Present Land Use/Zoning/General Plan Designation:

semi-rural, rural, semi-rural residential; S92, C42

Project Description: *(please use a separate page if necessary)*

The proposed Live Oak Springs Water System Improvements Project consists of potable water distribution system upgrades for the community of Live Oak Springs in the Boulevard Community Planning Area. The improvements are designed to bring the existing water system up to the public water systems standards, create potable water service reliability and eliminate service interruptions, develop a redundant water source as back-up to the current well, upgrade and replace failing and deteriorating water system components and piping, and provide a reliable source of fire suppression during fire seasons. The proposed project would be completed in phases over several years. Phase I improvements would occur within the existing County-owned parcel and construction is anticipated to last approximately 4 months. The future components are conceptual with no current engineering design. Construction duration of future phases would vary; however collectively, they are anticipated to last approximately 12 to 18 months.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
