

CEMEX USA adds low-emission natural gas trucks to Southern California fleet

Houston, Texas - July 14, 2022

CEMEX USA announced today the company has added close to 40 low-emission natural gas-powered trucks to replace diesel powered vehicles in its Southern California fleet as part of efforts to achieve carbon neutrality throughout its value chain by 2050.

CEMEX's new state-of-the-art trucks, which started to be delivered in April, are all powered by low emission compressed natural gas (CNG) or renewable natural gas (RNG). The company is integrating the 30 ready-mix and eight tractor Peterbuilt CNG/RNG trucks into operations while removing the same number of older, diesel-powered vehicles from its fleet. By replacing the older diesel vehicles with CNG/RNG
