\*Incomplete data due to site closure in September 2021.

\*\*Salton Sea Air Basin

-- Pollutant not monitored

ppm - Parts Per Million in air, by volume

ppb - Parts Per Billion in air, by volume

AAM - Annual Arithmetic Mean

a) The federal and state 8-hour CO standards (9 ppm and 9.0 ppm, respectively) along with the federal and state 1-hour CO standards (35 ppm and 20 ppm, respectively) were not exceeded.

b) The current (2015) O<sub>3</sub> federal standard became effective December 28, 2015.

c) The NO<sub>2</sub> federal 1-hour standard is 100 ppb and the annual standard is 53.4 ppb. The state 1-hour and annual standards are 180 ppb and 30 ppb, respectively.

d) The federal SO<sub>2</sub> 1-hour standard is 75 ppb. The state 1-hour and annual standards are 250 ppb and 40 ppb, respectively.

e) District Maximum is the maximum value calculated at any one station in the South Coast AQMD jurisdiction.

f) Statistics are calculated with a dataset that aggregates the highest concentration at any station in the South Coast Air Basin for each day and pollutant. Therefore, concentrations are the maximum value observed at any station in the South Coast Air Basin. Number of daily exceedances are the total number of days that the indicated concentration is exceeded at any station in the South Coast Air Basin.

\*Incomplete data due to site closure in September 2021.

\*\* Salton Sea Air Basin

µg/m<sup>3</sup> – Micrograms per cubic meter of air

AAM – Annual Arithmetic Mean

-- Pollutant not monitored

- g) PM10 statistics listed above are based on combined Federal Reference Method (FRM) and Federal Equivalent Method (FEM) data. High PM10 (≥ 155 µg/m<sup>3</sup>) data recorded in the Coachella Valley and the Basin (due to high winds) are excluded because they likely meet the exclusion criteria specified in the U.S. EPA Exceptional Event Rule. Exceptional event demonstrations will be submitted to U.S. EPA for events that have regulatory significance.
- h) State annual average PM10 standard is 20 µg/m<sup>3</sup>. Federal annual PM10 standard (50 µg/m<sup>3</sup>) was revoked in 2006.
- i) PM2.5 statistics listed above represent FRM data only with the exception of Central Orange County, Metropolitan Riverside County 1, Metropolitan Riverside County 2, South Coastal LA County 2, I-710 Near Road, and CA-60 Near Road, where FEM PM2.5 measurements are used to supplement missing FRM measurements as outlined in the U.S. EPA Response Letter (dated October 31, 2022) to the South Coast AQMD PM2.5 Continuous Monitor Comparability Assessment and Request for Waiver (available with a Public Records Request). PM2.5 concentrations above the 24-hour standard attributed to fireworks are excluded because they likely meet the exclusion criteria specified in the U.S. EPA Exceptional Event Rule. Exceptional event demonstrations will be submitted to U.S. EPA for events that have regulatory significance.
- j) Both Federal and State standards are 12.0 µg/m<sup>3</sup>.
- k) Lead is measured in Total Suspended Particulate (TSP) samples. Federal lead standard is 3-months rolling average (0.15 µg/m<sup>3</sup>); state standard is monthly average (1.5 µg/m<sup>3</sup>). Note 3-month averages include data from November and December 2020. Higher lead concentrations were recorded at near-source monitoring sites immediately downwind of stationary lead sources. Maximum monthly and 3-month rolling averages recorded at near-source sites were 0.083 µg/m<sup>3</sup> and 0.057 µg/m<sup>3</sup>, respectively. Lead standards were not exceeded at any site.
- l) State 24-hour sulfate standard is 25 µg/m<sup>3</sup>. There is no federal standard for sulfate.
- m) District Maximum is the maximum value calculated at any one station in the South Coast AQMD jurisdiction.
- n) Statistics are calculated with a dataset that aggregates the highest concentration at any station in the South Coast Air Basin for each day and pollutant. Therefore, concentrations are the maximum value observed at any station in the South Coast Air Basin. Number of daily exceedances are the total number of days that the indicated concentration is exceeded at any station in the South Coast Air Basin.
