 Coastal Zone Noise Solid Waste Land Use
 Drainage/Absorption Population/Housing Balance Toxic/Hazardous Cumulative Effects
 Economic/Jobs Public Services/Facilities Traffic/Circulation Other: _____

Present Land Use/Zoning/General Plan Designation:

Primarily residential, parks and open space, commercial, public/institutional/school, and mixed use.

Project Description: (please use a separate page if necessary)

The Walnut Creek Water Treatment Plant (WCWTP) is the primary water treatment facility serving approximately 500,000 customers in EBMUD's east-of-hills service area, which includes portions of Pleasant Hill, Lafayette, Walnut Creek, Alamo, Danville, Blackhawk, and San Ramon Valley. The WCWTP primarily treats Mokelumne River water stored in the Sierra foothills at Pardee Reservoir, but also treats water stored locally in Briones Reservoir. The WCWTP Pretreatment Project will add improvements to the WCWTP that will allow EBMUD to more reliably treat lower quality untreated water resulting from high rainfall runoff, wildfires, future droughts, algae blooms, climate change and emerging contaminants. The project would also improve treated water taste and odor. Hydraulic changes at the WCWTP would require modification of weir structures at the Lafayette WTP off Mt Diablo Blvd.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
