECT REPRESENTATIVE SAMPLES OF EFFLUENT FROM THE OIL WATER SEPARATOR TO DEMONSTRATE THAT TOTAL ORGANIC CONCENTRATION OF REGULATED SPECIES DOES NOT EXCEED 750 PPM. IF IT DOES, YOU WILL NEED TO CHANGE YOUR AUTHORIZATION LEVEL TO PERMIT BY RULE AND COMPLY WITH ALL APPLICABLE REGULATIONS FOR THAT TREATMENT TIER.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-22-2018  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Inspection began 3/13, completed 3/22, report delivered 3/26. Inspection conducted with Molly Pritz, Hazardous Materials Specialist II. Facility operates under EPA ID CAD063566152. Facility is identified as a RCRA LQG, and generally generates waste in larger episodic events or more than 1000 kg in a month rather than routinely. SFPP/Kinder personnel identified site as location where they own the infrastructure used to store fuels, but they don't actually own the product. Site generates wastes which area managed by placing them in the "transmix" tanks. Three main feeds to the transmix tanks are (1) pipeline interfaces; (2) batch wastes "from Concord"; (3) products floated in the Oil Water Separator. Additional smaller quantity feeds include dump station at jet fuel/biodiesel load rack, sink at pipeline sample 'shack', --SFPP/KinderMorgan has made claim that the transmix is not owned by them, but by its customers. The contents of the transmix tanks is allocated to its [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-22-2018  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Inspection walkthrough conducted 3/13, review of documentation took place 3/22. Facility has SPCC plan dated April 2016. Plan was originally produced June, 2003. 5 year review and modifications noted 10/31/08, 6/13/13, 10/5/15, and 4/20/16. Each amendment accompanied by PE recertification. 5-year review signed and approved by management. Site has buried pipeline which carried various petroleum products underground to site, where it comes aboveground and is routed to various storage tanks. Storage tanks then distribute to series of loading racks, with different rack loading areas assigned or dedicated to certain products. Site also stores series of petroleum based additive materials which are blended with stored fuels at the loading racks. Generally, fuel storage tanks are located within one of two containment structures, with earthen floors and cinderblock walls. Site has completed and SPCC references soil compaction data to demonstrate impermeability. -Drainage of [Truncated]

Waste Code: D003  
Waste Description: REACTIVE WASTE

Waste Code: D007  
Waste Description: CHROMIUM

Waste Code: F003  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006  
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007  
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F009  
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 11-19-2014  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: Facility walk through and document review completed 11/18/2014 and report delivered today. Optical electronic component manufacturer using semiconductor processes. Reliability testing done on full components. Wipes contaminated with solvents, waste flammable solvents and universal waste generated. Acid waste waters from processing equipment and scrubbers treated in on site acid waste neutralization (AWN) unit, permitted under Permit By Rule tier of Tiered Permitting. EPA ID# CAR000057539 active. Manifests in good order. Training given to all employees on hazard awareness and emergency procedures.
